One thing in particular that had been spoken of by the postmaster not only harrassed me in my dreams, but annoyed me in my waking moments; that was the size and general characteristics of Turpin's dog Towser. We must pass Turpin's on our way south into the mountains. There was no way out of it, for Turpin was the only man in that neighborhood who had a canoe, and the Nehalem was deep and vicious, and besides, from what we could learn, it was about the only place that afforded a decent prospect of a trail out to the south. We were informed that Towser had a disagreeable habit of tackling, without the slightest provocation, everything (not so small as to be beneath his dignity) that exhibited life south of the Nehalem River, except the immediate members of the Turpin family, and they were on their good behavior when Towser wasn't feeling well. He had pulled down elk, had been in numerous personal encounters with bears, wolves and cougars, and had killed wildcats single-handed and alone. As the natural result of such a disposition in such a country he was said to be a mass of scars from his nose to his tail. He had never had a mouthful to eat except what he had secured by his own prowess in the forest; for the Turpins themselves had flour and the other luxuries of civilization at only extremely rare intervals, and couldn't afford to "tote" a sack of flour twenty-five miles to feed to a dog.

Somehow I didn't like this Towser business. Mike was with us, and in all probability Towser would celebrate our crossing of the Nehalem by wiping Mike from the face of the earth, if he didn't get a smell of us beforehand and swim the river to meet us.

But after our morning coffee we shouldered our packs and struck out for Turpin's, crossing as unconcernedly as if we had no misgivings about Mike's safety and were anxious to get acquainted with the whole Turpin family, Towser and all. As we approached the river we could see the little shake-roofed cabin on the other side, with the blue smoke curling above as the good frontier people prepared their frugal breakfast; but, thank goodness, Towser was nowhere in sight. Little did he dream that even then two strangers and a strange dog were stealthily approaching his lair.

But here was the river with its roaring rapids and shadowy pools, and we sat down on the bank of the stream to enjoy the scene and await events. While we were sitting there admiring the beautiful stream and listening to its deep melodies as it thundered down toward the great ocean, a beautiful dark-haired girl, with rosy cheeks and the step of the doe, came tripping down the path on the other side with a bucket on her arm. Perceiving us she stopped short and stared at us as if we were visitants from some other world.

"Good morning, Miss," said I, "where is Towser?"

My plainness of manners and dress, added to my apparent familiar acquaintance with the family, encouraged her and she modestly answered; "I don't know, sir, but expect he's up at the house."

"Is he tied up?" I asked.

"I don't know, sir," she answered.

"Well," said I, "tell Johnny to tie him up, as we want to cross over." That did settle it, for apparently I knew the whole family from Towser down, so she disappeared up the path like a deer and presently reappearing informed us that Towser was tied.

"Is he tied with a chain or a rope?" I queried, to which she responded; "He's tied with a boom chain, sir."

Thanking the Miss for this eminently satisfactory condition of affairs, I asked her to tell her father to please come down and set us across. "I'll set you across, sir," said she, and in a jiffy she had the old canoe headed for our shore and was paddling it across in a way that would make Hanlon ashamed of himself. How in the world she could stand in that old dugout and handle it herself as she did is a mystery to such a land-lubber as I. The Doctor, Mike and I crowded into the frail concern and in a twinkling we were on our journey across. The boat commenced to rock and she quickly warned the Doctor and me to sit down in the bottom or the boat would tip over. Ye gods, what a picture! Two great, strapping men and a dog sitting flat in the bottom of a canoe with a 16-year-old girl standing up in the stern putting us across. The Doctor tried to compromise with sentiment by offering to pay the young lady, so that it might appear that we were transferred by a chartered ferry company that were bound to set us over for a legal compensation, but she wouldn't have it, and laughingly remarked as she turned to her water bucket: "Oh, that is nothing, I wouldn't think of taking pay, sir." There was an opening left for the Doctor, however, and he took advantage of it by filling the water bucket and carrying it up the hill; whereupon we met and introduced ourselves to the Turpin family, consisting of the Mr. and Mrs., four pretty daughters, two skookum boys and Towser. However, Johnny was only nicely in his teens, while the other boy was properly the baby and pet of the household. Annie, the youngest girl, was one of the prettiest flaxen-haired little girls I ever saw, while the eldest was now a Mrs. Peterson, but still with her husband residing under the Turpin paternal roof. Rather strange, but nevertheless true, there was not one of the Turpin children that had ever seen any of the world outside of the Nehalem Valley. I believe that, as a family, it was one of the purest bred frontier families I ever met. One generation and a step toward the second without knowledge of the world outside the narrow Nehalem Valley, except in so far as knowledge might have been gathered by the family fireplace when father and mother talked of their childhood days.

And yet I never met a set of girls more womanly and modest, nor a boy for his years more brave and manly, than the pretty Turpin girls and their strapping brother Johnny. Sweet little Annie told me that she had never seen a store doll baby, and after our return from the trip back to Portland, a package containing one of those modern dolls that closes its eyes when laid down and opens them again when taken up was placed in the post-office directed to Miss Annie Turpin, Vesper City P. O., Clatsop county, Ore., with kind regards of Mr. and Mrs. Greene, and I will venture to say that that baby is combed and dressed every morning and cradled to sleep every night by one of the most tender and affectionate little mothers on earth.

S. H. Greene.

Portland, Ore.

## "THE BIG BOULDER."

Charlestown, N. H., Oct. 1.—Three weeks ago, on one of the cool bright mornings which herald the coming of actual autumn, after the fog had lifted from the valley and the fresh air and bright sunshine tempted me for a ramble, I struck out over the hills some three miles to an outlying farm, to bear a verbal message to its owner, one of "the boys in blue," who had "turned his sword into a plowshare," and whose old Colonel, of the Thirty-second Massachusetts, I had met a few days previously in Lowell, and been charged by him with a greeting to his favorite Corporal.

I had been hearing for a week great stories of the wonderful invasion of gray squirrels, so I got out the old muzzleloader from its long retirement, replenished the old shot-belt and flask and started again over "the old squirrel route" I described a year or two since in Forest and Stream. The walk was uneventful. I climbed the steep upper terrace, lingered a few moments under the big oaks at the old gate, and then as before, bore up the ravine of the little brook to the top of the ridge.

The brook was voiceless, a few still pools in the deeper holes among the rocks showed that some underflow through the gravel kept them from drying up entirely, but there was no current and no need to clear the channel of fallen brush, and when I reached the spring at the head a shallow puddle offered no temptation to quench my thirst.

As I reached a little glade half way up the rise a ruffed grouse or "patridge" in the vernacular as spoken by Sam Lovel and "Antwine," whirred off out of a bunch of little thorn-trees, heard but not seen, into undergrowth of alders, as I climbed a rail fence, but gave me no chance for a shot. I sauntered slowly and leisurely on, stopped for a few moments at the "white stone" at the foot of the tall pine, then again, at a point where some spring storm had broken a big red oak 18in. through square off at the butt, and brought it down square across the path, bringing a partly decayed chestnut of equal size with it in its fall. Though clad in a "dead bark" suit, with a pair of rubber soled tennis shoes on my feet, and moving as quietly as possible through the woods, I neither saw nor heard further sign of any game, and in due time reached the old fallen chestnut among the beeches and sat down for a smoke. As my eyes wandered over the old initials on the beach trunk, which I have spoken of before, they fell on another set, which I did not then notice, cut about the same time and which help to illustrate the migratory and progressive spirit of the genuine "Yankee boys!"

The boy who cut those letters, twenty years ago, is now one of the leading citizens of Seattle, has built a "horse raiload" there and is now projecting an electric line to Tacoma, and it is highly probable that some of your Pacific coast correspondents may be able to interpret that "F. H. O." cut on the old beech, here in New Hampshire woods.

I reached my friend's house a little before noon, and as I got to his gate, three young men with guns came across the pasture, from a point some 300 or 400 yards beyond where I left the wood, and met me at his door. They pulled eight fine, fat squirrels out of their pockets, and I found that they had preceded me about an hour over the same path all the morning, which accounted for the absence of game when I came along.

George had just finished loading his wagon with corn fodder, and was coming in to dinner, and it needed no urging to induce me to accept his invitation to join him and his family in a good, old-fashioned, country "farmer's dinner." Sweet corned beef, mealy potatoes and a squash, and apple pie and cheese were most grateful to the appetite, sharpened by my tramp in the cool air.

My friend was hugely delighted to get the cordial remembrance of his old commander, and after dinner we sat on "the porch" and smoked and talked over "war times" for an hour or so, when I shouldered arms again and started on, following the old route.

As I crossed the top of the bridge I found the axe had made further havoc among the oaks, and I soon came in view of the valley to the west. The river, now quite in its summer bed, sparkled in the bright sunshine as it wound its sinuous course through the meadow, now touching the bluffs to the right and now to the left, and leaving broad sweeps of rich mowing-land, impartially and alternately in New Hampshire and Vermont.

I say "mowing-land," for the valley is almost entirely devoted to hay now, here and there the yellow of an oat-stubble or the brighter green of a patch of tobbaco or potatoes break the uniform grass tint, but the old "checker-board" appearance of my boyish days is gone. Every man then raised his own corn and rye, but they now come more cheaply from "the West," and hay is the most profitable crop. The autumn tints are just beginning to show, here and there a Virginia creeper is turning to red over a stone wall, and the sumachs began to be brilliant, while in the wet swales on the hillside a swamp maple glows in crimson now and then, or, perhaps, throws out a single scarlet bough from a mass of green, like a torch of defiance to inevitable winter. Instead of following the old road down as I did two years ago, I bear sharply down the steep hillside, to a prominent landmark well known all the country round as the "Big Boulder." The long terrace of which I have spoken is here terminated by a projecting spur from the hillside, and on the outer edge of the terrace, caught by the point of the spur, rests a

huge rock rounded and waterworn, of an entirely different character. The "bed rock" is a seamy, quartz-veined mica slate, the boulder gray, or lichened outside, but dark bottle-green, where broken, is granite, and Prof. Hitchcock, the State Geologist, says came from Mt. Ascutney, eighteen miles to the north, brought down in the glacial drift of the "great Ice Age."

It is perhaps twenty feet long, by sixteen wide, and as many high, and rests, as I have said, on the very edge of the terrace, 200 feet above the meadows, just caught against the projecting spur of seamy slate. The top of the boulder is about on the same level as the top of the spur, and its base is buried in the thin, sheep-nibbled turf some 200 feet down the slope to the north.

What a force it must have been to bring this mass of stone some 400 tons weight down eighteen miles and land it high on the hillside! Unless, as is more probably the case, the whole valley below has been cut away since this boulder was dropped there.

The view from it in both ways, up and down the river, is superb. The bold shoulder of the "Fall Mountain" at Bellows Falls, cuts off the prospect to the south, six miles below, while the lookout to the north passes the precipitous cliff of "Skitsiwauke" and is closed by the great dome of Ascutney, whence the big boulder started on its travels. An easy and delightful walk from the village of a mile and a half along the terrace overlooking the meadows, it is a favorite resort of the young people of the village as well as of the summer visitors.

How long this huge rock has rested here, poised on the brink of the terrace, I leave for the geologists to decide; certainly thousands, probably tens of thousands; probably millions of years. It no doubt lay here bedded in the primal forest, while the Egytian sculptors were carving the Sphinx, as we are on the edge of the oldest known rocks in the world. The Waubenakee hunter has no doubt often hidden behind it, as he lay in wait for the deer, picking his way down the little rivulet which slowly trickles through that low swale a few yards to the north on his way to the meadows to feed.

Had it hearing and speech, it might tell of the Indian war whoop and the answering musket shot when old Captain Phonehas Stevens with his thirty pioneers "held the fort" in the valley below for two days against 200 French and Indians, and finally repulsed them, baffled of their expected prey, 150 years ago.

It might have seen the gathering of the New Hampshire militia, which General John Stark mustered at the same old fort, ere he marched them across Vermont to fight the battle of Bennington and crown Molly Stark's name with glory instead of widow's weeds. Our friend Rowland E. Robinson has told all this in his graphic history of "The Foundation of Vermont," and I will dwell no longer on the subject.

I satiate my eyes, as often before, with the prospect, and again start for the village, but instinct leads me in to the woods again under the shadows of the oaks, and although I find many trees under which the ground is strewn with shells or half-eaten, wormy acorns, I see or hear no game. To be sure, it is still to early for the squirrels to be out to supper, but I am not bloodthirsty enough to wait for them, I have had my tramp, delivered my message and cheered the heart of an old "comrade," and as I start down the lane from the woods, I empty both barrels in a long waking shot at a brace of knots in the fence, fairly chipping one with the No. 8's from my left, while the less numerous charge of No. 6's in the right only groove long, slanting splinter-furrows in the hard hemlock boards around the other. VON W.

# Natural History.

## THE PANTHER'S SCREAM.

*Editor Forest and Stream:*

Is "Stanstead" correct in his statement in your issue of Oct. 8 that the scream of the panther is all a myth and that this cat is so unlike all the other cats that he "has no voice except a growl and a short, spiteful 'yik'"? I have never met the panther in the open but seem to remember distinctly hearing a caged one at Central Park cry loudly after the manner of the domestic cat. If the panther has no voice and what has so often been taken for his was "made by other beasts or owls," the realists among story writers ought to know it. I never hear of the cry of the panther, which has time and again been reported to be of wonderfully human quality, but I remember Charles Dudley Warner's story of hearing, as he supposed, a panther's cry at night upon the mountain side in the Adirondacks. Joseph Cook had said that the voice of modern culture was but "an infant crying in the night and with no language but a cry," and from the sound Warner concluded that the panther and modern culture must be the same thing. C. H. AMES.

## ANOTHER TAME MOOSE.

HALIFAX, Oct. 5.—Knocking about the country last week I was asked if I would like to see a live moose, and said yes, by all means. The owner of the house stepping to the door sang out, "Nellie, Nellie; here, Nellie;" and in a few moments I heard the sound of a cowbell tinkling off in the woods, and directly there came trotting toward us one of the prettiest little creatures I have ever seen. Sure enough it was a moose, about four months old and as tame and gentle as could be.

It came right up and allowed us to pat its neck, rub its nose, etc. The owner gave it a slice of bread, which it ate with great relish, and then he put a piece on the ground, when I was astonished to see that before it could pick it up it had to kneel down on its front legs. This was a new feature to me, and I spent some two hours watching its movements. Whenever it went to crop the grass or pick up food (that was on a level bit of ground) down it would flop on its front knees, and standing on its hindlegs it did look too comical for anything.

I was surprised that it was allowed to roam the woods, and remarked that some fine night it would disappear. But the owner said, "Oh, no; it always comes back to the house, and sometimes it spends two and three nights in the woods at a time, but shows up again all safe and sound."

It is a beautiful animal, and I felt tempted to buy it, but not having a suitable place for keeping it in I refrained from doing so; but it does seem a pity not to own it, and if any of your friends would like it I will be happy to give the address of its owner. H. AUSTEN.

### Migration of Hawks.

*Editor Forest and Stream:*

Mr. Jas. L. Smith, of Hackettstown, N. J., speaks of an unusual flight of hawks on Sept. 21. It is an annual occurrence and was evidently made up of migrating birds. I secured on Sept. 27 (on which date the flight occurred with us) a half dozen specimens, as follows: Two broad-winged (*B. pennsylvanicus*), two sharp-shinned (*A. fuscus*), one Cooper's (*A. cooperi*) and one sparrow (*F. sparverius*), the latter a male, fine plumage. I had them put up, and while green took them from the taxidermist and have posed them to suit myself. I have grown tired of the conventional style of mounting all my birds on perch or panel and find that a very satisfactory effort is produced by fixing them in a death-like position, and when dry hanging them by the feet to a picture nail. It gives an opportunity for the display of plumage and, being a decided departure from the orthodox methods of taxidermists, makes a pleasing contrast with other specimens mounted in the usual way. I would say that the annual migration of hawks with us varies but a few days from year to year, although of late there seems to be a steady falling off in numbers. The main flight passes with a northwest wind from Sept. 15 to 28, coming from east to southeast against the breeze.

BAY RIDGE, L. I. WILMOT TOWNSEND.

### Another Panther Incident.

NORRIS, Texas, Sept. 28.—Rather an interesting panther combat took place on the banks of Devil's River, near here, in which an old lady, sixty years, two dogs and a panther took an active part. The house and kitchen are about 15 or 18ft. apart with a brush arbor connecting them. "Grandma Neil," as she is called by her friends, was standing under the arbor washing her face and hands, when something ran against her with considerable force. Turning to see what it was, she found a 9ft. panther standing against her skirts. At the same instant one of the dogs made a rush for it, when it sprang into a live oak that stood near the door. The commotion attracted the other dog and they kept the beast up the tree for a few minutes, when it sprang out with the dogs in hot pursuit. They caught it as it attempted to jump the fence and pulled it back. At this stage of the fight Mrs. Neil ran up, and by a well-directed blow killed it instantly, splitting its head open with an axe. In telling me the story her grandson expressed my sentiments when he "wished I had Grandma's sand." RIO DIABLO.

### Land Birds at Sea.

HUDSON, N. Y., Oct. 10.—On Sunday, Sept. 25, a large number of high-holes appeared on their way south. On Monday, Sept. 26, I took the steamer Richmond from New York for Norfolk, Va. The next morning while out of sight of land the ship was visited by a number of high-holes, one kingfisher, one woodpecker, some yellowbirds. Some of them remained on and around the ship until we landed at Norfolk the next night. They appeared to be very tired, and had evidently been blown off shore in the night as there was a strong west wind blowing all night. I noticed two high-holes start for shore and fall in the water exhausted. H.

# Game Bag and Gun.

*"Game Laws in Brief," United States and Canada, illustrated, 25 cents. "Book of the Game Laws" (full text), 50 cents.*

## IN NEW ENGLAND WOODS.

BOSTON, Oct. 8.—Boston gunners are active, and they are being fairly successful. For this success they may reasonably thank the Massachusetts Fish and Game Protective Association for its efforts in restocking with game birds. It seems that this restocking is beginning to show more fruits, game being relatively more plenty than in Maine and New Hampshire, where no restocking has been done. Understand that I say relatively, and I am sure that gunners who have tried both sections of the country will agree with me. Mr. L. W. DePass, assistant secretary of the Boston Chamber of Commerce, with his friend C. W. Hodgkins, of Reading and of the Boston and Albany Freight Office, has recently returned from his annual gunning trip to the Cape. They had excellent success with shore birds, bringing down a plenty of winter yellowlegs, grass birds, and some winter snipe. They found the quail very plenty, but these they did not disturb, for the open season does not begin till Oct. 15. They saw several coveys with at least twenty birds in each. They found these birds much more plenty than they were in the same location a year ago. They were also informed that snaring is not being practiced in that section, as it was last year even. Partridges they found to be fairly plenty also. The universal opinion in that section is that the restocking done by the committee of the Fish and Game Protective Association is bringing up the shooting from almost nothing to very respectable proportions.

Mr. Claud H. Tarbox, of the Boston Chamber of Commerce, with his brother-in-law, J. Orin Bailey, has made a number of short gunning trips this fall. They both live in Byfield and they usually gun together. Mr. Bailey is lame and obliged to depend upon a crutch for one leg, and yet he manages to get around in the fields and woods about as well as most men with two good legs. His love for shooting is great, notwithstanding that he must follow it under difficulties. The other morning they drove four or five miles down into Newbury to hunt for gray squirrels. That morning they secured twelve squirrels and a partridge. On several occasions they have secured a partridge apiece. They report partridge fairly plenty for Massachusetts, and gray squirrels very plenty.

Mr. E. M. Gillam, with his friend Mr. Bacon, both of the Boston *Advertiser*, started for the Cape on a gunning expedition on Saturday evening. They go down to Sandwich and will be quartered in a farmhouse owned by Mr. Henry Pinkham, financial editor of the *Advertiser*. Mr. Pinkham has lately bought the old homestead, and he proposes to make a summer resort of it and a gunning resort for himself and friends. The boys will go into camp there, by invitation of Mr. Pinkham. Reports mention game as plenty there.

It is not in good taste to speak of one's self in a newspaper article, and the best writers rarely use the pronoun I. But on this occasion I hope that the readers of FOREST AND STREAM will excuse me if I mention what has fallen to my lot to observe. I have just returned from my autumnal trip to the Maine woods and waters. I have visited the old camp at Richardson Lake and, permit me to say right here, that had I been aware of the absolute scarcity of game in that section, I might have been tempted to have staid at home. I have had the outing and seen nature in her most beautiful autumnal robes, and that ought to satisfy me. But it is a fact that I had hoped all the season to find some grouse shooting. But these birds are most remarkably scarce in the Rangeley Lakes region, and I hear the same story about other sections of that State. We tramped wood roads and followed carries for many miles, where on former seasons dozens of birds have frequently been the reward of a day's outing, and for two days of this work we did not see a single partridge. We obtained now and then an old grouse, it is true, but we saw not a single flock; only solitary old male birds—very hard to get.

On my trip, and especially on my way out, I interviewed dozens of guides and hunters, and obtained the same verdict from all, though it came out rather unwillingly in cases where the persons interviewed are interested in guiding or transporting hunters. Partridges are most remarkably scarce. I also asked for the cause. Generally the person interrogated expressed his inability to fathom the mystery, but in several cases the reply was emphatic that the scarcity of partridges is due to a great increase in foxes. One guide of long experience says that he has never known the foxes so thick as at the present time. They are very bold, even coming near to houses and barns and carrying off poultry. The guides and hunters express the idea that the young birds especially have all been destroyed by foxes. The idea is also expressed that the utter extermination of the ruffed grouse in Maine is likely to be the result of this increase in foxes. It is also suggested that the Maine Legislature at its next session should offer a bounty for the destruction of the fox family. It is possible that later more partridges may appear, even in the sections of Maine where they are not to be seen at this time; but it is scarcely probable. The guides claim that in some seasons they are not seen till late.

But there are moose and deer in Maine. It is possible that moose are more abundant than usual this fall. One has been tracked down between Mount Aziscohos and Observatory, in the Richardson Lake region. He was a big fellow and followed the bog for several miles. By the way, Dr. Haven, of Boston, with the Thayers, owners of Birch Lodge, has leased the right of flowage on this bog, and has a gang of men at work putting in a dam about a mile and a half above where the brook that drains the bog joins with Beaver Brook. He will raise the water four or five feet and make of the bog a private trout pond. The Doctor has built a beautiful camp on Beaver Island in Richardson Lake the past season.

But to return to the moose. He made tracks down the road and past the dam where the men were at work, and it is pretty plain that he was then somewhere between Aziscohos and Richardson Lake. It will be remembered that one came down over about the same ground a year ago, but that he was soon after killed when attempting to swim the lake just above the narrows. A moose has recently been killed in the vicinity of Enfield, Me., and a big one. Mr. Walter Hill, of John P. Squire & Co., the well known Boston pork packers, says that he had the pleasure of dining off a moose steak at Enfield the other day. A big moose has also been seen in the neighborhood of Kingfield, or rather toward Eustis several miles above.

Deer are really quite plenty in Maine, and the open season for them has well started. I had the pleasure of seeing probably the first one killed in Maine in the open season. He was put on board the Sandy River baggage car at Strong on the morning of Oct. 3. The gentlemanly conductor of the Sandy River train called my attention to a crowd in the depot at Strong. This conductor is a good deal of a sport himself, and he takes great delight in such matters. His salutation to me, as he touched my shoulder, was: "There he is! The first one of the season! But it is only one of the dozens that will come down over this road." The deer was labeled A. J. Pettigrew, Livermore Falls, Me. Soon after I found Mr. Pettigrew, a very modest young hunter, but proud of his success. The deer, about a two-year-old buck, was killed fairly on the first day of the open season. He was taken at a pond some eight miles from Eustis. Mr. Pettigrew says that the sport of lugging one end of the pole to which the deer was lashed, six miles through the woods was something to be remembered.

It may be stated that the Harry Moore party, to the camps of the Inglewood Club, already mentioned in the FOREST AND STREAM, has returned, much in love with the country and with the Inglewood camps, but they, too, found partridges remarkably scarce. They had some good duck shooting, though rather early in the season for the best of that sport. They also failed to secure any trophies in the shape of deer.

The woods of old Plymouth county were about as thoroughly scoured by Boston gunners and other gunners on Oct. 9 as they have been for many a day. The day proved to be unfavorable, however, a disagreeable rain setting in about noon, and only poor success is reported. A gentleman left Boston Saturday evening for these hunting grounds. He does not wish me to give his name in the FOREST AND STREAM for the reason that he did leave Boston on Saturday evening. He went down on to the Cape, getting off the cars at Bourne Station. He found a farmhouse where he was made welcome, and some of the boys would gladly have gone a-gunning with him but for the fact that there was a funeral in the village that day, and it would not look well to be out shooting. But our friend was well started in the woods by the people with whom he stopped, and he went obliviously on the way he knew not of, he being only happy to be in the woods with dog and gun. His dog, a beautiful Irish setter, seemed to enjoy the outing as well. But partridges were very scarce. Only one flock was started, and they proved to be remarkably wild birds. Soon

it became evident to our friend that he did not know which way he was headed. The weather was dark and cloudy and he had never been in the section before. He wandered on and on, hoping to find some landmark, road or dwelling house. He calulates that he must have traveled at least half a dozen miles without finding a sign of civilzation, when at last he came to a road. Here was a road, but which way would take him toward the railroad station or the way he wished to go? He concluded to try one direction and stick to it. Soon he met a couple of gunners, Boston gentlemen, though he did not know them personally, they too were lost in the woods, or did not know which way in the road would bring them out at the railway station. They concluded to follow on with our friend, however, and as good fortune would have it, they soon came out to a farm house and learned that they were on the right direction. The two met by our friend belonged to a party of eight. On the train home they compared notes. Eight Boston gunners, with our friend made nine. Four dogs, and not a single partridge. Such is sport in the woods of Plymouth county on a foggy and rainy day in October. SPECIAL.

## MAINE GROUSE AND WOODCOCK.

NEW YORK, Oct. 3.—Having just returned from Augusta, Me., where I have been since June 1, enjoying the trout fishing and partridge and woodcock shooting of that section, I have to say the birds in that section have been more abundant than I have known them for years. I commenced meandering the fields and woods about Aug. 1 to see what the prospects were, and succeeded in locating eight broods of partridge and four of woodcock, all hatched within a radius of two miles from my home, which is one mile east of the city. Of course, I did no shooting at that time, but I had another pleasure. My dog, Queen Monarch, I found pointing on three occasions and on investigating more closely would find a young partridge concealed under a root or rock. This gave me quite a good opportunity to handle the young birds, much to the distress of the mother bird, who tried by all means to lead us away, exposing herself to full view but a few yards distant. A man who would wilfully destroy a young bird under such circumstances deserves to be blown off the face of the earth. I allowed the little fellows to go after a few moments, much to the disgust of my dog and the pleasure of the mother bird. And on Sept. 11 took down my Parker hammerless at 4 A. M. and secured in all 32 birds.

My trout fishing consisted of three days sport 15 miles east of my home. In that time I secured 23 beauties, 4 of which weighed 1½lbs. each. I also found woodcock plentiful in a spot five miles east of my home, but on account of high alders and thick foliage (sportsman's excuse) I made but a small bag. I consider birds plentiful in my section and am more than satisfied with my score, as my last days of shooting was hard work, instead of sport and I now have settled down to business until I can tap the snipe on Tuckaho Meadows, in New Jersey, next spring. M. L. C.

## GAME IN MOOSE RIVER BASIN.

LEAVING the Canadian Pacific Railway at Biscotasing on July 24 on canoe trip to Hudson's Bay, we crossed the height of land on the second day and reached the sources of the Mattagami or south branch of the great Moose River, which was followed to our destination. There are moose, caribou and common deer all along the ridge or backbone of the continent, but as one goes clear of the wooded country between latitude 48 and 49 north, the moose and common deer disappear. We saw our first caribou on the headwaters of the Spanish River, one day's travel from Biscotasing. They are numerous within easy distance of the railway and continue all the way to Hudson's Bay. In the winter they frequent the wooded country, but in March, when the first crust forms on the snow, the main herds pass northward and spend the summer on the great plains in the vicinity of James Bay. North of latitude 49 there is little or no timber, except along the banks of the river the sphagnum moss holds sway, and the country is level, treeless and swampy.

Bears are numerous along the shores of the Moose, particularly the lower part, near the salt water. The ordinary ruffed grouse and spruce partridge are plentiful and so exceedingly tame that they rarely fly, and then only when suddenly surprised. Near James Bay ptarmigan abound. In the spring and fall countless thousands of geese, ducks, plover, snipe, etc., are found in and around the bay.

On the Kenogamissee Lake, about latitude 48 north, we saw a single wild pigeon, but it would seem there are no large flocks anywhere in the country. I heard it stated that the sharp-tailed grouse is found in part of the region traversed, but none were seen, though some of the territory appears to be suitable for them.

There are large numbers of whitefish in the Kenogamissee Lake, also in Lake Matawagminngue, both expansions of the Moose River. At Waraton, on the Moose, there are also speckled trout. We secured one over 4lbs. in weight. A 2-pounder chased by a jackfish had taken refuge in the shallow water at the outlet of a spring creek. We shot it with a .22cal. rifle. Several springs feed the river at this point, which seems to account for the presence of the trout. They are of large size, running from 4 to 5lbs. It is probable that further north in the interior there are lakes and streams where the toothsome brook trout may be taken. The country resembles Newfoundland where the trout abound. There is no fish but sturgeon in the northern or lower part of the Moose.

We returned by way of the Montreal River, which is really the connecting link of an extensive chain of lakes. It is a grand country for the sportsman and, except for wild geese, it is preferable to the territory further from the railway. There is fish and game of all kinds. Very little is country marred by fire; the work of the axe is nowhere visible. An unrivaled canoe trip would be starting up the Spanish River, or the Missisauge, on the north shore of Lake Huron, follow either to its source, thence to the headwaters of the Montreal, follow the latter to Matawabika, thence down through Lake Tamagamamingue and the Sturgeon River, thence across Lake Nipissing and down the French River. The trip is quite feasible and could be completed in six weeks, and the fish and game obtainable, as well as the grand scenery, would be a revelation to any one who had never gone over the route. It would shorten the trip to take the railway to Biscotasing or to abandon the canoe at Sturgeon Falls. The best time of the year for sport would be from the middle of September to Nov. 1.

TORONTO, Sept. 9. S. R. CLARKE.

## A HUNTER'S MOON.

[From Martha McCulloch Williams's "Field-Farings," Harper Bros., 1892.]

TRULY there is magic in it. So high, so white it hangs, the flooding silver of it washing out to dun pallor all the lingering scarlet and yellow, and purple and flame of this late autumn world. The charmed wind lies in leash. Nor breath, nor ripple, stirs in the low leaf or the high. From the runnels mists creep slow and slower, to lie in long, straight wefts above the chilling earth. Now turf and weeds are damp, glistening with fine beads that in sunrise shall show as frost. Through the hush a lone, late cricket chirps, desolately faint. Far and faint from the wood's deep heart the owls send out their shouting *whoo-whoo-whoo-whoo-hoo-oo!*

For all that, 'tis no moon for sighing—this jocund orb, swimming up the east. It showed crescent, ran to quarter in the nights of gay October. Now, at full, it lights the sere fields, the thinning woods—a true hunter's moon, by help of whose shining you shall take and spoil the wild creatures that walk abroad by night.

Sport of the rarest, and you have true hunting blood. Without it the night shall not, for you, be filled with music; indeed, you are like to get nothing but weariness of body, vexation of spirit. Given so much of primal savagery life holds few pleasures to match the glimpses of such a moon.

See! Black Daddy is waiting in the cabin door, his burly bigness sharply silhouetted by the red fire-shin inside. He leans heavily on an axe, fresh from the grindstone, holds a half-dozen unlit splint torches lightly under one arm. A brindled dog, with ridiculous short tail, crouches at his feet, seemingly supine, yet with every sense alert. Outside the clear moon-rays show a smaller black fellow—so dark, his eyes shine fiery-green from under his long lashes. He sits very upright, his bow-legs making queer, bulging shadows on the turf; head aside, ears sharply cocked, tail faintly aquiver. Each fiber of him stands at attention. Axe, torches, are to him language visible—he has no mind to be left out of the sport they foreshow.

Black Daddy loves his dogs better, almost, than himself. By the hour he will tell you tales of them—Music and Damsel. Days through, they run at his heels; nights through, they watch outside his door. Priceless both, though the one is but a lurching mongrel, the other a cross-breed hound. Dogs of renown both, spite such blots of the scutcheon. Music is the better coon dog, Damsel has no equal for trailing a possum. Both have the finest keen noses, able to pick up the faintest scent, and trail the quarry hot-foot to his lair.

Very often one is taken, the other left at guard. Naturally they hate each the other with deadly dog-fury. Music has laid his two paws over his master's feet, put his head between them, is quivering through and through, giving out the while little low, piteous whimpers, his plea not to be left behind. At sound of it Damsel, whose name belies his sex, growls slightly, beats the earth more vigorously with his tail, then rises, trots a little way down the path, looking back over his shoulder to see if he is followed. Now he stops short, slinks backward half a rod. The cabin door shuts to with a great bang; Daddy stands fair in the light, with Music still glued to his heels but uttering quick, joyful yelps. A breath's space Damsel listens, then is off, with arrowy rush, down the path to the woods.

Daddy raises a mellow shout, the signal of assembly to his stout young followers, who tumble out, leaping, singing, "patting Juba," as though they had not been gathering corn all day. When he offers them each a torch they set up a great crying out, and toss them instantly in a handy fence corner. "We not er guine huntin' ghos'es, an' de's 'nough moonshine fer coon er possum," says the boldest malcontent, running away after the dogs.

Now the rest step sturdily out. Daddy, leading, looks up at the pale stars. There he reads the hours. It is nine o' the clock, so dewy-damp the scent must lie and hold, even in sedge and weeds. The open is bright as the morning. It will be two hours, though, ere the moon stands straight enough to light the wooded hillsides leading up from the creek. A rooling who-whoop comes over his lips. You hear a youngster say, "Dat's it, Daddy; holler possum." The next minute all have fetched a compass, head straight for the old field.

Grapes abound there, persimmons hang sweet and plenty. Master Graycoat must like his feast in it, with all his sisters, cousins, aunts. Mark Damsel's mad delight. See him leap and circle—a black ghost, light and swift, wider, ever wider, in his round. Often sedge quite hides him, briers swallow him up, but nothing daunts or hinders. Ah, he has found; hear the low, yelping cry that Music so enviously seconds. The tones are wondrous individual. Music's note might be all-compact of echoes from his ancestral strains. Blood tells, especially hounds' blood. Damsel's clear belling sets all the field aring.

Hither and yon he dashes, nose to earth, tail high and waving. Truly, Master Possum came in by crooked ways. The trailing dogs give tongue but sparely, so swift, so winding do they run along his track. Around, across it goes, now along the cresting upland, now deep in the thick swales. Now comes chorus of deep baying. Damsel has treed—there to the right, in that single tall persimmon tree. And look! This clear moon shows two of the gray gluttons crouching close in its slender upper boughs. No use to try and shake them out; the slight limbs would bear scarce a heavier weight than theirs. It is a case for the axe—ah! how swift they fly. Almost before the baying dogs catch breath the slim tree crashes to earth, with two seeming dead creatures still fast in its top. See the long, bare tails, each coiled snug about a limb. Not a quiver, not the turning of hair, though Damsel darts at one to give it an angry shake. Daddy rescues it, his fellows the while making the night world ring with shouting. A far hill catches the sound, flings it back a mocking echo.

Somebody begins to chant:

"Oh! Mister Possum, ye think ye's mighty soon,
But ye sho' ter git cotched by the light er de moon."

Daddy sniffs at the singer. "Better be savin' dat breff ter bole 'im. Take dis yere stickful, boy, an' go gilpin' 'long home." At the word you see that he split a stout stick, six feet long, a little way at either end, put the tail of a possum in each cleft, and is balancing it across the chanter's shoulder, little as that person likes it. He opens a remonstrant mouth, but is waved away. Daddy is autocrat—disobedience means no more hunting with Music and Damsel. Hark! They have found again—Music this time in the lead. But how queerly they run—giving tongue faint and uncertainly—a perplexed note, as though saying, "We fear to follow our noses."

The scent runs straight—with now and again a gap—as though broken by a leap. Now the dogs head for the sink-hole, running fast—almost as hard as they can lay legs to earth. They bark furiously—a guttural, angry note, different far to the baying of Master Possum. Ah! they have stopped short—there, beside that thick, thorny clump overhanging the earthy cavern! See them leaping, howling, with bristles upright, with gnashing fangs. Hist! Hear the spitting growls from the thicket. They must come from beast of prey, not beast of game. Daddy listens, his head to one side, mutters "Varmint!" then steps back to plan the attack. A minute later he has lighted his torch, and with two men at his back, armed each with a stout pole, comes up to the angry dogs. He tosses the blazing brand far into the thicket, springs aside barely in time to escape something—fiery-eyed, furious, strong of claw—that leaped hissing, yowling at his throat—lies, savagely defiant, spite the blows rained over it, the dogs' angry rushes.

Daddy speaks to them in sorrow, in anger. "Git erway, you fool dawgs! Whut done come ober you, chasin' dat cat erway? Right smart ole wild-cat he is—but shucks! I don' lek ter be so fooled." Music slinks off, his tail betwixt his legs. Damsel looks about critically, as though to say: "I knew all the time it was not quite the thing. Depend on it, alone I should not have made the mistake." The poor cat is tossed into the sink-hole's dark depth. Daddy picks up his torch, carefully puts out each spark it has left in the tangle, and goes away to the woodland, faint, smoky pennon trailing out behind.

He strikes straight for the river channel. Just here a creek makes into it—the tall timber abounds in hollow trees! wherein Master Coon makes his abode. A rare night rover he—lying sluggish all the day, nor rousing him till darkness has covered the face of the earth. Now the cocks crow midnight; straight moonbeams pour white through the flecked boughs above, and turn all to silvern ghosts the woods' dim colonnades. Doubtless he is well abroad—hark! Music has found—is running as for life. "Who-oop! hi-yi-yi-ha! hunt him up, ole dog! hunt him up!" Daddy yells at the note—and is chorussed by the rest. The sound fills all the river-valley, lying so still, lapped in this slumberous calm. Far down it, on the other side, an answering shout breaks out. Other hunters, no doubt—all good men and true; but never envy them—they may have dogs, get game galore, but they have not Music and Damsel, whom to follow is a liberal education in a coon dog's points.

The cry, the yelling, is their very breath of life. How wide Music runs; how high he leaps, sniffing with lifted nose, now this tree, now that. Ah ha, Master Coon has been found away from home, cut off from it, indeed, and is making for it through the tree tops. Over there he left the earth, ran from bough to bough, from tree to tree, till he thought the trail safely broken. Music knew the trick well, caught the scent hot in the air, has picked up the trail where Master Ringtail came down, is after him hot-foot.

A breathless scamper, truly. Away, away, through thicket, through clear forest, running, stumbling, falling over rocks or timber, now resting for a minute, now hasting as though life lay in speed. Ever in front to guide you, the short, shrill yelping cutting sharp through the night, the wild yelling, the deep halloo, sent back, forth, from bank to bank. Now the sound of axes, a dull crash, comes from the hither side, upborne with a shout of triumph. "Dey's cotcht fus' but I lay we gits de bigges' coon," Daddy says disdainfully, inflating his lungs for a return halloo. Before it is half out of his throat a wild, full barking fills the air. Music has treed, Damsel comes tumbling over, together they leap and plunge, noses in air, flinging their full cry up to branches above, where lies Master Coon, now plainly visible, his green eyes shining hate of all below.

This refuge should secure him. The tree is two feet through, thirty feet to the first limb. Climbing is out of the question. Whether the coon is worth cutting down depends on the strength of your muscles. It is but play for these "good men." By the time you are well breathed quick strokes have sent the tree to the earth. As it falls Daddy gathers his beloved dogs to him, a hand on either collar. "Tend ter yo' coon yo'se'fs; I want my dogs 'nother night," he calls, holding hard the straining creatures, so madly eager to attack their fallen foe. The good men rush at it with clubs and axes; it darts, creeps, leaps through the brush, eludes their striving, and dashes safe into the woods.

Followed, it is not overtaken. Music runs off on a fresh scent, trees in a hollow, and sees the frightened captive chopped out of it. The moon drops westerly—oars sound on the river. Here are hunters from the other bank come to gossip, join forces and finish up the night. Now, indeed, the chase shall stir your blood. They have brought six good dogs. All in cry, the heavens shall overflow. It is find, follow, kill—the first cock-crow sounds. The night has grown chill, though the huntsmen do not feel it. Suddenly some one shivers, with a hint of chattering teeth. Make a log fire on the instant. The axemen are hewing hard at a big tree that looks to have a handsome coon colony. Before it falls you may warm you through and through.

And afterward. While the fire was abuilding, somebody stole away, rifled a potato patch, and has filled the fire with sweet, yellow yams. The sight of them brings hunger indeed. Until they are roasted eaten piping hot, no foot will stir. Not even Music's or Damsel's. See how quiet they lie by the fire, nose in paws, with shut eyes, dreaming, no doubt, of the night's victorious runs. Beyond, the river ripples, the moon drops lower and lower, frost skims the leaves till they rustle underfoot. You tread them as air. The soul of the night, of the chase, has gone into your blood—you are drunken as with new wine. Sleep comes to you tardily, but of a sweetness before undreamed—such sleep as truly

"Knits up the revelled sleave of care."

If you wake late, what matter? Daylight is garish, commonplace—cheaply exchanged in any measure for such glamor of sound and sight as last night knew.

## CHICAGO AND THE WEST.

[*From a Staff Correspondent.*]

CHICAGO, Ill., Oct. 8.—Dr. H. C. Buechner spent the greater part of last week at Horicon Marsh, Wis., and when he got back Friday evening he was an excited man. He had met the ducks coming down ahead of the recent great northern storm. On his first day he killed 20, on the next 38, and on the third day met the crowning fortune of all his shooting experience, killing the magnificent bag of 78 birds, nearly all mallards and pintails. He could hardly talk as he tried to describe the flight. "There were thousands and thousands of ducks!" he said, and set his arms waving to tell the rest. Presuming that Dr. Buechner took out with him the regulation number, 300 shells, it may be seen what the shooting was. He ran out of shells and had to quit. There were no teal in the bag. The flight on Horicon this week was probably the heaviest that has struck this country for years.

The storm brought the ducks down everywhere. At this writing Lake Senachwine, Swan Lake and the whole Illinois River country is full of ducks. Some snipe are also with the flight. Percy Stone killed 14 snipe with his bag of 38 ducks a week ago, and 24 snipe were killed yesterday in one bag on the Kankakee. Snipe are thought to be due from now on.

Mr. Abner Price is now down at English Lake Club, where the shooting should now be good. A week ago, on these grounds, Mr. Price killed the pretty bag of 18 black mallards (dusky duck), a bird much prized by our shooters about here and not very abundant, though sometimes shot along the Kankakee. Last Thursday, at English Lake Club, Mr. Ingall killed 28 ducks. The shooting there has been very fair.

The membership of Mak-saw-ba Club is changing very materially of late. Messrs. Dicks, Holden, Buechner, Baxter and others have sold out, and still others speak of doing so. This is to be regretted, and I shall not like to hear less from this active organization, whose hospitality I have so often enjoyed, and which has long held so strong a place among the field clubs. The shooting along Mak-saw-ba is as good as may be found anywhere on the Kankakee now, and as I have so often stated, the bass fishing in that stretch of water is wonderful. This last I say in spite of the fact that Mr. Mussey and I only caught six fish when we went out to make a record, about a week ago. It rained that day, but there was nothing strange in that, for it always rains every time Billy Mussey and I go anywhere together. I think we would be a good combination to play against the Great American Desert.

A new duck club is organizing at Peoria, or perhaps it is the reorganization of the old Beebee Lake Club, whose grounds were down near Spring Lake, and in a magnificent duck country, too. For the new club only five memberships have been apportioned to Chicago. These are now in the hands of Mr. W. L. Shepard, and they will soon go. This marsh is the place where Mr. Fahnestock invited Mr. Abner Price and Mr. Shepard last fall, and where they had some heavy shooting. The grounds are all under fence, and the club privileges are exceptionally valuable.

Mr. D. H. Crane, of this city, is intending to put in his spare time this winter building a light scow boat to run the Wisconsin River next summer. A very pleasant and sportsome trip.

As to that Wisconsin decoy law scare, I am assured that the law forbidding the use of decoys was repealed at the same time that the spring shooting law was repealed, or rather modified.

D. W. Fernandez, Wisconsin State Warden, writes me in regard to the Dr. Thomas deer case: "The only way to reach the reverend gentleman is to get out a requisition and take him back to the spot where he committed the act." I do not think the requisition business very flourishing, but just supposing the crime did warrant it, wouldn't it be much cheaper for Dr. Thomas to pay over that much promised fine?

How about that fine, Dr. Thomas?

Query: Can a minisier understand a bluff?

Answer: It do look like.

Mr. Fernandez adds in his letter the following bear incident: "Jule Teipner is one of the mighty hunters of Antigo. The other day he heard a noise when out in the woods and looking it up found a cub bear sitting up and whining. Jule shot the animal and was congratulating himself on his good luck when he heard a sound behind him, and turning saw another cub, which with one shot he at once sent to join its brother. While comtemplating this work the motner of the cubs hove in sight, and sitting up on her haunches smiled sweetly at Jule. The latter fired one hasty shot and the old bear dropped. Jule dropped his rifle also and ran for dear life. Meeting a homesteader about a mile from the spot the two returned together and found all three of the bears cold in death."

### Thousands of Quail.

Indiana is full of quail this fall, and the shooter can hardly go amiss. North Judson, Ore., Newton, Rochester, Rensselaer, Union City, Frankfort—all of these places will be found good for quail. At Rochester Phil. Jenkins will take parties out. There are some ruffed grouse about Rochester. The shooting around Rensselaer is good also. The birds are unusually abundant this year. At Indianapolis the bevies come right into the city. Going down the main street I passed the market run by J. Platt & Co. (71 North Illinois street) and saw there a live quail in a cage. Mr. Platt told me the bird had walked out of an alley near by a few days earlier, and had hidden behind the box in front of the store, where he caught it in his hands.

### A White Black Squirrel.

In the same cage with the quail, Mr. Platt had two squirrels, one a black squirrel, and the other a pure white one, apparently an albino of the black species. This animal was a perfect specimen of albinism, and had pink eyes. It was healthy and active and a very attractive little creature. I went into the shop to inquire about this animal, and Mr. Platt told me that he had had the squirrel for three years. He bought it for $7 of a man who had it on exhibition at the Indianapolis poultry show in 1889. "I would not take $100 for it now," said he. "It has brought me more than that much trade. Everybody that comes along notices it. This is the most interesting albino I ever saw, unless that should be the white deer of Chicago once mentioned in these columns.

175 MONROE STREET, Chicago. E. HOUGH.

## DUCKING IN THE RIDEAU COUNTRY.

HAVING hunted ducks in 1888, on the chain of lakes between Kingston, Ca, and Ottawa, known as the Rideau Canal, an account of which trip appeared in your issue of March 10, 1887, I thought that a short review of a hunt in the same locality, during this past September, might be of interest to brother sportsmen, and the amount and quality of impedimenta to be brought with us. We experienced considerable trouble from the apparent lack of knowledge of the Canadian game authorities. Some informed us that duck shooting was permitted on and after September 1st, while others made the opening day the 15th. Finally, however, we decided to go early and take the risk of finding ourselves unable to shoot. Three young New Yew lawyers made up our party, namely, Abou Ben Tusha, Charlie Coalhole and F. St. Johns, all fond of outdoor life, and although only average shots, devoted to the smooth bore. We started from Alexandria Bay, and sailed up the St. Lawrence to Kingston, where we got a fishing permit for the Rideau Lakes and canals, and where we made a deposit of 20 per cent. of the value of our guns (subsequently returned to us). From Kingston to Ottawa there runs, twice a week, the steamer Rideau Belle. On her we pulled our two boats and camping duffle and went as far as Cranberry Lake. Here and at Sand Lake we spent four nights, and then rowed to Benson Lake, forty-two miles from Kingston, where we made our permanent camp. From the 10th to the 25th of September, we remained at this point, when a leaky tent, heavy winds and rains, and the exceeding caution of the ducks decided us to pull up stakes and go home. This we accomplished in two days and a half of rowing, the actual working time being 19 hours and 20 minutes for 75 miles. On the lakes which we visited we found the ducks very numerous, but so wild and so well protected by the stump-filled bays and marshes, in which we had to hunt them, that our bag was ridiculously small, and we felt that it hardly paid to expend $75 for three men's shooting licenses under the circumstances. It makes me sad even now to think of all that $75 could purchase here in New York. One day when we had not seen a bird for 24 hours, Charlie Coalhole suggested that we go on to Ottawa (to which city the Rideau Canal leads), and swear out a writ of habeas corpus to compel the Government to produce the body of one duck. To this Abou Ben Tusha replied that Charlie Coalhole had better demand a goose, and go produce himself. However, we had no time to do any swearing except at our continued bad luck, so we let the habeas corpus go and lived on oatmeal and bread.

We had a great deal of company during the heavy rains we experienced, all the snakes, frogs and spiders on the shores of Benson making our tent their headquarters. However, in spite of all these things we enjoyed our four weeks' outing immensely. The Rideau Lakes are exceedingly pretty, and even without fishing and shooting amply repay one for a trip to their neighborhood. Then too, we had divers thrilling adventures calculated to drive away any melancholy reflections on our poor luck and worse shooting. But these must not be told. Never could I be induced to relate how St. Johns, having caught a snake 3ft. in length, stuffed him down the left barrel of his gun intending to play a small joke on Abou Ben Tusha, and having forgotten all about the reptile, and having opened the gun, the creature rushed forth and seized upon him savagely, while the hero (who had just taken a most refreshing pull at the black bottle) fled, shrieking that he had "got 'em again."

Bribes could not be offered sufficient to tempt me to unfold the glories of Charlie Coalhole's maiden attempts at casting with a frog for bait. Could I reveal how at the first trial he snapped the frog off and sent him flying over the treetops on an adjacent island at a pace that must have landed him at Hudson's Bay in a few hours; how subsequent trials resulted in the scattering of a peaceful frog family to various parts of the North American continent? These things must not even be whispered. Nor could wild horses drag from me the tale of the feats of that mighty hunter Abou Ben Tusha, to whom North, East, South and West were but as names, unworthy the notice of a commanding mind, and who steered a boat in a manner consistent with this idea. Abou Ben Tusha, whose blood-curdling feats with a loaded gun slowly but surely whitened the hair of his comrades. Abou Ben Tusha, of whom our trusty and sturdy boatman remarked, "If you were to shut him up in a tent with a duck, the bird would have even chances of escape." A deep pall of silence must cover over these mighty deeds, lest our fair fame be assailed with the sneers of the envious.

To come back to business, the Rideau Lakes puzzle the duck shooter. There are a great many ducks on them, but how to get at the birds is a question that floored me in 1886, as thoroughly as in 1892. Black bass are plentiful, and casting with a fly is the most successful way of taking them. The woods have a sufficient number of grouse in them to make one wish for more. Provisions near Benson were absurdly cheap, large chickens costing fifteen cents apiece, and eggs being twelve cents a dozen. The scenery is very wild and attractive, there being thousands of the most curious little nooks and corners imaginable. One needs a guide to show him the best places and to prevent him spending unnecessary hours tangled up in the stumps, or in following up the wrong course in the large bays that spring up on every side to confuse one.

Our guide, George Patterson, has been 12 years in the service of St. John's father, and is as much a friend as a retainer. To his great strength and untiring, unselfish effort we owed a great portion of the pleasure our trip afforded us. But it is not easy always to secure one like him. Now, I have occupied too much of your time, and hope that you will pardon me for so doing. The region that we visited only needs some one to call attention to its beauties and to the ease with which it can be reached to become a favorite haunt—yea, a paradise for canoeists, campers and sportsmen generally. Health and long life to all such and their great mouthpiece, FOREST AND STREAM. FRANK LAWRENCE DONOHUE.

## SOME ADIRONDACK DEER.

NUMBER FOUR, Adirondacks, N. Y., Oct. 5.—Deer were unusually plenty in this immediate vicinity before the open season for hounding, and a good hunter had a good chance of bagging one in the woods by stalking on a favorable day. But for the past three weeks more than fifty hounds and twice as many hunters have been constantly on the ground within a radius of five miles, and whether there will be any deer left after the tenth of October remains to be seen. A doe reared two fawns near my house and were seen often. The doe was killed early in September. Since that time the faws appeared often near the house and became quite tame and I came to regard them as pets. But the hounds got after them and they have gone the way of all the other deer.

The hounders seem to have ill luck, not because they do not kill plenty of deer. But their cruelty seems to recoil on themselves. Two men have been drowned while trying to murder deer in the water—one in the lake here and the other in a little pond eight miles from here. Also one man has been shot in the leg and one through the hand. I shall be heartily glad when the dogging season is over and the quiet I love so well restored to the forest and peace to the few deer there may be left. MUSSET.

## HUNTING RIFLES AGAIN.

The writer ventures to continue the discussion of calibres, though it may be beating over old straw so far as the veterans are concerned. He at least has learned some things, and is quite willing to expose his ignorance again. I objected to the large bores on account of weight, of tearing the game, danger to stock, &c. The observations of Mr. Meyrick seem to effectually dispose of two of these objections. Of course nobody minds a weight of 8 or 9lbs., which he declares sufficient for the heavier charges, and the hollow bullet may undoubtedly be less liable to long flights than much smaller solid cones. As to the destruction of the meat I referred chiefly to the blood-shot condition in which a haunch or shoulder remains even after the passage of a small bullet, my opinion being that such shots should be avoided with any calibre. But one of the correspondents—I have mislaid the paper and cannot recall his name—says that the meat will not be blood-shot if the animal drops to the shot. That looks reasonable, but I never heard it before. Is it so?

It seems after all that to get any special advantage from a .45 or .50 calibre one must use the hollow ball. What is the "Keene bullet", by the way? (I am liberal with my ignorance, as will be seen). The .45 solid ball can only pass through a deer, and as a .38-40 will do that nearly every time, the heavy powder charge comes to nothing, and the difference in diameter of the bullets is certainly of but little moment. A friend of mine here recently shot a small deer in about four different places with a .45-90 solid ball, and then had to cut its throat. On the same trip he shot a large buck through the body, knocking him down, but he afterwards struggled to his feet and escaped, traveling perhaps a mile at a fair gait. On a trip we took together the other day he killed another with the same gun, breaking its neck. But as a .32-20 would have done the same nothing is proved.

On the same trip I tried splitting the bullets of my .38-40. A fair sized buck, shot at rather short range behind the shoulder, ran over a hundred yards before falling. On dressing him it was found that the bullet had gone through the upper part of the lungs, the split points chipping off and spreading about 2in., while the heel passed through and out on the other side. In theory he ought to have "drapped", but he didn't. Would the result have been different with a .45-90? Only with the hollow bullet, I should say.

But I am disposed to change my gun and try the heavy charge. I find it weighs about 8¾lbs., and that a .45-90, single shot can be had of about the same weight. I will try the big charges awhile. I rarely want to shoot anything but deer, unless it is hares. Could not a light charge both of powder and lead be used in this cartridge for that purpose? What should be the proportion, the same as in the heavier charges? What is the twist of that rifle as made by the Winchester Company? I can't get the hang of this twist business, anyhow, there seems to be an infinite variety.

The thing that chiefly decides me, however, is the trajectory of the heavier charge. Elevating your sights is all pretty enough to talk about, but it is usually out of the question in the field with a .38-40. I managed while out last time to wound one deer at something over 200yds. range, and to miss two others at about the same distance.

I see I have to mix in several questions. They are directed to the fraternity in general, especially to the veterans, who like "J. J. M." and "Iron Ramrod" speak from experience. They never fail to tell us something worth knowing. AZTEC.

## SHOT VELOCITY TESTS.

WASHINGTON, D. C., Oct. 1.—*Editor Forest and Stream:* A few weeks ago there appeared a letter from Capt. Money, in regard to the velocities of shot. The Captain is in error as to the absolute accuracy of the Boulangé chronograph when used to measure the time of flight of small shot. While it is considered very accurate for measuring the mean time of flight of a heavy cannon ball, it is only fairly so when the ordinary small arms' conical bullet is used, which owing to their light weight are almost invariably slightly deflected by the wires of the first screen—thus presenting more surface to the direct resistance of the air than the actual diameter of the bullet—but for a short range this is of no great importance. The circumstances are quite different, however, when trying to measure the time of flight of a charge of small shot. If a screen be used then we do not know which portion of the charge cuts the wires; if a plate be used several pellets may travel together and thus arrive first, so that their time of flight would not at all represent the time of flight of a single pellet. Many shooters would like to have a reliable table of muzzle velocities of shot guns, but I am at a loss to see how they may be arrived at. Neither Mr. Bashforth's nor any other method of calculation will be correct. If we knew the mean velocity of a single pellet, then it would be a simple matter, but the mean velocity of the charge cannot be used to calculate the muzzle velocity, for the pellets travel close together for some distance, thus overcoming the resistance much better than would a single pellet starting with the same muzzle velocity.

It would be very interesting if after a thorough discussion, the FOREST AND STREAM would institute a trial, on some new and fairly accurate method, to find the mean velocities and the muzzle velocities.

If my memory serves me correctly, Prof. Mayer used a chronograph of his own, having a vibrating fork and a rotating cylinder; the instrument was carefully tested by an astronomer's clock, the effect of temperature was allowed for—instead, however, of taking the time of flight from the muzzle of the gun to the plate, it was taken from the falling of the hammer; this would of course be quite a different case from Capt. Money's experiments; then again the velocities given were not the velocities at the ranges, but the mean velocities over the ranges, *i. e.*, the actual velocity at about half the range.

Of course we understand that if a single pellet of No. 3 and one of BB start with the same velocity, the pellet of BB must arrive first at all ranges. But that the charge of smaller shot may have given the remarkable results spoken of is quite possible. A single shot may have greatly increased the average velocity of No. 3 or decreased the velocity of BB by the difference of a primer or loading; or the gun may have scattered BB badly and perhaps several pellets of No. 3 struck the plate in a bunch; thus having traveled together they increased the average considerably; and again the gun may have been so held that the front pellets of No. 3 struck the plate, whereas some of the rear pellets of BB marked the plate. It does not seem to me that the error lies in the chronograph so much as in some of the things above mentioned. If we could only get at the separate shots made by Prof. Mayer at the short ranges, we might be able to arrive at the source of the error. CHELAN.

## THE LOST PARK BUFFALO.

PERSONS interested in the buffalo knew that long after the extinction of the species upon the plains one or two little herds of mountain bison survived, hidden away among the rough fastnesses of the Colorado Peaks. One of these herds was known as the Lost Park herd, which ranged in Park county, Col. Six or seven years ago there were twenty-nine of these buffalo, but a raid made on them soon after this greatly reduced their numbers. Five years ago, we are told by Mr. T. H. Loomis, two hunters set out to find this herd, and after a couple of weeks' search found them, killing a bull and a cow. Great indignation was felt in Colorado over this act, and the Denver newspapers were unsparing in their condemnation of it. The papers of last week contained the following Associated Press dispatch:

DENVER, Col., Oct. 4.—Gordon Land, State Game Warden, who has been with one of the parties which are in pursuit of hunters who have been killing buffalo in Lost Park, returned here today.

He reported that about half of the herd of thirty buffalo have been killed and the hunters have not yet been captured by the officers of the law. He says the settlers near the Park are wild with excitement and have joined in pursuit of the hunters.

The punishment provided by the law for killing these animals is so very lenient that the settlers have determined to take the matter in their own hands and swear that they will kill the hunters if they capture them.

The details of the affair so far as they have been obtained from our Denver correspondent are as follows:

Gov. Routt and State Game Warden Gordon Land lately received the information that a party of hunters were killing off all the buffalo in Lost Park, a national reservation, in Park county. The news was confirmed by reliable information from Kenosha, and the two officials immediately started off a party from Buffalo Creek in charge of J. P. Lower, of Denver, with John Higginson as a guide, to investigate the charge and arrest the parties, if found. Higginson is an old-timer and well acquainted with the country around Lost Park, and it is hoped will be able to locate the vandals.

Subsequently another party left Denver for Lost Park by way of Kenosha. Efforts have been made to notify all the law officers in the neighborhood of the Park and along the lines of the Denver & Rio Grande and Midland railroads to look out for the scoundrels.

A dispatch dated Kenosha, Col., Oct. 1, gives further details of the killing:

A prospector by the name of Boeher, just in from Lost Park, reports meeting a party of hunters in that place who are slaughtering the few remaining bison in the State. He knew one of the hunters named Foley, with whom he had hunted buffalo on the plains years ago, and from him learned that the party consisted of several hunters and two taxidermists, who were to prepare the frames for future mounting, and that they had so far killed 13 bison, and it was their intention to remain long enough to load a pack train of 35 or 40 jacks, which they had hired for the occasion. Boeher saw evidence of their work, but was unable to locate their camp, but offered to go back with any one and hunt them up.

On the 2d inst. Game Warden Land returned from Lost Park and reported that his arrangements for the capture of the buffalo butchers were complete, and that he expected before long to take the seven poachers. He has two or three parties out and believes that before long they will find the camp. There is great complaint by the warden and by citizens of the State of the leniency of the Colorado law protecting the buffalo. It reads as follows:

No person shall kill, wound, ensnare or trap any bison or buffalo within the State for the period of ten years from and after the approval of this act. Any person or persons offending against the provisions of this section shall be deemed guilty of a misdemeanor, and upon conviction thereof, as in proceedings in case of assault and battery, before any justice of the peace, shall be fined in any sum not less than $50 nor more than $200 for the first offence, and each subsequent offence shall be fined in any sum not less than $50 nor more than $200, and be imprisoned in the county jail not less than thirty nor more than ninety days. * * * One-half of the fine in all such cases shall be paid to the person informing against such offender and the other half of said fine shall go to the school fund of the county where such fine is collected.

The Denver *Republican* says on this subject:

The herd in Lost Park is probably the largest now running wild in the United States, outside the Yellowstone National Park. It consists of about twenty-five mature animals, which have been slowly increasing, as evidenced by the number of calves seen during the past summer. If, as reported, these hunters have already killed thirteen, they have, no doubt, made the species almost extinct, as numbers would be wounded and wander away and die.

Lost Park was set aside as a national reservation, but no provision has been made for protecting the game in it from such men as these hunters appear to be. Four years ago a buffalo was killed there and the authorities endeavored for weeks to catch the offender, but failed to do so. He was supposed to be an Eastern man.

Big Park, comprising about 100,000 acres in Rio Blanco and Garfield counties, has also been set aside as a national reservation, but its limits have not been accurately defined. Depredations against protected game there have been so common that as a last refuge a petition has been placed in circulation to send troops from Fort Logan there to secure federal protection. This petition has received the signature of nearly every prominent man in the State. Should this petition be favorably considered at Washington the governor could use his influence to send a company of soldiers to Lost Park.

Governor Routt says it is his intention to make such an example of the men now devastating the Lost Park herd that will be an effectual warning to such vandals in the future. Game Warden Land is taking the deepest interest in the case and will use all the power and authority of his office to punish the men.

## NORTH DAKOTA GAME.

CANDO, N. D., Oct. 4.—Game has never been so plenty in this section as it is now and has been all the fall. Prairie shooting has been very good, on both pinnated and sharptail grouse, about equally divided. In the Moose River country, sixty miles west of here, I know of two men shooting 125 in one day, and another of three men bagging 250 in two and one-half days. Ducks are everywhere, all varieties known to be in this faunal area being represented. Owing to there being so much water they are scattered, and no unusually large flocks are seen, as was the case a year ago. Canada geese are quite common but very wary. Snow geese are now flying in some numbers, but the main flight is not expected until about the 10th. The first flock seen this year was about ten days earlier than has been noted the past three years. A few white-fronted and Hutchin's geese have also been seen, and a few swan. Crane did not fly in such large numbers as usual, and have gone on south. Pinnated grouse are also flocking for the southward movement. E. T. J.

## THE YELLOWSTONE NATIONAL PARK.

REPORT OF THE SUPERINTENDENT.

DEPARTMENT OF THE INTERIOR, Office of Superintendent of Yellowstone National Park, Mammoth Hot Springs, Wyo., August 15, 1892.—Sir: Complying with your request of the 21st ultimo, I respectfully submit the following report of operations and events in the Yellowstone National Park during the past year.

The tourist season, that opened so well in June, 1891, fell off greatly in July, probably owing to the long continued wet weather. Rains occurred almost daily until July 15, and many people were deterred from entering the park by cold and wet and the condition of the roads incident thereto. In August the records show an increase of travel again, but this was partly due to several large excursion parties. The season continued good until about the 20th of September, when an early fall of snow abruptly terminated travel.

The winter was very severe and much snow fell; a backward spring made it almost impossible to open the park at the advertised time—June 1.

The roads were very bad from washouts and mud, and several coaches were overturned, but fortunately with no serious results. All the new road from the Canyon to the Upper Basin, via the lake, was impassable, and I was obliged to put on a large force to open it.

That road was completed last autumn, about the close of the season, and was not well settled when the snow fell. In consequence it washed badly and became very boggy when the snow melted. It is one of the most picturesque drives in the park and will become very popular. By its use all doubling of route is avoided, except between here and Norris. To derive from it the fullest and greatest advantage, a new hotel on the site of the present one at the Upper Basin is an essential. As the law stands that site is forbidden, and were it not so, I don't believe the necessary capital can be obtained to erect it under existing conditions.

This spring the June travel was good, with a slight falling off in July, and an upward tendency again in August. I doubt not many people are waiting to make this trip in conjunction with a visit to the World's Fair in 1893.

BOUNDARY LINES OF THE PARK.

The subject of park boundaries has long been in agitation. As now fixed by the President's proclamation of last year, they seem to be thoroughly satisfactory. There is little or no wealth, vegetable or mineral, within the park limits, and nothing that should tempt man's cupidity. On the west, the boundary should be made coincident with the Wyoming line. On the south, the new addition takes in one of the best game preserves in the world, and it should be permanently retained and protected.

On the east the addition may include mineral deposits on the head of the Stinking Water. If so, a modification of this line might be made, so as to throw the mineral belt outside the park. The more recent reports, however, indicate very little wealth in this section.

Continued observation has convinced me that the north line should remain exactly where it is. To cut off all down to the Wyoming line would allow very undesirable settlements in the valley of the Gardiner within two miles of this place, and destroy the great mountain sheep, elk and antelope range on Mount Everts. To make the Yellowstone, Lamar, and Soda Butte rivers the line would be to destroy 25 and perhaps 50 per cent. of the game in the park, as this valley is their most extended winter range.

If access to Cooke City by rail is imperative, I believe it will be had from the east or north, without crossing or interfering with the park. If a line through the park is essential, then a right of way confined to the north bank of the streams is unquestionably preferable to a cut-off. Should liberal appropriations be made for the construction of roads in the park, I advise that enough of it be used on the Cooke City road to put it in the condition of a first-class commercial thoroughfare. This, I believe, will quiet the agitation that has been going on for so many years.

PROTECTION OF FORESTS.

Since my last report there have been a great many fires started within the park, but by great good fortune all have been extinguished before any damage has been done. A ceaseless and numerous system of patrols has found men ever present to extinguish fires before they have obtained headway. One south of Shoshone Lake this present month assumed greater proportions than any previous one, and was extinguished with difficulty, but it was kept confined to fallen, dead timber, and really did no damage.

Many of these fires are set by lightning, but some are the work of careless campers. In these cases I exact a rigid enforcement of the regulations, and expulsion inevitably follows detection.

OUTPOSTS IN THE PARK.

I have continued the same system of outposts that proved effective last year, and added to it one at the Thumb, and have established one near the south boundary, on Polecat Creek, that I shall occupy when the hunting season opens. This one I shall keep garrisoned by a dismounted party, with snowshoes, all winter. I fully realize that poaching in that vicinity needs increased attention, and I shall look to it the coming fall.

MILITARY QUARTERS.

The new post, on the plateau facing the Mammoth Hot Springs Hotel, was occupied last autumn after the close of the season. A system of water supply and sewerage has just been completed, and small works of improvement are constantly going forward. The post makes a sightly and attractive addition to the place. Another company in garrison is much needed. The single cavalry troop here is kept constantly occupied with its patrol work. A company of infantry should be added, from which details could be made to watch the "formations" and occupy the outposts in winter with snowshoe parties.

I asked of the War Department an allottment sufficient to add accommodations for another company, and it was disapproved on the ground that there was not money enough available. In view of the great necessity for this extra company, I venture to suggest that barracks, kitchen, and outhouses for an infantry company, and stables for quartermaster's animals be added now, and the balance of the buildings be added afterwards. I

can manage to accommodate the officers elsewhere for a season.

ROADS.

Last spring found nearly the entire appropriation for two years, amounting to about $120,000, available for road work. All the existing roads were put in condition, and an excellent new road opened from the Canyon to the Upper Basin, via the lake. This 52 miles of road is destined to become one of the most popular, as it is one of the most beautiful, drives in the park.

There are places where it is not entirely completed, but I assume that such will not long be the case. A road that urgently needs rebuilding is the one from below the Gibbon Falls to the Lower Basin; at present this is the worst, most tedious, and least interesting drive in the park. I also renew and emphasize my recommendation of last year, that a road be opened from the Upper Basin to the south line of the park, on Snake River. A road over Mount Washburn from the Canyon to Yancey's is very desirable, but with existing appropriations, I can see no immediate chance for it. Short driveways should also be opened to the Great Fountain Geyser, the Biscuit Basin, the Black Sand Basin, the Lone Star Geyser, Inspiration Point, and several other at present inaccessible points of interest.

I urgently recommend that the disbursement of this money be put under the control of the superintendent of the park instead of under a non-resident engineer, the work to be planned and superintended by an officer of the Corps of Engineers, ordered to report to the park superintendent for this purpose. At the opening of travel this spring it was found that the entire appropriation had been expended and absolutely nothing left for the repairs that such roads always need after a severe winter. From his more limited horizon the park superintendent can far better judge of such matters and will be present to execute that judgment.

I wish again to mention the zeal, ability, and conscientious devotion to duty of Lieut. Chittenden, United States Engineers, in charge of the work. It is safe to say that no greater amount of work was ever accomplished within the park with the same amount of money.

HOTELS.

As a rule the hotels were very satisfactorily conducted last year, and I believe there is an improvement this summer. There have been no changes, except that the old Trout Creek station has been abandoned, because there is no longer any travel over that route, and the same establishment is satisfactorily conducted at the Thumb. The old Norris lunch station was burned in May, and is now being conducted under canvas. The management aims to give satisfaction, and I hear a great deal in its praise and very little complaint. Mr. J. H. Dean, manager in charge, is courteous and efficient, and very deservedly popular. A good hotel should be built at the Upper Basin; the Norris lunch station be rebuilt, and have a few rooms for the accommodation of such parties as desire to spend the night there. A similar building should be erected at the Thumb, and when Yancey's present lease expires a more suitable establishment should be opened and operated at that point. For the great number of travelers that are expected next year, the present accommodations will, I fear, prove inadequate, but it is too late now to remedy the defect.

TRANSPORTATION.

Last year the transportation business of the park was successfully and satisfactorily conducted by the Yellowstone Park Association under the management of Mr. Wakefield. Their right to carry passengers expired, by orders from you, on the closing of the season last fall. A new transportation company, with Mr. S. S. Huntly as head and manager, has been conducting the business since the beginning of the present season. The plant is in every way adequate and excellent. The main complaint that comes to me is lack of stop-over privileges. There is much to be said on both sides of this question. In the first place it is desirable that all tourists should have all the time they desire in which to make the trip; but it is equally due the transportation company that, except in unusual cases, they should know at the beginning of a tour how long the party expected to be in making it; otherwise it will be almost impossible to properly provide against crowding and unsatisfactory service. Perhaps, for many people with plenty of time, the most satisfactory way of seeing the park is with a camping party. These parties often give a good deal of trouble from the rubbish they leave behind in their camps, and the number of fires they start and do not extinguish; however, it is proper that these parties be given the greatest latitude consistent with proper park management. The question of their transportation then comes up for consideration. I do not think such established institutions as the Wiley tours should be permitted. It is true that they originate and advertise their business outside the park, but the conduct of the business is wholly within it. They establish permanent or semi-permanent camps, and to the greatest extent possible conduct their business outside of the control or supervision of the superintendent of the park. The instructions recently received on this subject will have my careful attention.

BOAT ON THE LAKE.

The steamer on the lake has been running successfully for a year or more, and adds much to the pleasure of a trip through the park. It is now made a part of the park transportation, and carries passengers, at their option, from the Thumb to the Lake Hotel, thus relieving them of 18 miles of tedious staging. I believe the boat company has enough small boats for the demands of fishing parties, but I think prices might be lowered where boats are used continuously for several hours.

TOURISTS.

Tourists continue to gather specimens when not watched and write their very commonplace names over nature's most exquisite beauties. No amount of vigilance can entirely prevent this, for, unfortunately, the majority of the transgressors have no conception of the enormity of their offences. Quite recently one reverend vandal excused himself for the offense of gathering specimens by saying that owing to a want of badge or uniform on the party who stopped him, he did not recognize him as having authority. There is still much to be desired in the way of regulations concerning the carrying of firearms within the park. Of course, all arms passing here or any outpost are sealed, and confiscated if afterwards found with seals broken, but it is impossible to carefully watch all the country, and I fear some of the seals get broken before the boundary is crossed. I recommend an absolute prohibition of firearms within the park, leaving with the superintendent the right to make carefully considered exceptions. I have removed several camping parties from the park for leaving their camp fires unextinguished, and have sent several men back over long distances to rub and wash out names which they had written on the formations.

FISH.

The fish in lakes and rivers remain undiminished in numbers, notwithstanding the multitudes that have been caught. Prof. Everman, of the Fish Commission, visited the park last year and found most of the stock brought here by the Commission thriving beyond his most sanguine expectations. The following is a list of the distribution made by the Commission:

*In 1889.*

East Fork of Gardiner, above falls, 1,000 black spotted trout.
Gibbon River, above Virginia Cascade, 990 Rainbow trout.
Madison River, above Keppler's Cascade, 995 Loch Leven trout.
Gardiner River, above falls, 4,975 brook trout.
Yellowstone River, above falls, 2,000 whitefish.
Twin Lakes, 1,000 whitefish.

*In 1890.*

Shoshone Lake, 24,012 lake trout.
Shoshone Lake, 3,350 Loch Leven trout.
Lewis Lake, 12,013 lake trout.
Lewis Lake, 3,350 Loch Leven trout.
West Fork of Gardiner, above the falls, 7,850 brook trout.
Nez Perce Creek, 9,850 Von Behr trout.
Yellowstone River, above the falls, 10,000 whitefish.

I have had these plants carefully examined recently, and find them all thriving splendidly, except the whitefish, of which not a trace remained. I believe all have now become sufficiently established to permit fishing under proper restrictions. The altitude is perhaps too great for the successful introduction of black bass, but I should like to see the effort made in some of the suitable lakes near the hotels—like Grebe and Goose lakes; should they thrive, they would add greatly to the sport afforded enthusiastic anglers.

WORK DONE IN THE PARK.

In June I sent a working party through the park and policed it pretty thoroughly, and opened ways to good camping places off the main roads; for this purpose $1,000 was allotted me, and nearly the entire amount expended. There are now so many camping parties in the park, with more arriving daily, that it will be impossible to keep up a state of thorough police, so I do not recommend any further expenditure in this line until the close of this season or the opening of the next. I was also authorized to renew the signs obliterated by time, and this work is progressing satisfactorily and is nearing completion. Owing to want of money to repair the roads this spring, a large amount of such work was done by the troops, and without it long sections of the road would have remained impassable.

POACHERS.

Trouble with poachers continues to be one of the greatest annoyances the superintendent has to contend with. There is gradually settling about the park boundaries a population whose sole subsistence is derived from hunting and trapping. All of the people are thoroughly cognizant of the location of the boundary lines, but only respect them in the presence of some member of the park force. Live elk, deer, antelope, and bears are caught and sold; the various fur-bearing animals are trapped for their pelts, and hunting parties are guided into the best game region. So long as these operations are conducted without the park they are unobjectionable, and the park, acting as a reservoir, contributes largely to them. But

UPPER FALLS OF THE YELLOWSTONE, YELLOWSTONE NATIONAL PARK.

From U. S. Fish Commission Report.

it is when the park is invaded that the damage begins. It is a serious matter that so simple and much-needed a statute as the one granting legal force to park regulations cannot be passed. It can antagonize no interests except those of the poachers, with whom no friend of the park can have sympathy.

During the month of June last, on my return from the East, I was informed that one Pendleton, a butcher and poacher from Cooke City, had captured two buffalo calves on Specimen Range, and had taken them across the north end of the park; that one had died near the mouth of Crevice Creek, and the other had died just outside the park. It was certain that these calves were captured within the park, as there are none found without it. Pendleton claimed, however, that they were caught on Upper Hell Roaring Creek, and he was released. On investigating the case I determined to forbid him the park, under rule 10, except that he might pass backward and forward from Cooke to Cinnabar, along the main road, which he was not, under any circumstances, to leave further than 100 yards. This order was delivered to him by Sergt. Kellner, in charge at Soda Butte, but Pendleton, in absolute defiance of it, proceeded to roam at will over that portion of the park, and he was arrested and brought in here on July 9 and confined in the guard house. I was absent at the time, and he was held awaiting my return. On questioning him a few days since, he said he caught the buffalo on Hell Roaring Creek, and that he would make affidavit to that fact, but when confronted with the notary he changed his mind about the affidavit. There should certainly be some law by which to deal with cases like this. Every bit of property found on such men is at once claimed by their partners and confederates, on real or fraudulent bills of sale, and confiscation, if made, hurts the transgressors very little. Expulsion from the park is no punishment, for they can immediately return and incur no additional risk. However, I interpret the regulations of the Secretary as having the force of law (see declaratory statute), and I act as vigorously as possible under them. Two other men were caught in the act of taking young elk on Mount Everts, and their horses and outfit confiscated and they expelled from the park. Soon afterwards they broke open the stable one night and stole the ponies that had been taken from them, and their other belongings were valueless. These are a few of the many instances of this kind that have arisen in the course of the year, and they afford a very discouraging picture. I trust that their mere recital will sufficiently emphasize the need of definite statute law for the park.

GAME.

*Buffalo.*—Very careful and frequent observations of the bision herds in the park have convinced me that there are certainly not less than four hundred here; of these about 20 per cent. were calves last year. This year, also, the calves seem numerous and prosperous. The great value placed upon them by sportsmen and taxidermists makes their protection difficult, but I devote my best energies to it. Their perpetuity within the park is thoroughly assured, and a steady and gradual increase may be looked for.

*Moose.*—There are still a very few of these fine animals in the extreme south of the park, but as they range beyond the line, I fear their protection will be impossible.

*Mountain sheep.*—There are several large bands of sheep remaining, mostly near the northern line. If the park is cut off down to the East Fork and Soda Butte Creek, one of their best ranges will be thrown out, and of course they will soon disappear. There is a fine herd that winters on Mount Everts, and they are frequently seen near the road between here and Gardiner.

*Elk.*—The elk are extremely numerous, and I am not disposed to revise in the least my estimate of 25,000 made last year. The very severe winter was extremely hard on them, and I judge that from 2,000 to 5,000 perished. This is not an alarming mortality among so many when it is considered that the deaths the previous winter were unusually few. The worst feature of it is that owing to the starved condition of the mothers this spring, a very large proportion of the calves perished. There are still as many as the winter grazing will accommodate, and loss of the old ones is not to be considered an evil.

*Bears.*—The bears are becoming very numerous and in some places quite troublesome, but as they are not in the least dangerous and their presence near the hotels is a source of great amusement, I do not recommend the destruction of any.

*Other game.*—Antelope, deer, and the numerous kinds of smaller animals and birds are all thriving, increasing, and becoming tame. Their appearance near the routes of travel is a source of much interest to tourists.

Of late I have seen evidences of great numbers of beaver. I hope and believe that they are increasing, and that I shall be able to protect and preserve them. A few examples like the recent case of Pendleton will contribute powerfully to this end.

CAPTURE OF ANIMALS.

Under your authority I have continued to capture animals for the National Zoölogical Garden in Washington. Two full-grown bears, a grizzly and a cinnamon, have already been shipped, and added to the collection there. I now have on hand, awaiting funds for their transportation, two black bears, two elk, two foxes, one black tail deer, one beaver, one badger, and one porcupine. I have also two bears, two elk, and an antelope that are too young for present shipment. It would be an easy matter for me to add to this collection, but thus far I have had to bear most of the expense of their keeping out of my private funds, and this does not give the enterprise very great encouragement. If more liberal allotments are made me, I can guarantee to provide almost any animal that is native to the park. It is, however, too late in the season to make captures of most of them; they should be taken when very young, as they are more easily caught and trained at that period. Their presence here is a source of unending interest to tourists.

RECOMMENDATIONS.

I take the liberty to make the following recommendations:

First—The passage of an act defining the boundaries of the park as they now exist, including the timber reserve added by Presidential proclamation, except that the Wyoming line should be made the west boundary.

Second—The enactment of a law establishing a system of government within the park, with appropriate machinery for its execution and prescribed penalties for violation of its provisions.

Third—A careful survey of its boundaries, with well-defined markings throughout their whole extent.

Fourth—A transfer to the superintendent of the control of the appropriations for the building and repair of roads.

Fifth—The construction of a good wagon road from Cinnabar to Cooke, or so much of it as may fall within the park.

Sixth—The construction of a good road from the Upper Basin to the southern line of the park, on Snake River.

Seventh—The addition of accommodations for a company of infantry, to be made part of the permanent garrison here.

Eighth—A small appropriation for policing the park and capturing and caring for wild animals while awaiting shipment to Washington.

Ninth—Completion of the road system of the park by the construction of the road from the canyon to Yancy's at the earliest practicable day. If liberal appropriations should be made for this object by the Congress at its next session, the road could be made passable before the end of the next tourist season, and very many people thus enjoy the delights of this incomparable bit of scenery.

I wish to record my thanks due to Capt. George L. Scott, Sixth Cavalry, for the efficient aid rendered by him and his troop.

A meteorological record, kept under the direction of the the post surgeon, is hereunto appended. Yours, very respectfully, GEO S. ANDERSON,

Captain Sixth Cavalry, Acting Superintendent Yellowstone National Park.

A meteorological register kept at Fort Yellowstone, Wyo., from July 1, 1891, to July 31, 1892, follows the report.

## TRANSPORTATION COMPANIES SUED.

THERE is an excellent law in New York forbidding the transportation of venison killed in the State unless accompanied by the owner. The transportation companies are quite willing to violate this law themselves, and they compel its violation by sportsmen, giving them the alternative of leaving their venison in the woods. A specimen case will show how it works. A Newburg party of deer hunters boarded the Adirondack & St. Lawrence Railroad at Fulton Chain recently, and having a deer to carry home took it into the baggage car. Here they were directed to hand the venison over to the express company. After protesting that the law required the carrying of the venison, accompanied by them, they finally delivered it to the express people. The owners of the deer were not the only ones put to inconvenience and expense, for Game Protector Kidd, of the Second District, has brought suit against the American Express Co. to recover the penalties for illicit transportation. Two other suits have been brought against the same concern for other deer, and one against the Romer & Tremper Steamboat Co., of Kingston.

## NEW YORK STATE ASSOCIATION.

THE meeting of the executive committee of the New York State Association for the Protection of Fish and Game will be held in Syracuse Nov. 17. Club secretaries are requested to send to secretary, John B. Sage, Buffalo, the names of the delegates.

### The Georgia Bird Supply.

AUGUSTA, Ga., Oct. 2.—We have just returned from a week's camp on the Savannah River, twenty miles from this city, in Columbia county. We found partridge more plentiful than I have known them to be for the last ten years, owing to the law which prevents the running at large of stock. The second day we were in camp we took the dogs out and found fifteen coveys, ranging from ten to thirty birds to the covey. We did not shoot any, as the law does not go out until Oct. 15. We went principally to locate them for the open shooting. Gray squirrels are as thick as the leaves on the trees. Early every morning we would go down on the creek near the river and still-hunt them, killing twenty to thirty apiece. Have just heard from a point below us, where the doves are coming in by the thousands. I will go down in a few days and try them. No woodcock in yet, but expect plenty later in the season. Many thanks for the information regarding the pointer; it was entirely satisfactory. O. O. CHE.

### The "Perfect" Pocket Oiler.

CUSHMAN & DENISON'S "Perfect" Pocket Oiler is a little implement that has appealed strongly to sportsmen ever since its introduction on the market. It is neat, compact and cleanly, and invaluable for keeping guns and other paraphernalia in good working order. The manufacturers now take pleasure in announcing that owing to the steadily increasing demand, they have been enabled to reduce the price of their oiler from 50 to 25 cents. The former high standard of excellence in material and make up will be maintained unchanged.—*Adv.*

NEAR BY SHOOTING AND FISHING.—For Sale—A membership share in a shooting and fishing club, thirty miles from New York. Excellent quail, ruffed grouse and woodcock shooting and 7 miles of good trout water. Address "Member," Box 25, New York city. —*Adv.*

# Sea and River Fishing.

*The Fish Laws of the United States and Canada, in the "Game Laws in Brief," 25 cents. In the "Book of the Game Laws" (full text), 50 cents.*

### FISHING LINES.

Where the hoarse frog clears his throat,
And the redbird's crimson coat
Gleams like livid fire afloat,
Where the gilted oriole,
Wing of flame and singing soul,
Floats and sings in uncontrol—
In the lakes and streams near by
There we cast the spoon and fly—
Frank and I.

When the romping girl of May
To her sister, June, gave way,
Substituting work for play—
When the rainbow-spotted trout,
Eager, vigilant, is out
On a fly-destroying scout—
Under such a sun and sky
Fished we, with the spoon and fly—
Frank and I.

Land of nature's treasures, rare!
Garden land of lakes, so fair
As the gems a queen might wear!
Land where red does hide from prey
Polka-dotted fawns away—
Animated blossoms, they,
Agile, graceful, sweet and shy
There we fished: good reasons why—
Frank and I.

In Gogebic's faultless tides,
Where the knightly bass abides;
Not a lonely one, that hides
Under rocks, a snare to shun,
But in regiments they run,
Charging skinner spoons for fun.
There we cast our lures to try
Each the other's skill to vie—
Frank and I.

Not for shiners silver-white,
Not for sunfish, golden bright,
Not for mud-cats, out of night,
Not with worms, on Limerick hook,
Held by pole of dubious crook,
Not with seine, upon the sly—
No: we wanted better fry—
Frank and I.

Only royal fish were sought,
Gamy, beauteous trout were brought
Into basket, though each fought
Bravely as a brave trout would—
Bent the rod as good trout could,
Whirred the reel as true trout should.
Sordid reader, ask not why
We went forth with spoon and fly—
Frank and I.

Eagle river's silver band
Holds upon its beaded strand
Loveliest lakes of any land.
Twin lakes, clear as stainless glass—
Beautiful as burnished brass,
Home of mascalonge and bass;
Fish, that all these waters ply—
Those we caught with spoon and fly—
Frank and I.

Caught the giant mascalonge,
Saw him leap and felt him plunge,
As a prisoned ox would lunge
After freedom. What a thrill
All the throbbing pulses fill,
As he fights with kingly will.
So the golden hours flew by,
As we cast the spoon and fly—
Frank and I.

But we found still richer prize
Than a sportsman's paradise.
Found the gold of sunny skies,
Found the key to better health,
Found the key to nature's wealth,
Found the strategy and stealth
Which bring joys that satisfy,
Found all these, with spoon and fly—
Frank and I.

CAREY.

## FAVORITE FLIES.*

THIS superb work, from The Riverside Press, is a royal octavo of 522 pages, illustrated by thirty-two colored plates containing 291 flies, six engravings of natural insects, and eight reproductions of photographs of anglers and fishing waters.

Part I. is devoted to a brief popular account of the life history and classification of the insects whose imitations are utilized for the deception and capture of game fish. It gives also a history of the red-hackle. Part II. contains histories of the favorite flies, accompanied by letters from 201 correspondents, relating to their use in Canada and nearly all the States and Territories of our Union.

Incidentally Mrs. Marbury introduces choice bits of history, poetry, legendary lore, descriptions of landscapes and famous waters, incidents of out-door life, quotations from celebrated authors, quaint character sketches, and pleasant words about well-known anglers. The correspondents tell the reader many things of interest and value about their experiences with artificial flies and other means of capture in various waters. Their letters relate to many kinds of game fish, extending over the entire country, and contain innumerable hints and points about sizes and styles of hooks, colors and lengths of snells and leaders, quality and structure of lines, character and management of baits, the relation of colors to time of

*"Favorite Flies and their Histories," by Mary Orvis Marbury, with many replies from practical anglers to inquiries concerning how, when and where to use them. * * * Boston and New York. Houghton, Mifflin & Company, 1892.

day, and of flies to the season of the year. Few items of interest have escaped the enthusiasm of the anglers and the skill of the authoress.

In the beginning we referred to "Favorite Flies" as a superb work, and such it is in every particular. The number of typographical errors is surprisingly small; the reproductions in black, as well as in color, are in the best style of modern art, and the book, as a whole, is delightful to look upon. We can confidently lay it before the intending reader with the words of Henley, "*Hic habitat felicitas.* Enquire within."

Mrs. Marbury has fairly earned the thanks of every fly-fisherman of the future, if not of the present, in that she has collected and perpetuated in this book a mass of valuable facts in no little danger of loss beyond recovery. Its judicious reader will hardly know whether the more to commend the originality of its conception or the courage which undertook to embody that conception—a courage, by the way, only to be duly appreciated by him who has learned by experience the proneness of man to answer written questions by anything and everything except the matter in point.

The book opens with a brief but suggestive and excellent treatise on entomology. Then follows a history of that pioneer and foundation fly of all artificial flies, the red-hackle. The rest of the book is made up of colored plates of flies, comments thereon, and geographically classified letters from all parts of the country where the artificial fly is employed in regard to their use in the region from which the letter emanates.

This bald statement does, however, but scant justice to the scope and value of the work. The colored plates are executed in the very best style of the lithographic art. Without other aid than from them, he who ties his own flies can, if he has the requisite material and skill, reproduce any fly in the collection. Each plate is followed by remarks on the origin and merits of each fly depicted therein, with an account of the natural insect, if any, which it is supposed to imitate; while the entire range of angling literature has been ransacked in the most painstaking manner to furnish whatever of fact or fancy may be of value or interest. When it is added that the colored plates depict 17 hackles, 18 salmon flies, 48 lake flies, 185 trout flies, and 58 bass flies, the comprehensive character of the collection, and the value of the detailed comments on each of its 291 flies will be more apparent.

It is to this portion of the book the angler of the future will turn with most interest, and which makes it, what without doubt it is destined to remain for generations to come, a prominent landmark in angling literature.

Whatever of other reward she may receive for her labors, Mrs. Marbury may be assured that her contribution will be quoted and her name remembered, long after all of her contemporaries in angling literature are quite forgotten except by the book collector.

The value of this book is, however, by no means limited to that of a book of reference in which the angler of the future may study the growth of his art and its appliances. The fly-fisherman of to-day who does not possess it lives below his privileges. From it he can make, or cause to be made, a range of flies equal to any and every emergency. In it he can probably find and identify any fly which has touched his fancy and which he is unable to name. However great his knowledge and experience, he cannot fail to be interested in and to profit at all events by suggestion, if nothing more, by the mass of information scattered through the comments on the various flies. And lastly, if he proposes a visit to some unfamiliar region, he need no longer worry as to whether his stock of flies will meet the exigencies of the trip, for in the book he will not only find the information he requires geographically arranged for his convenient reference, but can identify the flies recommended from the colored plates should the names be unfamiliar.

This collection of over 200 letters from every part of this country and Canada where fly-fishing is practiced, answering more or less completely such well conceived questions as the following is simply invaluable both as to the present and the future:

"Favorite fly or flies among those well known."

"Testimony regarding the same, in connection with locality, time of day and season."

"Facts relating to the origin of any fly, either those well known or new creations."

"Incidents proving efficacy of above."

"New flies—origin, time, name, place."

"Theories regarding shape, size and kind of hooks."

"Theories regarding snells, whether stained or clear, light or heavy, twisted or single, short loops or long strands."

The perusal of these letters gave rise to many reflections, the temptation to repeat some of which here it is difficult to withstand. I will, however, confine myself to two.

I was surprised to find how little progress that cardinal tenet of the new school of fly-fishing—a dark fly on a dark day and a bright fly on a bright day—had made in this country. I was also surprised as well as pleased to find how much more general the use of eyed hooks for flies, in place of those with a gut loop or strand, had become than I supposed. While as to the former I am, after some years of experiment, something of a "mugwump," with perhaps a slight bias in its favor, the eyed hook has long seemed to me so very decided an improvement that I have wondered at its tardy acceptance. Still, as in the case of the split-bamboo rod, the law of the survival of the fittest will doubtless in time work its perfect work, and the snelled fly take its place with the 12ft. single-handed fly-rods of our forefathers.

"Favorite Flies" is justly entitled to the most hearty commendation. HENRY P. WELLS.

NEW YORK, Oct. 10.

### Maine Landlocked Salmon Waters.

MONSON, Me., Oct. 6.—The season just closed has been a most successful one for trout and landlocked salmon fishing in the lakes and ponds in this vicinity. Especially is this true of Lake Onoway, Long Pond and all of the ponds in that region where landlocked salmon abound. Dr. A. T. Sanden, of 819 Broadway, New York city, who is an ardent sportsman, and who has a summer cottage at Lake Onaway, has spent the summer here and at that lake, and has been rewarded by some of the finest catches ever known hereabouts. I advise any who are desirous of learning of new fishing territory in Maine to confer with him, as he can give accurate information.

J. F. S.

## HERR MAX VON DEM BORNE.

ALMOST from the date of the creation of the United States Fish Commission, the literature of the Commission and the columns of American journals that devote space to the subjects of fish, fishing and fishculture, have made frequent and honorable mention of Herr Max von dem Borne, a distinguished German fishculturist who has taken such an interest in, and so identified himself with, what pertains to fish and fishculture in the United States as well as in his own country, that his name has become nearly as familiar to our eyes and ears as the names of our own fishery experts. Translations of his papers, extracts from his books, records of his experiments and observations have been freely printed, but never a sketch of his life.

His family began at Brunswick (Lüneburg). A document in the Archives of Wolfenbüttel, near the Hartz Mountains, dated 1140, shows that the family belongs to the oldest of the German nobility. They came with Albrecht the Bear to the Mark Brandenburg, and then to Pomerania, where they have since remained as nobles, feudal warriors and landed proprietors, from the time of the Crusaders to the present. Herr von dem Borne was born on the Knight Estate Berneuchen (which has been in possession of the family since 1653, the year that "Walton's Compleat Angler" was published) on Dec. 20, 1826. The knight estate consists of about 5,000 acres, which contains several large lakes and through which the river Mietzel runs, a considerable stream, according to a map of Berneuchen, with tributary lakes and streams in the irregular half circle of its course through the village and adjoining estates. Upon arriving at a suitable age he was sent to the Gymnasium (high school), at Berlin, and later was a student at the Universities of Berlin and Bonn.

After he was graduated he became a mining engineer, in which profession he served from 1847 to 1859, when he became a landed proprietor on his ancestral estate and engaged in the art of fishculture, hatching eggs, rearing fry and breeding fish in ponds, rivers and lakes on an extensive scale, and the fish from Berneuchen are now sent all over Europe.

Herr von dem Borne has imported from America the large and the small-mouth black bass, the rock bass, calico bass, common sunfish, long-eared sunfish, dogfish, common bullhead or bullpout, channel catfish, the common minnow and the crayfish. He was a pioneer in introducing the black bass into European waters, and his success with both species of this fish has been marked, so much so that he is recognized as the father of the black bass in Germany. A brief mention of the initial importation of the black bass will be of interest. In February, 1883, under the care of Mr. George Eckerdt 75 small-mouth and 7 large-mouth bass were sent to Berneuchen. All but 10 of the former and 3 of the latter died. The small-mouth bass were from 7 to 13 centimetres long, that is, roughly, from 2¾ to 5in. in length. The large-mouth bass were from 25 to 31 centimetres long, or from 10 to 12in.

On June 15, 1884, a little more than a year after they were received, the large-mouth bass spawned in Herr von dem Borne's ponds, and 2,000 of the fry were caught and placed in a pond by themselves. June 22, 1885, the small-mouth bass spawned and 22,000 of the fry were taken, and from that time the black bass have been propagated at Berneuchen with unvarying success. I mention the date of spawning to show that transportation made no change in the time of reproduction, and to again call attention to outrageous laws that permit bass to be caught in June. The rainbow trout is also propagated in the ponds at Berneuchen, and they have prospered from the first. The following orders and honorary distinctions have been conferred upon Herr von dem Borne: Knights Companion of the Order of St. John of Jerusalem; Prussian Crown Order, Third Class; Brunswick Knights Cross, First Class (Order of Henry the Lion); Chamberlain to the German Emperor, which office he now holds. He has been a member of the Deutscher Fischerei Verein since its organization in 1870, and is an honorary member of the American Fisheries Society (one of three living members); of the London Fly-Fishers' Club; of the Piscatorial Society, London; the Bavarian Fishery Association, Munich; the Austrian Fishery Association, Vienna; Société Centrale pour la Protection de la Pêche Fluviale, Brussels, and Société Centrale d'Agriculture de France, Paris. He is in possession of several gold and silver medals and diplomas from the International Fisheries Exhibitions in Berlin in 1880 and London in 1883, and many others; but the prize he values most is the second valuable prize in the Berlin Fisheries Exhibition of 1880 (the first being awarded to Prof. Spencer F. Baird), and presented by the German Emperor, a large and beautifully carved book case.

His literary works comprise An Illustrated Pocketbook on Angling, 1875 (third edition 1892); Guide for Anglers through Germany, Austria-Hungary and Switzerland, 1877; A Book on Fishculture, now in third edition; Hand Book on Fishing and Fishculture, with Professors Benecke and Dalmer; An Ichthyological Map of Germany, Austria-Hungary and Switzerland, and numerous smaller books and treatises, including pamphlets upon the American *Salmonidæ* in Europe; the American Large and Small-Mouth Black Bass in Germany; The American Catfish in Germany; The American Calico Bass in Germany, and the American Rock Bass in Germany. These books are illustrated with excellent figures of the fish, tackle, etc., and the author evinced such a thorough knowledge of their habits and peculiarities as to give evidence of his keen and indefatigable study and observation as fishculturist and ichthyologist.

Perhaps I may be pardoned if I refer to one matter in connection with black bass in both the United States and Germany with some personal satisfaction. When the bass in the ponds at Berneuchen reached a size to afford sport, Herr von dem Borne experimented with various flies of his own design and construction to find what they would take best without reference to the flies of this country. These experiments resulted in a fly which has been named "Von dem Borne" in America, and which the designer considered the most killing bass fly of all that he tried in German waters. The predominant colors in this fly are the same that I found best for black bass over here and which were embodied in a fly called the "Cheney." In fact the colors and their arrangement in head, body, hackle and tail were almost identical in the two flies, but one had wings, the other did not. It is fitting that in closing a brief sketch of Herr von dem Borne I should refer to his friend and colleague, the late Dr. von Behr, who was the president of the Deutscher Fischerei Verein. In a recent letter from Miss von Behr she says: "All my father's books relating to fisheries (and the greater part of them was American), and the large correspondence he has been leading on the subject for seventeen years, have gone to Herr von dem Borne according to my father's expressed wish, and so has the great picture of Prof. Spencer Baird, which always hung in my father's room and was so much cherished by him. Herr von dem Borne has now presented the books to the Bureau of the Deutsche Fischerei Verein, thereby to lay the foundation of a library."

These three great fishculturists held one another in highest esteem, and the bonds between them only exemplified the saying that the whole world is kin.

A. N. CHENEY.

## THE KEKOSKEE FISH STORY.

BOSTON, Oct. 6.—I have been reading the Kekoskee fish story and enjoying it as I have enjoyed nothing since "Antwine's" pigeon story appeared in FOREST AND STREAM. You remember how "Antwine" loaded up his old musket to the muzzle and fired up through the dense flight of pigeons going over and shutting out the daylight, and how the pigeons began to rain down till they buried the astonished hunter up to his neck, and as he with difficulty climbed out of the mass he saw the spot of sunlight, let through the hole created by his shot, moving off across the country.

I have read the Kekoskee fish story over and over again, as I gained strength to do it after the first reading, just to sort of fix the details of it in my mind and help my imagination center on the great event. I have laughed over it till the tears come and I am weak and faint, but not in derision or unbelief—for I belive every word of it. That story must be true. But I have laughed in sheer happiness at once more reading a fish story that is adequate, comprehensive and soul-satisfying, not only in general plan and outline but in every feature and smallest detail.

It is a story which, marvelous as it is, will, I am convinced, bear every test. It is only when you come to work it out in various ways—for example mathematically—that you begin to appreciate its true grandeur.

The run of bullheads lasted two weeks and the geyser of fish at the hole below the dam spouted all that time, day and night—as we must assume—and all on account of the terrible *vis a tergo* of the body of struggling fish confined by the ice, which, with the banks and bed of the river, formed a gigantic sausage filler six miles long.

With just a thought of the deplorable and utter waste of, not water power, but fish power, which if properly stored and applied might have been sufficient to run all the machinery of Kekoskee from that time to this, and perhaps by this means to have averted the sad decadence of the town—let us try by cold figures to get some idea of the mass of fish which that geyser yielded during the period of eruption.

The widow Sneider counted 900 loads of bullheads going past her place in one morning, and the road she lived on was "only one of several leading out into the country." Suppose we allow five roads. There were probably more, but we will say five, for like Mr. Hough, we wish to treat this matter "in a careful and temperate manner." It is expressly stated that the widow only counted a part of the loads which passed. Probably she got tired of counting and gave it up in the afternoon, but that the procession went right on just the same, all hands doing at least a fair day's work, not knowing when the geyser might peter out.

We will, however, take no account of the afternoon haul, and we will assume that the news didn't get fairly over the county till the middle of the first week. This would give, not counting Sundays, say nine working forenoons, and 8,100 loads for one road and for five roads 40,500 loads of bullheads. Certainly a very big haul. But now the simplicity of truth begins to affect us, and we see how it was possible for the soil of the county and the quality of the pork product of the region to be affected as they were.

With all this mass of bullheads to feed to the stock and spread over the surrounding country, it would be a bullheaded idiot who wouldn't believe the statement as to the result.

Moreover, if, as I am convinced many statisticians would do, we allow for afternoon work also, we should have a grand total of 81,000 loads of bullheads.

I claim that even this would be a conservative estimate, as we have not counted in the haul of the first three days or Sundays, nor said anything of the layers of black bass and pickerel that were discovered after the lava flow of bullheads ceased.

We must remember that the geyser was "50ft. across and about 12ft. high," and kept "erupting" all the time. The rate of flow is not stated, but could doubtless be approximately determined by calculation from the time involved and the estimated mass of the erupted material.

The saddest thing about the whole affair was the ruin of the reputation of the town and hence of its commercial prosperity because of the simple and truthful nature of the people who, knowing the facts in their remarkable history, could not tell a lie. There is, however, left to them and to us the one consolation that this noble assertion of the truth of their great fish story would be taken at its true value by St. Peter when they come to knock at his gate, for he was once a fisherman and "knows how it was himself."

I hope this consolation will also be of value to Mr. Hough who has so often in the boldest and most fearless way in the columns of FOREST AND STREAM—and evidently sustained by the same high principles—taken the same risk that was incurred by the inhabitants of Kekoskee.

C. H. AMES.

### Purifying the Neversink.

THE Neversink River has been liberally stocked with trout by the New York Fish Commission; and it has been cursed with fish pirates who have taken quantities of fish illegally. Dr. Willett Kidd, the State Game Protector of the Second District, has secured evidence against two of the worst offenders. He has brought suits against Thos. Cuddeback, of Deer Park, Orange county, for maintaining an eel rack in the Neversink, and against J. Johnson, of Gilman's, Sullivan county, for catching trout in a trap.

## CASTING LINES AGAIN.

In the Forest and Stream of this week, I have imagined a tendency on the part of Mr. Hough to poke fun at my eight cent fish-line, which he thinks will hardly do for casting. A similar doubt was also indicated in the letter of presentation, in regard to the trolling qualities of the unbleached linen, and taken altogether, I tear my effort at helping Mr. Hough out has been a failure. But here is another suggestion which may be more serviceable. Did our Chicago friends ever try for bass-casting purposes, the ordinary sea-grass line (so called) which in point of fact is made of raw silk? It is hard, smooth, runs easily through the guides and takes up very little water, while it does not grow tender with moderate use. This line is used very largely on the St. Clair Flats, where the art of casting a minnow from the tip of the rod is practiced to perfection, and where the writer took his first lessons from some of the expert "punters" of that section more than fifteen years ago. If some manufacturer would only give us a line which would embody this same material in a round, hard braid, it would afford a most excellent article for minnow casting. As it is, the breaking strain of the sea-grass line is nearly twice as great as the ordinary undressed, braided silk line of the same caliber. If I were going to try one of them on Mr. Hough's bass, it would be a cable, laid line of the next to the smallest size. Of course these lines, being twisted, are not available for trolling.

Away out here in the effete northeastern portion of Ohio, on the Maumee, we have still another way of casting the minnow in bass fishing, but that is too long a story to take up now.

It occurred to me, while I was penning the preceding paragraphs (with my Remington) that if I can get it, I will mail Mr. Hough a clipping from a braided line sent only a few days since from Germany to that veteran and expert manipulator of piscatorial truth, Mr. John E. Gunckel. It is an admirable line in appearance, and possibly may be the very thing that Mr Hough is seeking.

Toledo, Oct. 8. Jay Beebe.

P. S.—This comes of not reading over what you have written. What I meant to say was that after my linen line had been dipped in oil and was partly dry, it was rubbed with a little wax, not "oil," as the type-writer made me say.

## QUESTIONS AS TO NAG'S HEAD.

In answer to questions asked about Nag's Head from several correspondents I would reply in general as follows:

The hotel at Nag's Head proper is only opened from June 20 to Sept. 15. It is owned by a stock company of North Carolinians, and it was managed last year by Geo. P. Galling, of Norfolk, Va. The table set at the hotel is first class. Oysters, clams, softshell crabs and all varieties of fish cooked fresh from the water are their specialties, of course. Board at this hotel costs from $10 to $15 a week, and less by month.

There is a little hotel at Manteo, on Roanoke Island, that is open all year. Manteo is reached by Old Dominion boats three times a week. Tom Crank, of Collington, is a fisherman, hunter and guide. He has five extra rooms in his house, and takes boarders in winter who come to shoot ducks and geese and fish. The boat referred to for $1 a day, with board, is of course a duck-hunter's skiff. Bait is easily and cheaply gotten. Clams cost 20 cents a hundred. Drum are caught with hook and line, baited with a whole fish. Rock are caught with hook and line by sportsmen, with nets by the fishmongers. The drum are caught in abundance from the beach with cast lines.

There is no pleasanter place I know than the Nag's Head Hotel for one's family for a whole summer. The best people in North Carolina go there and everybody is free and easy. The beds in the hotel are pretty rocky, but the air is so pure and sleep so sound you can sleep all night on boards. I never saw any one who complained of loss of sleep. If you want to be quiet and get out of the world absolutely go to Nag's Head. The name of the little hotel at Manteo is the Tranquil House, open all year.

Thos. Dixon, Jr.

### Maryland Bass.

Havre de Grace, Md., Oct. 8.—Black bass are biting freely and some good catches have been made from the wharves. Early this morning William Raisin took about a dozen, the largest weighing 3lbs. 5oz. Small minnows, called gudgeons, are used for bait. It is not a common thing to capture bass here, but for some reason the fishing is better now than it is at Port Deposit, three miles up the river. Crappies are plentiful in Tide Water Canal and furnish fair sport. White perch may be had in abundance near the battery station of the U. S. Fish Commission. For these the best bait is "peeler" crabs. Yellow perch are very common and the square-tailed catfish are as plentiful as the sable fisherman could reasonably wish.

Young shad are reported in great shoals coming down the Susquehanna. A very observant steamboat captain has noticed that the black bass will take the minnow most freely very early in the morning, and the fishing invariably slacks off when the sun begins to warm up the water.

### A Long Island Red Snapper.

The *Times* records that a magnificent specimen of the red snapper (*Lutjanus blackfordii*) has been sent to E. G. Blackford, at Fulton Market, from Gardner's Island, at the east end of Long Island. This fish was taken in one of the pound nets at that place. It is a very unusual thing for red snapper to be found north of Cape Hatteras. This specimen weighed 10lbs.

### Trout or Black Bass.

*Editor Forest and Stream:*

As I am a subscriber of the Forest and Stream, although a comparatively new one, I would beg leave to ask a few questions. I never see any communications or information on fishing in the Southern Central States, so I thought I would write and ask for some. I have never had very much experience in trout fishing, but had just enough to get an insight of the pleasure and sport connected with it. We have some very fine trout streams in Tennessee which I think worthy of mention, and as there are no other fish in the State that are worth fishing for, I would like very much to get some information in regard to the trout family. The fish in question are found in small streams in the near vicinity of Nashville. They are something similar to the regular "brook trout," probably a little thicker, resembling a "perch" to some extent. The color is nearly black on back, shading to a perfect white underneath. They are commonly called "black perch," but I think they are some species of the trout family. They are also very game, and when you strike them in the right season there is lots of sport, and they bite fast and furious like trout. Hoping you have time and space to answer this, I remain, Irwin McBride.

Nashville, Tenn.

[The fish referred to is not related to the brook trout of the salmon family; it is a black bass. A figure of the species was published in our Black Bass Supplement.]

### Spawning of Striped Bass.

*Editor Forest and Stream:*

Queries—When do the striped bass (*Roccus siruatus*) spawn? I find in the 'Fishery Industries of the United States," on page 425, that Professor Goode, under the head of "Reproduction and Growth," states as follows: "They spawn in the late spring and early summer, some of them in rivers, others probably at sea, although this has not been definitely ascertained." I took this afternoon, from a stand in front of our club house, two bass weighing respectively 31¼ and 13¼lbs., female bass, each with large roes, and spawn nearly fully developed and ripe. They certainly could not have carried their spawn till the "late spring or early summer." From a careful examination of the spawn I am satisfied that they could not have carried it for over a month longer. Do they spawn twice a year? I have heard that they do. Can you give us any information on this point. Henry P. McGown.

[The striped bass usually spawns from April to June, either in the rivers or in the brackish waters of bays and sounds. Young striped bass, 1in. long, have been found in the Delaware the second week in June. At the present time specimens about 4in. long are taken in the Potomac. A peculiarity of these young fish is the presence of numerous dark bands on the sides. Nothing is known to us about two spawning seasons in a year, but the fish spawn much later in northern waters than in the South.]

### Death of Hiram Atkins.

Highgate, Vt., Oct. 4.—*Editor Forest and Stream:* One of Vermont's most earnest fish protectionists, Hiram Atkins, Esq., died at his home in Montpelier, Vt., on the 1st inst. Mr. Atkins was editor and proprietor of that wideawake paper, the *Argus and Patriot*, and was owner of the well-known "Camp Watson," on the eastern shore of Lake Champlain, where he spent most of the summer months, surrounded by relatives and congenial friends.

His death is sincerely mourned by a host of friends found among all political creeds.

In fish protection there was something of the old Ethan Allen style about him, as the following anecdote will show: Before the present State law was passed prohibiting catching black bass under 10in. in length, he had made such a rule for one of Camp Watson's laws. One day one of his guests, Judge ———, brought into camp some small bass. Mr. Atkins promptly called his attention to the fact that they were under the regulation size. The Judge with a stiff amount of dignity replied that he didn't know of any law that prevented him from killing any sized bass that he caught. Mr. Atkins's reply was that Camp Watson had such a law and if he broke it again he would be bounced out of camp and be escorted to the railroad depot in short order.

Mr. Atkins was an Episcopalian and one of the most influential members in the diocese. Stanstead.

### Black Bass for Stocking.

Mr. Mark Samuel, of 10 East Sixteenth street, this city, advertises to supply black bass for stocking. As there has always been great difficulty in securing fish for this purpose, prospective bass culturists are admonished to remember Mr. Samuel's address.

## ROD AND GUN AND CAMERA.

As a recognition of the important place of amateur photography in its relation to sports of the field and prairie and mountain and forest and stream, the Forest and Stream offers a series of prizes for meritorious work with the camera. The conditions under which these prizes will be given are in brief as here set forth:

There will be ten prizes, as follows: First $25. Second $20 Third $15. Fourth $10. Six of $5 each.

The competition will be open to amateurs only.

The subjects must relate to Forest and Stream's field—game and fish (alive or dead), shooting and fishing, the camp, campers and camp life, sportsman travel by land or water.

There is no restriction as to the time when the pictures may have been or may be made—whether in 1892 or in previous years.

Pictures will be received up to Dec. 31, of this year.

All work must be original; that is to say, it must not have been submitted in any other competition, nor have been published.

There are no restrictions as to make or style of camera, nor as to size of plate.

A competitor need not be a subscriber of Forest and Stream.

All photographs will be submitteed to a committee, shortly to be announced. In making their awards the judges will be instructed to take into consideration the technical merits of the work as a photograph, its artistic qualities; and other things being equal, the unique and difficult nature of the subject.

Photographs must be marked only with initials or a pseudonym for identification. With each photograph should be given name of sender, title of view, locality, date, and name of camera.

The photographs shall be the property of the Forest and Stream. This applies only to the particular prints sent us.

From time to time we shall reproduce by the half-tone process samples of the work submitted, and should the interest in Forest and Stream's Amateur Photography Collection prove to be what is anticipated, we may ask for an expression of opinion by a vote of all our readers after the manner of the successful and famous "Camp-Fire Flickering Vote." Such popular vote will be quite distinct from the award by the committee.

## FIXTURES.

### DOG SHOWS.

Oct. 25 to 28.—Omaha Kennel Club, at Omaha, Neb. E. L. Marston, Sec'y.

Nov. 22 to 25,—Brooklyn. H. W. Huntington, Sec'y, 148 South Eighth street.

1893.

Jan. 3 to 6.—Mohawk Valley Poultry and Kennel Club. Lyman W. Clute. Sec'y, Ballston Lake, N. Y.

Jan. 5.—Gloversville, N. Y. F. B. Zimmer, Sec'y.

Feb. 21 to 22.—Westminster Kennel Club, New York city. Jas Mortimer, Supt.

June 13 to 17.—World's Fair, Chicago.

Sept. 7 to 10.—Hamilton, Ontario. A. D. Stewart, Sec'y.

### FIELD TRIALS.

Oct. 25.—Third Annual Field Trials of the National Beagle Club, at Nanuet, N. Y. Bench show of the club Oct. 24. H. V. Jamieson, Sec'y.

Nov. 7.—International Field Trials Club, third annual trials, at Chatham, Ont. Amateur Stake, Nov. 7. Open Stakes, Nov. 8. W. B. Wells, Sec'y.

Nov. 7.—United States Field Trials, at Elizabethtown, Ky. P. T. Madison, Indianapolis, Ind., Sec'y.

Nov. 8.—New England Field Trials, at Assonet, Mass. E. Knight Sperry, New Haven, Conn., Sec'y.

Nov. 14.—Fourth Annual Trials of the Brunswick Fur Club, at Princeton, Mass. J. H. Baird, Sec'y.

Nov. 15.—American Field Trials, at Columbus, Ind. W. J. Beck Sec'y.

Nov. 21.—Eastern Field Trial Club Trials, at High Point, N. C. W. A. Coster, Sec'y.

Nov. 28.—Philadelphia Kennel Club Trials, at High Point, N. C. F. G. Taylor, Sec'y.

Dec. 5.—Central Field Trials, at Lexington, N. C. Col. Odell, Sec'y.

Dec. 19.—Irish Setter Field Trials, at Lexington, N. C. Dr. G. G. Davis, Philadelphia, Pa., Sec'y.

1893.

January.—Pacific Coast Field Trials, at Bakersville, Cal. J. M. Kilgarif, Sec'y.

Feb. 8.—Southern Field Trials, at New Albany, Miss. T. M. Brumby, Sec'y.

## DANBURY DOG SHOW.

Whenever you mention Danbury to a dogman he smiles and says, "Better take it in, lots of fun"—and so there is in a mild, countrified way. The trotting is good, the side shows are lively, and above all the show is a go-as-you-please, and the committee, while charging no entry fee, do their level best to give every one a prize. If you have one dog and there is not a class for it, they make one. This is why Danbury is popular, especially with the handlers, such as Ben Lewis, George Thomas, etc.

The eleventh annual fixture took place last week, Oct. 4 to 7. As usual, on the first day the weather was execrable—rain, wind, hail and generally very cold and uncomfortable. This year, however, the judging took place inside the dog show building, a space at one end having been partitioned off. The judges were Mr. James Watson and Dr. James E. Hair. Mr. Watson took all the classes excepting Irish, Gordon and some of the pet dogs, which were handled by Dr. Jas. E. Hair, of Bridgeport, Conn. I don't know whether it is fair to criticise the awards much, as there is danger about the numbers not being on the right dogs. In some cases, however, there was no mistaking the fact that some of them were hardly up to form, and there was some grumbling—still it was all Danbury, and at Danbury everything goes.

Catalogues are an unheard of quantity at Danbury. Nobody troubles about any, as there are no numbers on stalls, and the judge gets along in the good old way by using the secretary's book to get the numbers and see which dog is which. The superintendent receives entries up till the night before the show, and as they come in he assigns a number and enters the dog in the little book assigned to its breed. As may be imagined, the numbers get delightfully mixed up; number 7, probably a St. Bernard, being alongside 179, and as most of the dogs are bunched in the same rotation, one can imagine that if the reporter is not in the ring at the time of the judging his task to sort them out after is almost a hopeless one. Tags are put on the dogs, but we all know what becomes of paper tags in a dog show, and the brass tags supplied in most cases reposed in the owners' pockets. This must be my excuse if the awards are not quite right, though I think they will be found measureably correct. They are taken from the secretary's book, but as many of the dogs were entered by handlers and "lumped" in the team, I have corrected the owners' names of those I knew.

Several well known exhibitors were present. Besides the judges there were Messrs. Chas. N. Symonds, J. B. Hefter, Smith Bros., Wm. H. Hyland, F. F. Dole, J. S. Mead, C. E. Osborne, C. E. Knott, Ben Lewis, George Thomas, A. Ritter, Dr. Kune, C. E. Bradbury, Buckellew Kennels owner, Mrs. Smyth and Mrs. Dole. The superintendent, G. E. Sears, was as cordial and obliging as usual, and his assistant, Mr. Reed, kept the aisles in good shape. The show is always tastefully benched in a permanent building, and is a source of great attraction to the country folk, who simply crowded the big aisles from morning to night. As stated before, Danbury charges no entry, and as the classes are always divided and this year $5 and $3 were given in prizes, a handler with a good team could win a neat sum. This year the show just fit in after Ottawa, and before disbanding their forces the "regulars" literally swooped down on the money, for wins do not count here, and the consequence was an array of quality such as Danbury has never seen before. It was given out, and so printed on entry forms, that Mr. John Reed would judge, but as stated in Forest and Stream a couple of weeks since, he declined and Mr. Watson was elected to serve. He needed some help and Dr. Hair was pressed into service after Mr. Morris had declined.

It is not much use taking the classes in extenso, a running commentary, perhaps, would be better. Mastiffs had five entries present. Kaiser William, the superintendent's dog, moved up to first place; his head needs depth of muzzle and his legs are none too good, an ordinary dog. Rymil's Rex loses in head even to the others. Ethel was the same old fat Ethel of last year, but beats Queen Salva in head properties, bone and probably in body, if any one could tell what that part of her anatomy is like in its natural state.

Roland overtopped anything that was in St. Bernards, a well-made dog that we should see more of. Ruth Cleveland, the winner in bitches, needs more depth in muzzle and breadth of skull, body light and rather straight behind, but neverthless is a bitch showing lots of quality.

The deerhound was a poor one, small head, light bone. The greyhounds turned out well, and I was delighted to see that good dog Ornatus once more on the bench after we were told that he would probably never face the judge again. Whoever has doctored him deserves the utmost praise for the cure, as the dog was badly cut in the hindleg tendons. In open dogs Dover wins over Baritone, the latter beats in head, neck, stronger loin; he loses, however, to Dover in front, who also is stronger in quarters and thighs, but he has not so much quality as Baritone. In bitches I cannot agree with the judge at all. Maybrook Nell, a long-waisted one, with bad feet, very open, and stands back on pasterns, head coarse, was placed first. Lady Clare, well-known as a pretty fair bitch, was second, but Miss Dollar, hc., the best of the three, and winner at Rochester the other day, should have won easily; a smarter bitch all round, lots

of quality, and nicely put together, unmeasurably better in legs, and beat the winner, who should have been he. instead. Winner was picked up by Mr. Bradbury in the streets of Rochester during the show.

In Newfoundlands I don't know what Mr. Watson was doing to give that big, fat, curly pig—it is nothing more—Carlo, equal first with Marshall's Prince Hal, a dog well known as having a good many pretensions to good Newfoundland form; the other has not the slightest. Last year I wrote the following on this class: "In Newfoundlands no self-respecting judge could give any prizes to the brutes shown (meaning Carlo, etc.), although urgently requested and told 'it was only Danbury,' etc." Carlo is owned by a Danbury man, and Mr. Sears shows it, and because I failed to see things in the same light he did, I was slated. In open bitches comes the fun, for here the judge withheld the prize from Albany Lass, a previous winner at good shows, but at present out of coat, still it is a correct one and not a curl in it, besides having other attributes that make it far above the dog winner, Carlo. The puppy first prize was also withheld from Mr. Marshall's Macgregor and Niger, the former getting second. I can hardly believe that Mr. Watson, in view of withholding these prizes, gave Carlo equal first with Prince Hal, the difference as the two dogs lay side by side was too ridiculous.

Pointers showed up well and many old faces took the prizes. I liked Mr. Hyland's Bert quite as well as Rock II. for the prize in open dogs, better head and better in front and body. English setters, barring Edgemark, were moderate and not so good as last year; Kent's Rex is a little out at elbow, nice head and body. The challenge bitch Tona was in poor shape but has a nicely formed head. Albert's Beau is not straight in front, light eye, but is redeemed by good shaped head and body. The numbers in these classes were so mixed up and the dogs being strangers to me I let them go. They were only moderate as a whole.

In Irish setters there was nothing outside of Seminole Kennel dogs to speak of. Rose Mentor has a cleaner, longer head than Claremont Heather, but it is very narrow, I like the latter better all round, in color and body; Rose beats the other in front.

The same old crowd in Gordons from Dr. Dixon's kennel. Duke of Wellington, a coarse-headed, dark tanned dog, was the winner in dogs, but there were others behind him that had better tan and head, but lost to him in body, legs and feet. The open dogs are all very ordinary. Wonder won rightly over Jeff in field spaniels; better head and legs; the others did not amount to much, good workers, probably, but not according to standard. There were no cocker dogs, but in bitches, although Woodstock Dora is short of coat, she is much better than Edgewood Beauty, placed over her, in quality, style of head, though her muzzle could be shorter, and in body, the other is too long and field spanielly in head. The foxhound display is always a fair one here, of good serviceable-looking dogs, but not at all sorty, and as they had no numbers on I can say nothing about them.

Beagles had something better. Trifle, the dog, is much like old Bannerman, all white, only larger; he stands out a trifle, or legs are straight though, and he boasts a capital coat and nice action. Pearl is wide in front, good body and coat; is a bit pinched in muzzle. Minnie is also a little wide in front, and feet open, has a sweet head, though ears are not carried close enough; nice correct coat. Smith Bros. showed quite a decent pup in Rocket, nice skull but muzzle too long.

Fox terriers had nothing outside of Grouse II. and Endcliffe Spin to boast of, and they are well known. Polo has not a bad shaped head, ears too large, nice legs and feet, but too large sized altogether. Don is not correctly marked; has brindle and fawn on head. The puppies were coarse and large. The collies are nearly all well known, having been on the circuit. Bertha II. won well in bitches, better head, ears, body and coat than Lothian Maid. Crissy has better front than the others; not so very narrow.

Bulldogs, with Carisbrooke and Addiscombe Gypsey, to say nothing of the pup Yale Pluck, quite a promising son of Rustic Swell, were well represented for a small show.

Bull-terriers, always good here, were not one whit behind former years. Frank Dole generally makes a raid at Danbury, but this time he met some opposition from Mr. Howe's Kennel which came fresh from Canadian victories. Sir Rudolph, the winner in dogs, has a good head, rather heavy chest and shoulders and not as straight in leg as some turned out from the New Haven Kennel, a well made body and good stern makes up a smart medium sized dog. Comet II. ran him close, especially in front. Woodcote Bill strikes me as having a nice long clear head, good eye but is not furnished yet. Grove Duchess beats Woodcote Lillie, in front, feet out a bit and skull is round yet and body wants letting down—time will do it probably. The others were of the old stamp. The different breeds of rough terriers were represented as probably never before in this old town. Skyes had Sir Stafford, of course, for Ben was there. Islay and Scotch Rose, are both celebrated more or less at present, but Endcliffe Maggie, one of the best, was left out in the cold. In the puppy class Scotch Rose is given as the winner when in Toronto catalogue she is put down as whelped November, 1889.

Black and tan terriers are often good here, for as last year the Rochelle Kennels took a run up with Sultan, English Lady, etc. I was glad to see that smart bitch F. F. Dole's Queen III., out again and she looked as lively as ever, she is a capitally well made terrier, but is more of a dog than a bitch in appearance and has hardly so finely shaped a head as her kennel mate Louie. Salisbury easily disposed of Merry Monarch as before, and Topsy and Rosette both have to take back seats when good ones are around. The toy terrier was the usual apple-headed "shiverer."

Some funny toy bull-terriers were shown; they should do for Boston. When you say that Venus, the challenge Yorkshire, was the only good one there, you will be about right, others are short of coat, and what they had was deficient in tan, too light or smutty.

Pugs made a brave show, but it was impossible to tell one from the other, except those that have been on the circuit. Seminole Kennels with their little team about scooped the prizes. Two very promising great Danes were shown by Mrs. Knox, out of a bitch that won last year; they show fair heads, good bone and size.

Central Kennels showed the circuit trotter Royal Roy in King Charles spaniels, and E. H. Morris had a nice short-faced one with good color in Union Jill.

Dexter, looking the ghost of his former self, with youthful looking "curlets" a very few inches long. Biglow we have seen a good deal of lately, and Black Beauty is a fair good bitch, light in loin and head not long enough. Dot is a pup yet. When one says that Fritz K. was the best dachshund, we can imagine what the rest were, for Fritz is but so-so himself.

Somehow we always have a lot of Irish terriers at this show, and there were some good ones again this time. Jack Briggs is a challenge winner now. Some new ones shown by a Mr. Wise, won in open dogs; the winner, Shaughran Rue, has a fair head, but knuckles over in forelegs and feet could be better; coat of good texture. Crib, second, loses to the other in muzzle, but has much the best forelegs and feet. I could not find Barney's Boy, but I thought Gatlies hardly treated with only he., as he has done better than that the past month in better company. Ballymoney, won nicely in the next class, her head is not perfect, bit broad in skull, is open in coat, and light in bone, but has a good body. Gypsy is short-faced and snipy. Spuds, a pup, is spiky (if there is no patent on this term) and legs want straightening.

The Salem Kennel came down prepared for anything in Scotch terriers, with Kilstor, Scotch Hot, Scotch Cold in the male division. Scotch Cold is a pup yet, legs crooked and head too wedgy. Norwich Mouse is a new one in bitches; she also is not strong enough in muzzle and should be straighter in forelegs, and quarters fall away too sharp, coat good and so is body. The Japanese hairless was a funny-looking little brown hairless toy terrier. He could pass for a Japanese hairless for anything I know, but the prize was withheld.

Whippets were represented by Boston Model and Perfection, the latter a very pretty bitch. Sheffield Lad, the "Pom," and Philos, Mr. Purbeck's Psovoi, completed the show. H. W. L.

LIST OF AWARDS.

MASTIFFS.—*Dogs:* 1st, G. E. Sears's Kaiser William; 2d, J. S. Rymill's Rex. *Bitches:* 1st, G. E. Sears's Ethel; 2d, H. Brontheimer's Queen Salva. *Puppies:* Absent.

ST. BERNARDS.—ROUGH—*Dogs:* 1st, A. Ritter's Roland; 2d, 2d, E. A. Housman's Le Roi. *Bitches:* 1st, A. Ritter's Ruth Cleveland.—SMOOTH—*Bitches:* 1st, M. H. Thiman's Appolona; 2d, withheld. *Puppies:* 1st, withheld; 2d, W. Calderwood's Milton.

PSOVOIS.—1st, Northfield Kennels' Philos.

DEERHOUNDS.—1st, Buckellew's Kennels' Alice.

GREYHOUNDS.—CHALLENGE—1st, A. W. Purbeck's Ornatus. —OPEN—*Dogs:* 1st and 2d, Maybrook Kennels' Dover and Baritone. High com., Mrs. A. Forepaugh's Blue. *Bitches:* 1st, Maybrook Kennels' Maybrook Nell; 2d, A. W. Purbeck's Lady Clare. High com., Maybrook Kennels' Miss Dollar.

GREAT DANES.—No open classes.—PUPPIES—*Dogs:* 1st, Mrs. Knox's Punch. *Bitches:* 1st, Mrs. Knox's Judith; 2d, J. E. Dainer's Millie.

NEWFOUNDLANDS.—*Dogs:* Equal 1st, Lewis Reid's Carlo and John Marshall's Prince Hal. *Bitches:* Prize withheld. *Puppies:* 1st, withheld; 2d, John Marshall's Macgregor.

POINTERS.—CHALLENGE—HEAVY-WEIGHT—*Dogs:* 1st, Wm. H. Hyland's champion Ossining.—OPEN—*Dogs:* 1st, C. Connell's Rock II.; 2d, W. H. Hyland's Bert.—LIGHT-WEIGHT—CHALLENGE—*Dogs:* 1st, J. H. Winslow's Inspiration. *Bitches:* 1st, W. H. Hyland's Fan N.—OPEN—*Bitches:* 1st, W. H. Hyland's Lady Graphic: 2d, G. O. Smith's Juno. High com., J. E. Smith's Lady. *Puppies:* 1st, G. O. Smith's Juno; 2d, W. H. Hyland's Lady Bountiful.

ENGLISH SETTERS.—CHALLENGE—*Dogs:* 1st, F. S. Brown's Edgemark. *Bitches:* 1st, Dr. Hair's champion Tona.—OPEN—*Dogs:* 1st, R. B. Moore's Kent's Rex; 2d, Dr. J. E. Hair's Albert Beau. Very high com., Wild Crow Kennels' Canadian Locksley. High com., Dr. J. E. Hair's Albert Roderigo. *Bitches:* 1st, Wild Crow Kennels' Yolo Maid; 2d, Dr. J. E. Hair's Albert Queen. *Puppies:* 1st, Dr. J. E. Hair's Albert Queen; 2d, Dr. H. A. Lawton's Louis.

IRISH SETTERS.—CHALLENGE—*Dogs:* 1st, Seminole Kennels' champion Tim. *Bitches:* 1st, Seminole Kennels' champion Laura B.—OPEN—*Dogs:* 1st and 2d, Seminole Kennels' Pride of Patsey and Montauk, Jr. *Bitches:* Equal 1st, Seminole Kennels' Rose Morton and Claremont Heather. Reserve, G. W. Adams's Lady Luna. *Puppies:* No prizes marked.

GORDON SETTERS.—CHALLENGE—*Dogs:* 1st, Dr. Dixon's Leo B. Reserve, Smith Bros.'s Rexmont. *Bitches:* 1st, Dr. Dixon's Duchess of Waverley.—OPEN—*Dogs:* 1st, Dr. Dixon's Duke of Wellington; 2d, E. H. Morris's Brillmont. Reserve, W. H. Hyland's King Robin. *Bitches:* 1st and 2d, Dr. Dixon's Lady Gordon and Princess Louise. Reserve, E. H. Morris's Raymont. Very high com., Buckellew Kennels' Widow Machree. *Puppies:* 1st and 2d, Smith Bros.'s Fenmont and Bangmont.

FIELD SPANIELS.—*Dogs:* 1st, H. M. Howe's Wonder; 2d, Thompson's Jeff. *Bitches:* 1st, Dr. James E. Hair's Fautner; 2d, C. E. Knott's Pearl.

COCKERS.—*Dogs:* All absent. *Bitches:* 1st, F. F. Dole's Edgewood Beauty; 2d, Dole & Thomas's Woodstock Dora. *Puppies:* All absent.

FOXHOUNDS.—*Dogs:* 1st, Buckellew Kennels' Mike; 2d, S. B. Warner's Music. Reserve, C. E. Osborne's Sam B. *Bitches:* 1st and 2d, Buckellew Kennels' Shot and Spot. *Puppies:* 1st and 2d, Buckellew Kennels' Ready and Maggie.

BEAGLES—*Dogs:* 1st, Geo. Laick's Trifle. *Bitches:* 1st and 2d, Geo. Laick's Pearl and Minnie. *Puppies:* 1st, Smith Bros.'s Rocket.

FOX-TERRIERS.—1st, Northfield Kennels' Endcliffe Spice; 2d, M. H. Thiman's Don. Very high com., G. W. D. Wixon's Polo. *Bitches.* 1st, C. E. Hanks's Grouse II.; 2d, B. J. Lee's Betty. Very high com., reserve, G. W. Mead, Jr.'s, Flirt. *Puppies:* 1st, 2d and very high com., J. S. Mead's Pepperbox, Pepper and Mischief. —WIRE-HAIRS—1st, Northfield Kennels' Barton Sting.

COLLIES.—CHALLENGE—*Dogs:* 1st, Seminole Kennels' Cora II. —OPEN—*Dogs:* 1st and 2d, Seminole Kennels' The Royal Monarch and Chrysolite. High com., C. E. Osborne's Polyphemus. *Bitches:* 1st, Seminole Kennels' Bertha II.; 2d, C. E. Osborne's Lothian Maid. Very high com., Seminole Kennels' Crissy. *Puppies:* 1st, J. S. Mead's Dorothy; 2d, withheld.

BULLDOGS.—CHALLENGE—1st, Charles A. Smith's Carisbrooke.—OPEN—*Dogs:* 1st, Dole's Yale Pluck. *Bitches:* A. B. Graves's Addiscombe Gypsy. *Puppies:* 1st, F. F. Dole's Yale Pluck.

BULL-TERRIERS.—CHALLENGE—*Bitches:* 1st, F. F. Dole's Bonnie Princess.—OPEN—*Dogs:* 1st and reserve, F. F. Dole's Sir Rudolph and Woodcote Bill; 2d and very high com., H. M. Howe's Comet II. and Chatham Prince. *Bitches:* 1st, H. M. Howe's Grove Duchess; 2d, F. F. Dole's Woodcote Lillie. High com., J. E. Ellsworth's Lillie. *Puppies:* 1st, H. M. Howe's Chatham Prince; 2d and high com., F. F. Dole's Woodcote Bill and Woodcote Lillie.

SKYE TERRIERS.—CHALLENGE—*Dogs:* 1st, C. A. Shinn's Sir Stafford.—OPEN—*Bitches:* 1st, C. G. Smith's Islay; 2d, C. A. Shinn's Scotch Rose. *Puppies:* 1st, C. A. Shinn's Scotch Rose.

BLACK AND TAN TERRIERS.—CHALLENGE—*Dogs:* 1st, Rochelle Kennels' Broomfield Sultan. *Bitches:* 1st, Rochelle Kennels' English Lady.—OPEN—*Dogs:* 1st, F. F. Dole's Salisbury; 2d, Rochelle Kennels' Merry Monarch. *Bitches:* 1st and 2d, F. F. Dole's Queen III. and Louie. High com., Rochelle Kennels' Rochelle Topaz and Northfield Kennels' Rosette. *Puppies:* 1st, Rochelle Kennels' Topaz; 2d, Dr. Jas. E. Hair's ——

TOY TERRIERS.—1st, C. E. Knott's Jim.

TOY BULL-TERRIERS.—*Dogs:* 1st and 2d, Dr. Jas. E. Hair's Meda and Spark. *Bitches:* No prize awarded.

YORKSHIRE TERRIERS.—CHALLENGE—*Bitches:* 1st, Northfield Kennel's Venus.—OPEN—*Dogs:* 1st, Northfield Kennels' Sandy. *Bitches:* 1st, Northfield Kennels' Jenny; 2d, withheld.

PUGS.—CHALLENGE—*Dogs:* 1st, Seminole Kennels' Bonsor.—OPEN—*Dogs:* 1st, M. Adams's Meddler; 2d, R. B. Sawyer's Chequasset Diamond. *Bitches:* 1st and 2d, Seminole Kennel's Midget and Ruby F. Very high com., Dr. Jas. E. Hair's Nellie.

KING CHARLES SPANIELS.—*Dogs:* 1st, Central Kennels' Royal Roy. *Bitches:* 1st, E. H. Morris's Union Jill. *Puppies:* 1st, E. H. Morris's Union Jill.

POODLES.—CHALLENGE—1st, E. H. Morris's Dexter.—OPEN—*Dogs:* 1st, B. F. Lewis's Biglow. *Bitches:* 1st, M. H. Thiman's Black Beauty; 2d, E. H. Morris's Dot. *Puppies:* E. H. Morris's Dot.

DACKSHUNDS.—CHALLENGE—1st, L. O. Seidel's Fritz K.—OPEN—*Dogs:* 1st, M. H. Thiman's Dachsel; 2d, Swan Kennels' Scrupy. *Bitches:* 1st, withheld; 2d, Swan Kennels' Faldine.

IRISH TERRIERS.—CHALLENGE—1st, Northfield Kennels' Jack Briggs.—OPEN—*Dogs:* 1st and 2d, T. Wise, Jr's, Shaughn Rue and Cribb. High com., T. F. Dole's Barney's Boy and H. O. Carson's Galkies. *Bitches:* 1st, Northfield Kennels' Ballymoney; 2d, T. Wise, Jr's, Gypsey.—*Puppies:* 1st, Northfield Kennels' Spuds.

DALMATIANS.—1st, John Doyle's Cute.

SCOTCH TERRIERS.—CALLENGE—1st, Northfield Kennels' Kilstor. OPEN—*Dogs:* 1st and 2d, Northfield Kennels' Scotch Hot and Scotch Cold. *Bitches:* 1st and 2d, Northfield Kennels' Norwich Mouse and Gypsey Yet.—*Puppies:* 1st, Northfield Kennels' Scotch Cold.

WATER SPANIELS (?).—J. S. Mead's Leo.

RUSSIAN POODLES.—1st, withheld; 2d, Paul S. Wakem's dog

MEXICAN HAIRLESS.—Prize withheld.

WHIPPETS.—*Dogs:* 1st, Geo. Thomas's Boston Model. *Bitches:* 1st, Northfield Kennels' Perfection.

POMERANIANS.—1st, Northfield Kennels' Sheffield Lad.

MALTESE TERRIERS.—1st, M. H. Thiman's Daisy.

SPECIALS.

Best deerhound, Buckellew Kennels' Alice; mastiff, G. E. Sears' Kaiser William; collies, Seminole Kennels' Bertha II.; cocker, F. F. Dole's Edgewood Beauty; field spaniel, H. M. Howe's Wonder; bull terrier, F. F. Dole's Sir Rudolph; Newfoundland, equal, winners of open dogs; St. Bernard, A. Ritter's Roland; English setter, F. S. Brown's Edgemark; pug, Seminole Kennels' Bonsor; bulldog, Chas. A. Smith's Carisbrooke; Gordon setter, Dr. Dixon's Duchess of Waverley.

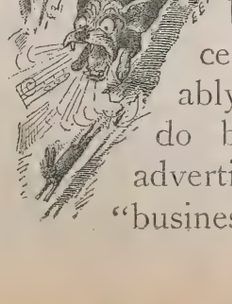
## BULL-TERRIERS AGAIN.

*Editor Forest and Stream:*

I am just in receipt of the communication of "Didymus" on the subject of bull-terriers, wherein he says of me: "Stir him up." I thought on first reading that his idea was to make use of the dog for that purpose. If such is the idea I beg to decline the mode and manner of such stirring. I have had some experience with that class of dog, dating back to the days when farmers were wont to turn the animal loose in their orchards—as an anti-small-boy apple-appropriating society.

After losing the most exposed part of several pairs of trousers in the pursuit of apples under difficulties—the dog being the difficulty—I entered into a contract with a harness-maker in our village whereby for one day's services helping him hoe his corn patch, he was to "reinforce" the aforesaid exposed part of my trousers with leather. The scheme worked well—I bore no more honorable scars, and there was a decided advantage over the other boys at school when the old maid school mistress laid me over her knee and administered the usual reward of merit with a flat ruler. So I may claim an anti-dated prejudice against "bulls" and cordially indorse the views of "Didymus" on the merits of that breed of animal. My antipathy bears more strongly, however, on the bulldog, not so heavily on the bull-terrier, which is one or two degrees removed from the bulldog in point of decency and qualities. He is a great improvement, and I am inclined to think "Didymus" should draw a distinctive line.

I have been acquainted with several very well-behaved bull-terriers and on one occasion up in Kent, Conn., was on very friendly terms with a dog of this persuasion named Bob. I established intimate relations with Bob by throwing a ball for him to chase. A year later I chanced that way, and as I entered the hotel Bob sat on the porch ruminating on the cussedness of the invention of flies. I said, "Bob, how are you?" He gave me a long searching glance and rushed through the house and out into the back yard, returning with the ball in his mouth, evidently remembering our former acquaintance and the ball practice. So I may claim a slight concession to bull-terriers on account of Bob's intelligence: moreover, Bob was very gentlemanly and good-natured and never bit anybody; but if "Didymus" will amend his complaint to read bulldogs I am with him. His quotation of the instance where General Coombs came near getting thrashed by the owner of the dog in the case is rather an argument in favor of the theory of like dog like man, inasmuch as the owner illustrated the tendency of such to fight on slight provocation, catching the infection from the dog, probably.



What a pity men owning a better breed of dogs are not amenable to their influence. Take for instance my favorite—the Gordon setter. If the general average of men were half as gentlemanly and possessed half the noble qualities of that breed what an improvement there would be in the world. PODGERS.

SAN FRANCISCO, Cal., Sept. 13.

## Collie Sweepstakes.

The annual collie sweepstakes, for collies born in the United States or Canada, on or after July 1, 1891, will be decided at the bench show of the Westminster Kennel Club, to be held Feb. 21 to 24, 1893. A subscription of $5, for each collie entered, to be paid to the secretary of the collie club at the time of entry. The stake to be divided as follows: 50 per cent. to the best dog or bitch, 25 per cent. to the second, 15 per cent. to the third and 10 per cent. to the fourth. Dogs to compete for this sweepstake must be entered in the regular classes of the bench show. Entries will close Nov. 1, 1892. Blank forms can be obtained by addressing J. D. Shotwell, Sec'y, 82 Hillside avenue, Orange, N. J.

**If you were shouting through a telephone,**

of which the wires ramified to the ears of every dog man in the land, you could not tell them of your bargains in dogs more speedily, certainly, effectively, cheaply, profitably and satisfactorily, than you may do by putting a short-term, low-rate advertisement in the *Forest and Stream's* "business" **Kennel Special Column.**

## UNITED STATES FIELD TRIAL DERBY.

*Editor Forest and Stream:*

I send you list of dogs remaining in the United States Field Trial Club's Derby. Pointers 34, English setters 48, Irish setter 1:

POINTERS.

ONWARD—G. W. Amory's dog (Wise C.—Velce V.).
BOY'S FAUST—Adolph Schmidt's dog (Spotted Boy—Sally Ale).
KENT ELGIN—T. T. Ashford's dog (King of Kent—Vera Bang).
CROXIE O'BANNON—R. L. Shannon's bitch (King of Kent—Croxie Wise).
MAME—R. L. Shannon's bitch (Brown Stout—Pearl's Pride).
GINGER ALE—R. L. Shannon's bitch (Osborn Ale—Pearl's Pride).
KENT'S MIKE—J. F. Pautler's dog (King of Kent—Croxhill).
RIDGEVIEW DUKE—Drake Sefton Kennels' dog (Beppo III.—Blithesome).
RIDGEVIEW DUCHESS—Drake Sefton Kennels' bitch (Beppo III.—Blithesome).
RIDGEVIEW PATCH—Drake Sefton Kennels' bitch (Beppo III.—Lady Norrish II.).
LADY PEG—W. T. Hunter's bitch (King of Kent—Lass of Bloomo).
POMME DE TERRE—T. G. Barstow's dog (Ossian—Clipaway II.).
LAD OF RUSH—J. L. Adams's dog (Rush of Lad—Topsy L.).
DAISY SOCWELL—J. L. Adams's bitch (Ossian—Devonshire Jilt).
BONNIE LASS—Ed A. Gordon's bitch (Earl of Kent—Carlotta).
KENT'S QUEEN—John Bolus's bitch (King of Kent—Vera Bang).
BRANDY—C. H. Wetmore's (Agt.) dog (Wetmore Guy—Wetmore Bud).
BANG'S STAR—Lewis Stuehmeyer's dog (Trinket's Bang—Pearl's Fan).
SPRINGATA—David Castleman's bitch (Castleman's Krup—Soringa).
VARRO—J. B. Castleman's bitch (Rex—Castleman's Nell).
MAINOS—J. B. Castleman's bitch (Castleman's Rex—Castleman's Nell).
CROXIE KENT—Bob Cooper's bitch (King of Kent—Croxie Wise).
RIDGEVIEW BEPPO—Graphic Kennels' dog (Beppo III.—Revelation).
RIDGEVIEW TENNEY—D. L. Darby's dog (Beppo III.—Blithesome).
RIDGEVIEW CLIMAX—Harold Strebeigh's bitch (Tribulation—Bloomo II.).
EARL OF KENT—Gus F. Schrever's dog (King of Kent—Sal).
KENT'S MAID—H. J. Reginald's (agent) bitch (King of Kent—Gladena).
MONKEY SMOKELESS—C. W. Meeker's dog (Ossian—Devonshire Jilt).
BIZ—W. Hinckle Smith's dog (King of Kent—Lass of Bloomo).
DON C.—Geo. A. Castleman's dog (Rank—Fly).
TEN-SLEEP—Edgmont Pointer Kennels' dog (King of Kent—Woolton Game).
TROUBLESOME—Edgmont Pointer Kennels' bitch (Tribulation—Pride of Idstone).
DAVID C.—Jos. Crugom's dog (Duke of Hessen—Princess Marguerite).
PRINCESS DOLLY—Jos. Crugom's bitch (Duke of Hessen—Princess Marguerite).

ENGLISH SETTERS.

HOOSIER GIRL—J. H. & J. A. Hunter's bitch (Dad Wilson—Daisy Hunter).
HOOSIER LADY—Frank Hitchcock's bitch (Dad Wilson—Daisy Hunter).
HOPE'S PRIDE—Manchester and Wartrace Kennels' dog (Gath's Hope—Georgia Belle).
PINK—Manchester and Wartrace Kennels' dog (Vanguard—Georgia Belle).
RANGER B.—Manchester and Wartrace Kennels' dog (Vanguard—Georgia Belle).
SPORT—Manchester and Wartrace Kennels' dog (Vanguard—Georgia Belle).
TOLEDO SUE—Manchester and Wartrace Kennels' bitch (Toledo Blade—Belle S.).
CLEM GLADSTONE—John L. Sneed's dog (Paul Gladstone—Latonia).
DAN'S LADY—Theo. Goodman's bitch (Dan Gladstone—Lilly Burgess).
APOLLO HILL—J. Shelly Hudson's dog (Ben Hill—Dolly S.).
DIRECT—J. W. Shriver's dog (Gun—Victoria Laverack).
CLIO—J. W. Shriver's bitch (Gun—Victoria Laverack).
GALE NOBLE—H. K. Devereux's bitch (Breeze Gladstone—Katie Noble).
REX-THE-KING—Jackson and Denmark Kennels' dog (Laddie Browdre—Phyllis).
LILLIAN RUSSELL—Jackson and Denmark Kennels' bitch (Philip Gladstone—Lou K.).
DUFF—W. T. Hunter's bitch (Toss—Patti Sing).
GLADSTONE'S PET—W. T. Hunter's bitch (Roderigo—Gladstone's Girl).
CECIL H—J. L. Adams's dog (Dr. Maclin—Cossette).
SIR KENT—J. L. Adams's dog (Kent II.—Nicolette).
DAN BURGESS—J. M. Freeman's dog (Dan Gladstone—Lilly Burgess.)
BRIGHTON CLIP—T. G. Davey's bitch (Canadian Jester—Lassie).
THE LAGGARD—Meadow City Kennels' dog (Roderigo—Gladstone's Girl.).
DIXIE'S ROD—W. G. Peters and J. E. Guinotte's dog (Roderigo—Dashing Dixie).
SUNFLOWER—N. B. Nisbett's, (Agt.) bitch (Dick Turner—Babe Gladstone).
RAP-EYE-DAN—Will Wilson's dog (Ben Hill—Dolly S.).
SANCHO—Wm. Daniels's (Agt.) dog (Tipton—Maud).
FLY—Wm. Daniels's (Agt.) bitch (Tipton—Maud).
PEMBROKE'S BLUE GROUSE—Scott's Wood Kennels' dog (Pembroke's Don—Sue of Hatchie).
RUBY BONDHU—T. W. Stoutenburg's bitch (Dick Bondhu—Cossette).
FLING—Bert Crane's bitch (——— — ———).
DAN'S DAN—T. H. Poindexter's (Agt.) dog (Dan Gladstone—Belton's Princess).
GAIETY — Royal Robinson's bitch (Lone Jack — Gay Rhoebe).
DESSIE HOPE—P. T. Madison's bitch (Gath's Hope—Stocking).
PROCTOR KNOTT—Blue Ridge Kennels' dog (Gath's Hope—Dashing Lady).
HOPE'S MINT—Blue Ridge Kennels' dog (Gath's Hope—Dashing Lady).
LANCIER—Blue Ridge Kennels' dog (Gath's Hope—Stocking).
DICK FOX—Blue Ridge Kennels' dog (Chance—Countess Rush).
LADY BROOKS—Blue Ridge Kennels' bitch (Chance—Countess Rush).
STEWART HILL—Bradford Kennels' dog (Ben Hill—Kate II.).
LOCHINVAR—Avent & Thayer's dog (Chance—Bessie Avent).
KINGSTON—Avent & Thayer's dog (Chance—Bessie Avent).
SHADOW—Avent & Thayer's bitch (Jean Val Jean—Lucy Avent).
NANCY FOREMAN—A. J. Gleason's bitch (Dan Foreman—Hope's Lucille).
LADY BELTON—T. M. Lowry's bitch (Tennessee Bob—Dixie Belton).
BELLE OF KENTUCKY—Fairmount Kennels' bitch (Dad Wilson—Bohemian Girl).
PRINCESS RAY—Geo. A. McLin's bitch (Prince Lucifer—Princess Lill).
TEAL SWINGE—Henry Schwinge's dog (——— — ———).
BABY BLUE—F. H. Harris's bitch (Blue King—Kate).

IRISH SETTERS.

ELPHIN—E. B. Bishop's bitch (Tyconnell—Kinvatra).

P. T. MADISON, Secretary.

INDIANAPOLIS, Ind.

## POINTS AND FLUSHES.

### Unbroken Dogs.

CHICAGO, Oct. 8.—Now that the field trial season is near, there are some matters which should be carefully considered as tending to improve the equality of the competition and a better understanding of its principles.

Of first importance is the matter of training, since without a thorough training no dog is properly prepared to enter a competition with justice to himself or his competitors. Moreover, no judge can properly grade an unbroken or partly broken dog's merit in a competition. It often happens that the half-broken dog is working for himself, the restraint imposed by an imperfect education giving his efforts a semblance of working to the gun. The enthusiastic and energetic work of the half-broken dog may be mistaken for an exhibition of a high order of natural qualities. But the worthlessness of such an exhibition, from a competitive standpoint, is in its uncertainty. Many dogs will hunt diligently for themselves, as they practically can do when half-broken. When properly broken they lose interest, hunt listlessly, lazily, or perhaps not at all. They may love to hunt for themselves, but are not enthusiastic or industrious enough to work to the gun.

The work of the half-broken dog is of itself most difficult to value relatively, since one moment he may do a most brilliant piece of work in a bold, dashing manner, and in the next moment make a most silly blunder. The absence of the finished performance which comes from thorough knowledge, experience and training is always palpably absent in such dogs, yet the brilliant work which comes from reckless self-hunting is too often over-valued by judges.

### Natural Qualities.

I believe in considering only the natural qualities in a field trial competition, yet I never believed in the natural qualities of the untrained dog as the standard The latter view has been eagerly presented by some impractical writers as that of the modern field trial man. By defining it to please themselves, and then presenting it as the true definition, they make a fair argument. However, no field trial man is an advocate of natural qualities independent of thorough training. It is a term, used in a field trial sense, to distinguish between matters of actual performance and matters of education. The individual capabilities of the dog as applied in a trained manner constitute his natural qualities. The need of the term was more apparent some years ago than it is now, when matters purely educational were allowed and abstractly valued in the scale of points. For instance, quartering was valued at whether the dog had any of the knowledge and its application, now called bird sense, a quality not then recognized in a competition. Retrieving was valued at 10, pace 20, backing 7, style 6, quartering 6. Thus, in round numbers, 50 per cent. of a dog's performance was acquired, artificial or ornamental properties rating as high as the practical.

It will thus be seen that at that time there was need of a distinction between the educational and the natural.

### Obstructing Competitors.

While the unbroken dog is a most variable character in a field trial, he is a source of endless annoyance and material injury to his competitors. His wildness at the outset never fails to infect his competitor, and the more spirited and capable is the latter, the more is his performance injured. If his points are stolen, his birds flushed or chased, or if he is constantly followed or headed in his ranging, he becomes jealous, excited or irritated, resulting in errors in his own work, which would not occur were he hunted with a properly behaved dog. The well broken dog is at a further disadvantage in constantly hearing loud whistling and orders given to his half-broken competitor, and the most harmful feature is that these orders are always directly contrary to what the well broken dog is doing or should do. If he is drawing to a point, he does so with the opposing handler's whistle blowing furiously, ostensibly to call his own dog in to join in the find. Times innumerable I have seen the well broken dog turned back by that cause when drawing on birds or pointing. If the dog points, he does so under much the same adverse circumstances, while the opposing handler is getting his unmanageable dog in to back. His range also is constantly changed or broken. All these circumstances are greatly aggravated if the opposing handler have a string of whistles, from which he can select one to imitate any other whistle. In short, the well trained dog does his work hearing orders in brawling tones or shrill whistling, which are directly contrary in intent to what he should do.

To aggravate this evil as much as possible, it is said that some trainers teach their dogs to go on to a blast of the whistle, and I am disposed to believe that it is true.

The blast of the whistle which sends his own dog on will call his opponent's dog in, it thus serving a double purpose. When I first heard this, I did not believe that any trainer would be guilty of such an unfair and dishonest practice. It is to be regretted that the shark should get into what should be sportsmanship, which embodies honesty, fair play and good fellowship. This is worthy the earnest consideration of field trial clubs and judges. They should see that the whistle is applied to its legitimate use. Field trials are now everywhere run in the interest of fair play and the best dogs winning. It is only necessary to point out an evil to have it removed. The day of the shark, jockey and trickster is gone in field trials forever.

As to the remedy for half-broken dogs, it is easy and available. Spot them out in the first series. There is no excuse whatever for a professional trainer bringing a half-broken dog into a field trial. The loud orders, constant whistling and rough work are unnecessary and unskillful. Even the Derby allows an age limit which admits of thorough training and experience. The recent trials in Manitoba demonmonstrated that amateurs could take thoroughly broken, honest dogs to the trials, and do quiet, pleasant handling, and do it effectively.

### The Bluffer.

There is a bugaboo growing in field trials. The breeder who is displeased announces that he will run no more dogs under such-and-such a club or such-and-such a judge. In the first place, the professional breeder does not run his dogs at any time for the benefit of any club. His motives in running are strictly personal. A threat to withdraw his dogs or not enter them commonly has the effect to bring a club to its knees, and the kicker is so deferred to, coddled and mollified, that he soon gets an over-weaning self-valuation and an exalted toploftiness. If a club would stop a moment to consider that they could get along well without such a personage, and in some ways be gainers, while the professional breeders must run at field trials to keep up their kennel interests, such club could easily burst the kicker's weak bluff by letting him stay at home. About one such lesson would effectually destroy his entire stock of bluffs. Field trials now are so well supported that they can frankly defy the bluffer for advertising or for revenue.

### A La Corbett.

I saw a little incident on West Madison street a few days ago, which afforded an optical demonstration of comparative anatomy and comparative psychology in action. There were two men and two dogs as central figures. The big shaggy dog was owned by a venerable old man, bent with age. He wore deep wrinkles, a full gray beard, a threadbare suit, a hat of ancient vintage and shoes of the Stradivarius model. In one hand he carried a tin pail, in the other a cheap stick. He was going to the grocery. The haughty fat pug was owned by a semi-dude young man on whose cheek shone the rich glow of cream of roses. This young man and his pug had a supercilious air which no one seemed to notice particularly. The young man carried something in his hand that looked like a roll of wall paper. There was something in the pug's high-bred air which offended the dog of the people. Hostilities opened quickly, the shaggy dog rushing his fat enemy into a corner and knocking him down. The pug was so fat and round that his enemy's jaws slipped harshly over the surface ribs, thus, by keeping his form, he foiled several vicious upper cuts. An emotional bystander gave the shaggy dog a prodigious whack in the ribs with a silver-headed cane, another man gave him a kick, while the old man gave the pug a resounding whack with the tin pail. Up to this time, the pretty young man appeared a bit dazed, and did not realize what was doing or what action to take. The whack in the ribs of the shaggy dog ended the first round. The pug ran out into the street with three curls in his tail and a look of apprehension. The shaggy dog ran around the crowd, closed on the pug and pinned him to the ground, but he still held his good form and the enemy's teeth kept slipping, although the slips must have been painful. Dogs and men then got mixed up. The old man was showing a good deal of activity, yet somehow he didn't appear to get his dog in hand. The young man started in actively to save his dog, rushing here and there. Failing to get his dog, he gave the old man a vicious whack with the roll on the back of the neck, which startled him, then he rushed in and got his dog. The pug was showing alarm, the shaggy was balked but not satisfied. The young man said things to the old man and it looked kinder unsettled for the old man. The latter with dignity walked into a grocery store. The young man waxed still hotter. He gave his dog in charge of a spectator and followed the old man into the store. The spectators followed and grown men were heard to say that it was a shame to treat an old man that way. It could be plainly read on their faces that if the young man put his hands on the old man again something would happen to the young man. It soon ended. The storm was over. Everybody started on their way and then a policeman could be seen coming about two blocks away. He was too late, which rarely happens in Chicago. No self-respecting policeman means to be more than one block away when a trouble is ended.

---

The following from a contemporary describes a land which would be a dog trainer's paradise: "Quail are so numerous as to be classed as pests in Arizona. The birds entirely destroyed nine acres of beans for William Fair near Yuma. They appear by thousands and eat the plants entirely off the ground. Southern California formerly suffered from the same cause, but the birds have been depleted by sportsmen to such an extent that they have ceased to bother farmers materially."

---

Mr. Chas. W. Barker, the well known field trial handler, made a call here yesterday. He was en route to Indiana, where he will locate and prepare some dogs for the coming trials, the United States, Central, Eastern and Philadelphia club trials. He says that he will have dogs which will make the competition specially warm for the boys this year.

B. WATERS.

## SOME STRANGE DOGS.

*Editor Forest and Stream:*

Having had some experience with dogs of three continents I trust some of the following desultory hints may perhaps prove interesting to one or the other of your readers.

You have doubtless heard something about the Irish wolfhound who figures on the national coat of arms together with harp and watch tower? I wonder whether the breed is extinct? As late as 1889 there was at Dublin Zoo a cross between the genuine Irish wolfhound and wolf, a fierce brute certainly. The father, an alleged thoroughbred wolfhound, had been the property of one of the professors of Trinity College, Dublin (Prof. Maheffy), who used him to guard sheep on his estates. If the breed could be revived I fancy they would beat hollow barzois (or psovois).

I myself kept a dog with wolfhound strain in him in Ireland; I had by the interposition of a friend got it sent as a present from an Irish gentleman near Londonderry, well known for his fine breed. The animal somewhat resembled a deerhound, but the jaws and teeth were stronger, muzzle more pointed, and the tail a rich full bloomed fantail. Color between cream and tawny.

There is another breed of greyhounds that would surprise many habitues of dog shows. During my college days in Paris there was a Roumanian student, Mr. Zambaco, who was a well known figure in the Quartier Latin. He never appeared in the streets without two or three smooth greyhounds; one, a smooth dog, fawn colored, with full plumed tail. He must have stood nearly 34in., to judge from comparisons with great Danes I knew at the time. If the Mr. Zambaco whom you mentioned in one of your last numbers in regard to some question about psovois is the gentleman, he might be kind enough to let you have the measure of that exceedingly powerful as well as handsome dog.

There is another elegant breed unknown to most lovers of dogs; it is the dog of the Patagonian Canoe Indians that infest Smyth Channel and Magellan Straits. The breed is strongly marked as a distinctive and fixed kind. They most nearly recall a blue or silver fox, color is a nice silver gray, with black on face, ears, and along the spine. Size: that of a bull-terrier, or even Pomeranian. One of the chief claims to attention is the snakelike elegance of their movements. I have never seen a dog, not even a greyhound, move so lithely and catlike. They are remarkably intelligent, and as lively as mercury. I have seen them at home as well as at the zoölogical gardens of Santiago de Chile.

It may interest some of your readers that to all accounts Asia possesses two hitherto almost unknown giant-breeds of dogs. There is first the Thibetan dog, or to specify "dogge." We all know the head of that dog from Youatt, Stonehenge and others that had a chance to study the individual at the London Zoo. It is a kind of gigantic spaniel or St. Bernard, and it seems worthy of notice that it comes to us from the north of the Himalayas, just as the holy breed came to us from the north of the Alps. By the way he seems to have been the dog sent to Alexander the Great by a King of Epirus, which dog we are told, alone tackled and killed a lion—for this dog came from India.

But now I wish to state on the best of authorities that the shepherd tribes of Kurdistan and lesser Armenia possess a dog considerably surpassing in size anything we can put up,

In the beginning of the 80s one of these Kurds brought his flocks to Jaffa, Palestine, for shipment. He had with him a dog of gigantic proportions that he sold for $4 (20 francs) to Dr. C. Hoffman, the son of the founder, and now the head of the prosperous colony of German dissenters in Palestine. Dr. Hoffman is a cool-headed leader of men, a fancier of big, ugly, wicked dogs, and has had long experience with great Danes and the now nearly extinct Leonbergers.

I do not exactly remember the size and height of that specimen, but the Doctor told me "I had never seen anything like it before. He was very shaggy, brindle, and I cannot better describe him than as a gigantic sheepdog with very pointed muzzle."

Others who saw the dog described him as "a Pomeranian as big as a bear." Now, we all know that the public is rather lavish of this latter epithet with regard to big shaggy dogs, but in order to surprise Dr. Hoffman he must have been a big dog indeed.

When the new acquisition was brought to the house of his new owner by the Kurd shepherd, the servant girl, an honest German, called out "that there was a gipsy with a bear in the yard."

This dog had remarkably powerful jaws. Standing near a camel and perhaps worrying it a bit, the latter got frightened and kicked, the dog with one snap cut clean through the foreleg of the animal above the knee. I could not at first bring myself to believe that fact, but it has been told me by three different men, all of them men of a careful, scientific education. One of them is Dr. F. Paulus, in Stuttgart, Germany, and the other Dr. Hoffmann himself. All eye witnesses insisted particularly on the circumstance that the camel was a full-grown, loaded animal, that was halting in the market place of Jerusalem, and that the bone was not crushed, but bit clean through.

The dog was sold for, I believe, only 200 francs, to the then German Consul at Jerusalem, Baron von Münchhausen, I believe.

As you will imagine, I at once took steps to secure a similar specimen, but in vain. It seems that the Kurds do not descend anymore so far south as Jerusalem with their flocks. The Palestine Bedouins that keep sheep have powerful dogs too, and very much like them, but I am told they average about 24 to 26in. only. For ten years, I am told, no such Kurd dog has been seen by my correspondents.

On the other hand, the Arabs of the Hauran hunt gazelles with a greyhound (slooghee), that, according to the description of the above named gentlemen, bears the closest resemblance to the poor "wolf," the half-breed Irish wolfhound I spoke of at the beginning of my letter.

Now to close. I have always studied carefully the cur dog and mongrel of the country I used to live in and could give a few interesting dates about them, but am already too prolix and long-winded; but I am sure many dog lovers would find this side of the fancy quite an interesting one.

P. B.

## FLAPS FROM THE BEAVER'S TAIL.

TORONTO, Can.—A line from Dr. Drummond apprises me of the fact that his Irish terrier bitch Annandale has whelped a litter of eight (six dogs) to his dog Commissariat. Both dogs were recently imported from Belfast by Dr. Drummond.

Mr. F. W. Green, Halifax, N. S., has bought from Mr. George Bell the black field spaniel bitch What Not, by Pekoe out of Rose Palmer. She was bred by J. A. Spracklin, whelped Dec. 1890, and has been in the money several times.

Mr. A. D. Stewart had rather an unpleasant experience with his terriers the other day. He undertook to separate two which were having a "little misunderstanding," and in his effort slipped and fell, when the whole kennel piled on to him. His left arm and both legs were badly bitten before he got away.

A meeting of the bench show committee of the Industrial Exhibition, Toronto, was held on Monday. The protest of Mr. Wurtele, Ottawa, against the win of the greyhound Echo, was referred to the Canadian Kennel Club for investigation and action. A resolution was passed urging the Association to empower the superintendent to spend up to a certain sum for necessary articles in connection with the show, so that the numerous petty annoyances which happened this year may not occur again. It was also recommended that the building be enlarged and removed to a more central position.

Mr. G. M. Gibbs, Galt, Ont., has bought the English foxhound bitch Vexation, by Genius out of Nancy, and who has won 1st and special, London, 1888; 2d, Toronto, 1890; 1st and special, Ottawa, and 1st, Toronto, 1891, as well as 1st, Toronto, this year. Also the American foxhound Rally, by Yank out of Vanity, 1st, Toronto, 1892. H. B. DONOVAN.

## AMERICAN PET DOG CLUB MEETING.

*Editor Forest and Stream:*

At a special meeting of the members of the above club, held on Thursday last, the 29th ultimo, there were entered on the minutes of the meeting—

Expressions of deep sorrow for the loss of our late president, Mrs. Charles Wheatleigh, whose sudden death occurred Sept 16.

Mrs. Wheatleigh was president of the club from its formation up to the hour of her death, a period of five consecutive years. She was devoted to the best interests of the club, and commanded the respect, the confidence, and the friendship of every member. During the legal troubles that the club was forced to go through, when an attempt was made to split the organization and take away the chartered name, Mrs. Wheatleigh's sound judgment, business tact and steadfastness of purpose proved of the utmost advantage, and insured success. Her love for dogs is in proof of her natural kindness of heart. Her expert knowledge will become a matter of history in dog lore, and as long as philanthropic men and women seek to prevent cruelty to animals, to encourage the good breeding, and promote the comfort and welfare of man's best friend (the dog), will Mrs. Wheatleigh be remembered and mentioned with gratitude.

An election was then had to fill the vacant presidency, and Mrs. S. C. Barnum was elected president by an unanimous vote.

And by reason of the first vice-president being elected president, Mr. Charles Wheatleigh was elected vice-president by an unanimous vote.

It is believed that this election of new officers will meet with the cordial approval of those members who were prevented by distance and other reasons from being present at the meeting, and it is hoped that our club will grow in membership and increase in influence.

MARION E. BANNISTER, Sec'y.

OCT. 6.

## Pedigree Wanted.

*Editor Forest and Stream:*

I have just received a very fine pointer bitch, Daisy Nell by Jack ex Wax, Jack being by Beppo III. ex Xmas Vic, Vic being owned by Pine Hill Kennels, of Alfred Center, N. J. I am anxious to get the breeder and age of Nell, also the pedigree of Wax. Perhaps some of your numerous readers can furnish the information. C. A. STONE.

TORONTO, Can.

## SHOULD JUDGES BE THEIR OWN CRITICS?

*Editor Forest and Stream:*

It is my opinion that a judge should not be required to criticise his own work.

It is rather an uncomfortable position, I take it, that you would place him in to require him to bolster up his mistakes after the inspirations of the ring have grown cold. A judge is invited to pass upon a certain lot of dogs and to select therefrom the dogs which come, in his opinion, the nearest to a recognized standard.

His actions in picking out the respective dogs for the prizes offered speak for themselves, and any criticisms he might offer would be but reiterations.

The position of judge to a conscientious man is a most arduous one. He stands in the ring eyeing a fine class of animals, the names and owners of which he is popularly believed to be in ignorance of, and as they pass before him one after another and close upon each other's heels, he has to quickly sort out the wheat from the chaff.

His comparisons are made and his choice is announced. It would be manifestly unjust to require the judge to go back to the benches afterward and to go over and compare the dogs again, and with the catalogue in hand give to the disappointed exhibitors his reasons for not selecting their dogs for the prizes.

Such printed reasons appearing would be like the waving of so many red flags to already infuriated bulls, and our sporting papers would simply be filled with the bitter recriminations of disappointed exhibitors. The judge gives his opinions when the award was made, then why should he be obliged to reiterate that opinion. The report and criticisms of a qualified reporter are much more valuable, and when such a critic indorses the opinion of the judge, we have then the opinion of two men, and if both capable and conscientious, there is something to go and come upon.

If the judge is incompetent the reporter critic speedily finds him out and no printed criticisms of his own would save him. In my opinion it would be most unfair to require a conscientious man to sit down and write out criticisms on his own work, and I doubt whether many competent men could be found to undertake the job at the present rates.

F. G. TAYLOR.

*Editor Forest and Stream:*

In answer to your request for my opinion as to whether judges should be their own critics, I most decidedly answer, "No." In the first place, judges who receive nothing for judging are put to a great deal of trouble in going over their classes after they have passed judgment. You, as a judge, know that a judge in the ring cannot make notes of all the good and bad points of dogs that come before him in the ring, and must necessarily take each dog by itself after the judging is all over, which is an endless job and very unsatisfactory. He does not have the dogs to compare with each other as he had in the ring, hence I say most decidedly that judges' criticisms are not nearly as satisfactory as those of the intelligent newspaper man, who is standing on the outside, sees the dogs compared, makes his notes and then examines them individually afterwards.

I never made but one report, and that I did as a personal favor to one of the officers of the American Kennel Club. I consider that report of no value to any one, but it was the best I could do with the time at my disposal.

J. H. WINSLOW.

PHILADELPHIA, Pa., Sept. 24.

*Editor Forest and Stream:*

Shall judges write their own reports? This would depend upon the object for which the reports were to be published, and upon the judges. Are they to be educational, or to show how little the judge knows of the breed he passes upon? Presuming that the former object is desired, I say no. Not until we have judges who are qualified to act as such. I don't know who judged black and tan terriers at Kingston, but I do know that his report would not be apt to enlighten the public as to the merits of the breed, although it might interest most people who know anything about it if he would tell how he got Rosette. Rochelle Topaz and English Lady all ahead of Louie, the best bitch in the class. Not only that, but how he got the three all wrong besides. Mr. Mortimer judged all these bitches at Toronto, and placed Louie first, Lady second and Topaz third. It was the general verdict that they were rightly placed.

We want no judges' reports as long as show committees will give us such judging as this. A. W. SMITH.

*Editor Forest and Stream:*

Exhibitions are in the nature of lessons by comparison. If this theory be correct, then exhibitors are entitled to know why their dogs were considered by the judges better or worse than others. Therefore, I think judges should give reasons for their decisions, otherwise their awards, often inscrutable, remain more inexplicable still.

JAMES B. BLOSSOM.

NEW YORK CITY, Sept. 24.

## WHIPPET RACING AT TRENTON FAIR.

THE New Jersey Kennel League has left the beaten track, or perhaps it would be more proper to say that its first success has been scored on a track that has hitherto been used by the trotter alone, for at the Interstate Fair at Trenton, N. J., last week, the league offered $150 for sheep dog trials, and the same amount for whippet racing. The latter commenced on Tuesday, Sept. 27, and judging from the enthusiastic reception the "racing dogs" got from the immense throng present, it was evident that it was a very welcome novelty, and as the heats were run between the trials of speed between the horses, they contributed largely to maintaining an unflagging interest in the programme.

It may be that some of your readers have never seen a whippet race, although very few, indeed, can say with Mr. Vredenburgh, the late A. K. C. secretary, that they have never seen one of these dogs.

The Englishman who starved his family to feed his dog was no better, nor any worse, than many of the racing and trotting fraternity in America. Perhaps his dog was a whippet, and he knew that if he won the heat the following Saturday his family could have roast beef for Sunday's dinner, although they had to go on short commons a few days before, when the one on whom they depended for the Sunday's feast had tidbits. There are many things that can be said in favor of this workingman's pastime, and few that can be said against it. If the inherited love of sport must be satisfied, then, in such a pastime, where the pool box is absent, and other debasing elements cannot enter, where fair play is maintained, and where the fastest wins, there must be a wholesome flavor.

These races may not be a remedy for Homestead or any other strikes, but it must be clear to all that when working men have hobbies, amusements, recreations and sport, they are not as apt to be looking out for such expensive fun as a strike.

The whippet is built like the greyhound, looks like the greyhound, runs like the greyhound, but he is not a greyhound. Ask a Yorkshireman and he will tell you that they grew in that locality when his great-great-grandfather could scarcely toddle. Ask someone else and he will undertake to manufacture them in three generations from a conglomeration of Italian greyhound and terrier, or English greyhound and "sooner." But to this—the only really legitimate attempt to bring the sport before the public in America, New Jersey sons first got the dog from England, and have frequently had races in a quiet way at Newark, Paterson and Kearney, so it was but right that the League should help forward the movement, and but proper that it should be done at the leading fair in the State.

Eighteen dogs were entered, and all came to line at 1 o'clock, after being weighed in in due form. The first heat was between Mr. C. Lee's Nigger Girl, Mr. Jno. Hart's Orphan Girl and Mr. F. Farrow's Lucy Glitters; and as they trotted up from the judges' box, over the 200yds. of the home stretch, which was the course, many were the exclamations of surprise. When each starter had been placed at his handicap mark, the owners took out handkerchiefs, whistles and tidbits, and retreated down the course fluttering and enticing the dogs to break away. In these attempts, and in enthusiasm quite a chorus was the result.

Mr. Edwin H. Morris, who acted as starter, said "Be ready," when each starter got in position to start his charge; then on the word "pick them up" each took his dog in hand and commenced to swing, and at the discharge of the pistol they were sent away down the track at such a rate that Jersey lightning would not be in it. If it was a sight to see and hear them in their struggle to be off, it was a greater sight to see the way they relished the spin, which was attested by the enthusiasm which greeted them from all sides.

Mr. Geo. Crook, who handicapped them, had done his work cleverly, and at the finish it was a matter of inches. It was exciting, for the speed was terrific, and when, finally, Orphan Girl crossed the line, and was declared the winner by the dropping of the flag corresponding with the ribbon she wore, a shout went up which made the horsemen look jealous.

Mr. Thompson's Peggy, Mr. Jas. White's Rose and Mr. Buchanan's Lady McGrath ran in the second heat with almost similar results, Mr. Edward H. Radel, who acted as judge, or referee, declaring in favor of Rose, who did the distance in 12 seconds, to the surprise of those who held stop watches.

Mr. C. Lee's Robin and Mr. Jas. Comb's Young Dick were the contestants in the next heat, which was a very close thing, with the finish in Young Dick's favor.

In the fourth heat Mr. E. Cannell's Nellie met Mr. Wm. Barwell's Fire Fly, and Nellie won with very little to spare, doing the 200yds. in the second best time made.

Mr. Knowles's Turpin met Mr. E. Hurst's Beauty in the next heat, when again a smart contest was the result in favor of Turpin.

Much interest was taken in the succeeding heat between Mr. C. Lee's Billy Paterson, a 33lbs. dog from Paterson, and supposed to be the fastest in America, and Mr. James Comb's Nelly Bly, from Kearney, with but 18lbs. to her score. Billy is the pride of his owner and he thought all Jersey depended on his making a creditable showing for Paterson, and as he retreated down the course he did not forget to ask the starter to see that Nellie's starter had the mark fairly. Away they went, the little one and the big one, as the country folk had it, who, in their good nature, could not help showing their sympaty for the smaller, but it was a very near thing for her, for just as she got across the line along came Bill at such a gait that he toppled over his owner when he went to catch him, creating much amusement.

The seventh heat, between Mr. James Douglass's Ferenzi and Mr. James White's La Fletch was one with less interest, and the former scored a rather easy chance of a place in the next day's programme.

The eighth and last heat of the day was between Mr. John Hart's Daisy and Mr. R. Thompson's Bess, another Paterson-Newark contest, in which Newark scored solely through the starter being rather slow and hesitating in sending his charge forward.

A drawing was made after this final for the following day's race, when Mr. Douglass's Ferenzi came out against Mr. Knowle's Turpin, Mr. Jas. Comb's Young Dick against Mr. J. Hart's Orphan Girl, Mr. E. Cannell's Nellie against Mr. J. White's Rose, Mr. J. Comb's Nellie Bly against Mr. Thompson's Bess.

The whippet men created quite a sensation on the course by offering to match one of their dogs against any horse on the course, or in the State, for a large stake, but the distance and other things prevented a match.

## NEW ENGLAND FIELD TRIAL CLUB MEETING.

THE regular quarterly meeting of the New England Field Trial Club was held at Hotel Thorndike, Boston, Oct. 3, at 7 P.M., President Power in the chair. Among those present were Messrs. Power, Hayward, Wells, Lovell, Goodwin, Sharp, Billings, Parker, Gordon and Hodges.

In the absence of Secretary Sperry, Mr. Geo. W. Lovell acted as secretary *pro tem.* Dr. J. W. Hayward gave a very satisfactory report on the condition of the preserve. Mr. D. A. Goodwin made a detailed report of the game supply. Mr. A. R. Sharp outlined the work being done by the game warden.

It was voted to admit Mr. N. H. Vaughan, of Middleboro, Mass., to membership.

Voted that the sum of $150 be placed at the disposal of committee on grounds and game for current expenses.

Voted that ten crates be constructed for the local use of dogs in transit between headquarters and the grounds.

Voted to purchase one ton of grain for feeding purposes.

Meeting adjourned.

The party immediately filed into the dining hall and enjoyed one of the Thorndike's famous spreads.

Communications were received concerning the unavoidable absence of Messrs. E. K. Sperry, E. O. Damon, A. M. Tucker and Fred H. Clark, the latter being detained at home by severe illness, which brought forth many expressions of sympathy from all present.

Remarks were made during the evening by Pres. Power, Dr. Hayward, A. H. Sharp and D. A. Goodwin, Jr. The members laid final plans for the gathering at Assonet, on Nov. 8, and left the hotel for their homes at a late hour.

[The remainder of our report in type last week was by an error attached to the sheepdog trial report in issue of Oct. 6.]

From the *American Stock-Keeper* we learn that the New England Field Trial Club is in a healthy condition. By Nov. 1 it will have $1,000 in the treasury. Game is said to be plentiful, and 105 dozen additional quail have been guaranteed the club, and the first shipment will arrive Oct. 15. Grain has been planted, and will also be scattered over the ground for the new comers. The arrangements in progress for the care of visitors and dogs show an intelligent advance over other clubs, especially from the fact that transportation facilities will be provided for dogs to and from the grounds. If you want any further information and wish to secure quarters, write to W. A. Power, president of the club, 266 Washington street, Boston, Mass.

## Our "Kennel Special."

FALLS VILLAGE, Conn., Oct. 7.—*Editor Forest and Stream:* Inclosed find postal note for seventy-five cents, the balance due you on my advertisement. The puppies are all sold.—W. H. CHOPIN.

## There is No Mistake About It.

HARRISONBURGH, Va., Oct. 4.—*Editor Forest and Stream:* I received the copy of your paper containing our advertisement, and also a number of orders from persons desiring dogs. Will send you other advertising this week. With many thanks, C. G. HERRING, Secretary Rockingham Kennel Club, Harrisonburgh, Va.

# DOG CHAT.

### The International Field Trials.

Owing to the fact that the judges selected for the International Field Trials, to be held near Chatham, Nov. 8, were not able to give decisive answers as to whether they would act at the time of the closing of the entries for the Derby, Oct. 1, the date of closing has been extended to Oct. 15, at which time the entries for the All-Age and Amateur stakes will also close. The judges who have consented to act are: Wm. Brailsford, of Whitchurch, England: F. W. Eddy, of Detroit, Mich., and Montague Smith, of Forest, Ont. Already entries enough have been received to insure the success of the Derby, but more are expected. Everything points to a successful meeting, Birds are plentiful, although, owing to the early nests being destroyed by the heavy rains in June, they are still very small. By the time of the trials, however; the fields will be well covered with rag weed, so that the work will be more in the open than last year, when the fields were almost bare, the birds going to the bush on the first flight A new feature of the trials will be the Amateur Stake, which will be run on Nov. 7, the day before the regular trials begin. It will be for dogs broken and run by amateurs. All those sportsmen who have good ordinary shooting dogs should show that they appreciate the action of the club in providing a stake especially for them by entering their dogs. The entrance fee is $3, all of which will be given to the competitors in either cups or cash; 50 per cent. to first, 35 per cent to second, and 15 per cent. to third. The judges for this stake will be chosen by the competitors on the ground.

### Dog Show at White Plains, N. Y.

The dog show held in connection with the Westchester county fair at White Plains, N. Y., Sept. 26 to Oct. 1, was the best ever held there, and a great improvement on previous years. There were 150 entries this year against 83 last year. Mr. George Laick, of Tarrytown, N. Y., judged all breeds, and gave general satisfaction. Mr. D. C. Paulding superintended the show. Among the exhibitors were Mr. Bateman, of White Plains: S. S. Slater, and the Mount Morris Kennel, of Yonkers, N. Y., all showing St. Bernards; William H. Hyland, of North Tarrytown, N. Y., had a fine string of pointers and one Gordon setter, and a brace of beagles. Mount Morris Kennel showed three Yorkshire terriers. Mr. Henry C. Graef, of Tarrytown. N. Y., had a team of fox-terriers. George Langree, of Yonkers, N. Y., showed some of his Irish setters, and Mead & Bros., of Danbury, Conn.; brought bull-terriers, fox-terriers and cocker spaniels. Mr. Andrew Graves, of Tarrytown, N. Y., showed two good bulldogs that were very much admired. A number of pugs were also shown as well as black and tans, fox-terriers, foxhounds, coach dogs, great Danes, collies and beagles.

### Irish Setters at the P. K. C. Trials.

Mr. Chas. T. Thompson, of Philadelphia, has entered Merlin and Rockwood Hen, and Mr. E. B. Bishop, of Coffeyville, Kan., has entered his two noted field trial dogs Coleraine and Finglas in the All-Aged Stake of the Philadelphia Kennel Club's field trials. These entries have been received since the publication in our last week's issue of the names of the gentlemen who will judge those trials. We call attention again to these names with the advice to the Irish setter men of this country to enter their dogs in open trial, where they will compete with the best of the English setters and pointers. It is yet time, as the entries do not close until Oct. 15, for sportsmen to get in with their dogs. We are glad to see that such active and prominent breeders as Messrs. Thompson and Bishop are not afraid to enter their dogs where they are sure to meet hot competition. The separate trials for Irish setters are all right as far as they go, but they do not go quite far enough. To establish the undoubted merit of a bird dog it is necessary to enter him in an open trial.

### Beagle Field Trials.

Mr. Kreuder does not wish any of the beagle men to run astray in the fields of Rockland county, so he writes the following: As the time set for the beagle field trials at Nanuet is fast approaching, I desire to give those who propose attending some assistance in guiding them to the place. Nanuet is thirty miles from New York city, and in Rockland county. It is on the direct line of Northern Railroad of New Jersey, and New Jersey & New York Railroad, both starting from Erie depot, Jersey City. The West Nyack station on West Shore Railroad is two miles distant and carriages meet all trains. Trains on these roads can be had almost every hour during the day. Dogs can be shipped prepaid per United States or Wells Fargo Co. Express and returned free. Dogs coming by express and otherwise will be properly cared for in my kennel under instructions from National Beagle Club. Ample accommodations for man are provided for, but in order to place everyone comfortably and with the least annoyance after arriving, I would ask that each one on their own account advise me at the earliest date when they are due and how long they propose remaining. Hotel rates will be $1.50 and $2 per day.

### Important Importations.

The Iolanthe Kennels, of Saratoga Springs, in which the Hiltons are interested, are evidently going to make a bold bid for bench honors. According to *Stock Keeper*, Mr. J. W. E. Clarke has been making extensive purchases in England: "He has bought bulldogs from Mr. Raper; the prize-winner Rustic Sovereign; two bitches, Rock Rose, by Rabagas, and Victress, by Julius Cæsar, and a bitch puppy by Lord Yarmouth; from the same kennel he bought also a smooth fox-terrier bitch, Miss Domino, by Raby Domino. Mr. W. Harrison has supplied him with Ripon Stormer, Maystorm, Ripon Regina, and Chief Justice. Mr. Arthur Maxwell's contribution to the Iolanthe Kennels consists of the wire-hairs Dandy Jack, Tees Mixture, and Jess Frost, all three of prize repute, and further, the Welsh terriers Duffield Wonder and Dewr, who have both, by their doings, earned the K.C.S.B. number. The Irish terrier Jackanapes (28,108) also crosses the herring-pond, accompanied by Chancery Lass, who has moral reasons for not deserting the little dog." Lady Salisbury's purchase we spoke of last week. These will all come over on the Bovic, due this week.

### English Setter Club Medals.

The English Setter Club will donate one of their silver medals to the dog and bitch showing the best bench show form in the International, New England, United States and Central trials this fall. This shows a healthy sign, and any one who has seen the keen competition there is among the field trial men for the Lorillard medals during past trials knows that the donation of these medals is far-reaching in its benefit, for should a good field performer also win one of these medals, for instance Daisy Hunter, it shows them that bench show and field trial form are not incompatible.

### Danbury Show.

If any proof was needed to prove that a few shows not held under A. K. C. rules would be popular among a number of exhibitors, one had only to take a look at the Danbury fixture last week. The subject was discussed among the practicals in the intervals between heats, and the opinion prevailed that a good many are getting tired of having every win count. It is a pity that this show does not break loose from its old-fashioned ways; have a catalogue, charge an entry fee and run the show as it should be run.

### Omaha Show.

Ben Lewis is thinking of taking in the Omaha show, Oct. 24, if he can get a good team together. There is big money given out there, and Eastern exhibitors would more than likely find it an excellent opportunity to dispose of stock as well as provide a market for the future.

### Wyoming Kennels.

Mr. Sears has forwarded us a catalogue of his dogs that are for sale, and he seems in earnest this time in his resolution to clear them out. We notice that a son of Sir Bedivere and Van Dyke, whelped July 21, 1892, was sold for $250, but there are a number of other good bred ones at more reasonable prices. Sir Bedivere, we notice, is down at $4,000, Hepsey at $1,000 and Wyoming Hesper at $750.

### Irish Setter Club Trials.

The Irish Setter Club has decided on offering the following prizes for its All-Aged Stake: $200 to the winner of first, $100 to second and $50 to third. The entries to this stake, which closes Nov. 1, are coming in nicely, so Dr. Davis tells us, 13 having already been received.

Mr. Jacob Hope writes us that he has purchased the whole franchise—whatever that is—of the "Associated Fanciers" of Philadelphia, Pa. If Mr. Hope is well advised he will allow the "Associated Fanciers" to remain where public opinion has relegated it, for his own patronymic lends an air of expectancy that was entirely wanting in the "Associated." Mr Hope has just sent two pointers, a dog and a bitch, to Central America. Several people out West to whom he has sent dogs have expressed themselves as well satisfied with Mr. Hope's business methods.

The noted beagle bitch Twintwo whelped a nice litter of five to Mr. Jamieson's Forest Hunter. Mr. Jamieson is now the owner of Twintwo.

In giving the list of brood bitches in the Meadow City Kennels we should have named Becky Noble and Jennie F., the former second in the N. E. F. T. Derby last year. These are litter mates to Count Anteo, that ran into the money in All-Aged Stake at Southern trials last February. They are by Count Noble out of Gladstone's Girl. The dam of Mary Murnan is Flounce, not Florence, this bitch is sister to the late champion Sue.

The Nashville people are having their show somewhat earlier this year under the new management. It is an encouraging sign of the increased interest in kennel matters to see the shows spreading so far South, and the new kennel which has been started at Nashville by Mr. H. L. Goodman and others is bound to help matters along. The field trial element will be busy at the trials on the date chosen, Dec. 6 to 9, but doubtless there are enough non-sporting dogs around to swell the entry list.

Mr. H. L. Kreuder, who has entered heart and soul into beagle matters, has just purchased the well-known and at times sensational dog champion Frank Forest from Mr. Gates. This time the price is not for publication, but nevertheless Mr. Kreuder has secured a good dog.

Ed Booth took the crack smooth St. Bernard, Empress of Contoocook, to visit Sir Bedivere last Monday week, but the fates were not propitious and she was mated with Jim Blaine. The Duchess Kennels had five bitches in season at once, and Mr. Booth has been doing some hustling to get them all mated as he would like. He tells us that barring coat, which needs a little attention, Sir Bedivere is as lively as ever and in good health. This dog's health, if one believed the reports, is as changeable as a weather cock. The dog is all right, as we have taken particular pains to ascertain, and in the stud is a success, he sired a litter of 17 the other day and another of 13. We believe in giving every man "a show," and especially one who has risked large money, as Mr. Sears has done, in getting together a good kennel of St. Bernards, and it is contemptible business to circulate injurious reports to the detriment of another's stock; underhand methods in business are one thing and honest business rivalry is quite another.

On Monday, Oct. 3, Mr. Wilson Fiske's English setters Domingo and Dominion strayed from Plainfield. No news until Monday, 10th, when Domingo returned, a shadow and footsore, but hungry, so they were not picked up as was supposed. Where is the bitch Dominion? She is a large, good-looking blue belton, very light ticked, both sides of head black. She may have been found by some one; if so, communicate with FOREST AND STREAM or Wilson Fiske, 102 Chambers street, and any expenses, etc., will be cheerfully paid.

The proposed meeting of the English Setter Club was not held Oct. 4, as there was no quorum. It will be held same time and place Nov. 1.

In speaking of the Flour City Kennels' sale of mastiffs and the ill-luck that has attended the kennel in raising pups, the impression may have been given that the bitches are not fruitful. On the contrary, there is no difficulty about the whelping, but it is the raising the pups afterward. It is so in some kennels, the Hospice, for instance; yet when the bitches left that kennel ten to one they had good litters and raised them. Caution's Own Daughter has, we are told, a grand young pup doing finely. It must not be forgotten that this sale is peculiar in that the highest bid by letter takes the dog named, on the date stated in the advertisement.

The Trenton Fair people, recognizing the popularity of dog shows, have, we understand, decided to erect a building and hold a show next fall during the fair.

The regular monthly meeting of the American Pet Dog Club will be held at 329 Lexington avenue, New York, Wednesday, Oct. 12, at 3 P. M.

The deliciously truthful picture entitled "Breakfast," in this issue, will appeal to all dogmen and the "laity" alike, for it is one of the brightest gems of the Amateur Photographic Competition.

## KENNEL NOTES.

**Kennel Notes are inserted without charge; and blanks (furnished free) will be sent to any address.**

### NAMES CLAIMED.

☞ **Prepared Blanks sent free on application.**

*Povcrino, Lansdowne Quiz, Lansdowne Needles, Lansdowne Pins and Miss Miggs.* By Lansdowne Kennels, Lansdowne, Pa., for fox-terriers, three dogs and two bitches, whelped June 30, 1892, by Triton out of Dimity.

*Lansdowne Tessa.* By Lansdowne Kennels, for fox-terrier bitch, whelped Feb. 1, 1892, by Pitcher (Brokenhurst Tim—Daffodilly, out of Little Trotter (General Grant—Oxford Nora).

### BRED.

☞ **Prepared Blanks sent free on application.**

*Yum Yum—Henmore Shamrock.* B. P. Rotherock's (Williamsport, Pa.) Irish setter bitch Yum Yum (Rob—Daisy) to F. L. Cheney's Henmore Shamrock (Muskerry—Avoca), Aug. 19.

*Bennett's Flirt—Duke of Dexter.* W. B. Bennett's (Acushnet, Mass.) pointer bitch Bennett's Flirt (Grandee—Vickery's Daisy) to C. D. Roberts's Duke of Dexter (Duke of Vernon—Boski), July 26.

*Lady Ormonde—King Regent.* J. F. Hall's (Philadelphia, Pa. St. Bernard bitch Lady Ormonde (Monte Rosa—Theon( to Swiss Mountain Kennels' King Regent (Prince Regent—Duchess of Kent), June 18.

*Sunray—King Regent.* Swiss Mountain Kennels' (Germantown, Pa.) St. Bernard bitch Sunray (Alton—Duchess of Roseberry) to their King Regent (Prince Regent—Duchess of Kent), July 2.

*College Queen—King Regent.* A. C. Bradbury's (Philadelphia, Pa.) St. Bernard bitch College Queen (champion Pouf—Lady Curzen) to Swiss Mountain Kenneis' King Regent (Prince Regent—Duchess of Kent—July 23.

*Lilly—King Regent.* T. Carroll's (Germantown, Pa.) St. Bernard bitch Lilly (Marquis of Stafford—Effon) to Swiss Mountain Kennels' King Regent (Prince Regent—Duchess of Kent), Aug. 6.

*Lakme—Scottish Leader.* Mr. Cobden's (Philadelphia, Pa.) St. Bernard bitch Lakme (champion Merchant Prince—Bernie V.) to Swiss Mountain Kennels' Scottish Leader (Scottish Guide—Lady Sunrise), June 16.

*Lady Lowden—Scottish Leader.* J. F. Hall's (Philadelphia, Pa.) St. Bernard bitch Lady Lowden (champion Plinlimmon—Lady Linton) to Swiss Mountain Kennels' Scottish Leader (Scottish Guide—Lady Sunrise), June 22.

*Duchess of Arlington—Scottish Leader.* Swiss Mountain Kenneis' (Germantown, Pa.) St. Bernard bitch Duchess of Arlington (Lord Bute—Margharita) to their Scottish Leader (Scottish Guide—Lady Sunrise), July 7.

*Daisy—Henmore Shamrock.* F. L. Cheney's Irish setter bitch Daisy (Chief—Leigh Doane) to his Henmore Shamrock (Muskerry—Avoca), Sept. 3.

*Rose Gladstone—Bow Bondhu.* V. L. Bossa's (New Canaan, Conn.) English setter bitch Rose Gladstone (Dan Gladstone—Belton's Princess) to his Bow Bondhu (Gus Bondhu—Bo-Peep), Aug. 23.

*Lou—Bow Bondhu.* E. H. Carrier's (Westchester, Conn ) English setter bitch Lou (Ely's Breeze—Bessie Dale) to V. L. Bossa's Bow Bondhu (Gus Bondhu—Bo-Peep), Sept. 9.

*Lady Austin—Scottish Leader.* J. F. Hall's (Philadelphia, Pa.) St. Bernard bitch Lady Austin (Austin Friar—Treasure) to Swiss Mountain Kennels' Scottish Leader (Scottish Guide—Lady Sunrise), Aug. 1.

*Nellie Bly—Snowball.* W. B. Douglass's (Bristol, Pa.) cocker spaniel bitch Nellie Bly (Nubian—Queen) to Swiss Mountain Kenneis' Snowball (Dandy W.—Chip K), Aug. 14.

*Margharita—King Regent.* F. E. Lamb's (Arlington, Md.) St. Bernard bitch Margharita (champion Plinlimmon—Minnie) to Swiss Mountain Kennels' King Regent (Prince Regent—Duchess of Kent), Aug. 20.

*Thelma—King Regent.* E. Dudley's (Camden, N. J.) St. Bernard bitch Thelma to Swiss Mountain Kennels' King Regent (Prince Regent—Duchess of Kent), Aug. 27.

*Beda II.—Scottish Leader.* F. Linck's (Newark, N. J.) St. Bernard bitch Beda II. (——Beda) to Swiss Mountain Kennels' Scottish Leader (Scottish Guide—Lady Sunrise), Aug 24.

*Sunol—King Regent.* F. E. Lamb's (Arlington, Md.) St. Bernard bitch Sunol (Novar—Lady Roseberry) to Swiss Mountain Kennels' King Regent (Prince Regent—Duchess of Kent), Sept. 6.

### WHELPS.

☞ **Prepared Blanks sent free on application.**

*Kenora.* W. H. Dixon's (Jamestown, N. Y.) St. Bernard bitch Kenora (Fritz—Lioness), Aug. 27, eleven (seven dogs), by A. D. Sharpe's Hero (Mingo—Psyche).

*Empress Josephine.* R. D. Hill's (Trenton, N. J.) St. Bernard bitch Empress Josephine, Aug. 12, sixteen (twelve dogs); half the litter since dead.

——. C. B. Pinco's (Bar Harbor, Me.) pointer bitch —— (Mikado—Bang's Mollie), Aug. 8, nine (six dogs), by C. D. Roberts's Duke of Dexter (Duke of Vernon—Boski).

*Miss Waggles.* Swiss Mountain Kennels' (Germantown, Pa.) cocker spaniel bitch Miss Waggles (champion Jersey—Chip K), July 15, four (two dogs), by their Snowball (Dandy W.—Chip K.).

*Lady Gay.* Swiss Mountain Kennels' (Germantown, Pa.) cocker spaniel bitch Lady Gay (Bringay—Mollie), July 11, four (two dogs), by John Evan's Cop.

*Donna Silva.* H. Ireland's (Clementon, N. J.) St. Bernard bitch Donna Silva (champion Duke of Wellington—Calypso), July 7, five, by Swiss Mountain Kennels' King Regent (Prince Regent—Duchess of Kent).

*Loraine.* Swiss Mountain Kennels' (Germantown, Pa.) St. Bernard bitch Loraine (Nero—Favorite), July 14, five (one dog), by Swiss Mountain Kennels' King Regent (Prince Regent—Duchess of Kent).

*Dart.* Swiss Mountain Kennels' (Germantown, Pa.) St. Bernard bitch Dart (champion Duke of Wellington—Tip Top), July 8, eleven (five dogs), by their Scottish Leader (Scottish Guide—Lady Sunrise).

*Geraldine.* Swiss Mountain Kennels' (Germantown, Pa.) St. Bernard bitch Geraldine (Matterhorn—Veda II.), July 24, three (one dog), by their Scottish Leader (Scottish Guide—Lady Sunrise).

*Lady Ormonde.* J. F. Hall's (Philadelphia, Pa.) St. Bernard bitch Lady Ormonde (Monte Rosa—Theon), Aug. 17, eleven (seven dogs), by Swiss Mountain Kennels' King Regent (Prince Regent—Duchess of Kent).

*Sunray.* Swiss Mountain Kennels' (Germantown, Pa.) St. Bernard bitch Sunray (Alton—Duchess of Roseberry), Aug. 30, five (three dogs), by their King Regent (Prince Regent—Duchess of Kent).

*Duchess of Arlington.* Swiss Mountain Kennels' (Germantown, Pa.) St. Bernard bitch Duchess of Arlington (Lord Bute—Margharita), Sept. 8, six (three dogs), by their Scottish Leader (Scottish Guide—Lady Sunrise).

*Lady Velna.* Lansdowne Kennels' (Lansdowne, Pa.) bull-terrier bitch Lady Velna (Regent—Edgewood Belle), July 16, five (one dog), by F. W. Moulton's Roscoe (Bendigo—Starlight).

*Dimity.* Lansdowne Kennels' (Lansdowne, Pa.) fox-terrier bitch Dimity (Raffle—Warren Vivid), June 30, five (three dogs), by their Triton (Raffle—Warren Dainty).

*Golden Rod.* C. Clippinger's (Lansing, Mich.) pointer bitch Golden Rod (champion Beaufort—Zuba), Aug. 18, seven (five dogs), by J. H. Winslow's Inspiration (champion Bang Bang—Telie Doe).

*Belle of the Shawangunks.* S. Greenhalgh's (Middletown, N. Y.) English setter bitch Belle of the Shawangunks (champion Monk of Furness—Lady Snowflake), Aug. 18, four (three dogs), by Dr. J. E. Hair's Albert's Beau (champion Count Howard—champion Donna Juanita).

### SALES.

☞ **Prepared Blanks sent free on application.**

*Comet II.* White bull-terrier dog, by Comet out of Nora, by Toon & Symonds, Salem, Mass., to H. M. Howes, Somerville, Mass.

*Duke of Loraine.* Orange, perfect markings, rough St. Bernard dog, whelped Sept. 9, 1890, by Marquis of Stafford out of Loraine, by Swiss Mountain Kennels, Germantown, Pa., to F. E. Hege, Salem, N. C.

*Flash.* Liver and white pointer dog, by Duke of Hessen out of Fatinitza, by F. L. Cheney, Pittsfield, Mass., to Geo. Bostwick, Lee, Mass.

*Flirtation.* Liver and white pointer bitch, by Fleet out of Judy, by F. L. Cheney, Pittsfield, Mass., to R. W. Pope, Gardiner, Me.

*Dick.* Red Irish setter dog, whelped Jan. 2, 1891, by Henmore Shamrock out of Daisy, by F. L. Cheney, Pittsfield, Mass., to A. M. Cooley, Easton, Pa.

*Henmore Shamrock—Onota Pey whelp.* Red Irish setter dog, by F. L. Cheney, Pittsfield, Mass., to H. W. Cooley, Easton, Pa.

*Onota Don—Daisy whelp.* Red Irish setter dog, by F. L. Cheney, Pittsfield, Mass., to J. Van Buren, South Norwalk, Conn.

*Snowball—Brownie S. whelp.* Black cocker spaniel dog, whelped May 30 1892, by Swiss Mountain Kennels, Germantown, Pa., to A. Busier, same place.

*Snowball—Miss Waggles whelp.* Black cocker spaniel dog, whelped July 5, 1892, by Swiss Mountain Kennels, Germantown, Pa., to Jas. Taylor, New York city.

*Roscoe—Loumont Kit whelp.* White bull-terrier dog, whelped April 29, 1892, by M. M. Howes, Somerville, Mass., to J. N. Taylor, Boston, Mass.

*King Regent—Princess Hepsey whelps.* Orange, perfect markings, rough St. Bernards, whelped June 9, 1892, by Swiss Mountain Kennels, Germantown, Pa., a dog each to Thos. Carroll, Germantown, Pa., and Jos. Connah, Westfield, N. J.; a bitch each to R. Josenhaus, Chicago, Ill., and Chas. Van Brunt, Fort Hamilton, L. I.

*King Regent—Harmony whelps.* Rough St. Bernards, whelped May 6, 1891, by Swiss Mountain Kennels, Germantown, Pa., three dogs to J. J. Persch, same place; a bitch to Miss M. R. Simkins, Vineland, N. J.; a dog and bitch to L. Loomis, New York city; a dog to M. W. Mahaffy, Williamsport, Pa.

*King Regent—Nanzibel whelp.* Rough St. Bernard dog, whelped April 11, 1892, by Swiss Mountain Kennels, Germantown, Pa., to J. Fischer, Philadelphia, Pa.

*King Regent—Dart whelp.* Orange and white rough St. Bernard dog, whelped Dec. 9, 1891, by Swiss Mountain Kennels, Germantown, Pa., to W. E. McGill, Philadelphia, Pa.

*Scottish Leader—Dart whelps.* Orange tawny rough St. Bernards whelped July 8 1892, by Swiss Mountain Kennels, Germantown, Pa., a dog to A. M. Young, Bay Shore, L. I.; a dog each to H. F. McGeoy and J. F. Hall, Philadelphia, Pa., and a bitch to E. J. Estlock, Sioux City, Ia.

*Empire State—Mystic whelps.* Rough St. Bernards, whelped July 3, 1892, by Swiss Mountain Kennels, Germantown, Pa., an orange, white markings, dog each to F. E. Hege, Salem, N. C.; E. J. Estlock, Sioux City, Ia., and Mrs. S. P. Reif, Norristown, Pa.; an orange, perfectly marked, bitch to Tom Stewart, Fort Worth, Texas.

## ANSWERS TO CORRESPONDENTS.

*There is no charge for answering questions under this head. All questions relating to ailments of dogs will be answered by Dr. T. G. Sherwood, a member of the Royal College of Veterinary Surgeons. Communications referring to other matters connected with Kennel Management and dogs will receive careful attention.*

W. C. W., Elizabethport, N. J.—The breeding of your Irish setter pup is of the best, if the pedigree you send is correct.

J. D. K., Emporium, Pa.—The dog you mention is not registered in the English Stud Book. The E. K. C. secretary's address is W. W. Aspinall, Cleveland Row, London S.W., England.

J. M. S., Fort Niobrara, Neb.—We do not know Mr. Lanier's present address. Perhaps some of our readers may be able to tell you. This Mr. Lanier is supposed to be a breeder of Irish setters, at one time living near Madison, Ind.

F. S., Allentown, Pa.—Will you please inform me if there are any rules to govern a fox chase when you lead the fox? Ans.—We suppose you mean a drag hunt. We know of no special rules, but suppose the run would be carried out as in an ordinary run after the wild fox, with this exception, that the trail is laid between known points. The Brunswick Fur Club publish the only fox-hunting rules we know of. Secretary, J. H. Baird, Auburndale, Mass.

J. N., Smithtown.—You had better take the dog to a veterinary surgeon. If you do not do so try the following:

| | |
|---|---|
| Quinine sulph | 3 ss. |
| Acid hydr carbon dil. in | xxi. |
| Tr. ferri. perchlor | 3 iii. |
| Aq | 3 vi. |

Mist. Tablespoonful three times a day. Keep him indoors.

# Yachting.

It is all very well to talk of roaring gales and flying spray, of clawing off a lee shore and heaving to in a hurricane; but the tarriest old sea dog in the fleet knows, though he probably is not honest enough to admit it, that the keenest pleasure that ever falls to a yachtsman's lot is to enjoy a dry and comfortable seat ashore where he can watch a comrade miss stays and shoot by a mooring without catching it. It is with somewhat of this feeling that the FOREST AND STREAM and many yachtsmen who believe in American fair play can now look on at the maneuvers of the Boston *Herald*. After running by the lee for a long time, the *Herald* has at last awakened to the fact, long evident to every one else, that it has been and still is on the wrong tack, and that a jibe can no longer be avoided. The realization has been so long deferred that the danger of being taken aback is imminent, and only rapid and skillful work will prevent the boom from coming over on the backstays and runners, with a very probable loss of spars.

When the new deed of gift was first published, the *Herald* started in with an unqualified indorsement of it and all connected with it, Com. Gerry, the special committee and Gen. Paine. The various clauses and provisions, including the dimension clause, were declared to be not only necessary, but absolutely fair and liberal. The *Herald* was not only one of the many American papers which attempted to refute the objections made by the FOREST AND STREAM, but it is one of the very few which have continued to do so. The New York papers, the *Tribune*, the *World*, the *Times*, the *Post* and others have all condemned the new deed, but the Boston *Herald* has still defended it.

For a year past it has been steadily changing its ground on the question of the dimension clause (quietly shifting the spinaker boom to the other side), but up to the last few weeks it has ridiculed the idea of any change of the deed, and has repeatedly asserted that all opposition to it was on the part of a few mischief makers and Anglomaniacs.

Within the past week, however, the *Herald* has acquired a vast amount of valuable information. It has learned that "there is no disguising the fact that there is a strong feeling in the (New York) club that everything should be done toward bringing about the match, and all seem to think that Lord Dunraven should be conceded a great deal." Also, that "there are those who always believed that it was not just the proper thing to ask the dimensions of the challenging yacht." It quotes four well-known yachtsmen, Messrs. Kortright, Canfield, Carroll and Nicholson Kane as in favor of such concessions as will restore international racing. It has discovered that Lord Dunraven is a gentleman and a sportsman, it warmly approves of Mr. Kersey, who is acting for Lord Dunraven, and it has even gone so far as to cease to abuse Mr. Watson. The "90ft. class," once lauded as the only class which should be permitted to race for the America's Cup, is now forgotten, and every emphasis is laid on Lord Dunraven's supposed challenge with a 70-footer.

Our convictions on the subject of the new deed of gift, both as to the manner of its adoption and the matter of its several provisions, are the same now after five years of assault and argument from all quarters that they were at first; and it is most gratifying to us to see one after another of our opponents admitting willingly or otherwise, the justice of our contention, that the new deed is both illegal and unfair.

THE New York Yacht Racing Association has found the task of enforcing the observation of the racing rules by all of its large fleet a rather difficult one, and in spite of the care and vigilance exercised by the very able regatta committee, the last race, like the preceding ones, has been followed by the necessity of disqualifying one or more yachts. In the present case the circumstances are such that the committee have no course open to them but to disqualify the flagship of the Association, the yacht having crossed the starting line with no number up, although the racing programme stated explicitly that no yacht without a number would be timed. The owner, we understand, considers that he has good reasons to excuse the absence of a number, but as special facilities for distributing the numbers were employed, and as other yachts without numbers refrained from starting in view of the special notice of the committee, such reasons can hardly be considered. The absolute necessity of carrying racing numbers where a fleet of over 100 yachts is to be timed is beyond need of proof, and if such numbers are to be carried in the future the rule must be rigidly enforced, without exceptions. In the hurry and confusion of race day it is often difficult or inconvenient to obtain a yacht's number, but in view of the necessity for carrying one each owner must assume the responsibility of obtaining and properly displaying it.

The new orders for the Herreshoffs include a 90ft. steam yacht which will cruise to Chicago next year, a 30ft. centerboard boat partly completed, for New York owners, and a 20ft. craft.

## New York Yacht Racing Association.

A MEETING of the New York Yacht Racing Association was held at O'Neill's on Oct. 7. The following clubs were represented by delegates: Bayswater, Brooklyn, Canarsie, Columbia, Indian Harbor, Jersey City, Oceanic, Staten Island Athletic, Tappan Zee, Williamsburgh and Yonkers Corinthian. The president, Com. A. J. Prime, called the meeting promptly to order at 8:15, Mr. Geo. Parkhill acting as secretary.

Various business of importance was transacted, the most important, however, being the regatta committee report, quite a lengthy document, read by Mr. George E. Gartland, chairman of the committee. The following are some extracts from the report:

"The morning of the race opened beautifully, a clear sky and southerly wind starting in, which gave every promise of freshening. When the race was started there was a good whole sail breeze from about south to south by west, which with slight variation held true to the finish. In fact, it was such a day that the association might have ordered. Everything tended to make this regatta a success and the committee expected a great lot of starters. In this respect they were not disappointed, as 101 yachts actually crossed the starting line.

"The committee has given the matter of the distribution of numbers much careful study and concluded that the mode inaugurated by them at the last regatta was as nearly perfect as possible. They engaged the same large sloop, which was anchored at the starting line, as early as 8 o'clock on the morning preceding the race and remained until after the finish. On board were the numbers, the captain and one man. From information that had come to the committee after the race, there were at least fifteen yachts that arrived too late to obtain their numbers and start. The committee are proud to say, however, that, notwithstanding that fact, they started the greatest regatta ever held in New York Bay.

"They took up their position at the start at 10:30 A. M., and gave the preparatory signal at 11:40 A. M. At 11:50 A. M. the signal to start for classes A to H both inclusive, at 12 M. the signal for classes 1 to 5 both inclusive, at 12:10 P. M. the signal for classes 6 to 10 both inclusive, and at 12:20 the handicap signal. Several were handicapped, having started after the expiration of the ten minutes allowed their class, and several having started before the signal for their class were disqualified by the committee. The race was finished before 5:15 P. M."

Five protests were received, as follows:

1. Mr. Clinton R James, owner of the open cat Undine, sailing in Class 8, protested Defiance as not sailing the course. As Mr. James failed to substantiate his protest, and as Messrs. Bonnay and Potter submitted an affidavit that they had sailed the course and complied with the rules in every respect, the committee dismissed the protest and awarded the race to Defiance.

2. Mr. Fred Muller, owner of the cabin cat Ripple, sailing in Class 5, protested Water Witch and Nellie K., as not going the course. After an affidavit had been presented by Mr. Randall, owner of the Water Witch, that he had sailed the course as prescribed and complied with the rules, Mr. Muller withdrew his protest and the race and prize was awarded Water Witch.

3. Com. C. H. Benson, owner of cabin sloop Millie, sailing in Class G, protested Mr. F. A. Perret's Wabneta, asking for a remeasurement, which was made, showing Wabneta 25ft. 8⅝in. as against 25ft. 5in., and Millie 25ft. 4½in. as against 25ft. 3in. The new measurement did not alter the result and the race and prize were awarded Wabneta.

4. Mr. E. M Post, owner of the open cat Bon Ton, sailing in Class 9, protested Capt. Elsworth's Ges So, asking for a remeasurement. The new measurement made the Ges So 18ft. 3⅝in. as against 18ft. 3in. The new measurement did not alter the result, merely reducing the time by which Ges So won. The race was awarded to Ges So.

5. The Williamsburgh Y. C. informed the committee that the reputed owner of I Thought So, winner in Class 3, was not a member of the club, nor was the boat enrolled in their fleet. After giving the interested parties a chance to be heard in the matter and no one appearing in behalf of I Thought So, she was disqualified and the race awarded to the next boat in that class—Mosquito.

The following were disqualified with the reasons for disqualification: In Class 6, Com. A. L Brush, Henrietta; in Class 8, Messrs. Durham and Relyeas, Eureka, and Mr. J. C. Egerton's B.Q. for starting before signal for their classes.

The committee after considering the question carefully determined to disqualify A. J. Prime's schooner Florida, sailing in Class A, for the reason that she did not start with her racing number as required by the rule relating to numbers, and awarded the race and prize in Class A to Mr. Geo. W. Poucher's Edith, the next yacht in Class A.

The following are the winners in their respective classes:

Class A—Edith, Geo. W. Poucher, Yonkers Cor. Y. C., beats Vice-Com, G. F. Shaver's Beatrice, of the same club, 3m. 1 4-10s.

Class C—Dolphin, Com. Henry F. Allen, Hudson River Y. C., walks over.

Class D—Ileika, Mr. E. H. Converse, Brooklyn Y. C., beats C. Mitlesdorf's Avalon, Pavonia Y. C., 40m. 18 6 10s.

Class E—Carrie Van Voorhis, J. H. Thorn, Yonkers Cor. Y. C., beats Nameless, Messrs. Pringle & Haskins, Columbia Y. C., 2m. 13 6-10s.

Class F—Seabolt, W. P. Willis, Newark Y. C., beats Henry Ward Beecher, Messrs. Bevers & Tompkins, Yonkers Cor. Y. C., 2m. 58 5 10s.

Class G—Wabneta, F. A. Perret, Brooklyn Y. C., beats Willie, Com. C. H. Benson, Jersey City Y. C., 24 9 10s

Class H—Yawl Bessie, Vice-Com. G. Van Horne, Jersey City Y. C., beats Seneca, J. P. Tribkens, the latter not finishing.

Class I—Charm, Vice-Com, F. S. Ketcham and H. P. Campbell, New Jersey Y. C., beats Eagle Wing, Scott & Burlton, same club, 21m. 2 2-10s.

Class J—J. T. Corlett, Conrad Rothmal, Hudson River Y. C., beats J. A. Cameron, J. J. McCarthy, same club, 7m. 29 7-10s.

Class 3—Mosquito, F. H. Hegler, Pavonia Y. C., beats Osceola, M. M. McGrath, Oceanic Y. C., 8m. 22s.

Class 4—Nellie, Rear-Com. M. F. Plant, Indian Harbor Y. C., beats Almira, Wilmerad Hanan, same club, 2m.

Class 5—Water Witch, F. M. Randall, Pavonia Y. C., beats Willie K., S. Kimberlin, Oceanic Y. C., 7m. 16s.

Class 6—Dolphin, Geo. C. Robinson, Brooklyn Y. C., beats Wilmerad, Wilmerad Hanan, Indian Harbor Y. C., 1m. 37 3-10s.

Class 7—Twilight, H. B. Duryea, North Shrewsbury Y. C., beats Winona, J. E. Grover, Hudson River Y. C., 39m. 7 2-10s.

Class 8—Defiance, Messrs. Bonnay & Cober, Pavonia Y. C., beats Undine, C. R. James, North Shrewsbury Y. C., 2m. 8 5-10s

Class 9—Ges So, Capt. Jos. Elsworth, Jersey City Y. C., beats Bon Ton, E. M. Post, Staten Island Athletic Club, 5 5-10s.

Class 10—Chip, W. E. Elsworth, Kill von Kull Y. C., beats Gracie, H. Stinemier, 3m. 47s.

The committee attached to their report a summary of the race and the various affidavits and statements made in connection with the protests and disqualifications of the 18 classes in the association. There were starters in all but Class B—or in 17—last year there were starters in but 13.

A necessary improvement was embodied in the suggestion, made to the association and yacht owners that in future regattas, that yachts after having once finished should not re-cross the line, and that boats not sailing the whole course should not cross the finish line; as under any circumstances the duties of the committee are arduous, and such re-crossing gives them much unnecessary work.

A statement of their expenses is also given and compared with those of last year.

The report concludes with congratulations over the successful regatta, and with the hope that in each year that follows they will gain as much as this has over last year.

On a motion to receive and adopt the report with thanks to the committee, Com. Prime asked a question of privilege and stated to the meeting that he thought that as he had applied twice for his number he did all that was required, and that he was sorry, although not complaining of the decision that he should have been made an example of, urging that as soon as he could after crossing the line he made and placed a number on his sail and finished with it in place. An amendment was made to the original motion that the report be adopted with the exception of anything therein relating to the disqualification of Florida. It was so ordered. Another motion was made that it was the sense of this meeting that the question of Florida be referred to executive committee, by the regatta committee. The regatta committee then announced that they agreed to so refer the matter for final determination to the executive committee.

The question of not carrying a number was discussed in the FOREST AND STREAM of Oct. 16, 1890, when the yacht Just Woke Up was disqualified by the regatta committee, and what we then said seems applicable to the present case. The necessity for carrying numbers being clearly proven, it rests with the regatta committee to provide every facility for procuring them, and with the owners to avail themselves of these facilities and make certain of having the proper number in good season. In the present case the distribution of numbers was managed with more than usual care by the committee, the number to be provided being very large. Yacht owners had ample warning, both in previous discussions and in a special notice in the circular, and while an owner may consider that he has good reasons for not complying with the plain rule, on the other hand, the work of timing would be rendered impossible if any exception to the rule were permitted.

Mr. George Parkhill, chairman of the entertainment committee, submitted his report, showing the receipts and disbursements of his committee for the regatta. The receipts fell much behind those of last year, and it left a deficit of about $66 in the regatta. This is to be regretted, and nobody but the clubs in the association can be blamed for it. If they would take a little more interest in the disposition of the tickets for the club steamer it could very easily be made to pay. We understand that these regattas are expected to pay for themselves, and if they do not the fault lies with those members who, although entering their boats, do not lend it that financial aid necessary. An appropriation of $200 was made for prizes. This is much too low for a race of such interest, but as all the money in the treasury was appropriated, the committee has done the best they could under the circumstances.

## Intrepid.

EVERY old yachtsman will experience a pang of regret at the sale of the schooner Intrepid, for the first time since her launch fourteen years since, and the transferral of Mr. Lloyd Phœnix's name to the list of steam yachtsmen; but at the same time this loss to the sailing fleet is to a certain extent compensated by the addition of the steam division of a new Intrepid whose reputation is likely to equal even that of the old. The schooner was designed by Mr. A. Cary Smith, in 1878, as a cruising vessel for Mr. Phœnix, being one of the earlier yachts built from a design on paper instead of a block model. She was launched in the same year from Poillon's old yard at the foot of Bridge street, Brooklyn; and has ever since remained under the same ownership, flying the red burgee with the familiar black dragon in many foreign ports. As a cruiser, her design was well ahead of its day, and she has held her own up to the present date against more modern craft, while the manner in which she has been kept up has made her in every way one of the finest representatives of the American cruising fleet.

The new yacht which is to succeed her has been planned with the greatest care, and with her owner's life-long experience as a sailor and yachtsman she is likely to become no less noted than the old craft. The design is the work of Mr. J. Beavor Webb, designer of the successful steam yachts Sultana, Utowana and Corsair; and the yacht has been constructed under his immediate supervision; the builders being Messrs. Neafie & Levy, of Philadelphia.

The new Intrepid is quite a beamy vessel, 27ft. beam on a waterline of 132ft., the over all length being 163ft. 6in. The draft is 13ft. 6in. The model shows that the yacht is intended to sail; the keel is slightly rockered, with a good forefoot, the sternpost has a rake of about 15 degrees, and the topsides end in a light and well-shaped counter suggestive of a sailing rather than the usual steam yacht. The engines are triple-expansion, 9½, 14 and 23½×19, with a Bevis feathering screw, two-bladed. The boiler is of the return tubular type, 10ft. 3in. diameter and 8ft. 6in. long, the working pressure being 160lbs. The yacht will carry a large area of canvas, being rigged as a three-masted schooner.

The hull is of steel, the keel being a steel trough of semi-circular section. The garboards are $^{9}/_{16}$in. and the plating of the bilge $^{7}/_{16}$in., the plating being "in and out." The frames and reverse bars are 2½×3¾, spaced 22in., the deck beams are half bulb and angle, 3×6in., and the bulkheads ¼in. The fore bulkhead of the engine-room fits close about the boiler, making an air-tight stokehole, there being two blowers above the boiler. The stack is telescopic, with one short movable length that stows over the boiler when not in use.

The main saloon is abaft the engine space and encroaches on it above the level of the lower deck, giving a large saloon above and ample space for the engines below. Abaft the engine room bulkhead are two large water tanks. Beginning just abaft the mizzenmast, the deck is broken by a poop extending from rail to rail and aft to the taffrail, giving very ample quarters in the after part of the ship, the head room throughout the cabins being about 8ft. The poop is about 22in. above the main deck, and will be well lighted and ventilated by oblong windows 1×2ft., 3 on each side in the bulwarks and 6 in the fore end, looking out along the main deck. There is a small deck house of steel plate just forward of the mizzenmast, with a bridge, though the poop deck is sufficiently high to permit a clear view over the house. The yacht was launched on Oct. 8, but will not be ready for sea for some time, the steel work of the hull alone being completed. The engines are not yet ready in the shop, and the decks are not down. As already stated, she will bear the name of the old yacht Intrepid.

## Cruising and Cruisers.

*Editor Forest and Stream:*

In answer to the proposition published by Mr. Wicksteed, in your issue of Sept. 29, to race his "spoontail" against my "spoonbill," permit me to say that the lateness of the season, the many hundreds of miles separating us, and also the fact that I am at present without a boat, prevents the arrangement of a friendly contest. But I think Mr. Wicksteed will bear me out in saying that a race between Moccasin and the handsome craft he designed, which were the two boats discussed in your columns last winter, would not settle the question of the intrinsic merits of the respective types. Moccasin was built for the sportsman cruiser to travel, shoot and fish, live, and as Walt Whitman puts it, to "Loaf and invite my soul" in, while the Cobourg boat was evidently designed mainly for pleasure sailing and holiday cruising, and as I rejoice to learn has proved a decided success.

Early in the summer I was instrumental in launching on one of the small lakes of the Northwest a spoonbill designed with some intention of learning what speed could be evolved from this mode of build. This little ship was spread well fore and aft, having the popular exaggerated overhangs and corresponding measurement-cheating waterline, with an enormous rig cut in two pieces. She proved very able and fast in heavy weather as well as in light winds, and performed well on all points of sailing.

The first week in September the boat passed into the hands of an enthusiast who cares more for a racing machine and less for cruising than your correspondent. More cruising and less racing will, I trust, claim my attention next year, and although I am not certain where my lines will be cast another season, still I have in my mind a compact little model wherein I hope to loiter along bright waters where the "leaping fish sport and the agile deer comes to drink."

But what has become of all the singlehand fellows? Have they all turned racers? Has the romantic sport which "Nessmuk" and "Seneca" wrote about before their pens were forever laid to rest passed into oblivion? Are there none left to relate charming episodes of voyages into waters where the supple bamboo and the glistening gun barrel claims prestige over the burgee of the yachtsman? Perhaps Mr. Wicksteed will spin us a yarn. True, he says he is not a patron of rod and gun, but then he is a singlehander, and a cruiser of that sort always has eyes and ears for the glories of nature; and I take it that sums up the qualities of a sportsman true, for that multifariously defined being should never be a person who revels exclusively in reminiscences of the vicarious adjuncts to his outing.

Your Canadian correspondent proved himself a judicious quill driver when he skippered the Sylvia and navigated the waters in the Superior region, so let him give us an account of his vacation rambles in the new craft in default of any possibility of recroing a racing event this season with

CAYUGA.

Oct. 5.

## Alva.

THE local inspectors at Boston, Messrs. Andrew Burnham and Andrew J. Savage, made public last week their decision in the case of the Alva—Dimock collision, the conclusion being as follows:

"We are satisfied that the collision was not caused by misbehavior, negligence, or unskillfulness on the part of the licensed officers of H. F. Dimock, and they are therefore exonerated from all blame.

"The only testimony we have from any one on the Alva is that of Capt. Henry Morrison, by which we are forced to the belief that the Alva, at the time of the collision, was being navigated in violation of Section 4,401, United States Revised Statutes, she not being under the control of a pilot licensed for that route.

"We are satisfied that a licensed pilot possessing skill and experience on these waters would never have anchored where the Alva was.

"We are forced to the conclusion that this collision was caused by the violation of the statute above mentioned, and that life was placed in peril by reason of such violation, and it becomes our duty to apply the penalty provided in Section 4,450, United States Revised Statutes, to do, therefore, suspend the license of Capt. Henry Morrison as master for the term of six months from this date."

Captain Morrison has begun a suit of a novel nature by filing a libel against the Metropolitan Steamship Company for the sum of $1,306.80, the value of nautical instruments and other personal property lost on the yacht and owned by him. The libel demands that the court summon all persons sustaining losses through the sinking of the Alva; and that the steamship owners be forced to settle pro rata with all. This action, which is without precedent, makes Mr. Vanderbilt and others party to the suit. The steamship company has already taken legal action to secure the appraisement of their vessel, the H. F. Dimock, at the sum of $80,000, limiting their total liability in the event of a loss of the suit to this nominal figure.

A yacht club called the Poughkeepsie Y. C. has just been organized, the officers being: Com., Powell E. Hobert; Vice-Com., J. A. Hartman; Sec., Raymond Houpt; Treas., John Furman; Meas., John Haubennestel; Stewards, Gustav Nulting, Charles Myers and George Hartman. The club will build a boat and club house near Fox's Point in the spring.

### Measurement in the 21ft. Class.

THE success of the Herreshoff centerboard Alpha in Boston waters has resulted in an effort on the part of some yachtsmen to secure the readoption of the length rule for the class, a backward movement which has much against it and nothing in its favor save that under a length rule Alpha will receive no time from boats much larger in every way save length. A correspondent of the Boston *Globe* writes as follows in favor of the present rule, his points being worthy of a careful consideration by all interested:

"While the discussion as to the best measurement rule for next year's racing is arousing interest among yachtsmen, a brief plea for the continuance of the present rule should not be out of place. It is reasonable to suppose that a waterline length rule pure and simple, would produce the "brute" type of boat, for the avoidance of which the sail area rule was designed. Large sail plans would surely be used if they were not taxed. This means a dangerous boat, especially when of the centerboard type; a boat harder to handle, requiring a larger crew, better construction to stand the strain and consequently greater expense for construction and maintenance, and altogether a more unhandy type.

"Is this waterline length rule the only straw for this year's defeated designers to clutch at? Is it a good argument for the abolition of the present rule that it has developed a handy low-powered boat which, except in one or two cases, has not needed her time allowance to beat her rivals? I think it argues for the retention of the rule. No one doubts that Herreshoff, working under a waterline rule, could produce a larger Alpha with more sail which could defeat the present champion, but it is doubtful if the same boat would do it under the present rule. Which is the easier boat to handle, the best type to encourage?

"In support of the statement that better construction is needed in a high-powered boat, I venture the assertion that in the only series this summer when rough weather was encountered (the Corinthian races at Marblehead), the high-powered boats required constant pumping to enable them to sail the course, while the low-powered boats were practically as tight and manageable as on a calm day.

"'Vested interests' should be considered in changing a rule, though they should not stand in the way of progress. It is the opinion of many that a return to the waterline length rule would be a backward step, not a forward one. Would it not be better to discuss a scheme of classification by sailing length under the present rule? Why should boats be measured for time allowance by one rule and classified by another? CORINTHIAN."

### Stony Point Y. C., First Annual Regatta.

NEW YORK—LONG ISLAND SOUND.

THE first annual regatta of the Stony Point Y. C. was sailed on Sept. 24 in a light S.E. breeze. The start was from off the club house at Port Morris, thence to Riker's Island Buoy, second leg to College Point Buoy, thence home, passing inside of Hunt's Point Buoy.

The race was started at 2 P. M., most of the boats crossing promptly. Times were:

| | Start. | Finish. | Elapsed. | Corrected. |
|---|---|---|---|---|
| CLASS I. | | | | |
| Little Tom | 2 00 00 | 3 49 00 | 1 49 20 | 1 42 00 |
| CLASS II. (UNDER 16FT.) | | | | |
| Uno | 2 00 00 | 3 49 00 | 1 49 00 | 1 42 00 |
| Fright | 2 00 00 | 3 53 00 | 1 53 00 | 1 44 57 |
| Frolic | 2 00 00 | 4 08 00 | 2 08 00 | 1 59 00 |
| Sinbad | 2 00 00 | 4 13 00 | 2 13 00 | 2 02 30 |
| Hustler | 2 00 00 | 4 30 00 | 2 30 00 | 2 18 40 |
| Dolphin | 2 00 00 | 4 34 00 | 2 34 00 | 2 23 30 |
| Pollywog | 2 00 00 | Disabled. | | |

Uno won in second class and also made the fastest time over course. Fright took second prize. In Class I. Little Tom had a sail-over.

The Seawanhaka rule was adopted for measurement and classification, and has proved satisfactory in the small open boats of which the club is principally composed.

The judges were Messrs. James Green and Charles Brambach.

### International Racing.

NOTHING has occurred since last week in the matter of Lord Dunraven's challenge. The following notice has been posted on the club's bulletin board:

SECRETARY'S OFFICE, NEW YORK, Oct. 5, 1892.

A preliminary challenge for the America's Cup has been received from the Earl of Dunraven. The following cablegram has been sent him:

"DUNRAVEN, 27 Norfolk street, Park lane, London—Letter received. Will be considered by the club at a special meeting on the 18th inst.

"ODDIE, Sec'y."

The meeting first set for Oct. 10 has been postponed to Oct. 18. Though the conditions mentioned by Lord Dunraven have not been made public they are understood to include a virtual abandonment of the new deed of gift as governing all future races, and for this race the acceptance of a challenge without the beam and draft of the challenging yacht being limited, the sailing of five races, and the starting of each race at the appointed hour, providing either of the contestants should desire it. There is nothing unfair or unreasonable in any of these conditions, and there is good reason to hope that the New York Y. C. will embrace such a favorable opportunity to renew international racing in a contest with such a yachtsman and sportsman as Lord Dunraven, even at the expense of a little of its *amour propre*.

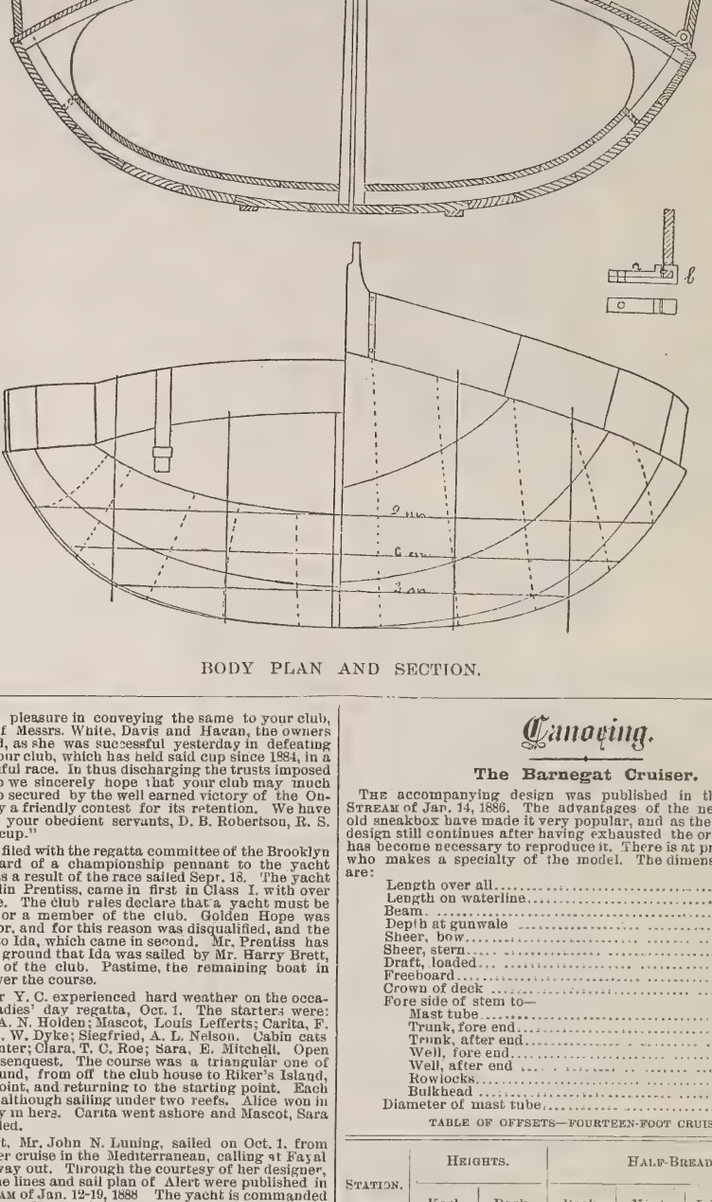
### Sidewheel and Screw.

THE rivalry between the old type of sidewheel beam engine steamers and the propellers on Long Island Sound has resulted in an exciting race of 30 miles in addition to many short trials of speed. The race has been talked of for some time, and on the night of Oct. 4 a number of steamboat men took passage on the steamer Puritan of the Fall River Line, Capt. Simmons, while others boarded the new steamer R. J. Peck, Capt. Peck, at New Haven. The Puritan is recognized as the fastest of the large Sound steamers with sidewheels and beam engine, while the Peck, a smaller boat, is a new vessel, in commission but a month, a twin screw boat with triple-expansion engines. Furthermore, the Puritan was designed by her builders, while the Peck is the work of the yacht designer Mr. A. Cary Smith.

The Peck left New Haven at midnight and ran out into the Sound, waiting, as it was understood that she would, for the Puritan. The latter came by at about 3:45 A. M. in company with the Maine, a new single screw vessel. The race began when the Puritan came up abeam of the Peck and continued for 30 miles to Sands Point, by which time the Peck was over a mile in the lead, the Maine being a poor third. The race was a decisive victory for the new boat, no small part of the credit being due to her model.

### Atlantic and Viator.

A PRIVATE match, for a stake of $100 and a cup, the latter given by the Larchmont Y. C., was sailed on Oct 6 by Atlantic and Viator, the course being from Larchmont around Eaton's Neck Buoy and Stamford Light, 32½ miles. Atlantic was sailed by Mr. C. B. Seeley, one of her owners, and Viator by Mr. W. G. Brokaw and Walter Thompson. There was a strong northwest breeze, the two reefing at the start, which was made at 11:25. The time allowance 18m., was nearly all given at the start, Viator crossing at 11:42 The first leg brought the wind on the port quarter, after which they beat across the Sound to Stamford Light. At the first turn Viator carried away the tack of her jib, losing some time in repairs. Atlantic won easily, the times being:



| | Start. | Finish. | Elapsed. | Corrected. |
|---|---|---|---|---|
| Atlantic | 11 25 24 | 4 09 15 | 4 31 51 | 4 31 51 |
| Viator | 11 42 31 | 5 13 15 | 5 33 15 | 5 15 09 |

Mr. Clarence L. Burger, of the L. Y. C. regatta committee, had charge of the race.

## YACHT NEWS NOTES.

There was launched from the yards of Clay & Torbensen, Lancaster, N. J., on Sept. 20, a fin-keel yacht of specially good construction. The boat was built for C. H. Brock of the Corinthian Y. C., of Philadelphia. Planking is ⅝in. white cedar. Ribs white oak 1¼×1½in., spaced 10in. centers. Iron floor timbers. Keel and deadwoods of white oak. Fin-keel 2,000lbs. of lead bolted through keel and floor timbers with composition bolts. All rivets and fastenings are brass or copper, and the method of construction is such that no caulking is required, no seams being visible, and the hull finished as smooth as glass. The dimensions are 29ft. on deck, 16ft. 10in. l.w.l., 6ft. 4in. beam. She has sailed in two regattas already, winning both races, and outsailing everything in her class with ease. She is sloop rigged, can come about in her own length, and will undoubtedly be heard from in the 18ft. class. Hull, spars and rigging complete weigh only 1,750lbs.

The Rochester Y. C. has received the following letter from the trustees of the Fisher cup: "BELLEVILLE, Ont., Sept. 20, 1892. Matthew Cartwright, Commodore Rochester Yacht Club: Dear Sir—As trustees of the Fisher cup, appointed by the Bay of Quinte Yach

BODY PLAN AND SECTION.

Club, we have much pleasure in conveying the same to your club, through the hands of Messrs. White, Davis and Hagan, the owners of the yacht Onward, as she was successful yesterday in defeating the yacht Norah, of our club, which has held said cup since 1884, in a very close and beautiful race. In thus discharging the trusts imposed upon us by our club we sincerely hope that your club may much appreciate the cup so secured by the well earned victory of the Onward and have many a friendly contest for its retention. We have the honor to remain your obedient servants, D. B. Robertson, R. S. Bell, trustees Fisher cup."

A protest has been filed with the regatta committee of the Brooklyn Y. C. against the award of a championship pennant to the yacht Ida. Mr. McCarthy, as a result of the race sailed Sept. 18. The yacht Golden Hope, Franklin Prentiss, came in first in Class I. with over half an hour to spare. The club rules declare that a yacht must be sailed by her owner or a member of the club. Golden Hope was sailed by a hired sailor, and for this reason was disqualified, and the pennant was given to Ida, which came in second. Mr. Prentiss has filed a protest on the ground that Ida was sailed by Mr. Harry Brett, who is not a member of the club. Pastime, the remaining boat in Class I., did not go over the course.

The Knickerbocker Y. C. experienced hard weather on the occasion of its annual ladies' day regatta, Oct. 1. The starters were: Open sloops—Alice, A. N. Holden; Mascot, Louis Lefferts; Carita, F. A. Barnes; Nawah, D. W. Dyke; Siegfried, A. L. Nelson. Cabin cats—Dorothy, Chas. Winter; Clara, T. C. Roe; Sara, E. Mitchell. Open cats—Myra, G. K. Rosenquest. The course was a triangular one of five miles, twice around, from off the club house to Riker's Island, thence to Classen's Point, and returning to the starting point. Each yacht carried ladies, although sailing under two reefs. Alice won in her class and Dorothy in hers. Carita went ashore and Mascot, Sara and Myra were disabled.

The schooner Alert, Mr. John N. Luning, sailed on Oct. 1, from New York for a winter cruise in the Mediterranean, calling at Fayal and Madeira on the way out. Through the courtesy of her designer, Mr. Henry Bryant, the lines and sail plan of Alert were published in the FOREST AND STREAM of Jan. 12-19, 1888 The yacht is commanded by Capt. Alex. Corkum. Mr. Luning has as company Messrs. Wm. Donnelly and Reginald Travers.

Wild Duck, steamer, has been at the Atlantic Works, East Boston, for alterations, prior to a winter cruise South. Her mainmast has been shifted forward 13ft. 9in., making an important change in the position of the center of effort. The main boom is 65ft., gaff 35ft., and the distance between the masts is now 42ft. 9in. A larger screw has been shipped, a two-bladed feathering wheel.

On Sept. 30, at 11 P. M., a party of four, Capt. Crocker, Frank Hovey, George Tucker and Isaac Hastings, put off from the pier at City Point, South Boston, for the yacht Ideal, in the small tender belonging to the yacht. The boat upset and Mr. Hastings was drowned, his body being found on the flats next morning. The others righted the boat and reached the yacht in safety.

At a meeting of the Atlantic Y. C. on Sept. 30, the by-laws were amended so as to make the President of the United States, the Secretary of the Navy, the Collector of the Port, the Admiral of the station, the Commandant of the Navy Yard, Brooklyn and the Inspector of the Third Lighthouse district, ex-officio honorary members of the club.

H. B. Moore, of Brooklyn, has ordered a wooden steam yacht of T. A. Crane, the barge and scow builder of South Brooklyn. The yacht will be 114ft. over all, 15ft. beam, and 7ft. in depth, with a triple expansion engine by J. W. Sullivan. The frames will be of steel, with oak and yellow planking. The yacht will be schooner-rigged.

Catarina, yawl, Mr. Nugent Townshend, was at Gibraltar on Sept. 27, 10 days out from Falmouth, England. A cablegram from Marseilles on Oct. 5, states she had been lost near Saintes Maries and but one of the crew saved. No particulars are given, and the report lacks verification.

Mr. Merrill, the backer of the schooner Comet, has paid the $500 to Mr. Drakeley, who made the bet. Although the original wager was made on a challenge from the Comet party, that yacht did not appear at the final date arranged on, and Shamrock sailed over the course alone.

Mr. Gardner has recently made the drawings for a new "Gloriana" bow on Titania, the fast Burgess 70-footer now owned by R. T. Inman. Lawley will probably do the work.

Messrs. Stewart & Binney have an order for a yacht for the 25ft sailing length class, for a New York owner.

The sloop Bermuda arrived at Bermuda on Sept. 21, after a summer in United States waters.

Tranquilo, steam yacht, has been sold by the Herreshoffs to S. B. Sexton, Hyde Park, N. Y.

James B. Voris, an old yacht builder of Nyack, N. Y., died on Oct. 7 at Asbury Park, N. J., aged 92 years.

Lieut. and Mrs. Henn are now on their way to America, and will spend the winter in Florida.

WASP arrived at Lawley's last week and will haul out there for the winter.

Handsel, the 30ft. fin keel, will haul out at Bristol for the winter.

Hildegarde, schooner, has been sold by George Gould to Mr. Allen.

The Riverside Y. C., of Florida, will hold its regatta on Oct. 14.

Marguerite, schr., will winter at Lawley's yard.

El Chico will winter at Wintringham's yard.

*Canvas Canoes and how to Build Them. By Parker B. Field. Price 50 cents. Canoe and Boat Building. By W. P. Stephens. Price $2.00. Canoe Handling. By C. B. Vaux. Price $1. Canoe and Camera. By T. S. Steele. Price 1.50. Four Months in a Sneakbox. By N. H. Bishop. Price $1.50. Canoe and Camp Cookery By "Seneca." Price $1.*

## Canoeing.

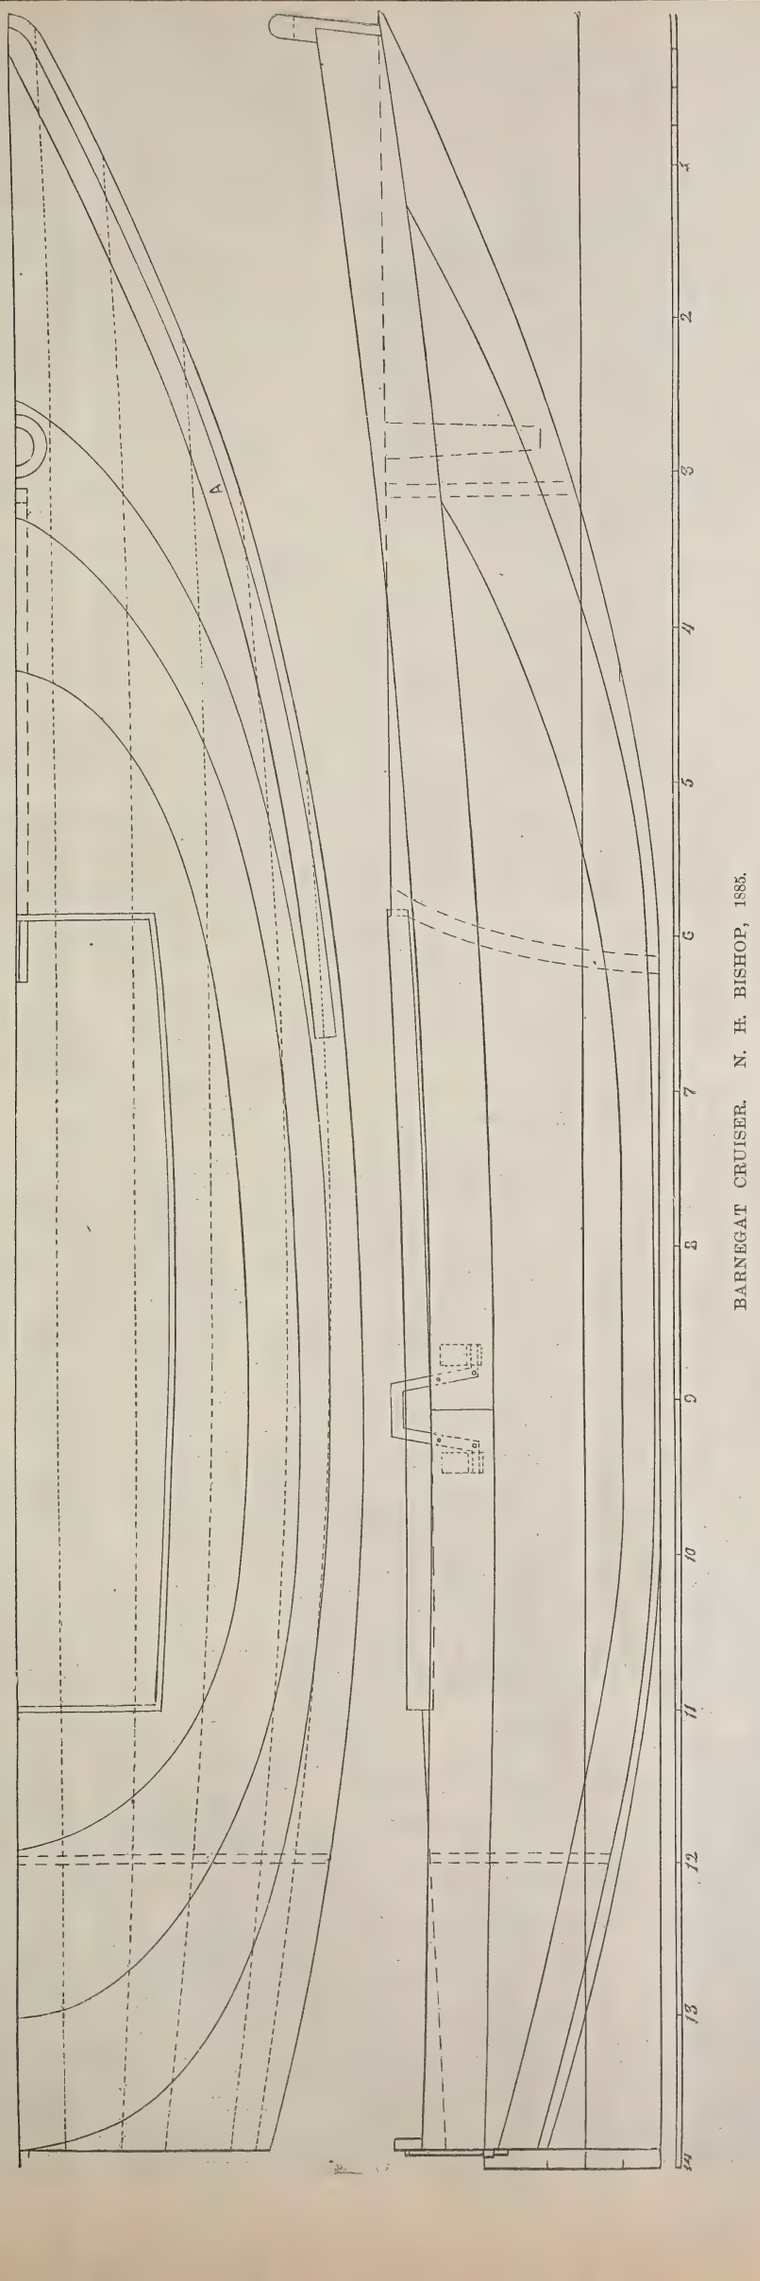
### The Barnegat Cruiser.

THE accompanying design was published in the FOREST AND STREAM of Jan. 14, 1886. The advantages of the new boat over the old sneakbox have made it very popular, and as the demand for the design still continues after having exhausted the original edition, it has become necessary to reproduce it. There is at present no builder who makes a specialty of the model. The dimensions of the boat are:

| | |
|---|---|
| Length over all | 14ft. 0in. |
| Length on waterline | 11ft. 9in. |
| Beam | 4ft. 6in |
| Depth at gunwale | 1ft. 1in. |
| Sheer, bow | 8½in. |
| Sheer, stern | 4in. |
| Draft, loaded | 6in. |
| Freeboard | 7in. |
| Crown of deck | 8in. |
| Fore side of stem to— | |
| Mast tube | 2ft. 9½in. |
| Trunk, fore end | 3ft. 1in. |
| Trunk, after end | 6ft. 3in. |
| Well, fore end | 5ft. 10in. |
| Well, after end | 11ft. 0in. |
| Rowlocks | 9ft. 1in. |
| Bulkhead | 12ft. 0in. |
| Diameter of mast tube | 3in. |

TABLE OF OFFSETS—FOURTEEN-FOOT CRUISER.

| STATION. | HEIGHTS. | | HALF-BREADTHS | | | |
|---|---|---|---|---|---|---|
| | Keel. | Deck. | Deck. | No. 1. | L.W.L. | No. 3. |
| | FT. IN. | FT. IN. | FT. IN. | FT. IN. | FT. IN. | FT IN. |
| 0 | 1 9⅛ | 1 10 | ..... | ..... | ..... | ..... |
| 2 | 11¼ | 1 6⅝ | 1 1 | ..... | ..... | ..... |
| 4 | 3⅝ | 1 4¼ | 1 8⅞ | 1 3 | 9 7 | ..... |
| 6 | ..... | 1 2⅜ | 2 1⅜ | 1 10¼ | 1 7⅜ | 1 3⅜ |
| ⊠ | ..... | 1 1 | 2 3 | 2 0⅝ | 1 9⅞ | 1 6 |
| 10 | ..... | 1 1⅜ | 2 2⅝ | 2 0⅜ | 1 9¼ | 1 5⅜ |
| 12 | 3⅜ | 1 1⅝ | 2 0¼ | 1 8⅛ | 1 3¼ | ..... |
| 14 | 9 | 1 2 | 1 9⅜ | ..... | ..... | ..... |



*Note.*—The small figures are eighths of an inch.

The stations are 2ft. and the waterlines 3in. apart.

The planking is of ⅝in. cedar, deck of ⅛in. cedar, frames of sawn cedar 1⅛×1½in., spaced 10in. Ceiling of ⅛in. cedar, trunk of ⅞in. worked pine, head ledges ½in. thick, of oak. The keel is shaped, bent and screwed to the stocks as previously described, the moulds and transoms are put in place and ribband run over them, three on each side. The framing and planking of all this class of boats are very peculiar. The planks do not end in a rabbet in the stem, but run up to the gunwale The dotted lines in the body and half-breadth plans show the different planks. The actual breadth of a plank on any frame may be measured on that frame in the body plan. The lines in the half breadth plan are the projections of the plank on a flat surface, and except for the keel and garboards, they vary more or less from the proper shape. The after ends of the planks are screwed to the transom, as in an ordinary boat, but some support is necessary for the fore ends while building. To secure this two harpens, A, are lined out from the draft on the floor, each fitting the inside surface of the planking at the lower side of the deck. They may be of pine or spruce 1in. thick and 3in. wide, and long enough to reach to the straight post near midships. These pieces are now fastened in place, their fore ends being screwed to fore end of keel, while the middle and after ends rest on the moulds, being jogged in to the proper height. When in place the topside of each harpen will coincide with the lower side of deck, while the outer edge, properly beveled, will coincide with the outer surface of the mould and ribbands or inner surface of the planking.

Now the frames, either steamed or sawn, are put in place, secured to the ribbands, and the heads of the first five or six on each side are fastened to the harpens. This completes the frame for planking. The garboards run along, of course, on each side of the keel, turning up at the fore ends, where they are screwed to the harpens. The succeeding planks are put on in the same way. When all are made and rivetted up the moulds are removed and the deck beams, 1in. wide and 1¼in. deep, spaced 10in., are put in. The ends rest under the harpen, being jogged out the thickness of the latter, so that the upper surfaces are flush. Knees, as shown, are put under the side decks, then the deck is laid and coamings set, and the boat finished as described in "Canoe and Boat Building." The mast is stepped in a galvanized iron tube. The washboard is in five pieces—two on each side and one (the latter held by two square staples) on the stern.

The side pieces are bolted to an iron casting at the bow which forms a fairleader for the cable. They are held to the deck by small iron catches, shown at *a b*. The part *a* is pivoted, and when turned aside allows the washboard to be slipped back from *b*. The rottom of the boat is protected by two wearing strips of oak. The bowlocks are of galvanized iron.

BARNEGAT CRUISER. N. H. BISHOP, 1885.

### Red Dragon C. C.

THE fall regatta of the Red Dragon C. C. was held on Oct. 8 on the Delaware River, in front of the club house at Wissinoming. There was a large assemblage of guests—principally ladies—to witness the races.

The weather was mild and a dead calm was upon the water, in consequence of which the paddling races were the first events upon the programme. In the single paddling race there were two entries, H. Fleischman in Enid, and M. D. Wilt in Malta. The race was easily won by Mr. Fleischman.

In the tandem paddling the entries were J. Van Dusen and R. G. Fleischman in Coquette, A. S. Fennimore and M. D. Wilt in Malta, and H. Fleischman and F. O. Gross in Enid. The three boats were well bunched until about 50yds. from the finish. Malta crossed into Coquette's waters and fouled, after which Malta's men ceased paddling. Coquette finished half a length ahead of Enid. H. Fleischman broke his paddle immediately upon starting, handicapping the Enid greatly.

The greatest interest centered in the sailing race, in which there were four classes of boats entered, the object being to settle an open question as to the superior qualities of one class over the others. The boats were to start upon the firing of a gun and sail twice around a triangular course, but, as there was little wind and owing to the lateness of the hour, once around the triangle was decided upon.

The entries were: Ethel, A. G. Cook; No Mane, M. Van Dusen, of the Corinthian Mosquito Fleet; Chump, G. F. Williams, the "Clapham bouncer" of the Philadelphia Y. C.; Picnic, Capt. Morgan, and Olga, H. Blummer, St. Lawrence skiffs of the R. D. C. C. The above boats were allowed one man with the captain.

The canoes were: Osceola, H. MacCormick; Kie Loe, F. W. Noyes; Enid, D. MacCormick; Malta, J. Van Dusen; Pollywog, R. G. Fleischman; Ted, W. Gray (canvas canoe), of R. D. C. C., and Cholly, of the Riverton C. C.

The boats were well bunched at the start, crossing the line with little advantage to any. Osceola was the first to pull out, followed by Malta, Kie Loe, Enid, Pollywog. The stretch to the first buoy was against the tide with a quartering breeze. After rounding the first buoy Kie Loe passed Osceola, but soon lost the position to Osceola owing to some fouling of her gear. The second buoy was rounded in the following order: Osceola, Kie Loe, Enid, Pollywog; and from the second buoy to the stakeboat was a beat, and the boats crossed with Osceola first, Enid second, Kie Loe third, No Mane and Ethel finishing ahead of the St. Lawrence skiffs, with Chump following.

Messrs. W. E. Rothrey and N. Baker, R. D. C. C., were judges; John A. Inglis, starter, and G. A. Kirkpatrick, timer, both of the Philadelphia C. C. After the races a luncheon was served. F. O. G.

### Camp Dues at Division Meets.

*Editor Forest and Stream:*

At the request of certain A. C. A. members of the Northern Division, I beg to inform the members of the Association that at the next meeting of the executive committee I will move the annexed amendment to the by-laws. This is sent for publication in accordance with the spirit of Art. XII. of the constitution, although no such publication is necessary in case of amending the by-laws.

TORONTO, Can. J. W. SPARROW.

The amendment reads: *Resolved*, That Sec. 2 of Chap. I of the by-laws be amended by striking out, "Every member attending the general A. C. A. camp shall pay $1 for camp expenses;" and substituting therefor, "Every member attending a camp shall pay for camp expenses as follows: For the general camp $1 and for a division camp such sum as may be determined upon by the executive committee of the local division."

## Rifle Range and Gallery.

### THE REVOLVER CHAMPIONSHIP.

THE members of the New York Pistol Club are determined to have all the sport which the Winans Trophy affords. President Henry Oehl of the club thinks that his position should carry with it the championship, so he has challenged the present holder, Geo. E. Jantzer, for the championship, and the match will be fought out on Saturday evening, Oct. 15, at the St. Marks place gallery near Third avenue. Those who wish to see some good shooting and meet a very sociable lot of revolver cracks should be about at that time and place.

### Highland (Ill.) Sharpshooters.

THE fall tournament given by the Highland Sharpshooters on Sunday and Monday of last week was a success in more ways than one. The fine weather brought out a large number of shooters and their friends. St. Louis was well represented by 15 shooters, also several from Belleville, Ill. The shooting commenced Sunday at 10 o'clock and the last gun fired at 12 o'clock Monday.

After dinner prizes to the amount of nearly $500 were distributed according to the following scores:

C. E. BIRD, Secretary.

### Military Rifle Work in Newark.

THE First Brigade Rifle Association, recently formed by some of the enthusiastic military riflemen of Newark, N. J., is booming this branch of the soldier's education in its section. Just at present their outdoor work is confined to 200yds., there being no longer range available. They practice every Saturday afternoon at the Newark Shooting Park, where excellent accommodations are afforded them. Here, however, they are compelled to shoot through a shield, this giving radically different conditions from what they would have on a range that was entirely open. For all that it is an excellent place for winter practice, as the shooters are entirely protected from the elements. During the winter months they will also practice both offhand and prone shooting for the 3fyd. range in the First Regiment Armory, which they will equip at their own expense. This will give the members good training in holding, sighting and pulling the trigger. Indoor rifle-shooting among the New Jersey guardsmen has become almost a dead-letter during the past six or seven years, but it is hoped that the Association will serve to give it a fresh impetus. The majority of the members are connected with the First Regiment, an organization which is comprised of a large amount of strong shooting material, and which will, with the encouragement now being given by the field, staff and line officers make a good showing on the State ranges next season.

It is more than likely that the Association will in the early spring procure land in some convenient location and equip a 200 and 500yd. range for the use of the guardsmen in and about Newark, so that they may secure some preliminary training before the 1893 season of class practice begins. If they do this they will receive the blessing of every guardsman in upper New Jersey, who for years have been longing for a place to practice.

The last practice of the Association was held at the Shooting Park on Saturday, Oct. 8, with a tricky wind and dull, hazy light. The Creedmoor target was used, the distance being 200yds. Springfield rifles were used. The record scores were as below:

Maj D L Wallace..4454444555—44 Lieut B Allers.....3343445455—40
Pvt C H Townsend,5435554544—44 Lt-Col A K Bald'n3453433333—32
Capt G W Church..4535144445—42 Capt W H Howard3444354344—38

Capt. Church and Private Townsend used U. M. C. carbine ammunition, all the others using Frankford carbine cartridges.

### Garden City Rifle Team.

CHICAGO, Ill., Oct. 5.—The members of the Garden City Rifle Team met for weekly practice at Burley & Erickson's gallery, 146 South Halstead street, Tuesday, Oct. 4, and divided up into two teams under the captaincy of Messrs. C A. Hankie and Al Sorenson, to shoot under the rules governing the regular weekly contests. A team race was then shot, Capt. Hankie's team winning as shown by the following scores:

| Hankie Team. | | Sorenson Team. | |
|---|---|---|---|
| W J Gibbs | 106 56 109—271 | H S Burley | 110 56 111—274 |
| C A Hankie | 105 53 103—261 | A Sorenson | 101 55 110—265 |
| C O Hila | 97 52 103—259 | J Polites | 109 54 100—263 |
| Roy Taylor | 97 52 100—251 | MrsThornt'n | 97 49 100—246 |
| A J Frisbe | 98 48 100—246—1338 | J Erickson | 101 41 85—237—1290 |

Mr. Burley won the sweepstake that followed with 111 out of a possible 120

### Port Chester Rifle Club.

PORT CHESTER, N. Y., Oct. 8.—The following scores were made, 200yds., rest, 10 shots, standard American target: R. Rudd 55, F. Dunham 85, R. McNeil, Jr. 84, J. Hess 79, J. Smith 73, E. Vermilye 72, F. A. Bachman 67, G. Vermilye 67, T. Kiernan 57.

Off-hand, 200yds., standard American target: E. Dunhan 73, F. A. Bachman 60, R. McNeil, Jr. 58, J. Smith 57, J. Hess 50, T. Kiernan 38, G. Vermilye 37, Lowden 36.

R. MCNEIL, JR., Sec'y.

### Rifle Tournament in Marion.

NOTICE has been received of the fourth annual prize shooting festival of the Hudson Rifle Club, to be held on their 25yds. gallery ranges, 35 Giles avenue, Marion, N. J., Oct. 25, 26 and 27. Shooting from 7 to 12 P. M. There will be twelve prizes ranging from $25 down to $1 for the best two tickets on the 25-ring target, any .22cal. rifle to be used. All ties will be divided. There will also be a target of honor for members only.

## Trap Shooting.

All ties divided unless otherwise reported.

### FIXTURES.

**If you want your shoot to be announced here send in notice like the following:**

Oct. 15.—East Side-Mutual Gun Club tournament and ninth monthly team contest of N. J. Trap-Shooters' League, Weidenmeyer's Grove, Hamburg place, Newark, N. J.
Oct. 18.—Newton (N. J.) Gun Club tournament.
Oct. 18-19.—Martinsburg (W. Va.) tournament, under auspices of eight clubs, $200 added money.
Oct. 18-20.—Highland Gun Club annual fall tournament, at Des Moines, Iowa.
Oct. 19-20.—Somerville Gun Club tournament, Somerville, N. J.
Oct. 19-20.—Hoopeston (Ill.) Gun Club tournament.
Oct. 21.—New Jersey Shooting Club tournament, at Claremont, N. J.
Oct. 21.—Riverview Gun Club tournament, at Amsterdam, N.Y.
Oct. 24-25.—Charter Oak Gun Club tournament, at Charter Oak, Iowa.
Oct. 25-26.—Interstate Manufacturers' and Dealers' tournament, at Moodus, Conn.
Oct. 26-28.—Omaha (Neb.) tournament.
Oct. 27.—Reading (Pa.) Shooting Association, sparrow tournament, at Black Bear Inn.
Oct. 27-29.—Fulton Gun Club tournament, at Atlanta, Ga.
Nov. 23-26.—Milwaukee (Wis.) tournament, targets and live birds.
May 23-25, 1893.—Knoxville Gun Club tournament, $1,000 added to purses. Also valuable merchandise prizes.
Nov. 24.—John A. Hartner's sixth annual tournament, Bishop's Driving Park, Baltimore, Md.

### Indianapolis Shoot.

INDIANAPOLIS, Ind., Oct. 6.—The city of Indianapolis is so called because of the number of Indians who live there, I presume. The worst Indian of the lot, if we may follow a consensus of opinion of the shooters who attended Messrs. Polster and Allen's second semi-annual tournament, held this week, is Mr. W. T. Hill, otherwise known as the "original sparrow man." Mr. Hill was to have had on tap an unceasing stream of sparrows, 6,000 or more at the lowest calculation, but the event was not as per programme. A meager 1,500 was all the coops showed on Thursday, and the supply for the next day being a highly uncertain quantity the tournament came to a harsh and abrupt close Thursday evening. Mr. Hill is said to have supplied over 150,000 sparrows to the trap-shooters in the past three years. It is to be hoped that he supplied them on a more tangible basis than that shown to-day. He was also billed to furnish a number of live blackbirds for this shoot, but not a blackbird was on hand. To these failures, due either to Mr. Hill or to the management, or both, much of the main interest of the shoot was cut off, and a four days' shoot was reduced practically to a three days' shoot, those who expected a little variation from the monotony of a target shoot being disappointed, and the management being asked to stand an incidental loss of some consequence. It is to be suggested to Mr. Hill that he promise managements no more birds than he can supply and to the management that they promise shooters no more birds than they have under contract. Observance of these simple directions would have prevented what is technically known as a "roar" among the shooters, and also what is colloquially designated as a "kick" among the management. As it was, there were current remarks to the effect that the whole thing was a blame shame and that Mr. Hill had acted real mean, which impressions are transmitted in a duly softened form.

Barring the above misfortune, the tournament was a very fair one, as tournaments go in these degenerate days of a couple of dozen or so shooters for fighting band. Two very decent days were put in at targets, and the next day would have touched the notch at 1,800 to 2,000 sparrows, instead of 1,800, had the visible supply held out. The shoot was nothing at all for the Hoosier capital to be ashamed of. Especially was it rich in distinguished guests. First of all there I place myself, not for any purely egotistical reasons at all, but because circumstances seem undeniably to demand it. Ordinarily, and as a plain newspaper man, I wouldn't feel this way about it, but times have changed now. When I went to the hotel on my arrival in the city, I was mistaken for a commercial traveler, and the clerk asked me if I wanted a sample room, before he had seen my baggage. This I consider the greatest compliment mortal man can receive, and there must be something great in the man who is the object of such tribute. Not to disappoint the clerk, I told him I did want a sample room, and having obtained it, I spread out divers and sundry specimen copies of the greatest paper on earth, which is FOREST AND STREAM. If the goods are not up to or above sample 52 times in the year the house will refund the money.

Besides myself, commercial traveler, there were many other notable men on hand, several of these from Mt. Sterling, Ky., shoot, still red in the face and hoarse in the neck from their protests at what they described as a most interesting and remarkable entertainment. The Old Reliable Ed Taylor came bel Indianapolis from Cincinnati, and so did Gus Dicks. Ben Teipel didn't, being home and laid up from high and hard kicking at Mt. Sterling. Jimmy Elliott was on hand looking very brown and hearty, and very anxious to shoot E. D. Fulford a race for $1,000 a side (in money) on the flat fair grounds at Kansas City. I understood him to say also that he would make the same proposition for the neutral ground of Indianapolis. Michael Ca-sius Sanford, of Townsend, O., with his friend J. P. Easton, of Monroeville, O., appeared regularly at the sparrow score, and so did Geo. Beck and Dr. Britton, and others of the footlight favorites of giddy trapdom. Dr. Britton is dangerous at the sparrow traps, having a total of 134 out of 137 to his credit, which is a feat technically described as warm tamales. "Old Man" Kellar, of Batavia, N. Y., was another feature, and as usual was often the center of an interested crowd. Mr. Kellar has patented an ejector, and not having been able to sell the patent to the Parker Company he has put one of the devices on his own Parker gun, with the result of making it a very good shooter at both ends.

It was a pleasure to meet also at the grounds Capt. Arthur Du Bray, known a long time in the gun world by his writings over the *nom de plume* "Guacho," in championship of the Parker gun. It was in the nature of things that Capt. Du Bray should follow his beliefs fully, and so at length he resigned from the United States Army, and for some time, as is generally known, has been representing the gun which won his early admiration. In this capacity he has been very successful and has formed a wide circle of friends. Capt. Du Bray has had a somewhat interesting career, of which the shooting public probably knows little. Born an Englishman, he was educated in the north of France, and later moved to South America, where he went into sheep, engaged in many exciting forms of the chase, and met some few adventures of a less likeable sort of which he probably wishes he had no mementoes. Hence his pseudonym, "Guacho." Leaving South America for the Dakotas of the early days, and later joining the United States Army, Capt. Du Bray was long in the wilder West, and sampled all sorts of shooting, from antelope to wildfowl, from Montana to the coast. He knew Gen. Custer well, and narrowly escaped the massacre. He knew also Capt. Wallace and others who met their fate at Wounded Knee, and ranks among his friends Lieut. Nicholson and many other gentlemen who were in the Pine Ridge campaign.

Attendants at this shoot were blessed with perfect weather and almost perfect grounds. Fairview Park, near which the "United States Shooting Park" is located, lies on high bluffs, six miles out by electric car. The traps were set on a high knoll, with a drop-off into space about 50yds. back of the traps. The bluerock traps threw 7,000 birds in two days, and offered nothing new as feature, the North handicap system being in force. The main interest of the shoot centered around the advertised programme of live sparrows and live blackbirds. Of the latter, as above stated, the management could obtain none at all. Such results are unsatisfactory to shooters, though Mr. Palster and Mr. Allen, who assisted in the management, were probably more cut up about it than anybody else.

Indianapolis is the great original sparrow town, and sparrow shooting as shown there is very interesting sport. Ten traps were used, 3yds. apart, rapid-fire system, any bird touching the ground inside bounds scored dead. The boundary was 30yds. from the end traps, or about 87x60yds. in size, nicely marked by a 12in. strip of muslin stretched completely on stakes. The birds showed themselves very sharp, quick flyers, above all very twisting ones, and plucky beyond their size, many falling dead out when very hard hit. The shooting was by no means easy, I should say about as hard as good pigeon shooting, and much like it in miniature. Mr. Elliott won first average on sparrows and his showing was 89 per cent. Different loads and different styles of shooting prevailed. Dr. Moore ("J. Snipe") attracted much comment by his brilliant but risky style of snapping the bird the instant the trap was sprung. As a single-barrel sparrow shot I suppose Dr. Brittan ("Partington") would be hard to beat.

An alleged road house provided an alleged lunch at Indianapolis shoot, but the lunch was of the all too common kind, a sort to make one lose the integrity of his moral character. Shooters and shooting would be better off if more attention were given to the amenities and less to the scramble for that same old ten-bird, one-dollar, get-ready-your-next-squad sweepstakes. The details of the tournament, however, showed skilful and experienced hands, and everything moved along in a way quite satisfactory to the shooters. One feature I think quite worthy of notice, and that is the way in which Mr. W. B. Allen kept the cashier's records. He has a system of his own by which the men of each "hole," or first, second, third, etc., are entered up together as soon as the squad cards are in in a book spaced for that purpose. He thus has the winners classed and under his eye, and figuring the moneys after the last squad starts firing, he apportions each purse to its proper column and can hand a winner his money the instant he asks for it, with the result that the shooting never need wait on the secretary, and that the secretary is never rattled nor confused. Mr. Allen was alone at his desk, took all the entries, paid out all the cash, and at the end of each shoot had all the records copied in and up to date. He says he can run 200 shooters as well as 30, and I must say I have never seen his equal behind the cashier's desk at a tournament, either for speed, accuracy or neatness.

The greater part of the shooters left for home Thursday evening, and at that time it was thought that Friday would have no attractions of consequence except an individual match, 50 targets, 25 known angles, 25 unknown, $50, between Mr. H. A. Comstock, of Indianapolis, and Mr. J. P. Easton, of Monroeville, O.

Prizes for average were open to all shooters participating in all programme events, 5 per cent. of all purses, after deducting the price of the birds, being set aside for this purpose, divided 50, 30 and 20 per cent. Average moneys were awarded as follows:

First day, first average, M. W. Thompson, 85½ per cent.; second, Dr. Britton, 82½ per cent.; third, J. P. Easton, 81¾ per cent.

Second day, first, J. P. Easton, 84½ per cent.; second, M. W. Thompson, 82⅝ per cent.; third, Dr. Britton, 79⅛ per cent.

Grand averages were awarded in order as follows: M. W. Thompson $15, J. P. Easton $10, Dr. Britton $5, Ed Voris $5, W. W. Washburn $5.

J. A. R. Elliott won first average on sparrows, 89 per cent. Dr. Britton won a special prize, a fly-rod, for longest run on sparrows, single-barrel shooting, the run being 17. He also won $10, special for longest run on sparrows, both barrels. Following are the scores of the tournament:

*Tuesday, First Day, Oct. 4.*

All targets bluerocks:

No. 1, 10 singles, $1.25: Washburn 10, Thompson 9, Voris 9, Martin 9, J. A. R. Elliott 7, Mumma 7, Park 10, Richard 9, Snipe 9, Geo. Elliott 8, Kellar 7, Hershey 7, Partington 9, Lockwood 9, Mills 9, Shobe 8, Easton 7.

No. 2, 10 singles, $1.40: Lockwood 9, Thompson 8, Kellar 8, J. A. R. Elliott 7, Voris 7, Mumma 6, Shobe 9, Partington 8, Geo. Elliott 8, Washburn 7, Mills 7, Snipe 4, Hershey 9, Park 8, Easton 8, Richard 7, Grube 7, Thomas 4.

No. 3, 12 singles, $1.50: Kellar 11, Park 10, Voris 10, Thompson 9, Lockwood 8, Mumma 4, Washburn 11, G. Elliott 10, Snipe 10, Richard 9, Easton 8, Mills 2, Grube 11, Hershey 10, Partington 9, J. Elliott 9, Shobe 6.

No. 4, $25 guarantee, 15 singles, $2: Easton 15, Thompson 14, Lockwood 13, G. Elliott 11, Voris 10, Mumma 7, Kellar 14, Washburn 13, Genle 12, Shobe 11, Hershey 10, Park 14, Partington 12, Richard 12, Snipe 10, Grube 9.

No. 5, $25 guarantee, 15 singles, $2: Richard 14, G. Elliott 13, Lockwood 13, Gentle 12, Park 12, Kellar 10, Shobe 11, Hershey 13, Thompson 13, Voris 12, Mills 11, Snipe 14 Partington 13, Washburn 12, Grube 12, Easton 10.

No. 6, 20 singles, $2.25: Washburn 19, Lockwood 18, Park 17, Thompson 14, Richard 13, Voris 14, Easton 17, G. Elliott 16, Hershey 14, Shobe 11, Thomnson 18, Kellar 17, Partington 16, Grube 13.

No. 7, 15 singles, $2: Partington 14, Richard 13, Voris 12, Park 10, Neve 8, G. Elliott 7, Easton 14, Shobe 13, Washburn 12, Snipe 10, Hershey 8, Keller 13, Thompson 13, Funk 10, Lockwood 10, Grube 7.

No. 8, 15 singles, $25 guarantee, $2: Thompson 15, Easton 13, Lockwood 11, Funk 10, Mills 9, Partington 8, Voris 14, Snipe 11, Hershey 10, Kellar 10, Craft 9, Loehr 7, Park 13, Gentle 11, G. Elliott 10, Richard 10, Washburn 9, Shobe 5.

No. 9, 15 singles, $25 guarantee, $2: Partington 15, Shobe 13, Hershey 12, Park 12, Neve 11, Marsin 9, Thompson 14, Lockwood 12, Easton 12, Funk 11, G. Elliott 10, Snipe 8, Washburn 13, Craig 12, Kellar 12, Thomas 11, Voris 10, Loehr 6.

No. 10, 25 singles, $2 50: Park 23, Neve 21, Elliott 19, Voris 19, Thompson 19, Loehr 10, Shobe 23, Fund 20, Richard 19, Washburn 19, Mills 16, Keller 21, Easton 20, Lockwood 19, Partington 19, Hershey 15.

No. 11, 25 singles, $25 guarantee, $2: Comstock 14, Washburn 13 Gentle 12, Partington 12, Easton 11, G. Elliott 10, Park 9, Keller 14, Thompson 13, Voris 12, Neve 12, Loehr 10, Shobe 10, Funk 6, Richard 13, Lockwood 12, Snipe 12, Craig 11, Quail 10, Mills 9.

No. 12, 16 singles, $25 guarantee, $2 entrance: Lockwood 14, Thompson 14, Keller 13, Comstock 13, Hershey 12, Boehr 11, G. Elliott 11, Easton 11, Funk 11, Richard 11, Washburn 11, Quail 10, Craig 10, Voris 10, Partington 10, Park 9, Shobe 8.

No. 13, 50 singles, $3, $12 added: Park 36, Easton 44, Partington 43, Voris 41, Anson 40, Shobe 39, Thompson 39, Keller 39, J. M. Elliott 38, G. Elliott 36, Washburn 35, Loehr 35.

*Second Day, Wednesday, Oct. 5.*

No. 16, 10 singles, $1.25 entrance: Easton 10, G. Elliott 8, Voris 8, Partington 8, Thompson 7, Lockwood 7, Washburn 7, Keller 6, Shobe 6, Park 6, Fugate 6, Richard 8.

No. 17, 12 singles, $1.50 entrance: Fugate 11, Shobe 10, Thompson 10, Lockwood 10, Easton 9, Richard 9, Voris 8, Partington 8, Washburn 8, Keller 8, Park 8, G. Elliott 7.

No. 18, 15 singles, $25 guarantee, $2 entrance: Park 14, Easton 13, Keller 13, Taylor 13, Lockwood 12, Thompson 12, Voris 12, Partington 12, Washington 12, Washburn 12, Richard 12, Fugate 10, Elliott 10, Du Bray 10, Thomas 9, Mills 7, Shobe 6.

No. 19, 15 singles, $2 entrance: Thompson 15, Taylor 13, Partington 13, Shobe 12, Park 12, Voris 12, Richard 12, Washburn 12 Fugate 11, Lockwood 11, Easton 11, Keller 11, G. Elliott 10, Du Bray 8.

No. 20, 30 singles, $2.75 entrance: Easton 29, Partington 27, Washburn 26, Keller 26, Park 25, Voris 24, Thompson 23, Lockwood 22, Shobe 22, Elliott 21, Du Bray 18.

No. 21, 15 singles, $25 guarantee, $2 entrance: Voris 15, Thompson 14, Shobe 13, Taylor 12, Easton 12, Richard 12, Du Bray 12, Fugate 11, Washburn 11, Keller 11, Partington 10, Bee 10, Mills 7, Park 6.

No. 22 15 singles, $25 guarantee, $2 entrance; Richard 14, Partington 14, Taylor 13, Keller 13, McVey 12, Fugate 12, Voris 11, Bee 11, Eason 11, Washburn 11, Park 10, Shobe 10, Thompson 8, Du Bray 8.

No. 23, 20 singles, $25 guarantee, $2.25: Thompson 19, Beck 16, Shobe 16, Washburn 14, Partington 10, Bee 18, Taylor 16, Fugate 15, Du Bray 11, Easton 17, Richard 16, Keller 15, Voris 10.

No. 24, 15 singles, $25 guarantee, $2: Easton 14, Keller 12, Thompson 11, Fugate 9, Richard 14, Voris 12, Partington 11, Shobe 11, Neve 9, Beck 13, Bee 12, Washburn 11, Mills 10.

No. 25, 10 singles, $1.30: Park 10, Shobe 8, DuBray 8, Taylor 7, Richard 7, Fugate 6, Keller 4, Lockwood 9, Thompson 8, Beck 8, Bee 7, Snipe 7, Easton 6, Mills 8, Washburn 8, Voris 8, Partington 7, Funk 7, Neve 5.

No. 26, 25 singles, $3, $5 added: Partington 24, Park 21, Shobe 21, Snipe 19, Du Bray 17, Easton 23, Fugate 21, Keller 20, Beck 18, Funk 17, Thompson 22 Richards 21, Voris 19, Washburn 18, Mills 11.

No. 27, 15 singles, $2: Anson 14, Washburn 13, Thompson 12, Richard 12, Shobe 11, Funk 10, Snipe 14, Park 13, Lockwood 12, Voris 12, Bee 11, Neve 7, Du Bray 13, Partington 12, Fugate 12, Easton 11, Keller 10. Kerr 7.

No. 28, 15 singles, $25 guarantee, $2: Shobe 15, Easton 12, Partington 12, Du Bray 11, Lockwood 10, Ducker 9, Snipe 14, Keller 12, Richard 12, Thompson 11, Martin 10, Fugate 8, Washburn 12, Bee 12, Anson 11, Voris 10, Quail 9.

No. 29, 10 singes, $1.25: McVey 10, Anson 9, Voris 9, Park 8, Du Bray 7, Keller 6, Fugate 10, Shobe 9, Thompson 9, Richard 8, Neve 7, Bee 3, Easton 9, Snipe 9, Partington 8, Washburn 7, Quail 6.

175 MONROE STREET, Chicago. E. HOUGH.

### Live Birds at Hackettstown.

ON Tuesday, Oct. 4, pursuant to an invitation sent out by J. L. Smith, a number of sportsmen assembled at the grounds of the Hackettstown (N. J.) Gun Club for a little divertisement in the way of live bird shooting. The weather condition from 1 P. M., when the sport began, and 4:30, were favorable, the sun shining brightly, and there being enough wind to make the bird feel exceedingly lively. At 4 P. M. the clouds began to gather, and half an hour later the wind increased to a gale, while for half an hour or more the rain came down in sheets, driving everybody to shelter.

Among those present were Mr. and Mrs. M. F. Lindsley, of Hoboken; John Riggott, of Rockaway; George Baldwin, of Minneapolis, Minn.; and Mr. Stewart, of Chatham. The birds were a rattling good lot and some fine work was shown. The shooting was done from 5 traps, 28 and 30yds. rise. Nos. 1 and 2 at 4 birds, $3 entry; Nos. 3 and 4 at 7 birds, $5 entry, while No. 5 was two misses out, $3 entry, one money. In the other events there were three moneys. The scores:

| | No. 1 | No. 2 | No. 3 | No. 4 |
|---|---|---|---|---|
| Lindsley | 2112—4 | 0122—3 | 0112222—6 | 2212222—7 |

## Riverside Gun Club Tournament.

THE initial tournament of the Riverside Gun Club was held at Red Bank, N. J., on Oct. 5 to 7 inclusive, and like other tournaments of recent date the attendance was very light. The weather of the opening day was clear and cool, with a strong and fishy wind that kept the scores down, the light targets being tossed about in all directions and making the shooting difficult.

The grounds of the Riverside Club are conveniently situated about ten minutes' walk from the Red Bank depot of the New York & Long Branch Railroad, and are well adapted to both artificial and live-bird shooting. The field is perfectly level and is inclosed on three sides with a 10-foot board fence, the front being closed in with wire netting. The foreground is first-class. The club has a neatly appointed club house one story in height. The officers of the club are J. B. Bergen, President; Oscar Hesse, Vice-President; J. P. Cooper, Secretary and Treasurer; M. F. Cornwell, Captain. Keystone targets were used on the first two days, these being charged for at the rate of 2 cents each. There were no handicaps. American Shooting Association rules governed.

The programme of the first day was as follows: Nos. 1, 3 and 9, 10 singles, rapid fire, $1 entry; Nos. 2, 7 and 10, 15 singles, $1.50 entry; No. 5, 20 singles, $2 entry; No. 6, 10 singles, expert rules, $1 entry; No. 8, 5 pairs, $1 entry. The following special average prizes were awarded for all programme events: Wm. R. Hobart first, $3; E. D. Miller second, $2; Oscar Hesse third, $1.

Winners of special merchandise prizes: Event No. 2, six months' subscription to *Sporting Review* to fifth place, won by H. C. White. Event No. 3, 50 Walsrode loaded shells to fourth place and same to fifth place, won by W. R. Hobart and Neaf Apgar. Event No. 5, silver carving set and case to fourth place, won by W. R. Hobart; gun case to fifth place, won by Oscar Hesse. Event No. 7, solid silver match safe to fourth place, won by Oscar Hesse. Event No. 8, box or cigars to first place, divided by Hobart, Cooper, Ivins and Hesse. Event No. 10, pair of rubber boots to third place, won by Hesse. The scores:

No. 15: Smith 5, Cooper 5, Conover 2, Apgar 3, Hesse 7, Miller 6.

*On the Second Day*

the weather was clear and bright, and while the wind was troublesome it was much lighter than on the opening day. The attendance was a little—very little—better than on the opening day. E. D. Miller won first average, Neaf Apgar being second and Chas. Smith third. The special merchandise prizes were won as below: Event No. 2, six months subscription to *Sporting Review* to fifth place, won by J. Cooper. Event No. 3 50 American wood powder shells to third and same to fourth place, divided by Keller, Smith, Miller, Throckmorton, Breintnall, J. Cooper and E. Cooper. Event No. 4, derby hat to team winning fourth place, won by Apgar and Smith. Event No. 5, six months subscription to *American Field* to third place, won by Brantingham. Event No. 7, silk umbrella to third place, won by Hobart. Event No. 8, pair kid gloves to third place, won by R. H. Breintnall. Event No. 10, six months subscription to *American Field* to fourth place, won by Brantingham. The events: Nos. 1, 3, 6 and 9, 10 singles, $1 entry; Nos. 2, 7 and 10, 15 singles, $1.50; No. 5, 20 singles, $2; No. 8, 5 pairs, $1; No. 4, teams of 2 men, 15 singles per man, $2 entry per team. The scores:

No. 1: Breintnall 6, Brantingham 7, Keller 4, Throckmorton 6, Smith 7, Hobart 8, Hesse 7, E. Cooper 6, Apgar 10, J. Cooper 7, Miller 9, Conover 5.

*On Friday, the Final Day,*

when live birds were used instead of targets, the sentiment of Jersey's sportsmen was shown by a largely increased attendance both of contestants and spectators. The day was a delightful one, the air being as soft and balmy as in June, with just breeze enough to help the birds in their flight. At an early hour the shooters began to arrive, and the first event, called at 9:46 A. M., drew out 15 entries. The shooters hailed not only from all parts of the State, but from New York as well. Among them were Edgar Murphy, the blonde giant of the Carteret, Hollywood, Westminster and Country clubs; Phil. Daly, Jr., the young Long Branch expert; J. W. Budd, one of Monmouth County's cracks; W. H. Perrine, of Marlborough, Jersey's old favorite foot racer, and now one of the smooth-bore cracks; R. H. Breintnall, of Newark; Enoch D. Miller, of Springfield; M. F. Lindsley, Mrs. Lindsley ("Wanda"), and Eddy Collins, of Hoboken; George Baldwin, a veteran from Minneapolis, Minn., who never misses a live bird shoot when in Jersey; Leander B. Campbell, of Little Silver, one of the old-time find-trap-and-handle exponents; Richard Sunderman, one of the best shots in the New Jersey Shooting Club; A. Whaymer, H. C. White, "Father" Cornwell, J. Cooper, Jr., E. M. Cooper, Oscar Hesse, R. Gravatt, H. Joline, J. B. Bergen and F. Ivins, of the Riverside Gun Club.

AT THE RED BANK SHOOT.

The birds were but a fair lot, some of course being good, while others were "rank duffers." The shooting was done under American Shooting Association rules, 5 ground traps being used. The first, second and third events were shot under the usual system, but when the fourth event was called it was deemed advisable to shoot the rapid-firing system in order to save time. This was done, much to the disgust of some of the shooters. When event No. 5 was called, this being at 15 birds per man, it was started under the usual system, but on the close of the fourth round the rapid-firing squad system was resorted to as in no other way could the event have been run off before dark. In this event there were 17 entries. When the second squad of 6 men had nearly completed their scores, it was found that there were not enough birds to go around, in fact a half-dozen bird had to be placed in the trap for the last man in this squad. Hence Messrs. E. M. Cooper, Ivins, Cornwell, Sunderman and Miller, who had shot at 4 birds each had their money returned to them, and the 12 men who had finished their full scores received the divisions of the pot, there being 7 men in for first money, 3 in for second and 1 for each third and fourth. Of course the poor quality of the birds was responsible in a measure for the big scores (172 birds killed out of 180) in this event, but it is also safe to say that had the firing been done under other than the rapid-firing system more than 8 birds would have been scored "lost." As a matter of course under this system a bird is called "dead" when it fails and it is scored "dead" unless challenged. Several times in this event when the referee called "dead bird" he would look around firmly expecting some one to challenge the bird, which perhaps was merely scratched, but in no instance did a challenge result. This system applied to live bird events is no test of skill and should be abandoned.

The "luck" in live bird shooting was never better exemplified than on this day. Up to the last round of the final event Edgar Murphy had not lost a bird and was almost safe for the handsome leather gun case offered by Fred Quimby for the best average in all events, while J. W. Budd was close behind him with only one bird lost. Murphy's last bird chanced to be a good one, which dodged the first load but caught the second at long range, carrying it over the field in good shape. Just as the people were about to say "too bad," expecting the bird to go over the boundary it dove down, struck the wire fence and fell inside, dead as a mackerel. This made Murphy the owner of the gun case, which was one of Quimby's handsomest and best. Budd, of course, got second average prize, a beautiful cottage clock, donated by B. F. Wilbur, of Red Bank.

Speaking of luck, this same wire fence mentioned above was responsible for the scoring "dead" of at least a dozen birds, which would certainly have gone over a board fence. They did not see the wire netting, however, and when they struck it were so shocked as to be unable to rise. This, of course, applies to birds which were wounded. Phil. Daly, Jr. scored five birds in this way. E. M. Cooper, Phil Daly and George also scored one bird each which they shot at, and then in gathering drove into the pockets of the target trap screens. Below are the details of the day's work:

No. 1, 5 birds, $4 entry, four moneys:

| | | | |
|---|---|---|---|
| J W Budd | 12112—5 | R Edgarton | 11111—5 |
| A Whaymer | 21010—3 | R Gravatt | 00210—2 |

C. H. TOWNSEND.

## Garfield Gun Club.

CHICAGO, Oct. 1.—To-day closes our season of shooting for medals, which have been contested for twenty-one times. The winter to come will not be one of inactivity by any means, as live-bird shooting will be a prominent feature with target shoots when weather will permit, so life will be endurable to us gun cranks after all. However, it may be with tournaments in poor attendance and lack of interest as many think is the case, it is not so in this part of this country, for new and strong amateur clubs are being organized right along. Our attendance at every shoot is over 60 per cent. of total membership. Below are scores:

No. 1, 15 singles: Sidway 7, Pitz 8, "Cop" 10, Brown 9, Hodson 9, Tefft 12, Skinner 7, J. Northcott 5, O'Neil 9, Bowers 9.

No. 2, 10 singles: Sidway 7, Pitz 7, "Cop" 8, Brown 6, Hodson 3, Tefft 10, J. Northcott 4, O'Neil 7, Bowers 5.

No. 3, 25 singles: Drake 8, Lauterbach 17, Hicks 21, Richards 20, Young 13.

No. 4, 10 singles: Baird 5, Campbell 7, J. M. Meek 8, Conover 6, Paterson 7.

Shoot for medals, at 20 singles:

| | |
|---|---|

Hicks won A class medal, Paterson won C class medal and Steck won B class medal.

GEO. H. BROWN.

## New Utrecht Rod and Gun Club.

THE members of the New Utrecht Rod and Gun Club held their weekly competition for the bluerock class medals at Woodlawn Park, Gravesend, L. I., on Saturday, Oct. 1. D. Benuett won the gold badge, and C. W. Wingert the silver one. The scores:

## Match Shoots.

SEVERAL match shoots took place at Dexter Park, L. I., on Saturday, Oct. 1. The first was between F. Ibert and M. Schoettler for $50 a side at 50 birds each, 25yds. rise. M. Schoettler won by the score of 35 to 28. P. J. Eppig and F. Ibert then shot off another match which the latter won by the score of 20 to 16. Several small matches then followed. The scores:

## Fountain Gun Club.

THE regular monthly shoot of the Fountain Gun Club was held at Woodlawn Park, L. I., on Wednesday, Oct. 5. Ten members were present and competed for the annual prizes, the best averages to count, at ten birds each, club handicaps. A. Eddy was the best scorer with ten straight. In the sweepstakes the money was pretty evenly divided. The scores:

Club shoot:

## Lynchburg in a Gale.

LYNCHBURG, Va., Oct. 5.—The Lynchburg Club did not have a good time yesterday at the weekly shoot. There was too much wind. Only shot the following events: No. 1, 30 singles: Darwin 25, Moorman 24, Cleland 19, Terry 21, Nelson 21, Smith 12, Hamner 12, Stearns 21.

No. 2, 9 singles and 3 pairs: Darwin 14, Moorman 11, Cleland Terry 8, Hamner 7, Stearns 10, Smith 4, Nelson 11.

## Tournament at Dunlof, Ia.

DUNLOF, Ia., Oct. 5.—The tournament of the Dunlof Gun Club commenced yesterday morning with a fair attendance. The weather was warm and pleasant and the contests close and exciting. Messrs. Dean and Barrett of the Dunlof Gun Club gave the visiting sportsmen a banquet Tuesday night, and very ably entertained their guests. Harry McMurchy, of Fulton, N. Y., was on hand showing the merits of two elegant Smith ejectors, and is as good looking as ever. Among the visiting sportsmen were Messrs. Arff, Abbott and Paul Chester, Oak, Ia.; H. J. and E. D. Trotter, Kingsley, Ia.; Parmalee, Read, Nason, Fogg, Townsend and Smith, Omaha, Neb.; Schroeder, Arnold, Rochford, Specie and Mills, Columbus, Neb.; Ackerman and Turner, Staunton, Neb.; Dixon, Council Bluffs, Ia.; Campbell, Denison, Ia.; McMurchy, Fulton, N. Y., and Budd of Des Moines. The score:

Eight live birds, entrance $5.50, four moneys:

C. W. BUDD.

## Riggott again Defeats Class.

THE memories of Columbus and 1492 evidently took a strong hold on the sportsmen of New York and New Jersey on Oct. 11, as only a small number of them appeared at Dexter Park, L. I., to witness the return match between Frank Class, of Morristown, and John Riggott, of Rockaway. The day was a fine one for sport albeit had the wind been stronger it would have been still better. While the attendance was small there were still some noted sportsmen present, among them being Dr. P. Jay, of Warrenville, N. J.; Wm. S. Canon, of Newark, popular one-armed expert; J. Cockefair, one of Bloomfield's enthusiasts; Harry Piper, J. Trimmins and R. Hathaway, of Morristown; Geo. S. Atwater, cycle expert and target smasher; Jas. Baker, of Ridgefield; Geo. Baldwin, of St. Paul, Minn.; Miss Jennie Smith; of Morristown; Chas. Hubbell, of Brooklyn; Jas. E. Wheaton and Chas. Hedden, of Newark.

The birds were a good lot of flyers, very few having to be flushed, and even these few flying hard once they caught their wings. It was 2:20 P. M. when the match began, Class being first to the score. J. Cockefair was referee, C. A. Dellar scorer, and J. E. Wheaton trap puller. The conditions were 100 live birds per man, Hurlingham rules to govern, for a purse of $250 a side. Both men used 12-bore guns and stood at 30yds, rise. Both killed on the first round. On the second round Class got a fast right quartering bird, and when he pulled his right trigger both barrels went off, and he had the joy (?) of seeing the bird sail away to safety. Riggott lost on the same round. Class had the same accident as above on his 45th and 90th birds, although each of these was killed.

On the first quarter the score stood 24 for Riggott to 23 for Class; on the half Class had killed 48 to Riggott's 44; on the third quarter they were tied on 66 kills each, and at the finish Riggott had 89 kills to Class's 86. On the third 25 Class lost no less than 7 birds, and some of them easy ones at that. During the race he lost one and Riggott three dead out of bounds. Class's 89th bird was an ugly twister, which he checked with his first and grassed with the second. When Billy Mills tried to gather the bird, however, it recovered and winged away over the fields. The score of the shoot is shown in detail below:

| | |
|---|---|
| J F Class | 2012121111222122211o121—23 |
| | 2111111122111212121221211—25 |
| | 0010111012221210001122222—18 |
| | 2112220002121021212102211—20—85 |
| J Riggott | 2021212212121211211211222—24 |
| | o011112112220021212220o—20 |
| | 2002120112212122112112121—22 |
| | 1122222222211112122121r112—23—89 |

The exceptionally good birds were Class's 22d, 24th, 61st, 79th, 80th and 89th; Riggott's 8th, 25th, 81st and 94th.

After the race a Jersey sweep at 4 birds each, $3 entry, was shot. The scores:

| | | | |
|---|---|---|---|
| C Hubbell | 1121—4 | George | 1111—4 |
| W S Canon | 0122—3 | P Jay | 1112—4 |
| G S Atwater | 0100—1 | J L Leonard | 0001—1 |
| R Hathaway | 0222—3 | Jay Tea | 0102—4 |

C. H. TOWNSEND.

## Rochester Rod and Gun Club.

ROCHESTER, N. Y., Oct. 6.—Herewith find scores made at our tournament on Oct. 5. The weather was chilly, and early in the day we had a snow squall, and later it was cloudy with a strong westerly wind, which caused the birds to take erratic flights. Kingbird targets were used. We had with us shooters from Syracuse, Lyons, Williamson, Batavia, Brockport, Clyde, Marion, and other places hereabouts. Charles H. Mowry, of Syracuse, won first average, by breaking 124 out of 130 or 95⅗ per cent. Second average went to L. V. Byer, of Rochester, with 94⅘ per cent.; third to W. C. Hadley, of Rochester, on 93⅓ per cent. Byer made a sprint for first average toward the finish, breaking 77 straight, but was unable to overtake Mowry. The scores follow:

No. 1, 10 kingbirds: Byer 9, Borst 9, Hadley 9, Mowry 9, Foley 9, Richmond 9, Meyer 9, Luther 9, Norton 8, Hicks 8, Tassell 8, Stewart 8, Lefever 8, Truesdale 7, Dugnid 7, F. Smith 6, McVean 6, Bruff 6 J. Rissinger 5, A. Rickman 5, B. Rickman 4.

No. 2, 15 kingbirds, entry $1.50: Borst 15, Byer 14, J. Rissinger 14, Mowry 14, Stewart 14, Norton 13, Truesdale 13, Bruff 13, F. Smith 13, Tassell 13, Hicks 13, Burns 13, Lane 13, Tozier 13, Lefever 13, Hadley 12, McVean 12, Foley 12, Meyer 12, Duguid 12, Hammond 11, A. Rickman 11, Quirk 11, Luther 11, Hickman 10, Richmond 10.

No. 3, 15 birds, entrance $1.50: Bruff 15, F. Smith 15, J. Rissinger 15, Stewart 15, Lefever 14, Dugnid 14, Hicks 14, Mowry 14, Swiveller 14, Truesdale 13, Tassell 13, Hadley 13, Richmond 13, Meyer 13, Quirk 13, Tassell 13, A. Rickman 13, Byer 12, Van Ostrand 12, Morton 11, Borst 11, Hammond 11, Lane 10, McVean 10, Luther 9, Elliott 9, Roach 5.

No. 4, 20 birds, entrance $2.40: F. Smith 20, Swiveller 20, Tassell 20, Totzier 20, Horton 19, Hadley 19, Mowry 19, Lane 19, Meyer 19, Hicks 19, Borst 18, J. Rissinger 18, Truesdale 18, Byer 18, Bruff 17, Luther 17, Richmond 17, Stewart 17, Van Fstrand 17, Dugnid 16, Lefever 14, Dick 14, McVean 13, Don 6.

No. 5, 10 birds, entrance 70 cents: Lather 10, J. Rissingen 10, Hadley 10, Byer 10, Mowrey 10, Morton 9, Bruff 9, Hicks 9, F. Smith 9, Burns 9, Burnett 9, Musselman 9, Baker 9, Quirk 9, Duguid 9, Stewart 9. Truesdale 9, Swiveller 9, Richmond 8 A. Rickman 8, Tassell 8, Lane 8, Elliott 8, Meyer 8, Schmitt 8, Macomber 8, McVean 7, Borst 7, B. Rickman 7, Mann 7, Dick 7, Porter 7, S. Porter 7, Hickman 6, Williams 6, Spaulding 4.

No. 6, merchandise shoot, 20 birds, entrance price of birds: Stewart 20, Byer 20, Burns 20, Foley 20, C. Rissinger 20, Norton 19, Burnett 19, Mowry 19, C. Elliott 19, Tassell 19, Hickman 19, Hicks 19, F. Elliott 19, McIntyre 19, Swiveller 18, Hadley 18, Luther 18, Macomber 18, J. Rissinger 18, Perry 18, Williams 17, F. Smith 17, Baker 17, Musselman 17, Borst 17, Hoehn 17, Hammond 16, Bruff 16, Truesdale 16. Schmitt 16, P. Porter 16, Palmer 16, Lefever 15, Lozier 15, Meyer 15, Van Ostrand 15, Richmond 14, A. Rickman 14, Quirk 13, Mann 13, Agate 13, Don 12, S. Porter 12, McVean 12, Lane 12, B. Rickman 11, Spaulding 11, Roach 11.

Ties on 20 were shot off at 15 targets each, won by Stewart; on 19 at 5 each, won by Mowry: on 18 at 9 each, won by Williams; on 16 at 5 each, won by Truesdale: on 15 at 10 each, Meyer winner; on 14 at 5 each, Richmond; on 13 at 5 each, Mann; on 12 at 2 each, Lane; on 11 at 5 each, B. Rickman winner.

No. 7. 15 birds, $1.50: Hicks 15, Byer 15, F. Smith 15, Mowry 15, Meyer 15, C. Rissinger 15, Swiveller 15, Hadley 15, Perry 13, P. Porter 14, Baker 14, Williams 14, Borst 14, Richmond 14, Truesdale 14, Foley 13, Van Ostrand 13, Tassell 13, Stewart 13, J. Rissinger 13, Bruff 12, Norton 12, Luther 12, Schmitt 12, Lefever 12, Burnett 11, Musselman 11, Palmer 11, Lane 10.

No. 8, 25 birds, entrance $3:

## Shooting Match at Dexter Park.

A PRIVATE match was shot off at Dexter Park on Friday, Oct. 7, between W. Hartye and F. E. Thompson, both members of the Atlantic Rod and Gun Club. Each one shot at 50 live birds, 25yds. rise, under modified Hurlingham rules. W. Hartye was the winner by a score of 38 to 35. Several sweepstakes were shot off after the match to wind up a good day's sport. The scores:

## Crescent Gun Club.

ONLY nine members of the Crescent Gun Club were present at the regular monthly shoot held at Dexter Park, L. I., on Thursday, Oct. 6. The contest is for the best averages of the season and extra club prizes at each shoot. Walter Gilman, the president of the club, was the only straight scorer with 7. He was also a winner in the sweepstakes shoots that followed. The scores:

Club shoot:

| | | | |
|---|---|---|---|

## DRIVERS AND TWISTERS.

Saturday will attract a big crowd of shooters to the grounds of the East Side Mutual Gun Club in Newark and some of the liveliest kind of shooting may be depended upon. The main attraction will be the ninth monthly team contest of the New Jersey Trap Shooter's League for which ten teams of five men each will enter. In conjunction with the above there will be a regular program of sweepstake events to begin at 9 A. M. The team shoot will start at 2 P. M. The East-Side-Mutuals have well-appointed grounds in rear of Weidenmoyer's Woods on Hamburgh place, with ample facilities for catering to a big crowd. Ten blue rock expert traps will be used, with North's electric pull and blue rock targets. The final shoot of the League will be held on the grounds of the Maple-Wood Gun Club in november.

The following notice has been received from H. C. Saul, secretary of the Charter Oak (Iowa) Gun Club: On account of the Omaha tournament being held October 26—27—28, and their dates conflicting with ours, we have changed the date of our shoot to Monday and Tuesday October 24 and 25 (one day earlier than first announced). Charter Oak first, Omaha second. Come and have a good time with such sportsmen as Chas. Budd, Frank Parmelle, Geo. Hughes, J. B. Smith, C. C. Williams, Ted Ackerman, Trotter Bros., Frank Dean, W. E. Nason, F. W. Fogg, Ed. Barrett, W. H. Phelps, Dr. Kibbey, Hank Bruner, Henry Meeves, O. M. Campbell, Geo. Lyons, Lou Baer, Jack Stoufer, Dr. Arnold, J. S. Wells, G. Schrader, G. B. Speice, J. C. Read, Pat Quirk, Tom Ratchford, Brockelsby and others.

The Charter Oak (Iowa) Gun Club offers a splendid program for October 24 and 25, and gives a winning chance to any one who shoots fairly well. On the first day the program events are 15 targets, $2 entry, $5 added; eight live birds, $5 entry; 20 targets, $3 entry, $5 added; 15 targets, straightaway, $3 entry; 20 targets, $3 entry; 10 live birds, $7 entry, $10 added; 10 pairs targets, $3 entry; 8 live birds, $5 entry; 25 targets, $4 entry, $25 added. Second Day.—10 targets, $2 entry; 15 targets, unknown angles, $2.50 entry; 20 targets, $3 entry, $5 added; 10 pairs targets, $2.50 entry. $5 added; 10 pairs targets, $5.50 entry; 10 live birds, $7 entry; 15 live birds, $15 entry, $25 added; 20 targets, $4 entry.

Martinsburgh, West Virginia, will be the objective point for an army of target shooters on Tuesday and Wednesday next a private letter informs us that each of the eight cities who have combined to run this shoot has guaranteed to furnish from six to ten shooters so that the entries should not number less than fifty in any event. Over $200 will be added to the purses ond this along with a valuable list of merchandise prizes will prove very attractive and keep the party together for the two days. H. M. McVicker of Winchester is one of the prime movers in the arrangements.

William Tell Mitchell, the well-known expert of Lynch Station, V writes that he will be unable to come North to shoot any pigeon matches until after Christmas. Previous to that time he will be busy with field shooting and field trial work. In the meantime, however, he states that he stands ready to shoot against almost anyone who happens down his way.

The big shoot to be held in the South next Tuesday and Wednesday, is attracting a great deal of attention in all sections, and several Northerners will be on hand. Don't forget the dates, October 18 and 19, and the place, Martinsburgh, West Virginia, (instead of Martinsburgh, Va., as stated last week.)

The following officers have been elected by the Columbia (Ga.) Rod and Gun Club: President, Frederick Bucher; Secretary, Jeremiah Koch Treasurer, Edwin S. Stair; Quartermaster, L. W. May; Assistants, W. M. Borden and Dr. W. G. Taylor; Master of Transportation, Chas. A. Baker.

The annual target tournament of the Somerville (N. J.) Gun Club to be held on Wednesday and Thursday is creating considerable interest and the chances are that a large number of shooters will be present. Somerville is on the main line of the N. J. Central railroad and the grounds are close to the depot.

The Reading Shooting Association announces a sparrow shoot to be held at the Black Bear Inn grounds in Reading, Pa., on Oct. 27. The club has about 600 sparrows on hand and a big crowd of shooters and fine sport is anticipated.

James W. Clinton, secretary of the Standard Keystone Target and Trap Company, was in town early this week, en route to New London. Mr. Clinton has been on the road for a couple of weeks, and reports big sales of targets and traps.

A contest for a silver cup and purse emblematic of the championship of Maryland, open to residents of the State only, will be shot at Action's Park, on November 24. There are already a score of entries.

The tournament of the Riverview Gun Club of Amsterdam, N. Y., will be held on Columbus Day, October 21, instead of on October 20, as previously announced.

The Omaha and Raymond Gun Clubs of Omaha, Neb., closed their season on October 1. The Bemis Park Gun Club will close on October 27, and the Syndicate Park Gun Club on October 30.

The Highland Gun Club will hold its annual tournament at Des Moines, Iowa next tuesday, Wednesday and Thursday and a very attractive program has been issued.

The Wawaset Gun Club badge was won on October 1 by H. G. Buckmaster, with a score of 25 targets straight. R. Miller was second, with 24; C. M. Bucdmaster scoring 23.

W. E. Cross, of Amsterdam, N. Y., has offered a handsome badge to be given to the snooter making the best average during the tournament on October 21.

Joseph Leininger of Fremont, Pa., and Grant Schoffstall of Blackwood, Pa., will shoot a match at live pigeons, at Newtown, on October 22, for a $400 purse.

A pigeon match will be shot by H. F. Gable of Deer Creek, Pa., and Fred Coleman of Higginsville, Pa., on October 22, at Reimer's Hotel.

John Erb's grounds will be the scene of another fifty-bird sweep, $50 entry, in the near future. An open contest at 100 live birds per man, is also proposed.

The Machimoodus Gun Club of Moodus, Conn. look for a big time on October 25-26 when the Interstate tournament will be held on their grounds.

The Interstate Shoot at Moodus on Oct. 25 and 26 promises to be a successful affair at which Connecticut shooters will turn out in force.

A portion of the same party which made a success of the Peekskill shoot saved the Red Bank affair from being a flat failure.

R. H. Brientnall of Newark, N. J. has returned from his trip to the Yellowstone region and reports having had a splendid time.

The wire fence on the Red Bank grounds fooled a number of birds and saved many of them for the shooters.

The majority of the live bird tournament programs show too many events, and the start of the shooting is delayed too long.

The open sweepstakes at Saturday's New Jersey State League shoot are expected to draw over fifty entries.

Edgar Murphy says it is disgusting to shoot live pigeons under the rapid-firing system. And he hits the nail on the head.

J. A. Hartner's sixth annual tournament will be held at Bishop's Driving Park, Baltimore, Md. on Thanksgiven Day.

The monthly shoot of the Essex Gun Club of Newark, N. J. will be held at Marion next Thursday.

Jack Parker's handicap is the favorite in the West and is steadily gaining friends in the East.

El Reno, Oklohoma, has a gun club, of which G. W. Williams is president and F. W. Van Ness secretary.

A target shoot will be held at Kingston, N. Y., on October 17.

W. R. Hobart had a monopoly on merchandize prizes at Red Bank.

The Westchester (Pa.) Gun Club has disbanded.

C. H. TOWNSEND.

## Easton—Comstock.

INDIANAPOLIS, Ind., Oct. 8.—I inclose herewith score of a match between J. P. Easton, of Munroeville, O., and H. A. Comstock, of this city, at U. S. Trap Shooting Park, Friday, Oct. 7, for $50 a side, loser to pay for birds. Each first shot at 25 bluerocks, known angles; then 25 same, known traps, unknown angles. The result is shown, and the friends of Mr. Comstock were greatly surprised at his poor work, as he is ordinarily close to a 90 per cent. shot, and especially excellent in the field:

| | |
|---|---|
| J P Easton—Known angles | 1110111101111111111101100—19 |
| Unknown | 1101101111111111111111100—21—40 |
| H A Comstock—Known angles | 1101011111010001101111001—15 |
| Unknown | 0110100000C0100111010100—11—27 |

Judges—M. W. Thompson for Easton; Chas. Polster for Comstock. Referee, Dr. O. F. Britton. J. A. Martin, scorer. G. A. Rhodes, puller. W. B. A.

## Chicago Traps.

WATSON'S PARK OPENS.

CHICAGO, Ill., Oct. 8.—John Watson issues a circular letter announcing that his new park at Burnside is now open and ready for business, the King automatic traps being in shape and a few husky pigeons clamoring in the barns. The club days for regular shoots are announced as follows:

Fort Dearborn Club, first Thursday of each month; Chicago Club, first Friday; South Chicago Club, second Wednesday; Prairie Club, second Thursday; The Gun Club, second Friday; Pullman Club, second Saturday; Chicago Club, third Tuesday; Audubon Club, third Wednesday; Lake County Club, third Saturday; Gun Club, last Saturday. These are the days formerly used, and I believe are all agreed upon, except in the case of The Gun Club, which will probably send in affirmative reply soon.

It is hoped that Mr. Watson's new grounds may prove as full of sport as his old ones, which have been the scene of many interesting contests. There are few shooting grounds which have the reputation of Watson's Park, and no grounds on earth have a cleaner one. Gate money fakes are barred by John Watson, as they should be, and, so far as I know, a crooked race was never shot upon his grounds. Certainly the first suspicion of crookedness would not a second time be attributed to the rugged old Scotchman himself. I have often thought that a reputation like John Watson's is a good thing to have. This came to me forcibly at Indianapolis this week, in the course of a free and general talk with prominent outside shooters like Elliott, Beck, etc. They all said John Watson was good enough referee for them, and added that while the Chicago pigeon game was a hard one to go against it was as straight and square as anything on earth. I never heard any shooter in the country say anything different from that, nor will it ever be said, either of the old park or of the new. About February the sign of the goose is in the ascendant. Then expect storms, squalls and high jinks generally at the Chicago pigeon grounds.

THE MT. STERLING SHOOT.

From all that one can gather from shooters just back from the shoot at Mt. Sterling, Ky., there seems to have been a merry time at that burgh. The management was not out for its health, but for cold, hard coin, and it didn't care who knew it. Every shooter was charged 50 cents admission every time he came on the grounds. Targets were shot at 5 cents apiece (a profit of about $44 a thousand), and if there had been any live birds they probably would have been trapped at $1 each. I have not heard any shoot critised so severely as this one, and there seems no doubt that shooters went there under misapprehension. If it were not reprehensible for a management to advertise one thing and offer another, I should enjoy this spectacle hugely. The wolfers were wolfed, and they didn't like it. The "gang," not out for their health, met a management not out for its health, and didn't like it. I don't, for the most part, waste much sympathy on the "gang" who are always eagerly on the lookout for a nice lot of amateurs to eat up, but in this case the punishment seems too severe to fit the crime, and I weep with those who came back from Mt. Sterling with tears in their eyes over the injuries just suffered.

CALUMET HEIGHTS CLUB.

The committee in charge of arrangements for a gentlemen's guests day at Calumet Heights Club, in the lake shore country, has set the date for Oct. 16, and offers the following report:

"The purpose is to increase the membership of the club and incidentally to give the different members an opportunity to display their individual accomplishments. The programme of the day will consist of shooting at the trap, rifle and revolver shooting at targets, foot races, songs, skirt dances, and a choice selection of music by the "Tin God" quartette. The committee have secured the donation of over a dozen prizes, to be competed for by our guests, a partial list of which is appended: Diamond pin, solitaire shirt stud, single barreled shot-gun, bisque statuette, set of loading tools any gauge, gun cleaner any gauge, 100yds. of linen line, Meerschaum pipe, etc. etc. As this is strictly a gentlemen's day, the members are asked to abstain from bringing the ladies."

GARFIELD CLUB.

Besides target sweepstakes at the grounds to-day, which Secretary Brown kindly reports, there will be live bird shooting at Garfield Club grounds Saturday, Oct. 15, commencing at 10 A. M. sharp. This occasion will fairly conclude the more active season. It will be a pleasant and interesting event in the live bird line.

THAT EJECTOR.

I was very glad to see this week the cheerful face and portly form of Col. A. G. Courtney, agent of the Lefever Arms Co., who is now again on his travels, and looking better than for ten years past, which is saying a great deal. Col. Courtney will spend nearly a week in all in Chicago, and will have time to see all his friends if he hurries. While we were talking he told me the story of his ejector, which, if not newly published, may be newly read by some.

"Yes, we've got an ejector on the Lefever gun," said he, "or did have, though we may have to take it off for all I know. You see, it's too blame dangerous. Now, I was down in Indianapolis not long ago and was standing about forty yards in front of the grand stand at the score, but do you know they barred me from shooting. You see, every time I touched that ejector she'd jerk a shell right back into the grand stand among the people, and it kept them frightened, besides injuring a good many. Law! I didn't mean to hurt anybody, but of course I had to quit. The trouble with our ejector is it's too good; it's dangerous."

Speaking of one gun man you always hear the rustle of another's wings. Harvey McMurchy, agent of those L. C. Smith gun, is also in the village this week, and will remain till next Wednesday unless given twenty-four hours' notice by the town.

Mr. E. H. Kniskern, of the Wilkes-Barre Gun Co., spent a couple of days here this week, and has gone on to Milwaukee. In company with Mr. Northrup, a well-known York State shot, Mr. Kniskern will take a short trip to Minnesota after chickens. A whole lot of people out here don't know how to pronounce Wilkes-Barre. They call it "Wilkeys-Bar," whereas they should call is "Wilks-Barry," to rhyme with "carry." It is a very heathen word.

To-day there will be another clambake and pigeon shoot combination given at Cumberland Lodge in Indiana, the success of the entertainment mentioned last week having been such as to demand an immediate repetition. The Monon route puts on a brand new special car for the occasion. E. HOUGH.

175 MONROE STREET, Chicago.

## Richfield Gun Club Cup.

RICHFIELD SPRINGS, N. Y., Oct. 6.—*Editor Forest and Stream:* Mr. Ed. Annan, Jr., of your city, has kindly donated to the Richfield Gun Club a very handsome solid silver challenge cup, valued at $100. It is artistically lettered and designed and will be a handsome trophy for the one who wins it. The club has dispensed with regular shoots during the boarding season, but will commence the fall campaign under bright auspices, with this elegant cup as an incentive to good shooting. The first regular shoot in each month will be held as a competitive one to decide who shall possess the cup for a month. The member winning it the most times in a year will have his name engraved on it, and as soon as one name appears three times that person becomes the owner of the cup.

## The Acme Gun Club.

THE last shoot of the Acme Gun Club's season was held at Dexter Park, on Wednesday, Oct. 5. The competition was at bluerock targets, 20 to each man for the highest average scores of the season. C. Stuetzle was the highest scorer of the day, but T. Short wins the first annual prize. The scores:

# Answers to Correspondents.

☞ **No Notice Taken of Anonymous Correspondents.**

A. P. A., Minerva, N. Y.—The specimen sent from the Adirondack Preserve Association waters is not wild rice.

R. S.W., Edwards, Miss.—Please give me through your columns some hints about fishing and catching the famous tarpon. Would like to know the kind of rod, reel and line best suited to the purpose, also what kind of bait to use. The waters around my place in Louisiana are alive with them, and although a greenhorn with the rod I am seized with the desire to catch one of these silver kings without serving an apprenticeship on smaller game. Ans. The tarpon and the mode of taking it are described in our Florida number of Jan. 9, 1890. Most tarpon fishermen use a stiff rod, from 5 to 8ft. long, provided with a multiplying reel with a capacity of "600ft. of 12 to 18 thread striped bass line, and knobbed 8-0 Sprout or O'Shaughnessy hook, with braided linen snells, 2 or 3ft. long and ⅛in. diameter." Wire or chain is often substituted for the linen snell. Mullet is used for bait, and the fishing is done on the bottom of quiet, shallow coves and bays. A boat and boatman are essential for this heroic form of fishing, and strong tackle is a prerequisite to success.

SOME anglers labor under the false impression that large dealers and manufacturers charge more for their goods than the keepers of small shops. A glance at our new Illustrated Catalogue and Price List for 1892, which we will mail on receipt of 6 cents to cover postage, will show how much they are mistaken.

BOOKS ON SHOOTING.
New Editions.
The Modern Shotgun.
By W. W. GREENER.
PRICE, $1.00.
The Gun and its Development.
By W. W. GREENER.
PRICE, $2.50.
These volumes have been for some time out of print, and new editions revised by the author have just been received. There is scarcely any one whose utterances with regard to shotguns and rifles are entitled to as much weight as Mr. Greener's, for he has been making these arms for many years. To his great knowledge of them he adds a pleasant and clear style in writing, which adds to the value of his books. Every American who uses a gun ought to read these books. Sent postpaid on receipt of price.
FOREST AND STREAM PUBLISHING COMPANY,

New Edition of Small Yachts.
Now Ready: Small Yachts, Their Design and Construction. By C. P. Kunhardt. A new edition, enlarged and extended to 470 pages of text and illustrations, and 87 full-page plates. Size of page, 14½ x 12½in. Price, $10.00.
As comely as it is practically serviceable to yachtsmen of large as well as small craft.—*Evening Post.*
The new edition should be purchased and carefully studied by any amateur yachtsman who wants to buy or build a boat and is not yet certain as to what he wants.—*N. Y. Herald.*

Use the Winner in the Nitro Trials!
WALSRODE SMOKELESS.
*2,000 shots of Walsrode fired at the tournament of the Riverside Gun Club at targets and live pigeons showed its extreme quickness, great killing power and safety. My score on doubles, breaking 17 out of 20 in a gale of wind was not equalled by any expert. The many orders received from prominent sportsmen present express their opinion. Letters like the following arrive in every mail:*
LYNCHBURG, Va., Oct. 7, 1892.
*O. Hesse, Esq., Red Bank, N. J.:*
DEAR SIR—I gave the shells sent me a fair and careful trial yesterday. With 1⅛ oz. No. 8 chilled shot the pattern and penetration at 40yds. was excellent. There was no recoil, and less report than I expected, the guns used being a Parker 7½lbs. and a Greener 7½lbs. Some of the Nitro powders leave an objectionable residue that works its way into the mechanism of the gun. I found this powder free from that objection. I think it a *most excellent powder.* The gun club members who were with me are very much pleased with it.
Very respectfully, F. M. DAWSON.
*Send for my powder loaded shells.*

Divided 3d, Southern Field Trials.

Broken dogs and puppies of strictly pure Llewellin breeding always for sale. The blood of my kennel is the bluest of the blue.

HERBERT S. BEVAN, Lamar, Miss.

## MEADOW CITY KENNELS,

The leading English setter kennels of the East. Our field trial and bench show winners

**The Corsair and Rod's Whim**

AT STUD. Fee $35 and $25.

Young stock by these noted winners out of our Count Noble ex Gladstone ex Sue bitches for sale.

NORTHAMPTON, MASS.

## TYNE.

Gath's Hope ex Daisy F.

He is a big, fine fellow, and a brother to Daisy Hope and Daisy Hunter. Is a grand fielder and cuts his work out like the rest of his ilk. Has more Campbell blood than any setter in stud.

**Fee, $35.00.**

JOHN A. HUNTER, Bloomington, Monroe Co., Ind.

## BLACK WONDER.

A.K.C.S.B. 23,557. Whelped Jan. 30, 1890.

King of black pointers, and was the king of all colors at the United States field trials, 1891, winning the Derby and All-Age Stake. He won two firsts and one second on bench. He is a dog that knows how to hunt and not afraid of briers. Fee $35. JOHN A. HUNTER, Bloomington, Monroe Co., Indiana.

## In the Stud.

## Seminole Kennels,

CHESTNUT HILL, PHILADELPHIA, PA.,

OFFER THE SERVICES OF THE FOLLOWING

**STUD DOGS:**

Rough-Coated Collies.

**Champion THE SQUIRE,**

(20 881). The greatest collie living. Fee $50. By Champ. Charlemagne—Champ. Flurry.

**Champion ROSLYN DANDY,**

(17,577). By Champ. Scotilla—Champ. Cora II. Fee $25.

IRISH SETTERS.

**Champ TIM,** 1st and special, N.Y., '92. Fee $25.

**JERRY JARVIS,** (A. 15,347) litter brother to Duke-Elcho. Fee $10.

**PRIDE OF PATSY** (25,144).

ENGLISH PUGS.

**BONSOR,**

(21,054). Winner 1st, Chicago, New York and Pittsburgh, 1892. Fee $15.

Extended pedigrees of any of the above on application. Bitches entrusted to us receive the best of care. Fine specimens of the above breeds for sale at reasonable prices, including several good stud dogs and brood bitches in whelp.

Young Stock Always on Hand.

## FOX-TERRIERS IN STUD.

| | |
|---|---|
| **Starden's King** | **$25** |
| **Brockenhurst Tyke** | **15** |
| **Reckoner** | **15** |
| **Champion Raby Mixer** | **15** |

$100 will be given for the best pup sired by any of these dogs during the year 1892. Prize to be competed for at the New York show of 1893. Donor not to compete.

HILLSIDE KENNELS,
LANCASTER, MASS.

Puppies always on hand.

## Chestnut Hill Kennels'

COLLIES AT STUD.

**Christopher, - - $50.**

**Wellesbourne Charlie, $50.**

30 per cent. off to members of Collie Club.

IRISH TERRIERS.

**Breda Bill, - - $20.**

Puppies and grown stock for sale. Dogs of all breeds taken to board, conditioned for shows, kept at stud and sold on commission.

Address
CHESTNUT HILL KENNELS,
Chestnut Hill, Philadelphia.

**Challenge Irish Setter**

## INCHIQUIN

Imported. Has proved the most successful stock dog in America, who has only been 18 mos. in stud and has shown 1st prize winners at N.Y. and Boston. Sire of Avondale, winner 1st N. Y., 1st Washington, 1st Pittsburgh, only times shown. Sire of Minnie L. and Frank L., winners 1st and 2d at Boston. Sire of Maid of Borstal and Alice Kent, winners at all the large shows whenever shown. Puppies by this unequalled sire out of prize winning bitches, comprising the best blood both of Europe and America, constantly on hand. Stud fee, $25. Send for pedigree and cut. JOHN J. SCANLAN, P. O. Box 539, Fall River, Mass.

## MELROSE KENNELS ST. BERNARDS.

Stud dogs, puppies and brood bitches.

**Lord Melrose at Stud.**

Fee $50. Largest dog in the world.

E. H. MOORE, Melrose, Mass.

STUD POINTERS.

**Ch. Pommery Sec.**

(Ch. Graphic—Lady Vinnie.)

**Champ. Ossining.**

(Ch. Robert le Diable—Countess Nellie D.)

For stud fee, list of winnings, etc., address WM. H. HYLAND, North Tarrytown, N.Y.

Stud ST. BERNARDS

Scottish Leader, $50; King Regent, $40. Puppies and bitches for sale. SWISS MOUNTAIN KENNELS, Germantown, Phila., Pa.

## Irish Setters at Stud.

**Imp. FINGLAS.**

Litter brother to the field trial winner Coleraine. Heretofore reserved, will be in the public stud after Jan 1st, 1893, to a few *approved* bitches.

**Fee $50.00.**

## Challenge Beau Brummel.

A thoroughly trained field dog and one of Elcho, Jr.'s best sons.

**Fee $25.00.**

GLENMORE KENNELS,
COFFEYNILLE, KAS.

## REFUGE II.

Winner of over forty prizes, including the *medal for the best stud dog*, Agricultural Hall, London, 1891. **Fee $40.00.**

**Champion Kingston Regent.**

**Fee, $35.00.**

SEVERAL LITTERS SIRED BY THESE DOGS FOR SALE CHEAP.

NEW YORK ST. BERNARD KENNELS,
138TH ST. AND THE HUDSON RIVER.

## HEATHER KENNELS.

**Dandie Dinmonts IN STUD.**

**KING O' THE HEATHER** (Mustard).
**AMPHION** (Pepper).
**LAIRD O' THE HEATHER** (Pepper).

The above dogs are winners of firsts and specials in the best shows in England and the Border. Dandie puppies for sale, both peppers and mustards. EDWARD BROOKS,
Hyde Park, Mass.

**Stud Greyhound Flash,**

Black dog, by the great Huic Holloa out of Phœbe Mayflower. Great breeding this. Huic Holloa is a world-renowned courser, has won $8,850 in stakes. Fee $20. J. B'ack, Sheepshead Bay, L. I.

**The Kennel.**

## ENGLISH BULL-TERRIERS.

**AT TORONTO,** Sept. 12–15, I won Kennel Prize, 1st Bull Terrier Sweepstakes, 1st Puppy and 2d and 3d Open.

**AT KINGSTON,** Sept. 19–22, dogs and bitches competing together, 1st, 2d, 3d and v. h. c.

NAMES OF WINNING KENNEL:

**Comet II., Chatham Prince, Grove Duchess and Loumont Kit**

For puppies, dogs and bitches of the *best blood*, address HERBERT M. HOWES,
172 Summer street, Somerville, Mass.

## REWARDS FOR FIELD MERIT.

A successful competition by Irish setters at the various field trials necessitates more entries; an equal number of entries means an equal share of the money, we believe, therefore the following standing offer is made:

**$200** to the get of imp. Finglas and Beau Brummel (or other stud dogs we may hereafter own) whelped after Jan. 1, 1893, that win first, second or third in either stake of the United States, Eastern, Central or Southern Field Trials.

**$100,** conditions same as above, that win in the American, Pacific Coast or Bexar Trials.

GLENMORE KENNELS,
COFFEYVILLE, KAS.

## DEERHOUND PUPPIES FOR SALE.

I CAN NOW OFFER THE BEST LOT OF DEERHOUND PUPPIES EVER RAISED AT MY KENNELS.

HILLSIDE KENNELS,
LANCASTER, MASS.

## Irishmen---Birdfinders.

I have some splendid Irish setters in prime condition for chicken hunting.

Write quick for prices.

F. H. PERRY,
Des Moines, Iowa.

## SPRATT'S PATENT

DOG SOAP.

# FOREST AND STREAM.

A WEEKLY JOURNAL OF THE ROD AND GUN.

TERMS, $4 A YEAR. 10 CTS. A COPY. SIX MONTHS, $2.

NEW YORK, OCTOBER 20, 1892.

### *COLUMBUS NUMBER.*

AS stated last week, the FOREST AND STREAM'S Columbus Number, originally announced for to-day, has been postponed, but not abandoned. The date will be announced.

### *OUR RECORD IN YACHTING.*

IT is perhaps not surprising that the Boston *Herald* was not pleased with our comments of last week, but it speaks poorly for the other side of the argument when the *Herald* finds no better reply than the old charge of "prejudiced Anglo-American leanings."

It is a good many years now since the cry of "Anglomaniac" was first raised by American journals against the FOREST AND STREAM, because it dared to suggest that the centerboard sloop of the 1870 76 era did not represent the highest possible achievements of naval architecture. When again we pointed out that lead made better ballast than stone or iron or baled hay, the same cry was heard again. Our advocacy of systematic designing as opposed to building from the block model brought from American builders the same charge, that we were working in the interests of English designers, and our attacks on the spike and soft wood construction of the old boats brought on us general abuse from builders and their friends. When too, we opposed the old rule of mean length, we were met with the epithets "un-American," "unpatriotic."

The FOREST AND STREAM has not only survived but prospered under such opposition; it has worked steadily for advanced methods and correct principles in designing and construction, for better and more liberal systems of measurement, for fair racing rules; and against everything tending to discredit American yachting. The justice of our contention on all of the points mentioned is borne out by the work of American designers to-day. In the face of such evidence as is offered by the whole fleet of American yachts, it is the plainest confession of weakness on the part of an opponent to offer no better defense than the old war cry of 1880—"Anglomaniac."

So far as our objections to the new deed are concerned, they are so plain and specific that every yachtsman can decide them for himself, apart from all questions of national prejudice.

Conceding the necessity for some supplementary conditions to the original deed, a necessity which the FOREST AND STREAM pointed out at the time of the Volunteer-Thistle races, before anything had been done toward making a new deed; our objections to the present deed are in brief as follows:

It is illegal, the New York Y. C. having no right to return the Cup to Mr. Schuyler, and he having no right to receive it and redonate it.

It is directly opposed, both in letter and spirit, to the wishes of the five original donors, as stated by them in the true deed.

It was adopted secretly and hastily by a small party in the club and no opportunity was given to the members at large to discuss or vote on it.

It is distinctly unfair and contrary to the usages of yacht racing in the requirements of the dimension clause and the elimination of time allowance, demanding much from the challenger and giving nothing in return.

Of the harm it has done to American yachting in stopping all international racing, there is no need to speak, the results being only too plain.

From first to last the FOREST AND STREAM has defended the memory of the great American yachtsman who built and raced the old America, and gave the cup she won for "a perpetual challenge cup for friendly competition between foreigen countries," and not for a toy and plaything for the New York Yacht Club.

### *OUR AMATEUR PHOTOGRAPHS.*

THERE is no diminution of interest in the FOREST AND STREAM'S Amateur Photography Competition. We publish to-day capital reproductions of three photographs of a series of four, picturing the incidents of a day with the quail. Other reproductions will follow from week to week.

The pictures already received show that users of the rod and the gun are not less adept with the camera; and the collection promises to be a highly creditable one. The most gratifying feature of the amateur photography scheme is the frequent expression by readers of their pleasure at sharing with the photographers these pictures of outdoor life.

The conditions of the competition are repeated to-day in our advertising columns, and we shall be glad to send the slip containing them on request.

There is no limit as to the number of pictures one person may send; but, although it has not been stated before, no one competitor will be awarded more than one prize.

In response to several inquiries, we also add that while pictures should be mounted, it is not necessary that the developing, printing and mounting shall have been done by the amateur competitor.

### *HUMBLE ACQUAINTANCES.*

A LITTLE turning of nature from her own courses, banishes the beaver from his primal haunts, but his less renowned and lesser cousin, the muskrat, philosophically accommodates himself to the changed conditions of their common foster mother and still clings fondly to her altered breast.

The ancient forests may be swept away and their successors disappear, till there is scarcely left him a water-soaked log to use as an intermediate port in his coastwise voyages; continual shadow may give place to diurnal sunshine, woodland to meadow and pasture, the plow tear the roof of his underground home and cattle graze where once only the cloven hoof of the deer and moose trod the virgin mold, yet he holds his old place.

In the springtides of present years as in those of centuries past his whining call echoes along the changed shores, his wake seams with silver the dark garment of the water, and his comically grim visage confronts you now as it did the Waubanakee bowmen in the old days when the otter and the beaver where his familiars.

Unlike the beaver's slowly maturing crops, his food supply is constantly provided in the annual growth of the marshes. Here in banks contiguous to endless store of succulent sedge and lily roots and shell-cased tid-bits of mussels, he tunnels his stable water-portaled home, and out there, by the channel's edge, builds his sedge-thatched hut before the earliest frosts falls upon the warshes.

In its height some find prophesy of high or low water, and in the thickness of its walls the forecast of a mild or severe winter, but the prophet himself is sometimes flooded out of his house, sometimes starved and frozen in it.

In the still, sunny days between the nights of its unseen building, the blue spikes of the pickerel weed and the white trinities of the arrow-head, yet bloom beside it. Then in the golden and scarlet brightness of autumn the departing wood drake rests on the roof to preen his plumage, and later the dusky duck swims on its watery lawn. Above it, the wild geese harrow the low, cold arch of the sky, the last fleet of sear leaves drift past it in the bleak wind and then ice and snow draw the veil of the long winter twilight over the muskrats' homes and haunts.

These may be gloomy days he spends groping in the dark chambers of his hut and burrow, or gathering food in the dimly lighted icy water, with never a sight of the upper world nor ever a sunbeam to warm him.

But there are more woful days when the sun and the sky are again opened to him, and he breathes the warm air of spring, hears the blackbirds sing and the bittern boom. For amid all the gladness of nature's reawakened life, danger lurks in all his paths, the cruel, hungry trap gapes for him on every jutting log, on every feeding bed, even in the doorway of his burrow and by the side of his house.

The trapper's skiff invades all his pleasant waters, on every hand he hears the splash of its paddles, the clank of its setting pole, and he can scarcely show his head above water but a deadly shower of lead bursts upon it. He hears the simulated call of his beloved, and voyaging hot-hearted to the cheating tryst, meets only death.

But at last comes the summer truce and happy days of peace in the tangled jungle of the marsh with the wild duck and bittern nesting beside his watery path, the marsh wren weaving her rushy bower above it.

So the days of his life go on, and the days of his race continue in the land of his unnumbered generations. Long may they endure to enliven the drear tameness of civilization with a memory of the world's old wildness.

### *THE LOST PARK BUFFALO.*

LATER reports from Colorado points near Lost Park advise us that additional parties have gone out to look for the buffalo slayers, but it may be some time before anything is heard from them. The country is said to be very rough and extremely difficult to travel through, and the pursuit and capture of the law breakers will be hard matters to accomplish.

It is also stated that the country is well stocked with mountain sheep, and as these are protected by the Colorado law, Game Warden Land has given instructions to arrest any one found with heads or hides of this species in possession.

In a dispatch from Florissant, Col., a ranchman, Sidney Derby, who lives on Tarryall Creek, is quoted as saying that he frequently sees the Lost Park buffalo, and that there are fully 100 in the herd. The same dispatch mentions that two Florissant taxidermists have been arrested at Steamboat Springs charged with killing buffalo.

Just as we go to press we receive word from a Denver correspondent that Deputy Sheriff Bell and his men have returned from the Lost Park country, having found no trace of the buffalo killers. They are inclined to discredit the story of the killing. Whether or not the reported slaughter was done, the incident has demonstrated in a most gratifying way the public interest in these remnant buffalo; and the effect of that demonstration must be salutary.

### *SNAP SHOTS.*

THE FOREST AND STREAM did honor to Columbus last week by displaying as appropriate decorations mounted heads of buffalo, mountain sheep and antelope, with eagles, and in the post of honor a white goat. Then the office camera was called into use to catch a snap shot of the procession, and to fix the picture for reproduction to-day. The view given on another page is from one of the windows looking up Broadway; it shows the mountain sheep head, and the black mass beyond is the buffalo head. The troops shown are of the New York Seventh Regiment.

The evil results of keeping in his place such a worthless official as State Game Protector Sheridan of the Thirteenth District are by no means confined to the immediate injury done the fishing interest he is sworn to protect. For just as the honest and vigilant service of a faithful official constantly makes for good by promoting a sentiment of popular respect for the laws, so just as fully and in like measure the dereliction of the Sheridans and their abetting of crime breeds public contempt of the statutes. The demoralizing influences of Sheridan's official shiftlessness are cumulative. Remembering this it is inconceivable that his superior's should keep him in office and prolong the disgrace because of his political pull.

The old subject of the panther's scream is up again, its discussion having been stimulated by "Stanstead's" note the other day averring that the screams attributed to the panther are made by other animals. The natural history columns next week will have some interesting notes.

# The Sportsman Tourist.

## TROUTING IN THE COAST RANGE.—II.

### The Nehalem Country.

TOWSER was a formidable-looking brute, as he lay there glaring at us with his great blood-shot eyes, bemoaning the invention of boom chains. I am not an expert on dogs and am therefore unable to say just what breed of dog he is, but it is my opinion that he is a cross between a Siberian bloodhound and a rat-terrier, with the size of the first and disposition and general characteristics of both. It is barely possible that he is in some way connected with the night-mare breed; for I am almost sure that I have seen similar looking dogs in my dreams when trying in a helpless sort of way to get over a fence away from the hydrophobia. At any rate Towser was a "bad man from Bitter Creek," and evidently was entitled to the reputation he bore.

Turpin and his wife, in fact the whole family, were intelligent and generous, and from oldest to youngest they all set about making things pleasant for us. Although we had had our breakfast after a fashion, nothing would do the good people but that we should join them in their morning repast, and the Doctor and I stowed the good things away in a manner that must have convinced them that we were grateful creatures at least and knew how to manifest our appreciation of their kindness.

We were somewhat footsore and stiffened from the long, tiresome trip of the preceding day and decided to spend this day resting up; and besides, the agreeable reception tendered us by the Turpins made us loth to leave too hastily the cheer of their humble but happy abode.

Really I think that Turpin has four of the prettiest and most agreeable girls in the world; and even we old married fellows find it a little difficult to resist the temptation to rest up under such circumstances, when there is any excuse for it. So the Doctor and I rested up, and he, being unmarried and a free lance, rested harder, if possible, than I did. I know that a 25-mile walk with heavy packs over the mountains of a hot day is tiresome, but the Doctor couldn't fool me. I knew him too well. He wasn't half the physical wreck and confirmed invalid he let on to be. But he fooled the girls and had the whole crowd, except little Annie, condoling with him and ministering to his wants. Annie stuck by me because I had promised to send her a doll. If she asked me once she did twenty times to describe the doll; and it did me as much good to tell her about it as it did her to listen, for she laughed so merrily and her eyes sparkled so brightly.

But "resting up" can't last long with an angler of the true spirit on the bank of such a river as the Nehalem; so I asked Johnny how the fishing was. "Lots of fish and big ones" said Johnny, "but we don't care anything for fish, and I would rather hunt anyway." I asked him if what the postmaster had told me about the twenty wild cats was true and he said it was and more, he and Towser had recently killed a big black bear. Pretty young hunter, thought I, to be talking about bears. Bob-cats are big enough for most hunters twenty years older than Johnny. I asked Turpin if he did not feel a little anxiety about this proclivity of Johnny's that led him off alone into the forest for such game. Turpin ridiculed the idea of danger to the boy and glanced at me in a way that made me feel decidedly uncomfortable. But then I was only speaking for the boy's sake and was not afraid of wildcats and bears myself. "I guess that Johnny and Towser can take care of themselves in these woods," said Turpin, and Johnny stuck his thumbs under his rawhide suspenders and looked longingly across the river as much as to say, "Bring on your wildcats and bears."

Along towards noon Johnny broached the subject again with, "Say, mister, you don't look so very tired, s'pose we take the dogs and go up the swale, mebby we would find a cat."

"What dogs?" I asked.

"Why," said he, "your yeller dog and old Tows."

I thought it was bad enough to hunt wildcats without having Tows turned loose, so I declined and suggested that we try the trout. So Johnny got his worm box and we went down the bank to a beautiful, dark pool resting at the foot of a wild, raving rapid not a hundred yards from the house.

Johnny's tackle consisted of an alder sapling, a sturgeon line and what looked to me like a young hog-hook. I laughed to myself at the outfit, but when I got out my 8oz. rod and little black reel I imagined that I discovered a sort of sardonic grin playing around the corners of Johnny's mouth. So it seems that we were both having a lot of fun on the quiet. Of course I knew that the fly-book would be a surprise to Johnny, but thought that I would wait and let him feel the secret chagrin of being outclassed in fishing, even if he could put a little "dog" on the wildcat proposition.

Quietly putting on a three-fly whip (as is my custom), I proceeded to straighten my leader in a careless sort of way, but so as to attract his attention. I succeeded admirably and was soon busy explaining the art of fly-fishing to a very interested listener. Johnny seemed interested enough, but only commented to the extent of suggesting: "Mister, I am afraid you don't know the Nehalem trout." But then, you know that those not familiar with the capabilities of the fly-rod always talk that way. By this time I could see that Johnny had decided to play audience and "give the calf plenty of rope." He quietly laid his sapling on the bank and sat down on a rock with his hands in his pockets.

It pleased me to have him so attentive, for I wanted to instruct him a little before giving him the customary assortment of flies and leaders.

You know with what artistic grace the professional fly-caster takes his stand and poises his rod when exhibiting himself. Well, that was the way I opened the ball on the Nehalem. I didn't have to request Johnny to pay strict attention, for he never took his eyes off me. With a sweeping curve of the rod and a quick turn of the wrist I planted the flies well out in the bosom of the deep, dark pool and anxiously awaited results. So did Johnny. I had drawn my flies almost to the point where another cast is necessary to avert slackness when, with a rush and splash that made my hair rise there came a monster for my royal-coachman, the like of which I hope may never again see anything inviting in a No 6 fly hung to a slender leader and 8oz. rod in my hands.

Well, I am sorry to say that he got the fly and presently another monster got the professor, and the result was simply, that they got what they went after while I didn't. This was a little annoying under the circumstances, but Johnny was too well raised to manifest any exultation or give vent to any hilarity. I got out another leader, the heaviest I had, and having discovered that three such flies were at least two too many, I removed all but the stretcher, the royal. I made one more cast that day. It was a long cast; in fact it turned out to be a very long cast, for no sooner did my fly touch the water than it started for the Pacific Ocean. Even after my line was all run out it kept on casting until I found myself minus not only the leader but part of the line.

Johnny thought he'd better get one fish any way for dinner, and under the circumstances I didn't feel like objecting. Thereupon he loaded his hog-hook with worms and cast out in the good old-fashioned way.

He soon hooked a fish, and without stopping to "play" him dragged him in as ignominiously as if he had been a sucker. But Johnny's trout, the one he caught, didn't weigh more than 5 or 6lbs. I requested Johnny not to say anything about what had happened, and even promised to send him a lot of fish hooks as an inducement for him to keep his mouth shut; but when Turpin asked me what luck I had had, I assumed an injured air and made a clean breast of it. I told him that no thoroughbred professional fly-fisherman would care to be caught fishing after such great, overgrown ocean porpoises as I had found in the Nehalem River; and that so far as I was personally concerned, I proposed to go back into the mountains, where I could find 8 and 12in. mountain trout, as they were much sweeter and afforded much more genteel sport, and besides they were not so coarse and rude, you know.

I had gone into the Nehalem country to see the "elephant," and had already seen three, but so far as the fishing part of the trip was concerned, I had gone prepared for trout, not tarpon.

A very disagreeable but unavoidable condition to such angling as one finds in these remote waters is the fact that fish are so plentiful, and so little use can be made of them that to avoid inexcusable waste one doesn't get to fish much. A half-hour each day of actual fishing will keep the larder well supplied with this toothsome and indispensable part of the necessary forage; so that, if it is close season for game, one cannot do much but loiter around camp the rest of the time.

Turpin said that there were no well-defined trails leading south from the bluffs of the Nehalem and it was a bad country to get through, and to the inexperienced might be added for consideration the great danger of getting lost. He couldn't see the necessity of our tramping off into a country of which he himself had little knowledge, to undergo the attendant hardships and privations when we could get all the fish and game we could wish almost at his door, and have a roof over our heads when night came, in the bargain. This was good but ineffectual logic.

We wanted to see the country and investigate the streams and other resources, so we determined to strike out south in the morning. Spreading our blankets on the floor in the corner, we slept soundly, almost dreamlessly, until the girls called us to our early breakfast. Shouldering our packs, we started up the high, grassy bluff bound for the upper waters of Deep Creek. We had decided to follow the burnt ridge on the west side of the creek, but within sight of its cañons, to avoid the possibility of getting lost. It was useless to try to follow the creek, and the mountain sides were absolutely impassable. I am honest in the assertion that the interwoven sal-lal and fern on the Coast Range reach a height of 15ft., where the conditions are favorable, and how the elk get through the tangled mass at all is beyond my comprehension. We had our hatchets with us, and they came very handy in blazing the trail and in cutting our way through the worst places.

We had nearly reached the top of the high bluff when we heard one of the girls scream back at the house, and turning we saw, horror of horrors, Towser coming after us on the dead run. A moment later and the Doctor and I were on a big log, with hatchets drawn and Mike between us, all prepared to die like men. On came the brute straight for us. Nearer and nearer he came, until he stood by our log looking up at us. He studied our attitudes and the grim determination depicted on our faces for a moment, only a moment, and then—wagged his tail. He looked off into the forest and then up at us again, as much as to say: "Gentlemen, you are wasting precious time up there, let's be getting on." Mike seemed to grasp the situation before we did, and jumping down from our roost he and Tows greeted each other in that cordial way peculiar to dogs, while the Doctor and I sneaked down silently, and in a manner decidedly unbecoming to such heroes. But Towser was with us, life-size, and proposed to stay; and a more agreeable companion among the gloomy mountains of the Coast Range would be hard to find, as I am free to acknowledge after a week's experience. He is a brave, good dog, and he has been maliciously slandered, and I am glad of this opportunity to testify in his behalf, and desire to place myself on record as of the opinion that no nobler, braver or more faithful dog lives than poor, old, much-abused Tows, when he meets with half-way decent treatment or an appreciative friend.

During the week we were together in the deep forests of those romantic mountains Towser was never morose or ill-natured, and even permitted Mike to impose upon him rather than to have any misunderstandings or trouble in camp. However, I do not for a moment doubt his prowess or valor, or his ability to take care of himself in any ordinary scrimmage even with wildcats. We were on a simple fishing trip and were armed with only revolvers and hunting knives, for it was not open season for elk and deer. At night we would camp on Deep Creek or some other pretty mountain stream, stopping early enough to secure plenty of trout for supper and breakfast.

Where can a man be placed that he will more fully realize that he is close to nature than by a camp-fire at night in the remote forests of untraversed mountains. One can almost hear the whisperings of the gray and gloomy mountains as they chant their solemn chorus to the song of the spheres. Awed into silence by the spectral splendor and stupendous grandeur of the weird surroundings, one involuntarily and reverentially listens as if expecting to hear nature speak. And she does speak, but not in the language of men. From under her veil of mystery we hear the birds, the brooks, the tree-tops and the thousand forest tongues, all busy translating the lesson she here teaches. So let us go to the forests, to the mountains and commune with nature in her own wild solitudes. It makes better men of us and lifts us up and above the sordid thoughts and tainted reflections of common, every day human existence.

PORTLAND, Oregon.

## JACK AND I ON A TRIP TO ISLE ROYAL.

"If thou art worn and hard beset
With sorrows that thou wouldst forget,
If thou wouldst read a lesson that will keep
Thy heart from fainting and thy soul from sleep,
Go to the woods and hills! No tears
Dim the sweet look that nature wears."

—*H. W. Longfellow.*

I WAS sitting in my room feeling a little blue one August evening when the door opened and in walked Jack. After a few words he said, "I'll go on a trip along the North Shore and to Isle Royal with you, if you'll go Thursday morning. I fairly gasped in astonished delight, for we had been talking of such a trip all the spring and summer, but the more we talked the further off the realization seemed and only two days before he had told me that he did not see how we could get off. Here he was however, with his proposition to go Thursday and this was Tuesday evening. "I can only be away ten days" he continued, "so let's decide quick." "I'll go" I replied." "But there'll have to be some hard work done to-morrow," and there was. Wednesday evening at 10 o'clock Jack and I were lying in bed; with all our dunnage at the depot, and every thing arranged as ship-shape as possible at home and the alarm clock set for 3:30 A. M. "Does that thing ever fail to go off on time?" asked Jack sleepily. "Never."

"Well then, good night."

"Good night."

'Twas a perfect summer morning when we awoke, and hastily dressing, reached the station with a few minutes to spare before we started on our nine hours' ride by rail to Duluth. Harvesting had just commenced, and on that fair August morning the fields seemed doubly beautiful and the streams and lakes and forests glorified as we whirled away eastward.

At Staples where we changed cars we found evidence of the work of the electric storm of the Sunday evening previous, as only a heap of blackened brick and other material remained of the building which had contained the superintendent's and train dispatcher's offices, and the lunch room. The train dispatcher's office was now a box car, which seemed enveloped in a network of wires. Onward we went through an almost unbroken sameness of jack-pine and tamarack marsh. At one place the train stopped in the woods, there was a village of birch bark teepees, and canvas tents. It was a camp of Indians, who were picking blueberries. For those who desired to see the picturesque Indian as he now exists in Minnesota, here was an excellent opportunity.

Half-past twelve found us at West Superior, and in a brief while more we were in Duluth. Our first errand was to find when a steamer left for the North Shore and Isle Royal. We found that the Cambria left for Port Arthur that evening; the Dixon for the North Shore and the island three days later. What should we do? Go to Port Arthur on the Cambria and wait there for the Dixon or wait at Duluth? I was for waiting at Duluth, as I wished Jack to see the beautiful scenery along the route. We decided to wait for the Dixon, but not in Duluth. We would run out to Knife River, camp there for a couple days and try for some trout. A ride of three-quarters of an hour on the Iron Range Road, with old Superior close on one side and the uplift of rock supported hills on the other, crossing many streams where in their season trout do hide, brought us to Knife River, and we and our dunnage were left on the platform which serves as a station, while the train went whirling on. We speedily set up out tent, with the river a few rods in front and the gleaming lake a short distance off. How beautiful it all was. Close by were two large tents, which we learned belonged to the grading crew at work on the country road, beyond these tents the woods reached away to the great Iron Ranges, and beyond to the Canadian border; the river in its gorge lying here like a long placid pool, ever seeking an uninterrupted exit into the lake and ever beaten back and interrupted by the restless waves and shifting sandbar; while standing out in bold relief a few rods from shore was Knife Island Reef encircled and wave-lashed, a prominent object for a long distance up and down the shore. As soon as our tent was fixed to our satisfaction we put up our rods and prepared to try for trout. The cook from the graders' tent came over and watched us. He was a medium-sized man with an enormous shock of hair and whiskers, and all below this was enveloped in a great white apron, the whole make-up suggested to Jack and I a picture we had seen of a statue of Moses, by a certain very great sculptor. Jack dubbed him Moses at once, but we found out later that the graders also had an exalted name from him, nothing less in fact than King James. Just as we were ready to start for the river Moses broke silence with:

"Say, you'll not get any fish here."

"Not get any fish, why?"

"There are none here, nor have been for a month."

"But this is a noted trout stream."

"Can't help it, they are not here now. If you want trout you'll have to go about seven miles up to some of the little branches and there you'll find a few. You're too late anyhow," he added as he turned away.

Jack and I looked at each other. "The old addlepate," exclaimed Jack. "Do you suppose he knows?"

"No, I do not," I answered as bravely as I could, but in my heart I was afraid he did know, and experience proved it to be so; for not one trout did we get or even catch sight of while at Knife River. Carefully did we fish up the stream that afternoon until lengthening shadows gave indication that it was time to return to camp. I had not had the faintest sign of a bite. Jack said he had one strike as though a 3-pound bass had taken the hook; but the hook did not take the fish.

Back to camp we went, and after supper prepared our bed of spruce boughs, blanket-covered, in which we lay "with greater comfort," Jack said, "than last night in your bed." The flowing river and murmur of waves on the beach, together with our picturesque surroundings, had aroused the philosopher and poet in Jack, and it was some time ere we went to sleep, as question, suggestion,

scrap of philosophy, bit of poetry or thought, showing a keen insight into things in earth and air and sea, came from him; but at length silence reigned unbroken over Riverside Camp. I was aroused the next morning by a most unearthly sound, which at first I was puzzled to account for, but soon found came from a great tin boat horn, at the small end of which was Moses, who in this way was calling the graders to breakfast. I aroused Jack, who was sleeping the sweet sleep of innocence, seemingly, and after breakfast we went down to the beach where we stayed all the forenoon, watching the waves, lying on the sand and gathering agates, of which we secured a large number, some of which were very beautiful. "Oh," said Jack, "isn't this just grand?" It certainly was; and noon came before we thought as we played like two schoolboys on the beach. In the afternoon we again tried the river for trout, but without result, save the good solid enjoyment obtained from nature in her wildest dress as represented by river and wood. At length, giving up the river in despair, we took an old trail off into the woods, which we followed hither and thither, until we came around to our camp.

The afternoon was very warm and as soon as we reached camp we took a pail and cup, some lemons and sugar went down to the lake and made some lemonade, using the clear sparkling water of Superior. Upon a wave-tossed and rock-battered log we sat and drank our lemonade, while the waves came thundering in, for a stiff breeze was blowing on the water, although we had not felt it in woods or along the river. We went to bed early, intending to put in a good long night in sleep, but t'was decreed otherwise. It seemed to me that I had scarcely gotten to sleep when a cow bell rang furiously right by the tent, and the tramp of feet outside told of cattle near by. I rushed out and there stood an old bell cow not 4ft. from the tent, complacently chewing her cud, and now and then giving a vicious shake to rid herself of flies and mosquitoes. I sent her off in short order and went back to bed, but back came that cow twice at intervals of about an hour, and clattered the bell by the tent. The last time I saw her off with such dispatch that we heard the bell no more only as a faint tinkle off in the edge of the woods. We went to sleep again, only to be aroused by a thunderous bellow close at hand. Jack turned over and murmured sweetly, "Is that Moses blowing his tin horn, or the angel Gabriel with his trumpet?" I had to laugh as provoked as I was. I investigated and found that it was neither Moses nor the angel, but a black and white bull who was leisurely walking away. When daylight came we were loth to get up, and the result was we had an 8 o'clock breakfast, after which we packed up and loafed around until the west-bound train came along and stopped at my signal. We were soon aboard, and waving a good-by to Riverside Camp, and Moses, and the bull and the cow with the bell, we reached Duluth in time for dinner. After dinner we made our final preparations for our trip down the North Shore and to Isle Royal, bought our tickets, had our baggage transferred from the depot to the steamer, and then spent the rest of the afternoon and evening in seeing the city, which was familiar enough to me but not to Jack. We went up the incline railway, and from the lookout viewed city, lake and bay, shipping and network of railroad tracks, and across the bay through rifts in the smoke we caught glimpses of West Superior. We took in scenery enough Jack said, "to last us for years."

Coming down from the lookout we went into the power-room and saw the mighty engines and powerful machinery that winds and unwinds the cables which pull up and let down the cars on the incline. From the power-room we went out to see the deer, which are kept in a little inclosure near by. There was a buck, with horns nearly grown, and three mottled sided fawns; all were panting with the heat, for the August sun smote fiercely upon than rocky hilltop and the half dozen small fir trees stuck in the ground at one end of the inclosure were only a pitiful mockery of the free wild wood's soothing shade. I told Jack that "I heartily wished I could let them out and see them safe away." Near by was another inclosure in which three bears—two black and one brown—were chained. They, too, were suffering from the heat. Each had a tub partly filled with water, into which they would go and sit every few minutes. One of them was especially mischievous, and when the keeper came in to clean up the inclosure made several attempts to trip him with the chain. The man, however, kept close watch and frequently shaking his finger at the bear, said: "Ye think ye are pretty smart, but ye don't down me this time." The bear winked and blinked at him, and bided his time. The man turned to answer a question. Quick as a flash the bear made a rush out beyond the man, then doubling back, looped the chain around his feet and laid him on his back with neatness and despatch. We applauded the bear, but a very angry man got up out of the dust, and with many oaths and fist shakings uttered dire threats at the bear, which now stood facing him, evidently ready for the next move. The man did not touch him, however, and we turned away, and boarding the car went down the incline still laughing over the discomfiture of the man. We next took the ferry and went over to West Superior to look at the three great whalebacks that were being finished. On our return we went to every store where there was a collection of agates and harrowed the souls of the shopkeepers by our search after such an agate as is not yet found. I chanced to think that I wanted some swivels, a simple want, surely, and one easily supplied, but in this instance we found that swivels were in the other store, down the avenue or just around the corner. From place to place we went, causing tribulation and confusion in every place we entered, and had about given up the quest when we found what we wanted in a gun and tackle store under the Spaulding House. We went to our hotel and to bed, sleeping the sleep of innocence.

Nine o'clock the next morning we were on the steamer, bag and baggage, watching the other passengers come aboard. A mixed lot they were; pleasure parties, cruisers, with their packs, residents of the North Shore returning home from a trip to Duluth; fishing parties with boats and elaborate outfits, and camping parties pure and simple. Promptly on time we steamed out through the canal and Jack drew a deep breath of content. "We're started on our long anticipated trip," he said, "and the day is as perfect as if made to order." It was true. The lake lay like a great burnished mirror, and the shore was like a panorama, new and more beautiful views unfolding each mile. Past Lester River we went, where the Stars and Stripes were waving from the flag-pole in the grounds of the United States Fish Hatchery. Soon Knife Island began to loom up, and as we passed our camp site could be plainly seen. Twenty-seven miles down from Duluth, and the steamer stopped at Two Harbors. We went ashore for a few moments and looked at the great ore docks. As we went back we stopped on the lower deck to see the dunnage piled there. 'Twas an amazing assortment. There were trunks and grips and boxes, and tents and lunch baskets, rolls of bedding and packs, trout creels and landing nets, guns in cases and out, fishing-rods and tackle boxes in profusion, and four boats. All this, beside the usual merchandise the boat carried to the North Shore ports and fishing stations. Ten miles further down the lake we passed Split Rock, a famous fishing place where 'tis said brook trout hide of size and cunning that defy capture. Jack and I do nothing but sit and admire the scenery. It is all new to him, and his love of the grand and beautiful enables him to keenly enjoy it all. Thirteen miles further and we are at Beaver Bay, a picturesque, weather-beaten little town, high above the lake, with a great mass of detached rock making a palisaded island at the entrance to the landlocked bay. "A veritable Old World picture," says Jack. "I forget just where its counterpart is located, but it's across the sea somewhere." A young girl comes out to the steamer in a boat and some of our fellow-passengers leave us. The scenery grows more and more grand and beautiful. The Palisades, over 300ft. high, lift their rocky tree-crowned mass from the waves at their base. At the famous Baptism River four empty boats come out to meet the steamer, and three of these are soon piled high with dunnage and fishing tackle. Evidently, a large party is going ashore to recruit those already at the club house, which is so beautifully situated, with a green lawn reaching from the piazza to the top of the bluff. A little up the shore from the club house is a group of tents on the beach. Very inviting they look, and Jack and I wish that we were getting off here instead of this party of five ladies and eight gentlemen, who, crowded into two boats, are taking merry leave of the rest of us on the steamer. The trout must hide now, for there's mischief brewing for them.

At Pork Bay two gentlemen go ashore with enormous packs and I wonder how they are to carry them, as they are evidently not accustomed to that kind of work. But looking ashore I see two packers awaiting them, and ere we leave the bay the packers, with their burdens, followed by the two gentlemen, have disappeared in the woods. "Going to look up pine land," some one near me says. That sheet of molten silver coming down the rocks there is Manito Falls, beautiful as dream of poet. I do not wonder that the Indians regard Little Manito with reverence, and if we were on shore we should find a scene of such stern and savage grandeur that we too would be impressed with the strength of the Almighty who formed these everlasting hills. Near the setting of the sun two more left us. They had their own boat and a complete outfit for camping and fishing. They went ashore at Two Islands and their intention was to fish every stream from there up to Baptism River. How clear cut the outline of the hills was against the sky after the sun had set. How placid the lake and how plainly defined the reflection of those same tree-clad hills upon the water.

Quite a number of passengers were to stop at Grand Marais and camp there for a month or so, but ere the boat reached there Jack and I were in our stateroom sound asleep. It was broad daylight when I awoke, and looking from the window saw through the mists of early morning Pie Island and other bold headlands, which I knew marked the entrance to Thunder Bay. During the night we had passed Chicago Bay, where last year Stephens and I left the steamer and began our trip in our canvas boat, Mesquatawanga River, where we caught our big trout, Red Rock, where we had such a delightful camp, Tunnelled Rock, where we were cast away, and Grand Portage, where we waited for a steamer which never came. All of these memories came o'er me as I crept back into the berth, where I lay until Jack exclaimed, "Where are we now, and what are we coming to?" I looked out and saw that we were nearing Port Arthur, the Prince Arthur's Landing of the ante-railroad days.

## A SNAKE'S STRIKING.

KALAMAZOO, Mich.—*Editor Forest and Stream:* Since the articles appeared on spitting snakes and how snakes strike, in July last, the general press of the country has adopted them. As many as ten leading papers copied the articles on "skin shedding" and "snakes striking," while sections were stereotyped and sent to the lesser lights throughout the land, and are still circulating. It is the old idea; every one is interested in snake lore. Several friends, readers of the FOREST AND STREAM, have asked for further information on the subject, while some criticise my assertions.

In regard to a snake's striking. In addition to the description and illustration given in the issue of July 21 last, the following demonstration is submitted to those who persist in maintaining that a snake can strike its length from a coil. Take a coil of rubber tubing, common lawn hose is best, and lay it flat on the floor or ground. Have an assistant hold the lower circles in place. Then with a stout pair of forceps seize the upper end of the hose, which represents the snake's head, and pull. It will be found that the tension is exactly in proportion to the coils straightened, and if one complete circle is pulled out, then the hose or tubing will be twisted but once, or twice if two circles of the coil are pulled out. Now, allowing that the motion of the snake's head and body when striking must be like the action of the hose when clinched tightly by the pinchers and pulled straightaway, then it follows that the reptile's body must be twisted. According to this theory, which is plain and convincing, the vertebral column of the rattler would be twisted once for each circle uncoiled straightaway, if it could possibly strike from a coil.

MORRIS GIBBS, M.D.

### "A Habit of the Robin."

KALAMAZOO, Mich.—In your issue of Sept 1, was a suppositional observation, by Mr. N. D. Elting, headed as above, which principally annoyed me from its utter unfairness.

The item claims that the parent robin invariably caught the voided excrement in its bill and swallowed it. This idea places the cleanliness of our favorite in a bad light, and I am willing in the robin's behalf to refute the assertion most emphatically. Robins are scrupulously clean about their nests and do not allow a particle of extraneous or excrementitious material to accumulate on the premises. As soon as a pellet of excrement is found in the nest, it is seized by the old bird who has just visited the young with food and carried away. The robin drops the pellet while on the wing, and when from 6 to 20ft. from the nest. When the nest is in a tree and the birds have run-ways or more properly fly-ways to and from it, the pellets may be found quite numerous near the tree if looked for. When the pellet is picked up by the old bird, it is of course very soft, and the robin is liable to crush or drop it. The head is then frequently thrown upward and backward, in order to secure a better hold, as is often seen when a worm or other food is secured. It is this motion which Mr. Elting probably mistook for the act of swallowing. Had his eyesight been trained, he would have seen the bird drop the pellet a few feet from the nest.

The act is simply another evidence of the excellent house-keeping qualities of the robins, and shared in, as it is, by both of the old birds, shows that each strives to keep the premises clean.

MORRIS GIBBS, M.D.

### Dispersal of Animals and Plants.

IN a paper contributed by Mr. Clement Reid to the Transactions of the Norfolk Naturalists' Society, "he treats of the natural history of isolated ponds, confining himself to those of artificial origin, usually of quite recent date; and it is astonishing to find how rapidly these small pools of water become stocked with a varied fauna and flora. Certain aquatic animals and plants seem to be transported with the greatest ease; and the problem is to determine not only the mode and means of dispersal, but also the effect of changed environment on the organisms concerned. So far as Mr. Reid's observations have extended it appears that the main transporting agency is that afforded by the feet and feathers of wading and bathing birds, for the commonest plants in isolated ponds are the brittle species with finely-cut leaves, such as collapse and cling when lifted out of the water. The associated mollusks are usually the species that live among or attach their eggs to these plants.

"With regard to the changes produced by environment we may also allude to some remarks by Mr. Robert Holland in the August number of *Nature Notes* (Vol. III., pp. 147-152) which have reference to similar observations previously published by Mr. Collingswood Hope. It appears, as might be expected, that fishes placed in stagnant ponds soon become stunted, rarely growing to their normal size; but it is interesting to have proved that even after several generations this dwarfing in the case of the tench is not permanent, the small fishes attaining their usual dimensions as soon as they are removed to a shallow pond with a plentiful supply of fresh water."—*Natural Science, October, 1892.*

### Extermination of the Ant-Bear.

SOME men seem never so happy as when destroying animals theoretically lower than themselves in the scale of creation. Illustrations of this fact will readily occur to any one who is familiar with the so-called "sport" which has threatened, and in some cases almost effected, the extermination of large, but comparatively helpless, animals of land and sea. A fresh reminder of this thirst for killing is brought forward by Mr. A. C. Macdonald, of the Agricultural Department of Cape Colony, in the warfare now being waged against the ant-bear. Although one of the most valuable friends of the farmer, because of its whosesale destruction of ants above and below ground, it is, nevertheless, hunted with persistency and killed by the most cruel methods. According to Mr. Macdonald, in *Nature*, "it is sought after by the natives for its skin, which is valued at about 15 shillings, and also for its flesh, which resembles superior pork. With the white race 'sport' is the inducement, this fun taking the form at times of forcing the poor brutes out of their holes by flooding with water, or drowning them and digging them out afterward."

### Food Habits of the Frog.

WADSWORTH, O., Oct. 12.—Reading the account of Mr. Jewell's frog pond and the feeding of the frogs with live mice brings to mind what I saw last summer but could not quite understand. While out shooting frogs one day last spring in company with two companions, I shot a very large frog. On removing the saddles I opened the stomach to see what he had last eaten, and to my great surprise I found a ground squirrel (chipmunk). It was only partly digested. I called the attention of my comrades, and we were all greatly surprised, but thought that the frog had gobbled him up after the squirrel was dead. But after reading about them eating two and three live mice at a meal I am led to believe that he was captured while alive.

Two years ago I found a small turtle in the stomach of a frog. What is the limit of a frog's diet?

DR. D.

### Ruffed Grouse Come With Woodcock.

HIGHGATE, Vt., Oct. 8.—After a big storm here a few days ago, a heavy flight of woodcock came along, and at the same with the woodcock a large pack of ruffed grouse appeared. Who ever heard of their migrating?

STANSTEAD.

**As the Baking Powder Folks Say, "Once Tried, Always Used."**

OFFICE OF THE REGISTER OF WILLS AND RECORDER OF DEEDS, Blair county, Pa., J. Lee Plummer, Register and Recorder.—Hollidaysburg, Oct. 13, 1892.—*Forest and Stream Publishing Co.—Gentlemen:* Enclosed please find my check for $4 for one year's subscription to your paper. I first took FOREST AND STREAM for six months on trial to see how I would like it. I find now that I cannot get along without it. Yours respectfully,

J. LEE PLUMMER.

# Game Bag and Gun.

## AN EXPERIMENT.

NASHVILLE, Tenn.—Perhaps the saddest experience in the life of the active lover of gun and dog is the feeling which comes to him when time has placed him on the wrong side of 40. He may be as vigorous as ever, his nerves may be as steady and his eye as keen as they were before his mirror disclosed the first gray hair and the incipient wrinkle about his eyes. He may appreciate all this, yet he feels that from this time forward he is on the down grade, and that for him the time is near at hand when his gun will remain in desuetude, and his rheumatic dog will be permitted to sleep by the fireside, whining in his slumber, as he dreams of stirring events of the field with his master, and all that will be left to him of forest and stream will be but a fragrant memory.

The love of the dog and the gun and the enjoyment which comes from the use of both is a matter of heredity with me, and has been stimulated and kept alive during the years since boyhood by periodical outings. It was a proud moment for me when, at the age of 12 years, I was permitted to take my father's long, old-fashioned rifle, and go out alone on a squirrel hunt. This was back in the hills of Pennsylvania many years ago. I knew just in what patch of woods and on what old oak I would find the squirrels. I climbed the hill and found my squirrel. With tremulous haste and loudly thumping heart I took aim and fired, and missed. The game was evidently not very much disturbed, for he simply changed his position, affording a better shot. In my haste to reload I found I had put the bullet in before the powder (what boy has not had the same experience). But I was prepared for this emergency, and pulling a goose quill from my pocket, I put it over the nipple of my gun, and patiently picked enough powder in the gun to blow the bullet out. The squirrel showed a very accommodating spirit, and still hung to the tree. I then tried him again, taking a rest in the convenient forks of a sapling. This shot was a success, and when I picked up the first trophy of my skill, to say that I was proud would scarcely do the subject justice. I took my game and trudged home, and as I entered the house and laid my bag down I assumed an indifferent and nonchalant air, as if such a feat was too frequent with me to be a matter worthy of notice, and as if the amount of game I could secure was limited only by my opportunities.

This incident vivified the latent sporting instinct within me, and it has sent me into the fields regularly ever since. I have scattered much lead over the lakes and sloughs of the Grand and Chariton rivers in Missouri, and have burnt much powder in the pursuit of chickens and quail on the prairies of Kansas and the Indian Territory. For the past five years, and during my residence in Tennessee, the circumstances of my employment have been such as to render it impossible to gratify my taste in this direction, and with the exception of a day with the clay-pigeons I had not done any shooting for six years. But all this time anticipation has been active, and enjoyment waited only upon opportunity. Last August I received a telegram telling me that a near relative was dangerously ill in Missouri. I took the next train for St. Louis, and the next morning was on the well equipped Wabash R.R. thundering over the beautiful prairies of North Missouri. When I arrived at my old home I found my relative had rallied, and so rapid was her recovery that in a few days I felt myself at ease to renew old acquaintances, and to enjoy this always charming and picturesque prairie country. On the 14th of the month I received a letter from a brother living in Audrain county, asking me to join him on a chicken hunt on the 16th of the month. In that State the close season as to pinnated grouse expires on Aug. 15. When I first read this letter I felt that my brother was indulging in a little irony when he said "chickens." For did I not recall the fact that years before when I was a resident of Missouri the market hunter and the game hog had gotten in their work to such an extent that chickens had become merely a memory? But some of my friends called my attention to the fact that the sportsmen of the State had taken notice of this wholesale and wanton destruction of the game of the State, and had secured the passage of a bill making the close season as to chickens and quail two years. This wise measure, coupled with the fact that the birds had been especially favored by having two fine nesting years, had caused them to multiply very rapidly, thus illustrating what favorable legislation will do in the line of game protection. My brother wrote me that he would provide me with a complete outfit, and that we would find birds plentiful.

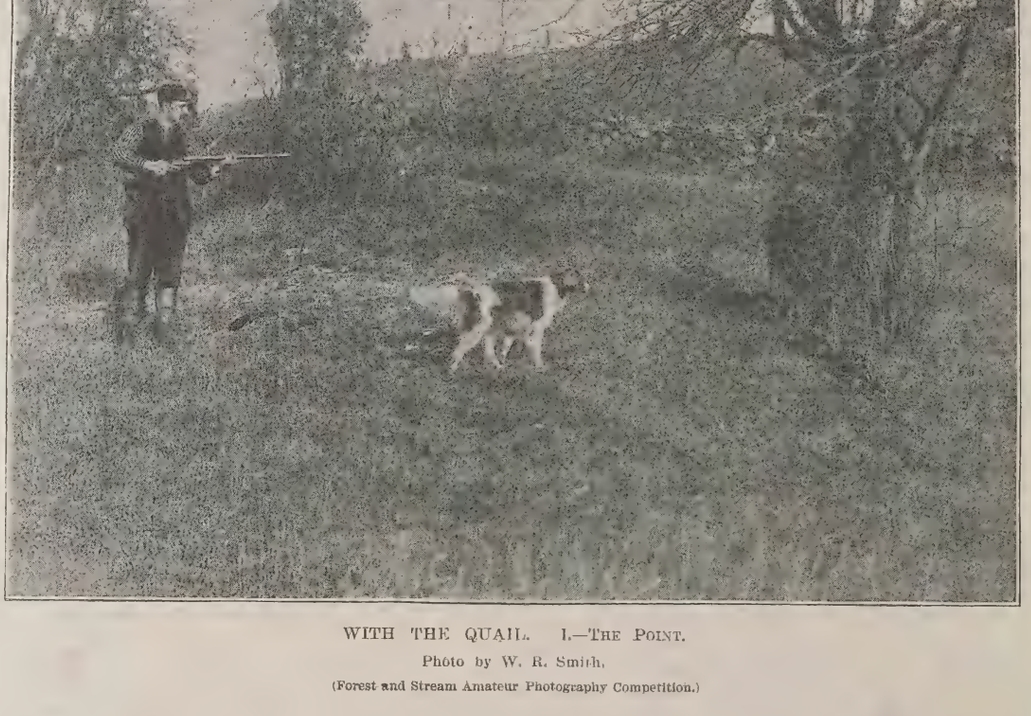
While congratulating myself upon this pleasant prospect and the happy turn which my visit had taken, the spectre of doubt and distrust intruded itself upon me. It said, "Better let this hunting trip alone, old man. You are too old for this sort of thing; your eye is not so keen nor your fingers so quick as they once were. That elasticity and buoyancy of youth, which give zest to such an occasion and enable pleasant dreams and demonstrate that for you, at least, there is no more plea ure in this thing. Better enjoy the ideal than have your dreams dissipated by participating in the real. In short you had better kill your grouse and quail while sitting by your pleasant fireside with wife and children about you, pipe in mouth and a copy of FOREST AND STREAM in your hand. You will then never realize that one of the loved children of your imagination has been taken from you."

I compromised with this disturber of my peace by agreeing that this should be a test case, and that I would allow "the proof of the pudding to be the chewing of the string." Then, too, I was reminded of the dog in the fable who lost the substance by grasping at the shadow.

And now comes the experiment. I met my brother at his home, and found all the necessary arrangements made. Our party consisted of Messrs. Lex and Pedagogue, my brother and the experimentalist. The birds had been located in the neighborhood of Rush Hill, a prairie station on the Chicago & Alton R. R., about ten miles from our starting point.

Before daylight the next morning we were off with a good team and a large hunting wagon, in which we stowed guns, dogs and an elegant lunch. Never shall I, who had for five years been hemmed up in the narrow and hot streets of Nashville, forget this ride. We drove over a beautiful rolling prairie country, well tilled, and giving evidence of prosperity. The weather was cool and bracing, the morning an ideal one. I drank in the pure air of the prairie, and the languor which had been my companion for a year left me. Wafted upon the breeze would every now and then come a peculiar fragrance which would recall events which had transpired years ago. The almost forgotten whistle of the plover was heard. The frogs, the peepers, and the million unclassified things which make the sounds of night were holding a concert, and just as we reached Rush Hill, away out where the prairie ended and the sky commenced, the great red ball which we call the sun was rising. I said to myself, "this of itself is enough, if I never see a chicken again."

At Rush Hill we had a valuable addition to our party. His name was not Squills, but for the purpose of this article that name will do. Riding over the country in his capacity of country doctor he had learned a thing or two about chickens. He was the fortunate owner of a one-eyed, stump-tailed, many-scarred and generally disreputable looking pointer. This dog would never receive "vhc." in a bench show, unless these cabalistic letters meant Very Hungry Cur. Nor would he be regarded with anything but ridicule in a field trial. But he proved himself a good illustration of the fact that "you can't sometimes most always tell," and that first impressions are often wrong. He was without pedigree and was just simply dog, but he knew where to find chickens, and found them without any striving for effect; and when he had found them, and you had succeeded in killing a bird, he brought it to you in a businesslike way, and then went off and found more.



We drove out two miles from Rush Hill and stopped at a large pasture where the grass was rank. Len and my brother proposed that they should take Squills and the dog and work across this field, and meet the wagon at a given point. We watched them for some distance, and becoming impatient Pedagogue suggested that we take to the field and try to walk up some chickens. We sent the driver ahead with the wagon and crossed the fence, walking about 100yds. apart. We had not gone 300yds. when up with a roar like unto a cyclone rose a covey of full-grown birds to my right. My heart climbed up into my throat as I heard the roar of their wings and that peculiar and almost forgotten cluck. Quickly swinging on to them, I got a bird with each barrel. We marked them down and again walked them up, two more being added to our bag.

We soon joined the rest of the party, and together worked a large stubble field. Old Don was not long in finding the birds, holding them as staunchly as if he had been suddenly refrigerated. When flushed, it proved to be the largest covey I ever saw, and they left six of their number on the grass. Don in his matter-of-course way retrieved the birds, and we then worked four more fields with such success that when we reached the pretty grove where we intended to lunch we counted out a bag of twenty-two chickens.

The large hamper was taken from the wagon, and I commenced to unpack it. Here was cold chicken, deviled ham, sardines, beaten biscuit and jelly. Then with a restful feeling we lay in the shade, smoked our pipes and wondered how we came to miss this or that bird. The gun which didn't fit and the defective shell as usual were to blame for it all.

About 3 o'clock we took another course with success even better than that of the morning. For me it had been a red-letter day. The air had been cool and bracing, the walking dry and easy, the party composed of gentlemen. As we drove homeward through the dark I laid in the wagon with a sense of healthy fatigue. I watched a bank of clouds slowly rising in the west, I lazily watched the lightning mark its ragged course across the clouds. I heard the muttering of the thunder and felt myself *en rapport* with nature. I said to myself, this experiment has been a success.

## PATTERN.

WHAT is the best pattern to be obtained from a shotgun for all-round use? Before the invention of the chokeboring the answer was, "The closest pattern that can be produced," and the reason for this was that even the very best guns rarely put more than 120 to 130 pellets on a 30in. circle at 40yds., when loaded with 1¼oz. of shot containing 270 pellets to the ounce, and 3drs. of strong powder.

Chokeboring, though of great advantage for many kinds of shooting, has without doubt been carried to excess. The ticket given with a new gun always states the pattern it makes at 40yds. A much more important point for a great deal of the sport followed in America during the beautiful "fall" season is the pattern, or rather the killing circle at 20yds. By the words "killing circle" I do not mean the width within which the game may often be killed, or wounded, by stray pellets, but that space within which it is nearly certain to be bagged through being struck by not less than three pellets.

Those sportsmen who had much experience in the days before chokeboring was known, will certainly admit that for shooting at such game as ruffed grouse, rabbit, quail, snipe, and above all, woodcock, no weapon could have been more satisfactory than the old-fashioned cylinders, when bored to distribute their shot with evenness.

Among my guns is a 14-gauge muzzleloader by Purdey, made, of course, many years ago, but in as perfect condition as when it left the factory. Its pattern of 20yds. nicely fills a 30in. circle to the very edges. And this is what has been, and is now, done by good 12-gauge cylinder breechloaders.

Trials of guns in this country being almost invariably made with No. 6 shot containing 270 pellets in one ounce, I refer only to that size in the following remarks about average patterns obtained during experiments with my own guns. A medium choked 12-gauge putting 160 pellets on the 30in. circle at 40yds., when loaded with 1⅛oz. No. 6 shot and 3drs. of powder, has a killing circle of only 23in. at 20yds. A full-choke putting on 210 pellets at 40yds., has a killing circle only 18in. wide at 20yds. A 16-gauge full-choke which with 1oz. of No. 6 shot and 2¾drs. of powder makes a pattern of 180 pellets at 40yds., has a killing circle of 15in. at 20yds., and if slow burning powder, like Curtis & Harvey's brown, be used even in 3drs. charges, the circle is not more than 12in. in diameter.

A No. 16 medium choke, the pattern of which is 150 at

40yds., has a killing circle of 18in. at 20yds. It will thus be seen how greatly the average sportsman is handicapped by using a chokebore for any game that is not very wild. In order to insure killing at 50yds., guns are constantly choked to such a degree as to sacrifice the advantage of a large killing circle at the distances within five out of six animals are shot.

Some men may say that they do not require a circle so wide as 30in. at 20yds., and certainly there are individuals, here and there, who do good work with less, but for nine out of ten sportsmen, every inch added to the killing circle is a decided advantage. This will be evident if we consider the kinds of shot which are of frequent occurrence. For instance, when we are walking through a wood the spaniel gives tongue in a way that shows he has started a rabbit. The gunner stands ready, but all he has to fire at is a flash of fur crossing an opening 2yds. wide among the trees.

A ruffed grouse rises from some low bush 20yds. distant and instantly darts from the thickest part of some tall bushes 5yds. further on.

WITH THE QUAIL. II.—THE SHOT.

Photo by W. R. Smith.

(Forest and Stream Amateur Photography Competition.)

The sportsman is straining up the muddy bottom of a ravine when a spaniel puts up a woodcock among some tall alder bushes on his right. The bird tops the bushes, and, unless killed at once, he quickly puts a tree between himself and the gun. Under such circumstances snap shots must be taken, and it is impossible, even with the best fitting gun, to cover the game with the same exactness as when calmly standing in front of a trap shooting pigeons.

Some argue that a chokebore is more merciful than a cylinder because it either kills on the spot or misses altogether. This theory is not borne out in practice. The majority of men who miss do so by firing too low and too much behind. The chokebore is therefore liable to hit the lower or hinder part of the belly and allow the game to escape wounded, when, with the same aim, the larger killing circle of the cylinder would envelope the game and kill instantly.

It should also be remembered that, with the majority of chokebores, there are numerous stray pellets just outside the mass of the pattern, which are very liable to wound without stopping. To sum up, I believe the balance of advantages to be decidedly in favor of a cylinderbore for all brush shooting, and even for snipe and quail in the open, a gun should have only one barrel choked, and that to make a pattern of not more than 160. Such a gun will be very effective even at ducks when these are put up by a dog from the sedges on the borders of a lake—or shot from a dugout when the sportsman is being poled through beds of wild rice. Doubtless shots are often made at ducks so far distant that a full choke is desirable, but I was much struck by a remark in an interesting article upon duck shooting, published last year in FOREST AND STREAM. It was written by one of the most celebrated duck shooters in the States. He said that most of the ducks killed were picked up within the decoys and that he did not anchor the furthest of these more than 30yds. from his blind. On reading that, the idea occurred to me that there is no necessity for any one but a market-hunter carrying a heavy 10-gauge gun. I have killed large numbers of ducks with a 12-gauge cylinder loaded with 3¼drs. of powder and 1¼oz. of No. 4 shot, 170 pellets to the ounce. And this load can be fired comfortably from a properly made gun of 7lbs. weight, or 7¼lbs. if the sportsman has many shots in rapid succession. With a 12-gauge full choke the load can be reduced to 1⅛oz. of No. 4, and this will kill ducks well up to 45yds.

Opinions differ as to the best size shot for use in a cylinder gun when a variety of game is liable to be met with. The favorite size in this country is No. 6, but its pattern of 130 is not sufficiently close at 40yds. for birds the size of American quail. By trying shot a little smaller—reducing its weight and increasing the quantity of powder—the extra closeness can be obtained without decreasing the killing power. The increase of powder must not be carried too far, as it is more liable to scatter the shot in a cylinder than in a choke. With a 12 gauge cylinder of my own, when No. 7 shot, 340 to the ounce, was loaded in the same proportions as No. 6, it was thrown in thick clusters with wide spaces between them. When the shot was reduced to 1oz. and the powder increased to 3¼drs., the pattern at 40yds. was beautifully even and close. When the same weight of shot was used and the powder increased to 3½drs. the regularity was maintained but the pattern was too open.

Care should be taken not to decrease the size of the shot too much or the penetration will be greatly reduced, no matter how much powder be used. I loaded six cartridge cases with 3drs. of powder and 1⅛oz. of shot containing 260 pellets in an ounce, and six with 3¼drs. and ⅞oz. of shot containing 392 in an ounce. These were fired at 40yds. from a 12 gauge medium choke at strawboards placed 1in. apart in a rack, and the penetration by not less than three pellets noted, so as to eliminate errors that might arise from differences in size of pellets. The penetration of the larger shot was 10, 10, 10, 11, 11, 11—average 10⅔ strawboards. That of the smaller shot was 8, 9, 9, 8, 7, 7—average 8 boards.

Two cartridges were then loaded with 3drs. and 1¼oz. of shot containing 204 pelless in an ounce. The penetration was 11, 12—average 11½.

This experiment shows how much more the penetration, at all but short ranges, depends upon the weight of the shot pellets, than it does upon the driving power of the powder. So rapidly does momentum decrease with weight that it is doubtful if any quantity of powder that could be used behind No. 9 shot would give as much penetration at 40yds. as No. 6 has with the ordinary loads.

An ounce of shot containing about 340 pellets, driven by sufficient powder, is a very deadly load for all-round purposes out of a cylinder gun. It is good for rabbits, partridges and quail. It kills ducks well within 30yds. It is perfect for woodcock and fairly satisfactory for snipe.

WITH THE QUAIL. III.—THE RETRIEVE.

Photo by W. R. Smith.

(Forest and Stream Amateur Photography Competition.)

ADIRONDACK NOTES.—Northwood, N. Y., Oct. 16.—Noticing an item about panthers screaming, in FOREST AND STREAM, I made a few inquiries among the woodsmen here. Those that had seen them said they screamed. One heard one in the spring of the year. He was positive, for the yell was but a short distance from the campfire and the tracks were found the next day. Johnny Jones saw one yell once several years ago. The woodsmen seem to agree that the panther screams in the spring of the year when they are looking for mates. Does it not seem reasonable that a panther should wander about the forests screaming for a mate as does the common house cat?

RAYMOND S. SPEARS.

## THE NEW ENGLAND GAME SEASON.

SATURDAY, Oct. 15, was the opening day of the season on quail in the Old Bay State. Boston gunners were out in good numbers, for the day was especially fine. The sun was almost bright all day, though not quite—one of those perfect Indian summer days, with no wind worth mentioning, and the air sufficiently warm for comfort. A number of men who could not get out all day, were hurrying off at the early closing Saturday afternoon, and many of the suburban trains carried guns and gunners. In some cases the flocks of quail were located, and had been for days, the sportsmen waiting honestly for the beginning of the open season. Quail have seemed to be plenty all along—thanks to the efforts of the Fish and Game Protective Association at restocking—but how the game bags will be filled, now that the open season has come, is a question that it will take a couple of weeks to answer.

Mr. J. F. Dwinell, of Dwinell, Hayward & Co., is absent at Upton, Me., for his annual partridge hunt. Doubtless Loomin Sargent will guide him, as ever. Mr. Dwinell visits this section every fall for grouse hunting, and in years gone by he has made some remarkably good bags. During a stay of three or four weeks his score has run up to over 100 birds. He says that he has never shot a deer or seen one, for that matter, on these hunting trips, though his hunting is in a section where deer are generally plenty.

Mr. D. J. Flanders, general ticket and passenger agent of the Boston & Maine Railroad, is just out from a hunt, in the vicinity of Tim and Bartlett Lake, in Maine. He was accompanied by a brother and two friends, and they had good success. Mr. Flanders shot a deer, and one of the other gentleman a fine buck deer. It is also claimed that the other gentlemen of the party shot two bears.

There are reports of another moose killed in the vicinity of Salem, Me., last week. A gentleman from Lewiston, Me., says that the meat was sold in that city. He gives the following account of the hunt. A woodsman, looking for timber, came upon the moose in a bog, between Salem and Phillips, and fired a charge of buckshot into him, when he was broadside on. The shot did not stop the big fellow, however, and he took up the stream that leads into the bog at a sharp trot. The woodsman did not attempt to follow the moose that night, but returned the next day with three of his neighbors. They soon came up with the animal, which was too badly hurt to run very fast, and one of the men fired six shots from a Winchester repeating rifle into him. But all of this shooting did not stop the big moose, and the men followed all day. The next morning they were at it again, and early one of the men got a good shot and brought the moose down. From all accounts, there are more moose in Maine this year than for a number of seasons. If newspaper accounts are true, there have also been killed and seen a number of caribou. I came across some Boston sportsmen the other day, lately returned from an extended tour through the region of Maine north and east of Moosehead Lake. They say that they saw a number of moose, and a great abundance of moose signs. They were there before the open season begun, and though not admitting that they killed moose in close time, they allow that they did not go without moose steak. One of them remarked that "the fine is too high for a fellow to admit all he does in the woods." I cannot give the names of these hunters; for the story comes to me in confidence, but they must not blame me if I declare it to be an outrage to shoot down a noble moose in the woods at any time and leave it to spoil. Such hunters are aware, before they shoot, that the animal cannot be of any use to them, beyond a couple of tough steaks, to be cooked in temporary camp. The fine is such that they dare not attempt to bring the animal out, even if situated so that such a thing would be possible.

But not all of the deer hunts of the season have proved to be for deer. It is a little undignified to admit, but some of the boys have been after sheep. At the upper end of Richardson Lake, one of Androscoggin Chain, some very small deer (?) tracks have been seen all the fall. Guides and sportsmen have tried to find them, but without success. But finally one morning, late in September, the mystery was solved. There appeared near Birch Lodge three actual sheep with wool on. They had yokes on too instead of antlers probably—the ordinary farmer's sheep-yoke, made from a crotched branch with a cross piece, the sort used to prevent unruly sheep from getting out of pasture. But where did these sheep come from? There are no farms or settlements within 15 or 20 miles. The nearest settlement to where the sheep appeared would be the upper Magalloway, at least 15 miles of woods and mountains. The only explanation is that the sheep must have strayed from that settlement. But how did they escape bears and other dangers, is the question. When found they were as wild as deer, and immediately made for the woods. After this they were frequently seen by hunters and others, but always very wild. Finally some of the guides decided that it would be best to shoot them, the same as deer, since, by no possible chance, could they survive the deep snows of a winter in that region, even if they long escaped bears, which are known to be abundant in that section. But it has proved to be no easy job to hunt and kill them, though I learn that one or two of them have been secured. The guides say that they were almost as difficult to approach as deer, apparantly hearing and scenting the presence of the hunter as quickly as deer, while lacking the curiosity that prompts the deer, not hunted excessively, to turn and look when the hunter is first espied. They would stamp their fore feet, blow and make off at tremendous speed, very much as deer do. How would it do to stock the Adirondacks with sheep of this sort? With a little feeding they would survive the winters of that part of the country, and the fellows who are satisfied to go up there and drive deer into the water with hounds to be killed, ought to be satisfied with respectable sheep hunting. SPECIAL.

### From Lake Erie.

DUNKIRK, N. Y., Oct. 9.—A few days ago Frank Meehan, while fishing about a mile off Point Gratiot, in Lake Erie, caught a silver eel nearly 3ft. long. Squirrel hunting in the woods southeast of this place is unusually good this year, and large numbers of the frisky tree jumpers are being taken daily. A party of six buffalo hunters got thirty-seven blacks and eight grays in an afternoon's hunt recently. Dunkirk, although not a sportsman's paradise, can afford very good sport in the way of hunting and fishing. There is excellent black bass fishing here and good hunting for squirrels, partridges, rabbits, ducks and snipe. Large numbers of canvasbacks are shot here every fall. The fishing tugs very often bring in hundreds of ducks which have been captured in the nets. They dive for the fish and get their feet entangled in the meshes. Some of the tug owners made a good thing of it last winter, as the ducks commanded a good price in the markets. P. S.

## CHICAGO AND THE WEST.

[*From a Staff Correspondent.*]

CHICAGO, Ill., Oct. 11.—Attention has often been called to the South as a game country. Under date of Oct. 9, Mr. Jos. W. Irwin writes me from Little Rock, Ark., as follows:

I saw your notice about Mr. W. W. Carney, who is an intimate friend and schoolmate of mine, and has visited me here since he left Great Bend, Kas. He is a great fellow. I notice you have frequent inquiries from gentlemen wanting shooting and fishing in Arkansas. I can give a party of shooters for pleasure only fine quail shooting right here, and can send them from here in every direction, where they can get deer, turkey and bear shooting, within twelve to fifty miles from Little Rock. Fishing for bass, pike and jack salmon is very fine and easily reached from here by rail.

I recently killed a fine deer twelve miles out, and last season I bagged nearly 1,000 birds. Mallard shooting is also very fine here in November. A friend and myself killed 80 in one and one-half days last year, and 40 quail on the same day.

Only gentlemen who want pleasure and sport need come, for our laws will not allow exporting game. I am well known in Chicago, by Col. Felton, Ed Bingham, Charlie Willard, A. J. Atwater, and others. J. W. IRWIN.

### "The Hell-Diver"

Mr. Ben King, otherwise known as the Michigan Bard, who has figured as a public attraction, I believe, in combination with Mr. Nye and Mr. Burbank, has published a poem under the title of "The Hell Diver," which reads as follows:

The lingering loon flies over the marsh,
The night birds nestle in dew,
The river is cold and the wind is harsh;
But what is that goes cuh-choo?
Oh! what is that goes cuh-choo, cuh-choo?
Oh! what is that goes cuh-choo?

The snipe shoots up from his lushy bed,
And wings toward the realms of blue.
Wild lilies soak where the bullfrogs croak:
But what is that goes cuh-choo?
Oh! what is that goes cuh-choo?
Oh! what is that goes cuh-choo?

O'er the whispering reeds the rice hen speeds,
And the meadowlark's singing anew,
And I know in the swale the song of the rail,
But what is that goes cuh-choo?
Oh! what is that goes cuh-choo, cuh-choo?
Oh! what is that goes cuh-choo?

A lot of this realistic ruralistic "poetry" which nowadays is run in on a helpless public makes me plenty tired. I don't mostly find loons lingering over marshes as much as over open water, nor "night birds" nestling in the dew so much as out of it, when they are not hustling rather than nestling. There are only some days when the snipe "wings toward the realms of blue," and on those days you don't find snipe in a "lushy bed" so much as you do toward the edge of the marsh, and certainly they don't seek the realms of blue at the time the bullfrogs are croaking. It is not my fortune to find rice hens and meadowlarks very much together, and I don't remember ever to have heard the "song" of the rail in the swale so much as in the plain marsh. Of course my experiences may have been different from those of the Michigan Bard. Still, if he is so blame anxious to know what is that goes *cuh choo, cuh choo*," I don't mind telling him that it isn't a hell-diver. It's a man with a bad cold. If Mr. King isn't afraid of taking a bad cold himself, it might be a good thing for him to go out of doors a while before he writes his next realistic, marshly, wetsome pome.

### Horicon Way.

There is some talk that Mr. P. F. Stone will be invited to take charge of the financial matters of the Horicon Club, and handle its unsold memberships. Mr. Stone made the Diana Club the financial success it is, and should the "upper club" intrust itself to his policy, he would quickly build up an organization equally strong. It is thought that many shares could readily be placed in Chicago.

Mr. C. B. Dicks left Tuesday for a week on Horicon Marsh. Mr. Stone and probably eight or ten others go up Friday. Granted a change from the present warm weather, they may meet heavy shooting.

The snipe are on this parallel. Our esteemed fellow townsman, Italian Joe, bagged 47 one day this week near Lemont, on the Des Plaines River. Charlie Antoine went down with him to-day to Lemont for a try at the snipe. Joe has been killing a fair lot of golden plover in the past few days.

The season has been an unusually good one for wildfowl all over the West, though the main flight is probably not yet down. Snipe have almost certainly, and ducks have very probably, worked back north a little this week, as the weather has been very bright and warm. The flight of the fowl is rarely straight on through from north to south.

Mr. Chas. Holden, with friends, has gone for a deer hunt in Wisconsin. Is Dr. Thomas in the house?

"Dr. Thomas, this is Mr. Fernandez, the Wisconsin game warden; Mr. Fernandez, Dr. Thomas."

Dr. Thomas—"Aw!"
Mr. Fernandez—"Aw!"
Dr. Thomas—"Er—"
Mr. Fernandez—"Er—"

175 MONROE ST., Chicago. E. HOUGH.

### Game in the Hudson Valley.

HUDSON, N. Y., Oct. 10.—The season here for the breeding of game birds has been good and more quail have been hatched in this county this season than ever before. No flight woodcock have reached us as yet and but very few ducks have put in appearance on the river. H.

### An American Sportsman in the Alps.

FEW sporting gentlemen traveling in beautiful Tyrol would think of lightening the monotony of the bad weather experienced last week by making up a party for chamois shooting. The entire range of mountains surrounding Innsbruck was covered with snow, and competent hunters prophesied a certain amount of success. The party consisted of Mr. Edward H. Litchfield and son, of Brooklyn, Mr. C. Felix Zotti and eight beaters, and started from the Hotel Tyrol, Innsbruck, on their difficult enterprise, accompanied by the genial owner of the extensive shooting ground, Mr. Louis Hepperger, who, bye-the-bye, has a cosy shooting box at the top of the Hallthol, replenished with the necessaries of life and very comfortable sleeping quarters. After six days absence the party returned highly delighted with their successful trip, having shot several head of chamois and some roebuck in the forest below. Discomforts were naturally experienced, especially in scaling the higher peaks, by the snow, which fell continually for the first four days; but that was well repaid by the extensive and glorious panorama which was witnessed the last two days, and was seen at its best. One could distinguish with ease twenty-six villages in the Inn Valley. Mr. Edward H. Litchfield and family, after having spent a thoroughly enjoyable time in the Tyrol, start for Venice and the Italian Lakes, accompanied by their courier, Mr. C. Felix Zotti.—*Galignani Messenger, Paris, Sept. 25.*

### Some Boston Reports.

BOSTON, Oct. 15.—Reports of good bags of quail, made since the opening of the season, begin to come in. It is estimated that more than fifty quail were taken in the vicinity of Reading on Saturday. Mr. E. M. Gillam, of the Boston *Advertiser*, with his friend Mr. Reaser, with the Walworth Manufacturing Co., was out in Reading on the second day after the open season. They took three quail apiece, then a disagreeable rain set in, and they gave up the sport. Mr. C. Z. Basset, of G. B. Appleton & Co., with his friends, Mr. Thairlwal and Dr. Langmaid, are having good sport with woodcock at their ranch in New Hampshire, the name of which they keep to themselves. For several days Mr. Basset has taken eight and ten woodcock a day, but very few partridges. Only now and then a partridge is secured—not one to half a dozen last year, and not more than one to a dozen woodcock.

SPECIAL.

### Comparative Powder Tests.

RED BANK, N. J., Oct. 11.—*Editor Forest and Stream:* I herewith hand you abstract from the powder test in Europe, as found by the commission appointed, taking the best brand of black powder for a base:

| | Average gas pressure in atmospheres. | Greatest variations. | Eveness of pressure. |
|---|---|---|---|
| 84grs. black powder | 473 | 24 | 6 |
| 42grs. Schultze | 921 | 285 | 2 |
| 42grs. E. C. | 860 | 323 | 1 |
| 29grs. Walsrode | 661 | 87 | 4 |

The trials still continue, the powder being subjected to heat, dampness and low temperature, etc., etc.

O. HESSE.

### An Ohio Close Season Suit.

THE suit in which Ed Roth, of the St. Nicholas Hotel, is being prosecuted for selling quail out of season, was before Judge Evans yesterday on appeal from the judgment of 'Squire Tyrrell. The issue raised was as to the constitutionality of the law under which the action was brought. Judge Evans, as is customary in the lower courts, announced a *pro forma* decision, holding that the law is constitutional. The case will now be taken to the Circuit, and probably thence to the Supreme Court, in order that an authoritative decision upon the question may be obtained.—*Cincinnati Commercial, Oct. 15.*

### A Handsome Fish Piece.

MESSRS. WM. W. HART & CO., of 11 Jacob street, this city, are mounting a muscalonge 4ft. 2in. long, and weighing over 30lbs. It is a fine specimen, and as they are exceptionally fine in fish mounting, it will be well worth a visit to their place to see it when completed, which will be in three weeks.

### Maine Moose.

WILL "Fair Play" send us his address? The article sent cannot be printed unless its author is known to us.

### Mass. Fish and Game Protective Association.

A REGULAR meeting of the Association will be held at Young's Hotel, Boston, this evening.

### Hunting Boots.

THE hunting boots advertised by "Cammeyer" in our columns are beauties and reasonable in price considering the quality of manufacture. One is always sure to get a first-class article in footwear when ordering from this house, and readers of FOREST AND STREAM should send for their catalogue, which is mailed on request.—*Adv.*

QUAIL SHOOTING can be had anywhere within 10 miles of Winston, N. C. Heart of Piedmont section. In view of the Blue Ridge. Four railroads in four directions. Good country roads. Twelve hours from Washington, double dailies. The completest 110 roomed hotel in the South. Elevators, steam heat, electric lights, cars. Rates moderate. Correspondence solicited. THE ZINZENDORF, L. W. Scoville, Manager.—*Adv.*

## THE LOST CHORD.

It was not Mr. James Van Dorn's fault that he stood there up to the waist in the middle of the creek. It certainly was not his fault that in hastily taking up this cool position he had slipped and fallen completely under water. It certainly was not his fault that the bosom of the tide had borne his fish-basket far beyond mortal ken, or that the same unruffled bosom—it had acquired that evidence of perfect self-control—concealed his new $12 split-bamboo.

Yes, I really agree with Mr. James in thinking himself entirely blameless for looking like a drowned crazy quilt, where the color of that sonorous cap and blazer had run down over his usually bright, but now brighter, face and soft white hands. Yes, I could pardon him for these plausible excuses, considering his unusual condition and his unenviable and uncertain social footing—there were slippery stones and snakes in that stream—also when I considered the effect his appearance would have on Mrs. Van Dorn, who prided herself on the general nattiness in the presentation of her charge.

But I feel you are anxious to know why he stood there in the water.

Why did he not go ashore?

To tell the truth, he could not swim, and on three sides of him the water was too deep for wading, and on the fourth—well, you see, Van Dorn had always entertained a horror of being joked over by a coroner and his jury; naturally a trifle sensitive regarding jokes; practical jokes, anyway.

It was one of those glorious mornings in late autumn when all nature seems trying to throw off the firm grasp of approaching dissolution; like an hectic flush was the morning sunlight charming the ashen fields into a smile, and making doubly bright the beauteous flaming wildwood on either hand, where gayer and more joyous colors were still heightened by the seeming frown of tall and somber evergreens there interspersed as if to chaperone the giddier maple, chestnut and birch, around which clung the vine's voluptuous richness whose beauty could only be brought out as upheld to view by the fostering strength of their gay protectors.

It was a morning when unseen hands from beyond the shimmering mist of the distance seemed beckoning one out to partake of the last feast, where nothing would be spared to immortalize the sublime magnificence of the declining year. Feeling the resistless power of those unseen hands, that morning we, four of us, started out from our retreat at the appropriately-named "Woodbine," and wandering through field and woods, at high noon struck the path which led us homeward by the side of the brook, in the soft shadows of whose tree-lined banks we would long have rested had not mortal desires, necessities, held sway.

As we walked a silence fell upon us all—silence only broken by two or three unnoticed shouts in the distance ahead—and, in the lapse from the preceding light conversation, it was only natural, on that misleadingly glorious morn, that we one and all should be thinking of the evanescence of life and earthly glory—perhaps we were a trifle tired with our long walk.

As we had proceeded thus for several moments, one of the young ladies, in starting the sleeping echoes from the hill at our right, echoed also the thought of each by commencing to sing in a clear, sweet soprano that beautiful little song, "It is not Always May." She had sung only to the first two bars when tenor, alto and bass filled out the delightful harmony.

The absorbing charm of the song, in its beautiful harmonic resolutions, seemed but to drown the shouts, which were nearer than before, and to banish them from our thoughts in the sentiment of the poet.

The quartette sang on, while the thought of the one in need of help ran along too, but not in unison—

The sun is bright, the air is clear—

("But a trifle chilly to one in the water"—this with chattering teeth.)

The darting swallows soar and sing—

("Why don't the blanked fools sing or pray, 'Oh, That I had Wings'—they'll be *sore* enough if they continue coming in this direction.")

And from the stately elms I hear—

("Well, that's a trifle better—snakes can't climb trees.")

The blue bird prophesying spring—

("You can imagine she aint a prophesying anything like spring, unless her name is Wiggins er Beebe.")

So blue yon winding river flows—

("Yes, blue an' cold as b-b-blazes. Hey you there! but it's no use, they're deafer than adders when they're singing that idiotic song.")

It seems an outlet from the sky—

("That's about my only outlet, I guess"—this with the resignation of despair.)

Where waiting till the west wind blows—

("George! that won't be till after sunset.")

The freighted clouds at anchor lie—

("I'm anchored, fast enough," and with this effort, the mind seemed to lapse into coma through several lines.)

All things are new, the buds, the leaves,
That gild the elm tree's nodding crest,
And e'en the nest beneath the eaves:
There are no birds in last year's nest!

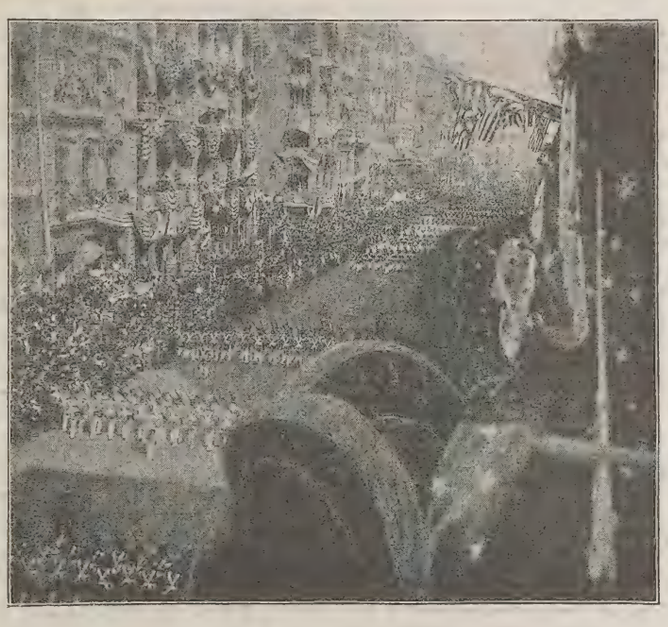
("Huh! last year's bird's nest, every head in that gang!")

All things rejoice in youth and love,
The fullness of their first delight,
And learn from the heavens above
The melting tenderness of night.

Maiden that hear'st this simple rhyme—

("You're way off this time. No maidens listenin' to your simple rhyme; Hey! Hi! Help! Murder! But what's the use o' shouting.")

Enjoy thy youth it will not stay—
Enjoy the fragrance of thy prime,
For O, it is not always May!



("Sometimes January er can er—it's already mussed with me.")

Enjoy the spring of love and youth,

("Help! Hey! Snakes! Fire! Thieves!")

To some good angel leave the rest,
For—

Here our quartette had advanced around a sharp bend in the creek which the path followed, and the next chord was lost in a piercing shriek, for our ladies beheld, at no great distance, an angry animal pawing the dirt over his back, and then for the first time we heard his muffled roars mingled with the now intelligible yells for help which came from below the bank.

A BIT OF THE COLUMBUS PARADE.

As seen from the Forest and Stream office.

Amateur photo by H. W. Lacy.

Fortunately the animal was too engrossed with his prisoner to take any notice of us regardless of a red parasol carried by one of the ladies, so we were able to beat a dignified and safe retreat. The ladies with one escort hurried home, and I hunted up the farmer, who with the aid of a large bulldog, removed the angry sentinel to another field; and then I went over and found our almost exhausted, fainting fellow boarder, Van Dorn, who tried to excuse his position and appearance as in the opening of this brief tale.

It did not take the acumen of a funeral director to understand that Mr. James felt very bad over the affair, which feeling seemed to grow on him as we drew nearer and nearer home. He rather hung back at the thought of meeting his guardian, Mrs. Van; and as the thought drizzled down deeper and deeper, and seemed to dry on in the color of that blazer, there dropped a tear or two into the dusty roadway.

As we turned in at the Woodbine gate, it was not regret that his stay in the country was drawing to a close, or that this was doubtless the last fine day of the season, which prompted him to look all round at the gorgeous landscape; one last long look, before he should be ushered into—the presence of his better half.

The boarders could scarce repress a smile as they beheld the water-logged wreck of what that morning had been the daintiest of little men; yet there was naught but pity in their hearts as they saw and understood his nervous hesitation.

We heard his door on the corridor open, and a not altogether friendly voice remark, "You're a pretty looking specimen!" and then the door gave a tremendous punctuating bang, and all was still—save a sigh of the autumn breeze in the leaves of the woodbine draping the veranda.

RANDALL N. SAUNDERS.

### A Bad Case of Steal.

A BAD case of literary thieving will be exposed in these columns next week. The exposure will be of special interest to our readers in Boston.

*Charmingly Illustrated* — "GAME LAWS IN BRIEF."

## "DRUMMING" IN NORTH CAROLINA.

THE silvery salmon of our northern rivers, the speckled beauty of our mountain streams, the majestic tarpon of our southern waters, and many others of the finny tribe have each their admirers, and the praises of all have been evenly sounded. Nor do I object to the adulation bestowed; from experience I know it is well merited in many instances, but I wish to add one more to the long list of candidates for piscatorial honors, nor should he take rank very far down the list.

Up to the latter part of August of this year the drum was to me an unknown fish. Since then I have made his acquaintance on several occasions; sometimes to my sorrow and loss, sometimes to my intense gratification.

The piles of the bridges spanning the sound, interposing between the mainland and the ocean, the wrecks scattered here and there along the beaches, but more especially the long stone dam separating the Cape Fear River on one side from the ocean, all form excellent feeding grounds for the handsome and toothsome sheepshead, and it was while fishing for that hard-pulling gentleman last August that I first met the drum. Four times in one day was my bait seized by something much too powerful for my tackle to hold, and four times did I mourn the loss of hooks and lines. On relating the sad experience of the day to one of the "knowing ones," the information was given that the drum had struck in and were biting. I thirsted for revenge and was soon equipped with the tackle necessary for the capture of the enemy.

A half hour's run on the steam cars and the glorious sand beach of the North Carolina coast is reached. Stretching along on either hand as far as the eye can reach runs the white sand, wherein the merry sand-fiddler digs his hole and rests after his labor. The long line of rollers as they come in solid-looking blues masses from the Atlantic strike on the outlying line of beach, from whence, changed into dazzling lines of foam, they rush up the sloping sands. But these breakers possess a new interest now, for in them sports the drum, relieving the monotony of existence by now and then chasing a school of juvenile mullet and selecting the fattest looking for his dinner.

While supper is being prepared a look at the outfit and tackle will be necessary.

The outfit is simple, a close-fitting bathing suit, worsted stockings, heavy boots and a broad-brimmed hat being all that is necessary. Do not shiver, my Northern friend, the water is warm and the air too.

For the tackle, a stout braided line about 125ft. long will do, braided because it will run out the more easily. At its further end is attached a lead sinker (1½lbs. I find a nice weight); and two, or if preferred three, ordinary cod hooks, placing them about 18in. apart. Nor must the bait be omitted, for we make an early start up the beach, but it can easily be procured. Ten or fifteen cents will buy enough fresh mullet to supply two lines for one tide's fishing.

The romance of the beach is gone and it assumes a grimmer aspect at 4 A. M. The roar of the breakers is there, with an occasional shimmer of white showing through the blackness, but a two-mile walk along the beach at that hour would not be undertaken by any one save an enthusiastic fisherman. But if the drum is to be caught it must be done, and with hopes running high we start. The walk seems long, but at last we reach a favorite spot. The outer clothes are quickly thrown off, the long line is carefully coiled in the left hand, the baits are well fixed, and grasping the line with the right hand about a foot above the top hook the venture begins.

It is an experience. The east is now showing signs of returning day. The first "roseate blush of morn" heralds the approach of Old Sol, but still it is dark. As you near the line of surf the breakers look bigger and more threatening. Ugh! At first touch the water sends a shiver up the spine, but no more. Watch the retreating wave, now swing the line, and as you follow the receding water increase the momentum. You have gone far enough; another powerful swing and away flies the lead; keep the coil on the left hand and let it run out gently. There, the lead has reached its limit and the line is taut.

The drum is not, so far as my experience goes, a quick biter, but when once he does take hold, to use a vulgarism, "he's all there." While waiting the east has brightened up. The light is stronger and surrounding objects are visible. How beautiful it seems now; how soft the air, how warm the—ha! he has struck, and a beauty, too. No dead pull there, but a shock like an electric battery. Out to sea he rushes; give what line you can. Now he has slowed up, hand over hand comes the line; but again, with a spurt worthy of a salmon, he's off. Again the line slackens and again the gamy drum comes nearer shore. A few more runs and he is played out, a quick run up the beach, and by the increasing light you see him, whiter than the foam, come safely ashore.

This, then, is the method of his capture, and to such of your readers as are not troubled with weak constitutions and who love fishing, especially when there is a spice of romance in it, I strongly recommend a day's drumming.

The drum is a really handsome fish; his nice, full, round body, small head and bright, silvery scales reminding one somewhat of his noble kinsman the salmon. In weight he varies from a few pounds to as much as 45lbs.; but a half dozen specimens of from 14 to 20lbs. will well reward any one for the trouble their capture has caused.

As a table fish, served up in almost any style, the drum is most excellent eating, and will, in that respect, outrank many of the finny denizens of the ocean.

All honor to him; he bites well, fights well and eats well, and if the appetite of the fisherman after a few hours' fishing may be produced in evidence, the sport is not only an exciting but a most healthful one. H. J. C.

WILMINGTON, N. C.

## KEKOSKEE.

*Editor Forest and Stream:*

I have just read, and must confess with some regret, the comments of Mr. C. H. Ames, of Boston, upon the interesting facts of natural history so circumstantially told by Mr. E. Hough in connection with Kekoskee. I cannot believe that any resident of Boston, the home of pure science (not to say the forcing house of speculative philosophy), would be moved by a spirit of jealousy of the scientific attainments of the West, to cast discredit on such a plain statement of fact so well authenticated by the evidence of disinterested witnesses, particularly when that evidence was examined and weighed before publication by so clear a mind as that of our friend Hough. (That he is logical, if anything, is proved by his analysis of the letter of the Rev. Dr. T.) I am, however, somewhat in doubt whether Mr. Ames intends to cast discredit on that interesting statement of fact by a sort of a *reductio ad absurdum* or to strengthen by the certainties of mathematics a case which he fears will be discredited by the public.

Such fears need not be entertained, and such support, however well intended, is unnecessary. We, who are so much nearer Kekoskee and the Widow Sneider and old Santa Anna, do not need to have our belief upholstered in any such way. The statement is published over the signature of the staff correspondent of the FOREST AND STREAM, and that is enough. We accept it. NUTMEG.

ST. LOUIS, Mo., Oct. 15.

## A FAVORED FLORIDA RESORT.

COLUMBIA, Ala.—When I made my annual visit to the Chipola or Cypress Lake in Calhoun county, Fla., in May, I found the fishing as good as I could possibly desire, and while I devoted much of my time to bream and shellcracker fishing, I caught enough black bass and jack to satisfy me. One bass weighed 9½lbs., another 6lbs., several 4lbs. and under; the catch of smaller kinds was simply surprising. I have not tried the fly as yet on the lakes because of the sluggish current of that portion of them that I have fished, as well as the numerous cypress stumps and knees which dot the lakes, but have used my fly-rod for the less noble purpose of catching bream and shellcracker (some of the latter weighing 1¾ to 2¼lbs.).

Several years since I began a series of articles in your journal with the purpose of calling the attention of the gunner and angler to the superior sport and advantages offered them to visit this lake. At the beginning of this correspondence it was almost a wilderness and the accommodation was anything but good. Now, after a lapse of a few years, there is quite a change. Fifteen years ago Raleigh Richards and wife and two or three children were the only inhabitants of "Jack's Hammock," the best spot on the lakes for crossing. Now there are two hotels and many private boarding houses, store, etc.

Old man Raleigh Richards, the pioneer of this region, was an illiterate, simple-minded, kind-hearted old man who entertained all visitors whom chance or inclination prompted to stay awhile on its captivating borders. He played the guide to the favorite haunts of the finny tribe, and placed the hunter on the right runways of the deer and bear. Poor old man, after years of trials and tribulations he laid aside his rod and tackle, his muzzle-loader and flask, and went to join the host of anglers and hunters who had gone to the happy hunting grounds. Peace to his ashes.

The months of March, April and May are the favorite ones for the angler. October, November and December for the hunter, though one so inclined can kill or catch plenty of game or fish in and out of season.

I know of no spot on earth so well suited to the overworked, broken down individual, as Chipola Lakes. Dr. Pittman, an eminent physician of La Grange, Ga., who with his accomplished daughters spends from October to May on these lakes, says they are the best natural sanitariums on the continent. Hundreds of lawyers, preachers and physicians go there to recruit their wasted energies, and go away pleased, and return again with others, to enjoy the fresh sea breezes laden with the healthful odor of the pine.

You can here in a few hours transport yourself from fresh-water lakes to the salt Gulf, which at the nearest point is only distant from two to fourteen miles. You can here find scattered along the lakes many valuable orange groves, from those just planted to older ones that have borne the finest fruit for twenty-five years and longer. This, too, is the home of scuppernong and other grapes. Pecans and sand pears flourish, and the lemon and other tropical fruits could be profitably grown. Here the market gardener has a perfect bonanza. Society is good, the people generous and hospitable—nothing lacking to make you comfortable and happy.

This vicinity is the natural home of the bee, and affords every facility in the way of orange and other sweet flowers for the making of by far the most delicious honey produced on earth. With many settlers the apiary is a prime industry and pays a handsome dividend (some owning several hundred hives, which they take honey from twice yearly). The hunter can yet find enough deer and turkey to interest him. Ducks and squirrels are numerous.

The angler finds all species of fresh and salt-water fish that are common to all the Florida lakes and Gulf, and I can assure them that after forty years, much of which has been spent in the forest and on the stream, I know of no locality in Florida, Georgia or Alabama, where the all-around sportsman can so well enjoy himself as here. I refer to Dr Pittman and A. T. Dallas, of Lagrange, Ga.; Judge Van Epps, Atlanta, Ga.; Judge A. Hood, Cuthbert, Ga.; Major Henry Shorter, Montgomery, Ala., or to Major J. C. Bryan, R. McCarty, J. C. Martin, Messrs. L J. Day, Puckett, Pruint and Gilbert, Iola, Fla., for any information wanted as to the lake. Or a letter addressed me care of FOREST AND STREAM will reach me and be promptly answered.

I would suggest to the Northern and Eastern tourists who annually visit southern Florida for sport and health, that if they would only come once to this favored spot, I know they will always return. These lakes are easy of access, *via* Savannah, Atlanta, Montgomery, Mobile, Pensacola, and other way points, all of which have railroads tapping the Chattahoochee and Appalachicola rivers. The fare on steamers is good, charges very low, board as good as you could wish on lakes at $1 per day.

The supply of food fish in Chipola Lake is practically inexhaustible. Two large rivers supply it with pure water, and hundreds of lagoons, estuaries and marshes connect with it and furnish their quota of edible fish. The fishing grounds for many years past have been confined to the lower quarter or the foot of the lake. The upper three-fourths are quite as well supplied with larger and less wary bass, jack, perch, etc.

The game laws of Florida are loose and not properly enforced, yet the natural obstacles here are so great that the nefarious fish hog is forever disbarred from seining, netting or trapping, or otherwise diminishing by unlawful means the unfailing supply.

From Nov. 1 to May 15 is the best time to visit this lake, as the hunter and angler will find game and fish more plentiful, and the oranges, honey and other delicacies in their greatest perfection. Six months at least of health, pleasure and happiness. PISCATOR.

## RANGELEY PROTECTIVE ASSOCIATION.

PHILADELPHIA (3,937 Chestnut street), Oct. 15.—*Editor Forest and Stream:* I inclose herewith a copy of the report of the operations of the Anglers' Protective Club, of Rangeley, and to it only wish to add the following letter:

"MAINE CENTRAL RAILROAD COMPANY, President's Office, Portland, Oct. 13, 1892.—*Frederick S. Dickson, Esq:* Dear Sir—I have your letter of the 3d inst. This company will gladly double its subscription to your association, giving hereafter $100 per year. I think such a law as you mention should be passed, and if you will call my attention to it at the proper time I will do all I can to aid its passage through our Legislature. Yours truly, ARTHUR SEWALL, President."

In sending this letter to FOREST AND STREAM I violate no confidence, and take this opportunity of publicly acknowledging the many kind offices of the Maine Central Railroad and its officials, and their hearty co-operation in every effort to benefit the Androscoggin region.

FREDERICK S. DICKSON.

The report:

RANGELEY, Maine, Oct. 6.—The operations at the hatching house of the Anglers' Protective Club during the season of 1891–92 were not attended by the success we had hoped for and had a right to expect. The protracted drought of the fall of 1891 lowered the level of the mill-dam from which we drew our supply of water below the intake pipe. To prevent a total loss of the spawn we were compelled to remove the entire contents of the hatchery to a stream some distance from the village, where temporary shelter was erected. As a direct result we lost all but five or six thousand fish. These latter, trout and salmon, are, however, now fine hardy fish nearly 3in. in length. A change in the location of the hatchery was clearly essential, and after careful examination of all available points in the neighborhood the directors finally decided upon Hinkley Brook as meeting the requirements in all respects. The brook is scarcely a mile in length, its source, a large spring, has a uniform flow, is little affected by either drought or flood, and is fed by springs along its entire length. The old hatchery has been sold and the proceeds will provide a sum nearly sufficient for the erection of a building twice the size of the old. The land, a narrow strip along the stream, some five acres in extent, was purchased by two of our members and turned over to the uses of the association. Another member has generously contributed all the wire fencing needed to inclose the tract, as well as all the wire screen work required in fitting up the hatchery. There is ample space for the erection of any number of ponds that our necessities may require in the future, and two ponds are already completed.

Mr. Henry O. Stanley, one of our efficient State commissioners, visited our new hatchery during September and expressed much gratification at the favorable outlook for the future. The commissioners have generously offered to permit this association to contribute to the State hatcheries at Auburn and Sebago whatever sum we may be able to set apart for the taking of spawn this fall and to receive in return next February as many eggs in proportion to the whole take as we furnish money in proportion to the whole expense. This gives us all the advantage of the experience of the State authorities, and will undoubtedly give us a larger supply of fish at a much smaller cost than if we attempted to take the spawn ourselves from these waters. When the spawn is ready for delivery, some two or three weeks before the time for hatching, the commissioners have promised to send with it a thoroughly competent man to remain with us a month or more during the process of hatching who will instruct such person as we may select to take charge permanently of our fish. It will be our policy to take only as much spawn as we can properly and successfully rear in our troughs and ponds, for one fish 3in. long is worth ten an inch in length. When these fishes are mature enough to take care of themselves they will all be placed in the public waters of this region.

As these young fish are almost uniformly placed in the smaller streams rather than in the waters of the lakes it is eminently proper that such streams should be closed to all fishing in the future. These streams are also the natural breeding places of the trout and salmon of these waters, and the protection of the law should be thrown about them. A petition receiving the indorsement of this association has been almost universally signed by the inhabitants of this town asking the Legislature to pass a law closing permanently all streams directly or indirectly tributary to Rangeley Lake. Similar petitions are in circulation among those interested in the waters of Mooselookmeguntic and the Richardson Lakes, and it is to be hoped that the coming Legislature will give us a general law permanently closing every stream above the line of dead water which is tributary to the whole chain of Androscoggin Lakes. If this be done and if the hatching operations be generously supported by the public, these lakes will in a few years furnish better fishing than has been known within a generation.

To do the work mapped out for it this association ought to have a steady annual income of not less than one thousand dollars. With this sum they could annually put into these waters fully one-half million of well grown salmon and trout. Besides the cost attending this work the association should have means to enable it to employ men to aid the State officials in preventing fishing in unlawful places and at unlawful times.

We have in the past received generous support from the Maine Central, the Sandy River and the Phillips and Rangeley railroads, and it has been intimated that in view of the favorable outlook these roads would be willing to double their contributions in the future. Will not our individual members do likewise? And will not each one endeavor to secure one new member?

All contributions should be sent direct to the treasurer, Mr. Arthur L. Oakes, to whose order as treasurer all checks and drafts should be drawn. Annual subscriptions are due on the first day of June in each year and all members will confer a favor on the management by remitting promptly on that date.

Very respectfully,

FREDERICK S. DICKSON, Pres.

ARTHUR L. OAKES, Sec'y-Treas.

## CHICAGO AND THE WEST.

[*By a Staff Correspondent.*]

CHICAGO, Ill., Oct. 8.—Capt. J. W. Collins, lately relieved from his work on the United States Fish Commission, will come to Chicago and at once take full charge of the fish and fisheries exhibit at the World's Fair, with headquarters in the fisheries building.

Dr. Tarleton H. Bean, assistant in charge of fisheulture of the United States Fish Commission, well known in his editorial connection with FOREST AND STREAM, is now the immediate superior in the Government work of Dr. S. P. Bartlett, of the Illinois State Fish Commission. In a recent visit with the latter gentleman to the scence of the Government work on the Illinois River, Dr. Bean found occasion for renewed surprise in the prolific quality of the Meredosia Flats. This section of the Illinois supplies the United States Government with the greater part of the young inland game fishes used in distribution in different States.

### Fish League Directors.

Pursuant to the call announced earlier, the meeting of directors of the Illinois State Fish League was held at the Leland Hotel, Springfield, Tuesday, Oct. 4. Messrs. Geo. E. Cole, of Chicago, Henry Davis, Jr., of Springfield, and E. Hough, of Chicago, being present, Dr. Bartlett representing by proxy Dr. D. H. Shields, of Hannibal, Mo. The immediate object of the meeting was to report progress and to discuss means for pushing on the work in the best possible way, and also to appoint working committees. Mr. Cole showed several hundred dollars' worth in Chicago pledges, obtained in a short time, but said he would not collect a dollar until the lower part of the State had done its share. This was not to be one of the many like organizations in which all the work and expense were thrown on Chicago. Dr. Shields, of Hannibal, reported that his society had been unfortunate in what cases it had prosecuted, but volunteered all help possible, in the hope of a better working law. Col. Davis thought a better law a necessity before fish protection became possible in its best sense. It was agreed that effort should be made to draft a better law and secure its passage, and critical discussion was invited from friends of the League. President Cole then appointed as committee on legislation Dr. D. H. Shields, chairman, of Hannibal, Mo.; Dr. S. P. Bartlett, secretary, of Quincy, Ill.; Major A. Orendorff, attorney, of Springfield, Ill. These will give the matter in hand a careful attention, and will draft a bill for later inspection. Only speculation is possible at this writing concerning this bill, but it is foregone that the hateful Clause 6 of the old law, relating to seining in navigable waters, etc., will not appear in the bill devised. That the present fish law could be improved upon in several other respects is something which admits of little doubt.

Dr. Bartlett promised that if Dr. Shields's time permitted, they two would this winter make a trip over the State of Illinois and visit the different protective societies with a view to further strengthening and solidifying the league. This practically closed the brief meeting, the remainder of the time being spent in general discussion. Mr. Cole sought still further to impress upon the minds of directors outside of Chicago the fact that the league was a State matter and not a Chicago matter and that its success depended upon their efforts, and not upon their assurances of effort. Mr. Cole is practical. It remains to be seen whether the other directors are or not.

### A True Story.

But about that Kekoskee bullhead story. It is just as I feared. People are disposed to treat that story as a joke or a humbug, whereas it is nothing of the sort, but pure, cold icy fact from one end to the other, and stated in a temperate and moderate manner. Mr. A. C. Collins, of Hartford, Conn., takes the story with a great deal of levity, and apparently does not believe it. He writes me:

HARTFORD, Conn., Oct. 7.—I shall watch for the next issue of the FOREST AND STREAM with great interest to see if your name does not appear in the obituary column. It is said that Ananias dropped dead after telling a lie. In view of this terrible example, why did you take such a desperate chance in telling the Kekoskee fish story? If you pull through I shall know that the times have changed very much since Ananias's day. I hope they have. That story will stop all future "yarns," for no sane man can or ever will try to beat it. For fear you will never read this letter I shall address it to "Administrator Estate E. Hough." A. C. COLLINS.

He did address the letter that way, too, and I got it. The fact that I am alive to read it should settle all doubts in Mr. Collins's mind. I wouldn't dare chance it telling a story like that if it wasn't all true.

I can offer still further and more conclusive proof of the truth of the Kekoskee fish story, incontrovertible evidence alike of the truth of the story and of the temperateness of the narrative. The other day several of the boys here were reading that story, and calling it all sorts of names, from a "horrible lie" on up, when Percy Stone came along. Mr. Stone is one of our leading sportsmen, and a man of unimpeachable character.

"Here, Percy, look here," they said to him; "isn't this the worst you ever saw?"

Percy took the paper and read the story, and soberly handed it back.

"Well?" said they.

"Well, what of it?" said he.

"Why, isn't that awful?"

"Awful what?"

"Why, an awful lie."

"Say, now you look here," said Percy, "I can lick any man that says that story isn't true. The only trouble about it is that it isn't big enough. I was raised in Wisconsin, up at Oconomowoc, and my people live up there now. I've heard that Kekoskee story ever since I was a little boy, and you can just bet your life it's true, every word of it. They used to drive a wagon down into the bullheads, and the fish filled the wagon box as soon

as it struck their level, and all a fellow had to do was to pull the tail-gate shut, and take a stick and strike the load off even with the top of the sides. the way you do with a peck of wheat. Bullheads? Well I should say. The whole country was full of them. You know, they had an epidemic up there the year following. There were so many dead fish lying around everywhere that they bred disease. Sixty-five people died right around Kekoskee and Mayville. True? You can gamble this story's true, and you can get all the proof you want of it."

I did not mention the epidemic in my account of the story, for stories of epidemics are often exaggerated, and I wished only the simplest and most credible facts to be presented. I am glad, however, to have so able a champion as Mr. Stone to come to my assistance, and I feel an especial joy that Santa Anna, the noble horse that lived on bullheads, escaped the dread epidemic and so lives today, a monument of the truthfulness of this story, and an easily available confutation of all who doubt its accuracy at any point.

### Norm Johnson's Log.

Up on the headwaters of the Little Oconto, in Wisconsin, is the cabin of Norm. Johnson, a sturdy woodsman who sometimes entertains trout fishermen. The Fred. Taylor party, which commonly numbers a dozen or more, go up to the Little Oconto every year and put up with Norm, and he does everything he can to make things comfortable and easy for them, according to his lights. There is a big foot log over the Little Oconto stream near his place, and to make it easier walking for the city men, who are not so much used to the ways of the woods, Norm last fall took an adze and squared off its top from one end to the other. This made it an elegant footbridge. Meantime, however, came the spring flood, and turned the log over a little bit, so that the smoothed side stood at an angle of about 45°, slanting down stream. This didn't seem to strike Norm as anything out of the way, as he crossed daily on the log as had long been his custom. When the city men went up there last June the water was just barely running over the log, enough to make it nice and slippery. Every man that wore rubber boots slipped on that smoothed angle of the log and went neck deep into the stream, whereas they formerly used to cross it in safety. This puzzled Norm a great deal, and it is said he could never account for it. "I go to work and face up a log fer you fellers to walk on," said he, "and here you all fall off'n it like so many scared turtles. I don't understand it. I don't believe I ever would get used to city ways, they seem so blame onreasonable like."

### In the North Woods.

Mr. John B. Carse, manager of the well-known boot firm Thos. Kane & Co., of Chicago, is back this week from an extended and very pleasant trip through the North Woods, of Wisconsin, after mascallonge and air. The party included Mr. Carse. his brother David B. Carse, also of Chicago; Messrs. Fred Pratt and Harry H. Lobdell, of Chicago; and Messrs. Ed L. and Chas. R. Baker, of Racine, Wis. They had three guides and four birch bark canoes. Going in north of the Manitowish country, at Mercer, they fished with great success the little frequented waters of Pardee Lake and No Man's Lake, taking in the former some fine mascallonge, top weight 21lbs. Then they went north to Cheney Lake, after bass, and caught all they liked. Next they took rail and went east clear across to the entering point for Gogebic Lake, Mr. Carse going up to the latter waters for a brief go at the small-mouths. Then the party struck into the wild country south of Trail Creek, and visited Cisco Lake and Thousand Island Lake. In the latter waters they had great good fortune in taking the big lake trout (Mackinaw trout), sometimes called "landlocked salmon." In all this latter country, which is very wild and hard to get into, they saw many deer and plenty of sign. The whole trip was a very delightful one, and Mr. Carse, who has been all through the wilder portions of the great Wisconsin Lake region, says he never had a pleasanter time.

We get only such scattered and meager reports of the North Woods country lying above here in the wonderful State of Wisconsin. The region is already well tracked, but it is little known. And here we hear much of the Adirondacks, and even a Western man who has never been there can name the chief points of interest in that over-ridden and over-written and no longer interesting country. Some day it will be this way about the great lake country of Wisconsin, but that day is not yet. The region is not yet explored. There are lakes where a fisherman's boat never entered, and paths the hunter's foot has never trod. If New York can trade her Adirondacks for this Wisconsin country, she'd better hurry up and do it, for it's a bargain. E. HOUGH.

175 MONROE STREET, CHICAGO.

### A Giant Gar.

ST. LOUIS, Oct. 15.—As large a fish as was, perhaps, ever pulled out of the Mississippi River was caught by Carondolet fishermen on Friday afternoon near the Workhouse. The capture was made with difficulty and the boat narrowly escaped being dragged under. Four bronzed fishermen are willing to vouch for the facts. The huge fish weighs about 700lbs, and is termed an alligator gar.

Peter Heil and Ed Brown were in a boat, and about 2:30 o'clock felt a pronounced tug at the end of the quarter-inch line which dangled from the useful, though unornamental, craft in which they worked and rested alternately. They were at the foot of Gasconade street, almost in a line with the whitewashed stockades and barracks forming the Workhouse. The hook was baited with beef and both men made a grab for the rapidly receding line. In a few seconds it was taut, and with a crack and strain the skiff commenced to follow its unseen guide with almost lightning speed. Every few seconds the sides or long, angular mouth of the gar become visible.

Michael Heil and Tom Nash, fellow-fishermen, were on the shore, and as the two in the boat called to them they kept parallel with the hooked monster and its human drag. Down the stream the aggregate went, and when three blocks had been traversed the two on shore wanted to know whether to get a boat or not. The gar's head finally pointed shoreward, and his strength was becoming exhausted. Opposite the Herf & Frerichs Chemical Works, four blocks or more south of the point of seizure, a landing was made. The four men pulled and pulled, and finally fastened one of the king's jaws with a wire rope, and he was anchored.

The specimen was 21ft. 7in. in length. It would snap at and gulp down a 10lb. piece of beef without much effort. The heroes of the adventure have fished in the vicinity all summer, and have landed catfish weighing as much as 170lbs. About two months ago, the same day that John Scullin's nephew was drowned in Smith's Bay, they had a midstream encounter with a fish that nearly resulted in the demolition of their skiff. The champion gar is now disporting himself at the end of the wire, admired and envied by hundreds of spectators.—*Cincinnati Enquirer.*

### The Pelee Bass Fishing Season.

TOLEDO, O., Oct. 15.—*Editor Forest and Stream:* The accompanying official communication anent the matter of black bass fishing in Canada waters, reached me this morning and is hereby respectfully submitted. It might be added that to the best of the writer's knowledge and belief last spring was the first occasion on which any license fee was collected from rod fishermen, and as he did not visit Pelee this year this fact was unintentionally overlooked in the previous statements. But it is not likely that the amount named would be regarded as a high price to pay for two weeks of good bass fishing. Meantime the original statement remains, viz: that we have for a number of years been in the habit of opening the bass season on the Pelee with May 15 each year, and it is probably a safe prediction that some such arrangement as that stated in Mr. Smith's letter will be made for next spring. JAY BEEBE.

OTTAWA, Oct. 11.—J. B. Battelle, Esq.—Dear Sir—In reply to your letter of the 5th inst. I beg to state that under authority of an order in Council special permits were last spring granted to anglers at the rate of $2 each to fish for bass around Pelee Island from May 10 to 25. The Minister has not yet determined whether the same privilege will again be granted next season. I am, sir, your obedient servant WM. SMITH,
Deputy Minister of Marine and Fisheries.

### River Fishing Near Boston.

BOSTON, Oct. 15.—River fishing is receiving more attention in Massachusetts than formerly. Only ten or a dozen years ago it was considered that the rivers in the vicinity of Boston and other cities were completely exhausted as to their supplies of fresh fish. But at the present time it is no unusual thing to hear of fine strings of perch, pickerel and even bass being taken from the rivers in this State. In proof of this idea it may be noted that one of the handsomest black bass ever seen in the State, or in any other State, for that matter, was shown in the window of the tackle store of Messrs. G. B. Appleton & Co., on Washington street, this city, on Monday. The fish weighed 6¼lbs. and was 21½in. in length. It was caught by Mr. W. A. Chace in the Sudbury River, a short distance above Concord. It was taken on a 9oz. rod, with a trolling spoon. The big fish gave such a hard fight as only a great, determined black bass knows how to make. SPECIAL.

### The Fishery Board for Scotland

HAS issued Part III. of its tenth annual report, dealing with the scientific investigations of 1891, and containing numerous illustrations. Among the biological papers forming a portion of the volume are the following: On the food of fishes, by W. R. Smith; observations on the reproduction, maturity and sexual relations of the food fishes, by Dr. T. W. Fulton; additions to the fauna of the Firth of Forth, Part IV., by Thomas Scott; contributions to the life, history and development of the food and other fishes, by Prof. McIntosh.

## Fishculture.

### The Prolific German Carp.

NEW YORK, Oct. 17.—The ice pond at New Rochelle having recently been purchased by the Mount Vernon Water Co. as a source of supply, they have been draining it off in order to deepen and finish as a reservoir. On Oct. 12, when the writer passed the pond while out gunning, all that remained was a small mud puddle about 75ft. wide, and this was absolutely alive with German carp, eels, suckers, small perch, minnows and small boys. The carp weighed from 2 to 6lbs., and the writer learned that the water company and others had netted probably 10 to 15 barrels of these large carp during the previous day and night. I secured three fine specimens. The largest weighed close to 7lbs. The fry had been put into the pond three or four years ago, and results show that the fish thrive wonderfully in our ponds.
WILLIAM W. HART.

### ROD AND GUN AND CAMERA.

As a recognition of the important place of amateur photography in its relation to sports of the field and prairie and mountain and forest and stream, the FOREST AND STREAM offers a series of prizes for meritorious work with the camera. The conditions under which these prizes will be given are in brief as here set forth:

There will be ten prizes, as follows: First $25. Second $20 Third $15. Fourth $10. Six of $5 each.

The competition will be open to amateurs only.

The subjects must relate to FOREST AND STREAM'S field—game and fish (alive or dead), shooting and fishing, the camp, campers and camp life, sportsman travel by land or water.

There is no restriction as to the time when the pictures may have been or may be made—whether in 1892 or in previous years.

Pictures will be received up to Dec. 31, of this year.

All work must be original; that is to say, it must not have been submitted in any other competition, nor have been published.

There are no restrictions as to make or style of camera, nor as to size of plate.

A competitor need not be a subscriber of FOREST AND STREAM.

All photographs will be submitteed to a committee, shortly to be announced. In making their awards the judges will be instructed to take into consideration the technical merits of the work as a photograph, its artistic qualities; and other things being equal, the unique and difficult nature of the subject.

Photographs must be marked only with initials or a pseudonym for identification. With each photograph should be given name of sender, title of view, locality, date, and name of camera.

## The Kennel.

### FIXTURES.

#### DOG SHOWS.

Oct. 25 to 28.—Omaha Kennel Club, at Omaha, Neb. E. L. Marston, Sec'y.

Nov. 22 to 25.—Brooklyn. H. W. Huntington, Sec'y, 148 South Eighth street.

Dec. 6 to 9.—First Annual Dog Show Hermitage Kennel Club, Nashville, Tenn. Robert C. Stockton, Sec'y.

1893.

Jan. 3 to 6.—Mohawk Valley Poultry and Kennel Club. F. B. Zimmer, Sec'y, Gloversville, N. Y.

Feb. 21 to 22.—Westminster Kennel Club, New York city. Jas. Mortimer, Supt.

May 3 to 6.—Pacific Kennel Club, at San Francisco, Cal. Horace W. Orear, Sec'y.

June 13 to 17.—World's Fair, Chicago.

Sept. 7 to 10.—Hamilton, Ontario A. D. Stewart, Sec'y.

#### FIELD TRIALS.

Oct. 25.—Third Annual Field Trials of the National Beagle Club, at Nanuet, N. Y. Bench show of the club Oct. 24. H. V. Jamieson, Sec'y.

Nov. 7.—International Field Trials Club, third annual trials, at Chatham, Ont. Amateur Stake, Nov. 7. Open Stakes, Nov. 8. W. B. Wells, Sec'y.

Nov. 7.—United States Field Trials, at Elizabethtown, Ky. P. T. Madison, Indianapolis, Ind., Sec'y.

Nov. 8.—New England Field Trials, at Assonet, Mass. E. Knight Sperry, New Haven, Conn., Sec'y.

Nov. 14.—Fourth Annual Trials of the Brunswick Fur Club, at Princeton, Mass. J. H. Baird, Sec'y.

Nov. 15.—American Field Trials, at Columbus, Ind. W. J. Beck Sec'y.

Nov. 21.—Eastern Field Trial Club Trials, at High Point, N. C. W. A. Coster, Sec'y.

Nov. 28.—Philadelphia Kennel Club Trials, at High Point, N. C. F. G. Taylor, Sec'y.

Dec. 5.—Central Field Trials, at Lexington, N. C. Col. Odell, Sec'y.

Dec. 19.—Irish Setter Field Trials, at Lexington, N. C. Dr. G. G. Davis, Philadelphia, Pa., Sec'y.

1893.

January.—Pacific Coast Field Trials, at Bakersville, Cal. J. M. Kilgarif, Sec'y.

Feb. 8.—Southern Field Trials, at New Albany, Miss. T. M. Brumby, Sec'y

### SPECIAL REPORT OF THE OTTAWA SHOW.

*Editor Forest and Stream:*

To those who can read between the lines the maliciousness of these introductory notes is evident enough. It is perfectly plain to those that know the facts that they were penned by some one intensely hostile to some of the judges and part of the executive. I regret to see FOREST AND STREAM abused in this way, and I shall certainly not allow such misrepresentations to pass unnoticed, if the editor of this journal will afford space for their correction.

The reference to Clumbers throws a good deal of light on this report: "Dr. Wesley Mills spent two days and a half in awarding prizes to 105 dogs." What are the facts? As both the other judges wished to have the first day Dr. Mills gave way to them, consequently he could do only a very moderate amount of work the first day. By the close of the second day, notwithstanding a late start, for which he is not responsible, most of the dogs were judged, the rest of the work being completed, specials excepted, next morning. As is well known the judging of specials is peculiar, much depending on the clerical assistance, etc., given.

After the second day the show seemed to be very short-handed, and in some cases none of the executives or attendants could be found and I was obliged to ask handlers not personally concerned to bring out some of the dogs. Economy was, I suppose, at the bottom of this, and I had no notion of referring to it had it not been forced upon me. I think the exhibitors will bear me out that the dogs at Ottawa show were judged as rapidly as anywhere on the circuit. The ingenious falsity of the above statement will now be clear and its malice rendered more evident by the next misstatement. It is absolutely untrue that Dr. Mills "got Mr. Corbett to pass upon them" (Danes). As no one could be the least injured thereby, I asked the committee to associate Mr. Corbett with me in the judging of Danes. This they did, and Mr. Corbett acted with me throughout. If necessary I can quote his remarks about the dogs, made in the ring, and we agreed on the placing before the ribbons were handed out. "In black and tan bitches the Doctor awarded English Lady first, but about an hour afterward," etc. This is incorrect also. The dogs had just been returned to their benches when I called for them again; at the outside ten minutes could not have elapsed. The superintendent can bear me out in this, as he was present. I am not aware that there is any rule to determine when a judge's decision is final. At all events, I think the individual who is afraid that his dog when thoroughly examined cannot stand the test and holds to what he got through oversight, is hardly the sort of sportsman we should encourage. Only some of those concerned refused to bring back their dogs—possibly only one. I must give the handler that really suffered by my oversight, credit for behaving admirably under the circumstances. The real explanation of the origin of the occurrence is found in my judge's report.

"Mr. Geddes, the superintendent, received little or no assistance from his committee and to him all the credit is due."

Mr. Geddes worked well and managed well both this year and last. Then the credit was not given to him but went in another quarter. I must say, however, that both Mr. Wurtele and Mr. Kirby aided efficiently as my ring stewards. Mr. Keyes, the chairman, was present during the whole time of the show, and worked hard, and others also assisted, so that the above statement is untrue and unjust.

As to the catalogues, I know that one reporter, at least, had a copy given him. The catalogue was about the best yet issued in Canada, and I regret that after all the labor spent on it there will be loss to the individual that had the enterprise to undertake and carry out the work.

As I am myself responsible for the report on pointers and setters and put my initials to it, I wish Mr. Editor, that you had so inserted it and not joined it with such a tissue of misstatements as I have shown you have unwittingly, no doubt, inserted in your paper, which, I take it, aims at truth and decency. The whole thing is, moreover, a strong argument for having all reports signed.
WESLEY MILLS, M. D.

MONTREAL, Can.

### Sportsmen Made to Order.

This is how the editor of the Middletown, N. Y., *Argus* puts it: "Station Agent Van Orden, feed merchant Thorn and Dr. Meyers have all been getting fancy bird dogs, new guns, hunting coats, vests, caps, etc., *and are fast developing into genuine sportsmen.* Their dogs alone are valued at $40 to $80 each. Now, it is safe to say they will make it a cold day for any game living in these parts, to say nothing of what will be done by Mills, Welling and Sutton, who are quite some on shooting." The italics are ours.

### Business.

MACHIAS, Oct. 14.—Forest and Stream Publishing Co.: I inclose check in payment for your insertion of notice of Beacon Farm. It has brought me a number of sportsmen from Massachusetts and inquiries from New York that are almost sure to result in business. SAMUEL M. HOLWAY.

## POINTS AND FLUSHES.

### The Kicker.

CHICAGO, Oct. 15.—The term "kicker" is one which is used frequently in discussing field trial matters, and the number and variety of the individuals composing the class are but little known to the sportsmen who do not attend field trials in person.

There are several well-defined classes of kickers, each species having some one kicker whose vigor and skill make him pre-eminent among his fellows.

As a general thing, owners and handlers take defeat pleasantly and quietly, even if they do not consider that it was done thoroughly.

A kicker which cannot be classified is the opportunity kicker. He may go through a whole trial, or several trials, without an opportunity presenting itself. He is wise enough to let the other fellows do their own kicking, so that he is not identified with the sympathetic kicker. When the opportunity does come he then can kick vigorously, and with a great deal of sentiment in his favor on the ground that he is no kicker. The judicious kicker succeeds in making some capital, at times.

### The Necessity Kicker.

Then there is the kicker who kicks from necessity. He runs a lot of poor dogs, perhaps badly prepared, and, from his standpoint, he must affect a disbelief in the judges and their decisions so that he can square himself with his employers; and it is to be regretted that he often succeeds in his purpose. This specimen of the kicker is becoming scarcer as knowledge increases and sportsmen become more acquainted.

### The Revenue Kicker.

The kicker-for-revenue is perhaps the most offensive and harmful of all. He is active and tireless before the trials begin, during the trials when his time is unoccupied and in the evenings, in painting in bright colors the superlative merits of his dogs. This string beats all strings of dogs, he says, he ever had, in every respect. They are strictly high-class, every one. He has a cinch on first, second and third, if the judges only do the square thing by him. He refers earnestly to his former success, his known skill as a breeder and his great judgment in all matters.

He makes an opportunity to tell all this to the judges before the dogs are started, or he tells some one who is sure to tell them. Often his brassy assumption of everything meritorious passes for good coin; and his boasting, prejudgments and prejudices are far more effective than they should be, in creating favorable impressions for dogs before and after they begin their race. Now, these dogs may not be so good as many others, or indeed may be downright common. But this does not for a moment deter the kicker-for-revenue. He will frankly point out faults in dogs he ran in previous years if said dogs are sold, but he has no faults to discover in dogs which he now owns. If any of these dogs are sold this year he will cheerfully and fully tell their faults next year, particularly if they go into a competing kennel. If one dog is defeated, he kicks. If two, twice as much. If all his dogs are defeated, he hurls forth all his kick. He accuses the judges of incompetency, dishonesty, weakness of mind, bad pedigree and whatever else he can invent. He tells this to every person he meets, and sits up late at night repeating *ad nauseum* his story to all his listeners. He is then kicking earnestly for advertising and revenue. He swears with an earnestness which is most convincing that he will never run his dogs again under that club; and so earnest and forcible does he build up his mammoth bluff that the listener is impressed with the belief that the club's days are numbered when that kicker will not enter his dogs.

Yet the kicker will be on hand the next year with the same stock story. Generally some scared member of the club makes a semi-apology or some explanation which the kicker accepts as satisfactory. In fact, he is willing to accept anything as satisfactory. He has made his big bluff for advertising, got himself forward as a central figure, both notorious and famous.

He knows that field trials are the life of his business; that to refrain from running his dogs would end his profitable dog dealing; that the competition is the life of his business.

(1) Field trial clubs do not seem to realize that they are undignified and unjust to themselves in trying to pacify an abusive kicker-for-revenue.

(2) That the kicker's Chinese thunder is what is vulgarly termed a bluff.

(3) That if they met the threat of not running any more dogs in their trials by the reply that he need not do so; that he only ran for the money and not for the benefit of the trials, he thereafter would not make any threats.

(4) That it is a benefit to the club if the kicker-for-revenue remains away.

(5) That it is a reflection on their own judges to be apologetic to a kicker-for-revenue, or any other kicker.

(6) That judges who are acting for a club are entitled to protection as a matter of right.

(7) That a kicker who openly and maliciously vilifies the judges or club members should be expelled from the grounds.

(8) That a kicker who vilifies his fellow handlers, the judges and club members, and assures everybody at the same time that he himself is a true gentleman, may be mistaken in every particular.

Field trials have advanced to such an important stage of development that the malicious kicker-for-revenue should be suppressed or rejected. His greed and malice are disturbing elements of constant duration. He has been deferred to and made much of—so much that he was justified in believing that the field trial world was largely embodied in the kicker-for-revenue.

### The Sympathetic Kicker.

The sympathetic kicker enters into the spirit of any other fellow's kick, and becomes an energetic party to it. He feels as earnestly as if the grievance were truly his own. He warms to his grievance as he builds up his case, and frequently becomes louder and more bitter than the original kicker. He loses sight of the fact of his own silliness and contemptible weakness. The emotional kicker is never at a loss for facts; for, if they are not at hand, he will readily invent something. One *bona fide* kicker who happens to be where he can gather a group of sympathetic kickers, can make quite a small rebellion, particularly if he is liberal with his flask.

### The Constitutional Kicker.

Then there is the kicker who is so constitutionally. He kicks independently and defiantly. He is honest in his beliefs, has no axe to grind—his kick is stripped of all extraneous considerations. He asks no sympathy. Lose or win, he kicks because it is natural.

### The Kick Courteous.

That a man has a right to differ from the judges, from the handlers, from the club, or from everything and everybody all at once, no one will deny; but that a man whose dog has been defeated has a right to openly and persistently, or at all, vilify the club and judges, or openly insult them, no one will concede. Too much of this has been allowed in the past. Field trial clubs and judges have been too lax. Contempt has been given too free rein. It is time for a departure. Field trials have a respectable standing, are growing in influence and number every year, have a gentlemanly membership and following, and it is high time to suppress an evil which has by its regular exercise almost become honored usage. The combination of loud boasting, keen-scented avarice and threadbare prestige, all colored with bullying, should be relegated to the realms of the rejected. There are no portraits intended here. Only classes are considered.

### Black Setters.

While in Manitoba at the field trials last month, I had the pleasure of seeing some of Mr. Johnson's black setters, which he is breeding. They were under medium size, compact and well built, had remarkably good legs and feet, and were fast, energetic workers. He spoke very highly of their merits.

### Horse and Greyhound.

Racing between horses and greyhounds is now being agitated, and it appears to have some supporters. A contemporary, referring to an offer by Mr. Roger Williams, to match his Stonehenge filly against any greyhound at one-half, five-eighths or three-quarters of a mile, says that "It will be a shame if Mr. Williams's offer is allowed to go begging." Just how the greyhound owners will be guilty of a "shame" by wisely refraining from making what, for them, would prove a silly match, is not apparent. In fact, there is not any "shame" in it. No school boy, who dearly loved to see a fight inexpensive to himself, ever put a chip with greater calmness on a schoolmate's shoulder for some other schoolmate to knock off, than that chip was presented to the greyhound men. Such advice is most unfair. Running horses against greyhounds is no novelty, even in this country. So long ago as 1884 I saw races between thoroughbred horses and greyhounds on the race track at Mobile, Ala. The distance was one mile, and the race itself was a hippodrome; but it was so from the fact that the greyhounds, though good ones and well conditioned, could not go the mile with the horses; so the latter were pulled to give the dogs a fair showing at the finish.

There were a number of places in the South that year where these races were given and, I think, similar races were given in other years. If the greyhound men are wise they will keep their money in their pockets and let any one, who has no money at stake, cry "shame."

The same journal, in severely rebuking men who set their bulldogs on pugs, in a rather involved sentence, says: "And further that they cannot amuse themselves by setting vicious dogs onto ladies' pets and kindred pastimes." Probably the writer meant on instead of "onto;" but how vicious dogs could be set "onto" "kindred pastimes" is not plain. Could not a race be arranged between a vicious dog and a kindred pastime? It would be so funny. It's a "shame" if it isn't! Any man can make a mistake in his language, but few men can write language both quaint and weird.

That reminds me that in "Points and Flushes" last week I was made to say "over-weaning" when I meant over-weening. Such things sometimes make a slight difference in what a fellow means, although it sounds just as well.

B. WATERS.

## FLAPS FROM THE BEAVER'S TAIL.

TORONTO, Canada.—In the English *Stock-Keeper* of Sept. 23 appears the "Whisper" printed below. As Toronto does not happen to be in "the land of the stars and stripes," and as Mr. Brodie is now a resident of the Dominion, I may be excused for encroaching on the editor's prerogative. Mr. Brodie has favored me with a copy of his reply to the *Stock-Keeper*, which I also append, and no doubt Mr. Neil Gow will be glad to add his testimony as to the accuracy of Mr. Brodie's statement:

*From the Stock-Keeper.*—"The American eagle is indulging in some wild flights of fancy over the arrival of Mr. Brodie in the land of the stars and stripes. FOREST AND STREAM says: 'Mr. Brodie is known to all Irish terrier men as the owner of the great little dog Irish Ambassador.' As a matter of fact that statement, harmless enough in a way, wants qualifying. Mr. Brodie and his dog may have been well known in the North, but neither was familiar at the big Southern canine gatherings. The fame of the dog Irish Ambassador rested rather on his successes at the stud, which we desire to acknowledge most readily, but when our transatlantic contemporary continues, 'To show what is thought of the Irish Ambassador, Mr. Brodie, it is said, has refused £260 for him,' why we can only suppose that if Ananias lived in these days he would have been reckoned so poor a hand at his own specialty that Mr. Labouchere would buy him and exhibit him as an advertisement for *Truth*. Two hundred and sixty fiddlesticks, sir; and this is why we have such a contempt for 'offers' that have been refused. They are simply the refuge of the thrifty advertiser. 'Offers' indeed! Why, anybody can imagine them by the dozen, and who is to prove the contrary?"

*Mr. Brodie's Reply.—Editor Stock-Keeper*, 169 Fleet street, London, E. C. Sir: In "Whispers of Fancy," in *Stock-Keeper* of Sept. 23, just to hand, I note remarks *re* the Irish terrier, the Irish Ambassador and myself. If FOREST AND STREAM is rather indulgent at times, the *Stock-Keeper* can be decidedly nasty and mean when it suits it. Your insulting personal remarks I will treat with the contempt they deserve, and pass on to the statement made by FOREST AND STREAM, namely, "Mr. Brodie is known to all Irish terrier men as the owner of the great little dog Irish Ambassador." If this statement wants qualifying, why do you in the same paragraph admit the fame of the Irish Ambassador? As to the other part of it, can your correspondent name any other party who owns him? The *Stock-Keeper* evidently forgets that in one of its recent issues, when giving champion Brickbat "a lift" it stated that a certain price (I forgot the exact amount just now, but I think it was somewhere about £250) had been offered and refused for him, and again in your issue of Aug. 26, you say £160 had been offered and refused for Poor Pat, and this is how we show such a contempt for "offers" that have been refused! "Offers indeed, why anybody can imagine them by the dozen, and who is to prove to the contrary?"

As to the genuineness of the statement made by FOREST AND STREAM in reference to the price that has been refused for the Irish Ambassador. In May, 1891, Mr. Neil Gow, 9 Rose Terrace, Perth (a gentleman well-know as a buyer of the best stock procurable in both dogs and poultry, and frequently mentioned in your journal as a purchaser and importer of such), made me an offer of £200 for the Irish Ambassador, and on my refusal to accept it afterwards increasing it to £260. Still I refused, to sell, and I have no reason to regret having done so, for since that time considerably over 100 bitches have visited him, and those from most of the leading Irish terrier fanciers in the United Kingdom. The number only includes those for which a stud fee has been paid and does not include my own bitches from which I have bred quite a number that I have sold at very fair prices. I am considerably within the margin when I state that he has doubled the price I refused for him at that time; he is still mine, and I would not take £260 for my chances with him yet. As far as offers are concerned, the value of all the Irish terriers in existence put together, cannot separate the Irish Ambassador and WILLIAM BRODIE.

---

Messrs. Luckwell & Douglas have sold champion Black Dufferin and a good bitch to a breeder on your side whose name I have been unable to learn.

---

According to the Toronto catalogue the collie Wellesbourne Charlie was awarded the Collie Club medal for the best in novice class. This cannot be as the dog is not eligible under C. M. C. rules for this class.

---

The cocker champion Brant also was given the cup for the best dog and two of his get. As Brant was entered for "specials only" and as this is in direct opposition to Rule II., section 4, which reads, "A dog entered at any show must enter and compete in the regular classes," I don't see how the win can stand.

---

I find I was in error as to the importer of the St. Bernard bitch Lady Alton. She was got out by Mr. W. H. Auld, Strathroy, and not by the Bowmanville St. Bernard Kennels. It was her half sister Maypole the latter kennels bought. Maypole is by champion Alton out of Rennie and has been bred to Marvel.

---

The Hamilton Kennel Club will hold another of its interesting and well managed local bench shows in the Palace Rink on October 24.

---

Dr. Mole, V. S., is now a resident of Toronto; his address is 260 Adelaide street, West.

---

The Corktown Cocker Kennels, Ottawa, have sold Wanda, C. 697, black cocker bitch whelped June 30, 1890, by Bob Obo out of Cleo, and Corktown Consul, C. 1,304, black field spaniel dog, whelped May 22, 1891, by Obo Jr. out of Dot Smirll, to J. F. Elder, Williamsport, Pa.

H. B. DONOVAN.

## NATIONAL BEAGLE CLUB FIELD TRIAL ENTRIES.

THE entry list of the third annual trials of this club have filled very satisfactorily, and we sincerely trust the list is a practical one and that they will all be seen on the field next week.

*Class A—Dogs 13 to 15in.*

BASE—Wm. H. Ashburner's (Yeadon, Pa.) b. w. t. dog (Spelo—Gipsey Belle), whelped 1889. Breeder, owner.

TONY WELLER—Wm. H. Child's (Glenside, Pa.) b. w. t. dog (Keno—Fly), March 15, 1885. Breeder, T. Satterthwaite.

FRANK FOREST—Rockland Kennels' (Nanuet, N. Y.) b. w. t. dog (Riot—Skip), 1886. Breeder, Geo. F. Reed.

ROY K.—Rockland Kennels' (Nanuet, N. Y.) b. w. t. dog (champion Rattler III.—Dora), Dec. 23, 1889. Breeder, Geo. Laick.

HUGH—W. F. Rutter, Jr.'s (Lawrence, Mass.) b. w. t. dog (champion Fitz Hugh Lee—Queen R.), October, 1890. Breeder owner.

LEE IL—Pottinger Dorsey's (Newmarket, Md.) b. w. t. dog (Lee—Juliet), June 27, 1887. Breeder, owner.

FOREST HUNTER—Forest Beagle Kennels' (West Duxbury, Mass.) b. w. t. dog (Forest Boy—Lady Lee), April, 1890. Breeder, G. F. Reed.

STORM—Somerset Kennels' (Bernardsville, N. J.) b. w. t. dog (Lee—Countess), Aug. 20, 1886. Breeder, Pottinger Dorsey.

GLORY—Somerset Kennels' (Bernardsville, N. J.) b. w. t. dog (Storm—Somerset Una), July 9, 1890. Breeder, owner.

RING—John G. Honecker's (Toledo, O.) w. b. t. dog (Victor D.—Fry R.), Feb. 22, 1889. Breeder, G. Mellan.

*Class B—Bitches, 13 to 15in.*

SNOW—Middleton Kennels' (Frankfort, Mich.) b. w. t. bitch (Stormy—Lucy), April 16, 1890.

VICK R.—Forest Beagle Kennels' (West Duxbury, Mass.) b. w. t. bitch (champion Fitz Hugh Lee—Reed's Nell), May, 1889. Breeder, Geo. F. Reed.

JUNE ROSE—Forest Beagle Kennels' (West Duxbury, Mass.) w. b. t. bitch (Frank Forest—Juno II.), June 15, 1889. Breeder, W. A. Sanall.

FANNIE RACER—Rockland Kennels' (Nanuet, N. Y.) b. w. t. bitch (champion Rattler, Jr.—Nellie), July 10, 1890. Breeder, C. S. Wixom.

ZILLAH—Rockland Kennels' (Nanuet, N. Y.) b. w. t. bitch (champion Rattler, Jr.—Nellie), July 10, 1890. Breeder, C. S. Wixom.

BLANCHE—Wm. H. Child's (Glenside, Pa.) b. w. t. bitch (Uno—Bell), June, 1885. Breeder unknown.

PARTHENIA—Glenrose Beagle Kennels' (Melrose, Mass.) b. w. t. bitch (Bob—Mary), June 7, 1887. Breeder, N. Elmore.

GYPSEY K.—Glenrose Beagle Kennels (Melrose, Mass.) b. w. t. bitch (Kenneally's Lee—Tony), June 18, 1888. Breeder, E. J. Kenneally.

VENUS III.—Pottinger Dorsey's (Newmarket, Md.) b. w. t. bitch (Lee—Venus II.), Sept. 3, 1889. Breeder, owner.

MARVEL—Somerset Kennels' (Bernardsville, N. J.) b. w. t. bitch (Bounce—Ferrol), April 12, 1889. Breeder, F. C. Phoebus.

MOLLIE—W. F. Rutter, Jr.'s (Lawrence, Mass.), b. w. t. bitch (Comeroe—Nell), April, 1887. Breeder, W. S. Clark.

*Class C—Dogs 13in. and under.*

ROCKLAND BOY—Rockland Kennels' (Nanuet, N. Y.), b. w. t. dog (champion Little Duke—Snowflake), July 10, 1891. Breeder, H. J. Bennett.

FRANK FOREST—Rockland Kennels' (Nanuet, N. Y.), b. w. t. dog (Riot—Skip), 1886. Breeder, G. F. Reed.

MILO—Glenrose Beagle Kennels' (Melrose, Mass.), b. w. t. dog (champion Bannerman—Twintwo), July 11, 1890. Breeders, Chapman & Jamieson.

CLYDE—B. S. Turpin's (Dorchester, Mass.), w. b. t. dog (Frank Forest—Sue Forest), April, 1889. Breeder, A. Parry.

*Class D—Bitches 13in. and under.*

BUTTERFLY—Glenrose Beagle Kennels' (Melrose, Mass.), b. w. t. bitch (Forest Boy—Lady Lee), April 18, 1890. Breeder, George F. Reed.

LOU—Rockland Kennels' (Nanuet, N. Y.), b. w. t. bitch (Keno—Fly), Sept. 27, 1880. Breeder, J. Satterthwaite.

WEENANNAN—Rockland Kennels' (Nanuet, N. Y.) b. w. t. bitch (Boston—Countess), June 21, 1888. Breeder, P. Dorsey.

BONNIE LASSIE—Wm. H. Hyland's (North Tarrytown, N. Y.) b. w. t. bitch (Rip Van Winkle—Queen Nellie), June 3, 1889. Breeder, F. N. Bush.

ROMP C.—E. Gerry Roberts's (Red Bank, N. J.) b. w. t. bitch (Tony—Skippy), Dec. 18, 1890. Breeder, G. W. Proctor.

DESDEMONA—Henry Hanson's (Fall River, Mass.) b. w. t. bitch (Kenneally's Lee—Tone), Dec. 30, 1888. Breeder, E. J. Kenneally.

*Class E—Derby, for Dogs or Bitches Whelped on or after Jan. 1, 1891.*

MILLARD—Somerset Kennels' (Bernardsville, N. J.) b. w. t. dog (Burke—Little Fly), Jan. 1, 1891. Breeder, F. C. Phœbus.

CHARM—Somerset Kennels' (Bernardsville, N. J.) b. w. t. bitch (Storm—Belle of Woodbrook), April 28, 1891. Breeder, owner.

FIFER—Glenrose Beagle Kennels' (Melrose, Mass.) b. w. t. dog (Tony—Jingle), Aug. 4, 1891. Breeder, S. James.

FOREST GIRL—Forest Beagle Kennels' (West Duxbury, Mass.) b. w. t. bitch (Frank Forest—Sue Forest), Nov. 1, 1891.

PRINCE—Wm. H. Ashburner's (Yeadon, Pa.) b. w. t. dog (Brittle—Jude), June, 1891. Breeder, owner.

ROCKLAND BOY—Rockland Kennels' (Nanuet, N. Y.) b. w. t. dog (Ch. Little Duke—Snowflake), July 10, 1891. Breeder, H. J. Bennett.

FANCHETTE—Rockland Kennels' (Nanuet, N. Y.) b. w. t. bitch (Mac—Fanny K.), April 6, 1891. Breeder, I. St. Clair.

---

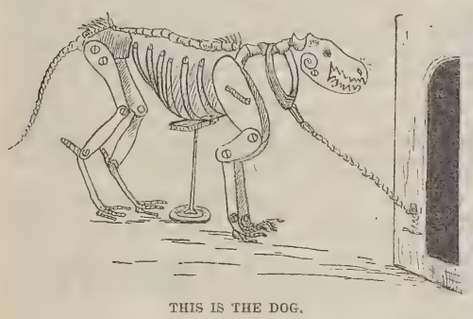
Dr. Foote intends sending a team of black and tan terriers out to Omaha, Neb., show with Ben Lewis. Champion Sultan, Merry Monarch, English Lady and Carmencita are the four selected. A good chance for any one who has a bitch in season out there.

## COMPOUND AND SIMPLE LOCOMOTION.

*Editor Forest and Stream:*

I had the pleasure of meeting an old-time friend a few days ago, a shrewd and cultured gentleman of broad and discerning mind, as is settled by the fact that he is an admirer of my superior attainments and natural abilities.

We met in my luxurious office, and after the cordial greetings and reminiscent reviews, the conversation turned on dogs and dogdom.



At last he said in his pleasant way: "C., why don't you write some papers on the anatomy of the dog, as applied to locomotion, in the abstract and concrete, as the 'rithmetic used to say when we went to school together long years ago? I know that you was smart on bones and sich things in them days from your reputation as a hog killer and meat cutter on the old farm. Not that you of course know much about bones and muscles when in motion, but I'll bet them other fellers can't write mor'n you can about what they don't know."

"See here," said I, a bit warmly, "the idea is a good one, since I have thought of the very same thing myself a number of times, but I really do not like your manner of suggesting it. First of all, I beg to assure you that I do know something of anatomy, or bones, as you are pleased to term it, and that I have what I consider most valuable ideas on both anatomy and comparative anatomy as related to motion in animals and *vice versa*. Now ——"

"I beg your pardon," said he, in his gentlest manner," and I trust that you will overlook my stupidity. I might have known, had I given it a moment's consideration, that you, being a dog man, know all about dogs and their anatomy, and are most amply furnished with knowledge on all subjects in the abstract and concrete, as the 'rithmetic would say. Your papers would no doubt be very valuable, quite as much so as anything you ever wrote."

"Yes," I replied in my most gracious manner, for his praise mollified me, "I know a great deal more about these things than I let on to know. The other fellows have some very good ideas but they cover but a small part of it and are buried by a mass of crudities and ill disguised speculations, and they force every circumstance, however poorly it fits, to support their position."

"Now," said I, "by way of for instance, take the use of the forelegs and hind legs of the dog in motion, their efforts would be of little use but for the connection and support of the back and its action; that is the arching and vigorous spring it takes in unison with the spring of the hind legs, thus propelling the body through the air and forward at every jump. The shoulders perform a very important function, in that they give a firm base for the legs to be fixed to and nothing more. I hope that you will admit that if the legs were not fixed to something on the dog he would have much difficulty in using them. This, though in a modified degree, could be said of the hind legs of most dogs, and especially those dogs of a sanguine temperament. Fortunately, to support my theory and to settle the question beyond cavil, I have a photograph of a skeleton which may be said to be taken from life, as it is in the very attitude of the dog in life. The pose is therefore natural and every part of the skeleton is placed in the right position and relation to every other part. This skeleton belonged to a dog of fine breeding, which by an oversight was left chained to his kennel while his master was absent on a six-months' trip from home. On

THIS IS THE DOG.

his return he found than the dog had starved to death, and he plainly died in a standing position, with the imprint of the fierce pangs of hunger distorting his features."

"I desire to say that I do not know much about anatomy, as I observe all writers so far are careful to observe the same, therefore I consider myself most ably qualified to write about it long and learnedly. I more particularly wish to confine myself to anatomy and locomotion, but I may find it necessary to digress on three or four thousand side issues according to honored usage in treating such matters.

"I now will call your most earnest attention to certain laws of motion which, with very little thought, you will perforce concede to be true; or at least so generally true that none but the perverse or hypercritical will be so unreasonable as to refuse to concede the great truths contained, and their direct application to the question under consideration which has not been yet presented. The first law is that when a body is moving in a straight line there is hardly any perceptible curvilinear motion to be observed so long as it persists in its direction. Conversely, when a body is moving in a circle, the general law may be laid down that it will continue so so long as the force is applied and it holds its course.

Having now laid down these axioms and general laws which are known to be true by their universal use and the sanction of all men from time immemorial, I will now revert to the original question again. To do so readily, it will be necessary to produce the photograph of the dog referred to hereinbefore so that any reference to different parts of the skeleton may be readily understood and all the different parts and their functions may be made plain at a glance: so I beg that you will study it carefully. To prove that this skeleton had certain motions when animated by the energies of life, I will take pleasure in presenting in later papers the skeleton of a kangaroo, of a Rocky Mountain goat, of a hen and a donkey, the last being one of the most important. As to why I should see fit to select the skeleton of a hen to illustrate and prove the motion of a dog, I would say that there are some subtle abstractions about it which I do not know myself; therefore, the wise reader must not be too inquiring lest he do more harm in a moment than he could possibly mend in a week."

"Referring now to the axioms laid down on straight and curved motions, it will be noted that nearly every anatomical part of the dog takes a curvilinear motion or segment of a parabola. The shoulder blade, humerus, femur, tail and jaws, etc., all move in segments of circles, and the leap of the dog is the same. The sum of all these curved and parabolic motions find expression in locomotion, or the effort which the dogs exerts to go ahead in a straight line, as proven by the construction of the skeletons of hens, horses and donkeys. These curved motions and different forces exerted in different parts of the skeleton in different directions have a very important bearing as to their effectiveness in whether they are coincident with the center of gravity or only partially so, the latter finding expression in dogs which trot with their hind legs in a line paralled with and about 6in. to one side of the line followed by the forelegs."

"A simple illustration of the mechanical difficulty in changing straight motion to circular motion is illustrated by the locomotive engine. The piston rod goes straight; bar on the driving wheels travels in a circle, and one end of the connecting rod, connecting the two, travels in a circle, while the other end goes straight, thus causing the most violent strains and jerks at every revolution of the wheels, and presenting one of the most complex problems in locomotive construction. This proves that stifles and elbows well let down, as witnessed in the skeleton of the hen, give the ideal combination so far as those parts are specially concerned. But it should not be lost sight of for a moment that there are certain auxiliary and subsidiary forces, both of gravity and the animal, which, arrayed in harmonious juxtaposition should correlate and—"

"For goodness sake," said my friend, "let the matter rest for this time. I do not know whether I am going crazy or have a nightmare. My brains are boiling. I think that all you said is logical and true, but I don't know. Let us consider that it is so, only my mind is too weak to follow your most learned argument, or thesis, or digest, or whatever it may be. Let us defer this matter to another day, though it be an evil one. I feel weak and unequal to further attention. Pray, let us postpone it that I may learn it better."

"I consent," said I, "though I dislike to do so, for I just got the ideas nicely selected and all the circumstances arranged to lead up in logical sequence to the previous question which I was about to formulate into a syliogism preparatory to my main effort, but as you wish it, we will postpone it."

"Good day," said he, with a sigh of relief.

"Good day," said I, regretfully. THE CYNIC.

BEAGLE HUNTING IN ENGLAND.

## VARIETIES OF FOOD.

UNDER the above heading, in his new book on dog diseases, kennel management, etc., "Ashmont" (Dr. J. Frank Perry) gives us, as entertainingly and lucidly as ever, his views on a subject of vital importance to all, kennel owners as well as the "one-dog" man. Through the Doctor's kindness we are enabled to publish, from advance proofs, a part of this interesting chapter. Speaking on the subject of cooked meats he says:

"As for fresh meats cooked for the table, unless, of course, a perfect contempt for culinary laws is exhibited, they can safely be regarded as quite well suited to the digestion of dogs, also, as containing the most of the nutritive properties of these foods. And where dogs share the diet of their masters, or, in other words, are fed on scraps from the table, and the quantity of meat given them is ample, it is scarcely necessary to consider the question of quality or that of cooking.

"But considering that popular method of cooking meat specially for dogs, and the want of care which so many exhibit in its application, the conclusion is inevitable that under certain conditions of life they should be fed on raw meat while those conditions last.

That this may be accepted, the fact is urged that no matter how scientific the process of cooking, alterations of a chemical nature are induced in meat and some of its nutritive elements are wasted. Were man perfectly familiar with all the inner workings of the dog's mechanism, the demands in the way of food and the peculiarities of his organs concerned in digestion, then the problem of supply required for the growth and health of the body and to renew the loss from wear and tear, etc., might possibly be worked out. But the dietician has yet to enter this province and at present only rough estimates can be made, and a very wide margin must be left to cover the many conditions, fixed or incidental, of which little or nothing is known."

On feeding raw meat, always a debatable question among dog men, he has this to say:

"Thus far experience has shown the writer that bitches in pup which are fed frequently on raw meat during the periods of gestation and nursing are stronger and healthier, give whelp to more vigorous puppies and prove better support for the same, than bitches fed largely on cooked meat during these periods; that is, on meat cooked specially for them. The reason for the superior qualities is, of course, problematical, but it would seem that either raw meat was more easily digested by them and more readily converted with less waste into materials for building, for renovation of the body, etc., than cooked meat, or that raw meat contained highly important elements in better forms or more correct proportions for the work in which they were engaged, and to support them while doing it than cooked meat.

"Experience has also shown that in many morbid states of the system not only is raw meat more acceptable to the digestive organs, but recovery takes place much more rapidly under its use than it does under the use of cooked meat. And another product of experience is the fact that puppies to which raw meat is given often and judiciously, thrive better, grow in structure with greater rapidity, assume more massive proportions and are less frequent victims of disease than those given cooked meat as often and in the same quantities.

"But there is a bitter prejudice against the giving of uncooked meat to dogs because of the parasites which it sometimes contains. Beyond doubt this danger exists, for nations habituated to the use of raw meat are notorious harborers of tapeworms, but still the writer believes that much greater alarm is felt than is justifiable. Man is as easily infected as dogs, yet among people of civilized countries cases of tapeworms are never frequent—in fact they are rare except in imagination, in which pictures of them are drawn by pretenders to medical skill, who have methods of their own for deluding their patients. And considering this rarity, also that cooking as often applied will not destroy the vitality of these parasites, raw meat cannot be nearly as fierce a menace as generally reputed."

Any one who has kept a number of dogs knows how prone kennel owners are to feed foods easily obtained and inexpensive, such as liver, lights, paunches, etc., and we are pleased to see that "Ashmont" gives this subject special attention. After speaking of insufficient cooking or the "done rare" process, he says: "But there are evidently animal substances—some of them are occasionally eaten by man—often fed out to dogs, from which far greater danger is to be apprehended unless they are first submitted to a boiling temperature. Among such are the hearts, livers, lungs—called 'lights' by many—paunches and other internal organs. Even greater danger lurks in the entrails of many animals, and these, whether from sheep, cattle, horses or game, should be given to dogs only after they have been thoroughly boiled for the purpose of destroying what parasites are present. The brains of certain animals, especially the sheep, are also a source of danger, which must exclude them from the diet until they have been treated in the same way as the entrails.

"These dangers from so many different sources can, however, be easily obviated by observing the simple rule, to feed to dogs, while yet in its raw state, only good, sound and wholesome beef or mutton, and thoroughly to cook all other flesh foods allowed them. This, religiously adhered to, the danger of parasites from animal foods will be very slight indeed and need not occasion any uneasiness.

"Breeders generally are much prejudiced against pork, and rightly so, for it is rich and burdensome to the digestive organs—in fact, of all meats it is the most difficult of digestion. At the same time to what are called 'scraps' by some and 'cracklings' by others, which are the refuse of melting or refining, there can be no valid objection as an occasional ingredient of the diet of hardy dogs. But instead of giving them, as is sometimes the custom, as they are broken from the cakes, much the better way is to make soups of them and thicken the same with vegetable foods.

"Although liver is as nearly deserving of prejudice as pork, it frequently appears before dogs and doubtless it is accountable for many mysterious attacks of diarrhœa, for it is one of the richest foods and as difficult of digestion as it is rich. Considering which only an occasional and sparing use should be the rule.

"As for what are known as 'lights,' some writers recommend them, yet a person would not be likely to feed them to a house pet more than once, for they give the breath an intolerable stench, which can be accepted as unmistakable evidence that decomposition occurred and advanced far before the stomach completed its task."

## TORONTO KENNEL CLUB.

THE Toronto Kennel Club is remarkable for its progressiveness and originality. It aims to make the dog better understood and appreciated and to promote kennel interests. To this end it establishes a library in Toronto and appeals to authors and publishers for practical sympathy. Already the response has been most gratifying. Prof. Wesley Mills, M. D., of Montreal, presents a copy of his work entitled "The Dog in Health and in Disease." Thayer Publishing Co., of Boston, donates a volume on "Modern Training, Handling and Kennel Management," and Dr. H. Clay Glover, of New York, sends his "Treatise on Canine Diseases." The publishers of FOREST AND STREAM and *Fanciers' Journal* have kindly placed the Toronto Kennel Club on their respective free lists; may others do likewise.

During the summer months the club has been incorporated under the Ontario statutes, the constitution and by-laws printed and a large amount of important business transacted. The outlook for the future of the club is very promising. TORONTO KENNEL CLUB.

# DOG CHAT.

### Death in the Hunting Field.

The sad death of Mr. Charles L. Cottenet, while out with the bounds of the Meadowbrook Hunt Club, at Hicksville, L. I., has drawn public attention again to the imitation fox-hunt so much in vogue among country clubs round New York. Mr. Cottenet's horse in taking a post and rail fence caught in a wire strung about a foot above the top rail, turned a somersault and pitched its rider on his head and then rolled over him. Mr. Cottenet when found was unconscious and died shortly after, his skull having been fractured at the base. This was a drag hunt and the course was laid for about eight miles over fences near Hempstead, L. I. It does seem strange that when the course is chosen, unlike fox hunting in reality, when you take it as it comes, that whoever lays the drag has not sense enough to "ware wire" and steer clear of it. And again that a man of Mr. Cottenet's experience would think of taking a wire in plain view, and especially with a green horse. Again, while following hounds it is always wiser to wear a hard hat, either a "tile" or "Derby," for we have seen many a skull saved owing to the 6in. space between crown and skull. Like everything Americans undertake, they go at it head first and generally undertake more than experience warrants them in doing, and so it is with so-called fox-hunting The men are eager to get there, and the horses only half trained and the country unsuitable, some of the jumps being very nasty, accidents are bound to occur. This accident has cast a gloom over society and the meets for a time will be abandoned. The master of these hounds, Mr. James E. Cowdin, was also badly thrown some time since, but has since recovered.

### Fox-Terriers in Canada.

The Fox-Terrier Club organized during the late Toronto show is bound to do good to the breed in Canada, especially with such a go ahead man as Ald. Stewart holding the reins. A circular has been issued by the club stating its position and aims. Next year it is intended to give a show confined to fox-terriers and also bring pressure to bear on bench show committees to provide separate classes for smooths and wires, and to give better money prizes. The latter is the better plan, specialty shows are a great expense to the clubs undertaking them, and we do not think they do as much good to the special breeds they are expected to benefit as is generally supposed. The American Fox-Terrier Club did not benefit at all by the shows they held. If the clubs make a special effort in conjunction with some large show, like the Bulldog Club does at the New York show, we are convinced that greater good is obtained and the dogs receive more notice from the general public and other exhibitors, without the expense that is incurred in giving a separate specialty show at which a baker's dozen will just about cover the average attendance. The "frost," so apparent at such gatherings both here and in England, we are firmly convinced does more harm than good, for it is from the outside public the boom must be created. The exhibitors themselves know all about it. All Canadians even remotely interested in fox-terriers should join the club, for the low fee of $2 is within the reach of any one.

### Railway Rates in Canada.

The handlers feel pretty sore over the way they were treated at Ottawa either by the show people or the railroad companies. When a club advertises that certain arrangements have been made with the express and railroads about transportation, they should make it a point to see that they were carried out. The exhibitors got to Ottawa all right, but when they tried to get out the companies repudiated any agreement and charged so much a hundred pounds, and no dog could weigh less than a century. This made it especially hard for George Thomas, most of whose thirty dogs were terriers, and it cost him over $40 to get out. The big-dog men were not affected by this ruling so much. Still some different arrangements will have to be made next year if the show people hope to get the good dogs from the States. The Ruppert Kennel with four dogs won $10. Then to make matters worse they had each to pay $2 50 for customs clearance papers and when they got to the line the customs officers wanted a dollar each before they would pass them, this was the last straw and they kicked but not too hard for sundry personal reasons, but succeeded eventually in persuading the officers to take fifty cents. This on the face of it must have been extortion. With the promises so liberally given that the customs arrangements would be all lovely, it is apt to make exhibitors say hard things and remember their experiences when another year comes round.

### Shooting Dogs.

The other day a man in New Rochelle deliberately in cold blood shot a valuable mastiff belonging to a neighbor on the latter's premises. The dog is said to have been a nuisance to the neighbors by the man who shot the dog, and the owner of the "late" dog says it was shot because in the earlier part of the day his dog had bitten the shooter's bulldog. Whichever tale is true, the opinion given in the Uxbridge case the other day would seem to cover this one. Judge Dartwell in rendering his decision said: "The law permits the killing of a dog by any one by whom he is attacked, but does not allow the aggrieved party to take the law into his own hands by killing the animal on a subsequent occasion, still less when the attack or injury has been inflicted upon another, even if a member of his own family. Any one who adopts this course renders himself liable to a criminal prosecution." And this seems to us like a commonsense view of the matter. It is probable that the case we speak of will come before the courts, and the result will be important.

### Newfoundlands at Danbury.

Mr. Jas. Watson writes us a "postal" to say that he did not give Carlo, the fat, curly Newfoundland, equal first prize with Prince Hal at Danbury. Carlo was awarded second. We took the awards from the secretary's book, the only record, and it was plainly written there equal first, and moreover the two dogs had each a blue ribbon. We are pleased to find that we were mistaken, though for Mr. Watson's own reputation he should object to having his awards tampered with afterward. Regarding the greyhound bitch Maybrook Nell Mr. Watson says: "I fully expected "H. W. L." would find fault with Maybrook Nell, but almost solely on account of her great depth of chest." No! we found fault with her other bad points, which were quite sufficient to show she was in the wrong place.

### The Beagle Trials.

The entries to the National Beagle Club's third annual trials show a healthy increase over former years. The first trials had twenty-one entries, last year thirty-four and this year there are thirty-eight. This year one prominent kennel that participated last year does not take part, but beagle men will be pleased to see that several new names are to be found among the entries for 1892. The trials are creating an interest among others than strictly beagle fanciers, and a number of visitors have signified their intention of being present at Nannet to see the festive "bunny" run to earth. Monday next will be devoted to the bench show and general congratulations. The sterner work will commence at daybreak on Tuesday, Oct. 25, and it is to be hoped all those who have dogs to run will be on hand in time so that a prompt start can be made. Those who require accommodation for more than one day should write at once to Mr. H. L. Kreuder, Nanuet, N. Y., to secure quarters at the hotel. Hotel rates are $1.50 to $2 per day. It is very gratifying to find that most of the entries are dogs well known in the show arena, such dogs as Frank Forest, Storm, Tony Weller, Lou, Roy K, Clyde and others are all familiar winners. It is to be hoped that the usual absence of bickering and kicking will be noticeable again this year and that the meeting will obliterate all signs of the recent little irritation and the spirit of *bon camaraderic* prevail as before.

### Dogdom in California.

The fanciers of the Pacific slope are moving apace. With the fox-terrier and St. Bernard clubs firmly established it will not be long, probably, before they have other clubs for setters and pointers and greyhounds, which are also popular breeds in California. The fancy is fast resolving itself into three main sections and the advance is toward the setting sun. The European section, with England as the center, is recognized as the mother, but America can now show two very lively offshoots; the country east from Chicago, which in the past decade has made such rapid strides in the advancement of the dogs, and all that country bounded by the Pacific in the far West. Gradually our Californian brethren are stocking their kennels with choicely-bred stock from Eastern kennels. Mr. Crowell has recently purchased Fernwood Inez, a St. Bernard bitch, and Mr. E. B. Bishop has just shipped two Irish setter pups of excellent breeding to Mr. L. L. Campbell, of the Bay View Kennels, West Berkeley Cal., and lately we have chronicled the purchase of other noted stock from this side of the continent. With the new lease of life the Pacific Kennel Club seems to have taken there is bound to be a still further boom in matters canine The A. K. C. has, we understand, allotted the dates May 3 to 6, 1893, to this rejuvenated club for their next show, and now we trust that all differences will be buried and the two main California kennel clubs work for the benefit of the whole.

### Bassets.

Mr. E. A. Manice seems to have a decided penchant for the "long and low," for, besides owning a dachshund kennel second to none in this country, he has now purchased from Mr. E. W. Jester, of Wilmington, Del., the only team of bassets in America, or at least known to the fraternity. Mr. Jester has only, we believe, shown his dogs at Washington shows, but among the five he has sold to Mr. Manice are one or two that show a good deal of quality and correct type. It is often a subject of comment that some one over here has not taken up this breed that is so popular at English shows, and of which Messrs. E. Millais, G. R. Krehl, Mrs. Ellis and others have been the chief exhibitors. But now we hope Mr. Manice, as he tells us that he thought the bassets would make a good second string, will take the breed in hand and show us some real good ones. At Brooklyn show next month he intends to show up to the best of his resources. By the way, his dachshund bitch Janet has had a bad time of it. During the summer she tore her ears so badly that they became a mass of matterating sores, and her owner feared that to save her life they would have to be cut off. Dr. Sherwood, however, went to Stockbridge and made a complete cure, though, it is said, she will never carry her ears so well again.

### Pacific Kennel Club Meeting.

The regular monthly meeting of the Pacific Kennel Club was held on Oct. 5, in San Francisco, Cal., President R. E. Wilson in the chair, and an attendance of about forty members. There were five new members elected, viz.: Messrs. H. G. Paeffle, J. F. H. Wohler, V. Stubenrauch, G. W. Howe and J. J. O'Brien, and four new names were proposed for membership. The club has a membership of 105 now, and promises to be over 200 before the dog show is held. Judging from interest taken in kennel matters in California the show will be the largest ever held there. The club has now over $300 in the treasury, and the receipts of the evening were $47.

### Sale of Ch. Black Dufferin.

Through carelessness on our part Mr. Geo. Douglas's letter, dated Oct. 7, was mislaid. This letter informed us of the sale of his noted cocker spaniel Black Dufferin to Mr. John E. Watson, of Utica, N. Y., for a good figure. This affords cocker men an opportunity to breed their bitches to a good dog without the bother of sending to Canada and fooling with customs regulations. Mr. Douglas is going out of the fancy for a while, but the kennel, of which Mr. Luckwell is a partner and who stays in, has a couple of youngsters by ch. Black Duke and one by Black Dufferin that are very promising and are intended to shake things next spring.

### Canton Kennel Club.

The Canton (O.) Kennel Club, for the purpose of promoting the raising of fine dogs and the holding of dog shows in that city, was organized Oct. 8 at the office of Dr. J. M. Myers. The officers and directors are as follows: President, Daniel Cobaugh; First Vice-President, C. E. Alexander; Second Vice-President, A. H. Smith; Treasurer, W. F. Koons; Directors, J. M. Myers, W. L. Alexander, H. Strunk and H. E Phillips. The following are members: P. Schwartz, F. C. Taft, G. V. L. Mellinger, G. E. Leininger, August Dannemiller, Bert Coe, Ben Van Norman, John Higgins, J. L. Arnold, J. F. Stoddard, O. J. Banon, J. Wackerly, R. G. Haight and J. O. Eckroads.

### Psovoi Type.

At the meeting of the Borzoi Club, held recently in England, the question of a proper standard came up, and the points of the breed recommended by the committee will shortly be sent to the different members for suggestion, with the idea of forming a standard more in conformity, we suppose, with the English idea of what the breed should be like. The *rib* question was discussed, and the majority were against the *flat* side, and probably when the English have had sufficient time they will, as usual, *improve* on the breed until it has lost much of its original distinctiveness and will be nothing more nor less than a silky-coated greyhound in appearance.

### Manitoba Field Trials Club.

At a meeting of this club, held Oct. 10, it was resolved that the secretary tender to Mr. Tallman the thanks of the club for the very able and satisfactory manner in which he conducted the judging at its late trials. The following gentlemen were elected members: Messrs. Paul H. Gotzian, St. Paul; Frank Richards and Geo. Richards, Stewart; Dr. R. J. Walters, Dr. C. E. Sayer, D. M. Cumming and W. A. Bruette, Chicago; W. D. Hardon, Council Bluffs; A.C. Anderson, River Falls, G. A. Day, Fargo; C. C. Good, Faust; W. L. Smith, Morrison; Wm. Tallman, New York.—E. D. ADAMS, Acting Sec'y.

### The National Greyhound Club.

A meeting of this club was held Oct. 11 at the Fifth Avenue Hotel. There was little more than routine business transacted. The club decided to donate a silver cup again this year in the Derby at the Great Bend coursing meeting. Everything is progressing favorably in the arrangements for the Brooklyn dog show, held under the auspices of this club. Several handsome silver challenge cups will be offered. The W. K. C. offers one each for the best deerhound and Psovoi, H. D. Polhamus, one for best English setter, and Tubby Hook Kennels another for best bull-terrier. August Belmont also gives one to be competed for in the fox-terrier division. There will also be a number of good money specials, beside the generous list of regular prizes. The premium list will be issued Thursday, Oct. 20, and the catalogue will have at least 40 pictures of celebrated dogs, and in other ways be quite a work of art. An office has been opened to transact business of the show in the Arbuckle Building, Brooklyn.

### Brooklyn Dog Show.

Although we have not as yet received a Brooklyn show premium list, Mr. Huntington informs us that the entry fee will be $3. We are glad to know this, as now no one can have an excuse not to enter. Owners of dogs in this vicinity and all over the country should see that the first Brooklyn fixture shall be a rousing one.

---

One of the great pillars of the fox-terrier stud book has joined the majority. Champion Brockenhurst Spice died Sept. 2 from natural decay. His name will be found in the pedigree of many of our best fox-terriers.

---

Mr. C. H. Smith, owner of Islay, the Skye terrier, seems determined to get the best, and has now secured through Mr. W. J. Nichols, Jr., a grand young dog, 13mos. old, by Medoc out of a champion old Burgundy bitch. This young dog was shipped per s.s. Cufic, Oct. 7.

---

The most important show held on the other side last week was the Scottish Kennel Club show at Edinburgh. A glance through the prize list and reports does not show anything strikingly new. Many well known English winners were there. Of course the Scotch terriers, Skyes and Dandies were the main classes, and collies and bulldogs had also good entries Duke of Maplecroft, we note, won in St. Bernard and a very good rough bitch, Mary of Argyle, is said to have come out, her worst fault is lack of size.

---

The English *Stock-Keeper* has one rival less to contend with, that is if the *Fanciers' Gazette* could be called a rival. The first named journal has just purchased the kennel department of the *Fanciers' Gazette*, henceforth the latter journal will devote itself to poultry and pigeons. The increased space necessary for that part of the paper making it compulsory either to advance the price of the paper or let the dogs go. They decided upon the latter and now all the kennel business goes to the *Stock-Keeper*. While the *Fanciers' Gazette* has never applied itself to news as much as its contemporaries, still, and for that reason its pages have afforded lately some very interesting reading. In bidding adieu to the *Fanciers' Gazette*, as a dog paper, we hope that the management will have every reason to crow over their new departure. The *Stock-Keeper* needs no congratulations, though the position of that journal cannot fail to be strengthened by the purchase.

---

In commenting on our account of the death of the collie bitch Blue Ruin, *Stock-Keeper* remarks that she was "the most lovely blue merle the bench has ever seen."

---

There is trouble between the E. K. C. and the Crystal Palace show, to be held the end of this month. The Crystal Palace people have decided not to admit any dogs whelped in 1892. Owing to this restriction, a very wise one nevertheless, the E. K. C. have decided that, though the show is held under their rules, wins will not count. This seems to be a rather retrograde motion.

---

W. W. Titus has located at Waverley, Clay county, Miss., in a good bird country, over which he has the exclusive shooting rights, and is prepared to devote all his well-known abilities to turning out good private shooting dogs. He will not run any dogs in field trials this season.

---

We acknowledge with thanks the receipt of several photographs of the great Dane, Dane, owned by Mr. Seymour D. Boyd, Ft. Wayne, Ind.

---

The Fort Clarke Kennels, of Peoria, Ill., received, Oct. 18, a high-class pug, shipped from London, England, per s.s. Naronic. This dog is said to be choicely bred and the winner of several prizes at English shows.

---

The *British Fancier* does not seem to be in such a moribund state as some people would have us believe. At any rate, it is a pretty lively corpse. This week it has been devoting considerable space to the doings of Harry Twyford, now on a visit to his native heath. A capital picture is presented of the Sage of Bay Ridge. Lately Mr. Twyford has been doing the Yorkshire Kennels, and we quite envy the treat he must have had at Lytham, Lancashire, on the occasion of the old Ridgway Coursing Meeting. Among other kennels he has visited are those of Mr. Booth, brother of the Duchess Kennel manager, and with "Brockenhurst's" usual facility for putting his foot in it, remarks that that gentleman's hospitality is quite equal to any "Dook from Tranby Croft." As there are no dukes in Tranby Croft, the *simile* is lost. Messrs. Smith & Baker's St. Bernard Kennels were visited and Young Bute seems to have caught his eye more than anything else. Then he also dropped in on old John Reed, of Beverley, of spaniel fame, and whose reminiscent gossip of old Buffet, the fox-terrier, reminds us of poor Tom Dawson, who never tired of the subject. Mr. Twyford is booked to sail Oct. 25, and will, therefore, just miss the beagle trials where he was particularly needed. We wish him a safe passage.

---

Black Pomeranians are evidently worth their weight in gold, for *British Fancier* tells us that Mr. Thomas has just sold a three months old puppy weighing 1lb. for $125.

---

Champion Tweed, the most noted sheepdog trialer in England, has joined the silent majority.

---

Mr. H. W. Smith's new wire-haired fox-terrier Daylesford Broom, shown under Mr. George Raper's name, seems to be gathering up all the prizes he can before sailing for his new home. At Nottingham show last week he won the special for best in the show, reserve going to the collie Sefton Hero. If this is right it stamps Mr. Smith's dog as a good one.

---

The San Francisco *Breeder and Sportsman* gives us a good idea of the game conditions in California, which cannot fail to be interesting to the sportsman of the East who is well content to find two or three bevies of twelve or fourteen in a day's tramp: "In the early shooting of the season the quail are found in bevies, but as the season advances the birds assemble in great flocks, frequently numbering many hundreds. It is then that the best sport may be obtained, for the birds are then strong and active. When a large flock is found it requires some considerable maneuvering in order to secure the best sport. The birds must be thoroughly frightened and scattered in order to obtain the best shooting, as otherwise they being remarkably swift of foot will literally run away from the sportsman. The best plan to pursue is to rush into the flock and fire several shots in quick succession in order to scatter the birds and drive them to cover. After this maneuver is accomplished they generally lie well to the dog and afford excellent sport, although the number usually secured from the large flocks are but a very small fraction of the number. In the beginning of the season the shooting is very good, provided a sufficient amount of rain

fall has occurred to place the cover in good condition for the dogs to work in successfully. There can be but little doubt but that the great quantity of birds found in certain sections of the country interferes with the work of the dogs. This may seem a strange and wholly irreconcilable statement to those who are unacquainted with the conditions in some parts of this country presented. Imagine a section or more of land covered with sage brush standing about three feet, with the ground underneath practically without cover. Then think of thousands upon thousands of birds running all over this ground until it presents features found elsewhere only in a well stocked bennery, and you may form some idea of the difficulties under which the dogs are called upon to work. No wonder that the poor dogs are bewildered and lost in the cloud of scent which constantly permeates the ground and air as well."

A good way to bind the interests of a club together and stimulate competition is in great part a social one. The example of the new St Bernard Club in San Francisco is a good one. At the next meeting of the club, Oct. 25, it is expected that most of the members will attend accompanied by their dogs, and the impromptu exhibition is expected to be the best yet seen on the coast. This gives opportunity for friendly comparison and rivalry that is bound to have a good effect on the principle that "if I can't lick you now I will some day."

Mr. W. C. Reick is now in Europe, having sailed at a day's notice very recently. James Gordon Bennett will accompany him on his return for a three week's visit, arriving in New York on La Touraine next Sunday. Princess Florence is again in whelp, and due the last of the month. Refuge II. is again the sire of what we hope will be a litter that will make up for former disappointments.

We have had so many inquiries lately for Dan P. Foster's address, we give it here: 83 Washington street, Hoboken, N. J.

Mr. Booth, manager of the Duchess Kennels, bred Lady Gladwyn to Mr. Foster's Leicester last week and Ellen Terry to Otis, the Mount Holly winner and a son of old Ben Lomond and clear of Plinlimmon blood. Bellegarde was bred to Aristocrat and Miss Anna to Mr. Moore's young dog Alton, Jr. The Duchess Kennels should surely have something from this nice array of bitches. We also hear that champion Manon, lately owned by Mr. Sears, has recently changed owners, but we do not know who the purchaser is.

At the Trumansburg Fair, N. Y., Mr. C. S. Wixom, of the Hornell-Harmony Kennels, Covert, N. Y., made quite an interesting exhibit with his greyhounds, "beadles" as a local paper has it, and other dogs. The Havana (N. Y.) *Journal* in commenting on this says: "It seems strange that no one has ever yet placed any dogs on exhibition at the Havana Fair. Yet there is no animal so companionable and faithful a friend to man as the dog. Why shouldn't people exhibit their dogs as well as sheep, cattle, swine and horses?" We should like to shake the hand of that writer, such small seeds judiciously sown in country districts create comparatively as good effects as our largest dog shows.

Mr. W. H. Ashburner, who is so well known as a beagle owner and breeder, has written a timely volume on "The Beagle Hound; Its Selection and Training for the Field, with Kennel Notes." Judging from the numerous inquiries we receive for such a book, Mr. Ashburner's effort is peculiarly welcome, especially so when field trials and special bench shows are bringing the beagle so prominently before the public.

The owner of the Manatang Kennels, Marblehead, Mass., has sold the collie bitch Roslyn Mischief, by Maney Trefoil —Young Meg, to Mr. Alfred Bertling, Athens, Ga. Roslyn Mischief was due to whelp to champion Roslyn Wilkes, Oct. 3.

Mr. Louis Contoit has removed his St. Cloud Kennels to Banksville, N. Y. He tells us that his well known Irish setter bitch Endora is in great shape, having improved greatly, and will make it interesting for the others next spring.

Just a little story for those who like to read of the intelligence of the canine race rather than so much about whether such a dog has a light eye or a Roman nose, or whether he carries his tail in a line with his back or at right angles. Down at Shark River, N. J., there is a curiosity in the form of a dog which has a mania for catching crabs. Crabs are very plentiful there, and the dog has lots of sport. The dog is a sort of half-bred Newfoundland. As soon as it is light enough to see in the morning he enters the water in front of his master's house and begins to search for crabs. At times he stands motionless in the water, waiting for the crabs, which dart sideways here and there looking for food, that is all too scarce where scores of thousands are similarly occupied. Like a statue the dog stands, with his nose held close to the surface of the water, until a crab, curious to learn if the nose is meat and good to eat, swims rapidly toward it. Should the crab come within reach of the dog's forepaws its fate is sealed, for like a flash a blow crushes in its back shell. It is then seized in the dog's teeth, and that is the end of Mr. Crab. When tired of this he searches among the patches of seaweed, but never seems to tire of the crabs. History is silent on the state of his temper, but we trust his "crustacean" amusement has not affected it.

A writer in a Rochester paper gives some interesting anecdotes of musical dogs. We do not see why he should be accused of drawing the long bow when he says: I have seen a dog that was a very respectable dancer to tunes whistled by his master or played on the piano. He would balance himself on his hind legs and pick out the steps with nice precision, and seemed to be capable of being taught much more in the same line. A young lady residing in New York has a Scotch terrier which she claims is a musician. He, at least, has an ear to discriminate notes and is a good critic. It was when he was but a pup of three months that, hearing a hand-organ play the Boulanger march, he began to caper in a pleased manner and kept time with playful yelps. When the tune changed to "The Heart Bowed Down" Bernardo fell to the floor and moaned as if in pain. This led to tests of the dog's ability. The young lady played the "Swan Song" from Lohengrin, on the piano, which had the effect of making Bernardo walk slowly around, plaintively barking all the while. She then played half a dozen other selections, such as "The Soldier's Song" from Faust, the "Star Spangled Banner," the "Marseillaise Hymn," "Yankee Doodle." Lively music made the dog run in a frolicsome way, emitting short barks. "Yankee Doodle" set him into prolonged barks, and the "Marseillaise" drove him into a corner bowling with fear. The dog is now much older, and has developed an extraordinary fondness for the piano, insisting on always being beside his mistress when she plays.

A peculiar case is now attracting the attention of the doctors at the Bellevue Hospital in New York city. A woman whose scalp was torn from her head by machinery at which she was working, had the sixth skin-grafting operation performed upon her last week. In the other five graftings skin from her husband's legs was used, but this was only partially successful. As a last resort a patch of skin was taken from a healthy black and tan terrier, and it is expected the graft will "catch on." Canine cuticle has been used before in such operations, but never has so large a piece—six by nine inches—been grafted before. The woman and the dog were both put under ether, and the dog was killed as soon as the skin had been shaved and removed. If the graft is a living one the woman will, of course, shed her dog coat, but probably she will miss the tan spots, though, being a woman, the "kissing" spots will be there as usual. We always thought that the black and tan terrier was a good sort of a dog to have round, but as a self-sacrificing benefit to scalpless mankind he has opened up a new sphere.

FOREST AND STREAM "Kennel Specials" evidently hit the fancy and they recognize a good thing. Among the dogs offered for sale this week we find that Matern Pointer and Setter Kennels offer Toledo Blade puppies: Wm. A. Spiegel, trained Gordon setter dog; Musconetcong Kennels, choicely bred pointer pups; I. E Williams, three fox-terrier pups; C. D. Roberts, well-bred pointer pups; W. H. Pierce, an Irish Setter Trials entry; I. V. Doane, broken English setter; C. F. Kent, English setter pup; Lock Drawer 14, pointer pup; Poston & Burdell, English setter pups; Merry Mount Kennels, r. c. St. Bernard pup; Seymour D. Boyd, an Ulmer dog; R. W. Paddock, foxhounds; Silas Decker, Irish setter and collie pups; A. S. Weeks, pointer and setter; C. A. Paetzel, broken pointer and pointer pups; Maumee Kennels, high class pointer bitch, and also some choicely bred young pointers; this kennel also offers two very finely bred English setter bitches. We draw attention to Austin & Graves dog biscuits, and W. W. Titus's call for dogs to train. Wants—J. T. S., a thoroughly trained pointer or setter; Canton, a cocker or water spaniel. In the Stud—F. H. Perry's Claremont Patsey.

George Thomas, the guiding spirit and managing editor of the Anglo-American Terrier bureau, sailed for England last Wednesday. He will take in the Crystal Palace and other shows, and is ready to buy anything and everything for anybody on this side. His address will be care of Mr. Richard Toon, Fitzwilliam street, Sheffield, Yorkshire, England.

The Pennbrook Hunt Club, of Chestnut Hill, Pa., held their opening meet last Saturday afternoon at the country residence of Mr. Mitchell Harrison, formerly owner of the noted collie kennel at Chestnut Hill. There was a grand luncheon to visitors and neighboring farmers, and then the run over a course of nine miles took place. Mr. Harrison came in third after a rattling finish. Bill Nye, though offered a mount, preferred to get his experience from the top of a drag, which though somewhat slower, was considerably safer.

It is stated that the Tri-City Kennel Club will have a dog show in Davenport, Ill., some time this coming winter.

## DOG NOTES FROM RUSSIA.

DR. GRIMES, of Pittsburgh, has kindly forwarded us the following translation from the Russian journal *Ohota*, the official organ of the "Society for the Encouragement of Coursing Qualities of Hunting Dogs and all kinds of Hunting," at St. Petersburg, Russia:

"The coursing part of the Imperial Hunt consists of fourteen borzietniks (handlers of borzois) and twelve men with the goutchies (trailing hounds), of whom the first have one horse each, the latter two.

"At present there are in it sixty-two grown 'borzois' and forty-five pups, and eighty-two goutchies with thirty-nine pups. The pups are all distributed among the men at their homes, and are brought to the kennel when they are one year old.

"The gunning department of the Imperial Hunt consists of twenty-one men, five setters, two pointers and three retrievers. There are also six howlers (men to howl like wolves) and eight bear dogs (medelaukas), one bloodhound, six dachshunds and sixteen other dogs.

"Twelve foresters guard the hunting park or reservation near Gatchina against poachers, and take care of and feed the game and periodically report the number on hand. Any stray and roving dogs found on the preserve are killed, as they destroy the young hares and partridges.

"In the fall the Hunt goes away to neighboring Provinces for coursing; the balance of the year it is stationed at Gatchina, near the palace.

"Last fall the Hunt returned very soon and had caught only the very small number of six wolves, four foxes and 173 hares."

## GORDON SETTERS AT THE FIELD TRIALS.

*Editor Forest and Stream:*

I have received $10 from Mr. C. E. Mather as a subscription toward the Gordon setter prizes at the New England Field Trial Club trials at Assonet, Miss., next month. And Mr. J. Lorne Campbell, mayor of Simcoe, Ont., has sent me $10 to be added to the $50 offered by me to the best Gordon setter, at same trials, belonging to any one who is a member of the Gordon Setter Club on Nov 1, 1892. Other subscriptions will be welcomed. If Gordon owners expect their favorite to take a high place among other setters, they must do as the Irish setter men did last year, viz.: contribute to make their purse at field trials so attractive as to draw out such a large number of Gordons that some fine ones will show up among the starters.

So far, $50 are offered to the best field Gordon belonging to any one at Assonet; and $60, $30 and $20 to first, second and third best Gordon belonging to any one who is a member of the Gordon Setter Club on Nov. 1, 1892. Our initiation fee and annual dues are $5. Among applications, we are glad to receive the name of Mr. Noyes Billings, an old member come back again; and we hope to welcome others.

Besides the $160 cash prizes named above, at what amounts virtually to separate Gordon trials, Gordons have a chance of winning the $350 cash prizes in the open All-Aged Stake at the same meeting, which commences Nov. 8. Entries close Nov. 1, and should be sent to E. K. Sperry, Sec'y New England Field Trial Club, New Haven, Conn.

JAMES B. BLOSSOM, President Gordon Setter Club.

NEW YORK, Oct. 15.

## NEW ENGLAND KENNEL CLUB.

IT has been matter for comment for a year or two past, and especially last year, that the Boston show management needed a little shaking up and an infusion of new blood, and it was hinted that at the next election of officers something would come to pass—and it has. The following letter from Mr. Newman, the secretary, explains the situation: "Will you kindly notice the following changes in officers of the New England Kennel Club which took place at the annual meeting and election held Oct. 13: President, Edward Brooks; Vice-President, J. E. Thayer; Treasurer, G. A. Fletcher; Secretary, J. W. Newman; delegate to the A. K. C., Edward Brooks; Board of Governors, with above officers *ex officio*, H. A. Harris, G. H. Eddy, Henry Brooks, D. E. Loveland and John P. Barnard. Beuch Show Committee, Edward Brooks, H. A. Harris, G. A. Fletcher, D. E. Loveland and J. W. Newman."

Boston is well known as one of the best show towns in the country, and one or two of the early shows held by the late management were very successful. One in 1887, we believe, was more than ordinarily so. Mr. Fay told us that the club laid out more money, and consequently assumed more risk at that time than in any other year, and their success was proportionate. A wet year or two came and the club seemed to be a trifle afraid to "let out," and a policy of economy has ruled lately to the detriment of Boston's prestige among the fraternity. The younger blood felt that they would like a chance to see "how it feels," and they now have the chance. On their retiring from active management it is only fair to give credit to Messrs. F. Blackwood Fay, Jean Grosvenor and E. H. Moore for the good work they have done in the past, for on these three and Mr. Newman has fallen the brunt of the hard work which inevitably falls to the lot of those who run a show of the rating that Boston has. May we hope that the new brooms will sweep the Boston fixture into the same class with New York and Chicago? It ought to do so.

## LANCASTER DOG SHOW.

[*Special Report.*]

THE show held here in connection with the Agricultural Society was remarkable rather for quality than numbers. Donald McVicar, who was Messrs. Rutherford's kennel manager, handled all classes. The superintendent was Frank Smith, whose well known ability in this direction is fast asserting itself. English setters, pointers and fox-terriers made the best showing.

LIST OF AWARDS.

MASTIFFS.—1st, Chas. Porter's Bertha.

ST. BERNARDS.—1st, J. Rodgers's Snowflake.

GREAT DANES.—*Dogs:* 1st, Weissbrod and Hess's Bismarck. *Bitches:* 1st, Weissbrod and Hess's Flora II.

ENGLISH SETTERS.—CHALLENGE—1st, F. G. Taylor's Breeze Gladstone.—OPEN—*Dogs:* 1st, F. G. Taylor's Benzine. *Bitches:* 1st, F. G. Taylor's Katie Noble.

POINTERS.—CHALLENGE—1st, J. W. Winslow's Impersonation —OPEN—*Bitches:* 1st, J. W. Winslow's Clancarty.

FIELD SPANIELS.—CHALLENGE—1st, Brantford Mohawk.

COCKERS.—1st, Fred Goos's Peggy Bowley.

BEAGLES.—*Dogs:* 1st, W. H. Child's Mr. Winkle. *Bitches:* 1st, W. H. Child's Oakview Sallie.

DACHSHUNDS.—1st, Weissbrod & Hess's Peterman von Schlachtensee.

KING CHARLES SPANIELS.—*Dogs:* 1s, J. Brombach's Duke of Wellington. *Bitches:* 1st, Miss Sinnott's Ruth Cleveland.

BULLDOGS.—1st, H. Sinnott's Grover Cleveland.

FOX-TERRIERS.—*Dogs:* 1st, J. B. Nelson's Regent Risk; 2d, Lansdowne Kennels' Lansdowne Desperado; 3d, J. Fendrick's Hillside Rascal. *Bitches:* 1st, Lansdowne Kennels' Dimity.

IRISH TERRIERS.—1st, Ed Lever's Kathleen.

BLACK AND TAN TERRIERS.—1st, A. Rowe's Playboy.

ITALIAN GREYHOUNDS.—*Dogs:* 1st, J. Brombach's Golden Rod. *Bitches:* 1st, J. Brombach's Pansy.

PUGS.—CHALLENGE—1st, J. Brombach's Bradford Rowdy.—OPEN—*Dogs:* 1st and 2d, J. Brombach's Bismark and Marquise. *Bitches:* 1st and 2d, J. Brombach's Frisk and Daisy. *Puppies:* 1st, J. Brombach's Marquise.

O.

## DOGMATICS OF DOGDOM.

IT IS said that the good old monks tied a small keg of good brandy to the collar of a St. Bernard dog before sending him out to look for lost travelers. If such a dog were turned loose in Kansas (with the brandy) half the neighborhood would soon be lost searching for the dog.

—§—

A marvelous thing in dogdom is how excellent and valuable the most ordinary mongrel becomes when the owner wishes to sell him.

—§—

I would like to hear from each dog doctor in America as to which one each one knows is the best dog doctor.

—§—

Some dogs get near their kennels before barking, on the same scale that some men are bravest in their own homes.

—§—

The bloodhound has a marvelous smell, but he has an uncompromising rival in the billy goat.

—§—

A dog with a corkscrew tail should draw well.

—§—

The St. Bernard dog is used chiefly to "adorn a tale."

—§—

A *post mortem* on a dog often turns his stomach.

—§—

Few things are shorter than a good dog's funeral.

THE CYNIC.

## KENNEL NOTES.

**Kennel Notes are inserted without charge; and blanks (furnished free) will be sent to any address.**

NAMES CLAIMED.

☞ **Prepared Blanks sent free on application.**

*Forest Girl and Dela.* By Forest Beagle Kennels, West Duxbury, Mass., for black, white and tan beagle bitches, whelped Nov. 1, 1891, by Frank Forest (Riot—Skip), out of Sue Forest (Comeroe—Susie).

*Forest Rex.* Forest Beagle Kennels, West Duxbury, Mass., for white and tan beagle dog, whelped April 22, 1892, by Valentine (champion Bannerman—Twintwo) out of Jeannette (Bannerman II.—Constance).

*Clio and Echo.* By Forest Beagle Kennels, West Duxbury, Mass., for black, white and tan beagle bitches, whelped March 25, 1892, by champion Bannerman (champion Marchboy—Dewdrop) out of Twintwo (Kenneally's Lee—Tone).

*Duke.* By R. Dunn, Tilton's, Pa., for white and orange St. Bernard dog, whelped Aug. 27, 1892, by Hero (Mingo—Psyche) out of Kenora (Fritz—Lioness).

*North Rod.* By W. North, Haverford, Pa., for orange and white English setter dog, whelped April 23, 1892, by Trickster (Buckellew—Minnetonka) out of Daffodil (Roderigo—Maud Val Jean).

*Victor Packard.* By C. E. Packard, Westfield, N. Y., for orange and white St. Bernard dog, whelped Aug. 27, 1892, by Hero (Mingo—Psyche) out of Kenora (Fritz—Lioness).

*Ben Harrison.* By W. H. Dixon, Jamestown, N. Y., for orange and white St. Bernard dog, whelped Aug. 27, 1892, by Hero (Mingo—Psyche) out of Kenora (Fritz—Lioness).

*King of Lynn and Cora of Lynn.* By R. Leslie, Lynn, Mass., for liver and white pointer dog and bitch, whelped March 18, 1892, by Tempest out of Nadjy of Naso.

*Kentwood and Kathleen Kent.* By R. Leslie, Lynn, Mass., for liver and white pointer dog and bitch, whelped June 24, 1892, by King of Kent out of Belle Randolph.

BRED.

☞ **Prepared Blanks sent free on application.**

*Hillside Freedom—Ranter.* R. G. Stewart's (Washington, D. C.) fox-terrier bitch Hillside Freedom (Rossley Joker—Freya) to H. Owen's Ranter (Pitcher—Vene), Sept. 15.

*Nelly S.—Trailer.* Dr. A. L. Spangle's beagle bitch Nelly S. to H. F. Schellhass's champion Trailer, May 3.

*Betty S.—Trailer.* Dr. A. L. Spangle's beagle bitch Betty S. (Old Prince—Nelly) to H. F. Schellhass's champion Trailer, April 30.

*Sedan—Glen Jarvis.* Glendyne Kennels' (Bristol, R. I.) Irish setter bitch Sedan (Chester D. Herald—Nancy) to their Glen Jarvis (Elcho, Jr.—Maid). Aug. 20.

*Georgiana—Glen Jarvis.* Glendyne Kennels' (Bristol, R. I.) Irish setter bitch Georgiana (Bixby's Ruby—Victoria) to their Glen Jarvis (Elcho, Jr.—Maid), July 22.

*Meda—Royal Forest.* P. M. Carman's (Wrightsville, Pa.) beagle bitch Meda to his Royal Forest (champion Frank Forest—Nellie Krueger). Sept. 17.

*Western Belle—Spot Dash.* C. Elliott's (McAlester, I. T.) pointer bitch Western Belle (Sport Nan—Ross Graphic) to Liberty Kennels' Spot Dash (Sir Phillip Sydney—Topsey), Aug. 19.

*Gertie—Spot Dash.* C. B. Johnson's (Hyattville, O.) pointer bitch Gertie (Meteor III.—Kate C.) to Liberty Kennels' Spot Dash (Sir Phillip Sydney—Topsy), Sept. 1.

*Ohio Nell—Spot Dash.* Liberty Kennels' (Hyattville, O.) pointer bitch Ohio Nell (Dixie of Devonshire—Kittie Clyde) to their Spot Dash (Sir Phillip Sydney—Topsy), July 16.

*Minnemac—Cinch.* Liberty Kennels' (Hyattville, O.) English setter bitch Minnemac (Belton Star—Rose) to Poston & Burdell's Cinch (Roderigo—Bo Peep), Aug. 3.

*Dela—Valentine.* Forest Beagle Kennels' (West Duxbury, Mass.) beagle bitch Dela (Frank Forest—Sue Forest) to their Valentine (champion Bannerman—Twintwo), Aug. 17.

WHELPS.

☞ **Prepared Blanks sent free on application.**

*Twinkle.* A. Knoblauch's (Jersey City, N. J.) King Charles spaniel bitch Twinkle (Don II.—Duchess of Albany), Sept. 10, three (one dog), by his Royal Roy (champion Jumbo II.—Olivette).

*Ruby.* A. Knoblauch's (Jersey City, N. J.) King Charles spaniel bitch Ruby (Salem Charley—Juliet), Sept. 21, four bitches, by his Tutti Frutti (champion Roscius—Twinkle).

*Betty S.* Dr. A. L. Spangle's beagle bitch Betty S. (Old Prince—Nelly), June 22, seven (four dogs), by H. F. Schellhass's champion Trailer.

*Nelly S.* Dr. A. L. Spangle's beagle bitch Nelly S., June 27, two (one dog), by H. F. Schellhass's champion Trailer.

*Dora Dot.* A. W. Bealer's (Atlanta, Ga.) pointer bitch Dora Dot (Meteor, Jr.—Belle S.), Sept. 10, ten (five dogs), by T. T. Ashford's Clip Graphic (imported champion Brackett—champion Sally Brass II.).

*Crate.* W. J. Comstock's (Providence, R. I.) Irish terrier bitch Crate (Bencher—Demoiselle), Aug. 20, five (three dogs), by his Hanover Boy (Apprentice Boy—Belmont).

*Katie Connor.* W. J. Comstock's (Providence, R. I.) Irish terrier bitch Katie Connor (Benedict—Breda Florence), Aug. 23, seven (five dogs), by his Hanover Roy (Apprentice Boy—Belmont).

*Princess Irma.* H. W. Huntington's psovoi bitch Princess Irma (Krilutt—Elsie), July 27, five (two dogs), by his Argoss (Ataman—Padrooga II.).

*Modjeska.* H.W. Huntington's psovoi bitch Modjeska Krilutt—Elsie), Sept. 8, eight (two dogs), by his Argoss (Ataman—Padrooga II.).

*Dunmurry.* W. J. Comstock's (Providence, R. I.) Irish terrier bitch Dunmurry (Napper—Kate), Sept. 4, eight (four dogs), by his Boxer IV. (Jack—Potts); two dogs and one bitch dead.

*Lady Stout.* P. M. Carman's (Wrightsville, Pa.) pointer bitch Lady Stout, June 20, seven (two dogs), by J. R. Trissler's Duke of Richmond.

*Nellie Lightfoot.* P. M. Carman's (Wrightsville, Pa.) pointer bitch Nellie Lightfoot (imported Brown Stout—Grace), Sept. 8, nine (six dogs), by J. R. Trissler's Duke of Richmond (champion Robert le Diable—Ferry).

*Beauty C.* P. M. Carman's (Wrightsville, Pa.) beagle bitch Beauty C. (Little Dot—Cricket), Sept. 12, three (one dog), by W. H. Childs's Tony Weller (Kino—Fly).

*Roe.* P. M. Carman's (Wrightsville, Pa.) beagle bitch Roe (Bugler Boy—Kitty), June 17, five (two dogs), by W. A. Small's Frank Forest, Jr. (champion Frank Forest—Juno II.).

*Kenora.* W. H. Dixon's (Jamestown, N. Y.) St. Bernard bitch Kenora (Fritz—Lioness), by A. D. Sharpe's Hero (Mingo—Psyche).

*Ohio Nell.* Liberty Kennels' (Hyattville, O.), pointer bitch Ohio Nell (Dixie of Devonshire—Kittie Clyde), Sept. 19, six (four dogs), by their Spot Dash (Sir Phillip Sydney—Topsy).

*Delaware Girl.* Liberty Kennels' (Hyattville, O.) English setter bitch Delaware Girl (Belton Star—Rose), Sept. 7, four (two dogs), by Poston & Burdell's Cinch (Roderigo—Bo Peep).

*Gypsey Forest.* Forest Beagle Kennels' (West Duxbury, Mass.) beagle bitch Gypsey Forest (Frank Forest—Sue Forest), Aug. —, seven (one dog), by their Forest Hunter (Forest Boy—Lady Lee).

*Mable E.* Eberhart Pug Kennels' (Cincinnati, O.) pug bitch Mable E. (champion Kash—Lady Thurman), Aug. 22, three (two dogs), by their Patsy Bolivar (Eberhart's Cashier—Flossy II.).

*Peggy Pryde.* Eberhart Pug Kennels' (Cincinnati, O.) pug bitch Peggy Pryde (Eberhart's Cashier—Flossy II.), Sept. 10, three (two dogs), by O. P. Kinnie's Spokane (champion Kash—Lady Thora).

*Midget Nellie.* Eberhart Pug Kennels' (Cincinnati, O.) pug bitch Midget Nellie (Lord Clover—Sister), Oct. 1, eight (five dogs), by their Patsy Bolivar (Eberhart's Cashier—Flossy II.).

SALES.

☞ **Prepared Blanks sent free on application.**

*Chief of Tara—Shamrock Belle whelps.* Red Irish setters, whelped May 17, 1892, by H. G. J. Hallowell, Conshohocken, Pa., a dog to Jas. Ward and a bitch to Judson Sagebeer, both of same place; a bitch to Wm. Harte, St. Louis, Mo., and three dogs to Seminole Kennels, Chestnut Hill, Pa.

*King of Kent—Belle Randolph whelps.* Liver and white pointer bitches, whelped June 24, 1892, by R. Leslie Lynn, Mass., one each to G. H. Holtham, same place, and B. C. Miller, Little Rock, Ark.

*Trickster—Daffodil whelp.* Orange and white English setter bitch, whelped April 23, 1892, by J. M. Fronefield, Jr., Wayne, Pa., to C. B. Hall, Warren, Me.

*Hero—Kenora whelp.* Orange and white St. Bernard dog, whelped Aug 27, 1892, by W. H. Dixon, Jamestown, N. Y., to C. E. Packard, Westfield, N. Y.

*Shamrock Belle.* Red Irish setter bitch, whelped Jan. 2. 1891, by Henmore Shamrock out of Daisy, by H. G. J. Hallowell, Conshohocken, Pa., to E. Beaver, same place.

*Alice Leslie.* Liver and white pointer bitch, whelped June 24, 1892, by King of Kent out of Belle Randolph, by R. Leslie, Lynn, Mass., to E. M. Beale, Lewisburgh, Pa.

*Halcyon.* Black, white and tan beagle dog, by Frank Forest out of Maud R., by Forest Beagle Kennels, West Duxbury, Mass., to W. H. Hyland, North Tarrytown, N. Y.

*North Rod.* Orange and white English setter dog, whelped April 22, 1892, by Trickster out of Daffodil, by J. M. Fronefield, Jr., Wayne, Pa., to W. F. North, Haverford, Pa.

PRESENTATIONS.

*Chief of Tara—Shamrock Belle whelp.* Red Irish setter dog, whelped May 17, 1892, by H. G. J. Hallowell, Conshohocken, Pa., to Rev. C. T. Hallowell, Austin, Minn.

## ANSWERS TO CORRESPONDENTS.

*There is no charge for answering questions under this head. All questions relating to ailments of dogs will be answered by Dr. T. G. Sherwood, a member of the Royal College of Veterinary Surgeons. Communications referring to other matters connected with Kennel Management and dogs will receive careful attention.*

T. P. E.—Write to John Marshall, Sheridan avenue, Troy, N. Y., and mention FOREST AND STREAM.

M. B. G., Kansas City, Mo.—We only know of the Missouri Kennel Club, secretary G. W. Rawlings, St. Louis, Mo.

OLD READER.—T. M. Aldrich, Providence, R. I., and S. C. Bradley, Greenfield Hill, Can. Send your name and address another time.

E. P., Madrone, Cal.—We do not know of any one in your section who could train sheepdogs. Some local cattleman we should think could do it. We are not acquainted with the kennel you name.

R. A. R., New York City.—Please give the pedigree of the pointer dog Lachmer Boy, owned some time ago by the Westminster Kennel Club? Ans. Not registered. Write to W. K. C., Babylon, L. I.

E. A. O., Mechanicsville, Iowa.—A dog can be registered at any age in the A. K. C. S. B., providing he can show a pedigree for three generations back. Write to Secretary A. K. C., 44 Broadway, New York city, for blanks which give all information. The fee is $1.

G. H. M.—We do not know where you can obtain a book on the Russian wolfhounds. FOREST AND STREAM will have something in reference to the breed from time to time. The general information on the breed is very limited, not even a settled standard having been arranged as yet.

H. E. S., Audenried, Pa.—1. H. B. Anderson, Glenview, N. J.; Geo. G. Grey, Appleton, Minn.; John N. Lewis, Ramseys, N. J. 2. All depends on the natural ability of the dog, from 3 to 6mos., and the charge would be all the way from $50 to $100. 3. We do not think so. Each professional trainer has his own ideas as to the best methods of training and do not go much on books.

CAZENOVIA.—Will you kindly let me know what the limit of weight is in the small cocker spaniel class, also what is the best way of preparing a young spaniel dog's coat for showing. Ans. According to American Spaniel Club rules the limit in weight is not under 18lbs. and not over 23lbs. Apply a dressing of cocoanut oil, feed judiciously and use plenty of "elbow-grease" once a day at least, with flesh glove or soft cloth or chamois leather.

J. N. S., Smithtown Branch.—My hound dog is in a dangerous condition. One morning his eyes were almost closed and full of matter. At spells his mouth discharges a kind of yellowish matter with offensive smell. His mouth seems to be all sore and of a bluish red color, especially his gums. He can open his mouth very little and seems to be afraid to eat. He seems to be lame in hindquarters. Please prescribe. Ans. You had better take him to a veterinarian. If you do not do so try the following:

| | |
|---|---|
| Quinine sulph | 5ss |
| Acid hydrobrom, dil | mxxx |
| Tr. Ferri, perchlor | ʒi |
| Aq. ad | ʒvi. |

Mix. Tablespoonful three times a day. Keep him in doors.

C. P. L., Trenton, N. J.—Will you kindly give me the pedigree in full of the bull bitch Josephine (A.K.C.S.B. 6802)? Ans. By Young Tiger (E. 2658, late King Dick, E. 263) out of Sophia, by Sambo out of Katey; by Dick out of Nettie. Sambo, by Tom Sayers out of Bronte. Young Tiger, by Crib out of Meg, by old King Dick out of Old Nell. Crib, by Duke II. out of Rush.

A READER, Lenox, Mass.—1. What kind of powder and whose would you recommend for field use? 2. What pointer dog stands at the head now? 3. Was Croxteth the best dog in his time? Ans. 1. Consult our advertising columns; it would be invidious on our part to say. 2. At the head of what? If bench show, Graphic, Lad of Kent, Duke of Hessen, are considered the best in their classes. For field and bench both, Duke of Hessen is probably so considered, according to the records. 3. Yes, as a field trial dog, and he also won the stud dog medal in 1884 at New York.

B. S. Newburgh, N. Y.—1. How does the spaniel compare with the pointer and setter in hunting qualities? 2. Does a spaniel, when properly trained, "stop" on a bird and "point" in the same manner as the pointer? 3. Is there any book you would recommend for further information on the subject? Ans. 1. It is difficult to compare the work of the spaniel and setter. The setter and pointer are the favorites. For "finding" they are incomparably the superior. The spaniel is more particularly used for cover shooting, and when trained works always within gunshot. 2. He does not point. 3. "Modern Training, Handling, etc.," will give you full information on this and related subjects. Price $2.50. We can furnish it.

# Yachting.

THE conditions suggested by Lord Dunraven as the basis on which he will challenge for the America's Cup have at last been made public. While recognizing that portion of the new deed of gift which secures the rights of centerboard yachts, and calls for open sea courses, he objects to the new deed as a whole as the sole instrument regulating future races; he objects to the demand for other dimensions than the waterline; he suggests a limit to excess of length on the part of the challenger or to outbuilding on the part of the holder, and also that the races be started at a fixed hour should either party desire to start.

As to the principal point, the recognition of the new deed, the New York Y. C. declines to make any specific agreement with Lord Dunraven, and as the matter now stands, in the event of his winning the Cup, it could only be delivered to the club which he may represent on the execution of a legal instrument binding the club to all the provisions of the deed.

The minor details suggested are likely to be agreed to by a special committee appointed, but with one important exception. The holders reserve the right to defend the Cup with any existing yacht or one now building, regardless of the size of the challenger.

So far as now appears, the state of affairs is unchanged from that of two years since; the New York Y. C. will make fair terms for a race with any club which recognizes the new deed of gift as a legal and valid instrument, even though its most important clauses may be waived for the time. It is exceedingly improbable that Lord Dunraven will do this, or that if he did he could find a British yacht club to challenge for him.

The resolution offered by Mr. J. G. Bergen is an excellent one, and it is unfortunate that it was not passed. It is but justice to the members of the club that every important step relating to the America's Cup should be laid before them for discussion and approval. Had this been done in 1887 the club would not now have been in such a very unpleasant predicament. The new deed of gift, with its many serious blunders would never have been adopted had it been submitted to a meeting of the club before its final execution.

DETROIT yachtsmen have been for a month past in a state of excitement over a match race, to be sailed this week, between the three local cracks Josephine, Alice Enright and Princess, formerly City of the Straits. Much difficulty has been experienced in inducing the representatives of all three yachts to accede to the match and agree upon terms, one stumbling block being the fact that Princess is over the class limit of 35ft. l.w.l. In order to bring her into the class, she was hauled up and notches about 6in. long and wide were cut in her stem and sternpost at the waterline. Strange to say, there was much doubt at first whether such an open breach of the rules could be prevented, as there is nothing specifically prohibiting such notches in either the Michigan Y. C. or the New York Y. C. rules. The question was submitted to the New York Y. C., the decision of the measurer of that club being that such notches could not be recognized in measuring the waterline.

Although the case has never, we believe, come up in this country, it has abroad, at least two instances being on record in England, the 10 tonner Assegai in 1879 and the 30-footer Bonina in 1882. In each case the Council of the Y. R. A. decided that the notches could not be recognized; and after the latter date the rule was changed to read as follows: "The length shall be taken in a straight line from the fore end to the after end of the load waterline, provided always that if any part of the stem or sternpost, or other part of the vessel below the load waterline project beyond the length taken as mentioned, such projection or projections shall, for the purposes of the rule, be added to the length taken as stated, and pieces of any form cut out of the stem, sternpost or fair line of the ridge of the counter, with the intention of shortening the load waterline, shall not be allowed for in measurement of length, if at or immediately below the load line, nor above if within 6in. of the water level."

If such notches are allowable it would be equally proper to insert at will the pieces sawn out, thus placing the yacht in a higher class again. The difficulties attending the equitable determination and measurement of the loadline are already serious enough, and they would be increased twentyfold if the principle of changing the form of the yacht at will should be recognized. We understand that in the case of Princess, she is now sailing with the offending notches covered with tin so as to restore her original form.

THE principal event of last week in yachting was the part taken by the pleasure fleet in the naval parade of the Columbus Celebration. The season has so nearly passed that most of the yachts are laid up, but some of the larger ones have kept in commission for this display, among them Sagamore, Nooya, Conqueror and Iluna. One of the features of the land parade on Wednesday was the Naval Reserve, composed largely of leading yachtmen. The battalion was cheered vigorously along the entire line of march, and shared the popularity of the older and better known militia regiments.

THE measurement question is now under discussion by French yachtsmen in *Le Yacht*, with a degree of thoroughness and scientific accuracy which puts to shame the ever recurring clamor on this side of the water for "plain and simple" length rules. In the case of the French yachtsmen there are many complications due to local causes which make the question even more difficult than with us.

## Lord Dunraven's Challenge.

A SPECIAL meeting of the New York Y. C. was held on Oct. 18, being called to order at 9 P. M. by Com. Gerry. Gen. Paine was present, having been in the city for several days, and there was a good attendance of members. The following letter was read by Secretary Oddie:

SUDBAHN HOTEL, SEMMERING,
Sept. 16, 1892.

DEAR MR. ODDIE—I am very anxious to bring about if possible a race for the America Cup next year, and shall be greatly obliged if you will take an early opportunity of submitting the following proposal to the New York Y. C. for their, I trust, favorable consideration. I will sail a series of matches according to the rules of the "new deed of gift," with the following exception and addition.

First—The length upon the load waterline of my vessel to be the only dimension required. This to be sent with the formal notice of challenge, and her custom house register to follow as soon as practicable.

Second—Any excess over the estimated length of the load waterline of my vessel to count double in calculating time allowance, but my vessel not in any case to exceed such estimated length by more than 2 per cent. The yacht that sails against me not to exceed the estimated length on the load waterline of my vessel by more than 2 per cent., and any excess of length beyond the estimated length of my vessel on the load waterline to count double in calculating time allowance.

It is to be understood and agreed that, should I win the cup, the club obtaining the custody of it shall hold it open to a challenge on the same conditions as these under which I challenged. Should this proposal meet with the approval of the New York Yacht Club, as I trust it may, this letter may be considered as my challenge. The formal notice, together with the name, rig, length on the L.W. L., etc., of my vessel will follow immediately on receipt of an intimation of an approval of the club.

I may take this opportunity of saying that, if the challenge is accepted, I am perfectly satisfied with the arrangement concerning number of matches, courses and other details arrived at between the committee and myself in 1889 with one exception, I propose that the exact time of starting each race be settled not less than twenty-four hours before the first race, and that except only in the case of thick fog the vessels be started at the specified time should either of them so desire. Should neither yacht express any desire, then the sailing committee to exercise their judgment in postponing a race.

As I cannot at present fix the date of the first match, I will settle that matter later on with the committee which no doubt the New York Yacht Club will appoint in the event of their accepting my challenge. Trusting that they will do so and that an interesting contest may be the result, I remain, dear Mr. Oddie, yours very faithfully. DUNRAVEN.

J. V. S. Oddie, Sec'y New York Y. C.

Gen. Paine offered the following resolutions:

*Whereas*, A communication has been received by this club from Lord Dunraven indicating that a challenge for the America Cup may be sent upon the terms of the deed of gift, with the following exceptions and additions:

*First*—The length upon the l.w.l. of my vessel to be the only dimension required. This to be sent with the formal notice of challenge, and her custom-house register to follow as soon as practicable.

*Second*—Any excess over the estimated length of the l.w.l. of my vessel to count double in calculating time allowance, but my vessel not in any case to exceed said estimated length by more than 2 per cent. The yacht that sails against me not to exceed the estimated length on the l.w.l. of my vessel by more that 2 per cent., and any excess of length beyond the estimated length of my vessel on the l.w.l. to count double in calculating the allowance.

Followed by another clause, which is considered separately hereafter, and

*Whereas*, Said terms are permitted by the mutual agreement clause of the trust deed controlling said Cup, and are acceptable to the club, provided that no yacht of the specified rig, either now existing or under construction and known to be available for the use of his club in defending the cup, shall be barred or penalized.

*Voted*, That a committee of five be appointed with full power to arrange such a match with any qualified yacht club, specifying what yachts, if any, are excepted by the above proviso.

*Whereas*, The clause above referred to is as follows: "It is to be understood and agreed that should I win the Cup the club obtaining the custody of it shall hold it open to a challenge on the same conditions as those under which I challenged."

*Voted*, That said committee be instructed to reply that while the trust deed obliges the club having the custody of the cup to accept the conditions therein prescribed if so elected by the challengers, as it also permits such club to accept any conditions mutually agreed on, this club regards any further understanding or agreement as unnecessary, and will make no agreement that in the event of becoming a challenger it will accept said terms in its challenge.

Mr. J. G. Bergen offered the following motion, which was not carried:

*Resolved*, That a committee of five be appointed to consider the terms upon which a match should be arranged under the terms of the proposed challenge, and report their conclusions to this club for final action. That the so-called preliminary challenge and the original resolutions offered by Mr. Paine be printed and distributed to the members of this club as soon as possible.

Commodore Gerry appointed the following committee as provided for in General Paine's resolution: Mr. Charles J. Paine, ex-Commodore James D. Smith, ex-Vice-Commodore Latham A. Fish, ex-Rear-Commodore Archibald Rogers and Mr. A. Cass Canfield.

Mr. J. Fred. Tams offered the following, which was adopted:

"*Resolved*, That the special committee just appointed have power to fill any vacancy which may occur in their number."

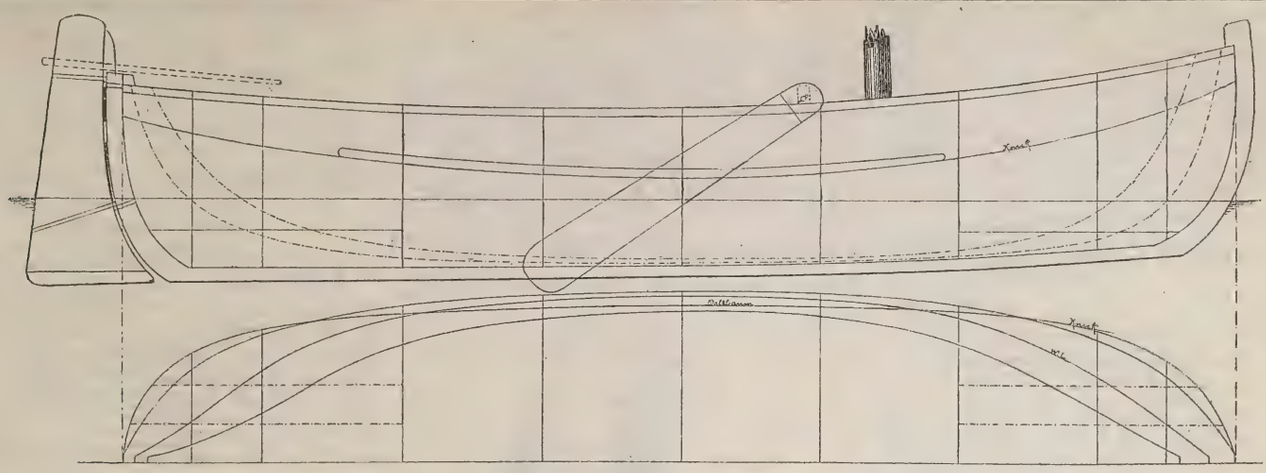
The first meeting of the special committee was held on Oct. 19 at the office of Messrs. Hollister & Babcock, No. 80 Broadway.

Only Gen. Paine and Messrs. Rogers and Fish were present at the meeting, and another will be held to-day. A reply to Lord Dunraven will be framed and dispatched by Saturday's mail, but will not be given out here at present.

## Detroit Yachting.

THE Citizens' Yachting Association of Detroit sailed its final regatta on Sept. 23. The principal race of the day was between Princess and Alice Enright for best corrected time, the prize being a watch. Princess was fouled by Krao, losing her topmast and delaying her, but she won the watch by 15s. The times were:

| | Start. | Finish. | Elapsed. | Corrected. |
|---|---|---|---|---|
| CLASS A. | | | | |
| Princess | 2 01 43 | 3 58 30 | 1 56 47 | 1 47 55 |
| Cora | 2 03 34 | 4 04 50 | 2 01 16 | 2 00 48 |
| Crusader | 2 10 00 | 4 18 55 | 2 08 55 | 2 08 55 |
| CLASS B. | | | | |
| Alice Enright | 2 00 07 | 3 54 11 | 1 54 04 | 1 54 04 |
| Lulu B | 2 01 19 | 4 03 43 | 2 02 24 | 2 02 24 |
| Krao | 2 02 34 | . . . | . . . | . . . |
| CLASS C. | | | | |
| Shamrock | 2 01 46 | 4 07 59 | 2 06 13 | 2 06 13 |
| Charon | 2 06 12 | 4 47 08 | 2 40 56 | 2 39 32 |
| CLASS D. | | | | |
| Aldina R | 2 04 05 | 4 22 51 | 2 18 46 | 2 18 46 |
| Magaline | 2 02 19 | 4 27 06 | 2 24 47 | 2 24 19 |
| Nalad | 2 05 08 | 4 35 47 | 2 30 39 | 2 30 39 |
| Viola | 2 04 37 | 4 42 22 | 2 37 45 | 2 37 45 |
| Ugo | 2 05 08 | 4 44 35 | 2 39 27 | 2 38 08 |
| Can't Say | 2 06 48 | . . . | . . . | . . . |
| CLASS E. | | | | |
| Gladys | 2 05 43 | 3 29 14 | 1 23 31 | 1 33 31 |
| Pearl | 2 02 13 | 3 50 21 | 1 48 08 | 1 47 40 |
| Let Her Be | 2 06 41 | . . . | . . . | . . . |
| Thistle | 2 10 00 | . . . | . . . | . . . |
| CLASS F. | | | | |
| Medora | 2 03 03 | 3 20 55 | 1 17 52 | 1 17 38 |
| Black Diamond | 2 04 24 | 3 29 03 | 1 24 39 | 1 24 39 |
| Ruby | 2 01 30 | 3 44 43 | 1 43 13 | 1 43 13 |
| Little Dove | 2 04 26 | 3 44 43 | 1 40 17 | 1 39 35 |

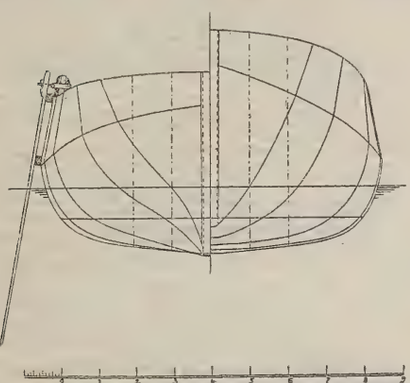


On Oct. 3 two matches were sailed by the fifth class yachts of the Detroit Y. C., the times being:

FIRST MATCH.

| | Start. | Finish. | Elapsed. |
|---|---|---|---|
| North Cape | 2 44 57 | 5 48 45 | 3 03 48 |
| Eureka | 2 41 24 | 5 56 60 | 3 15 26 |
| SECOND MATCH. | | | |
| Nettie N | 2 50 17 | 6 12 52 | 3 13 35 |
| Emma S | 2 54 25 | 6 15 18 | 3 20 53 |

Monday of this week was the date for the match race between Princess, Josephine and Alice Enright, but no report has thus far been received.



The conditions on which the centerboard cutter Titania was recently sold by C. O. Iselin to R. T. Inman were that the yacht should be altered to the schooner rig and her name changed. In accordance with these conditions Mr. Gardner has recently made the plans for the alteration of both rig and hull. In order to secure room forward it will be necessary to replace the present plumb stem by a rather long overhang, and the work will be done during the winter.

HELIGOLAND FISHING BOAT.

## Heligoland Fishing Boat.

We are indebted to the *Wassersport* for the accompanying design

of a shoal draft fishing boat used about the island of Heligoland, the leeboard being used, as in the Dutch yacht recently illustrated.

## A Gunning Cruise on Lake St. Clair.

The evening of Tuesday, Sept. 16, 189–found us aboard the snug little cruising sloop Jasmin with supplies for five days, guns and fishing tackle to our heart's content, and a large supply of happiness in anticipation of the glorious sport sure to be encountered in cruising about St. Clair Lake and Flats.

Our party would have been larger if "Old Prob" had not given us a few very cold days and nights just previous; as it was, we were only half on time at roll call. However, Tom came up smiling. No wind too cold or rain too wet to keep him away when the Jasmin has her anchor catted and burgee at her mast head. The wind was just coming out of the west as we hoisted mainsail and got the stops off staysail, swung out and laid our first reach for the quiet water under the lee of Raft Point at the head of Belle Isle Park. Starting from our anchorage we have a three-mile current, and the wind being very light, our progress was limited. The Jasmin is what is generally called a compromise, draft 3ft. 6in. at sternpost on a 26ft. loadline, therefore the current had about an even thing on the wind, and in spite of ballooning out spinaker and setting topsail it was a question for an hour whether it would be Raft Point or making a new draw in the Park bridge. However, at about 9:30 the wind made a start, and we did at the same time. In five minutes Tom was all mixed up in topsail halliards, spinaker boom and backstays, a sudden gust heeled us down, rail under, and everything light was cast off with a run. It seemed a question as to which would come out on top, but Tom is just the man for such a hole and the boom was soon lying snugged up, topsail stowed, stays brought home, and every line coiled up in apple pie order just as we were rounding the point.

The wind had settled steady, and was coming down strong. We held up for about a half mile, then came to and got our dinghy aboard and lashed down and not any too soon, as quite a sea was making, so that every jump in the pitchy darkness seemed going 10ft. up. Before swinging off again we took a reef in our mainsail and set small staysail. The 10 minutes head on had gotten us nicely livened up, and had wetted things down so that kings could not have been happier. As we came about and got under way Tom discovered that our port side light seemed ready to go out. It was a second's work to unship it and see that the top of the wick was charred off as though the oil was out, which seemed strange, as we had concluded they were at least three-quarters full before starting, or quite enough to burn 12 hours. On going below and unscrewing the top the trouble was soon apparent. Somebody had cut the wick about half an inch below the top and let it fall back in the oil, then smeared the top piece well and screwed it up again.

When we were abreast of Wind Mill Point Light, Lake St. Clair seemed rather black, and as several small schooners were lying to we decided that the morning would be time enough to make a start across. We hauled up a point and made a run for the head of Peche Island, intending to anchor in the lee until morning and have a good night's rest. On getting where we expected a haven we found others ahead of us, and from the number of anchor lights thought there must have been a fleet of wood scows blown over from Grosse Pointe to keep us out. We were not long in deciding that there would be no fun in lying so far out, so ran back across to the bay at Edgewood Park. Getting once more abreast of the Light we doused mainsail and ran under staysail until Tom made "six feet with the pike pole," then let go anchor and found it was just 11 o'clock, and that we were as wet from the spray as though it had been raining. Ten minutes was enough to make things snug on deck, get our spare anchor where it would be handy if needed, and go below.

Drawing the hatch cover and throwing off our wet clothes was soon accomplished. A good rub with crash towels and then into dry clothes made us feel that kings were missing the real pleasures of life, and that the man who first called yachting royal sport ought to be here to help us empty our mugs of hot toddy and stow away our sandwiches. After lunch was over and our beds got out and made ready, we went on deck again for a few moments, found the anchor holding all right, put down our dragging weight, unscrewed the top of anchor light, to make sure it was not cut, and then turned in to a sleep that only comes to him who leaves cares at home and makes the boat his Kingdom.

*Wednesday, Sept. 17.*—Awoke at 6:30, and found Tom still curled up and cosy, could hear a patter on deck that spoke more than words. Went on deck and found that during the night the wind had shifted to east and was coming up strong, so that our berth would soon be uncomfortable, our friends the wood scows over at Peche Island had already gotten away, and with the exception of a lumber "town" going down we were quite alone.

Just got to washing deck when Tom came up, rubbing his eyes. All was soon ship-shape, and after consultation it was decided to have breakfast, take our sand bags ashore and fill them up so as to get down to good sailing trim and then start for the canal.

We had the Jasmin fitted with sand bags to stow under the cockpit floor, which enabled us to make a change in her draft for light wind and river work and stow some 900lbs. more for lake and outside trips, an arrangement which makes some little extra work, yet amply repays.

Breakfast was soon made of broiled steak and toast, done over a charcoal stove, while Tom made coffee and boiled potatoes on the oil stove, and such a breakfast, or, rather say, such appetites, and such steak. A charcoal stove is one of the most outlandish things to have aboard, always a mess of dirt, but then who wouldn't put up with dirt and a great many other inconveniences to have such a broil. I have many a time broiled a black bass, baked potatoes, stewed coffee and had everything come on steaming in twenty minutes, and any one who has once tasted a King bass under such circumstances will smack his lips and feel his mouth water on thinking of it; there is a flavor that cannot be gotten from an oil stove and a crispness that would make a French chef turn green.

Breakfast over and the rain having stopped we launched the dinghy and went ashore, filled our ballast bags just at the water edge of Edgewood Park, wondered if Mr. M. would object to giving away such nice clean real estate, as he never has been known to sell any, and pulled back, got up anchor and under way at 11 o'clock.

Passed the Grosse Pointe club house at 12 and stood over for the canal, had a very light wind and were running close-hauled to get in the piers. Nothing occurred going over, wind held light with the day hazy and threatening; at 5 o'clock we found it would be necessary to make a tack to go up the canal, so we decided to go in by the old channel and haul up in the bay to be ready for some ducking in the morning; reached a good anchorage about three miles above the canal in 5ft. of water, and snugged up for a quiet evening. Overhauling guns and getting light tackle in shape for the morning, made a good supper off a 2lb. pound bass Tom had gotten on the trolling spoon just before dark and turned in at 9 o'clock.

Thursday at 4:30 a *chir-r-r-r-r* made us both grab for the pest at the same time, store it on the bunk under a blanket until the racket was over and make good time getting our lunch; 5 o'clock found us on our way in the dinghy to what seemed a good spot about a mile below. The morning was quite chilly with a fog coming up and seemed fit for anything but a good shoot. Some trouble was experienced setting decoys, owing to fouling weeds and tangling the lines, but just as it was beginning to turn light we had things in shape to fool the sharpest old mallard that might come our way and we did not have long to wait. The first that came were bluebills and although they came from a quarter we were not looking out for it was a tally each. Had we been expecting them from back in the marsh it would have easily been two each. Then a pair came just as we wanted them to, slacked up and began to settle to our decoys, and we each added another.

Thirty minutes passed and all was quiet, so far as ducks was concerned, but from the steady bang, bang, below we knew somebody else was having sport; we were beginning to get weary just as a nice flock of mallards passed up out of reach, then almost behind them came a couple of stray ones that stayed with us; we pulled out to retrieve and lost a good shot at two more who made a very sudden turn for the river on seeing us.

After thirty minutes more waiting and nothing to show for it we pulled out and went up to the fishing ground. Rods finished the morning's sport, and on returning to the boat we counted six ducks, four bass, two of them 3 pounders, and eleven perch—a good morning's work and quite an addition to our larder.

Now came the meal of the day. We roasted a duck and two small bass in the same pan, with dry-bread dressing, broiled four perch, fried potatoes, made coffee, and had bread and butter. As we sat one on each side of the table, with everything hot and appetizing, a meal was made that lacked nothing in its completeness. The morning sport was again enjoyed as we talked it over and plans discussed for next day. When breakfast was over and things cleaned up and in place it was 12 o'clock, and we agreed that a quiet snooze was about the next thing after such a meal.

At 4 o'clock we were awakened by the hatch cover being pushed back and a head appearing in the opening. A loud "Jasmin ahoy" and we were on our feet welcoming some friends who had come up for a day's fishing.

We were soon seated in the cabin and exchanging experiences. They had nearly fifty perch, ranging from ¾ to nearly 2lbs. weight, and seven 3lb. bass, the catch from 9 o'clock to 2:30 for four rods; and still they keep saying that the fishing is not so good as it was two years ago. Well, I agree that this is not any such numbers as have been caught, but the time of year, weather and all things considered it ought still to be enough to satisfy any but a genuine "fish hog."

They were well pleased with the catch and all were sorry that they could not accept our invitation to stop over until next day and try it again. After a lunch of fried perch and baked potatoes we got into the boats and started for Star Island House. There was quite a chop sea on, which necessitated our dividing up three in each boat, and made slow work of rowing. It was 6 o'clock as we pulled up at Star Island landing; supper was just being called, so after taking a promenade around the island a few times to limber up our legs we all went in to try Mr. Slocum's bill of fare once more.

It was as usual, first-class. About two hundred guests at one time in the dining-room, most of whom had come up on the afternoon boat to return in the evening. This is the place to come for a fish supper and to meet your fishing friends. Anything in the fish line can be had here and in best shape, and as Mr. S. is always on hand, one may be sure of the best attention. Supper over, we took another walk around the grounds and saw our friends take the down boat for the city.

After seeing the boat enter the canal we turned and went into the hotel office to look up some brother yachtsmen whom we had caught sight of in the dinng-room. Found several royal good Corinthians and also a few veranda yachtsmen, and had a very enjoyable evening, with some good cigars and some very interesting race talk, most of the boys being anxious to pick up a race with an old timer that has rather surprised some of them in the way it has been necessary to look when you wished to see her. A few hundred pounds of lead placed where it will do the most good makes a great difference in the sailing of some boats.

Ten o'clock coming on reminded us that we had three miles to go before turning in, so good-nights were quickly over, and as we took our place in the dinghy Tom touched a very tender spot in my heart by saying, "Mack, don't you wish we had brought the Jasmin and anchored over the river?" We don't very often care about a three or even five-mile run up here; but after dark and in a chop sea—well, of course there are some disagreeable things in yachting as well as any other sport.

After passing through the cut and getting out in open water we made good time, Tom rowing and I with a three-foot paddle, we made a beeline for our anchor light, got aboard and found things all right, and was just starting to turn in as Tom chimed out, "Well, ain't you going to have some lunch?" I admit to being a fair eater, but draw the line at four times a day; so left Tom rattling the pans, rolled up, and was soon asleep.

Was awakened by Tom at 5 o'clock, slept so soundly that I had not heard the alarm, and it has been a question in my mind whether Tom did or not, although he claims he did; and I seemed so happy he did not want to awaken me. He had a cup of coffee and hot toast made, guns and tackle in the boat and was all ready to start, so we made quick work of the lunch and were soon on the way to Lower Point. We had to hurry, but 6 o'clock found us all settled, and no sooner had our guns ready than we had the pleasure of stopping three fat mallards, Tom getting two of them, I one and scoring a clean miss. On looking around we found that on our left and not over 100yds. away quite a party of Rushmere Club folks had built a blind and brought out some ladies to enjoy the fun, and good fun it was, too. We could hear their shouts and laughter at every miss, and applause at the good shots, and then the hush as the ducks were sighted. It was new experience to us, the idea of going ducking with women would paralyze a great many shooters, but our neighbors got a good return for almost every shot, and the amount of laughing mist have done them an inestimable amount of good.

Eight o'clock found us with seven mallards, four bluebills and a large gull. So we took up our decoys and left the grounds to our noisy friends. On starting up we put out the trolling spoon, and before going half a mile had a 3lbs. pickerel, and on reaching the boat made a circle in hopes of getting another, but to no purpose.

After making a good breakfast we concluded to have a sail, so the anchor was soon up and everything ready for a spin across the quiet waters of the bay. The wind was light and steady, with just enough sea to make it interesting; so we started off without any place in view or any time to get there. Tom was at the stick, which meant a quiet, easy sail. Our first run was down past the old channel lights, leaving them to port and standing well over into Anchor Bay, then we came about and stood over the ship course, taking in the delightful autumn breeze that was blowing and enjoying a clear sun with blue sky accompaniments.

Three o'clock found us well over in Belle River Harbor on the Canadian side, and as our appetites had been growing for the last hour at an alarming rate we concluded this would be a good place to try what the cook had for dinner, so we came to in the wind, dropped anchor, took in staysail and had the stoves on deck and burning brightly in less time than a regular mechanic would consume in cutting kindling.

Tom had been talking about a French dish that he had tried while at the "Grosse Point Frog Club" social and so we concluded to try and meet it or go one better. Our largest pan, holding four quarts, was put on the charcoal fire and soon boiling, two ducks cleaned and quartered put in, boiled for thirty minutes, then potoes, two onions, two turuips cut into slices and one carrrot put in, and ten minutes after about two pounds of piecrust rolled in balls the size of potatoes was dropped in and the whole thing kept boiling for fifteen minutes longer. Coffee, bread and butter and hardtack completed the layout. When we came to try it the result was eminently satisfactory, and nothing was left in the pan.

Five o'clock found us with dinner over, cleaned up and discussing plans for the next twenty-four hours. It was decided to take a run back to the canal. Seemed as though we couldn't think of calling it a trip without having another morning with the ducks and fish.

Anchor was weighed, staysail set, and the wind being very light topsail was put up and preparations made for another quiet sail. This being the skipper's trick Tom stretched out on the cushions, pulled a blanket over him and was soon fast asleep, but it was not for long as it began to get thick and the compass had to be brought up, soundings made and watch kept forward.

At 10 o'clock we were in sight of the canal lights, and at 11:30 entered the lower end just as the big Jewett came out, passed up and struck topsail opposite the lower club house and came to anchor about three-quarters of a mile above the canal, on the Canadian side of the channel; soon had things all snug, anchor light up, and went below for our last lunch and bunk aboard for two weeks at the least.

Saturday at 4:30 our reliable old pest got us out with a jump; this morning was the first time I ever knew Tom to lie still and let me get on deck before he was up. He explained by saying that a beautiful dream was just passing his mind, so much so that he could not bear to break it even at the risk of his reputation as an early riser, and he hoped it would come true. On asking for a description he answered by saying, "There could be no description given." Now, that rather excited my curiosity, and of course I begged for an explanation, when Tom looked straight at me, winked his left optic and quietly remarked: "Thought I heard you say 'Tom, old boy, suppose we make another week of it.'" Well, that was excuse enough for anybody to lie abed over. And Tom turned to and made up lost time by getting the stove going, so that by the time he was dressed and I had the boat ready to start, coffee was all made and a lunch on the table.

We got away quickly and went direct to yesterday's grounds, and were soon having things to suit. Tom's first shot bagged three bluebills, and he gave a yell that almost capsized the boat. It was a remarkable shot, no doubt, but I thought he was making a great racket about taree ducks. This was our best morning, or, as "Yo" says, a morning to be marked with a white stone. At one time we had seven ducks in the water before stopping to retrieve, and when the time came for returning we counted 13 mallard, 7 bluebill and 2 wood ducks. With light hearts we got up decoys and said not a word about fishing, but pointed straight for the Jasmin.

As we rounded the bend and came in sight, Tom exclaimed, "Hello! the colors are up," and sure enough there they were and looking very gay, and as we came within hailing distance a well-known yell greeted us.

The missing member of our party had recovered from his indisposition, and concluded that one day's fishing would be better than no fishing and came up on the boat the evening before; and on being told that we had left in the morning and gone down the lake, had spent this night at the Star Island House.

We were glad to see him, Tom especially so, and immediately began questioning him as to how long a lamp would burn with the wick cut. It was quite amusing to hear Tom corner him, which he did, and then with a far-away look bid him beware. After inquiries as to folks at home, etc., etc., we had breakfast on baked duck, with celery and green onion accompaniments, stewed tomatoes, potatoes fried in the pan with duck gravy, coffee, bread and butter. While putting the breakfast away we gave him an account of what he had missed, and then allowed him to turn in and help with a general cleaning up.

Bedding was brought on deck and given a beating, then put across the boom to have an airing, the icebox brought out, everything taken out and given a good scrubbing, kitchen furniture treated to a good scouring with clean river sand, and the cabin floor scrubbed up and woodwork oiled. At 12 o'clock everything was slick and clean, or as Tom expressed it, in apple pie order, and as the new-comer had worn out the fingers of his gloves scrubbing, we allowed him to throw water on the deck while we scrubbed it off with brooms.

This ending the general housecleaning we sat down to a lunch of hard tack and cider. After lunch the icebox was repacked, and after our day's game was put in there was just room for the ice; so taking the dinghy we made a call at the Rushmere and replenished stock and got some genuine cow's milk for a change from our condensed article. Returning, Tom sat amidship rowing, F. in the bow, while I sat in the stern holding the milk to keep it from slopping over. As we neared the yacht I received a wink from Tom, which said "just watch my motion," and then turning requested T. to put the ice on deck, get there himself, then take the milk and he would put the dinghy in shape for towing, which would have been a very nice adjustment of affairs. T. straightened his six-feet-two up and laid the first piece of ice well over, but, alas! as he straightened up to follow with the second Tom gave a slight push with the oar, just starting the boat away gently. T. reached over a little further, making a graceful bend and looked very much like the statues sold in china-

ware stores to represent a diver, only with more wearing apparel than they are generally blessed with. Instead of the graceful figure they make he was the most ludicrous sight one can imagine, holding the ice out at arm's length and with a troubled expression on his face—but it was only for a second, as Tom gave a quick push and the bow shot around, while T. and a 50lbs. cake of ice disappeared as though something had frightened them.

Tom now turned and caught up the painter and was on deck and had a turn on the sheet cleat, and as T. reached the surface passed him a line, and as he assisted him on deck began an attempt at abusing him for wasting such hard earned ice, but T. soon changed the subject, for as he leaned over to shake the water from his ears he made a spring, caught Tom around the waist and in an instant they were both rolling over the yacht's rail. I had upset my milk laughing, or rather what had not gone into my lap at the time T. went in, and the stern took a sudden drop, so laying down the pail I went aboard and as they came to the surface assisted them both aboard. The bath did not seem to cool off their exuberance for they were at it again almost as soon as they were on their feet, and I have several times since thought that they had designs on my comfort by the way in which they crowded and sent the spray from their wet clothes in my direction.

After twenty minutes of good exercise and both going in again, they concluded to take my advice; then after a good rubbing I made them a hot toddy, using half a wineglass of brandy to a half pint of hot water, some sugar and nutmeg; then getting into dry clothes they were feeling so good I almost wished I had been in myself.

It was now 2 o'clock and we thought best to make a start for home, so the cannon was brought on deck, compliments paid to St. Clair club houses, anchor catted, colors hoisted, and, with a fair wind, we were soon on the lake with every stitch of canvas pulling.

Five o'clock found us where we started from Wednesday morning, and as Tom had been all afternoon getting dinner and just called it ready, we came to, took in head line, dropped anchor and did justice to a good hearty meal, and without doubt the best in way of variety we had had since starting. It consisted of mallard and bluebill duck, bass, perch and pickerel for fish, the remainder of our turnips and carrots, potatoes, celery, stewed tomatoes, bread and butter, and for dessert, Tom had spread himself on a bread pudding and an attempt at apple pie. Probably the dinner had spoiled our appetites somewhat, at any rate, when the pie was tested it was one too much—and suggested that we keep it for dumplings on our next trip. Tom tried hard to make excuses that the oven was out of order, but we knew better.

Seven o'clock found us rounding Windmill Point Light, where we came up Friday night with quite a large bone in our teeth, and at 8 we were once more all snug in our anchorage, the sails covered over, cabin put in order and everything ready for closest inspection; we then sat down for a few minutes rest, as we were loth to part company even for a night. Game was portioned out and sent ashore, our town clothes put on, and as we came ashore concluded what was one of the most enjoyable and beneficial trips the Jasmin had given us, which is saying a great deal. McL

## YACHT NEWS NOTES.

The sixth annual regatta of the Shenandoah Y. C., of Troy, N. Y. was sailed on Oct. 3, the times being

Capt. Ahlert and "Professor" Tobie, the first of the Rockaway Beach life-saving crew and the latter of New York, are on their way to Boston from Rockaway in a boat made of a pine box. They have wagered $500 that they can make the distance in forty days. Thus far the ridiculous craft has been upset five times, but fate looks after drunken men and fools and no particular damage has been done. This silly business of riding the waves in cockleshells and tubs will doubtless continue until some of the would be heroes are drowned, "and they never will be missed." There are many better ways for an adventurous man to distinguish himself than by paddling about in a pine box. He will be in a pine box soon enough without taking such chances.—*Marine Journal.*

The *Field* of Oct. 8 contains an interesting comparison of the working of the Y. R. A., Seawanhaka and old New York rules as applied to the various lengths in the different Y. R. A. classes from 0.5 to 160 rating. The table shows that in cases of small sail plans, the square root of the sail area being less than the length, the operation of the American rule is to tax sail heavily, in other words to put a premium on length; although under the usual conditions, with the square root of the sail area equal to 130 to 150 per cent. of the length, the reverse is the case. The table shows the close relationship of the Y. R. A. and Seawanhaka rules, though the former is more equable in its operation through a long scale of sizes.

On Oct. 7 the steam yacht Avenel, formerly Narod, owned by G. W. Loper, was in collision with the schooner Myra W. Spear, of Bath, Me. The yacht was just beyond Execution, headed for Larchmont, at 7:30 P. M., the weather clear and the moon snowing. It is claimed that the schooner ran into her. The yacht lost her foremast and bowsprit, and sustained damage to her bulwarks and naphtha launch. She continued to Larchmont and next day went to Poillon's for repairs. She was prevented from taking her place in the naval parade of Oct. 11.

On Oct. 14, at 4 A. M. the schooner Frank Leming, of Philadelphia, from Lanesville for that place with stone, ran over the wreck of the Alva, carrying away two masts from the wreck and injuring it badly. The schooner anchored off Chatham for temporary repairs to sails and gear, the hull not leaking. She reports no gas buoy visible over the wreck.

Bretagne, steam yacht, built at Baltimore, Md., in 1881, the largest wooden steam yacht built in America, was recently sold for £800 after being in collision on the Thames, and has been broken up.

On Oct. 12 the keel sloop Edith was sailed into Plymouth harbor by three men, who abandoned her after dropping the anchor, rowing ashore in the yawl. It is supposed that the yacht was stolen.

Almy, steam yacht, Mr. Fredk. Gallatin, is laid up at Harlan & Hollingsworth's yard, where she was built, never having been in commission since completed in 1890.

Mr. Gardner has designed a steam yacht of 85ft. l.w.l, 11ft. beam and 3ft. draft for Mr. H. J. Baxter, of New York, to be built this winter.

Wadena, steam yacht, J. H. Wade, arrived at Charleston, S. C., on Sept. 30 from St. Thomas, W. I., and on Oct. 18 reached New York.

El Chico, the Herreshoff fin-keel, has been sold by H. Maitland Kersey to F. H. Murray, of Halifax, N. S.

Catspaw, the Bos'on 21 footer, has been sold through her designers, Stewart & Binney, to a Brooklyn, N. Y., owner.

The Boston *Herald* of Oct. 16 contains an interesting article on Messrs. G. C. and C. F. Adams, owners of Harpoon.

Stranger, steam yacht, has been chartered by E. M. Fulton, Jr., and sails this week for a Southern cruise.

Utowana, steam yacht, arrived at New York on Oct. 8 from England, via Madeira, after a cruise of a year abroad.

Lady Evelyn, schr., has been sold by Sir Roderick Cameron.

Sheerwater, steam yacht, has been sold to H. R. Wolcott.

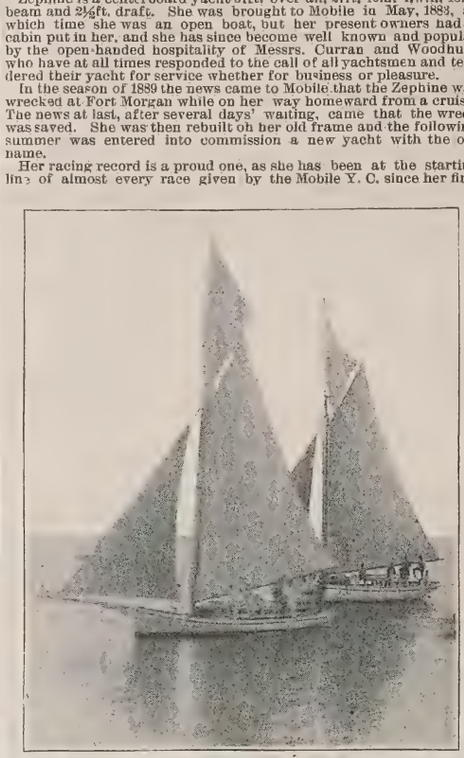
Windward, schr., has been sold by A. M. Serrell.

### Anchors for Small Yachts.

*Editor Forest and Stream:*

Referring to your article in the FOREST AND STREAM of Oct. 6, I would say that I have been using on my yacht of 27ft l.w.l., carrying 8,100lbs. ballast, an anchor I had made by Ireland & Son, of Tuckerton, N. J., weighing 36lbs., and in the four years I have sailed her it has held her through all conditions of weather. I have, of course, had my spare anchor ready at times, but have not needed to use it, the little fellow holding her every time. I have a chock with a sheave in it bolted on the bowsprit just far enough outboard for the anchor to clear the stem when canted up. The anchor has spear-shaped flukes and long stock and arms to it, and grips every time the moment it takes the ground. It is known in Barnegat Bay as a "sand anchor." The baymen there would not use any other kind. The stock is not collapsible and does not need to be, as the anchor lays up snugly under the bowsprit, ready for quick use, and from its light weight can be carried there at all times. N.

PHILADELPHIA, Pa.



### Two Southern Yachts.

We are indebted to Mr. J. K. Vincent, secretary of the Mobile Y. C., for the accompanying photo of two of the leading yachts of the club, Zephine and Mineola.

Zephine is a centerboard yacht 31ft. over all, 27ft. 10in. l.w.l., 18ft. beam and 2½ft. draft. She was brought to Mobile in May, 1883, at which time she was an open boat, but her present owners had a cabin put in her, and she has since become well known and popular by the open-handed hospitality of Messrs. Curran and Woodhull, who have at all times responded to the call of all yachtsmen and tendered their yacht for service whether for business or pleasure.

In the season of 1889 the news came to Mobile that the Zephine was wrecked at Fort Morgan while on her way homeward from a cruise. The news at last, after several days' waiting, came that the wreck was saved. She was then rebuilt on her old frame and the following summer was entered into commission a new yacht with the old name.

Her racing record is a proud one, as she has been at the starting line of almost every race given by the Mobile Y. C. since her first

ZEPHINE—MINEOLA.

arrival, and she has won more trophies than any other yacht in Mobile, although others are said to be faster boats. She has finished the season of 1892 by winning for the second time the club cup on Sept. 11, beating Mineola five seconds without the time allowance due her.

Mineola, while a new yacht, has won many laurels and rivals Zephine closely in popularity. She was designed by Mr. A. E. White, and built by E. Laland, in May, 1890, her first appearance at the club house in Mobile creating considerable comment. Her owners at once entered into the sport with great energy, and they soon became known as hosts that understood how to make guests happy while on board. As a racer she proved at first very poor, but this was owing to want of experience and a poor rig. She has since her first appearance steadily increased in speed until the season of 1892, when she succeeded on Aug. 16 and 17 in capturing second and third places respectively, and on Sept. 11 gave Zephine the closest race that yacht has ever had for first place.

As a cruiser she proved an able and comfortable boat. Her owners seem to rival each other in their endeavors to make their guests as happy as possible while on board, and have succeeded so well that an invitation to cruise with them is hailed with the greatest delight by the fortunate ones.

Mineola's present dimensions are 35ft. over all, 30ft. 6in. l.w.l., 14ft. 9in. beam, 3ft. 7in. draft. Mr. White is now preparing to place her in the builder's hands for the purpose of making her longer, in consequence of which great things are expected for the season of 1893.

### Corinthian Y. C.

TIBURON, CAL.—SAN FRANCISCO BAY.

FALL REGATTA, Sept. 25.—Course, 11¼ miles; wind light and fluky.

## *Canoeing.*

FROM the brief accounts which have appeared, the '92 meet of the British Canoe Association was a very quiet and uneventful one, though very enjoyable to those present. Thus far the camps have been so small as to make each a sort of family gathering, all hands having met before, and under such circumstances an outing of ten days cannot fail to be enjoyable. The growth of the B. C. A. has been far less rapid than that of its elder cousin in America, in part owing to the absence of the racing, such a prominent feature here. At the same time the B. C. A. has done much to aid canoeing, and is likely to continue to do so. The meet began on Aug. 15, at Menai Straits, lasting until Aug. 28. The party included several ladies. The time was spent in sails and short cruises, with a little racing.

WITH the first of the present month the term of office of Commodore Winne expired, and that of the new commodore, Lieut.-Col. W. H. Cotton, of Kingston, Ont., began. At the same time the retiring secretary, Mr. W. B. Wackerhagen, gave place to Mr. C. E. I. Porteous, also of Kingston. The A. C. A. has been fortunate always in being well served by its officers, but it has never been better served than by the two who now retire. Not only has the immediate work of the year, including the meet and the A. C. A. book, been admirably carried out, but much other work in the direction of uniting and strengthening the Association as a body has also been done, the results of which will appear in the future.

MR. GEORGE P. DOUGLAS, who made a most efficient clerk of the course at the meet, has completed his labors by the preparation of a very full and elaborate tabulation of all the races for the use of the regatta committee.

CANOEISTS with a liking for antiquarian research will be interested in an advertisement which has recently appeared, of "Photographs of the A. C. A. meet of 1802." Our records of the A. C. A. only run back to 1880, but it would appear from this that the Association is much older than is commonly believed.

THE next important event in the canoeing world will be the annual meeting of the executive committee, at which the new division officers take office, and the work of the coming year is laid out. The date and place have not yet been announced, but the former will be near the end of next month, the latter probably Kingston or Montreal.

### A Very Large Canoe.

THE Clayton (N. Y.) *Plaindealer* publishes the following description of a new boat of canoe model but of very large size, just built by Mr. Rushton:

"A handsome and novel boat is nearly completed at Rushton's boat factory in this village. It is a beautiful rowboat model, sharp at both ends, both ends alike. The dimensions are: Length 31ft. 10in., beam 5ft., depth amidship 2ft., at the ends 3ft. The keelson, bent ribs and gunwales are of oak, stem and sternposts of hackmatack, natural crook. The two top streaks of planking are of Spanish cedar, the rest of clear white cedar. It is built double skin of ¼in. stuff, smooth lap, the two thicknesses being laid in best spar varnish and copper fastened, the rib fastenings being riveted over burs. It is decked for about 5ft. at each end and has a 6in. wash streak at each side. Decks and wash streaks are of mahogany, laid in narrow strips, blind-nailed and caulked with cord. A 3in. coaming of black cherry, with top beading of the same wood, is bent around the cockpit, it and the wash streaks or side decks being supported by hackmatack knees.

"Inside the boat much labor has been expended. Under each end deck are three metal tanks for air, water, kerosene, etc. They are hidden from view by mahogany bulkheads and filled by gravity through pipes connecting with the interior of the boat. Their contents are emptied through pipes by air pressure forced through the filling pipes. All pipes are of course closed by proper valves. Thwartship are six seats, each 2ft. wide. They are made of black cherry, resting on mahogany bulkheads, and form lockers which are divided into compartments by sliding shelves and partitions for convenience for storing camp-kit, provisions and the many articles necessary to the comfort of the captain and the crew. The inside floor is of oak and cherry, a part of it in the form of loose slats, which, when placed between the seats at proper height form a floor on which the seat cushions—which are of corduroy filled with best curled hair—are arranged to sleep upon. All the woodwork is finished with the best spar varnish.

"All metal fittings are of polished brass, and most of them are of special pattern. They include sockets for rowlocks, bangirons, chocks, painter fastenings, etc., and a large drop rudder with special head for rope steering gear.

"A canvas tent is to cover the cockpit, thus enabling the crew, if anchored in some quiet spot, to keep dry in a storm and to sleep on board. The tent when in place is supported by a series of bows made of oak bent in two thicknesses and riveted together, the lower ends entering brass sockets in the deck, and a mast at each end over which is drawn a galvanized wire cable fastened at each end to the deck and made taut by a couple of brass turnbuckles.

"The propelling power consists of two pairs of spoon oars 12 and 13ft. long respectively, loaded with lead at the handle to make them balance at the rowlocks, and two gaff sails of about 100 and 125sq. ft. each.

"To prevent drifting when under sail there are two large dagger centerboards, the trunks of which are within two of the seats, and two heavy bilge keels on each side—the latter useful also in handling the boat when out of water and protecting the bottom of the boat when on a rocky shore. Two heavy folding anchors of galvanized iron and an ample supply of rope is carried.

"The finest selected stock has been used throughout and neither cost nor time spared to make it a perfect job in every respect. The actual cost of construction will approach $800.

"The boat was built especially for C. E. Payne, of Chicago, who has been here since its commencement and has superintended in person every detail of its construction and finish."

### An Amateur's Mishap.

"Br'er Fox wuz gwine long by de river bank one day, 'en he hear a mighty hammerin' not fur off, en he say ter hisse'f dat he b'lieve he'll go see what all de fuss wuz 'bout. He went 'long, he did, en, bless gracious, who should he see but Br'er Rabbit, wid his coat off en his sleeve rolled up, hammerin' en nailin', en nailin' en hammerin'!

"'Br'er Fox 'low, 'What you doin' dar, Br'er Rabbit?'

"'Br'er Rabbit say, 'Des makin' a boat, Br'er Fox.'

"'Br'er Fox 'low, 'What you want wid a boat, Br'er Rabbit?'

"'Br'er Rabbit say, 'Ter go ter my fish traps in.'

"'Br'er Fox look 'roun' en see planks en scantlin's lyin' 'roun' en he make up his min' dat he ain't gwine ter all dat trouble des for de sake er one little boat. So he set on de bank an' fight san'flies en skeeters, en watch Br'er Rabbit make his boat. En he ain't had ter wait long nudder, kase Br'er Rabbit, dough he was light in de body, wuz mighty handy en he got his boat ready in a little or no time. Den he got in it en paddle up de river, en 'twant long 'fo' he come back wid a long string er fish.

"'Dis make Bre'r Fox dribble at de mouf, kaze ef dey's any kinder vittles what he like mo' dan any tudder kind its fresh fish. So he make up his min' dat he bleedz ter have a boat. Den he ax Br'er Rabbit ef a mud boat won't do des es good ez any yuther kin,' en Br'er Rabbit make answer dat while mud boats might suit some folks oey don't suit him.

"'Br'er Fox ain't got de knack er makin' plank boats, en so he say ter hisse'f dat he gwine ter show Br'er Rabbit dat some folks know a thing or two ez well ez yuther folks. Wid dat he went in, he did, en make 'im a boat out'n clay, en when it done got dry in de sun, he shove it in de water en jump in wid his paddle.

"'Br'er Rabbit wuz dar wid his plank boat, ter ter see it well done, en when Br'er Fox start he start, too. Well, suh, hits des like I tell you—Br'er Fox ain't hit many licks wid his paddle 'fo' de mud 'gun ter melt. De boat went down and dar wuz ole Br'er Fox scuffling in de water. After so long a time he got back ter de bank, but I let you know he ain't make no mo' boats, needer mud boats ner plank boats."—*Joel Chandler Harris.*

### A. C. A. Membership.

THE following gentleman has applied for membership in the A. C. A.: Northern Division—J. R. Kinghorn, Pointe Claire B. C., Montreal.

## CANOE NEWS NOTES.

A good deal of interest is now being taken in the Nautilus canoe-yawl now being built in Turk's yark, Kingston, for Mr. W. Baden Powell. She is 20ft. long and a little over 4ft. 6in. beam, but has not been designed to get the most possible out of her length. She is very deep, and we understand that she is intended to carry the whole of her ballast inside. The overhang is upward of 2ft. forward and 1ft. aft, thereby making her but 17ft. l.w.l.; she has the usual canoe bow. We are inclined to think that under the existing definition of the Royal C. C. for yawls she would with her limited canvas stand but a poor chance against a shorter boat, and whether racing on the Thames or not, she is pretty certain to be rather hard of mouth, especially in a bit of a blow. Possibly Mr. Baden Powell intends to race her in the new ¾-rating class on the Thames, if so she may meet with a large share of success, as up to the present we know of but one boat, one at Messrs. Burgoine's, that is being built to race for the class. As a large number of races for this class will in the course of next season be given on the Thames, canoe yawl owners might take due note thereof. We may add that Mr. W. Baden Powell has, we understand, finally decided to give up canoe sailing and to confine himself to the larger class.—*The Model Yachtsman and Canoeist.*

THE Detroit B. C. has elected the following officers, to take office after Jan. 9, 1893: Pres., Wm. C. Jupp; Vice-Pres., F. S. Werneken; Sec'y, George B. Sheehy; Treas., Percy Dwight. Directors: Stanley McGraw, P. N. Jacobson, F. D. Standish, F. C. Baldwin and E. W. Clark. Mr. Jupp is an ardent canoeist, the present owner of the canoe Bat.

On Oct. 3 a canoe race was sailed in connection with the regatta of the Shenandoah Y. C., the times being:

| | Start. | Finish. | Elapsed. | Corrected. |
|---|---|---|---|---|
| Blanche | 2 09 30 | 3 56 20 | 1 46 50 | 1 46 50 |
| Bee | 2 09 45 | 4 02 00 | 1 52 45 | 1 52 45 |
| Tipsy | 2 09 20 | 4 03 20 | 1 53 50 | 1 53 50 |

CHICAGO, Ill., Oct. 11.—An informal W. C. A. love-feast was held at the residence of Mr. C. W. Lee, of this city, Monday evening, Oct. 10, a number of outside members happening to be in town at the same time. Commodore G. M. Munger, of Eureka, Kas., Messrs. N. H. Crawford, O. A. Woodruff and Nat Cook, of Dayton, O., J. Herbert

Ware, of Blue Island, and other aliens met a strong contingent of residents, and an old-time camp fire was held, with refreshments and high jinks. E. H.

This spring was launched from the yard of Kessel, at Devonport, Eng., a little ship, a sort of a cross between a sneakbox and a sharpie, having the spoon bow and dagger centerplate of the former and the angular bilge of the latter. She has proved herself as handy a craft for river work as it would be possible to get, and very cheap. She is called Vision, and rates only at 0.23, being 12ft. on l.w.l. She has just sailed a match, the best of three races, at Exmouth, against the canoe yawl Spruce, 0 41 rating, and they ended in a decisive win for Vision.—*The Model Yachtsman and Canoeist.*

The annual election of the Waltham C. C. on Oct. 10, resulted as follows: Pres., W. V. Hyde; Vice Pres., J. H. Stuckney; Treas., W. M. Lucas; Sec., Arthur Randlee; Fin. Sec., O. R. Kice; C. C. Brown and P. Pendlebury with the above officers constitute the Board of Directors. Thirty applications for membership were received.

## THE REVOLVER CHAMPIONSHIP.

### Champion Jantzer Retains Possession of the Winans Trophy by Defeating President Henry Oehl.

THERE was another match for the possession of the Winans Trophy on Saturday evening last, and champion Jantzer was given a very close call indeed by Pres. Henry Oehl of the New York Pistol Club. It was a very pretty contest indeed at the Pistol Club's St. Marks range, not specially brilliant as to scores, but so close that at its finish not one of the dozen expert marksmen who sat watching the contest from start to finish and saw each target as it came whirling up the range to the referee's tables, could have made more than a guess as to the winner. The result shows that Mr. Oehl has well gauged his ability as against that of Mr. Jantzer when he made a bid for the trophy. As it was, an inspection of the scores shows that while Mr. Jantzer slipped the 5in. disk entirely on six shots of the thirty fired, Mr. Oehl did so only five times, and that in each case only one full string of six counting shots was made, and this, too, the last string, with the smoke lingering in the range and the strain of a long match telling upon their nerves In arms the men were even. Each used a .44 Smith & Wesson with round ball cartridges and reduced powder charge. Sights were the same, but with eyes fifty years old it required all the experience of veteran Oehl to keep pace with the veteran Jantzer. Mr. Jantzer is also an eyeglass wearer but is not bothered by the difficulty of selecting a lense which would not, while defining the sight, send the bullseye into a hazy blur.

It was a good-natured fight from start to finish, and perhaps the good nature prevalent and its manifestations militated somewhat against the character of the record. Certain it is that next to Oehl himself no one regretted his defeat more than did Mr. Jantzer, and when Charley Zettler called out the exact record of each shot as the point of the measurer told it, each stood ready to congratulate his antagonist should the victory fall that way. The very starting shot was enough to disconcert most marksmen. The first Jantzer target came up with the bullet hole center just .22 or a trifle over $\frac{1}{10}$ of an inch from the center of the disk. The first Oehl target came up without a scratch, though the screen showed the bullet a shave outside the 2½in. counting circle. In fact, all the misses were close nippers on the disk, and it would be fair to enter up each and every one of the misses as a 3in. shot, certainly not more. While this may be a good every-day, cross-the-street, man-against-man work with the revolver, it is not the sort of figure which should come into a championship match with its facilities for scoring each shot down to a hundredth part of an inch.

Each shoot for the trophy only confirms us in the belief that the conditions are just about right. It is a man-against-man test. As arms of precision the 6½in. barrel revolver as used leaves nothing to be desired. The ammunition, too, is so uniform and so admirably adapted to the work that there is a mathematical certainty almost in each shot. It is the marksman only whose eye and hand do not work in accord, and this only makes it the more remarkable that such a sport with such perfect appliances is not more popular as an indoor and outdoor sport.

The score of Saturday, Oct. 15, the third in the Winans Trophy series stands as follows:

SEC. E. JANTZER.

| 1st round. | 2d round | 3d roun | 4th round. | 5th round. |
|---|---|---|---|---|
| .22 | .... | 2 50 | .38 | .90 |
| .... | .44 | 2 22 | 1.15 | .55 |
| .... | 1.70 | .... | 2.00 | 1.15 |
| 1.83 | 1.95 | .65 | .... | 1.00 |
| .... | 1.45 | 1 01 | .78 | 2.07 |
| 2.10 | .91 | 2.37 | 1.53 | 1 15 |
| **6.45** | | | **5.84** | **6.82** |

Three best strings **19.11in.**

HENRY OEHL.

| 1st round. | 2d round. | 3 d round. | 4th round. | 5th round. |
|---|---|---|---|---|
| .... | 1.73 | 2.48 | 1.69 | 1.53 |
| 1.80 | 1.75 | .... | .78 | .70 |
| 1.55 | .... | 2.05 | .... | 1.52 |
| .25 | .... | .88 | .53 | .23 |
| 1.40 | 1.40 | 1.93 | .72 | 2.33 |
| 2.12 | .20 | .40 | 1.20 | .97 |
| **7.12** | | | **4.92** | **7.78** |

Three best strings **19.82in.**

A most interested spectator at the match was Wm. E. Petty of the New York Police Force. To him belongs the honor, though his modesty would lead him to at once deny it, of being the one member of the more than 3,000 revolver-armed policemen of New York city, who really knows the weapon, its loading and its use, who can hit what he aims at, and feel that he is going to hit before drawing trigger. In the opening shoot for the trophy, Roundsman Petty shot, but he slipped by the prize list and now he wants another go at the trophy. With the naming of the winner came the following challenge from Mr. Petty:

NEW YORK, Oct. 15, Mr. Geo. E. Jantzer.—I hereby challenge you to shoot for the Walter Winans Amateur Championship Trophy, subject to rules published in FOREST AND STREAM.

WILLIAM E. PETTY, Roundsman, Twenty-first Precinct.

R. MCNEIL, JR., Secretary.

### An Unexpected Reception.

AWAY back in 1883, when Gen. Spencer's Interstate military match was shot at Sea Girt, N. J., a Delaware team was on the ground, and it was there we first made the acquaintance of Lieut.-Col (then Sergeant) Howard Simpson, who was captain of the Delaware team. The genial Colonel and "us" were at that time contributing to the rifle columns of the same journal, and of course this fact formed a bond of good fellowship as usual when newspaper "friends" run foul of one another. Besides this we were both members of opposing teams and this was an additional bond. Since that time we have had the pleasure of meeting several other Wilmington riflemen, among them being J. E. McCafferty, Chas. Heinel and the Newman brothers, whom we met at Creedmoor in 1890, and H. B. Leeds, who took part in the recent Sea Girt meeting. Several urgent invitations had been received to visit the Wilmington Rifle Club and take part in one of its shoots, but first one thing, then another in the way of business engagements have always interfered.

In some way or other, the fact reached Col. Simpson's ears that FOREST AND STREAM would send its representative to the trap shoot of the Wilmington Rod and Gun Club, and he conceived the brilliant plan of corraling said representative and compelling him to pay the long promised visit to the rifle range. Consequently, upon arriving at the trap grounds almost the first person we met was J. E. McCafferty, who informed us that he had been constituted a committee to do the aforesaid "corralling," and that unless we pledged ourselves to take part in an afternoon shoot with the Wilmington Rifle Club the members would be mortally offended.

This of course clinched the argument, and we promised to be on hand on Friday afternoon when the trap hustle would be about at an end. Previous to the coming of Friday, however, we had the pleasure of meeting some of the club members in the person of E. J. Darlington, the well-known expert pistol shot, and H. B. Sporrell, a well-known rifleman. Col. Simpson we met "up to his ears" in business, but still able to "run out and try some raws."

After dinner on Friday we were taken in hand by the genial Colonel, who has done some faithful work in developing rifle practice in Delaware, and escorted to the rifle range, just beyond the Fullman car shops, near Brandywine Creek. Here we met Chas. Heinel, H. B. Sporrell, H. B. Leeds, W. Poole, Dr. Smith and J. E. McCafferty, all of whom were plugging away at the standard targets, 200yds. distant.

The rifle club has a neatly-arranged club house, about 20×25ft., one story in height, provided with loading tables, racks, rests, telescopes, etc. The shooting is all done on the Hinman standard target with an 8in. black, the targets working on the slide side system. The marking is done by the aid of a dial and spotting discs.

After making new acquaintances and renewing several old ones we were persuaded to try our hand with the Schalck .32 of Mr. McCafferty, as clever a shooting rifle as one would wish to handle. There was just about light enough at this time to fill out one string, but as all hands were anxious to shoot we were obliged to follow the lead and shoot a double string. The marking on this range, despite the fact that only one target is used, is equal to anything we have seen, there being no tedious delays of any kind.

We were informed that the regular weekly practice of the club is held on Saturday afternoon and that the gathering on this occasion was purely a complimentary one to the representative of the greatest sporting journal on earth. We duly appreciate the honor and hope to be able to "retaliate" in the near future. The shooting was kept up until the target was indistinguishable, when the party started for the town to discuss their evening repast.

After supper according to agreement we strolled down to the establishment of Col Simpson, where we again met Messrs. McCafferty, Sporell, Darlington, Heinel and Newman and were also introduced to the genial president of the club, Mr. Bell. After a pleasant chat a stroll was suggested, the stroll terminating in the dining room of one of Wilmington's famous hostelries, where we were compelled to undergo the delights and agonies of once more being banqueted, this time on oysters served in about every style known to science. We tried to do our duty with the bivalves but must acknowledge that after "Bilderbach's" banquet on Thursday night and three big meals at Willis's on Friday we were rather handicapped on Friday night. However, the evening was passed in a very pleasant manner, and when train time came and we were obliged to say good night, it was with sincere regret at having to cut short our visit, and at having to leave behind us the genial boys of the Wilmington Rifle Club.

The scores made during the afternoon shoot are here given in detail:

| | | | | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|
| J E McCafferty | 10 | 6 | 7 | 8 | 6 | 10 | 8 | 9 | 10 | 7—81 |
| | 9 | 10 | 5 | 8 | 8 | 10 | 7 | 6 | 6 | 8—77 |
| C H Townsend | 7 | 6 | 6 | 9 | 8 | 8 | 10 | 7 | 10 | 9—80 |
| | 4 | 8 | 6 | 7 | 5 | 8 | 8 | 7 | 6 | 8—67 |
| H B Sporrell | 7 | 6 | 7 | 9 | 8 | 9 | 9 | 10 | 9 | 5—79 |
| | 9 | 6 | 6 | 8 | 8 | 8 | 8 | 7 | 9 | 9—76 |
| E Heinel | 7 | 7 | 8 | 9 | 9 | 9 | 6 | 7 | 9 | 8—76 |
| | 4 | 8 | 5 | 10 | 7 | 2 | 4 | 9 | 7 | 8—64 |
| H B Leeds | 9 | 7 | 7 | 4 | 5 | 6 | 7 | 7 | 6 | 10—68 |
| | 4 | 7 | 8 | 10 | 7 | 7 | 4 | 10 | 6 | 4—67 |
| W Poole | 5 | 7 | 7 | 8 | 6 | 5 | 5 | 7 | 6 | 8—64 |
| | 6 | 7 | 10 | 5 | 4 | 5 | 6 | 4 | 7 | 8—62 |
| Dr Smith | 2 | 4 | 7 | 4 | 10 | 9 | 6 | 5 | 3 | 5—55 |

C. H. TOWNSEND.

### St. Louis Sharpshooters.

THE three days' tournament given by the St. Louis sharpshooters, at Creve Coeur Lake, which closed Oct. 2, will long be remembered as one of pleasantest festivals ever held at the lake. The officers and members of the club had spared no pains to make the affair a success, and the result proved how thoroughly they had done their work. The donated prizes were many and valuable, and no one failed to get a prize. All of the local clubs were well represented, Dom Wiget, of the South St. Louis Club, winning first prize on the ring target, with a score of 69. Mr. R. McBean left Chicago Saturday night dreaming of "red flags," but an unfortunate accident on the road delayed the train six hours, and when he arrived the shooting was all over, the tournament closing at 1 o'clock Sunday. Mack is too good natured to let a little thing like that worry him, so he stayed over to see the boys and girls, leaving for Chicago Monday night.

NAMROD.

### South London Rifle Club's Revolver Championship for 1892.

ON Sept. 29, the weekly shooting day of the South London Rifle Club, at Staines, it was very windy and wet; in fact the weather seems to have broken up and no more good revolver scores are likely to be made during the remaining four weeks the club shoots. None of the leaders shot but some of those low down in the list improved their scores a point or two.

Mr. Walter Winans has now practically won the championship, but the silver and bronze medals for the next two highest scores are not yet so certain for Mr. Andrews and Maj. McMerrell, as several others are running them close. Mr. Varley, a new member, is averaging scores of 37 and 36 and may yet give them trouble. Below are the scores for the revolver championship to date:

| | | | | | | | | | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| W Winans | 42 | 41 | 41 | 41 | 40 | —205 | F E Varley | .. | .. | 37 | 36 | .. | .. | .. | —73 |
| H Andrews | 39 | 38 | 38 | 28 | 37 | —120 | E W Keen | .. | .. | 38 | 23 | .. | .. | .. | —61 |
| R MacMerrell | 41 | 37 | 36 | 36 | 37 | —186 | D Hunt | .. | .. | 32 | 26 | .. | .. | .. | —58 |
| C F Lowe | .. | 36 | 36 | 36 | 36 | 36—180 | A W Carter | .. | .. | 27 | 23 | .. | .. | .. | —50 |
| T W Heath | .. | 37 | 35 | 33 | 33 | 31—169 | E Howe | .. | .. | 35 | .. | .. | .. | .. | —35 |

# Trap Shooting.

All ties divided unless otherwise reported.

## FIXTURES.

**If you want your shoot to be announced here send in notice like the following:**

Oct. 21.—New Jersey Shooting Club tournament, at Claremont, N. J.

Oct. 21.—Philmont (N. Y.) Gun Club tournament.

Oct. 21.—Riverview Gun Club tournament, at Amsterdam, N.Y.

Oct. 24-25.—Charter Oak Gun Club tournament, at Charter Oak, Iowa.

Oct. 25-26.—Interstate Manufacturers' and Dealers' tournament, at Moodus, Conn.

Oct. 25-26.—Orlando (Fla.) Gun Club tournament.

Oct. 26-28.—Omaha (Neb.) tournament.

Oct. 27.—Reading (Pa.) Shooting Association, sparrow tournament, at Black Bear Inn.

Oct. 27.—Maplewood (N. J.) Gun Club open tournament, combined with tenth team contest of N. J. Trap-Shooters' League.

Oct. 27-28.—West Newburgh Gun and Rifle Association tournament, Newburgh, N. Y.

Oct. 27-29.—Fulton Gun Club tournament, at Atlanta, Ga.

Nov. 23-26.—Milwaukee (Wis.) tournament, targets and live birds.

May 23-25, 1893.—Knoxville Gun Club tournament, $1,000 added to purses. Also valuable merchandise prizes.

Nov. 24.—John A. Hartner's sixth annual tournament, Bishop's Driving Park, Baltimore, Md.

## DRIVERS AND TWISTERS.

A big shoot will be held at Newburgh, N. Y. on October 27-28 by the newly organized West Newburg Rifle and Gun Association. Both live birds and Keystone targets will be used On the first day the program will comprise four 10-target events, two at 15 each, two at 20 each, one event at 5 live birds and a team race for 3-men club teams at 15 targets per man. Second day.—Five events at 10 targets each; two at 15 targets each; three at 20 targets each and one event at 10 live birds.

The members of the Spring Hill Gun Club held their monthly diamond medal shoot at Blauvelt ville, N. J., on Oct. 12, each member shooting at 50 bluerock targets, fine traps, unknown angles. The medal won by J. H. Richmond with the fine total of 47 breaks; F. G. Moore broke 40; J. M. Baker 39; D. Kittle 37 and M. Hammond 36. This was the second shoot for the medal, the first having been won by D. Kittle.

The tenth and final shoot of the New Jersey Trap Shooter's League will be held on the handsome and well-appointed grounds of the Maplewood Gun Club on October 27. The Maplewood club will also hold an all day tournament in connection with the above.

Philmont, N. Y. will be the scene of a tournament of the Eastern New York League on October 21, when kingbird targets will be used. The program comprises seven 10-target events and two 15-target events.

The Claremont grounds will be the scene of some lively work at live pigeons and artificial targets to-morrow when the New Jersey Shooting Club will hold an all-day tournament.

The Orlando (Fla.) Gun Club has a fine lot of merchandise prizes to be distributed at its shoot on October 25-26.

C. H. TOWNSEND.

### Traps at Watson's Park.

OCT. 6.—Score made here to-day by the Fort Dearborn Club, 15 live pigeons each under new Illinois State rules for club medal:

G Kleinman...112111111121111—15 D H Williams.2210022122002211—11
G Airy.....112110200122121—12

Same club same day, for bluerock medal, 20 bluerocks each: Geo. Kleinman 11, Geo. Airy 9, D. H. Williams 7.

*Oct. 7.*—Chicago Shooting club at 20 live pigeons each for club medal under new Illinois State rules, small sweep added:

Three or four of Pullman Club's best marksmen failed to show up, or the match would have been closer. RAVELRIGG.

### Lynchburg Gun Club.

LYNCHBURG, Va., Oct. 12.—The Lynchburg Gun Club held its last meet of the season yesterday. On and after the 15th the field will engage their entire attention. Below find scores shot:

No. 1, 10 singles: Dornin 9, Nelson 9, Richards 9, Cleland 7, Tom Christian 7.

No. 2, 9 singles and 3 pairs: Dornin 13, Nelson 11, Cleland 10 Tom Christian 9, Terry 9, Smith 9.

No. 3, 5 traps, 30 singles: Dornin 29, Nelton 25, Richares 16, Cleland 24, Tom Christian 21, Terry 13, Smut 13, Stearns 24.

No. 4, 10 singles: Dornin 10, Nelson 9, Cleland 7, Tom Christian 3, Terry 7, Smut 5, Stearns 8. D.

## Chicago and the World's Fair Shoot.

CHICAGO, Ill., Oct. 12.—The executive committee of the Illinois State Sportsmen's Association endeavored to meet at the Sherman House, this city, 4 P. M. Oct. 10; present, Messrs. Organ, Eich and Hough; no quorum. Informal talk followed, and the three on hand discussed the seriousness of the situation in regard to the World's Fair tournament. To them it seemed that all the country was looking to five or six men for a successful issue of a great undertaking, while these men had as yet done nothing, and were not even fully represented at a meeting called for the discussion of plans which are all too tardy. It was resolved that serious thought and serious hustling were eminently in order, and each man present promised to go to work.

Mr. Organ thought that the Illinois State shoot should be made entirely distinct from the World's Fair shoot, and that the latter should be held in October. He thought that by October the could get the magnificent grounds of the Washington Park Driving Club, only twenty minutes from town and splendidly equipped with every convenience. In October also the birds would be better and easier to obtain in numbers. Mr. Organ did not see how the Illinois Association could swing this tournament, but was disposed to think that perhaps a company could be formed to run the shoot, and that this might be the best solution of the difficulty. He was sure the two State events alone of the Illinois shoot would take nearly two weeks. A big open shoot after that to last 60 to 90 days, perhaps, would be more of a task than the Association officers could handle. He did not insist on the October date but preferred it.

Mr. Eich thought that the State shoot could all be run off in one week, but was confident that either a June or October date would bring out many shooters. It seemed to him also that a stock company would be almost a necessity. While Watson's Park, as now laid out, was entirely inadequate to a shoot the size of that to be expected, a company might for the season secure grounds adjoining on the south, and so extend the grounds that three or four sets of live bird traps and perhaps twice as many target scores could be run at once. If the October date was not concluded upon, the State shoot might be held in June, as usual, and the open shoot at the close of the State events could be handed directly over to the company management.

It was agreed that at least $50,000 should be hung up by the management, a sum larger than was ever shot for in open tournament and sufficient to make the tournament really a world's event. It was also to be considered as a fact not to be disputed that arrangements should be set on foot at once to make the proper supply of pigeons a certainty.

Matters being so uncertain, president Organ arranged for a meeting of the committee on call of the secretary next week, at which time the secretary will also issue invitations to interested sportsmen of Chicago to meet the committee in open council. At this meeting it is thought the plan of action will definitely shape itself. The committee should all be present. Mr. Donald, of the committee, was out of town this week and sent reasons for absence. Mr. Edbrooke and Mr. Nicholls were also absent.

Thus it may be seen that the question of the World's Fair shoot is still unsettled, and is field for surmise. Let us suppose that a company management be formed to conduct this shoot. This company could send a live man East, who should come back with $10,000 added money from the heavy manufacturing concerns. To this the company itself should add cash according to its capital. Let us suppose that the live bird shoots would take the form of the English "star sweepstakes"—a miss-and-out with the privilege of re-entry, say, two or three times, with a time limit for such re-entry. With an entrance fee of $25, $15, or even $10, each man would be apt to want at least one more life in the shoot, to cure the accident of his miss. Let us say that we have an entry of 200 (we have had an entry of 123 in Illinois State shoot alone). It may easily be seen that the money in the purse would be very heavy, far heavier than was ever seen in America. With the profits of the shoot, and with the added money offered by concerns which had always been liberal, and which would now serve themselves by being more than liberal, would it not be possible for the management to offer a programme stating "One thousand dollars added to each and every live bird purse. One hundred dollars added to each target purse?" Assure the money, and you couldn't keep the shooters away. Granted a decent showing of American shooters alone, and not counting on the many who will probably come from Europe; the management would have its money handed back to it with rapid interest. There is money in running a shoot, and big money in a big shoot like this, where the rates for entry and for birds should be graded distinctly higher than usual. The only mistake a management could make would be in getting scared, and trying to run this big shoot on any picayunish basis. If the proper Chicago men take hold of it, there is no danger of this latter. At any rate, here is a plan, and something to criticise and improve upon.

With the October date I could not personally at this writing agree or disagree, although at first thought it seems to me that the widely-understood June date of the Illinois shoot, inseparably fixed as it has now become with the World's Fair shoot in the public mind, would constitute just that much advertising already accomplished for the shoot, whereas another date would have to overcome all this advertising of the old date, besides establishing its own. Yet another very serious reason against October, and one a company should certainly consider, is that an October date would mean possible rough weather and certainly not more than a thirty days shoot, while June would offer good weather and a tournament perhaps all summer long—naturally more profitable. The June attendance would also, probably, be heavier, as October claims many for the field or for soberer work.

With the plea that the date of October should be chosen in order to gain more time for securing birds we should have no patience whatever. If it comes to putting things off, we might as well say a year from October. If Chicago could erect all these great buildings, and in short create the Fair in two years, Chicago can buy a few thousand pigeons in six months. The birds can be obtained for June as well as for October, but they never will be obtained by sitting down and waiting for them, or by putting off the proper work until the last moment. On the question of these birds, and on the question of this great World's Fair shoot, Chicago ought to go to work at once, and keep on at it, hard, quick and plenty.

*Oct. 13.*—The big house of Montgomery Ward & Co. seems disposed to get hold of all the good men possible for its gun department. I was up there to-day and saw Rolla Heikes with his coat off, loading shells in the hand-loading department, next to Eddie Bingham, and was surprised to learn that he had gone in with the house permanently. Shooters over the country may well believe there is luck in a shell touched by Rolla Heikes. With Horace Greely Holt, Bingham, Skinner, Moran, Grubbs, Drake, etc., all in the gun department, it would seem that the firm was safe for a while.

Mr. Oswald von Lengerke this week encountered what in these days of trap-shooting is generally called a "snap." He dropped into a nice little country shoot at Fulton, Ill., and was fortunate enough not to meet more than one or two of the "rounders." Result, some cash.

Once there was a tournament at Peoria, and all the separate and individual rounders of the tournament gang took the notion, each in his own head, that Peoria would be a good place to find some "easy money." It is said that ten of the best experts in the country had this same idea, and started for Peoria without saying a word to anybody else. When they all met at Peoria there was a sickly sort of smile all around, and what seemed a fair system of division had to be arranged. That was very disappointing, very. I have always felt sorry about it ever since.

J. A. R. Elliott, of Kansas City, has challenged E. D. Fulford to shoot five matches, $500 a side each, at different cities. Fulford is said to have accepted.

SAD DAYS.

*Oct. 14.*—The melancholy days have come. The challenging has begun.

Mr. E. D. Fulford announces that next week he will spring a surprise, indeed a sensation, upon the American public, which will divert attention from the cholera prospect, the World's Fair and the political campaign. He will challenge Mr. J. A. R. Elliott to shoot him five matches, 100 birds, $200 a match, one each in Kansas City, Pittsburgh, Harrisburg, New York and Chicago, winner of the series to be proclaimed champion of the world!

This is a good thing. But has Mr. Fulford reflected how bad Jack Brewer and Dr. Carver and Charlie Budd and Martinez Chick, and Lewis Clark, of Australia, and Walter Blake, of England, and Journeau, of France and others whom he names as possible contestants, will feel about this? Is there not danger of their calling him real mean? And—oh, yes; I knew there was something I was trying to think of—will the band please play some ancient and soothing Scotch melody?

Jack Winston, oh! Jack, come up here, Jack. You maybe can't get a race for the championship of the world, but you can have a lot of fun. Come up here, Jack; we want you.

There will be sweepstakes shooting at Watson's Park, Burnside, at live birds and at targets Friday and Saturday, Oct. 21 and 22, commencing at 1 P. M. each day. E. HOUGH.

175 MONROE STREET, Chicago.

## An American Handicap.

NEW LONDON, Conn., Oct. 17.—*Editor Forest and Stream:* The next shoot of the Interstate Association will be held at Modus, Conn., on Oct. 25 and 26. This will be the last Interstate shoot of the season at targets. The association has been a grand success this year, and has certainly done a great deal of good in the way of increasing an interest in trap shooting and in increasing the demand for goods made by the different manufacturers of guns, ammunition, etc. It is also very evident that a great many manufacturers have reaped the benefit of the association that are not members, and we hope to see their names on the list next season.

We shall give a grand live-bird shoot the second week in January in New Jersey, as near New York city as possible. The shoot will open on Tuesday, Jan. 10, and we shall endeavor to make it the grandest tournament ever given in this country. I am at present corresponding with different ones in regard to furnishing first-class country birds, and shall employ the best of experts to handle same. We shall, during that tournament, give a 25-bird event, $50 entrance, with at least $100 added, which we shall make the event of the year, and we shall give this shoot annually. There will be a book opened at said tournament, which will be kept from season to season, and entries will be taken for this event until the 1st of October of each year. The entrance for the second season will probably be $100, and we shall endeavor to have from $500 to $1,000 added. This event will be shot Monaco boundary. The best improved traps will be used, and everything pertaining to the tournament will be first-class. There are so many world beaters or rather champions of the world in our country that this event will give them an opportunity to ascertain who the champion is, and will also enlighten the public on the subject. It has not yet been decided on what grounds this tournament will be held, but it will be by the middle of November. As it may take two or three days to finish this event we will not state just how long the shoot will be open, but it will be kept open until this event is shot down to one man.

Tuesday will be devoted to sweepstake shooting, with good fair entrances at first-class birds, and it is probable that sweepstake as well as the other event will be shot under Monaco boundary. We shall arrange programme for same and mail them to all shooters by Nov. 15. Entries for the main event (which will be for the championship of America and will be known as the Grand American Handicap) will be received on and after the first day of November. All shooters will be handicapped for this event as they arrive upon the grounds; 30yds. will be the limit, and such men as Brewer, Fulford, Elliott, Budd and all in that class will be compelled to shoot at the 30yds. mark. I have a very complete list of live bird shots of America and have been watching their scores very carefully and have my handicap made for a great many that I think will enter in this contest, that they will be compelled to shoot from. There will be no favorites played and nobody barred, and this shoot will be conducted under the strictest rules. We will not vary from the rules one iota. Everybody will be compelled to live up to the rules, which will be modified Huntingham rules with Monaco boundary. Any combinations formed or any one shooting to favor another or trying to place himself, will, if detected, forfeit his or their interest in the purse. We shall endeavor to make this the live bird event of the year, from year to year, and ask that all the manufacturers and shooters of America assist us with the same and in the course of a few years we will be able to have as much added money in this live bird event as they have in any country, and it will be worth struggling for by any American or foreign sportsman. H. A. PENROSE.

## Syracuse Rifle Club.

SYRACUSE, N. Y., Oct. 12.—The shoot of the newly organized Syracuse Rifle Club, held here yesterday and to-day, was not the success that was expected so far as the attendance was concerned, although those who did attend had a jolly time. The club has a splendid club house on Croton street, which, with the ground equipments, represent an expenditure of over $1,000. The officers of the club are: Harvey McMurchy, President; W. A. Holden, First Vice-President; H. M. Chase, Second Vice-President; A. C. Ginty, Secretary; C. L. Becker, Treasurer. Executive Committee, W. E. Hookway, H. M. Chase, Douglas Pettit, W. A. Holden, A. E. Spangler. Field Committee: M. C. Smith, A. E. Spangler, H. W. Duguid, H. R. Becker, W. E. Hookway.

Below are yesterday's scores:

Event No. 1, 10 birds: Tuttle 8, Brigden 8, Carr 9, Whyte 7, Ginty 5, Duguid 5, Mann 6, Luther 10, Vanderloo 5.

No. 2, 15 birds:

| | | | |
|---|---|---|---|
| Ginty | 011001101111111—11 | Mann | 101011101111111—12 |

Matches, Holloway vs. Mann, 20 singles each for $2 a side each match: First, Mann 20, Holloway 6; second, Mann 16, Holloway 20; third, Mann 20 Holloway 1; fourth, Mann 20, Holloway 0.

Mosher vs. Mowry, 25 singles each, $5 a side. First match, Mosher 6, Mowry 25; second match, Mosher 4, Mowry 25.

## Shooting at Amsterdam.

AMSTERDAM N. Y., Oct. 15.—The following scores were made by members of the Riverview Gun Club at their last practice:

Shoot No. 1, 15 kingbirds: G. V. Hartley 18, J. A. Barkhuff 11, D. S. Pierce 12, R. M. Hartley 15, DeGraff 9, Briggs 12.

No. 2, 10 kingbirds: G.V. Hartley 7, Briggs 9, R. M. Hartley 10, DeGraff 7.

No. 3, 10 kingbirds: G. V. Hartley 9, Appleton 8, DeGraff 9, R. M. Hartley 10.

A beautiful day, but attendance small. DeGraff made his first attempt at inanimate targets to-day. R. M. HARTLEY.

## Hamilton Gun Club.

HAMILTON, Oct. 10.—The final winning of A and B medals today was one of the most exciting contests ever witnessed on the grounds of the Hamilton Gun Club. Although these medals have been contested for monthly since last March, strange to say Wilson and Parker each won for the fourth time and closed the competition. Clifford and Parker tied on 20 for the Hamilton Powder Co.'s medal, and owing to the lateness of the hour postponed shooting off until next month. Mr. Strand still holds the challenge medal against all comers. Kaiser will enter the field next time. The following distinguished visitors were present and seemed to enjoy themselves, as only true sportsmen can: Col. Anworthy; Wm. Gibson, M. P. for Lincoln; Mr. John Eastwood; Thomas Hood, of the Royal Hotel; Mr. Hopkins, of St. Louis, Mo.; and W. S. Cowee, Wells, Fargo & Co., 63 Broadway, N. Y. The two last named gentlemen were so pleased with our entertainment that each very kindly offered to donate a handsome trophy for future competition. On behalf of the members of our club, I wish publicly to thank these two gentlemen for their extreme kindness and keen appreciation of sport before the traps.

Club medals, A and B, 25 singles, rapid firing:

| Stroud | 1010100000—3 | |

Challenge medal, 15 singles and 5 pairs: Stroud 16, Crooks 14.

## Garfield Scores.

CHICAGO, Oct. 15.—Below please find the scores made to-day by the Garfield Gun Club at their usual live bird shoot which follows a week preceding the close of the competition for target medals. This is an event eagerly looked forward to by all the members, as it is a fixture in our calendar, and more especially as the contest for a diamond medal for live bird shooting will commence next month and this event was by some taken as a criterion of the shooters' abilities shooting the Illinois State rules, which will govern the contest. The day and weather were perfect, as well as the shooters' spirits, and a thoroughly enjoyable time was had. Six hundred birds were provided and nearly all were used when darkness put a stop to the sport. Some straight scores were made and the birds were splendid in quality and but little need was had of scare ropes. Below are the scores for the three events, Illinois State rules, 35yds. rise for 10 and 12-gauge guns and five ground traps:

No. 1, 10 live pigeons: Paterson 10, Hicks 6, "Cop" 7, Couper 9, Epeman 9, S. Palmer 9, Brown 8, Ackerman 6, O'Brien 10, Tefft 8, Lauterback 7, Drake 6, W. Palmer 5.

No. 2, 10 live pigeons: Paterson 8, Hicks 7, "Cop" 7, Couper 9, Epeman 8, S. Palmer 10, Brown 9, Ackerman 6, O'Brien 8, Tefft 8, Lauterback 7, Drake 5, W. Palmer 10, Bowers 9, O'Neil 9, Ruble 8, Baird 2, Pitz 3.

No. 3, 10 live pigeons: Paterson 8, Lamphier 9, Hicks 7, "Cop" 9, Cruer 6, Epeman 10, S. Palmer 9, Brown 8, Dr. Meek 8, Ackerman 6, O'Brien 9, Tefft 8, Lauterbach 6, Drake 4, W. Palmer 6, Bowers 9, O'Neil 7, Ruble 10, Baird 7, Ruble 10, Baird 7, Pitz 7, Campbell 4, Young 7, Richards 10, Flemming 7, Snow 7.

G. H. B.

## Limited—Southport.

INDIANAPOLIS, Ind., Oct. 14.—Score of the second match between the Southport (Ind.) Gun Club and the Limited Gun Club. The visiting team was nicely entertained on the College avenue club grounds, the Limited Gun Club having prepared a neat spread for the Southport boys:

M. T. SHELL.

## The New Utrecht Rod and Gun Club

HELD its regular weekly shoot at Woodlawn Park, Gravesend, L. I., on Saturday. The contest was for the gold and silver medals awarded to the first and second best scores in the target class. Each man shot at 20 targets, 18yds. rise. P. Adams won the gold medal and D. Deacon the silver one. The sweepstake shoots at live birds were shot off under Long Island rules, second barrel allowed only a half bird. The scores:

Club shoot: D. Deacon 13, D. C. Bennett 12, P. Adams 16, E. Rauch 7, G. W. Cropsey 10, C. A. Sykes 12.

Sweepstake shoots, No. 1: R. R. Street 5, G. W. Cropsey 5, W. F. Sykes 5, P. Adams 4, D. C. Bennett 4.

No. 2: R. R. Street 4, G. W. Cropsey 4, W. F. Sykes 4, P. Adams 4, D. C. Bennett 4, A. A. Hegeman 3.

No. 3, 10 targets: R. R. Street 4, G. W. Cropsey 7, W. F. Sykes 3, D. O. Bennett 8, A. A. Hegeman 8, D. Deacon 9.

## Dexter Park Sweepstake Shoot.

A BIG sweepstake shoot had been arranged to take place at Dexter Park, on Monday, Oct. 17, at 100 targets, 18yds. rise, $3 entrance. Only 11 entered but a good race took place for first money between L. Schortemeier of the Emeralds and R. Phister, Jr., of the Glenmores. Schortemeier won first with 91, Phister second with 90, Chris Meyer, M. C. Manning and T. Short tied for third with 70 each and divided. The scores:

| | | | |
|---|---|---|---|
| L Henry | 91 | R Phister, Jr. | 90 |
| M C Manning | 70 | T Short | 70 |
| H Knebel, Jr. | 48 | C Stuetzle | 58 |
| Chris Meyer | 70 | W Hartye | 62 |
| C Dethloff | 61 | | |
| C Winchester | 68 | | |
| Dr Little | 59 | | |

## Oneida County Sportsmen's Association.

UTICA, N. Y., Oct. 17—The following scores were made at the shoot of the Oneida County Sportsmen's Association to-day at 25 kingbird targets per man, the weather being favorable: Hunter 22, Kallies 17, Hines 22, Dexter 20, Mayhew 24, Lone 19, Mizner 18, Wheeler 21.

## A Great Shoot at Wilmington.

STANDARDS WIN THE TEAM RACE.

WILMINGTON, Del., is a town of about 65,000 population (this including Charles Fehrenbach).

It is a port of entry, as proven by the condition of Harry Hartlove during the recent trap shoot.

Situated on the north bank of Christiana Creek near its entrance into the Delaware River, and is not likely to be moved, despite the protests of C. C. Mahoney, who declares that Wilmingtonians have no use for water.

The city and vicinity are remarkable for the number, magnitude and value of its manufactories, comprising cotton and woolen cloth mills, flour mills, sawmills, powder and paper mills, locomotive and car shops, shipyards, and most important of all a large building known as the "Bilderbach Manufactury of German influence" and the "James K. Woodward Distillery of high-grade poetry."

The city has also Willis's Hotel, J. A. Currey, Sam Ocheltree, "Jersey" McCray, J. E. McCafferty, E. J. Darlington, Howard Simpson, the water works, and many other natural and artificial attractions, all of which are well worth a visit. Reserved seat tickets may be procured at the Willis Hotel.

One of the greatest curiosities in the town (if not in the State) is known as the Wilmington Rod and Gun Club, an organization formed for the purpose of "bamboozling" sportsmen from various parts of the country and incidentally to practice trap-shooting. As the club has never been interfered with by the law-abiding citizens of the town we presume that its members carry themselves "straight" when in public.

Every once in a while (sometimes oftener) this club concludes business needs stimulating and it appoints a committee to concoct some scheme whereby unsophisticated amateur shooters may be persuaded to visit the town and expend their hard-earned shekels for entry fees in what are known as "artificial target events."

Artificial targets by the way are not "saucers," as is supposed by the uninitiated, but are a diabolical contrivance manufactured from clay and pitch or something else, and are flipped through the air by a spring contrivance, which can be seen on application at any sporting goods house. (This is not an advertisement.)

Some weeks ago the club appointed one of the above hinted-at committees to arrange for what was called the "open tournament of the Wilmington Rod and Gun Club." In order to give the affair a business aspect and assist in beguiling the unwary, the committee was comprised of a five-feet-four chap called A. H. Stout, who posed as chairman; W. Harry "Hire-a-hall," J. R. Marr, "Jersey" DeCray and Delaware's pet poet Jimmy Woodward, the latter being invested with the title of secretary. The committee after a deal of thinking (and ringing the table bell) decided that Oct. 12, 13 and 14 would be good days upon which to coax the "dust" from the pockets of the innocent shooters from New York, New Jersey, Pennsylvania, Maryland and other small places. Consequently they got printed a lot of programmes, which were hurriedly sent off to the aforesaid shooters, and a number were also sent to the confiding editors of the sporting journals, who as usual assisted the club in gaining victims.

As the result of all this stupendous expenditure of brain-work, Willis Hotel, on Market street, reaped a sort of a harvest for a few days, beginning with breakfast on Oct. 12. On the morning of that day a party numbering a couple of dozen meek looking individuals might have been seen leaving Willis, and soon after they were on board of an electric car en route to the corner of Union and Front streets, where the club was alleged to have a club house and grounds, with sundry traps, targets and other paraphernalia, all of which combined was to be used to amuse the Wilmingtonians and incidentally gather in the shekels.

Sure enough upon arrival at the stated place everything was found in accordance with promise. The club house was there and a very neat structure it was, not elaborate to be sure, but convenient and cozy withal. The building is one story in height, almost 25ft. long and 15ft. wide, divided into an office and a gun room. In the office was found the Delaware poet, James E. Woodward who was busy arranging carbon between sheets of manifold score paper, this being done with the intent to save trouble to the newspaper men and prevent them from mentioning the short-comings of the club and its members. Another inmate of the "box" was that handsome blonde, C. C. Mahoney, whose duty it was to gather in the cash as rapidly as possible and to turn it over to the safe care of Poet Woodward. W. Harry "Hire-a-hall" was also within the inclosure busily engazed in engrossing on envelopes such legends as "W. H. Wolstencroft, event No. 2, $1; one-seventh of third money, 34 cents.

To the right of the club house was a marquee under the canvas of which were dispensed divers kinds of drinks, cigars, sandwiches and oysters in all styles, and we must acknowledge all of splendid quality, although in some of the stews they rather lacked quantity. Out in front were two sets of bluerock traps, each set comprising five traps. Bluerock targets were also there to the extent of a carload.

The grounds of the Wilmington Rod and Gun Club are situated in a large field several hundred yards back from Union street, a well paved and well traveled thoroughfare. The club house is built just on the edge of a heavy and extensive woods, which extends for a couple of hundred yards to the right and several thousand yards to the left of the house, and out to Union street. A splendid shade is afforded for shooters and spectators.

The attendance of this, the opening day, was good, much better, in fact, than at the average tournament of the present day. Among those who had taken their lives in their hands to visit the place may be mentioned such average shooters as Wm. H. Wolstencroft, the Pennsylvania champion who hails from Frankford; Charles Smith, the great, only and inimitable "Dutchy" from Plainfield, who sported on his manly breast the badge awarded him in Cleveland, Ohio, in 1888, when he won the title of the "Champion Sauer Kraut Eater;" Thomas H. Keller also from Plainfield; Wm. R. Fieles, the smooth-faced, quiet-mannered young boy from Christiana, Pa., who usually purchases from one to half a dozen canines before breakfast each morning; W. Fred Quimby, he from New York who has the happy faculty of making miserable the life of a referee during a tournament and without whom a shooting ground or hotel would be bleak and dismal. Then there was that prince of good fellows who abides in the Pennsylvania Dutch town of Reading, and is known as Harry Matz, president of the Reading Shooting Association; Wm. "Green" Garvin, one of Germantown's lively experts; Will "Hope," who traveled all the way from Newark to see the fun and hit a few targets; Harry "Rainbow, Father Time" Thurman, with whiskers and all, from Germantown; E. L. David, "Landis" from Philadelphia; "Little" Neaf Apgar, the ever popular and welcome boy from Plainfield; Billy Clark, proprietor of the Wapsononock Shooting Grounds in Altoona, who is to shoot a live bird match with Annie Oakley as sure as that popular little lady gets back to her native heath; W. E. Tredway, another Philadelphia light; Schmeck and Swicher, from Octoraro, Pa., and Evans from Baltimore.

The weather was simply perfection, the sun shining warmly from an almost cloudless sky and the wind coming in gentle zephyrs over the tops of the trees. Everybody was in a holiday humor and the jokes were kept flying about as rapidly as the targets. "Tee Kay," "Dutchy," Quimby, "Bilderbach" and "Hire-a-hall" were prime movers in the fun of the day and would give and take with unruffled tempers.

The shooting was first-class from start to finish, the foreground, which was perfectly clear, giving the targets but little chance to get away from the guns of the experts who were on hand. The local men turned out well and a number of them shot through all the events.

The management throughout the day was superb, both as regards the work in the office, the pulling and scoring, and the busting out of the squads. The scoring was done by "Jersey," who proved himself an adept at the business. As soon as one squad had completed its score another squad was found in position ready to begin firing, thus doing away with the tedious delays sometime causing such exasperation to the shooters. In the office every detail was attended to in a systematic manner, and many commendations were heard in regard to the expediency with which purses were figured and the moneys paid out. The shooting was closed about 5 P. M., nearly 3,500 targets having been thrown.

In the evening visiting sportsmen were taken in hand by local club men and escorted to various places of interest, among other interesting places being that of Charles Fehrenbach, where was held a levee that did not terminate until near midnight. Soon after this the boys repaired to their respective domiciles to recruit their strength for the following day's work.

Below will be found the result of the day's work, the events in order being as follows: Nos. 1 and 2, 10 singles, $1 entry; Nos. 6 and 8 10 singles, $1.50 entry; No. 7, 20 singles, $2 entry; Nos. 3, 4, 5, 9, 10, 11 and 12, 15 singles $1.50 entry. There were four moneys in each event:

No. 4: Landis 9, Keller 8, Clark 8, Green 8, Apgar 10, Fieles 10, Smeck 10, Thurman 9, Tredway 10, Hartlove 9, W. H. W. 9.

*Thursday, the Second Day.*

was ushered in with a misty atmosphere and a cool, raw wind which bade fair to bring rain. Later on the air cleared, and shortly after noon the sun came out in all its glory. Everybody was astir at an early hour, and over the breakfast table many speculations were indulged in as to the probable number of teams that would enter the big race, and the score that was likely to win it. The majority placed the number of teams at six, and the winning score at about 137 to 140. Some of the boys made up a fair-sized pool in which the New Jersey team were the favorites. Quimby, with his usual far-seeing judgment, bought the field against Jersey, and good-naturedly took "Rainbow" Thurman as a partner in his wager.

It was but a few minutes after 9 A. M. when the party reported at the shooting grounds, and from that time until afternoon the crowd kept increasing until it was up to the high water mark of any tournament held this season. The premier attraction, as a matter of course, was the team match, for which the local club had "sung up" a purse of $75. And to the offering of this purse a history attacheth itself. Some time ago "we" conceived an idea. This of course is something unusual in our line of business, as ideas in a newspaper office are about as scarce as are brains in the head of a politician. However, we plead guilty, and that our idea in substance was that the offering of a purse for State teams with no entry fee would tend to attract a big crowd of shooters, and that the money spent by the shooters in open events would more than balance the amount of the purse. Our suggestion was for teams of 10 men each from any State, with a purse of $100. We also suggested that a good time for such a contest would be during the tournament of the Wilmington Rod and Gun Club, then announced for Oct. 12 and 13. As is usual with all brilliant suggestions, we expected this one to be forgotten as soon as read.

We were therefore very agreeably surprised upon receiving notice from the poet-secretary of the Wilmington club that our suggestion, with some modifications, had been adopted by that body, which had decided to prolong its tournament so as to include Oct. 14 and that the second day, Oct. 13, would be "Team Shoot Day." The club very materially improved upon our suggestion, throwing the race open to teams of six men each from any club in any State or any State team of six men and making the purse $75. Hence it was that we had a sort of fatherly interest in this event and were anxious to see it pan out well, which we were satisfied it would do, as were the members of the local club.

From the very sound of the first gun the success of the day was assured, the first event having twenty-eight entries and some of the subsequent events ran up to thirty entries. It must not be supposed that there were only thirty on the grounds, as in the team race alone there were forty-eight, while at least a dozen of those who shot in one or another of the sweeps did not belong to any of the teams so that there were not less than sixty shooters present. Fully 300 spectators came over from the city, these being well cared for by the club boys, who had a big stock of chairs on hand. Among those who came to shoot we must not forget Miss Ray Hunziker, of Gloucester, N. J., who is perhaps better known by her well earned shooting title of "Little Hawkeye." Miss Ray is a petite body with a pair of clear gray eyes and a complexion as bronzed as that of an Indian, this being the result of almost constant exposure to sun and wind while hunting, which with her is almost a passion. As a rifle shot she has very few superiors among her sex, and with the shotgun she makes a good showing at either live or artificial targets. She was accompanied by her father, who is her companion on all her frequent hunting trips.

Among others who had journeyed to Wilmington for the sport were Messrs. Denny, Devall, Buckley and Dr. Lupas, of Baltimore; R. L. Bond, of Jessup's, Md., who with Evans were members of the Standard Gun Club; Cleaver, C. Buckmaster, R. Evans, R. Miller, Lynan and Hock, of the Woodside (Del.) Gun Club; Hothersall, Lane and E. R. David, who with Thurman, Landis and Treadway represented the Philadelphia Shooting Association, all these being in addition to those who were on hand on the previous day. There were also eighteen members of the local club on hand, this being nearly its full shooting strength.

"Tee Kay" and Fritz assisted the local managers in hustling the squads together, with the result that there were no long delays. In the office, hard at work, were the "poet," Charley "Bilderbach," J. A. Curry, a talented and pushing young newspaper man of the town, who does the trap booming for the *Morning News* and at the same time assists the boys at their shoots, and the ever jolly Mahoney.

As on the opening day, everybody had on their Columbus features, and a more jovial, happy-go-lucky crowd than they resolved themselves into would be difficult to find. Even the usually staid and stately Woodward, stolid-faced "Bilderbach" and the sedate "Hire-a-hall" became imbued with the spirit of the occasion, and several times they were seen to "smile," a very unusual occurrence for them.

The great team match, which was the event of absorbing interest, came fully up to the expectations of those interested, there being eight teams on the list. These comprised the Wilmington Rod and Gun Club team No. 1, captain, W. H. Hartlove; Wilmington Rod and Gun Club team No. 2, captain, J. K. Woodward; Wilmington Rod and Gun Club team No 3, captain, J. D. Underwood; Standard Gun Club, of Baltimore, Md., captain, Dr. Lupas; Woodside Gun Club, of Woodside, Del., captain, R. Miller; New Jersey team, captain, T. H. Keller; Philadelphia Shooting Association, captain, H. L. David; All-Pennsylvania team, captain, W. R. Fieles. Each team comprised 6 men and each man shot at 25 bluerock targets, each team comprising a squad. During the progress of this race there were numerous balks occasioned by careless handling of targets by the trappers, this tending to worry the shooters and in some instances probably causing them to score misses. Previous to the start of the race we had asserted that two hours should afford ample time for the eighth teams to complete their scores. This idea was doubted by several, who said it was impossible to shoot eight teams in less than three hours. We persisted in our opinion and were not far from right, as the start was made at 1:43 and the last shot was fired at 3:45 P.M., or just 2h. and 2m. The actual shooting time for the entire 48 men, computed from first to last shot by each team, was 1h. 39m. During this time there were three delays of at least 5m. each for changing carbon sheets in the score book and the balks of the trappers must certainly have consumed not less than 15m. in all. This would leave 1h. 9m. for shooting at 1,200 targets, an average of over 17 targets per minute. Pretty rapid work say you. Even computing on the basis of 2h. 2m. from start to finish of the race, we find that the boys were breaking close to 10 targets per minute.

It was interesting to note the attention bestowed upon the six men who represented New Jersey. They were the fourth team to shoot, and previous to their going to the score the team of the Standard Gun Club had rolled up the magnificent total of 142 breaks, a total excelled only by the Western team during the New London tournament. The Jerseymen were looked upon as record-breaking-world-beaters, simply because they came from Jersey, and the major portion of the visitors firmly expected to see them beat the Standards' score. The bare truth of the matter was that the Jersey team was what might properly be classed as a scrub team, comprising Keller, Lindsley, Quimby, Smith, Sigler and Apgar. Three of Jersey's best team men, Van Dyke, Miller and Post were absent, and had they been on hand they would have supplied the places of Keller, Quimby and Lindsley. This shortage, however, did not affect the faith of the multitude, who stood as if spellbound while the Jersey lads were grinding up their targets and every time a miss was scored by one of them, some one was sure to ejaculate "too bad." Up to the 123d round it looked as though the team might beat the Standards' score, but on the next round a miss was scored. Even then the crowd hoped to see the race a tie, but it was ordained otherwise, and of the last 24 targets they lost six, this giving them a total of 136 breaks. The Philadelphia Shooting Association's team also made a game fight, pulling out with 135 breaks. Previous to the start of the race it had been decided by a unanimous vote of the team captains to divide the purse into two moneys, $50 to first and $25 to second. The race was begun at 1:43 P. M., and at the request of the management, Jacob Pentz, of *Shooting and Fishing*, acted as referee, and C. H. Townsend, trap editor of FOREST AND STREAM as official scorer. Below are the scores of the team race in full with actual time of each team.

### A BANQUET AT THE PRESIDENT'S.

On the evening of Thursday, pursuant to an invitation couched in forcible and not-to-be-overlooked language, a numerous party wended their way from Willis's Hotel to the residence of Charles Fehrenbach, corner of Fourth and French streets, and were soon in possession of the premises. "Bilderbach" himself, president of the Wilmington Rod and Gun Club, was on hand to welcome the guests, and a right royal welcome did he accord them, despite the fact that their noise was loud enough to cause the roof to shake at times. Song and joke followed each other in such rapid succession as to become somewhat jumbled together. Along about 9:30, when there chanced to be a lull in the racket, Mr. Fehrenbach invited the party to follow him into another room, and upon complying they found themselves in a spacious dining-room in which there were two large tables fairly groaning under their weight of good things. It takes considerable to frighten trap-shooters, as a rule, but on this occasion several were really scared at the prospect of having to do justice to a banquet after having only two hours previously arisen from Willis's well-filled board. As usual with creatures of circumstance, however, they decided to make the best of their unhappy lot and try to do justice to the princely hospitality of Herr Fehrenbach and his amiable wife. The party which seated itself about the festive board comprised W. Fred Quimby, of New York; T. H. Keller and Charles Smith, of Plainfield; M. F. Lindsley, of Hoboken; Harry Thurman, of Germantown; J. N. Alsip, of Clayton, Del.; W. G. Clark, of Altoona, Pa.; J. A. Curry, of the Wilmington *Morning News*; J. E. McCafferty, of the Wilmington Rifle Club; Chas. Fehrenbach, J. K. Woodward, C. C. Mahoney, Charles Stuart, Hamilton Ayres, Mr. McConnell, Mark DeCray and Harry Hartlove, of the Wilmington Rod and Gun Club, and Chas. H. Townsend, trap editor of FOREST AND STREAM.

This party was not a hungry one, at least when they sat down, but nevertheless there was a monotonous regularity in the manner in which dishes were kept passing to and fro once the pair of succulent roast pigs were carved. Those pigs! How they did tempt the appetites! And how soon they did decrease in weight! As soon as the substantial portion of the feast had received its share of attention and the coffee and cigars were being discussed, Harry Hartlove took unto himself the position of master of ceremonies and after having in a happy vein expressed his pleasure at once more meeting the boys of Pennsylvania, New York, New Jersey and other States, he paid a glowing tribute to Mr. Fehrenbach and his wife for their open-hearted hospitality in giving them the banquet. He then called upon each member of the party in turn for an "expression" and was not disappointed in a single instance, as each and every man was ready and willing to extoll everybody and everything connected directly or indirectly with the object which had brought them to Wilmington and thus brought them into contact with such princely entertainers. Herr Fehrenbach himself paid a glowing tribute to the pluck which was shown by residents of the various States in venturing so far from home with only a double-barreled gun to protect themselves, and assured them that they would ever be accorded a cordial welcome on Delaware's soil.

Before dispersing a vote of thanks was tendered to Herr and Frau Fehrenbach for the banquet and incidental entertainment.

*Friday, the Final Day.*

As usual when the second day of a tournament presents some specially interesting feature the third day was a very light one. The bulk of the shooters had departed for home on Thursday evening, so that only a corporal's guard remained to answer the roll-call on Friday. The regular programme was not shot, the work resolving itself into a series of impromptu sweepstaks, which were fully as interesting as would have been the regular routine.

The events were as follows:

No. 1, 10 singles, $1 entry: Clark 10, Bilderbach 9, Hope 9, Hartlove 8, Jersey 7, Green 6, Keller 5.

No. 2, same: Clark 8, Hoch 8, Hartlove 8, Bilderbach 7, Hamilton 5, Jersey 3.

No. 3, same: Keller 10, Apgar 9, Hamilton 9, Smith 9, Clark 8, Thurman 8, Hartlove 8, Hoch 8, Quimby 7, Bond 5, Bilderbach 5.

No. 4, same: Hamilton 9, Hoch 9, Hartlove 9, Bond 9, Thurman 9, Apgar 9, Smith 8, Clark 8, Keller 7, Quimby 7.

No. 5, 15 singles, $1.50 entry: Keller 15, Apgar 14, Smith 14, Bond 14, Quimby 14, Thurman 13, Hoch 12, Clark 11, Bilderbach 11, Hartlove 10.

No. 6, same as No. 5: Apgar 15, Smith 15, Thurman 14, Keller 18, Quimby 11, Clark 8.

No. 7, 10 singles, $1 entry: Smith 10, Bond 10, Keller 9, Apgar 9, Thurman 7, Hamilton 6, Quimby 6.

No. 8, 10 singles, flush match: Thurman 7, Smith 7, Apgar 7, Bond 7, Hartlove 6, Keller 5, Bilderbach 4.

No. 9, double-bird match, 5 pairs each:

Hartlove.....10 11 11 11 01—8 Clark.....11 10 10 11 11—8

No. 10, same:

Hartlove.....10 11 10 11 10—7 Clark.....11 11 10 11 01—8

No. 11, flush match, 10 singles each, both barrels allowed, second barrel to count ½:

Smith.....1111111½½1—9 Keller.....1100000111½—4½
Thurman.....1111011110 —8 Bilderbach.....0101110000 —4
Bond.....1110111101 —8 Hamilton.....0000½½1000—1½
Hartlove.....1100110111½ - 6½

No. 12, 5 pairs, flush match: Bond 8, Smith 6, Lindsley 6, Hoth 6, Hartlove 4, Thurman 3.

No 13, same as above: Smith 6, Thurman 6, Lindsley 5, Bond 5, Hartlove 5, Hoch 5.

No. 14, 10 singles, $1: Keller 10, Apgar 9, Hoch 9, Smith 9, Clark 8, Thurman 8, Hartlove 8, Hamilton 7, Bond 7, Quimby 7, Bilderbach 5.

No. 15, 25 singles, $2.50 entry, 1 money:

Thurman.....1111111111101111111111111—24
Dutchy .....1111111100011011111101101—19

No. 16, same as above:

Dutchy.....1010111111111111111101—22
Apgar.....1111111111111011111111—23
Thurman.....1111101111111111111111—23
Lindsley.....1111111111111001111111—23

Thus ended what can truthfully be said to have been the best managed and most enjoyable tournament of 1892, and one which with all its pleasant associations will long be remembered by those who participated. None of those who took part, however, will entertain more kindlier feelings toward Wilmington and the members of its popular rod and gun club than will

C. H. TOWNSEND.

## New Jersey Trap-Shooters' League.

THE ninth monthly team shoot of the New Jersey Trap-Shooters' League, held on Saturday, Oct. 15, was a pleasant affair, although the amount of shooting done during the day was smaller than at previous League shoot. The affair took place under the auspices of the East Side Mutual Gun Club on its grounds in rear of Wiedenmeyer's Park on Hatnburg place, Newark. This club has a very large membership, nearly every man on the roll being an active shooter. With all their ability and enthusiasm as shooters, however, very few of the members possess the "hustling" ability which is absolutely necessary in order to make a tournament a success. They are a jolly, jovial and very popular body of sportsmen in any way you choose to take them, but their main trouble at a tournament seems to arise from a diffidence in "bracing" the crowd for entrance money. Their members always turn out in force, and a goodly portion of them are sure to be in every event.

The shooting was done from a set of 10 bluerock traps, equipped with Paul North's well-known and popular electric pull, and bluerocks were the targets. "Billy" Hobart was the prime hustler, and he was given good backing by the ever jolly "Tee Kay" Keller and "Little" Neaf Apgar. To these men is due the fact that the tournament was a success, as, had it not been for their earnest efforts, the traps would have been idle at least one-third of the day. As it was, barely 3 000 targets were thrown, whereas had "hustling" been done by club members, the number should have reached not less than 6,000. A big mistake was made in shooting in squads of 11 men each on 10 traps, as during the whole time when the team match was in progress sweepstake shooting was stopped. We have always contended that two sets of 5 traps each were more profitable to a club than one set of 10 traps, and our opinion is strengthened by the fact that at League tournaments where the former have been used the largest number of targets have been thrown.

It was about 2 o'clock when the team contest was begun, there being seven clubs represented. The former shoots have not had less than nine teams entered. Those who entered were the South Side Gun Club, Woodside Gun Club and East Side-Mutual Gun Club, of Newark; Maplewood Gun Club, of Maplewood; Passaic City Rod and Gun Club, of Passaic; Boiling Springs Fish and Gun Club, of Rutherford; and the Independent Gun Club, of Plainfield. The absentees were the East Orange Gun Club, Brunswick Gun Club and the New Jersey Shooting Club.

The Independents entered a scratch team, but nevertheless they succeeded in capturing first place by a margin of six breaks. This is the eighth victory for this team.

Beside the team contest a series of open-to-all sweepstake events were shot, and below will be found the results of all.

## Ottumwa Tournament.

OTTUMWA, Iowa, Oct. 8.—*Editor Forest and Stream:* The first annual tournament of the West End Gun Club of Ottumwa, Ia., held on Fair Grounds Oct. 5 and 6, was a success. Attendance fair. The weather Oct. 5 was perfect for good scores; Oct. 6, cloudy with light breeze, was an agreeable day. A number of well-known shooters were present. The gold medal, presented by E. R. Ward of this city to the member of the West End Gun Club having the best average score for the two days' shoot was won by J. F Powell, with a total of 247 out of a possible 281. Following are tabulated scores. No. 1 at 10 singles, $1.50 entrance: No. 2, 10 singles, $2.50; No. 3, 5 live birds, $4; No. 5, 10 singles, $2; No. 6, 15 singles, $1, merchandise prizes; No. 7, 7 live bird, $5; No. 8, 20 singles, $3: No. 9, 10 singles, $1.50; No. 10, 10 singles, $1:

## Sweepstake Shooting.

A SWEEPSTAKE tournament was held on Wednesday, Oct. 12, at the Wauregan Gun Club grounds, Pelhamville, Westchester, N. Y., the live-bird shoots being under modified Hurlingham rules. Only nine competed in the several events, the counter attraction in New York being a great drawback in the attendance. The results as follows:

| | No. 1. | No. 2. | No. 3. |
|---|---|---|---|
| Blumenburg | 211—3 | 2121—4 | ..... |
| Ferris | 002—1 | 2101—3 | 01112—4 |
| Hudson | 112—3 | 2221—4 | 21102—4 |
| Osterhout | 011—3 | 2111—4 | 11201—4 |
| Valentine | 112—3 | .... | ..... |
| Paulson | 000—0 | .... | ..... |
| E H Fox | 212—3 | 0112—3 | 02210—3 |
| Bogardus | | 0101—2 | 10020—2 |
| Blumenburg | | .... | 20110—3 |

No. 4, 5 birds:

| | | | |
|---|---|---|---|
| Blumenburg | 22102—4 | Ferris | 20220—3 |
| Hudson | 22101—4 | Bogardus | 02212—4 |
| Osterhout | 21011—4 | | |

Tie, miss and out, won by Hudson.

No. 5, 6 bluerocks:

| | | | |
|---|---|---|---|
| Paulson | 000000—0 | Ferris | 001000—1 |
| Smith | 000100—1 | Bogardus | 100010—2 |
| Budd | 000001—1 | Valentine | 110101—4 |
| Blumenburg | 111100—4 | Osterhout | 011011—4 |

## The Unknown Gun Club.

THE biggest shoot of the week was that of the Unknown Gun Club, at Dexter Park, L. I., on Thursday, Oct. 13. Twenty-five members competed for the club's championship trophy and extra prizes, at 7 birds each, club handicap, H and T traps, modified Long Island rules, gun below the elbow until the bird is on the wing, both barrels allowed. Six killed seven straight for first prize. After outshooting the four others on the shoot-off of the tie, the veteran Ike Hyde and C. Hubbell had a good sharp race, miss and out. Hyde won on the thirteenth round. It being too dark to shoot off the others the moneys were divided. The scores:

| | | | |
|---|---|---|---|
| J Lohden | 0201220—4 | H Houseman | 2011212—6 |
| W Skidmore | 1001122—5 | Dr Little | 1111110—6 |
| C Kolver | 1100111—5 | R Rathbone | 1110110—5 |
| J Rankin | 0211201—5 | H Knebel, Sr. | 1110211—6 |
| J Sampson | 2112001—5 | J Akhurst | 2120121—6 |
| J Hyson | 2211011—6 | E Merriher | 1012211—6 |

Referee and scorer, C. A. Dellar.

### Old Stone House Grounds.

The monthly shoot of the Newark Gun Club, held on John Erb's "Old Stone House Grounds" on Oct. 13, called out a light attendance, but those who were on hand had on their shooting jackets, and out of 250 birds shot at during the afternoon 243 were killed. The day was a favorable one and the birds were of good quality. All the shooting was done under Hurlingham rules. The opening event was a Jersey sweep, 4 birds each, $3 entrance, with one money. The score:

| | | | |
|---|---|---|---|
| Castle | 1012—4 | "George" | 1121—4 |
| "Doctor" | 1111—4 | Smith | 1112—4 |

Sweep No. 2, 10 birds, $5 entrance:

### Coney Island Rod and Gun Club.

Twenty members of the Coney Island Rod and Gun Club competed at Woodlawn Park, L. I., on Wednesday, Oct. 12, for the Eppig diamond badge and extra club prizes. Each man shot at 10 birds, club handicap, modified Hurlingham rules. The shooting was first-class, and some good races took place on shooting off the ties, especially in those of the first and third. C. Detlefser won the badge and first prize, the second was divided. J. E. Orr won third, J. Schliemann fourth and M. Elssasser fifth. In the sweepstake shoot that followed at 5 birds each, then miss and out, some good races also took place. The scores:

Diamond badge match:

| | | | |
|---|---|---|---|
| A Eppig | 1011001221— 7 | R Eppig | 2100020101— 5 |
| J Schlieman | 0002111112— 7 | C Englebrecht | 1121101202— 8 |

### Parkway Rod and Gun Club.

The regular monthly shoot of the Parkway Rod and Gun Club was held at Dexter Park on Wednesday, Oct. 12. The competition was for the club medal, which has to be won three times in succession, and the best averages to count for the annual prizes. Twenty-one competed in the three classes at 7 birds each, club handicap, modified Hurlingham rules. J. Bennett was the only straight scorer, with 7, and took the medal and prize in Class A. P. Kunzweiler took the prize in Class B with 6, and J. Wellding that in Class C also with 6. H. Selover took the first money in the sweepstake at three birds then miss and out, J. Bennett second and Botty third. J. Bennett defeated J. Brower in a match. The scores: Club shoot for best averages and medal:

Class A.

| | | | |
|---|---|---|---|
| H Brower | 2002200—3 | A Botty | 2120011—5 |
| T Short | 2120011—5 | J Bennett | 1111112—7 |
| E Helgans | 2101110—6 | | |

Class B.

| | | | |
|---|---|---|---|
| A Andrews | 1202002—4 | H Le Maire | 1002012—4 |
| T T Edgerton | 1111110—6 | J Ranoch | 0202120—4 |
| S Schortemeier | 1100222—5 | H Bramwell | 0112122—6 |
| C Hubbell | 1011011—5 | P Kunzweiller | 1102111—6 |

Class C

| | | | |
|---|---|---|---|
| J Link | 2121110—6 | J Meyer | 2110220—5 |
| H Bookman | 1101202—5 | A Suydam | 0122110—5 |
| H Selover | 0102202—4 | J Wellding | 1111101—6 |
| H Ryder | 2001000—2 | | |

Sweepstake at 3 birds, 25yds.:

| | | | | | |
|---|---|---|---|---|---|
| A Andrews | 011—2 | 10 | H Selover | 122—3 | 221 |
| J Bennett | 101—2 | 2211 | P Jones | 221—3 | |
| A Botty | 001—1 | | C Hubbell | 121—3 | 111 |

### North Side Gun Club.

The members of the North Side Gun Club, of Long Island, did not turn out very strong at their regular monthly shoot at the Queens County Driving Park, Maspeth, on Wednesday, Oct. 12. Only seven competed for the club medals and best averages for annual prizes. C. Barlow and R. Bowen tied with 7 each, and the tie was decided in the following sweepstake shoot. Barlow winning. The club shoot is under modified Hurlingham rules, 5 traps, club handicap, 7 birds each. The scores:

| | Club Shoot. | Sweep and Miss and Out. | |
|---|---|---|---|
| J Tiernan (27) | 1111110—6 | 10111—4 | 11111—5 |
| S Lyons (27) | 1011101—5 | ..... | .... |
| C Barlow (27) | 1111111 - 7 | 11111—6—111 | ..... |
| H Manning (29) | 1011111—6 | 11111—5—111 | ..... |
| C Luhrs (25) | 1110111—7 | 01011—3 | 11011—4 |
| H Tompke (25) | 1011111—6 | 11110—4 | 11010—3 |
| R Bowen (25) | 1111111—7 | 11111—5—110 | 11111—5 |

BOOKS ON SHOOTING.
New Editions.

The Modern Shotgun.
By W. W. GREENER.
PRICE, $1.00.

The Gun and its Development.
By W. W. GREENER.
PRICE, $2.50.

These volumes have been for some time out of print, and new editions revised by the author have just been received. There is scarcely any one whose utterances with regard to shotguns and rifles are entitled to as much weight as Mr. Greener's, for he has been making these arms for many years. To his great knowledge of them he adds a pleasant and clear style in writing, which adds to the value of his books. Every American who uses a gun ought to read these books. Sent postpaid on receipt of price.

FOREST AND STREAM PUBLISHING COMPANY,

## *SALMON FISHERIES OF ALASKA.*

TOWARD the close of the first session of the 52d Congress the Senate directed the Commissioner of Fish and Fisheries to communicate to that body any information in his possession relative to salmon fishing in Alaska, its extent, and whether the methods of the fishery are likely to cause the diminution and eventual extermination of the salmon, together with his views as to the measures necessary for the protection of the fish and the permanence of the industry in Alaskan waters. In his report, transmitted in obedience to this resolution, the Commissioner discussed: 1. The Origin and Development of the Fisheries. 2. The Statistics. 3. The Present Condition. 4. The Methods and Apparatus Employed. 5. The Protective Regulation of the Fisheries, including recommendations as to further legislation in reference to them.

Appended to the report are papers by Dr. T. H. Bean, upon the Life History of the Salmon and the Publications Relating to the Salmon of Alaska and Adjacent Waters.

The document is illustrated by a general view of the Karluk canneries, reproduced from a photograph made by Dr. Bean in 1889, and by 24 figures of the salmon, grayling, whitefish, trout, smelt and capelin of the Territory.

This report taken in connection with an earlier one on the same subject, issued in 1890, completes the record of the Alaskan salmon industries to June of the present year. It shows that from 1883 to 1891 the yield of canned salmon was valued at $11,000,000, and was obtained chiefly at Kadiak Island and the Alaska Peninsula. Over 4,000,000 of red salmon were taken in and near the mouth of a narrow river, only about 20 miles long, in the summer of 1889.

Without regard to the permanence of the industry, the canners pursued destructive methods of fishing, involving the absolute prevention of natural spawning in the rivers, until Congress imposed restrictions upon their operations and overproduction reduced the market value of salmon below a profitable limit. The combination of protective legislation and limitation by agreement among the canners has placed a temporary check upon excessive and destructive fishing.

Alaskan rivers contain five kinds of salmon — red, quinnat, silver, humpback, and dog—and four kinds of trout—Gairdner's, red-throated, lake trout and Dolly Varden. All of these are valuable food fishes, but some of them outrank the others for commercial purposes. The Territory has additional wealth in its numerous whitefish, grayling, smelt, eulachon and capelin, bringing its aggregate of species of the salmon family as high as that of any other country of equal area.

The existence of the anadromous salmon is dependent upon their free access to their natural spawning grounds in the gravelly shoals of rapid rivers or in the cold, snow-fed lakes from which they flow, "and in this natural law is to be found the suggestion of such legislation as may be necessary 'to maintain the salmon fisheries under permanent conditions of production.'"

Protective regulation of the fisheries, in the opinion of the commissioner, must provide for adequate reproduction of the salmon either by permitting the spawning fish to ascend to their breeding grounds or by artificial propagation and distribution of the young to their feeding places on a scale to compensate for the limitation of natural reproduction by the operation of the fisheries.

"If it be the policy of the Government to depend upon natural reproduction to maintain supply, this can be made effectual only by the enactment and enforcement of such regulation of the fisheries as will assure adequate reproduction under natural conditions. The different agencies which may be invoked, either separately or in conjunction, to accomplish this end are:

(*a*) A weekly close season from Saturday evening to Monday morning.

(*b*) A close season during September and October of each year.

(*c*) The establishment of national salmon parks or salmon reservations, as proposed by Dr. Livingston Stone.

(*d*) Absolute prohibition of the capture of salmon by the use of nets or other apparatus within 100yds. of the mouth of any river.

(*e*) The prohibition of the use of more than one seine in the same seine berth.

(*f*) The leasing of the privilege of taking salmon and the limitation of the catch, in accordance with the recommendation of the Commissioner of Fisheries, based upon continued and careful investigations of the conditions of the fisheries."

The establishment of national salmon parks was proposed in a paper read by Dr. Stone before the American Fisheries Society, and published in FOREST AND STREAM, June 16, 1892.

The Commissioner believes that the future of the salmon can best be assured "by limiting the catch in each stream to its actual productive capacity under existing conditions, and by leasing the privileges of taking the salmon to the highest bidders." We cannot leave this important subject without again calling attention to the fact that the existence of the native population of Alaska is equally involved with the permanence of the salmon industry in the policy of the Government in dealing with fishery methods.

## *THE LOST PARK BUFFALO.*

BUT little information has been gained during the week concerning the Lost Park buffalo. So far as known nothing has been seen of the hunters who were supposed to have killed the thirteen head. Mr. J. P. Lower and John Higginson have made a thorough search of Lost Park without finding any signs of them. Mr. Higginson is an old hunter and is believed to know every foot of Lost Park, and he should be able to find, if not the hunters, at least their old camps and signs of their work if they have been there recently. It would seem probable that if this bunch of buffalo had been disturbed by hunters the marauders would long ago have taken the alarm and slipped away through the mountains.

More definite information than has yet been had with regard to this bunch of buffalo comes to us from Mr. D. N. Cassell, of Cassells, Col., who lives quite near to the range of the bison. He says: "The runway of this bunch is from five to twenty miles from Cassells. What is called Kreg Park heads about five miles south of Cassells and runs east into Lost Park. About the middle of last June two friends of mine were prospecting in there and came across two bunches of bison. One band consisted of seventeen head, mostly cows, with about five calves in the lot; in the other band there were twenty-one head, cows and calves and four large bulls. As nearly as the surrounding neighbors can estimate, there are in all about forty head left.

"There was a report started some weeks ago to the effect that some parties had killed thirteen head. This has been contradicted, and I do not believe that any have been killed this fall, for the citizens are watching hunters very closely."

Notwithstanding this, persons at Kenosha, Colorado continue to affirm that some buffalo have been killed and that the hunters have got safely out of the country and will not be caught. It is stated that a pack train in charge of two men came out from Lost Park a few weeks ago, the jacks being loaded with packs bound up in canvas. Game Warden Land is said to be of the opinion that a certain taxidermist of Floriscant has had a hand in the killing and that he will be arrested as soon as he returns to his home.

A great slaughter of deer is reported in Routt county, and Game Warden Taylor urges that assistance be sent him.

## *PANTHERS AND THE HAIR.*

WHEN the teller of a panther story wishes you to understand that the hero or victim was badly scared, he avers that his hair rose or "raised," or "riz," or stood on end, or lifted his hat. Thus in the graphic picture in to-day's FOREST AND STREAM, of life in the great woods of the Nehalem country, Judge Greene tells us that his companion, frightened by what was thought to be a panther, posed "with hands thrown forward in a supplicating manner and hair on end." And in his testimony as to the panther's scream Mr. Rushton relates that when he was scared one night by a cry "each separate hair on his head stood up on end." A Washington correspondent, whose letter is in hand, testifies that the panther yarns told him in youth caused his hair to rise. In his capital story of "A Cougar Skin," issue of Sept. 8 (a story which Mr. Charles Hallock told us was one of the best things he had ever read), "O. O. S." records: "A terrific scream from the opposite shore fetched me all up standing again;" and probably his hair was included.

The notion, if it be a notion, that fright, caused by a panther or by something else, lifts the hair, is certainly an old one, and venerable for its antiquity; this "hair on end" may be said to be hoary with age.

Job iv., 14-15, reads:

> Fear came upon me, and trembling, which made all my bones to shake. Then a spirit passed before my face; the hair of my flesh stood up.

Does not Virgil make his hero's hair stand on end in that *vox faucibus hæset* passage? Thus Conington's translation:

> While thus in agony I pressed
> From house to house the endless quest,
> The pale, sad spectre of my wife
> Confronts me, larger than in life.
> I stood appalled, my hair erect,
> And fear my tongue-tied utterance checked.

We have Macbeth's testimony:

> why do I yield to that suggestion
> Whose horrid image doth unfix my hair,
> And make my seated heart knock at my ribs,
> Against the use of Nature?

And says the Ghost in Hamlet:

> I could a tale unfold, whose lightest word
> Would harrow up they soul; freeze thy young blood;
> Make thy two eyes, like stars, start from their spheres;
> Thy knotted and combined locks to part,
> And each particular hair to stand on end
> Like quills upon the fretful porcupine.

No doubt a thousand and one instances of rising hair might be cited from literature ancient and modern, from the Book of Job down to this to-day's issue of FOREST AND STREAM.

But does fright raise the hair? Will Judge Greene and Mr. Rushton, and our Washington correspondent and "O. O. S." please tell us whether they wish us to understand their hair-rising testimony in a literal or a figurative sense. The scientific authorities assure us that the hair-rising belief is a notion without substantial basis in fact; but the authors of text books presumably have never had an opportunity to note just what does happen to a man's hair when he encounters a panther.

## *SNAP SHOTS.*

DISTRICT ATTORNEY DELANCEY NICOLL says that he is anxious to have that Delmonico woodcock case brought to a speedy trial. Giving him full credit for such a desire, it would appear that for a chief prosecuting officer he must be tremendously handicapped by inefficient subordinates. Col. Townsend is the Assistant District Attorney who has the notorious Delmonico case in charge; and for the sake of Mr. Nicoll's good name, if for no other reason, the Colonel should bestir himself. People all over the State are cognizant of the facts of the case, and are watching its progress—or more accurately, its delay.

---

The observations of Col. Habersham in this issue upon the reproduction of the striped bass will be read with interest. The subject is one about which little can be found on record. It is certain that this noble game and food fish will receive the attention of fishculturists very soon—the sooner the better for the future of the species.

---

Our next issue will contain as a supplement the third illustration of American Wild Animals by Mr. E. E. Thompson. The subject will be the Canada Lynx.

### *THE SUSQUEHANNA "SALMON."*

A LANCASTER, Pa., correspondent of the New York *Sun*, writing Oct. 15, claimed that Hon. Simon Cameron caused the introduction of pike-perch, locally known as "salmon," into the Susquehanna River nearly twenty-five years ago. This is probably true, but the pike-perch has been credited to that stream for more than a century, and the late Harrison Wright, Esq., has recorded its early history in a paper published in 1882 in the first volume of the Bulletin, U. S. Fish Commission, page 371, and elsewhere throughout the article on Early Shad Fisheries of the North Branch of the Susquehanna River.

The pike-perch is probably a native of the river and has been more or less abundant within historic times. It is taken most readily at or near the bottom with the young lamprey or a live minnow for bait, and sometimes rises to the trolling-spoon and artificial fly. At the present time pike-perch are much more plentiful than black bass in the Susquehanna from Harrisburg to Port Deposit. Bass are more than usually abundant at the mouth of the river.

In our issue of Aug. 18 we published a note on some large captures of bass in Fox Lake. Wishing to obtain details of the fishing we asked Mr. W. E. Goodman to send us an account of his trip and he has kindly forwarded the statement which we print in this number. What is the "silver bass" of Fox Lake? The name is sometimes applied to the moon-eye or toothed herring, but it is scarcely probable this is the fish in question. Can it be the calico bass?

## The Sportsman Tourist.

### TROUTING IN THE COAST RANGE.—III.

The Nehalem Country.

SO WE passed the week in the Coast Range. We took it easy, progressed slowly, fished in the evening, cooked, ate and slept; forgetful of the past, careless of the future and supremely happy in the present.

I thought I had seen forests before, millions of acres of them; but up around the head waters of Deep Creek we saw such timber as I never saw before and never expect to see again. A forest of evergreen giants as thick as they could stand, towering over 300ft. high, straight as the rays of light that glanced back from their impervious tops, and, as Sam Garoutte used to say: "Without a limb, knot or woodpecker hole" more than half-way up. Even at mid-day the deep twilight that pervaded the forest gave our surroundings an air of mellow mystery, all wrapped in the dreadful stillness of the grave. No birds were there, no crickets, no active, glad life of any kind to break the eternal silence in this abode of the dumb, primeval giants. The stillness was oppressive. It seemed to be a thing, an existence which we felt restrained from touching. Almost unconsciously we stepped lightly, fearing that our tread might break the lock that imprisoned the hoary secrets of the forest. Involuntarily we peered into the gloom as if in dread of seeing some grim specter wandering there bewildered in the vast wilderness. We paused and listened, half in doubt whether we were not called to by some lost spirit held back to earth by the umbrageous cloud o'erhead. There was something so dismal and death-like about the stillness and solitude of this place that I almost imagined that I myself was the ghost of some being, that had once lived and wandered there, come back to "squeak and gibber" over the misfortunes and misdeeds of a misspent earth life after the fashion of ghosts in general.

Motion of any kind, anything breaking the monotonous stillness of the place was startling. Even the noise of a falling twig was as the thunder of the avalanche. A low-spoken word moaned out through the forest like the coming storm, and one's very thoughts seemed to rattle in the skull like marbles. The Doctor appeared to be profoundly impressed with the solemnity of our surroundings. He stood once with his hands on his hips, his hat tipped back, his face full of sentiment, mentally soliloquizing, no doubt, as I was, and entirely forgetful of the fact that there was such a thing as a dog in the country, when Mike and Towser came out suddenly from behind a tree right in front of him. With two or three quick jumps backward, hands thrown forward in a supplicating manner and hair on end, he involuntarily ejaculated that one simple but expressive monosyllable: "Ugh!" The Doctor, you must know, like many another poor mountain wanderer, is mortally afraid of cougars, and doubtless on first impgession imagined he was attacked by a whole herd of these varmints; and neither the occasion nor the color of either dog was calculated to dispel the illusion.

We were in this dismal forest one whole day, and really I felt relieved when we got where we could hear the birds sing and see the sunshine.

The trout in the streams of this dark forest were not large, as a matter of course, but they were of extremely fine quality, and the Doctor and I each disposed of a baker's dozen for supper, prepared in the good, old-fashioned way with strings of bacon in, over and under them, broiled in a wire broiler over live coals. They say that anything tastes good out on these tramps, but I am impressed with the notion that trout are not so sweet and rich when cooked in any other style. At any rate I must candidly confess that I am very partial to the broiler and bacon method of preparing trout. It is probably unnecessary for me to add that for many reasons there was no such thing as playing our fish in these little mountain streams. We used but one fly, and wherever there was a hole the size of a wash-tub there was a fish—or two or three from 6 to 10in. long. I believe that we could have caught 500 such fish a day had we been so disposed, for they were very plentiful, absolutely fearless and always hungry. As I have already intimated, we wasted no fish worth mentioning, but the temptation to break this rule was awfully strong.

We started several bachelor elk that were apparently doing penance in the spring for the pleasure of wearing antlers in the fall; hiding away in lonely places, patiently awaiting the time when the velvet would fall and allow them to present themselves in proud form to their forest lady-loves. I almost sympathized with them, for they had about three months of their sentence yet to serve. One old fellow had selected a most perfect spot for a home during the purgatory period. On a south side hill the trees had fallen across each other in such a way that a pen had been made, inclosed on three sides by logs piled 5 or 6ft. high, while the fourth side was open and facing down toward the creek. It was almost artificially regular in its construction.

We had great fun with an old bear one afternoon. In his haste to get away he actually doubled up and rolled down the mountain side, knocking the bark off the whole side of a log where he struck and glanced off. We could hardly keep old Towser back when in the neighborhood of big game. Fortune and fair winds favoring, he shall have the opportunity in the near future to go again with me into these mountains when there will be neither legal nor moral restraint. Scarcely a night passed that we were not visited by beasts of the forest, but they generally kept a respectful distance. However, on one particular night, while we were camping on the headwaters of Deep Creek, some animal more daring than the others, presumably a wildcat or wolf, approached so near that Towser made a dash for him in great earnest, with Mike valiantly supporting his rear. Mike made as much noise as an old-fashioned horse-fiddle, which of itself was enough to scare all the varmints out of the Coast Range, and the dogs soon returned without any scalps hanging to their belts. They were probably lucky that they got back with their own.

The afternoon of the day following our trip through the dark forest, while we were in the midst of a great deadening of the crest of the range, a storm of dire and vengeful aspect suddenly gathered out on the ocean and rolled up over the mountains. The danger of our position was plainly evident, but we were powerless to avert it, for it was a long way to Green Timber, and the storm moved more rapidly over, than we could through the sallal, fallen timber and ferns. We were in for it and proceeded to make the best of it. "Oh for a lodge in some vast wilderness," a hole in the ground or any kind of hiding place. But there was no lodge, no hole, no hiding place of any kind, and we had to face the music; and there was plenty of music before we got through with the entertainment. The sad genius of the coming storm moaned in fitful sighs a sort of melancholy warning to us through the leafless branches of the great dead giants. The warning was heeded all right enough, but still we had to face the music. Then the storm came, and burst upon us with all the fury of its pent up rage,

> And savage winds, infuriate driven,
> Flew howling in the face of heaven.

The rush of the storm and the din and the thunder of falling timber were truly appalling; and I was very nervous if not absolutely frightened. The Doctor was pale and silent, and watched the battle of the elements earnestly but calmly; but you should have seen him forget his dignity when a great tree-top snapped and started directly for the particular spot upon which we were standing. Not less than a score of these tops fell in our immediate neighborhood, and the confused crashings and rumblings were awful to hear. For my part, I don't enjoy this kind of an entertainment. I can dodge all right when I have to, but if the fun lasts very long it gets monotonous. For an hour or more we suffered in our terror, not knowing what moment we might be crushed or maimed; for the tops did not always fall with the wind as decent tops should, but frequently snapped as they whipped back against the blast.

We had seen another of the Coast Range elephants, and I, for one, was ready to go home. We had seen about elephants enough for one trip, so we started for the Turpins'. The storm had made our exit one of great difficulty, for the fallen trees and débris were piled in many places thirty feet high. That night we camped on Deep Creek, well down toward its mouth, where the stream was wider and we had more room to cast and play our fish. The fish were larger, too, and played sad havoc with our tackle; but we managed to save plenty of them. How I wished that we could reach home in one day from Deep Creek. I am satisfied that the Doctor and I could have caught a hundred pounds of fine trout in a day's fishing near our camp of that night; but we could not keep them in good shape two days, and besides, neither of us felt disposed to carry a load of fish twenty-five or thirty miles over the mountains and such a trail. But we caught a nice basket for the Turpins, notwithstanding the fact that they didn't like fish, for it was the first time on our trip that we had had even the shadow of an excuse for catching any more than we ourselves could use, and we didn't propose to lose the opportunity of enjoying ourselves with the beauties of Deep Creek for once, even if the Turpins did decline to take their medicine.

Towser seemed to know that he was in his favorite wildcat country and was restless and uneasy all night long, but we would not let him leave camp. Our provisions were getting low, particularly the bacon, for Towser liked bacon and we had not prepared for his wants. So next morning we struck out for the Turpins', where we arrived about noon, well satisfied with our trip and yet glad enough to get out of the wilderness and back in the neighborhood of civilization. Towser didn't seem at all anxious to get home. He had been treated kindly, had had plenty to eat, and had been a good dog without the intervention of boom-chains. The Turpins were glad to see us return safely, for they had witnessed the storm in the mountains, and knew the danger we were in. Turpin himself, when he learned that we were in the great deadening during the storm, congratulated us on our lucky escape. The Doctor, of course, needed the whole day for rest, and the girls seemed really glad that he was tired. One cannot blame them much under the circumstances, for likely young men were seen in the Nehalem Valley about as often as were angels. Turpin asked me, off to one side, whether the Doctor was a married man, and when I told him that the Doctor was single, a good physician and a fine young man, Turpin seemed deeply interested in him and his intentions. They needed a good doctor in the Nehalem Valley, and he know of a nice quarter section close by which the Doctor could take up as a timber claim, but which, when cleared up, would make a magnificent homestead if the Doctor cared to settle on it. But he didn't propose to disclose its location except to an actual settler, and even then it must be one that suited him for a neighbor. It really does seem a shame to see such roses as the Turpin girls "blush unseen, and waste their sweetness on the desert air." I do not wonder that Turpin is a little anxious about his neighbors, if he has the welfare and happiness of his pretty daughters at heart.

While the Doctor rested, Johnny and I took the canoe and fished some of the lovely pools down the Nehalem. He wanted me to use his tackle, but I declined, and I will add that I succeeded in capturing several good-sized fish, the last one of which succeeded in capsizing the canoe and giving Johnny and me a thorough wetting; but I saved the fish all the same. Of course I lost the big fellows, but then, just think of the fun we had. When I go again to the Nehalem for trout I shall take a supply of such tackle as I ordinarily use for salmon, and it will fool somebody.

We got an early start next morning with the well wishes of the family in general, and a gentle reminder from little Annie about the doll in particular. As we left the river for home we observed poor old Towser sitting on the opposite bank looking after us. He watched us until a bend in the trail hid us from his sight, and I imagined that his old heart was aching as human hearts ache when they take the last fond look.

PORTLAND, Oregon. S. H. GREENE.

### IN CAMP ON CACHE RIVER.

LITTLE ROCK, Arkansas.—We had talked it over often and vowed to go fishing. Finally we started. By we, I mean the Senator (who now spends most of his time standing between the Iron Mountain Railroad and justice for a consideration, and who is a veritable Jonah to a fishing party if not to his railroad), my eleven-year-old boy and his partner, and myself. Leaving Little Rock we reached Cache River, fifty-five miles out, after a two hours' run, and were safely landed with our plunder on the banks of the stream, which was in beautiful fishing stage.

A little negotiation and a dollar of our daddies procured us two boats from a native and we were soon at our camping spot, a half-mile below at a spring. We proceeded to put the tent up and arrange camp, and by that time it was nearly dark and no one had had a chance to catch a fish. About that time a Senegambian hove in sight in a mud scow, and the persuasive influence of a quarter soon transferred a fine string of fish from his possession to ours. So we started in by buying fish. But what else could you expect with Jonah along and in the close season for whales?

But though late, Jonah and I concluded we would go fishing anyhow, and as the kids had caught a bucket of minnows, we went down to the bar and tried our fortune. But it was late and the malign influence of the prophet was still in force, and only one striped bas rewarded our efforts. Coming back, we found that the kids had built a camp-fire in a hollow cypress tree in front of the tent, and it was acting like a blast furnace or a volcano on a ramapge, and we had to move our tent in a hurry. For two hours that tree lighted up the woods and finally hardly left the remains.

After supper, composed largely of the fish we had not caught, we retired for the night. I had brought with me some mosquito medicine made after good old "Nessmuk's" recipe; but to our surprise the festive insect did not materialize in any appreciable quantity.

The next morning we were up early, swallowed a hasty breakfast, found a minnow bucket with its contents had floated away, but fortunately found it lodged against a tree just below camp, and started fishing.

Pulling our boat into a lake near the river we tried for black bass. We soon got several and a white perch or two. Suddenly I got a bite that made me dizzy, and for the next five minutes the Bristol steel rod was twisted into every shape, but came to time all right, and just as I concluded I had the biggest bass ever seen in Arkansas, I landed a blue catfish 3ft. long. That is where Jonah got in his work again, and I draw the veil of charity and silence over the transformation of my bass into a catfish.

It was time to quit, for the Senator had to go to Mableville to dispense Democratic doctrine to his anxious constituents; so we gave him a square meal and let him go with regret, for he is a good fellow in spite of his unlucky propensities.

When we came back to camp we found new misfortunes. Before going away I had nailed up the provision box securely enough as I thought to defy the ubiquitous Arkansas razorback.

This animal infests the bottoms and is probably a cross between a very aboriginal hog and a peccary. He runs mostly to forelegs and snout and is a hustler. He spends half his time hunting for a living in the bottom and the other half hustling to get out of the way of swamp niggers and bears. We found two in possession of the camp and also found that they had inserted their snouts under the top of the box, pried it off, eaten our bread and scattered things badly. A visit to a settler's house furnished some corn meal, and we lived on corn dodgers the rest of the time.

After a long rest I went back to the lake and caught a nice string and the second night passed without interruption.

The next morning dawned clear and beautiful. The fish were jumping in every direction, but it was Sunday. I was tempted to go fishing, but the thought of the bad example I would set the boys and the lecture I would get from my religious wife kept me from it, added to which were the sermons of my spiritual adviser, who by the way is a fisherman too, and can chase the festive minnow with the best of us and fall down in the water without even straining the third commandment.

So instead of fishing I took the kids into the woods and found a vine full of muscadines and spent the forenoon in complete idleness. When the afternoon train came we boarded it and were soon at home again.

It was the first camp for the boys and their hearty enjoyment of it was one of the most pleasant features of the trip.

Game is fairly abundant in that country, but though the season was open the vegetation was so dense I did not try any hunting. I started one afternoon, but a few yards through the cane satisfied me that hunting in a cane bottom was not my forte. UNO.

# Natural History.

## THE PANTHER'S SCREAM.

CANTON, N. Y., Oct. 17.—*Editor Forest and Stream:* Reading the various articles in FOREST AND STREAM about the cry of the panther brings to memory an incident of boyhood days.

It was in October of 1861, and I, a lad of 18 years and 75lbs. weight, was engaged in trapping mink. My home was in Fine, a then backwoods settlement; and I trapped the ponds, brooks and river in that vicinity. On this day I had left home before dawn, and had been setting steel traps and deadfalls on a small stream that crossed and recrossed the "Old Albany road." Darkness caught me miles from any house or other shelter, and I sought the leeward side of a small thicket of spruce and prepared to pass the night as best I might. I had no blanket; such an article was too heavy to carry. After felling several small hardwood trees for fuel, I kindled a fire, made some tea and ate my supper. I then proceeded to cut wood enough to keep my fire during the night. My first blow produced an unexpected echo; from directly up the brook, and seemingly some dozen rods away, came a scream so long, loud and blood-curdling that each separate hair on my head stood up on end, and my blood went bounding through my veins at a better clip than ever made by Nancy Hanks. A second yell, not so loud nor long, brought me to my senses, and I picked up my single barrel muzzleloading, peashooter, and carefully examined the "GD" cap to see if it would respond if needed. Then I watched the circle of darkness for eyes and formed my plan of defense if defense should become necessary. This plan was to put the fire between myself and the owner of that voice, and only to fire when sure of my aim. But no eyes appeared, and after waiting a few minutes I laid down my gun and cut more wood. Then building a good fire I lay down and went to sleep. Once during the night I awoke with a start and shivering with cold, almost surprised that as my fire had burned out, I had not been eaten. I did not see the owner of that voice, did not even look for tracks—I believe I was too intent upon making tracks myself when daylight came. But on telling my adventure to hunters who had killed many panthers, they at once said my visitor was one.

Has the reader a lady friend, who has a clear, strong voice, and has also a mortal terror of a mouse? Put her in a small room, close the windows and doors, let her open a bureau drawer, and have Mr. Mouse dart out almost in her face. Hear her scream. It will unfasten the door, rattle the windows and lift the shingles on the roof. It will fill every iota of space within the room with sound, and send a cold chill over you. The voice I heard that night was the same, only that it was louder, and it filled the woods for seemingly a mile around, just as the woman's voice would fill the room. It had a volume, depth and strength not to be found in the voice of any bird or small animal.

I have spent much time in the wilderness and have heard all the voices of the day and night, but all combined would make but a tiny squeak beside that terrific scream. I did not see the animal, hence I cannot "swear" that it was a panther, but I am quite willing to stake all my future luck as a hunter that it was.

I have been acquainted with a number of men who made hunting and trapping these animals a business, and they tell me that the panther seldom screams, but surprise or anger may cause him to do so. Undoubtedly the average individual hears something else and calls it a panther, but once he has heard that animal make his best effort he will never again be mistaken nor say that the panther does not scream. J. H. RUSHTON.

### The Panther's "Yik."

SPRINGFIELD, Mass., Oct 15.—I do not pretend to deny "Stanstead's" statement that a panther may "yik," but I am a firm believer in what he calls the myth of the animal's terrible scream. It is well known that almost all animals have different cries to express varying emotions—the house cat and the wildcat snarl, growl and shriek, and I have often heard the lynx combine all sounds in a startling manner—especially when prowling close by the camp-fire, and waking one out of a sound sleep.

For eight years it was my happy lot to pass most of my time in a wilderness where panthers were occasionally seen and heard. Also there were owls in plenty, and I amused myself by imitating their hootings until I could deceive the birds themselves and from a distance draw them near me. I then thought myself familiar with about all their varying tones. I certainly had ample opportunity to become so. But there was one cry sometimes heard in those woods that was somewhat different from that of an owl, a cat or a lynx. I did not in those days think myself more than an average coward, but I will confess that one dark night, when I had left the camp-fire to replenish the water bottle at a stream close by, it was probably to my credit that no one could see me for a minute or so. There was a sound in a neighboring thicket—that was all. When I got back to the camp, my partner—he was then new to the woods—with eyes bulging and a suspicious movement about the knees, was grasping an axe with both hands. He asked what that noise was. I told him I thought it was a devil, or perhaps a dozen or two of them rolled into one. He at once agreed with me.

Well, I heard that scream several other times later on, and I can't say it sounded any sweeter. The woodsmen of that vicinity are more or less familiar with it. They say it is made by the panther. All I can say is that any animal with that voice—be he rabbit or owl—can have the whole path, so far as I am concerned. I can get along very well in the bushes.

Only once in those eight years did I meet a panther in his native wilds. He might have been at his best—feeling particularly good over something—but to me he did not look like a "sneak cat." FRED L. BALLARD.

AFTER THE SPECKLED BEAUTIES.

(Forest and Stream Amateur Photography Competition.)

### He Saw them Scream.

I have been very much interested in the articles published in FOREST AND STREAM, as to whether the panther really screams or not. With your permission, I will offer some evidence in favor of the scream that may be interesting.

I was born and reared in a great far South State that borders the Mississippi River, and all my life I have been familiar with the big game of the vast forest lying along the great river from the mouth of the Arkansas to the sea. I have killed, and helped to kill, perhaps twenty panthers, and twice, I have seen the panther when it screamed.

Five years ago this month I was riding from a small village, or rather post office, on the Sunflower River, in Mississippi, to a plantation seven miles away. It was late before I left the hospitable mansion of my planter host, who had served in my regiment as a captain, and one of the most dashing of Forrest's troopers, when his lip was still as smooth as a girl's. The moon this night was full, and the road was plain and untraveled. I was riding a Kentucky 5-year-old, who was as intelligent as a thoroughbred can be. About three miles out my mare gave a start and shiver, and from the canebrake that bordered each side of a small but deep bayou, there came the low, deep, quavering scream that I had often heard before at night when in camp in the depth of a Mississippi forest. I knew it was a panther. It was repeated, and the animal seemed to be moving parallel to the road. The bayou made a sudden turn to the left, or northward, where it was bridged by a rude but strong structure of cypress logs. This bridge I had to cross. Beyond it the land by the roadside was quite open, and the highway stretched for a mile in a straight line. Just as I was about crossing the bridge with a leap that must have covered 20ft., one of the largest panthers I have ever seen, sprang full into the middle of the dusty road. I was not more than 15yds. distant. The bright, full moon shining on the white dust brought the splendid figure of our greatest cat out in perfect relief. It stood there, sidewise to me, for perhaps half a minute, not making a move, but gently waving its long tail. Then it threw back its great leonine head, and opening its mouth to the full, uttered the scream I had heard in wilderness, on mountain, and in canebrake for the past thirty years. Its long teeth shone white and cruel in the light of the Southern moon. In a moment it was answered from the rear of a cotton plantation, perhaps a mile away. The moist, still air of the Southern lowlands is a wonderful bearer of sound. I understood at once that this was the call amative which we so often hear from the prowling tomcat on the woodhouse roof or rear fence. Though I had a Colt's cavalry pistol in my saddle holster—for nobody rides at night in this country without an arm of some sort—I made no attempt to shoot. The animal turned its head toward me for a second, and its great eyes gleamed as with a phosphorescent light. Then it leaped into the cane on the other side of the road, entered the cotton field spoken of, and started toward the forest at the rear of the cleared land.

Once before I heard the angry scream of a panther. I was fishing on one of the lakes in Mississippi that are "cut offs" of the Mississippi. A negro man named Ben, who was cutting wood near me, came up, holding a young panther, about the size of an ordinary cat, but extremely lively. "Marse ——, I done foun' dis yer little beas' over dere in de clearin'; what yo' reckon it is?" I knew the habit of the female panther of bringing her young ones—for there are hardly ever more than two—down as soon as they can walk from their lofty birthplace in some huge cypress or gum, to take the air and enjoy the vivifying warmth of the sun. I had no firearm, and old Ben had nothing but an axe. "I think you had best put that thing down on the ground, Ben, and leave here," I replied. "It's a young panther." "De Lawd look down!" said the frightened darky as he promply followed my suggestion and cleared out. I stepped into my canoe and pulled a hundred feet away from the shore, for I heard the short angry scream of the mother panther a quarter of a mile away. She came dashing through the cane and brush that surrounded the lake, making as much noise as a 3-year-old steer would. When she reached her young one she fiercely nosed it over to see if it was injured in any way. Seeing me, she gave a loud, fierce, angry scream, opening her mouth to the full as she did it. She was in a sunny spot, and I was not more than 30yds. distant in the canoe. Nothing intervened, and I distinctly saw her teeth and tongue as she screamed. She then seized the cub in her mouth, with that firm tenderness that characterizes the mother most, and started through the cane back to her lair.

For the reasons given, and my personal observation in the cases cited, I know the panther can and upon occasion does scream. I have related my own observations precisely as they occurred. MISSISSIPPI LOWLANDS.

HUSHPUCKANY, Miss., Oct. 10.

In his "Notes on the Panther," issue of Sept. 8, Mr. Geo. H. Wyman recorded: "The female mate of the captured cougar, starting apparently from the side of the mountain opposite to me and a quarter of a mile away, walked slowly along toward the place where her mate had been killed, and all the way, at short intervals, giving such terrific screams as I had never heard before, and as most decidedly hurried my pace toward the house, where I found the family standing in the front yard to hear the same alarming screams which had startled me. Part of her notes seemed those of anger and some of intense grief."

### American Ornithologists' Union.

PORTLAND, Conn., Oct. 6.—The tenth congress of the American Ornithologists' Union will convene in Washington, D. C., on Tuesday, Nov. 15, at 11 o'clock A. M.

The meetings will be held at the U. S. National Museum.

The reading of papers will form a prominent feature of the meetings. Associate as well as active members are earnestly requested to contribute, and to notify the secretary before Nov. 12 as to the titles of their communications and the length of time required for their presentation. JOHN H. SAGE, Secretary.

# Game Bag and Gun.

## AN OPEN LETTER.

*To Henry Austin, Esq., of the Suffolk Bar, Boston, Mass:*

DEAR SIR—You may have read the story of the eastern ruler to whom came a farmer with the complaint that a soldier had devoured one of his melons. "Bring him before me," commanded the monarch. "Now cut him open. If the melon is found, restitution shall be made. If it is not found, off goes your head." The melon was found and restitution was made. When I was advised the other day that your book, *American Game and Fish Laws*,* contained pilferings from me, it was a simple matter to secure a copy, open it and determine the truth of the charge. I found the melon.

Portions of your work, I discover, have been stolen bodily and word for word from my own *Book of the Game Laws*.

Instead of giving me any credit for the appropriated material, you have sought to palm it off on the public as the fruit of your own honest investigation, for in your preface you say:

> In preparing this work the author has endeavored to make a brief, but comprehensive digest of the game and fish laws. The material has been derived from the Revised Statutes, Codes, and the latest enactments of the respective States.
>
> Trusting that his investigation may prove acceptable and useful, the author presents the result of his labor.

Since there is nothing to indicate that you went beyond my book for your material, when your preface says that "the material has been derived from the Revised Statutes etc.," you probably mean us to understand, "The material has been derived (some of it with a pair of shears and a pot of paste) from the Revised Statutes, Codes, and the latest enactments of the respective States, as given in the *Book of the Game Laws*, compiled from original sources by Charles B. Reynolds." This slight inaccuracy of statement, Mr. Austin, is deplorable, but less deplorable than other inaccuracies to which I shall call your attention shortly.

I am not now complaining that you used for your digest the laws given by me in the full text. Public statutes are public property, any one has a perfect right to use them as he will. But an esteemed legal friend, in whom I have perfect confidence, advises me that my arrangement of the laws, my abstracts, my digests, belong to me; they are my property or that of those to whom I may sell them: and if Henry Austin surreptitiously appropriates them he takes what is not his.

Doubtless every person who finds himself the victim of a literary poacher, feels in some measure aggrieved. There are circumstances connected with this case which have reasonably or unreasonably aggravated my sense of wrong at your hand. Chief among these is the fact that the particular portions of my *Book of the Game Laws* which you have appropriated with your shears are the very ones which required the most labor for me to prepare.

In 1891, there being no accurate compendium of the game and fish laws (the *Fur Fin, and Feather* was then as now incomplete and unreliable), I determined to provide one. There was a legitimate call for such a work, and I thought that it should be supplied from this office. The labor of compilation promised to be arduous, but it was quite clear that if the book was to be put forth with the FOREST AND STREAM's indorsement there must be assurance of its accuracy; and the only way for me to be sure that the compilation was accurately done was to do it myself. I therefore set about the work of preparing the *Book of the Game Laws*—a task which proved to be laborious, vexatious, tedious and difficult beyond expectation. Begun in May, the work consumed all available time to October. Some hint of this was given in a note in the first issue, as follows:

> ACCURACY AND COMPLETENESS.
>
> The first qualities demanded of a compendium of laws are accuracy and completeness. In the lack of any collection of fish and game laws having these qualities this one was undertaken.
>
> The preparation of the work has involved an examination of more than 800 distinct original and amendatory acts, scattered through multitudinous volumes of the compiled statutes and session laws of the fifty-nine States, Territories and Provinces here represented. The labor of compilation has been largely increased by the often careless and sometimes seemingly contradictory nature of the legislation. It would be presumption to hope that in the hundreds of laws here given no minor errors will be discovered; but it may at least be said that the *Book of the Game Laws* as it appears to-day is the result of a painstaking and conscientious endeavor to furnish an accurate and reliable compendium. Similar care will be exercised to give all future enactments promptly and correctly.

It is perhaps this recollection of the difficulties encountered and the actual drudgery done in the preparation of the *Book of the Game Laws*, which increases my impatience when I find that some of the results of my labor have been stolen by a member of the Suffolk Bar. Perhaps, however, considerations of this nature, based on honest work, may have little significance for one who adopts your speedier and easier mode of compilation. Take, for an example, in the *Book of the Game Laws*, the condensed statement of the Connecticut local fishing laws—upward of a hundred of them, the preparation of which cost me several days' work, besides correspondence with public officials, and with persons familiar with local geography—as Mr. F. D. Bowen, of the New York *Independent* with respect to Woodstock waters. All this you have coolly appropriated, the whole of it, word for word, my order, my language, everything, in short, but the bare enumeration of the sections. This application of the shears you call "investigation." I should give it a shorter designation, an "invidious appellation," to quote an expression of Hume's.

True, were I given to vanity, there might be among other emotions excited by the detection of your wholesale "investigation" from me, a shade of self-adulation that you, a lawyer, should have had such full confidence in my own, a layman's, presentation of the law as to indorse it word for word; and that Henry Austin, of the Suffolk Bar, should have stood sponsor for the law book work of Charles B. Reynolds, a newspaper editor, even to putting forth that work over the authority of his own name. But I am a modest man, and the compliment you have paid makes me feel not an inch taller. I believe, however, that your confidence in the *Book of the Game Laws* was abundantly justified, for, if I do say it, the compilation was an honest piece of work and now in its third year has stood the test of time.

What is to be said of the accuracy of your own publication?

We are so in the way of going to the lawyers for our law, and of accepting as the law what they tell us is the law, that we naturally put confidence in a law book bearing on its title page the authority of legal authorship. The *American Game and Fish Laws* by Henry Austin of the Suffolk Bar would therefore be accepted by the confiding public as an accurate and reliable presentation of the law. Is it?

I have been interested in examining the Nov. 1, 1892, edition of your *American Game and Fish Laws*, not only to see how much of it you originally "investigated" bodily from the *Book of the Game Laws*, but also to determine its inaccuracy by comparing it with the current (October, 1892) issue of my own work, in which the laws are correctly stated as amended to date.

The Nov. 1, 1892, edition of the *American Fish and Game Laws*, by Henry Austin, of the Suffolk Bar, purports to give the laws of 49 of the 51 States and Territories of the United States. (It does not include Canada.)

**33** of the 49 State and Territory laws are given incorrectly.

That is to say, the errors in the book apply to 33 States and Territories.

**123** game and fish seasons are incorrectly stated.

**74** game and fish seasons are omitted altogether.

Uncounted errors relate to provisions other than as to seasons.

The seasons wrongly given or not given at all relate to buffalo, elk, antelope, male deer, female deer, deer, wild turkeys, quail, ruffed grouse (partridge), pinnated grouse (prairie chickens), sharptail grouse, wild geese, wild ducks, brant, snipe, plover, woodcock, rail, rabbits, reed birds, robins, turtle doves, larks, Mongolian pheasants; European pheasants, trout, lake trout, black bass, mullets, red horse, pickerel, pike, suckers.

The uncounted errors additional to the season errors relate to hounding deer, killing game for market, privileges of non-residents, exportation of game, sale of game, snaring game, use of ferrets, use of sink boxes, use of blinds, use of sneak boats, size of fish, fishing in private waters. There are blunders even in the law of your own State of Massachusetts, and blunders by which an unlucky wight trusting to you might find himself in serious trouble.

Manifestly the only security, outside of a fool's paradise, one might feel who should follow your representation as to the fish and game laws would be in the good luck that he was not in one of the 33 States and Territories whose laws are mis-stated, or that the particular law he was acting under your statement of did not happen to be one of the 200 and odd you have given wrongly; or else in the good fortune that the law was practically a dead-letter.

You appear to me, Mr. Austin, to be possessed of an amazing degree of simplicity and of insouciance—for a lawyer—in assuming paternity for such a grotesque collection of errors as is put forth in the current edition of your *American Game and Fish Laws*. But what astonishes me even more, is that apparently it has never occurred to you that any moral responsibility attaches to your happy-go-lucky blundering; or that it makes the least difference in the world whether you, a lawyer, give to the purchaser of this book—who is your client, so to speak—a truthful statement of the law or not. You, an attorney and counsellor at law, advise one man that he may not do a certain thing, when the law itself distinctly permits him to do it; and you, a member of the Suffolk Bar, tell another man that he may do something when the law positively and explicitly declares he may not do it, but shall be punished if he does do it. And this sort of reckless, worthless and dangerous advice you give not once but a hundred times. Take a sample case, one among those in Massachusetts, your own State, where you are practicing law, and where, if any where, you should know the law and give safe legal counsel. With respect to snaring ruffed grouse (partridge) you advise that snaring may be done by land owners "during open season only;" that is to say, from Sept. 15 to Jan. 1. But the law limits the time for snaring to the period "between the first day of October and the first day of January." So here are fifteen days in September in which a well-meaning Massachusetts grouse snarer might get himself into trouble by trusting to the advice of a Tremont street lawyer. And as a member of the Suffolk Bar you tell the Massachusetts farmer's boy that he may trap rabbits from Sept. 1 to March 1, when for full three months of that time the law forbids it. These blunders in your own State law are good enough specimens of the misleading advice you give in thirty-three States and Territories; but they do not begin to be so serious as many others—in New York, for instance. Why, I have just to-day telegraphed to a State Game Protector to come here and arrest a game dealer for having on sale certain game which your book advises he may now sell, but the law says he may not. Truly, the New York game dealer who should follow you in this respect would stand in need of a powerful "pull" unless he should have Delmonico's luck with the District Attorney.

Your work has been taken from the *Book of the Game Laws*, and your work is full of mistakes. Does not this discredit the claimed accuracy of the *Book of the Game Laws*? Not in the least. You abstracted and scissored your material from one of the first editions of the *Book* (for your plagiarism has gone long undetected by me). The material was all right enough when you took it, provided you transferred it accurately. But while revision supplements of the *Book of the Game Laws* have been issued quarterly, its plates corrected, and the work in large share reset, and thus "revised to date," you appear to have revised the successive issues of your work only in part. It is as if you should sell us an 1892 *Farmer's Almanac* with four or five 1891 months in it. Legislatures amend the laws, game and fish seasons change with the years, but Mr. Austin's *American Game and Fish Laws* with pig-headed stupidity sticks to the same old dates.

Now, I trust that there may be no misapprehension on your part nor on the part of others as to my attitude toward your work itself, intrinsically considered as a game-law compendium. There is room in this country for an honest work in that field by you as well as for my own honest work. I believe in game and fish protection, and in facilitating and promoting public information about the laws. I consider it an excellent thing for game protective societies to distribute the laws gratuitously, as is done, and well done, in your own State, by the Massachusetts Game and Fish Protective Association. (Send for a copy; the secretary is Mr. R. O. Harding, 304 Washington street, Boston.) The more game law compilations the better. But let us all make our books honestly. For there are other laws, fully as important as these respecting game and fish, their observance fully as binding. One of them is the rule of *meum et tuum*, colloquially, what's mine is mine, what's yours is yours; and of the distinction between the two. This applies not only to the new silver half-dollar in my pocket, and to the one in yours, but to books that sell for a half-dollar, like my *Book of the Game Laws*, and to the copyrighted material in such books. It applies to our dealings, one with another—but I cannot believe that you, a member of the Massachusetts Bar Association, stand in need of an elementary course of instruction in ethics.

I assure you that the sportsmen of this country require no such teaching. When you shall know them as well as I do, Mr. Austin, you will appreciate that they hate sham and fraud, believe in fair play, give their support to honest endeavor and to work which is in reality just what it professes to be on its face, and reward the man who does original work, not the man who appropriates the original work of another. Under these conditions, without taking into account the 200 and odd abominable errors in your *American Fish and Game Laws*, or the tried and proved accuracy of my own *Book of the Game Laws* and of its younger brother the *Game Laws in Brief*, there is no question in my mind which of these will have the confidence and support of the public—when once the public shall have found out your pilferings. If you have been hugging any fond delusion that you would not be exposed, Mr. Austin, you may as well now abandon the very last shred of that fatuous trust.

CHARLES B. REYNOLDS.

OFFICE OF FOREST AND STREAM, Oct. 24, 1892.

* *American Game and Fish Laws*, Containing a Complete Digest of the Laws in each State, by Henry Austin of the Suffolk Bar. Au hor of "American Farm and Game Laws," "The Liquor Law in the New England States," etc. Boston, 1892.

### To whom it may concern:

The *Book of the Game Laws* published by us is a copyrighted work.

The pamphlet entitled *American Game and Fish Laws* (by Henry Austin of the Suffolk Bar, Boston, 1892), contains certain material which is an infringement of our copyright in the *Book of the Game Laws*, which infringement, we are advised by counsel, is actionable at law.

All persons are hereby warned against selling or offering for sale the infringing work, as we shall take measures to enforce our rights and protect our property.

## SPORT ON COLUMBUS DAY.

COLUMBUS DAY, Friday, Oct. 21., was a holiday in Boston, and, in fact, in most of the New England cities and towns. Not all of the boys followed the crowd or marched in the processions, for a good many of the lovers of the gun took the day in the woods. Some of the devotees of the rod and line also went on the waters. It is close time on trout now, but the catching of the big bass in the Sudbury River, an account of which was in the FOREST AND STREAM last week, started the fishermen anew. Mr. Richard F. Loring, agent for D. K. Reed & Son, Chamber of Commerce, got up a hunting and fishing party among his friends for Columbus Day. The party was made up of E. M. Gillam, of the Boston *Advertiser*, Charles Fairchild, formerly salesman for the Diamond Paste Co., and Mr. Wilson, of Buffalo, N. Y., traveling salesman for the same paste company. They started for Foster's Pond in Wayland, on Thursday evening. They got into camp late at night, but managed to make themselves comfortable, with the single exception that they had neglected to supply their larder with a sufficient quantity of food. It had been suggested that some one of the party purchase the supplies, but in the hurry of leaving business and getting started, no one had really attended to a supply of food, though each one had provided himself with a rather small lunch in the shape of crackers and cheese, etc. The result was that almost every morsel was eaten at breakfast the next morning. But all were enthusiastic and each started out with the determination of doing his part towards a game and fish dinner. Two of the party tried the creek and the pond for pickerel, but found the water almost too low to float a boat in the creek, and very low in the pond, though they had hired a boat for the occasion. They got no fish.

Mr. Loring and Mr. Gillam were out early after birds, and with the help of a good dog, one belonging to Mr. Gillam, Mr. Loring shot three partridge and Mr. Gillam one quail. Then Mr. Loring was bound to try the gray squirrels in the upland woods near at hand, and he succeeded in getting one. On making an inventory of their provisions and game it was decided that if they had some eggs they might do very well toward a dinner, though a chicken or two would help out and save the partridge to take home. They started out in quest of the needed supplies. Farmhouses were scattering and the people generally away from home. They could obtain no chickens and only three eggs, fresh laid Mr. Loring bought them for. These he brought back very carefully. During

the process of cooking there was considerable banter as to who of the party should have the eggs, since three could not go round with four at table. Mr. Loring was anxious that the matter should be decided before the dinner was done, and now the other boys are a little suspicious. The game was cooked to a turn. The eggs were done, and four hungry men gathered around. The first man to take an egg—not Mr. Loring—rapped the shoulder shell with his pocket knife. The sound was ominous. The thing was china. The boys all looked blank, and the other eggs were examined. One was a nest egg and another china. Then a roar of laughter went up such as the old camp at Foster's Pond has seldom heard. The game was all devoured, and the boys started for Boston much pleased with their outing, even if game was not as plenty as they had hoped for.

Mr. Daniel Seaverns, Jr., grain agent for a Western house at the Chamber of Commerce, and Mr. L. W. DePass, assistant secretary of the Chamber of Commerce, took Columbus Day in the woods at West Newton. Mr. DePass has a young Irish setter bred by Mr. E. M. Gillam. This dog they had along, and they are much pleased with the work he did. But game was scarce, and there were several other hunting parties just ahead of them, one they knew, from Boston, and one from Newton.

Dr. Heber Bishop, famous as one of the leaders of the Megantic Club, is out of the woods again, with his usual good luck. This season he has already taken a big moose and a caribou. He will also spend Christmas week in the Megantic woods, after big game. Gossip says that Mr. and Mrs. Westley Jones, of Elm Hill, Roxbury, with Mrs. Frank Baynes and Mr. L. C. Shepard, of New York, have just returned from a pleasant outing in the Adirondacks. The party was quartered in Mr. Jones's camps, Kickabuck Lodge. The weather was fine the most of the time. They had good sport, taking six deer in all. Two of the deer were shot by the ladies, one by Mrs. Haynes, a fine buck, and another by Mrs. Jones, the first one to be taken. Now, this story sounds well, and may be believed by those who don't go a-hunting; but some people, and particularly those acquainted with women and deer hunting in the Adirondacks, would refuse to believe a word of it. That the party mentioned has been at the Adirondacks, is doubtless true.

Mr. W. T. Farley, of Farley, Harvey & Co., with a friend, took Columbus Day in the woods, with shotguns. They went up into the western part of the State, but secured only a few birds. Partridges they pronounce decidedly scarce.

Gardy Eames, the Reading rifle shot, with Charley Davies, was out on Columbus Day, in the Reading woods. They are probably the most expert sportsmen in the country, and they secured several partridges.

E. M. Gillam, Richard Loring and Joe Reaser were out on the 23d in the Reading woods, with dogs and guns. Mr. Reaser is a crack shot, having hunted chickens in the West for many seasons. They secured a partridge apiece and one quail. They found the partridges to be very wild indeed. They will not lie to the dog at all, no matter how carefully the best trained dog brings them to a point. They immediately commence scudding, soon ending in a flight directly away from dog and hunter. But Mr. Gillam has adopted a new method of dealing with these birds. He does not care for hunting them without one or two other hunters with him. He says that it is useless to work his dog, or any other dog, on them, without another hunter or two at hand. A soon as his dog comes to a point he dispatches one of the other hunters to make a long circuit around both dog and bird as quickly as possible. It this way there is a hunter at hand to take the bird as it makes its sudden flight directly away from the dog, and generally too far ahead for the gunner behind the dog to shoot with any sort of effect. In this way the partridges taken on the 23d were secured. Gardy Eames and Charlie Davies are following the same plan.

SPECIAL.

## VELOCITY OF SHOT.

OAKLAND, Bergen County, N. J., Oct. 15.—*Editor Forest and Stream:* "Chelan" in last week's FOREST AND STREAM says the Boulangé chronograph is not really accurate when used for small shot. I have used the Boulangé chronograph, the Field force gauge, paper pads and numerous other arrangements for testing the velocity and penetration of shot, but I have never found anything come near the chronograph, which is for all practical purposes absolutely accurate. For the benefit of some of your readers, who have not seen a chronograph—I believe there are only two of them in this country—I give a very rough description of ours.

Two rods, A and B, are suspended by magnetic currents side by side. A very thin wire is stretched across the muzzle of the gun or across the hammer, as you wish, which, when the gun goes off, is broken either by the shot as it leaves the muzzle of the gun or by the hammer falling.

The current being broken rod A is released, and commences falling. The moment the shot reaches the target rod B falls and releases a knife, which makes a mark on rod A the second the shot reaches the target; you then measure off on rod A the distance it dropped from the moment of shot leaving gun until the knife hit it, and from that you calculate the velocity of the shot. The circuit is broken at the target by the shot forcing back very slightly a movable plate in the center of the target, and no shots are ever recorded for velocity unless the center of the charge is on the movable plate, as outside pellets as a rule give very low velocities; but with good powder, good primers and carefully weighed charges of both powder and shot, not measured, for you cannot measure either powder or shot accurately enough, you will find that in a covered in range you can get marvelously even results, thus, I think, showing that the chronograph is a very accurate instrument. I give some very even consecutive shots taken in some trials here yesterday: 863, 865, 863, 866, 864, 867. These are the average velocity of No. 7 shot feet per second over a distance of 40yds., and are practically absolutely the same. It speaks very highly for the shells used, which were the U. M. C. Co.'s "Smokeless," which are in my mind without doubt the best shell in America and quite equal to Eley & Kynoch's on the other side.

The chronograph shows up the unevenness of bad primers almost as well as any of the cap testing instruments now in use. Mr. Borland, of the E. C. Powder Co., in England, has just made a new cap-testing instrument, which has proved very successful, one of which I hope shortly to have out here, when I may be able to publish some trials on primers, which I know will interest many of the readers of FOREST AND STREAM.

I might mention as rather an interesting fact that if you fire a shot and take the velocity of the shot when your gun is really cold, then fire half a dozen shots in quick succession to warm it up, and then take the velocity of another shot while the gun is warm, you will find that you get a velocity a good deal higher with the hot gun than with the cold one. Who can explain this?

NOEL E. MONEY.

## THE RUFFED GROUSE.

THERE is a soft twilight here among the hemlocks. Even the tinkling of the brook that creeps about the damp, moss-covered stones is hushed, and sounds afar off. Down in this little glen the ferns and mosses spring up, in blissful ignorance of the outside world.

When the winds are abroad in the woods, and the complaining trees are tossing their boughs in mute appeal to the storm king, the ruffed grouse makes himself snug in this quiet retreat, and listens undisturbed to the uproar, repeated to him in murmurs from the hemlocks.

The morning comes with a clear sky, and the rising sun darts his level rays among the trees on the surrounding ridges. Awake with the dawn, the grouse have already gone abroad to seek their food. Should you know of any wild grape vines hereabout, it would be well to look for them there, as they are very fond of this fruit.

The drumming of the ruffed grouse has furnished an interesting topic for discussion among sportsmen, who prove and disprove all sorts of ideas in regard thereto. I have never seen his majesty in the act of drumming, though I have often tried to catch the sly fellow unawares.

It is impossible to satisfactorily express the feelings that possess me, as I listen, on some lovely Indian summer day, to the drums of the grouse.

I have a spot on the mountain side where I frequently rest, and, with never tiring eyes, look out over hill and valley, lake and stream. No nestling village, no farmhouses are to be seen. No handiwork but nature's has left its mark.

Here, with my thinking cap on, I dream away the golden moments, and, even now, though far from the lovely spot, I can see the purple haze resting on the hills, and spreading its gauzy veil over the woods. I hear the roll of the grouse, as it swells, and dies away again with its strange ventriloquial effect. * * *

This is my fairyland! may it long be spared. In hunting ruffed grouse I am at somewhat of a disadvantage as compared with fellow craftsmen. Being short-limbed I cannot cover as much ground as they, without great effort, and, therefore, when ever possible, I "go it alone!" It seems to me, that just as many shots are obtained by a slow walker who moves quietly, as are secured by the more speedy fellows. Besides, I like to take it leisurely in the woods, there is so much to see. One loses half the charm by hustling through them.

To me, every lichen-covered boulder, every sturdy tree, has something to suggest, and I can also escape many spider webs when moving slowly, thereby adding greatly to the comfort of taking my time.

A stately hemlock lies prostrate and mouldering just before me. I mentally take its measure as my eye runs over the noble ruin, once so full of lusty life that quivered to the tips of its spreading boughs, and spoke in whispers to the stars on quiet nights. As I meditate, a dark form glides noiselessly away on the other side the fallen tree. I instinctively bring my gun to shoulder, the grouse (for 'tis he that is endeavoring to steal off unobserved) springs with a roar of wings, that makes the dead twigs rattle about him like a shower, and sets the dry leaves dancing in his wake.

The still air vibrates to my shot, and the echoes fly among the hills, while the subdued light of this forest sanctuary is gray with pungent powder smoke! Only one shot! But it was enough. He lies there still, inert, but glorious even in death. He made the effort of his life, but swift and sure the "leaden hail" like fate overtook him and beat him down.

Surely the ruffed grouse is the feathered king of our forest.

As I stoop to pick him up, I have another rise to my left, and feeling that there are more of these alert woodfolk close by, I make up my mind to attend to business in a proper manner. I confess that my soliloquy on the fallen tree had diverted my attention from the matter in hand, and had it not been for that lucky glance, the stillness would not have been so rudely broken. "Br'er Grouse" would have stolen away quietly, to chuckle over his escape.

With gun at full cock I start again. Now I am aware that the carrying of a gun at full cock is dangerous, but a startled grouse is lively and gets behind a tree so quickly that a fraction of a second will often enable him to escape, hence it is necessary to fire the moment one feels the heel plate on shoulder; it is literally "touch and go," and therefore I carry my gun at full cock and hunt alone in the woods when possible, feeling free from the care of watching the muzzle of a companion's gun, and being able to enjoy the sport to its full extent.

Whirr-rrr! Another bird is up. He whisks round a tall oak, and "slap" goes the whole charge into the trunk behind him. A second grouse rises at the report, and not knowing my exact location crosses toward the right.

This time I get him. Killed cleanly, head over heels he goes, down into a little dell on one side, and there I find him fluttering.

In passing a tall hemlock I notice what appears, at first sight, to be a gnarl or knot on one of the limbs 30ft. from the ground. On closer inspection this knot resolves itself into a grouse. Close in to the trunk he stands, stiff, erect and motionless. Careful! When he leaves that perch, if it be of his own accord, all you will see will be a streak, nothing else. It seems almost a pity to take advantage of him, but * * * *

A short half hour of contemplation from my favorite outlook, and I turn homeward, leaving the grand old woods to their own thoughts. As I pass, that perfume of the forest, which is distilled anew at every twilight, is filling the air with its fragrance.

Let us say with the Germans: "*Auf wiedersehen.*"

WILMOT TOWNSEND.

BAY RIDGE, Long Island, N. Y.

### A Snared Game Haul.

SYRACUSE, N. Y., Oct. 21.—One of the largest bags of partridges ever reported in this section, and probably in the State, was purchased by Andrews Bros., one of the largest grocery firms in the city, last Monday. There were 70 birds in the bunch. They were brought in by one man, and when local sportsmen heard of it they were surprised. The hunter claims he got them near Constantia, on Oneida Lake.

Upon examination it was found that none of the birds had any shot wounds, and the game protector, Harry Jackson, was notified, and confiscated the whole lot and steps were taken to arrest the hunter (?). Andrews Bros. were notified that the law provides a severe penalty for the purchase of snared birds, conviction entailing a fine of $25 for the buying and $25 for every bird. The firm is thus liable to a total fine of $1,755.

The fact that they were ignorant of law does not lessen the liability. The firm having expressed their willingness to assist in bringing the offender to justice may induce the game constable not to press the case heavily. There should be an example made in this case, as there has been too much of this kind of business going on here of late; but since the present protector has been in office he has been very close on the heels of all offenders, both on fish and game, and in the future the fishing and shooting will be much improved, something that Onondaga county has not known for years. Down with the miscreants, is the cry of every true sportsman. D. K.

### Portland Fish and Game Pamphlet.

WE have received copies of the constitution and by-laws of the Portland Game Club, of Portland, Conn., dated Oct. 1, of this year. The pamphlet appears to us of unusual interest because it contains some information of interest to gunners and anglers which is not usually found in publications of this nature. Besides the constitution and by-laws, which are brief, there are printed in condensed form some of the game and fish laws of Connecticut which are in force at the present time, and in addition to these, sections from the Revised Statutes of Connecticut, giving the laws with regard to trespass. Every man who desires to shoot or fish according to law wants to know also what the law is, and the method employed in this pamphlet is certainly a most convenient one for giving him that information. The members of the Portland Game Club are to be congratulated on the wisdom of the editor of this little pamphlet.

### Massachusetts Association.

A MEETING of the Massachusetts Fish and Game Protective Association was held at Young's Hotel, Boston, Thursday evening, Oct. 20, Pres. Geo. W. Wiggin in the chair, and fifty members being present. Messrs. Samuel Brown, Wm. T. Montgomery, and Harry V. Long were elected members of the association. Four applications for membership were presented and referred to the committee, Messrs. Edward A. Samuels, Edward E. Hardy, Ivers W. Adams, Dr. Heber Bishop, Walter C. Prescott, Dr. W. G. Kendall, Charles Stewart, and the President, Treasurer and Secretary were appointed a committee on arranging for the next annual dinner. The next meeting will be held Nov. 10.

RICHARD O. HARDING, Secretary.

### An Electric Sight.

AN interesting experiment is about to be tried by a sportsman in India. In sitting up at night, over a "kill" to shoot tigers the chief difficulty is to draw a bead in the uncertain light. This sportsman has therefore instructed a Birmingham firm to send him out a pair of rifles fitted with Walter Winans's electric sight for night shooting.

This is the first time this sight will be in actual use, but it has already been tried at a target at night, and favorably reported on by a London paper.

### A New-Subscriber Offer.

A *bona fide* **new** subscriber sending us $5 will receive for that sum the FOREST AND STREAM one year (price $4) and a set of Zimmerman's famous "Ducking Scenes" (advertised on another page, price $5)—a $9 value for $5.

For $3 a *bona fide* new subscriber for six months will receive the FOREST AND STREAM during that time and a copy of Dr. Van Fleet's handsome work, "Bird Portraits for the Young" (the price of which is $3).

## ROD AND GUN AND CAMERA.

As a recognition of the important place of amateur photography in its relation to sports of the field and prairie and mountain and forest and stream, the FOREST AND STREAM offers a series of prizes for meritorious work with the camera. The conditions under which these prizes will be given are in brief as here set forth:

There will be ten prizes, as follows: First $25. Second $20 Third $15. Fourth $10. Six of $5 each.

The competition will be open to amateurs only.

The subjects must relate to FOREST AND STREAM'S field—game and fish (alive or dead), shooting and fishing, the camp, campers and camp life, sportsman travel by land or water.

There is no restriction as to the time when the pictures may have been or may be made—whether in 1892 or in previous years.

Pictures will be received up to Dec. 31, of this year.

All work must be original; that is to say, it must not have been submitted in any other competition, nor have been published.

There are no restrictions as to make or style of camera, nor as to size of plate.

A competitor need not be a subscriber of FOREST AND STREAM.

All photographs will be submitted to a committee, shortly to be announced. In making their awards the judges will be instructed to take into consideration the technical merits of the work as a photograph, its artistic qualities; and other things being equal, the unique and difficult nature of the subject.

Photographs must be marked only with initials or a pseudonym for identification. With each photograph should be given name of sender, title of view, locality, date, and name of camera.

The photographs shall be the property of the FOREST AND STREAM. This applies only to the particular prints sent us.

From time to time we shall reproduce by the half-tone process samples of the work submitted, and should the interest in FOREST AND STREAM'S Amateur Photography Collection prove to be what is anticipated, we may ask for an expression of opinion by a vote of all our readers after the manner of the successful and famous "Camp-Fire Flickering Vote." Such popular vote will be quite distinct from the award by the committee.

# Sea and River Fishing.

## CAMPS OF THE KINGFISHERS.*—XIII.

### CARP LAKE, MICHIGAN.

### The Carp Lake Camp.

[*Continued from page 266.*]

THERE'S a heap o' comfort in a camp-fire, and the Colonel is never so well contented as when taking his ease in front of one, and he rarely fails to sit it out, saving enough wood mayhap to kindle the next one.

A few nights after we were awakened about 12 o'clock in our tent near the oaks by some discordant, untuneful noises and howling that sounded a good deal like a newly organized German singing society in full blast, which turned out to be a serenade tendered us by six or seven young fellows from Traverse City who made a camp that afternoon in the edge of the grove above us to fish a little and have a "good time" for a couple of days.

Kelpie and the Colonel turned Hickory out to learn what the trouble was, while the boys in the other tents snored a rasping accompaniment to the inharmonious medley of noises filling the air, utterly oblivious, or indifferent it seemed, to the intended compliment, or it may be they were only "playin' possum" till I had determined the nature of the demonstration, whether hostile or otherwise.

When I got out the howling match was about in its last throes and I waited at the corner of the fly in the dim starlight till it came to an end, which it did presently with a sort of sporzando jerk that must have scared the little robins overhead out of a couple of weeks' growth.

"Good evening, gentlemen"—I hastened to remark in my blandest manner, for I was afraid they would start in and grind out another verse—"to what are we indebted for this enchanting music?"—for which lie I ought to have been kicked into the lake.

One who acted as spokesman proceeded to explain, and wound up by asking me to take a drink with them, at the same time producing a bottle which he said contained beer, and then the others came out from the shadow of the oak, each with a similar bottle in his hand that only needed a corkscrew to open up the festivities. I had a hard time to beg off, but seeing I was firm but respectful in my refusal to "jine," one of them at last said, "Well then, bring out the other fellers that do drink."

This called for another diplomatic prevarication to save the boys from being roused out of bed to help increase the size of the "jag" some of the serenaders were already burdened with, and I told them it was old Sam's birthday (giving his name), and the boys had been celebratin' with persistency and frequent regularity during the evening till they were all fuller'n geese (I hope the boys will forgive me the lie), and it would be next to impossible in their present condition to get them fully enough awake to take another drink, much less to stand up if they succeeded in getting out of the tents. Just there, whether preconcerted or not I never found out, a succession of grunts and spasmodic snorts from the Colonel, and a long drawn, sonorous snore, repeated in regular cadence from the Perfessor's tent below, went a good way toward corroborating the story of the birthday festivities, and pulling me out of a "category," for at one time during the discussion of "to beer or not to beer," the serenaders seemed disposed to be a trifle ugly because they could get none of us to drink with them. At last, however, after a few more hastily constructed lies—white ones—made up to fit the emergency and a promise from me that some of us would come up to their camp next day and get better acquainted, they took their departure in a good humor, smashing a bottle or two of beer on a rock as they went by the cook's fireplace to get rid of some "innard cussedness" as it seemed, and I went back to the tent to find Kelpie and the Colonel wide awake, sober, and glad our midnight visitors had left without inflicting another "selection" on us.

I turned in and was soon asleep, and Kelpie said next morning that, with the snoring to the north of him and the snoring to the south of him, he was some time in making up his mind which was the more disquieting, the snoring match going on between the Colonel and Hickory or the midnight howling match we had been treated to.

Old Sam and I went up to their camp next day and found them to be a clever lot of young fellows who had come out for a couple of days' recreation, and they were having it.

Their camp equipments consisted principally of beer—there were several kegs protected from the sun in the bushes near by—however, there was a big tent, a rude table of boards with some dishes and cooking utensils on it, the simplest pattern of a box-stove of sheet iron, some more beer in bottles, a gun or two, a few cane fishing poles, and some more beer. Then they all had some beer, old Sam "jinin' 'em" in three or four cups full and pronouncing it "a mighty fillin' sort of a beverage, but lackin' in essentials."

One of the party, Mr. Al Petertyl, was an amateur photographer and had his camera along, which reminded us that we would like to have some pictures of our camp.

He kindly agreed to come down and 'take us,' and in the afternoon, about an hour by sun, he got three views, but from some cause they turned out to be nothing but some streaks and blotches on the glass plate. The second morning after he came down again about 10 o'clock and, with the sun at his back, took a snap shot at the camp, which, however, did not produce a very clear cut picture, but old Sam explained it clearly by saying, "He had on a leetle too much focus when he tetched 'er off." It was rather a misfortune that the picture was not better, but we had no cause to complain, as he would take nothing for his trouble, and besides, it was the last plate he had and it was that or nothing.

He gave us the negative as we passed through Traverse City on our way home, and from it we afterward got a lot of copies, one of which was sent to FOREST AND STREAM to finally be transferred to its pages, and if the reader "gits jest the right focus on it" he *may* be able to see the little robins in the oak with their mouths agape "waitin' fur a worm to drap in;" anyhow, he may see the "Perfessor" (No. 5 in the picture) wrastlin' with a snarl in his line and polishing up in his mind some old chestnut to spring on his comrades as a new joke.

The days began to slip by at a quicker pace than usual, it seemed, and we could look ahead and see the end of our vacation not very far away: in fact, old Sam and Charley were to leave us in a few days to be back at their business at a time agreed on before they left home.

The rest of us didn't "let on" much, but we felt that we would miss them more than we cared to say, for two better, kindlier, more unselfish comrades never drove a tent pin or swapped lies around a camp-fire.

One morning, four days after friend Petertyl took his last shot at the camp with his "picter box," they climbed into a spring wagon that had been sent out from Traverse City after them and their baggage, and drove off, after an exchange of hearty hand shakes and good-byes, waving their hats till a turn in the road hid them from view, and we turned back to the camp to sit or wander aimlessly around for half an hour or more, something after the manner of a lot of bees that have been despoiled of their hoard. ("That dandy flag pole I cut" was the last we heard from Old Sam.)

We could hardly persuade ourselves that they were really gone till Kelpie and I walked over to take a look into the vacant tent, ostensibly to see if they had forgotten anything, and then we realized the void they had left in the camp, and what a space the two old Kentuckians had filled in our hearts. Verily, the loss of a tried and true old camp companion is a calamity that depresseth the spirit, and we sat around most of the afternoon, and smoked in a perfunctory, absent-minded sort of way, and said little: even the Perfessor's choicest and stalest "chestnuts" fell flat, and his most caustic witticisms lost their smart, much to his discomposure and our peace of mind.

Toward evening Kelpie and I got restless and took a boat and pulled down and anchored off the birch point to fish awhile, not that we wanted fish to eat, but as Kelpie said, "because it wouldn't look well for the camp to be without fish for breakfast if we took a notion we wanted fish."

We fished till near sundown and went back with some goggle-eyes—we could always catch these—and a couple of bass, besides losing a "whopper" that tangled up in the long grass and went off with the hook in his jaw, due to a faulty place in the line near the gut, but then, who ever heard of a line breaking anywhere else than at a faulty place?

Kelpie and I conferred together and figured it out to our satisfaction that the bass that got away was certainly heavier than the combined weight of both the others, but we didn't think it worth while to mention it at camp lest the "Perfessor" inflict on us some new-fangled version of the time-worn platitude about "the big fish that always gets away."

There was a gap in the circle around the camp-fire that night where the Kentuckians usually sat that seemed to grow wider as the night waned, and the fire burned less brightly, we fancied, because "old Frigid" and "Snakeroot" were not there with their familiar figures outlined in long drawn, grotesque shadows against the adjacent hillside.

It was getting near breaking up time for the night. Talk had died out, and the Colonel sat with legs outstretched, gazing dreamily into the fire, as was his wont when the last two chunks had been "poked" together for the final fitful blaze, puffing an occasional cloud of smoke to keep his pipe alight, and saying nothing—only thinking, and planning mayhap his next winter's campaign in Florida.

Johnny lay stretched on the grass, slanted up hill with head propped up in open palm and elbow resting on the ground, bobbing at the fire with sleepy jerks; the keeper of the fryin' pans, with more experience with stiffened joints from lying on the ground, was snoring on a board a couple of yards from the fire, dreaming doubtless of the trim colored chambermaid with whom he had furiously flirted at the Fountain Point House, and even the "Perfessor" had somehow unaccountably run out of wormy old chestnuts and edgeless jokes with which to entertain us, and sat dozing and nodding on his campstool, with down-hanging chin, happily unconscious of the comfort and rest we were getting out of the fact that he had at last run down.

Kelpie and I had been industriously fighting smoke and taking over an intended foray on the trout of Cedar Run next day, and as our plans were now matured and the fire getting low, we 'roused the sleepers and turned in, leaving the Colonel to his reverie and his pipe, to come when the spirit prompted.

It was after 8 o'clock next morning before Kelpie and I were off in the ironclad, headed straight for the mouth of the bayou, and for a wonder we had no head wind to contend against. For the first time in many days at that hour in the morning the lake was quiet except for a faint ripple on the water, and the pull was hardly good exercise. On reaching the mouth of Cedar Run we found an old wood scow moored to the bank in such a way that there was little of the cedar to be seen from a boat passing along up the bayou, and this was doubtless the reason why Kelpie and Johnny had missed it the day they were looking for it.

We followed the stream around to where Sam and I had run against the log jam the year before, but it was now clear and we kept on up without interruption.

The water was very clear and cold, although the bottom for a quarter of a mile up was soft black mud, changing to sand and gravel where the stream became narrower and the current stronger. The banks were low and marshy—scarcely any banks at all—and grown up with tall grasses and cat-tails and clumps of small low-growing bush that we didn't know the name of, and off to the right, as far as we could see, were hundreds of dead trees, desolate and grim and leafless, that were killed by the backwater when the dam was built across the outlet at Leland a good many years before.

The year before we camped on Uncle Jimmy Nolan's place, a canoe might have been paddled almost anywhere over the swamp, but some planks, or the gates at the head of the sluiceway at the dam, had been removed by the defunct Leland Mining Company, who still owned it—causing a good deal of grumbling from the people up and down the lake and some threats of litigation—and now the water was about 3ft. lower than the usual stage, but still a few feet higher than the original level previous to the building of the dam.

("The bayou," the swamp, the lower end of Cedar run, and a very small and very shallow lake lying just back from the mouth of the Cedar, taken altogether, is a famous resting and feeding place for thousands of wild ducks and geese in the fall of the year as they go south. This for the information of the brethren of the gun.)

Kelpie and I pursued our way up the winding stream, so crooked that the sun was first over one shoulder and then the other, till it became so narrow and shallow that we unshipped the oars, and standing, one in the bow and the other in the stern, used them as poles to push the boat up the now rapid current that in places ran with the swiftness of a mill race.

After awhile we got out of the deadened swamp where there were green trees and bushes on either side and well defined and higher banks, and from there on up the stream was a mass of roots and snags and sunken logs, hard wood saw logs that had refused to float, with barely room in places to work the boat between without deadly peril to the canvas (It would have been a calamity indeed to have been shipwrecked in such a place), and Kelpie was kept busy picking out the channel from his lookout in the bow, and fending the boat off the countless obstructions that infested our way, while I furnished the heft of the motive power at the stern.

In places the water was shallow, with only a couple of inches or so to spare between the canvas and the bottom of the stream; in others the water had scooped out deep places against the bank from a rod to 4 and 5 rods long and 2, 3 and 4ft. deep. At places the stream was from 20 to 30ft. wide, but most of the way it was so narrow that we could not have used the oars in the rowlocks, and everywhere were snags and roots and logs, logs and roots and snags.

Occasionally a trout would flash out from under the bank or a log, and seek a quick hiding further up or down the stream, and then our palms itched to grasp our rods and "do a little inveiglin' jest to satisfy the innard cravins o' natur," as old Sam once said when he started out to "hive a passel o' bluegills."

But we had started out to go to the head of navigation before doing any fishing, and we kept resolutely on, only promising to stop on our way back and have it out with each impertinent trout that "sassed" us as we went by.

At last we came to a dilapidated bridge of rough logs spanning the stream, too low for the boat to pass under, but it didn't need this to tell us we had reached the head of navigation, for above it as far as we could see—and that was but a short distance—was a mat of fallen trees and limbs lying in every conceivable direction that almost hid the water from view. It was plain that this part of Cedar run had never been "logged out."

We secured the boat a couple of rods below the bridge and got out with our rods to look around and get our bearings.

Across the stream a short distance from the bridge was an old deserted logger's cabin, and along the banks for two or three rods in an open space were some skids where the loggers had been at work; a great quantity of decaying, weather-beaten strips of white cedar bark, "skinnings" from the railroad ties that had prevented old Sam and I from ascending the stream the year before.

No sign of life greeted us, not even the familar click of a kingfisher's reel as he wound himself up with a preparatory chatter for a cast in the stream from some neighboring dead limb overlooking the water; however, I had nigh forgotten a few straggling, sluggish deer flies and some half famished skeeters that appeared to have been expecting our arrival, and were 'a-layin' fur us" with their bills ready sharpened to exact a tribute of blood for trespass on their territory.

It was a dreary, lonesome place, made more lonely-looking, if possible, by the deserted cabin and the old bridge, with the sills bare in places, and had it not been for the ceaseless murmur of the stream that found its way with a soft melody through the logs and limbs above the bridge, the dead stillness of the surrounding forest would have been oppressive. We picked a few mou'fuls of red "rozberries" that tempted us at the side of the disused old log road, and sat down on a log near the bridge to get our tackle ready for the expected sport and to rest a few minutes, for the push up the swift, devious current of the last mile had tired us somewhat, although the ironclad drew so little water that it was scarcely more than child's play to handle her.

I strapped on a bait-box of barnyard hackles and crossed over to fish up the stream, leaving Kelpie to try at the bridge where there was a deep hole just below with some sunken logs and snags in it, that promised a good trout or two, but I didn't go 50 yards till I gave up the attempt to fish the stream from that side, as the tangle was so dense that it was like trying to crawl through a hedge, and I could see so little of the water on account of the prostrate trees and limbs—some dead and others with foliage alive and green—through which it found its way, that I could hardly find open space enough wherein to drop the baited hook.

With much sweating and some subdued cussin'—to blaze the way for the next lunatic that might take a notion to fish that side of the stream—I worked my way back and out to the old road near the cabin and crossed back over the bridge to try the other side awhile, for my "Scotch was up." KINGFISHER.

* If the reader will let me down easy for the gaps that have occured in the letters for the past couple of months my conscience will feel less strained, and I will promise "not to do so any more." Other duties, and some unavoidable interruptions have kept me in a "state of mind" and prevented me from finishing the series sooner, which I trust will pass for a valid excuse.—K.

### Jamaica Fisheries.

MR. EDWARD M. EARLE is managing director of a company formed for the development of the fisheries of Jamaica. Readers of FOREST AND STREAM are aware that Jamaica has a wonderful wealth of food and game fish as well as other useful marine animals. Among the objects of the company are to catch, cure and sell fish, to supply the local markets and others outside with fish, mollusks and their products, to plant and cultivate oyster beds, and to establish and protect turtle nurseries. Mr. Earle has labored long and persistently to develop the Jamaica fisheries and he certainly deserves a generous reward and success.

## ANGLING NOTES.

### Trout not Breeding in Confinement.

SALMON and trout, *fontinalis*, when confined in tanks, hatching ponds or breeding pens, breed as regularly and as freely as they do in a wild state, but the trout or saibling in Sunapee Lake, New Hampshire, *Salvelinus alpinus aureolus*, will not breed when confined in tanks at the hatching station. Prof. Quackenbos told me that Fish Commissioner Hodge has kept the *aureolus* in confinement for three years, and that even among spawning brook trout they are perfectly passionless, manifesting no desire whatever to spawn, and that at death the sexual organs are found conspicuously atrophied. They are a lake-spawning fish, spawning on shoals after the manner of the lake trout. *namaycush*, and when taken from the shoals with eggs nearly ripe and placed in the inlet brook the eggs "dry up."

I related this to Herr von dem Borne, and he writes me: "I am not surprised that some of your fish will not breed in confinement. It is the same with our huchen (*Salmo hucho*, a landlocked salmon of the Danube River) and with our asche (*Salmo thymallus*). It is difficult to breed these fish because they will not become ripe in confinement. It is the same with the sterlet, a sturgeon of Russia."

There is nothing new in this, so far as the "asche" (grayling) and sterlet are concerned, but all that he says of the Danube salmon is new to us. I did not know that it was considered a landlocked fish, nor did I know that confinement interfered with its spawning. Comparatively little has been written about the Danube salmon, and it is rather a rare fish in the flesh. In 1890 a fine specimen was sent to the Fly-Fishers' Club, London, by Mr. Theodore Schwann, and it was then believed to be the first sent to Great Britian for preservation, for it was not even represented in the British Museum at that time, and may not be now. Soon after the specimen was sent to the Fly-Fishers', another specimen was secured and preserved by another angling club in London, the name of which I do not recall. I think that each of these specimens weighed twenty odd pounds. When the late Wm. J. Florence made his last visit to Europe he wished to see the Danube salmon, and I gave him a letter of introduction to the Fly-Fishers' Club and to Mr. Marston for this purpose. I have asked Herr von dem Borne for further information about the fish, particularly as to its being landlocked.

### Fishways in the Hudson.

The Glens Falls *Star* of Oct. 14 contains an article with the heading, "Build Fishways: A Debt the State of New York Owes." It reviews what has been done to stock the river with salmon during the past ten years; that fishways have been built that admit the salmon to the river as far up as Fort Edward dam; that when the dam at Fort Edward was taken out last year to be rebuilt the salmon passed that point and were caught at the foot of Baker's Falls at Sandy Hill; that about $45,000 expended in the building of fishways at Fort Edward, Baker's Falls, Glens Falls, Feeder Dam and Palmer's Falls will give the fish the run of the entire river to its headwater streams where the fry have been planted, and concludes: "Determined efforts on the part of our citizens could secure at an expenditure of a few thousand dollars by the State thousands of pounds every year of that king of game and food fishes, the salmon, than which there is nothing more suited to grace a king's table or to line a royal stomach. But in America all are kings, and all have a right to the rare sport and juicy steaks which the salmon alone affords. * * * Therefore, let every one living anywhere near the banks of this noble stream and every one interested in increasing the food supply of the State, and those interested in the fish from the sportsman's point of view, impress it upon the minds of their representatives in the Legislature that their first duty to their constituents is to secure the passage of laws authorizing the construction of these fishways, which will add so much to the natural resources of the State."

This is a matter of importance to the people of this State, but as yet they do not seem to have been awakened to what it means for them in the way of increased food and wealth if the Hudson becomes a self-sustaining salmon stream. The article in the *Star* is the first that has been printed upon the subject of opening the river for the salmon, so far as I know, in the daily newspapers. The writer might have gone further and stated that the building of fishways would open the river to shad as well as salmon. Black bass, pike, pike-perch, and, in fact, all species of fish in the river, pass up the fishways, as has been proven at Mechanicville. I say all, but I should except the shad, because the fishway in the Troy dam has scarcely been in working order since it was built, and shad cannot pass it now. In other streams where similar fishways have been built and kept open the shad have passed through them. The fishway at Troy was planked over last year, as there was not time to fix it before there would be danger of high water, and I presume it is still planked over, as I have heard nothing of its being repaired this season. Possibly the Fish Commissioners are not aware that there is a fishway in the Troy dam, and that it needs to be repaired, and there are fishways above Troy that should be kept open and free from drift, but I am not informed on the subject.

### Books.

One may possess a mania for fishing and yet read something besides books devoted to fish and fishing; but references to fishing in any book that he may read will perhaps impress him more than any portions of it. In reading Ellwanger's "Story of My House," the chapters on the Magicians of the Shelves just hit my fancy. Christopher North is called "Trusty Christopher" by Tennyson, and the author thinks that an installment of his rhapsodies would seriously damage the *Atlantic* or *Scribner's*, although he admits that portions of the Noctes "are marvels of imagination and erudition, and some of his angling conceits are worthy of Norman MacLeod." This reminds me that any angler who cares for books, and this includes all anglers, will find pleasure in reading "The Starling," by Norman MacLeod. But to return to the Magicians of the Shelves. The author thinks it is pleasant to have some authors both in an early and a later edition. "If I desire the notes, the full-page illustrations and an amplified text, I choose the edition of the "Complent Angler" illustrated by Stothard and Inskipp, and annotated by Sir Harris Nicholas." This is where he dulls in his selection: Though this is the Pickering edition of 1836, it has been called a "fine book overdressed. It is Maudlin the Milkmaid, tricked out in a gown of brocade with a mantle of cloth of gold." And it is said that Stothard, fine book-illustrator that he was, found the "Compleat Angler" to lie beyond his beat. Had Marston's one hundredth edition been selected it would have filled the bill completely.

But the author continues: "If I wish to get still nearer to Walton, to hear the birds contending with the echo, to pluck his culverkees and ladysmocks, to smell his primroses and admire the very 'shape and enameled color of his trout it joyed him so to look upon,' I read him in the old spelling and old font of the *fac-simile* reprint of the first edition." There is much truth in this. I once invested a tidy bit of money in one of the early editions of "Walton's Compleat Angler," and I carried it with me everywhere. One night it went up in smoke and fire with my rifles and guns, rods and fishing tackle, in an illumination of the Continental Divide, and I never got another of the early editions. But one day a good friend, a Bishop of one of the Southern States, gave me a copy such as Mr. Ellwanger mentions, Stock's *fac simile* reprint of the first edition, and that serves as well as though it were a *bona fide* first edition and had cost a thousand dollars. I never had a desire to own any book ever printed simply to feel that I owned it. Working copies suit me down to the ground, and in this *fac-simile* reprint one will have everything except the value, and the distinction of being the owner of a first edition, then if it should burn up, get lost or stolen (for one does not permit a first edition of Walton to lie around loose) it could be replaced for one or two dollars, which sum would not buy a small corner of the flyleaf of the edition of 1653.

A. N. CHENEY.

## JACK AND I ON A TRIP TO ISLE ROYAL.

[*Concluded from Page 333.*]

IN a short time the steamer was tied up at the dock, and after breakfast we set foot on the "Queen's domain," and for an hour "did the town" in our best style. Nearly two score of trout fishers, both ladies and gentlemen, were here on their way to the Nipegon country. After securing some beautiful agates as souvenirs, in obedience to the whistle we returned to the boat and started down Thunder Bay, past majestic Thunder Cape and out into the lake headed for Isle Royal. The air was thick with smoke that grew more and more dense as we approached the island and the captain informed us that there had been a forest fire burning on the island for about three weeks. The beautiful scenery, veiled in smoke, was but dimly outlined, and the amateur photographer, of whom there was one on board, lifted his voice in loud lamentation. Onward we went, stopping for a short time at Todd's Harbor, to take some fish on, then passing through Anygdaloid Channel, a long narrow, deep passage between the outlying islands and the mail island. Jack and I began to discuss the subject of our landing place. "Go to Coburn Harbor," said the Captain. "There's good fishing there, and two trout streams empty into the harbor within easy reach of the landing. You can stand right on the dock and catch brook trout." "Yes," said the mate, "you can get all the fish you want right in the channel, and then you've been on the other end of the island and know all about that, so you'd better stop on this end this time." "You'll get all the fish you want at Coburn," said the wheelman. One or two of the boatmen volunteered the same information, so we decided to stop at Coburn Harbor for three days.

McElroy's was the next stopping place, and then Fish Island. This was more beautiful than any place we had seen yet, and we almost decided to get off, but finally adhered to our first choice. We went ashore and the photogropher attempted a picture, but the smoke was too thick. One of the fishermen showed us two brook trout that he had taken from his net that morning. One weighed about 1lb. I should judge, and the other about 2lbs. Had we known that these were the only brook trout we were to see during the trip we should have been loth to leave them. Let me record it right here. The only speckled trout we saw along the North Shore or around the island were two dead ones taken from a net at Fish Island.

The steamer went puffing on, winding about among islands and reefs, doubling points and promontories, poking its bow into all sorts of holes which seemed to lead nowhere. Presently three long blasts of the whistle announced the approach to our stopping place. The steamer passed up a narrow channel between two islands, turned into a still narrower one, and there was the dock, the two fish houses, the boats, and the two small log houses which make up the settlement at Coburn Harbor. The inhabitants were six men, one woman, one old dog and one puppy. All of whom were on the dock to meet the steamer. We went ashore, our dunnage was put off, and, after taking many hundreds of pounds of fish on board, the Dixon went on her way and we proceeded to investigate as to the possibility of getting a boat, finding a good place to camp, where the trout were hiding and other matters of kindred sort. A good boat was at once placed at our disposal, and we could take our choice of a camp place either on the main island or on one of the numerous small islands in the harbor. As for trout, there had been lots of them around the dock, but they were all gone now. Perhaps we might find some up in the creek. But a camp was the first thing to be considered. One of the fishermen took us a few rods down the shore to where a camping spot had been cleared off two years before, but Jack and I both said "No," to that place. It was too close, surrounded by a thickly growing wood, no wind could penetrate to it and neither could the blessed sunshine. Back to the dock we went, placed all of our dunnage into the boat and started on a voyage of discovery, which proved to be very short. We rowed to a small island near by, and as soon as we landed knew we had found the place. "Made on purpose for us," said Jack. The island was about the size of an ordinary garden, with a fringe of trees around two sides and one end, the other open. A little moss-covered patch a few feet from where we landed invited us to pitch our tent there, and in a brief while our canvas house was up, our belongings all stowed away, and we had still an hour before supper time.

"Let's get a trout for supper," said Jack. So we rigged up our tackle and started forth. I had rowed but a few rods when Jack exclaimed, "I've got one!" Sure enough he had, and in a brief while a beautiful silver-sided lake trout lay in the boat. Soon he had another, which he shook loose when near the boat, but we did not care, as all we wanted was enough to eat. We rowed on up to the creek, but could find no speckled trout there, so returned to camp.

While Jack was cleaning the fish I went to get some wood, and made the discovery that the little island was covered with blueberry bushes and the bushes were loaded with ripe berries. While I was cooking the supper Jack picked more than a quart of berries, which, added to our already luxurious bill of fare, made us feel that we were really the pampered red plush sons of luxury while camping that our friends accuse us of being. After supper, as we stood trying to take in our surroundings, Jack said, "I did not know there was a place on earth so pretty as this." It was very beautiful. Directly in front was the channel opening out into the main lake; on the right near at hand was the fishing station, surrounded by the tall and somber forest; at the left was a long, narrow island, and still further to the left other islands almost blocking the mouth of the harbor, while miles out in the lake we could distinguish still other islands great and small.

'Twas an ideal place, and I told Jack so. "Oh!" he said, "if we could only put in a summer here." We took the boat and rowed down the channel and out to the furthest point of the main island, a sheer precipice of rock seventy-five or a hundred feet high, the gray granite beautifully marked with a deep ocherous red color—a savage looking place that must be grand and terrible in time of storm. As we rowed back up the channel, the little island with the white tent perched on it looked so romantic that it seemed to belong to another world. "Camp Jack," I said, "on Corbett Island, Coburn Harbor, Isle Royal, Michigan, U. S. A." Jack protested. "Don't give my ugly name to that beautiful place." But I insisted that it must be so, and so it was and is.

Never was bed more comfortable than that on which we stretched ourselves that night; and as we lay there it seemed that our cup of enjoyment was full and running over, although no speckled trout were ours or likely to be. In the morning I was awakened by heavy thunder, soon followed by pattering rain, which soon became a veritable downpour. I made everything as snug as possible and then set about getting breakfast. Jack has assured me since that I "was an exceedingly picturesque and also a pathetic sight that morning as I boiled potatoes and coffee and fried ham and eggs in the drenching rain. "It would really draw tears from the most hardened and unfeeling to see you, old man," he said. "I really must mingle my tears with the rain." As he lay snug and warm in bed, laughing and chuckling, while he delivered himself of this and more, too. I felt that the rain was the least of my hardships. The shower passed over and we started out exploring and fishing.

What a day we put in. How many miles of that rock-bound coast we rowed along, and tramped and scrambled over, I know not. 'Tis all on "memory's wall" faithfully delineated as no hand, however cunning with the brush, could place it on canvas. Now and then we picked up a "laker." Taken all altogether I do not think two fellows ever enjoyed themselves more in one day. The eastern end of Isle Royal abounds in those peculiar characteristics that makes the shores of Superior so picturesque yet in so many places so stern and forbidding with rocky reef, perpendicular wall, and rifted chasm. That night we slept soundly, to be awakened in the morning by the pealing and crashing thunder as on the previous morning, but the rain was not so hard or long continued, and I did not stir from my warm nest beside Jack, until the rain was over. After breakfast we decided to row to Rock Harbor, eight miles away, to see if we could not find some green stones for which that locality is famed. We put up a lunch and started—when I thought and said, "Why not break camp, get one of the fishermen to carry us over in his boat and take the steamer from there?" Jack exclaimed, "That's just the thing!" So back we went to the fishing station and made our proposition to a fisherman who was mending the sail to his boat. At first he refused to go as the wind was too light, but after quite a lengthened powwow he said he'd go.

Over to Camp Jack we went, took down our tent, packed up and in a short time were on our way to Rock Harbor. We were three hours making the eight miles and the August sun was hot as an August sun can be sometimes, but I enjoyed every minute of that lazy sail, and as for Jack, he just lounged there in the boat too supremely happy even to talk. There is an abandoned lighthouse at Rock Harbor, and the boatman said we could go in there and need not pitch our tent that night. On the boat crawled, with the main island on our right and the outlying chain of islands on our left, on one of which the Algoma came to so disastrous an end a few years ago. Past the deserted works of a copper mine of which nothing remains but a tall smoke-stack and a heap of debris. The lighthouse is now in sight, and in a little while the boat bumps against the old pier now badly decayed. A dog barks and a woman steps to the door of the house. Evidently some one is ahead of us in taking possession. We unloaded our dunnage on the old shaky pier, paid the boatman, and then hunted a camping place. We found one a short distance away and again established ourselves in camp, ate our lunch and were ready for whatever might turn up.

The scenery at Rock Harbor is even finer than Coburn. Mighty rocks are everywhere, and rising high above all the great circular lighthouse with its now blind eye looking o'er lake and harbor, island and reef, but no longer flashing forth light to give the course to vessels and warning of the cruel reefs near by. A picket fence, badly broken and weather-beaten, incloses a small square of ground between the house and the lake and the whole effect is that of some Old World scene rather than this almost uninhabited new. The lady in the house informed us that their party, three ladies and one gentleman, had been there over two months, but would leave in three days for Washington Harbor.

What an afternoon we had as we dug for green stones in the gravelly pockets of the beach, climbed rocky points higher than the trees which grew on the landward side and against whose front the waves were hoarsely moaning. We went over to the fishing station and made arrangements to have our outfit and ourselves taken out to the steamer the next day. Returning to camp under the shadow of the lighthouse we took a trail that led to a high mass of rock, along the top of which we went until we entered a grand avenue leading through a dense fir grove and ending on top of another great cliff, down

the face of which a narrow path zig-zagged nearly to the water, with the rocky wall on one side and a sheer descent to the water on the other. Down we went until turning a sharp angle in the rocky wall we found ourselves in a rocky, fir-enshrouded and fern-carpeted glen, that opened lakeward. "Who'd have thought it!" said Jack. We retraced our steps, tarrying for a while on the bluff nearest camp to try and "take some of the view in," as Jack phrased it. On an island about a mile away we saw tents, and knew that others were enjoying these beauties as well as we. We returned to camp, and while getting supper ready the man from the lighthouse party came over. He said they had caught no fish for a month. Before that they had caught plenty of trout, both lake and brook. But now the lake trout were gone and the creek where the brook trout had been was dry, and the trout gone he knew not where. As he started back he said, "There's going to be a storm; you'd better come into the house." We thanked him, but said we would trust our little tent. It grew dark early. The waves began to dash upon the rocks in a way that boded no good, and as we went to bed the growl of the thunder could be heard continuously and the flare of the lightning showed ragged-edged clouds skurrying across the sky.

"Do you hear the waves?" I asked.

"Yes," Jack replied. "And I do not like the sound. It makes me nervous."

I do not know how long I had been asleep when the storm broke. It was terrific. The very foundations of the island seemed to be shaken. Above, around, out on the lake, the tempest raged while we lay in the tent, which was untouched by the storm save the rain, which came down in torrents. We were grandly sheltered. Every moment the tent was lighted by the blinding glare of the lightning, and we felt the earth shake with the deafening crashes of thunder. "I'm going to take a look outside," I said, and getting up I opened the flap of the tent and peered out. All I saw was wind-tossed trees, rain coming down in regular sheets of water, black waves, foam-capped, the islands in the bay encircled by a white line of breakers, and towering over lake and shore the white lighthouse, and all this shown by the constant flashes of the weird, blue lightning. This was all I saw, but it surpassed anything of the kind I had seen before. I crawled back into bed and we finally went to sleep, to awake and find the sun shining, but the waves running very high. After breakfast we ascended the lighthouse tower, and standing on the platform outside the disused lantern had such a view of lake and island that Jack exclaimed, "It's worth a trip here just to get such a view." I took out my Testament and we read our morning chapter from this vantage point, where we could see so much of God's handiwork. We descended and did nothing but loaf around the whole forenoon. After dinner we regretfully packed up and took our dunnage to the fishing station. Here we found the party whose tents we had seen on the island, who were also going home. They had been camped there a month but had caught no fish, and were exasperated enough when we told them that we had caught plenty of "lakers" in Coburn Harbor only eight miles away. Promptly on time the steamer came up the channel and lay to at the entrance of the harbor and we went off to her. On board we found chaos reigned in cabin and stateroom. Men and women were seated and lying everywhere sick, oh, so sick. It was a very moving sight.

There was a very heavy sea on and some of the passengers were thoroughly frightened. Two gentlemen came to me as soon as I came aboard and asked if there was any place where they could get accommodations at the harbor, as they and the members of their party did not care to continue the trip while so rough. It was a pretty rough sea, and it seemed to get rougher as we went on, passing Chippewa Harbor, Menagerie Light, where the long, cruel reef was a boiling mass of foam, Siskiwit Bay and Fisherman's Home. After leaving this last place, where no stop could me made on account of the storm, it did seem that the steamer would be knocked into pieces by the waves. Now and then a wave came over the bow and dashed clear over the upper cabin. The rolling and pitching was frightful. It was almost impossible to keep a handhold, let alone maintaining a foothold. Jack and I stood on the upper deck amidship for some time watching the waves and the maneuvers of the boat. Into Grace Harbor we passed at length, then through into Washington Harbor, passing the island where Stephens and I had out Stormy Camp a year ago. I pointed the place out to Jack as well as I could in the gathering darkness. At Washington Harbor several people went ashore, absolutely refusing to go further while the storm lasted. One man connected with the Wendigo Mining Co. at Washington Harbor, expressed a most devout thankfulness to get his feet on land again. "What will you do," I asked, "when you are ready to leave the island?" "I'll never leave," he replied, "if I have to go in a boat." Soon after leaving the Harbor I went to our stateroom and to bed, and if the boat stood on bow or rudder or rolled completely over I knew it not, as I did not wake up until the first breakfast bell rang. The sun was shining brightly, the lake calm, and as I looked from the window I saw we were a few miles about Manito. Jack was sleeping like a baby, but I awakened him unceremoniously, and we dressed and went to breakfast. During the forenoon the steamer made several stops to pick up parties of fishermen along the shore, and all had the same story to tell, "No trout." At Beaver Bay the fishermen came on board who had gotten off at Two Islands when we went down. They had coasted along up, fishing all the way and had not caught a fish. Had to buy some off the net-fishermen to get any to eat. The steamer was an hour late in reaching Duluth, and we missed our train, which meant a 24 hours' delay. Jack and I are never at a loss to pass away the time when together, so we rather enjoyed the waiting.

After supper that evening we went down to the end of one of the long docks and sat there watching the small boats and tugs passing and repassing. It grew dark and the red flashlight at the harbor entrance was lighted; other lights appeared here and there. A big lake steamer came in, another, and still another, until five had passed us. "I believe the whole lake fleet is coming in for our benefit," I said to Jack. "It looks like it," he replied. It was a sight, and an evening to be remembered. Off across the bay were the long rows of electric lights in Superior, nearer the stationary lights about the harbor and the many lights on the vessels, behind us, "from the hillside looking down," the many lights of Duluth. Slowly we walked back to our hotel. We went to our room and to bed. As we lay there talking over incidents of the trip Jack said: "'Tis our last night together on this trip." "Yes," I replied, "and what a pleasant trip it has been." "One of the most enjoyable of my life. But we must go to sleep. Good night." "Good night." We did not go to sleep for a long time, however, as some new thought or incident would come to mind we would go to talking again. We were like the guests at the "Wayside Inn," as described by Longfellow:

"And still reluctant to retire,
The friends sat talking by the fire
And watched the smouldering embers burn
To ashes and flash up again
Into momentary glow,
Lingering like themselves when forced to go,
And going when they would remain,
For on the morrow they must turn
Their faces homeward, and the pain
Of parting touched with its unrest
A tender nerve in every heart."

Detroit City, Minn. Myron Cooley.

## A DAY ON THE GASCONADE.

"I'll let you go fishing, papa," said my three year old tot of a girl as we sat in the attic fixing up tackle, in which pleasurable business my little girl is as deeply interested as I am. She knows everything in my outfit by name, and as a fisherman has a record of a half-pound perch, the catching of which was an "episode" to her as "Kingfisher" would say; but her after remark of "poor little fishy" was in the nature of a reaction.

Five hours ride from St. Louis on the 'Frisco road brings one to Arlington on the Gasconade River, as fine a stream as ever wet the angler's line. Clear, cold water, swift rapids, deep pools, and great rocky bluffs on the river's bank are the pleasing things which the angler finds. In fact the scenery on the Gasconade is of the most romantic kind and well worthy a trip for itself by any lover of nature.

It was on this stream that Izaak, Jr., and Jacob—solid names these—took in a day's outing, and took out some fine fish. Early morning fishing on the Gasconade is of no account, so we did not embark on our boat for the trip down the river until the sun was over an hour high and all fogs had dissipated. Jacob took the oars, for he said he liked to row down stream for the exercise it gave him. The morning was clear and cool, and the scenery charming as we sped down with the swift current. A mud hen passed us going down the river. "Look at that loon," said Jacob. "Loon indeed," replied Izaak, "that is nothing but a mud hen: whoever heard of a loon in this section of the country." But Jacob stuck to the loon theory, and no doubt told his children on his return of the immense bird which actually flew faster than he could row the boat down stream.

When one has no gun what things he can see. Right over us, clearly outlined against the deep blue of the morning sky, sails a huge hawk; a little later a flock of teal ducks rushes swiftly by; out of that grass by the bank rises a couple of wood ducks; as we round the point a blue heron sees us and makes frantic efforts to get up high out of reach. All these events are hugely enjoyable to one shut up long in the city, and in fact we wanted no noise of gun to destroy the calm which pervaded everything.

By this time we had reached a place where we concluded to try our luck and anchored our boats near a point, around which poured a stiff deep current. Izaac first got his line into the water and Jacob soon followed. He said, "We will stay here fifteen minutes, and if no bites, move on." Agreed. Izaak got the first blood, a little bass about 3in. long, whereat Jacob grinned, and wanted to know where I got that big minnow. But I answered not, for there was nothing to answer. Our fifteen minutes ran into twenty, when we concluded to try another place about a mile below.

Down we went, and the spot did look likely. A pile of drift extending into deep water; a swift current and some eddies made up the place. We anchored close to the drift and again began operations. Owing to the rocks and logs at the bottom we had to use floats, which the current would carry down a hundred feet or more if we desired. While watching my float go down stream, I heard Jacob say something and turning my head saw him yank his rod, and by the way it bent I knew he had at least a pounder on his hook. I watched to see him reel in and play his fish, when, shades of Izaak, Sr., must I say it, he threw his rod back on his shoulder, grabbed the line with his hands and began hauling in hand over hand as thought his life depended on it. I was so astonished I could not speak for a whole minute, but then said:

"What in thunder are you doing?"

"Why that is the way I always pull 'em in," said Jacob, and he continued hauling until a jack salmon, or pike-perch, was landed in the boat.

Then Izaak spoke his piece. "That's what you call angling, is it? To drag a fish in like pulling a log up an incline. What in blazes have you got that $7.50 fine quadruple reel for, and that silk line and lancewood rod? Why don't you go out into the woods and cut a pole, take a chalk line, tie a hook, and then your method might be in keeping. Now the next fish you hook you reel him in like a civilized angler or there will be trouble."

Having thus delivered myself I felt better and resumed work. But a minute later Jacob had another bite, and actually reeled the fish so near the boat that he could see him. I was ready with my landing net, but the grabbing instinct was too strong, and again the line was taken and another jack salmon dragged ignominiously into the boat. "I did not want to lose him," pleaded Jacob. "But that is just the way to lose them," I replied. "You try that trick on black bass and you will lose more than you get in." "That's so," he answered, "I always lose more than I save." While thus conversing our lines were again put to work, and while Izaak may know more about fishing, the luck was with Jacob, for he soon has another fish on his hook, which he actually reeled in, and allowed to be lifted with the landing net. It was a fine 2lb. Jack salmon by the scales.

Izaak, Jr., had also made some catches, but the fish ran small, not over half a pound, and most of them were returned to the water. Their being a lull in the biting we tried another place but without much success, and after an hour's absence we returned to the favorite location, and then occurred the event of the day. Jacob had floated out about 75ft. of line when he had a strike and hooked his fish, which he said felt "like a whale," and sure enough it was a big one, judging from the way the rod bent. Jacob stood up to handle the rod, and Izaak did the bossing. "Don't be in a hurry, now; play him and tire him out. Don't pull him to the surface or he will break loose: let him stay down. Swing your rod out; keep him away from the drift pile. Look out there, he is going under the boat. That is right: let him run up and down, that will tire him out." In the meanwhile the fish was reeled near to the boat, and near enough to the surface of the water to show that it was a very large black bass: "a 5-pounder at least," said the holder of the rod, who became greatly excited and tried his old tactics of lifting the fish out by main strength. "Stop that!" I yelled; "play him till he is tired and then reel him up to the boat, and I will net him." "All right, I will do as you say," and thus the fun went on till the bass began to wabble, and coming near the boat I slipped the net under him and he was safe. That five minutes was a revelation to Jacob, who realized what real angling was, and as he sat down in a state of exhaustion and exultation he exclaimed: "Whew, but that was lots of fun, wasn't it?" The bass weighed 3lbs. and was a beautifully marked specimen. Then came the irreverent remark, "Say, Ike, why don't you catch some fish?" "Oh, I have more fun coaching you," and verily it was true, for Jacob caught all the big fish. He hooked another large one, so large that he broke his rod, which, by the way, contained one joint of cross-grained wood, a crime which ought to send the maker to the penitentiary.

But I have given enough of the events of our trip to show how successful was the day spent on the Gasconade. Jacob and Izaak are going again, and if he does not fish like a civilized angler, I see but one way to settle the matter, and that will be to throw him overboard; but I have hopes for him as he has promised to do the square thing. Now if he would read Forest and Stream regularly he would develop into a first-class angler, for he has the stuff in him for the transformation. Having started him on the right road however, I feel the joy of a missionary who makes a new convert. Izaak, Jr.

St. Louis, Mo.

## SOME PENNSYLVANIA SUGGESTIONS.

Mr. John W. Hague, of Pittsburgh, Pa., has sent us the following extracts from the Pittsburgh *Post*, setting forth his views as to needed game and fish legislation:

When the State Legislature convenes next January the crack fisherman of Pittsburgh and vicinity will send representatives to Harrisburg with copies of a new bill they want entered among the laws of the commonwealth. There is much dissatisfaction now on account of the many loose places in the present fish laws. The local men want the statutes changed to eliminate these points. They want the wardens' salaries raised so that each can devote his time to prosecuting violators of the law; they want out-line fishing free to all, and the heaviest of fines levied on those who explode dynamite in the rivers, and those who run alkali and sawdust into the streams. They will also recommend that the trout catching season be extended from April 1 to August 1, instead of April 15 to July 15.

In this connection Fish Warden John W. Hague, the attorney, gave a *Post* man some interesting information. He favors the proposed changes in the laws, and in fact it is through his efforts that the plan was first mentioned. He is well informed on everything connected with fishing, and suggestions from him always receive the most respectful attention from the sportsman. In this interesting talk Mr. Hague said: "The fishermen have been considering several plans to protect the fisheries, and they think the best possible way to go about it is to take it to the Legislature. They are now considering a bill which will be submitted to every sportsman for his approval and suggestions, and then the combined influence of the club will be used to pass it. There are several important things contemplated, but they are not settled upon yet.

"One thing is this: I do not think it would be amiss to permit out-line fishing in July, August and September of each year, and possibly during October. During the warm weather the fish will not bite in daytime, and if lines could be stretched across the stream at night, fish could be caught in good numbers that wouldn't bite under other circumstances. For instance, perch are seldom caught on a line, and their time for biting is at night. Catfish are also taken by outlines better than by hook. Another reason is that men who would scorn to use a seine or any other illegal means would delight in using an out-line. It would make these men part protectors, as they would help the commissioners and wardens to successfully prosecute the law violators.

"My worst trouble is to detect those who explode dynamite in the water and slaughter all kinds of fish. Only the common species come to the top. The black bass and salmon go to the bottom and float away, so they do no good to the shooters. The spawn of the year is also killed. To provide against this I desire to see the law so changed as to forbid the explosion of dynamite in any stream in the State and to provide a very heavy fine for it.

"I would also like to see the law changed to permit angling with rod and line held in the hands all the year round, as I believe it would be the means of making every angler a fish protector. If he did not himself cause an illegal fisher's arrest, he would at least furnish some information to the nearest warden. And there is another thing. I want prohibited the putting into streams of alkali, acid, sawdust, garbage and all such stuff we know is destructive to fish life. I am constantly in receipt of letters telling me that sawdust is destroying such and such a trout stream, and that steel works are running their acid into the river, and that oil wells run their salt water there, too. Now, while I believe they tell the truth, I want to know who writes to me, and as they are mostly anonymous, I haven't any idea. If they would tell me their names I would not use them in prosecuting. I only want to know who they are. The practice of putting sawdust in trout streams is especially harmful.

"There ought to be a complete separation of the fish and game laws, and acts passed governing each one. Separate penalties should be imposed. The trout law might well be extended to be in force from April 1 to Aug. 1, instead of April 15 to July 15. I don't know that

the time has come yet for us to allow fishing on Sunday. It is forbidden now. There are a great many fishermen, though, who are clamoring for it. It is also unlawful to spear or shoot fish on Sunday. Most people don't know this, nor do they know that there is a fine of $100 for it. Regarding this, however, I don't think any action will be taken at this time.

"If there is one place where the laws need revision more than another it is in that part which relates to the duties, powers and compensation of a fish warden. The duties are now too onerous, the powers too greatly restricted and the compensation ridiculously small. The pay a warden gets does not nearly pay him for his time. He should receive such remuneration as would enable him to devote his time to his office. Now, unless he is a sportsman himself he can't do a thing. The anglers themselves do not do much, and it is hard on a warden who is trying to work for their interest to get no encouragement. Some of them are interested and are glad of the benefits they derive from the fishery protection. For this the warden gets mighty little. His source of income is in prosecution. If he succeeds in convicting a man of seining he gets half of the $100 fine and half of the other fines. I haven't collected a $100 fine yet. The usual thing to do is to take the seine and scare the owner half to death, and put him under obligations to give you pointers hereafter. The wardens are better looked after in Ohio. There a warden gets $200 or 300 a year from a county, and if he has from two to four counties in his district he can afford to devote his time to it, and the fisheries of Ohio show it, too. We have every bit as good here, but it must be taken care of. There should be more wardens appointed also.

"And it may be of interest to my fisher friends also," continued Mr. Hague, "to say that the United States Fish Commission has discovered a new food fish in the ocean. They have received a few hundred specimens and will try to cultivate them. If they succeed, I think we can have some of them in Pennsylvania, at least in the streams that run into salt water."

## *THE BRITISH ANGLER'S LEXICON.

MR. NIVEN has undertaken, out of his ripe experience in all branches of angling, to prepare a "condensed reference to all that relates to fish and fishing, so that the tyro, for whose especial benefit it is mainly designed, may easily gain practical information on any subject." The "Lexicon" is not intended to supersede the angler's books, but rather to facilitate their use. The author has succeeded admirably in his object, and has presented a highly useful and convenient work for the expert as well as the unskillful angler. With the exception of the illustrations, which are not uniformly up to the modern standard of excellence, we commend the book, not only to the British angler but also to his American cousin.

The arrangement of the articles is alphabetical, and they are as concise as possible with due regard to clearness. Whenever the subject is too extensive to be treated in full, the reader is referred to standard writers for additional details. The account of the American black bass, for example, closes with a reference to the Bass Supplement of FOREST AND STREAM.

The method of bronzing ferrules is thus described: "When the brass ferrules of a rod get bright and have lost their bronze appearance, they can be recolored by applying the following mixture: One ounce oxide of iron (rust) and one ounce arsenic, mixed in half-pint muriatic acid. Cleanse the brass from grease or dirt by washing it in soda and water, very hot. Wipe dry and hold before a fire until the brass is well warmed: then apply a little of the above mixture with a feather or cloth wrapped round a stick, or a brush. When the desired color is obtained rub with oil, which stops the process. The ferrules may then be lacquered or varnished."

For carp fishing Mr. Niven recommends a well scoured worm, baited upon a No. 5 or 6 hook of the Kendal scale. The bait is to be kept on the bottom. "It is usual to ground-bait the place where carp are to be angled for, doing this with broken worms, boiled wheat, rice or peas."

The British charr, which is very nearly related to the golden trout of New England lakes, does not readily take a fly; it has been caught with a minnow by spinning slowly. Its wholesale slaughter by netting during the spawning season has caused this beautiful trout to become scarce, and spearing upon its spawning beds has produced the same effect upon its relative in New England.

Daping, dipping or dobbing is the term applied to fishing with natural insects, usually a bluebottle fly, a green drake, a moth or a beetle, wafted by the wind over the rising fish or the supposed location of a fish. "Sniggling" and "clod fishing" are methods of catching eels, the latter being known in the United States as "bobbing."

The articles on feathers and fishing-rods contain much useful information in concise form, and the same thing is true of the treatment of many other leading topics. For preventing the ravages of moths among feathers camphor is praised, and scraps of Russia leather are said to answer the same purpose.

A French polish for finishing off rods is made as follows: One pint of methylated spirits of wine; ½oz. gum copal; ½oz. gum arabic; 1oz. shellac. Place the spirits and the gums in a vessel closely corked, put near a warm stove and shake frequently: in a few days all will be dissolved, when it should be strained through a piece of muslin and kept well corked.

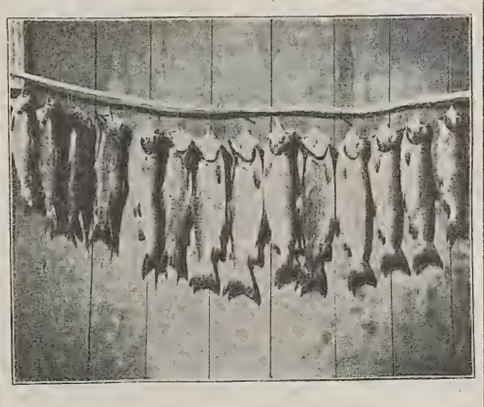
Gimp can be dyed a dark color in the following manner: Cleanse the brass gimp thoroughly: then brush it over with the following solution, which should be boiling: Distilled water, 100 parts, by weight; caustic soda, 12 parts; neutral chloride of platinum, 1 part. Then wash, dry and varnish. The color given is something like oxidized silver, and is a very desirable one.

The grayling, according to Mr. Niven, are caught chiefly by the artificial fly, but are fond of worms and maggots, and are often fished for with an artificial grasshopper. The flies used are similar to those employed for the brown trout, but slightly brighter in appearance.

In the description of silkworm gut is introduced an account by Mr. Samuel Allcock of its preparation in Spain. The notes on hooks, knots and lines are practical and to the point. The Loch Leven trout, a handsome black-spotted species now pretty well established in the United States, is fished for in Scotland successfully with the following flies: Teal, woodcock, bloe, white-tip and mallard wings, with red, yellow, green, claret, and black bodies, tinseled; also Zulus, Sam Slicks and March browns. Many are taken also by trolling with the artificial minnow.

For carrying the May flies a good form of box is illustrated. A somewhat detailed guide is given for Norway fishing; this contains all the items needed for the information of the angler on topics of importance.

The article on pisciculture is short and might be greatly improved; the "Levingston Stern" referred to is our Livingston Stone, superintendent of the California stations of the U. S. Fish Commission.



The directions for dressing flies are full and very clear, and the methods of staining feathers and woods are well set forth. The chapters on trout, trout fishing and trout flies are among the best of the Lexicon. Mr. Nevin says "there are perhaps more trout killed over the country with the March-brown artificial fly than with any other."

On the last page the author mentions a novel mode of getting worms: "Drive a spade into the ground, and using the shaft as a lever, rock backward and forward, and in a minute or so all the worms within two yards of the spade will be seen emerging from the soil, hastening to escape the unusual disturbance. They can be picked up clean and bright, superior in appearance to what they would be if dug out in the usual manner."

*The British Angler's Lexicon. By Richard Niven. Illustrated. Published by W. J. Cummins, North of England Works, Bishop Auckland. London: Sampson Low, Marston, Searle & Rivington (Limited). 1892.

## FISHING ON THE METABETCHOUAN.

THE Metabetchouan is a small river in the Province of Quebec running into Lake St. John from the south. About seven miles from the mouth of the river are the falls of the Metabetchouan, very wild and beautiful; just at the foot of the falls the river turns abruptly to the

OUANANICHE FROM THE METABETCHOUAN.
Amateur photo by Dr. C. E. Fritts.

right, and the cañon broadens out to the width of 250ft. In this broader part of the cañon lies a small island, 50ft. wide by 150ft. long, and a short distance below the lowest end of the island the river breaks into rough, rapid water, falling 6 or 8ft. in the next 150. The falls, because of the turn in the river, cannot be seen from the island, but its roar is continuously heard, and the spray rising from it to the sunlight curtains the upper end of the cañon with a bright and fleecy cloud, ever changing in its prismatic hues. The walls of the cañon are sheer and high, and for the most part naked rock.

This is the Third Pool of the Metabetchouan, and in the proper season abounds with that best of all game fish, the ouananiche.

Between the lake and the falls there are three pools, of which the third is the largest and best; and the fishing

TAKING A OUANANICHE IN THE METABETCHOUAN.
Amateur photo by Dr. C. E. Fritts.

is practically confined to these three pools, except for a few days in May when the fish rise eagerly to the fly in and about the mouth of the river.

A bright morning in August last found Dr. W., Dr. F. and myself, with Maurice, most faithful and honest of guides, at the third pool. Dr. F. and I had taken a day with the ouananiche in this same pool last year, but W. was new to the place and to the fish, although he had long been a tireless and successful fisherman for trout and bass in other waters.

As soon as the sun was shining on the pool we began casting; I from the lower end of the island, F. midway up, and W. from the upper end. At the second or third cast I had a rise and struck a fair-sized fish. Two or three wild leaps and rushes and he is gone, lost through too great eagerness to see him in the net: and it is a good long hour before I raise another.

In a short time a shout from W. announces that he is engaged in his first tussle with an ouananiche. We at once drop our rods and run to watch the fight. The fish is large and strong, and throws himself out of the water half a dozen times. He leaps and runs and sulks in a way to delight us onlookers, and gives such an entertainment in aquatic gymnastics as only a surprised and disappointed ouananiche can. But W. is cool and careful, and in twenty minutes has the satisfaction of seeing safely in the landing net his first ouananiche, a fish that on the scales weighs 5lbs. 14oz., and declares himself well paid for his trip by the taking of this single fish.

After congratulating our lucky friend in the usual way we again begin our casting, and in a few minutes F. strikes a fine fish and loses him; then W. fastens to his second and lands him.

So it goes on until we stop at about 4 o'clock with nineteen beautiful fish, averaging 5lbs. in weight, and with the honors divided as evenly as possible between the three rods.

F. had varied his pleasure during the day by attempting to catch with his Kodak a leaping fish in air. The inclosed photograph shows his nearest approach to success. Had he been half a second quicker he would have had the splendid leap of a 6lbs. ouananiche: as it is he has a splash and a hole in the water.

The other picture sent shows fifteen of our catch; the other four had already gone the way all good fish should go, and had added another element to the contentment and satisfaction we all felt with our lot.

This was a single day of a most delightful and successful trip. Its main features were repeated on other days, yet this, like all other fishing, is uncertain. I saw numerous parties come and go without killing a fish. On one of our best days we found on reaching this pool the bank on either side occupied by a fisherman and his guide. We, of course, took to the island. From the frequent calls from one shore to the other we soon determined that we had as neighbors two new medical men. As the fishing went on we made frequent captures, but the strange doctors caught nothing. This was more than they could bear gracefully, so they came over to interview us, and to find out, if possible, the reason of their non-success. After a long conversation with them W. announced to me privately, "That it was no wonder they couldn't catch fish, that they were a couple of homœopaths from Boston."

Not being a member of the medical profession, and not hailing from Boston, I cannot say whether or not there is anything in the training of a homœopath from that locality that prevents his being a good fisherman. I simply record the fact that they didn't get any ouananiche. It need not be added that my friend W. is an allopath.

What did we do with our fish after getting them? I will tell you what we did with some of them. Maurice killed and cleaned them as soon as taken, he washed and thoroughly dried them and made a deep cut the length of the fish on each side of the backbone: in this cut he rubbed pepper and salt. He then carefully wrapped each fish in freshly-gathered birch bark and hid it for an hour and a quarter in the hot ashes of our campfire. Cooked in this way and served on a log in the bright sunlight and crisp, sweet air of the Canadian woods, a five-pound fish to each person, he is a revelation of unexpected pleasure.

Standing over the fragments of such a feast, our unanimous verdict was that the man and the fish were well met; that the ouananiche is the most delicious of fish and Maurice the best of cooks. D.

HUDSON, N. Y.

## FOX LAKE, ILLINOIS, FISHING.

*Editor Forest and Stream:*

Your favor of Sept. 10 duly received, but your letter was misplaced and has just come to light. Your doubtful correspondent is partially right. The largest catch we (my wife and I) made in one day was 154 silver bass, weighing 115lbs.; the day following this catch we caught 147 silver bass, weighing 104lbs.; on both of these days we signalled the boats and fishing parties around us to come as close to us as possible so every one would get fish, but for some reason or other the other fishing parties got but very few fish. The catch on both occasions was made in about the same spot, near the center of Fox Lake, in a direct line between the Lippencott Hotel and Howard House. Our fishing hours were from 9 o'clock A. M. until 12 o'clock noon on both days. We had very good luck all summer catching black bass, pickerel, wall-eyed pike, and once in a while we would get a large-size garfish. But the game fish at Fox Lake are pretty well educated, and it requires considerable skill and work to get them. While we were at the lake a report reached us from the Howard House (we were stopping at the Lippencott Hotel) that one of their guests had landed seven black bass in four casts, having three hooks on his line; the Howard House people all said it was so, so of course we had to believe it. W. E. GOODMAN.

SOUTH EVANSTON, Ill.

### Spawning of Striped Bass.

SAVANNAH, Ga., Oct. 15.—*Editor Forest and Stream:* I notice in your issue of Oct. 13 an inquiry about the spawning of the striped bass. They spawn on every stream on the Atlantic coast, from the Capes of Florida to the coast of Labrador, in brackish water always, I think. Their habit is the same as that of the salmon, going to the utmost limit of the stream, sometimes in places they can reach only after a heavy rain. The effort is to reach the most inaccessible spot, where their spawn will not be disturbed by their enemies. I am spending my summer on an arm of the sea, and the water is brackish about three miles above my home. Heretofore the young fry have been caught in the spring, in March and April, and the parent fish in the winter. Now, within a year or two a canal has been cut connecting this salt river with a stream running into the Savannah River, and the fish have disappeared from their old haunts. I am satisfied they will be found spawning at the highest point accessible through the canal.

Not far from Waynesboro, I drove over a road through a stream not deep enough to go over a horse's hoof where striped bass of 40 and 50lbs. go when it rains, and the neighbors knock them in the head, in the spring as they pass over the road to get into a morass to spawn, their fins showing above the muddy water. They come from a branch of the Great Ogeechee River, and push up into

this morass, into which and from which they can only enter and leave in heavy rains. I say their habits are like the salmon, and I believe they would ascend any distance, as salmon do. In India they have been seen 7,000ft. above the sea, still ascending the river, and in tributaries of the Columbia I know of their being seen in great quantities, 8,500ft., and still pushing up.

WM. NEYLE HABERSHAM.

## CHICAGO AND THE WEST.

[*By a Staff Correspondent.*]

CHICAGO, Ill., Oct. 23.—Mr. Jay Beebe, of Toledo, O., writes me some more about bait-casting lines, as follows:

"Let me thank you for the favor of the 7th inst. and its inclosures. Herewith I send you cuttings from both the reel and the leader end of the casting line I have been using all the fall, which means about five or six days of actual fishing. This line is retailed by local dealers here at two cents a yard, and by comparing the two pieces you can judge of the relative wear. The slip with the tag attached is handed me by Mr. Gunckel (of the 'Sunset Club') and is taken from a line sent him the other day by a friend now in Germany. I have not tested it for strength, but in appearance it seems much like the desired line mentioned in my note in this week's FOREST AND STREAM. (By the way, it will doubtless occur to you, should you take the trouble to read the note in question, that what I wrote was 'a cable-laid line,' and not a cable, as the irrelevant comma made me say.)

"If you think the secret you mention is likely to disturb your peace of mind, you might forward it to me at any time under a special delivery stamp."

The line that Jay Beebe incloses is familiar to me, but I do not wish to name it for fear the firm might think I was injuring their goods. We tried this line among the others this summer. It casts well, and is a well-meant line, but it rotted very quickly, we thought. It has the further quality of being very hard-braided, so that it cuts itself at the leader-knot very easily. By trebling the strand we helped this out. On a straight tie, this line will cut itself at the knot (our specimens did) on next to no strain at all. This line we have discarded.

I must thank Mr. Gunckel also for the beautiful little line of German make which he sends me. It is very strong, and would be good to tie up a dachshund with, but I don't believe it would work on a casting reel at all, for though fine and strong, it is waterproofed and quite stiff. What has a dachshund to do with bass fishing? I am surprised at Mr. Gunckel, I am really.

### That Kekoskee Story.

Mr. George Stanton, Jr., of the Grand Rapids & Indian Railroad, came clear up into my office the other day, though he had never met me before, to "congratulate" me on that Kekoskee fish story, and I had the hardest work in the world to convince him that that wasn't my story at all, but just simply a historical account of events that actually happened. I get all sorts of letters about that story, and many of them grieve me. And yet the story is so incontestably true. The other day I was riding on a railway train up in Wisconsin and a friend introduced to me Judge Lamoreux, late of Mayville, now of the circuit bench, once of the State Legislature, and one of the most prominent men of the State. "I can testify to the facts of that story," said Judge Lamoreux, "out of any personal knowledge. The sleds came there after bullheads from a distance of fifty miles. If I were on the bench and evidence such as you cite were brought before me I could not legally decide the story to be anything but true and the allegations fully proven. Yes, sir, you have made out a good case, and one which agrees with the facts."

Now what do the skeptics think of that? Moreover, on that very same train there was Mr. Geo. Kurtz, an old citizen of Mayville, who overheard us talking. He broke in, very much excited, and was disgusted almost to anger when he heard that any one could doubt the Kekoskee fish story for one moment of time. Proof? Well, I'd like to know how much proof a fish story ought to have if this one hasn't got enough to support it. It's true, that's what it is, every word of it.

### I.—The Preparation.

COLUMBUS opened the gate at the front yard of the palace and stepped briskly around through the marigolds to the back door, as was his custom in making such informal calls on the family. Leaning his map up against the palace, he rapped on the door and hummed a gay air while he waited for an answer. Columbus did not get gay himself, but it was October, and the air was gay. Presently the girl came to the door.

"Mornin'," said Columbus. "How're they comin' this mornin'? Is the Queen in?"

"I'll go see," said the girl, with a bright smile. They all liked Columbus.

"Why, good mornin', Columbus," said Queen Isabel, as she came in from the front part of the house. "You must excuse my looks, I've just been tidying up the front parlor a bit. Mary, I want you to always dust off a chair for Columbus and have him set down."

"Good mornin', Belle," said Columbus, in his off-hand way. "Mighty nice weather we're havin', ain't it?"

"Ain't it, though? I was just tellin' Ferd this mornin' that I'd like to go out buggy ridin' this afternoon for a while; but law, Ferd's so took up with this Turkey business, you know, that he don't seem to take no interest in nothin' else at all."

"You don't say," said Columbus, "gettin' ready for Thanksgivin', I s'pose, is he? I thought mebbe he'd like to go out fishin' with me this mornin'."

"Oh, Ferd won't go nowhere. He don't think of nothin' but business. I tell him he'd ought to get out oftener, but he won't go."

"Well said!" said Columbus; "I wish my wife was like you. It's just the other way over to our house. My wife says I don't care for nothin' but fishin', and she's always at me to stay home and tend to business."

"Pshaw now! And how is Mrs. Columbus these days?"

"Oh, she's well. She's healthy and active, and so's to be about," said Columbus, sighing. "I don't see no sense in cleanin' house twict a year, do you? I sort of thought I'd go out fishin' to day. They're bitin' like the dickens over in the Bay of Biscay."

"Do tell! You always do know where the good fishin' is Columbus!"

"Yep. Find it out in FOREST AND STREAM."

"Law me!"

"Yep. Say!"

"Uh?"

"You don't think Ferd'll go 'long, don't you?"

"No, I know he won't, not till he's licked the Moors."

"That's so, them Moors is a bad lot. I've been missin' chickens myself. But say, if Ferd won't go, do you s'pose he'd mind lettin' me take his fish-pole?"

"Why, I guess he wouldn't mind. It's out there on the wood shed."

"There's a hook and line on it, ain't there?"

"Yes, I believe so."

"Bob?"

"Oh yes.

"Say, does Ferd keep the minny-pail out in the shed where he used to?"

"Why, I believe he does; you can just take it along."

"Thanks, I believe I will, if you don't mind. But you see, the worst of it is—"

"Yes!"

"I havn't got no boat, you see. I've been goin' to get a boat, but somehow I never did."

"Oh that's all right, just take Ferd's boat, he aint usin' it. You're perfectly welcome to it."*

"Well now, Belle, you're mighty clever neighbors, I always did say I'll bring you a mess of fish when I git back. My land! if my wife was only just like you!"

"Go way! You'd ought not to talk so. Send Maria over here this afternoon, and we'll go out ridin' together, down to the minister's, while you men are away from home."

"All right. But say—"

"Uh?"

"Is that spot out behind the barn as good for worms as it was last year?"

"Why, I don't know, I'm sure, Columbus, but I expect it is."

"Would you mind sendin' one of the boys to dig me a can o' worms? It's sort of hot like, this mornin', and I'm troubled a good deal with malaria."

"Why certainly, Columbus. The boys can do it just as well as not. Set up, won't you, while they're out diggin' the worms, an' have a bite and something to drink."

"Well, you know—"

"Mary, draw two!"

"Oh no, no! I really couldn't. I never take but one drink a day, and I've had mine!"

"Pshaw! have one with me."

"Well—that is—well, if you insist; but make it light—make it very light."

"Oh, that's all right, Columbus."

"Well, here's lookin' at you. Law! if Maria just felt the way you do about this goin' fishin'."

"You're a nice man, Columbus. How's the map business doing now?"

"Oh, first rate, can't complain. Sold four last week."

"That so? Why, you'll soon have money enough to get a fishin' outfit of your own."

"Maybe, but I don't see the use if Ferd ain't usin' his'n. But here comes Jimmy with the worms. Can Jimmy go 'long with me, so'st to sort of row the boat while I do the fishin'?"

"Why, yes, I guess so. But say!"

"Well?"

"Don't you think you have what might be called a Castile nerve?"

"Well, you got to have nerve in this sportin' business. See."

"Oh! Well good mornin', Columbus."

"Well good mornin'. I'll often think of you, Belle, when I'm a treading the quarter deck alone."

"Thank you, Columbus. Say!"

"Well?"

"You'd better take a whole deck, hadn't you? You and Jimmy may get lonesome."

"I would, if I could afford it. Has Ferd got one?"

### II.—The Discovery.

It was past noon when Columbus asked Jimmy Aragon for the lunch basket.

"How're you makin' it, Jimmy?" said he.

"I got a blister on my hand, and I want to go home," said Jimmy.

"Go home nothin'," said Columbus. "What you talkin' about, we haven't caught only four fish yet."

"I'm tired, and I want to go back home."

"All right, sonny, we'll go home when we've got a good string, or else wait till dark, and don't you forget it. When your uncle C. Columbus goes out after fish he gets fish, and don't you forget it. See! Gimme another worm."

"This ain't no good place to fish, I don't believe," said Jimmy.

"Huh! Like to know what you know about it!"

"Well, one of the boys told me there was a place, over West a little ways a couple of miles, where the fishin' was real good. He knew a man caught a whole lot there, just the other day. He said 'at hot chicken tamales grew on every tree over there."

"Huh! That so?" How far over was it, did you say?"

"Oh, not very far, just a little ways, 'bout a couple of miles."

"That so? Well, s'pose we pull over there and try it awhile."

So they pulled over there, and when they got there the place was about two miles further over yet. So they went on two miles further, and again the place had moved. They kept on, and at last they came to New York.

"Hello, is this New York?" said Columbus.

"Yes, this is New York, of course," they told him.

"Do hot tamales grow on trees here?"

"Nope."

"Well, which way is Chicago?" E. HOUGH.

175 MONROE STREET, Chicago.

* THE ORIGIN OF A MYTH.—History often distorts facts for dramatic effect. The historical myth is well accepted that Isabella pawned her jewels to secure ships for Columbus; but this is only myth. It arose in the fact that she loaned to Columbus one boat, a small boy and a fishing outfit which belonged to her husband.—E. H.

### The Thread-Fin.

MR. R. V. R. SCHUYLER has forwarded to the Smithsonian Institution a drawing of a strange fish which, he writes, is taken in seines at Biloxi, Miss., during September, after which month it disappears. The specimen shown was 7in. long. "In life the end of the nose was translucent. Color iridescent when taken out of the water. Back dark green, sides and belly white. All fins dark green except [the breast fin], which is black. Eye very large, pupil black, cornea silver."

The fish above referred to was first described by Dr. Girard under the name *Polynemus octonemus*. It is valued as a food fish. Nothing is known to us about its habits. The most remarkable character of the thread-fins is the division of the breast fin into two parts, the upper portion shaped as usually in common fishes, the lower part consisting of long, separate rays, in this species twice as long as the upper rays.

### The Kentucky Fish and Game Club.

OFFICE OF CORRESPONDING SECRETARY,
COURIER-JOURNAL BUILDING,
LOUISVILLE, Oct. 10, 1892.

*To the Farmers, Hunters and Fishermen of Kentucky:*

The object of the Kentucky Fish and Game Club is primarily for the purpose of securing proper legislation for the protection of game, dogs, birds and fish; the protection of the farmer and land owner from wanton trespass, the encouragement of the citizens of the State in their efforts to increase varieties and numbers of game and fish, and the organization and encouragement of other clubs for the vigorous enforcement of all laws against killing, stealing, sale or shipment of any such dog, game, birds or fish unlawfully. Another object of the association is to restock the streams of the State with indigenous fish and the propagation of them so far as is practicable. To this end the club has already several million game fish, which have been distributed mostly in the streams of central and eastern Kentucky free of any expense to the people. All that is asked is their co-operation and their assistance in keeping the streams from being depleted and urging their representatives in the General Assembly to enact stringent laws protecting birds, game and fish.

The membership of the club comprises nearly 1,200 people in all parts of the State. Among these are farmers, lawyers, merchants, doctors, and men of all trades, followings and professions. It is desired to make the club an organization of strength and to have every portion of the State equally represented by co-operative auxiliary local clubs in every town. Such clubs, working in harmony, could soon be responsible for the existence in Kentucky of all the various kinds of game and fish that existed here in the days of Daniel Boone.

The Kentucky Fish and Game Club has now before it the task of restocking with game fish every stream in the State. To do this it is necessary to have the co-operation of citizens in all parts of the State, with whom correspondence is desired. The fish are received through the United States Fish Commission and sent to the State's borders free of expense. The distribution is made at the expense of the club and the only assistance asked is such as results from the nominal dues of the members of the association. These are $1 per year and 50 cents per year for members of auxiliary clubs, where the entire club is enrolled. A movement is now on foot to increase the dues of individual members.

It is desired, for the purpose of continuing the work of restocking the streams, that application be made for fish from every section where there are none or few. The character of the stream and the varieties of the fish that live in the waters should be explicitly explained. The best place for liberating the fish should also be given. This should be, if possible, on the line of some railroad. If this is not practicable, the nearest station should be designated and a statement made of what arrangements could be made for transporting the fish from the station to the stream. It is desired that these applications be sent to the corresponding secretary for classification at once.

Rome was not built in a day. The entire State can not be supplied with fish in a week, or a year. The United States Fish Commission is so hampered by a small appropriation that it is impossible to supply the demand for game fish. Consequently, shipments are not so frequently as would be desired. It is believed, if the proper effort is made, Congress can be induced to devote more money to the propagation of fish. To this end every citizen of Kentucky who is anxious to have the streams restocked is asked to urge his representative and senator in Washington to vote for and speak for an increased appropriation for the Fish Commission, which is headed by Col. Marshall McDonald, a Kentuckian. It is also urged that the Kentucky Legislature be asked to pass stringent laws and assist in any manner possible the work of preserving, protecting and increasing the fish, game and birds of the commonwealth. Very respectfully,

CHAS. A. DAILEY, Cor. Sec'y;
J. FRY LAWRENCE, Pres

## Fishculture.

### VERMONT FISHCULTURE.

THE eleventh biennial report of the fish commissioners of Vermont, ending with the fiscal year, June 30, 1890, has just been issued. The commissioners are Mr. John W. Titcomb, of Rutland and Charles C. Warren, of Waterbury. In the appendix is given a report of the directors of the State Fish Hatchery, Messrs. C. C. Warren, H. H. Swift and A. B. Noyes. Another excellent feature of the appendix is an alphabetical list of the towns of Vermont with the names, character and area of their ponds, and the principal kinds of fish living in them.

The illustrations consist of plates of the pike, pickerel, mascalonge, pike-perch and sauger, the first lent by FOREST AND STREAM and the rest copied from publications of the U. S. Fish Commission.

The State fish hatchery is located at Roxbury. Its yield during 1891 and '92 was very gratifying, as will appear from the following record of fish planted:

| | |
|---|---|
| Brook trout | 295,000 |
| Lake trout | 127,000 |
| Von Behr and Loch Leven trout | 75 000 |
| Rainbow trout | 26 500 |
| Landlocked salmon | 30,000 |
| | 553,500 |

In addition to this distribution by the State the U. S. Fish Commission furnished the commissioners for Vermont waters:

| | |
|---|---|
| Black bass | 60 |
| Rainbow trout (yearlings) | 3,550 |
| Lake trout (yearlings) | 2,000 |
| Von Behr trout (yearlings) | 476 |
| Carp (yearlings) | 200 |
| Landlocked salmon (yearlings) | 15 000 |
| California salmon (yearlings) | 3 470 |

We shall have occasion to refer again to other features of this interesting report.

## RUSSIAN WOLFHOUNDS *

### BREEDS OF BORZOYS KNOW IN RUSSIA.

THERE are eight well defined breeds known in Russia. The Tchistopsovoy-borzoy, Psovoy-borzoy, Courland borzoy, Brudasty (rough-coated) borzoy, English borzoy, Hortoy barzoy, Caucasian borzoy and Crimean borzoy. (No. 3, the Courland, is now extinct.) The oldest and most suitable to the country is the Tchistopsovoy-borzoy; this name means pure psovoy, *i. e.*, pure in blood. It also implies the purity and elegance of its form. Owing to their purity they do not produce offspring with irregular points. This dog must look very elegant and well proportioned.

The small of the back is quite long in both sexes. The back of the male is arched, of the female nearly straight, with but a very slight arch.

The head must be small and regularly tapering down, narrow and very lean; muzzle long and tapering evenly; eyes protrude (stand out) and are black or very dark in color, look bright and cheerful always; ears small, narrow and set regularly; in repose they must lie on the back of the neck, with their tips touching; when excited they are raised somewhat. The ears are the main distinguishing point of the Russian Tchistopsovoy-borzoy.

Legs bony and lean; paws long, as in a hare; hindlegs in repose stretched back as if ready to start (this is an important point in judging of the dog's qualities), so that the four legs do not stand parallel to each other when seen from the side. The hindlegs in standing must not be much bent in the hocks. The claws are down hard on the ground, the lower part of the legs is of medium length. The forelegs must be straight and stand vertically in repose. The dog seems to stand on tiptoe or on its claws.

The chest full and arched, but without deep hollows on each side of the breast bone. The width of the chest must be nearly the same as the width of the hips when seen from above, so that the dog seems long and broad.

The neck is an important sign of the purity of blood, as the different breeds all show the same kind of neck in their thoroughbreds. It must be long and arched, as in a good horse, and this applies to both sexes.

Ribs barrel-shaped, neither too short nor too long; in any case they must reach to the elbows, if not below them. Belly rising from the ribs toward the hips, as in all greyhounds.

Tail bent into sickle-shape and raised in coursing; the length must be such that when it is drawn through between the hindlegs and laid on the back the last vertebra will touch the point of the hip bone on that side. A longer or shorter tail is a defect and a sign of mixed blood.

Shoulders full and muscular, elbows freely movable, breast bone standing out beyond the line of the shoulders. Hip muscles large and full. Coat short, though a little longer than the coat of the Crimean borzoy. Hair about 1in. long, very soft and glossy, with thick and soft under hair in the fall and winter. The ornamental hair is thin and distributed unevenly, namely, on the edge of the hips it is long (over 3in.) and wavy, hanging down in handsome tresses, and has heavy under hair; on the belly and underside of the chest it does not exceed 2in. in length, and has no under hair, but is thick, straight and silky, and somewhat shorter in front. On the neck the hair is a trifle longer than on the body, but it lies in smooth waves. Around the head, next to the cheeks, the hair is somewhat longer, like small side wiskers, on the underside of the tail it is nearly 3in. long, silky and straight and not very thick; the upper side of the tail is covered with ordinary short hair. On the back edge of the forelegs below the elbows the hair is not over 2in. long, and thin and silky. The head from the ears forward and the fore edges of the legs have short, mouse-like hair, glossy and silky.

The normal color is white or yellow of all shades, also these two mixed with black feet and muzzle.

Size 28 to 30in. Temper gentle, quiet and cheerful, but eager and persistent in hunting. While searching for game with the hunter on horseback the dog keeps in advance of him and runs at a high speed.

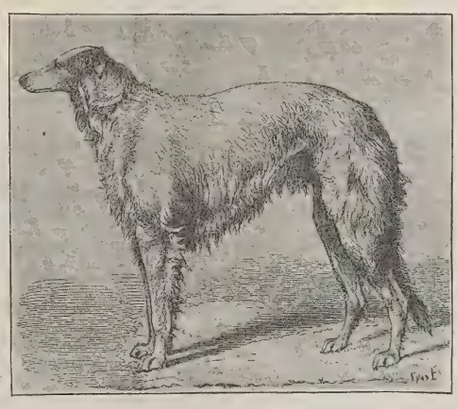
Speed incredible for short or long distances, though excelled by the Crimean or Caucasian in the latter case. But owing to their long and supple necks the Tchistopsovoy borzoy are better catchers, often without letting the hare make any turns at all. They are sharp-sighted and eager hunters, but not good to fight a wolf singly, though they have been used for that purpose.

The other Russian breed younger than the Tchistopsovoy borzoy is the Psovoy borzoi produced by crossing with the Courland borzoys. As late as 1800 this breed, the Courland borzoy, seemed to be rare, because P. E. Mossolov sold some at that time to a Polish nobleman for 7,000 and 10,000 roubles a piece. The proof of its being a cross is in the fact that sometimes a pair of blooded Psovoy borzoys with the regular long wavy hair produced pups which are perfectly short-haired, like a mouse; and reversely, a pair of such mouse-haired Psovoy borzoys will produce back the regular long-haired breed. For this reason a breeder need not reject a pup if it is regular in every point but the coat.

*From the "Complete Manual of the Coursing Hunt," by P. M. Glebin, Moscow, 1891."

The Psovoy borzoy must be large, strong and fierce-looking. The male must have a steep arched back, broad and short, the bitch also broad, but longer and straight back without any downward curves.

Head large, bony and lean, muzzle tapering down evenly. The head is larger than that of the Tchistopsovoy borzoi. Forehead neither too broad nor too narrow, eyes very large and fierce and with a haw.



Ears laid back in repose and the nearer they are in shape to the Tchistopsovoy borzoys the better; it is a sign of the purity of their blood; a slight deviation from this standard is allowed, but ears hanging down too much or not folded in so as to hide the inside of the shell and cover the auricular aperture is a sign of impure stock. Legs strong in the bone and muscular, and lean enough to show the tendons. The lower legs proportional to the size of the dog, though the hindlegs are a little longer from the hock down; the feet are large and paws elongated, with the toes held close together. The forefeet seem to stand inwards owing to the great breadth of the chest, but they really must stand perfectly vertical. Hindlegs a little bent in the hocks but neither the elbows nor hocks must be turned in nor must the dog stand with the feet braced forward as if it were pulling back against something. This latter defect is produced by feeding the pups on frozen meat or giving them a whole carcass to gnaw, which obliges them to brace themselves back in pulling off pieces, and they are liable to retain that position habitually; the same defect may be owing to their sitting too much without running about. The Psovoy-borzoy must stand on its claws or on tiptoe like a good greyhound.

Chest broad, but not arched, and the breast bone barely protruding beyond the line of the shoulders, with moderately deep hollows on each side of it.

Neck long and arched, as in the Tchistopsovoy borzoy.

Ribs arched or barrel shaped and long—reaching about 2in. below the elbows. Between the shoulders is a hollow large enough to put the palm of the hand in; between the hips a larger hollow yet. In general the hips must be broader than the shoulders. Belly well drawn up, as a dog with an arched back ought to be.

Tail long, heavy at the root and thin at the point, hanging

PSOVOYA BORZOYA LEBED.

down in repose and raised in form of a sickle when excited. It must be a little longer than the Tchistopsovoy borzoy, *i. e.*, the last vertebra must reach the spine if drawn through between the legs and laid on the back. A longer or shorter tail is a sign of the presence of outside blood.

Shoulders full and muscular. Elbows freely movable; breastbone slightly protruding.

Quarters very large, with extremely full and hard muscles. Coat long, about 3½in.; rather thin, but soft, silky and glossy, and of the same length on the neck, back and ribs. But the ornamental hair is much longer—for instance, on the edges of the hips it is often 7in. long, hanging down in silky, wavy tresses, and has heavy under hair. On the under side of the ribs and on the belly it is thin and is without under hair, and does not seem so long, only toward the rear it reaches about 4½in. The males have large side whiskers up to 7in. in length; the females lack these. On the tail the hair 5 to 7in. long and hangs down straight; the upper side of the tail is covered with short, smooth hair; around the root this is wavy.

On the hind edges of the forelegs the hair is of the ordinary length of the hair of the body, the fore edges as also the head have a very short mouse-like coat of hair, but it is also silky and glossy. In general the hair on the Psovoy borzoys is straight, wavy or curly, according to which type of its original progenitors the dog is nearer to, and any of these is allowed as long as the hair is not coarse and woolly, which would indicate a crossing with common or sheep dogs.

The proper colors are white, yellow and brown, and their mixtures, with black feet and muzzles.

In shedding hair this breed is peculiar, as they begin in April and keep up until the middle of September, and is hardly noticeable without a close inspection. In this way all the coat is not shed in a short time but hair by hair, so that it does not seem to change at all on sight. The mixtures of this breed with others do not act this way.

Size large, not less than 31in.

Temper energetic, but fierce and irritable. Gait proud, somewhat like an amble; courses ahead of or alongside the hunter.

In the way of speed the special excellence of this breed is in spurting abilities, which ought to be terrible, like a shot; therefore it is wrong to expect of them great staying powers; and in fact a great stayer would undoubtedly be a cross-bred, not a Psovoy borzoy. Their fierceness in the hunt must be of the dead game kind, and for this reason this breed excels as wolf-killers. Owing to their savageness, great strength of body and jaws four such dogs must hold down fast the very largest wolf once they have caught him.

Some writers and breeders have held that the ancient race was flatter and lighter in build and that this is the one to be propagated. Owing to its heavier coat they have called it Gustopsovoy borzoy. But such dogs are really only faulty irregular Psovoy borzoys and are always very easy to produce by degeneration of the race through too near a relationship of the parents, which always is to be avoided. The regular Psovoy-borzoy is built much in the shape of a wolf, only handsomer and stronger in the hindlegs. If wolves had the hindquarters of the Psovoy borzoys they would be hunting the dogs instead of the reverse.

[TO BE CONTINUED.]

Mr. Booth this week offers breeders of St. Bernards a chance to secure some good stock from his brother's kennels in Yorkshire, England. The kennel is assuming too large dimensions and that is the reason of the clearing. He has now two young ones by Young Ponte out of Miss Anna that are good.

## NATIONAL BEAGLE CLUB BENCH SHOW.

WHETHER a dog show held before the regular field trials is the proper thing or not is a matter for the National Beagle Club to decide, but the fact remains that among the members present at the second show held by the club the utmost interest was evinced in the proceedings. Every dog shown was discussed from all points, and the fact that pretty nearly every one present was conversant with the qualities that go to make up a good beagle lent an additional charm to the gathering and made the judge's position not at all an enviable one. It was business from the start, with no gallery to play to.

In keeping with the spirit of the field trials, the "ring"—a postless one, by the way—was in the open, and while the vigorous air was pure and exhilarating to us "city folk," it was at the same time nipping to a degree and overcoats were welcomed. The dogs, having no personal interest in the affair, there being no hare attachments, curled up with the cold and did not show themselves with that degree of abandon and gaiety that has secured to them the name of "ye merrie" little beagle. It was an ideal place for a show of beagles, for here they could be put down naturally, at any rate. A good standing board had been provided, but a gravelled path running alongside the lawn was preferred by the judge as affording a better chance for the dogs to show themselves naturally.

There was quite a representative gathering of "beaglers." First and foremost we must mention Mr. Kreuder, at whose "Homestead" the show was held, and through whose generosity and forethought both man and beast are comfortably housed and fed. But I must leave a little on this score for next week's report. Then F. W. Chapman, the president, and H. V. Jamieson, the secretary, were busy with the official arrangements, and the catalogue I must say was very nicely gotten up, for there were very few mistakes in it. Mr. H. W. Lacy judged. Among the others grouped around were W. H Ashburner, of Yeadon, Pa.; Pottinger Dorsey, of Newmarket, Md.; W. S. Clarke, of Linden, Mass.; Joe Lewis, of Moodus, Conn., the two latter feeling anxious for the morrow and—their wind, for on these two men lies the heaviest work of the meeting. It is no joke to be a field trial judge, and they have my sympathy. Then there was A. C. Knoblauch, Jersey City; John Bateman, Gravesend Beach, L. I.; Geo. Laick, Tarrytown, N. Y., who will now assume the secretarial mantle according to the Nanuet ballot to-night; H. E. Parry, Linden, Mass.; Dr. H. H. Brown, the "vet" of Melrose, Mass.; Gateby Daub, and C. Peabody, Salem, Mass. It was about 1:30 P. M. when the judging commenced, some of the dogs not being on hand in time for the advertised start, and the judge himself was late as well.

The prizes are on the percentage basis, 50 and 40 per cent. of entrance fees in challenge, and 40, 30 and 20 per cent. in open classes. The entries altogether numbered 25, and quality was very conspicuous, though I was sorry to see the competition confined principally to three of our leading kennels. In a gathering of this sort all members should strive to the utmost to be represented by their choicest dogs, for in this way only can the best interests of the breed be served. A little more of sportsmanship and a little less "percentage" should be the prevailing spirit. The catalogue commenced with challenge dogs, 13 to 15in., and two well-known "benchers" were brought out, both hailing from the Rockland Kennels. At first glance the decision did not strike the judge as an easy one, but after a running over it was soon very evident that the younger dog, Roy K., would pass the old champion, Racer, Jr. He is better and stronger in loin, quarters and second thighs, his pads are thicker and closer, but it cannot be denied that Racer, Jr., excels the other in general type, formation of head and forelegs, carriage of stern and ribs; his weak hindquarters, however, knocked him out when one takes into consideration the work they should be built for. The bitch class was drawn blank, Twintwo being absent.

It was then thought better to turn to the end of the catalogue and go through backward so that the dogs entered in the 13in. and under classes could be measured and any big ones that might creep in be transferred to the taller division. This arrangement brought out the only puppy, Nora, born and bred on the "Homestead" sod. She was given first, a little long in head altogether, body well ribbed and coat of good texture, nice bone, forelegs and feet could be a bit better. A promising pup all the same. Then the bitches under 13in. were called in and three responded. Neither of them are particularly strong, but I thought Butterfly, in their present condition the best. Daisy S., second, was light in flesh; she is beaten in general type by the winner, though better and cleaner in shoulders and neck, Butterfly having a little more than her share of flesh. Daisy S. is long in body, heads are too long and narrow for good type. Butterfly beats in style and action. Fanny Reed loses to Daisy in body and legs, and so in fact does Butterfly in the latter respect, for she stands a little—very little—back on her pasterns, but she had the best coat and brush. Wenaunan and Romp C. were marked absent.

The dogs of the same measurement came next. It was thought at first that the Rochester winner would take the ribbon, but Rockland Kennels showed a young one, Rockland Boy, by ch. Little Duke, that could not be denied. He has a sweet expression though his head could be shortened a bit, but then the second winner, Duce Jr., is too short and rather coarse besides, with eyes bulging out "far too far," and the mouth needs repairing. Rockland Boy beats the others in quarters and second thighs, finer in ears and better hung; Clyde did not show himself well at all, he lost to the others in quarters, all down and weak in hocks, turning them in, and no second thighs. Neither of these dogs is up to form, but I put the stronger dog first, and after type the likeliest fielder for staying and work.

The challenge class for this size had been judged in the house, as champion Lou, the only entry, had been severely bitten in the morning and was confined to the sofa in Mr. Kreuder's study. She was the same sweet old Lou, though. In challenge dogs, same measurement, we saw something choice as well, for here Frank Forest and Rambler, both belonging to the Rockland Kennels' aggregation, were to do battle. Not much of a battle, though, for victory soon rested with the sensational Frank Forest. Rambler is the younger and smarter dog, that's all. Cleaner in shoulders and truer in front, but in all else, barring ears, Frank overtops him, and especially in his "propelling power," which I may as well remark is behind in this case.

The next class was a puzzling one. It's all very well when you get two or three in a class, much of a muchness, but still with some gradation of points, but here we had four or five where each had some excellent points that would not be lost sight of, though glaring faults spoil a very good whole. There were seven in the class and the judge soon relegated Snow to the rear, roach-backed or showed herself so here, and light in body, good bone but head plain and long. Then Phantom, a better stamp, though not straight in front, very snipy muzzle, short-coated, good skull and expression, she is a better one than the other, and the judge should have given Snow c. to grade them properly. After this the five larger ones were of more general type and the struggle began. Parthenia, the winner, caught the eye at once and it did not need a very keen one to see that Joe Lewis who handled her thought he held the trump card; I thought so too at first, but her head needed some consideration; it is a plain one, rather not enough stop, deep and square enough in muzzle, but still wanting in refinement and quality, ears fairly good and back of this you cannot find much fault; her shoulders and neck are wonderfully clean and well placed, legs to the pasterns good, but feet

might line to them better; body is beautifully ribbed but as she might have had a pound or two more flesh her loin was a bit light, quarter and second thighs very good, and the gayest mover of them all; she won.

For second place it was a tight go, and quality and type are responsible for the decision in Emeline's favor; this bitch has improved very much and had she been shown a pound or two lighter she would have pushed the winner for she is much better in head and has a straighter foreleg, but her body looked a bit cloddy; good brush and the best coat of the prize winners. Gypsey A. was also too fat, and so lost in body symmetry; she is heavy in shoulders and her head is too long and lacks stop enough. Vick R., the reserve, is better in forelegs than June Rose, vhc. Vick had a sore toe and could therefore have shown herself better; her coat is open; June Rose loses to her in legs, standing a little out in front and feet are not compact enough; nice skull and ear and muzzle snipy; good, well-ribbed body. This was a capital class and very much "beagle."

The dog class was not so good by any means, and the judging of this finished the business on hand. For general beagle type and cobbiness Jack Rowett, the winner of second, beats Forest Hunter, the winner, but the forelegs of the former, the feet turning quite a good deal, spoil him, or else he has a better head, but shoulders are not so clean as Forest Hunter's, nor is he so good in coat and carriage of stern, but he excels the other in quarters and thighs. Milo is very pig-jawed, a pity, as his body is good and so are his legs; in fact, a well-made dog all round, barring his head, which would put a snipy collie to blush. This concluded the fun, and some of us were not sorry, as the bones began to feel uncomfortably chilly, and blowing on our fingers was the chief amusement. The kennel prize judging had to be postponed till the morrow, as Frank Forest had been sent out for a finishing run, his owner not knowing about the kennel special, which was not down in the catalogue.

LIST OF AWARDS.

15 TO 13IN.—CHALLENGE—*Dogs:* 1st and 2d, Rockland Kennels' Roy K. and champion Racer, Jr. *Bitches:* Absent.—OPEN—*Dogs:* 1st, Forest Beagle Kennels' Forest Hunter; 2d, Rockland Kennels' Jack Rowett; 3d, Glenrose Kennels' Milo. *Bitches:* 1st and 3d, Glenrose Beagle Kennels' Parthenia and Gypsey A.; 2d, Rockland Kennels' Emeline. Very high com. reserve and very high com., Forest Beagle Kennels' Vic R. and June Rose. High com., Pottinger Dorsey's Phantom and Middleton Kennels' Snow.

13IN. AND UNDER—CHALLENGE—*Dogs:* 1st and 2d, Rockland Kennels' Frank Forest and Rambler. *Bitches:* 1st, Rockland Kennels' champion Lou.—OPEN—*Dogs:* 1st and 2d, Rockland Kennels Rockland Boy and Duce, Jr. *Bitches:* 1st and 3d, Glenrose Beagle Kennels' Butterfly and Fanny Reed; 2d, Forest Beagle Kennels' Daisy S. *Puppies:* 1st, Rockland Kennels' Nora.

## INTERNATIONAL FIELD TRIAL ENTRIES.

THE following are the entries for the Derby, All-Age, and Amateur Stakes at the International Field Trials to be held at Chatham, Ont., Nov. 7 and following days. In the Derby there are 12 English setters; 10 pointers; 4 Irish setters. All-Age Stake—9 English setters; 2 pointers. Amateur Stake—9 English setters; 2 pointers.

### DERBY.

ENGLISH SETTERS.

DAISY II.—Victor Chauvin's bitch (——— —Daisy).
NIA—Forest Kennels' bitch (Viscount—Forest Gladys).
PATTY — A. St. L. McIntosh's bitch (Mingo II.—Cambriana).
MOLLY—Sheriff Mercer's bitch (Mingo II.—Cambriana).
MINGO III.—Sheriff Mercer's dog (Mingo II.—Cambriana).
TOLEDO BEE—F. W. Eddy's bitch (Toledo Blade—Maggy Bee)
SHYLOCK—T. G. Davy's dog (Rock—Maud).
TIRASSE—W. B. Wells's dog (Mingo II—Cambriana).
CLEOPATRA—W. B. Wells's bitch (Mingo II.—Cambriana).
PHYLLIS T.—W. B. Wells's bitch (Mingo II.—Cambriana).
CURTIS—J. Huddleston's bitch (Cornell—Dart).
COUNTESS SISS—A. Mather's bitch (Cornell—Dart).

POINTERS.

DAME BANG—T. G. Davey's bitch (Trinket Cash—Van Bang).
BESSY RANGER—T. G. Davey's bitch (Major G.—Bell).
CAPTAIN BREWER—W. M. Stone's dog (Count Graphic—Jennie M.)
LONSDALE—Thomas Johnson's dog (Ightfield Coton—Ightfield Psyche).
MANITOBA SHOT—Thomas Johnson's dog (Ightfield Coton—Ightfield Psyche).
MANITOBA SAL—Thomas Johnson's bitch (Ightfield Coton—Ightfield Psyche).
DIAMOND—Thomas Johnson's bitch (Ightfield Upton—Ightfield Blithe).
GEM OF MANITOBA—Thomas Johnson's bitch (Ightfield Upton—Ightfield Blithe).
FRITZ—M. Kramer's dog (Count Graphic— ——).
SIREN—Mr. Jackson's bitch.

IRISH SETTERS.

NICK OF GLENCHO—F. J. Abbey's dog (Pat S.—Allace K.)
MIDGET BOW—Oscar M. Springer's Bitch (Scott—Queen Wilkinson).
PRAIRIE FAWN—Albert Drouillard's bitch (Dan O'Connell—Lalla Rookh).
CONNIE—Howard Barnes's bitch.

### ALL-AGED STAKE.

ENGLISH SETTERS.

DONALD BANE—John Davidson's dog (Dick Bondhu—Western Belle).
CARRY F.—Dr. Totten's bitch (Banker—Smith's Bell).
SHYLOCK—T. G. Davey's dog (Rock—Maud).
MANITOBA PATTI—Thomas Johnson's bitch (Duke of Gloucester—Flora).
PITTI SING—Thos. Johnson's bitch (Baron Doverly—Norah).
MATANE—W. B. Wells's dog (Mark J.—Cambria).
LUKE—W. B. Wells's dog (Toledo Blade—Cambriana).
DAPHNE—W. B. Wells's bitch (Toledo Blade—Cambriana).
LADY PATCH—Jos. Kime's bitch (Mingo—Lady Thunder).

POINTERS.

DAME BANG—T. G. Davey's bitch (Trinket's Cash—Van Bang).
MANITOBA SHOT—Thos. Johnson's dog (Ightfield Coton—Ightfield Psyche).

### AMATEUR STAKE.

ENGLISH SETTERS.

BANGHAM'S LONDON—R. Bangham's dog (London—Lurea March).
LUCY C.—John Davidson's bitch (Scottish Chief—Ailsa).
SANCHO—G. P. Taylor's dog (Toledo Blade—Cambriana).
TICKY TACK—A. Wells's dog (Toledo Blade—Cambriana).
ROMNEY—A. Wells's dog (Toledo Blade—Cambriana).
MANITOBA PATTI—Thomas Johnson's bitch (Duke of Gloster—Flora).
MINGO, JR.—Jas. Kime's dog (Mingo—Rose Rapid).
LADY SPOT—Jas. Kime's bitch (Mingo—Lady Thunder).
CLINKER—T. H. Nelson's dog (King—Fausta II.).

POINTERS.

FRANK—James E. Purser's dog (Zip—Nell).
SIR HOWARD, JR.—W. L. Donaldson's dog (Sir Howard, Sr.—Bella).

## AMERICAN F. T. CLUB'S ALL-AGE STAKE.

COLUMBUS, Ind., Oct. 22.—*Editor Forest and Stream:* I herewith send you list of All-Age entries for the inaugural trials of the American Field Trials Club's trials.

W. J. BECK, Secretary.

ENGLISH SETTERS.

DAD WILSON'S BOY—R. J. Wither's (Dad Wilson—Dolly S.)
IGHTFIELD RHIWLAS—Baker & Beck's (Downe—Sconaidh).
DAN NOBLE—A. J. Klofanda's (Dan Gladstone—Flame M.)
FRANK—J. F. Pantler's (Sancho—Bessie).
PEMBROKE'S BLUE GROUSE—Scott's Wood Kennels' (Pembroke's Don—Sue of Hatchie)
HI DI—George E. Gray's (Gath's Hope—Trap, Jr.)
NELLIE G.—Theo. Goodman's (Cincinnatus—Victoria D.)

POINTERS.

DON FISHEL—U. R. Fishel's (Devonshire Sam—Nellie Bang).
WISE CROXTETH—U. R. Fishel's (Croxteth—Amine)
FAUST KING DON—A. T. Quick's (King Don—Queen Faust).
MIDGETT H.—Carrie Harvey's (Harrop—Frankie).
REX—G. A. Castleman's (Mainspring—Dell).
ERIC S.—J. F. Shipley's (Rank—Queen).
MANITOU—J. W. Scudder's (Luck of the Goat—Clary).
MAID OF OSSIAN—John B. McGuffin's (Ossian—Pickwick).
NUTWOOD—C. A. Paetzel's (Ossian—Nellie E.)

IRISH SETTERS.

MARLOWE—R. R. Howard's (Elcho, Jr.—Maid).
QUAKER—A. A. Anderson's (Rex—Fannie).
HOPE BARU—Geo. E. Gray's (Byron Barugo—Biddy).
ELCHO'S MAID—Geo. E. Gray's (Elcho Jr.—Maid).
LADY JOSIE—L. L. Campbell's (Pat O'Moore — Dora O'Moore).
COLERAINE—Glenmore Kennels' (Fingal III.—Aveline).
FINGLAS—Glenmore Kennels' (Fingal III.—Aveline).
RANGER—Glenmore Kennels' (Irish Elcho—Irish Belfast).
RUBY GLENMORE—Glenmore Kennels' (Glencho—Magg).
WINNIE II.—Glenmore Kennels' (Frisco—Grouse).
BETSY CRAFTS—Glenmore Kennel's (Keno—My Maud).
BEAU BRUMMEL—Glenmore Kennels' (Elcho, Jr.—Red Rose).

## U. S. F. T. CLUB'S ALL-AGED STAKE.

*Editor Forest and Stream:*

INDIANAPOLIS, Ind., Oct. 20.—Inclosed please find list of entries to the U.S.E.T. Clubs All-Aged Stake.

P. T. MADISON, Sec-Treas.

POINTERS.

BOUNCE—G. W. Amory's liver and white dog (Bob—Sal).
SPORTSMAN B—Myles W. Burford's liver and white dog (Ossian—Cherry Stone).
KENT'S QUEEN—John Bolus's liver and white bitch (King of Kent—Vera Bang).
FORCE (Edgemont Pointer Kennels' liver and white dog (Diplomat—Bessie).
BEN A.—Dr. D. W. Yandell's black and white dog (Stoddard—Jett II.).
CROXIE O'BANNON—R. L. Shannon's liver and white bitch (King of Kent—Croxie Wise).
MAME S.—R. L. Shannon's liver and white bitch (Brown Stout—Pearl's Pride).
WESTMINSTER DRAKE—New Brighton Kennels' liver and white dog (Lad of Bow—Kate VIII.).
IGHTFIELD DOMINO—New Brighton Kennels' liver and white dog (Ightfield Dick—Perdita).
PAXICO—A. J. Gleason's (agent) liver and white dog (Ossian—Nellie E.).
IGHTFIELD UPTON — Drake-Sefton Kennels' liver and white dog (Ightfield Upton—Polly Peacham).
NUTWOOD—Chas. A. Paetzel's liver and white dog (Ossian—Nellie E.).
GUY—T. A. Divine's black and white dog (Dan—Fanny).
SWIND—J. N. Neely's lemon and white dog (Dan—Fanny).
BELLE SENSATION—M. C. Wiles's liver and white bitch (Frank—Nellie Girl).
PROMOTION—Fairmount Kennels' liver and white dog (Lord Graphic—Belle Bishop).
HEINEKEN—Maj. J. R. Purcell's liver and white dog (Flockfinder—Ion).
JUPITER—Maj. J. R. Purcell's liver and white dog (Tom Bolin—Belle C.).
FRANKLIN—J. L. Adams's liver and white dog (Robin Adair—Blossom).
LAD OF RUSH—J. L. Adams's liver and white dog (Rush of Lad—Topsy L.).
RIDGEVIEW BIPPO—The Graphic Kennels' liver and white dog (Bippo III.—Revelation).
NELLIE FAUSTER—Dr. J. G. F. Holston's liver and white bitch (Count Fauster—Croxteth Nellie).
REX—G. A. Castleman's liver and white dog (Mainspring Dell).
ERIC S.—J. W. Scudder's black and white dog (Rank—Queen).
MANITOU—J. W. Munson's black and white dog (Luck of the Goat—Clary).
PRINCESS II.—C. C. Paddock's lemon and white bitch (Shot—Forest Queen II.).
GASPER'S JOE—John B. Gasper's liver and white dog (Beauvoir—Queen Graphic).
VARRO—J. B. Castleman's liver and white bitch (Castleman's Rex—Castleman's Nell).
MAJOR MCNAIRY—David Castleman's liver and white dog (Krup—Springer).

IRISH SETTERS.

COLERAINE—Glenmore Kennels' red bitch (Fingal III.—Aveline).
FINGLAS—Glenmore Kennels' red dog (Fingal III.—Aveline).

ENGLISH SETTERS.

COSSETTE—J. W. Shriver's black, white and tan bitch (Gun—Victoria Laverack).
DAVE W.—Gen. W. B. Shattuc's dog (Gath's Mark—Daisy F.).
DONCASTER II.—St. Mark M. Mundy's black, white and tan dog (Doncaster—Louise Gladstone).
AMY ROBSART—Harry Northwood's lemon and white bitch (Dad Wilson—Bohemian Girl).
JEAN—Phillip M. Essig's black, white and tan dog (Jean Val Jean—Miss Thompson).
DAN NOBLE—Ad. J. Klofanda's black, white and tan dog (Gladstone's Boy—Flame M.).
BRIGHTON TOBE—New Brighton Kennels' black and white dog (Locksley—Liddersdale II.).
GLORIANA—A. J. Gleason's (Agt.) black and white bitch (Dan Foreman—Doris Nellie).
DORIS NELLIE—A. J. Gleason's (Agt.) black and white bitch (McDuff—Fame).
FRANK—W. E. Smith's black, white and tan dog (Sancho—Bessie).
LITTLE MISS—Dr. J. N. Maclin and T. H. Poindexter's black, white and tan bitch (Vanguard—Rhett).
DAN BURGES—J. M. Freeman's black, white and tan dog (Dan Gladstone—Lilly Burges).
NELLIE HOPE—J. M. Freeman's lemon and white bitch (Gath's Hope—Lady May).
BYDDIE—J. S. Patterson's black, white and tan bitch (Paul Gladstone—Lottie).
MERRIFEE DONCASTER—M. C. Wiles's lemon and white dog (Gladsom—Ruby Doncaster).
GATH'S MARK PRIDE—Albert Smithwright's black, white and tan dog (Gath's Mark—Maud Avent).
DIMPLE II.—E. D. Gar's (agent) black, white and tan bitch (Gordon—Blanche).
TENNYSON—Fairmount Kennels' lemon and white dog (King Noble—Queen Vashti).
NATALIE II.—Bert Crane's black, white and tan bitch (King Noble—Natalie).
LIGERO—Bert Crane's black, white and tan bitch (Roderigo—Maud).
GOVERNOR—J. L. Adams's lemon and white dog (Paul Pry— ——).
BOB COOPER—Blue Ridge Kennels' black, white and tan dog (Roi d'Or—Miss Nelly Y.).
GOSSIP—Blue Ridge Kennels' black, white and tan bitch (Roderigo—Bell of Piedmont).
RUPERT—Avent & Thayer Kennels' black, white and tan dog (Roderigo—Bo Peep).
BETTY S.—Avent & Thayer Kennels' black, white and tan bitch (Roderigo—Bo-Peep).
NOVELIST—Avent & Thayer Kennels' black, white and tan bitch.
ZULU M.—Whyte Bedford's lemon and white bitch (Toledo Blade— ——).
EUGENE T.—A. P. Gilliam's black, white and tan dog (Count Noble—Ruby's Girl).
BLADE—Chas. Tucker's black, white and tan dog (Toledo Blade—Lulu C.).
HOPE'S BUD—Chas. W. Barker's black, white and tan bitch (Czar—Lady May).

## EASTERN FIELD TRIALS CLUB ENTRIES.

### ALL-AGED STAKE.

ENGLISH SETTERS.

COUNT ANTEO—Pierre Lorillard, Jr.'s lemon and white dog, 1890 (Count Noble—Gladstone's Girl).
ANTEVOLO—Pierre Lorillard, Jr.'s liver and white bitch, 1889 (Count Noble—Trinket II.).
LORA—Pierre Lorillard, Jr.'s black, white and tan bitch, 1890 (Gladstone's Boy—Ruby D.).
MISS RUBY—Pierre Lorillard, Jr.'s lemon and white bitch, 1890 (Gladstone's Boy—Ruby D.).
DAN BURGESS—J. M. Freeman's black, white and tan dog, 1891 (Dan Gladstone—Lilly Burgess).
BOB COOPER—Blue Ridge Kennels' chestnut and tan dog, 2½yrs. (Roi d'Or—Miss Nellie G.).
GOSSIP—Blue Ridge Kennels' black, white and tan bitch, 3½yrs. (Roderigo—Bell of Piedmont)
HARRY C.—Greenfield Hill Kennels' black, white and tan dog, 4yrs. (Roderigo—Countess House).
RUPERT—Avent & Thayer Kennels' black, white and tan dog, 1889 (Roderigo—Bo Peep).
TENNYSON—Fairmount Kennels' liver and white dog, 2yrs. (King Noble—Queen Vashti).
THORNDALE.—E. C. Norrish's black and white bitch, 1891 Dad Wilson— ——).
ANNIE F.—F. R. Hitchcock's black and white bitch, 1888 (Roderigo—Juno A.).
ALICE—F. R. Hitchcock's black, white and tan bitch, 1890 (Jean Val Jean—Miss Thompson).
GUY—G. T. Leach's black, white and tan dog, 5yrs. (Gladstone's Boy—Lady).
PHILADELPHIA PRESS—L. Shuster, Jr.'s blue belton dog, 1890 (Ciucinnatus—Cornelia).
HAZEL THE BLACKLEG—L. Shuster, Jr.'s black and white bitch, 1890 (Cincinnatus—Cornelia).
COUNT RODERIGO—W. C. Kennerly's black, white and tan dog, 6yrs. (Roderigo—Lady Gladstone).
COUNT GLADSTONE—S. Dill's black, white and tan dog, 10yrs 8mos. (Count Noble—Ruby's Girl).
MCMURDO—W. B. Meares's black, white and tan gog, 1890 Roi d'Or—Mildred C.).
MENIFEE DONCASTER—M. C. Wiles's lemon and white dog, 1890 (Gladson—Ruby Doncaster.
NATALIE II.—Bert Crane's black, white and tan bitch, 1887 (King Noble—NATALIE.
LIGORA—Bert Crane's black, white and tan bitch, 1887 (Roderigo—Maud).

POINTERS.

BOUNCE—G. W. Amory's liver and white dog, 5½yrs. (Bob—Sal).
PRAWN—A. P. Heywood-Lonsdale's liver, white and tan dog, 1890 (Crab—Polly Peacham).
IGHTFIELD DICKON—A. P. Heywood-Lonsdale's liver and white dog, 1889 (Ightfield Dick—Ightfield Bloom).
HEMPSTEAD COUNT—Westminster Kennel Club's liver and white dog, 1890 (Naso of Kippen—Lass of Bow).
HEMPSTEAD DUKE—Westminster Kennel Club's liver and white dog, 1896 (Naso of Kippen—Lass of Bow).
SANFORD DRUID—E. C. Norrish's liver and white dog, 1891 Exon Don—Sanford Quince).
JUPITER—J. R. Purcell's white and tan dog, 4yrs. (Tom Bowline—Belle C.)
GROUSE—C. C. M. Hunt's lemon and white dog, 3½yrs. Mainspring—Swain's Fly).

CHAMPION STAKE.

ROWDY ROD—Greenfield Hill Kennels' black and white English setter dog, 4yrs. (Roderigo—Juno A.).
ORLANDO—Avent and Thayer Kennels' black, white and tan English setter dog, 1887 (Roderigo—Bo-Peep).
NOVELIST—Avent and Thayer Kennels' black, white and tan English setter bitch (Woodhull Bruce—Novelty).
DAISY HUNTER—Jos. H and John A. Hunter's orange and white English setter bitch, 1887 (Gath's Hope—Daisy F.).
RIP-RAP—Charlottesville Field Trial Kennels' black and white ticked pointer bitch, 4½yrs. (King of Kent—Hops).
MAID OF KENT—Charlottesville Field Trial Kennels' liver and white pointer bitch, 3½yrs. (King of Kent—Hops).

## AMERICAN COURSING CLUB MEETING.

GREAT BEND, Kas., Oct. 25.—*Special to Forest and Stream:* Prospects good for weather and attendance. Men here from Colorado, Dakota, Wisconsin, Illinois, Kansas and New York. No California dogs on. E. H. Mulcaster, of Fond du Lac, Wis., judge. The drawing last night was in All-Age stakes, thirty-eight dogs, as follows:

Luse's Living Yet and Shaw's Dolly.
Nicholl's Blue Prince and Lowe & Page's Prince Charlie.
Huss's Lady Boston and Bartel's Flying Dutchman.
Martin's Queen and Heizer's Snowball.
Hayman and Hough's Sporting Press and Bartel's Irish Lass.
Lowe and Whiton's Lord Neverstill and Bowman's Boodler.
Watson's Dry Time and Haigh's Chloe.
Luse's Clara and Poetzel's Fannie.
Haigh's Susie and Bartel's Pearl of Pekin.
Mrs. Pope's Bit of Fashion and Luse's Nettlefield.
Watson's Royal Crest and Lowe's & Page Master Peter.
Luse's Lady In Black and Allen's Jim K.
Luse's Belle of Eltham and Haigh's Briton Yet.
Luse's Lord McPherson and Bartel's Monk Bishop.
Luse's Norwegian and Allen's Woodford Boys.
Hooper's Nelson and Lowe & Page's Prince Rupert.
Massey's What Care I and Mrs. Pope's Poland Duke.
Lyon's Girl's Favorite and Smart's Lady Grace.
Haigh's Master Gleodyne and Mulcaster's Gilda.

Derby drawing, 27 dogs, was as follows:

Allen's Jim Flynn and Price & Joyce's Roy's Canary.
Bartel's Boomerang and Roetzel's Queen.

Watson's Dry Brook and Price & Royce's Raven.
Lyon's May-Day and Price & Royce's Sylph.
Lowe & Page's Nancy and Lyon's Royal Ruby.
Brougher's Roy and Laidlaw's Ketchum.
Price & Royce's Rome Marble and Lowe & Page's Sir Hugh.
Lyon's Fantail and Luse's Lightfoot.
Watson's Alladin and Luse's Laura.
More s Trales, Jr., and Ballard's Buckskin.
Allen's Flying Fox and Lyon's Red Wood.
Watson's Wasted Time and Andrews's Delsarte.
Lyon's Scavenger and Price & Royce's Rook.
Lowe & Page's White Lady a bye. E. HOUGH.

# DOG CHAT.

### Death of Republican Belle.

It was the misfortune of Mr. W. C. Reick on arriving home from Europe to find one of his best bitches dying. We regret to hear that his good bitch Republican Belle joined the majority last Monday. Her trouble was stone in the bladder. She was only really very sick one day. Belle was comparatively a young bitch, being five years old, and was by champion Plinlimmon out of Florentine. She was one of the team brought over by Mr. Crowell. She was soon after taken very ill and the nature of her malady seemed to affect her so that she never proved in whelp afterward. This is a pity, as she showed any amount of quality and type. Mr. Reick purchased her from Mr. W. S. Diffenderffer, and she has contributed no small share to the successes of the New York Kennels. She had won first wherever shown except at the last New York show, when Lady Livingston was placed over her in the challenge class, and that is no disgrace. This death breaks Mr. Reich's team somewhat, but—and thereby hangs another "tail" probably.

### Working Sheepdogs

The accompanying illustration is of Wallace and Nell, the dogs that divided the stakes at the sh epdog trials given under the auspices of the New Jersey Kennel League, at the late Interstate Fair, at Trenton, N. J. They were imported by Messrs. E. H. Morris and E. H. Radel, owned by the Wallace Sheepdog Kennel, of which they are the proprietors. It will be remembered that when Mr. Morris brought his kennel to America he had two sheepdogs, which were exhibited at the New York show in 1888, so that the present attempt to introduce useful farmer's dogs is no new idea, and we are informed it is not a spasmodic attempt, but that it will be followed up in an earnest manner. We hope the Collie Club and all interested will give the movement the support it deserves. Mr. John Jones, who owned Wallace in Wales, writes: "I only ran him six times, winning five times, and missing once through not penning his sheep within the limited time." He has since won at Dovedale and several other places. Mr. E. Price, who owned Nell (or Nantgwillt Lass II.), writes: "Her sire is the noted Dolelve Turk, and her grand sire Dolelve Bob, winner of eight first prizes in open to all trials between 1879 and 1886, and many district prizes. Her grand dam, Nantgwillt Lass, was also the winner of many prizes, so on both sides she goes back to celebrated strains. Her sire won numerous first prizes, and he was also successful at Pale before Queen Victoria. Nell was considered equal in her work to her sire, Turk, or her grandsire, Bob. I can assure you that if you traveled the whole principality for a better bred than Nell you could not find one. Turk, Bob and Nantgwillt Lass are known all over England." It is only right that when such care has been taken to secure the best stock possible, and a large sum invested, that the opportunity may be made the most of. Surely where sheep raising is being extensively introduced, as in Dakota and other western States, the knowledge that good sheep dogs can be got on this continent will be welcome news, and wherever scattered flocks are kept in the more settled States, or where cattle are kept anywhere, the introduction of such dogs means much more than the casual observer may imagine.

A TICKLISH TIME.

Messrs. Radel & Morris's Sheepdogs Wallace and Nell.

### Russian Wolfhounds.

The proprietor of the Borzoy Kennels, Pittsburgh, Pa., has caused some very extensive translation to be made from Russian journals and books bearing upon the Russian wolfhound, with a view of ascertaining the correct type and name of the dogs that are now becoming popular in this country. Recognizing the clouded atmosphere that seems in this country to surround both the nomenclature and what should be their correct form, we think that the translation published in another column, and which the Borzoy Kennel, Pittsburgh, Pa., kindly allow us to use, will be of interest to those who are looking for a way out of the darkness, and may be of use in the forming of that standard that is supposed to be under way.

### The Parisian Dog Barber.

The parapet of one of the bridges seems literally black with people, all leaning over the rail and watching with the most intense interest, says a writer in *Harper's Magazine*. Watching what? Simply a dog swimming in the river and retrieving the stick that his master throws for him. A still larger and more respectfully attentive crowd will be drawn by the fascinating spectacle of a handsome poodle being clipped and washed by one of those artists whose stock in trade consists of a box, a pair of shears and an inscription or sign such as the following: "*Pascal, tondeur. Tond les chiens, coupe les chats et les oreilles. Va-t en ville.*" Pascal and his rivals operate along the river at the points where the quays slope gently down into the water. They wash, soap bathe, brush and comb house dogs in general; and they shear the poodles with an art and an inventive tastefulness that are without parallel in any country of the world, for while they shave the dog's hindquarters they yet leave bands and arabesques of wool that relieve the nudity, together with rings of wool around the legs, and coquettish tufts which give distinction to the tail. The dog clipper, like the human hair dresser, is an artist; he studies every object that is intrusted to his care, and arranges the coiffure in each case according to the character of the poodle. To one he gives a modest and unobtrusive head, and cuts the hair about his nose so that the moustache remains as unworldly as that of an English country curate. To another he reserves, by a clever turn of the clippers, one of those flaring and impertinent moustaches to which silly girls hang their hearts. All these niceties and finesses the pensive idler observes and notes; and he remarks, too, the disdainful way in which the poodle with the impertinent moustache holds out his paw, after his toilet is finished, when the gentleman who accompanies him, evidently a flunky of very superior grade, clasps between the frills of the left foreleg a dainty gold bracelet bearing the name and the coronet of the poodle's aristocratic mistress. This last detail of his toilet having been atttended to, the poodle departs with the flunky, followed by the admiring eyes of the deeply impressed public; and in the afternoon he will be seen in the Bois de Boulogne accompanying his pretty mistress, Madame la Marquise de B., and surveying the fashionable world from the cushions of her elegant victoria.

### Nashville Dog Show.

The Nashville people are evidently in earnest, and even in dog shows the new South is making a rapid stride to the front: The secretary writes: "From the present outlook the coming dog show at Nashville, Tenn., Dec. 6-9, given under the auspices of the Hermitage Kennel Club, is going to be a grand success. They offer $2,000 in cash premiums, every dollar of which will be paid the successful competitors before the show is closed; the money is secured by guarantee notes given by the members of the club, and the prominant merchants all are deeply interested and working hard to make this the bench show of the South. As Nashville is the head center for fine horses and stock we feel it should be for dogs, as we already have some good ones and every month adds new and better ones, and the exhibitors from the North, East and West will have to bring their cracks to take the money home with them. The A. K. C. rules will be strictly carried out and everything is going to be handled and done in the best manner. Spratts will bench and feed and a competent superintendent will be secured. Mr. Roger Williams will judge Russian wolfhounds, deerhounds, greyhounds and foxhounds. Mr. John Davidson will judge all other classes of sporting dogs. Mr. Harry L Goodman will judge all non-sporting dogs. The Cumberland Kennel Company have kindly consented to enter the dogs of their kennel for exhibition only, so as to allow Mr. Goodman, their general manager, to judge; this courtesy has been very much appreciated by the club, as the Cumberland Kennels contain some dogs it would be hard to beat were they allowed to compete. The premium list is now in the hands of the printer and 168 classes have been provided. From the number of applications already received for entry blanks we feel sure of having a fine exhibition in every respect. December is usually a beautful month in the South, the weather being mild and pleasant: consequently there will be little danger of dogs taking cold. The Amusement Hall, in which the show will be held, is admirably adapted for holding such a show, being large and spacious, with high ceiling, and can be well ventilated without causing a draft. For premium lists and entry blanks all communications should be addressed to Robt. C. Stockton, Sec'y, 428 Church street, Nashville. Entries will close Nov. 22.

### Great Dane Importations.

After trying his hand at St. Bernards and fox-terriers Mr. C. D. Bernheimer has concluded to give them up in favor of Great Danes, and will form a kennel in conjunction with Mr. A. H. Heppner. Their first pair have been shipped on the Lahn through Spratt's Patent and were to arrive last week. The names are Hero and Leander. Their intention is to import two clinkers of each color. The dogs just imported are 15 months old and were selected by a friend of Mr. Heppner's. This is probably the most determined effort that has been made here to get at the proper thing, and is entirely in line with Mr. Heppner's repeated assertions that the Great Dane fancy needs a few object lessons to show that the dogs at present winning, with one or two exceptions, are weeds and not the correct caper. We trust the object they have in view will be fully realized.

### Psovoi Type.

Mr. Freeman Lloyd, who has probably studied the "new breed" as much as any one in England, owning some good ones himself, has this to say in the *Shooting Times* in regard to one or two of the questions we touched briefly on in our last issue: "The rib question came in for some discussion [at the Borzoi Club meeting], and the majority were against the *flat* side, and they must be right. The definition flat, in its English sense, must be wrong, for I fancy a flat-sided dog, horse or man would appear a sorry object. The Germans say the ribs ought to be like those of a fish, and they quote the carp as owning ribs of the same shape as the Borzoi. This, I think, is quite right, for any one would be foolish to contend that a *flat*-sided animal could run or have stamina, which are more or less the requisites in a Borzoi, whether he be used in hare, fox or wolf coursing. Borzois are being introduced into this country as companions, and no one can deny their lovely outline, grace and elegance; but I think we shall be going out of our way if we attempt to thrust on the sportsmen, and an open-eyed sporting British public, dogs that don't look like animals that can do the work required. And that is where the sound, all-round, conscientious judge will always put dogs back in competition that do not come up to the requirements of a sporting dog. An unsound deerhound, greyhound, whippet, or any other specimen of the greyhound family, would at once be put back by a judge who knows his business, and for that reason I hold that soundness in make and shape is a leading particular or item in such a breed as the Borzoi. Now, coat in the Borzoi is a matter that will receive some considerable attention, but I believe breeders will tell you—and I can speak, or rather write, practically on this point—that imported dogs carry greater coats than those that up to now have been bred in this country. Whether this is because of climatic differences at the moment I am not prepared to write, but I have been told over and over again by those who ought to know best, that imported specimens, when they lose their coats in England, seldom regain them to the same profusion." This strikes us as the keynote on which the English will sound the improvement we spoke of.

### The Beagle Trials.

These trials promise to be a great success; and the air of sociability and brotherly feeling that prevails is very pleasing in comparison to the kicking and "talk" experienced at other field trials. It is in many ways a sort of family affair, and each sportsman seems pleased to see the other win if he does feel disappointed himself. The club has perhaps done a wise thing for the present in moving the control to New York, and if the present officials can only keep up the gait started by the New England division all will be well.

### Foxhound Field Trials.

Mr. Baird, the secretary, wishes us to say that all fox-hunters are cordially invited to attend the fourth annual field trials of the Brunswick Fur Club, which will be held at Ossipee, N. H., commencing Nov. 14, and continuing till the several classes have been run off. Members and visitors are requested to arrive at Ossipee, which is on the Northern Division of the Boston & Maine R. R., during the afternoon of the 14th, so as to be present when the entries for the trials are made at 7 P. M. of that day.

The attention of all fox-hunters in good standing is called to the fact that the club has opened the trials to general competition, and gentlemen not members of the club may enter hounds to compete for the various prizes under the running rules. Besides the regular class prizes, the special prizes to be competed for are the *American Field* cup, highest general average medal, Vice-President Kinney's endurance and speed medals, and M. F. H. Perry's steel engraving "A Promising Litter," which last is to be awarded to the best puppy, and held one year. Printed certificates will be given the winner of every prize.

Some valuable hounds of strains heretofore unseen in New England have been added to the club's kennels since the last meet, and hunters will have an opportunity to compare their work with the best of native breeding. The puppy class will be run off Tuesday, the 15th, and it may be well to remind those contemplating entering puppies, that they must be under eighteen months old. Arrangements have been made with the Carroll House, a well equipped hostlery, to accommodate members and visitors at $1 a day. Messrs. Wiggin & Huse, the proprietors, will see that the comforts of both hunter and hound are fully considered.

Sportsmen starting from Boston, Mass., will find it most convenient to take the 12:30 P. M. train from the Eastern Depot, Boston & Maine R. R., which goes through direct to Ossipee, arriving at 5:10 P. M. Those from Worcester and western Massachusetts, would find it convenient to take the 8:07 A. M. train from Worcester, over the Worcester, Nashua & Rochester R. R., to Rochester, and there transfer to the Boston & Maine, which would put them in Ossipee at 12:52 P. M. Maine hunters can reach Ossipee most conveniently by taking the Portland & Rochester R. R. from Portland, and transferring at Rochester.

Ossipee, from every point of view, is unquestionably a model place in which to hold field trials, and the club earnestly hopes that fox hunters from every part of the United States will show their interest in the advancement of the foxhound by joining and participating in the trials.

### Brooklyn Dog Show.

Just as we go to press the premium list of the above show is received. This is the second show held under the auspices of the National Greyhound Club, but this time it is open to all breeds. The show will be held at Claremont Rink, Brooklyn, N. Y., Nov. 22 to 25. The list of judges has already been given. The prizes are on quite a liberal basis. Mastiffs, St. Bernards, deerhounds, greybounds, Russian wolfhounds, pointers, setters, spaniels, collies and fox-terriers, have $15 as challenge prizes with sexes divided, excepting spaniels. In open classes they have $15, $10 and $5, and puppies get $5 and $3. Other breeds have challenge prizes of $10 and open $10 and $5, and in most cases the sexes are divided, so it will be seen that plenty of money is up. The specials are a feature of the show and the trophies are impartially placed, every important breed being well provided for, and the specialty clubs have done their duty with the exception of the Mastiff Club, which cannot be expected to make more than one effort or so in a year. The National Greyhound Club gives $20 kennel prizes in most of the important breeds besides a great number of medals. Entries close Nov. 7, and the entry fee is $3. Spratts Co. will bench and feed. All communications must be sent to Mr. James Mortimer, the superintendent, Arbuckle Building, 367 Fulton street, Brooklyn. Entry forms can also be had at this office.

### Importations.

The White Star liner Cufic, which arrived Monday, Oct. 17, had board one Scotch terrier for Mr. C. H. Smith, of St. Stephens, N. B.; one dachshund for Madam Kalina, and a splendid specimen of the Russian wolfhound, a bitch, for Mr. Mortimer. She whelped during the voyage. Mother and fourteen puppies were all doing well on steamer's arrival.

There are a number of new advertisements this week. We notice that David Rowat offers foxhound pups for sale; Alfred Scales, St. Bernard pups; W. Tallman, the noted Gor-

don setter Bendigo and Irish setter; Herbert M. Howes, bull-terriers of choice stock; J. R. Purcell, some pointer pups and grown dogs, also "Purcell" setters. Sunset Kennels, Irish setter dog pups; W. H. Hyland, Gordon setter dog; Rockingham Kennel Club, beagles. In the stud, John E. Weston's noted cockers Black Dufferin and Little Lad.

Those who follow the field trial entries this year—and there are many—will be pleased to see the name of John Davidson, we give it neither Mister nor "Honest"—just plain, among the list of owners of dogs to run in two stakes at the International Field Trials next month. This well known judge and sportsman has been so busy in the judging ring and in the field as a field trial judge the past few years, that it must be a pleasant change for him to "see how it feels yourself" just for once in a while.

The New England Kennel Club claim dates April 4 to 7 1893 for their annual bench show at Boston, Mass.

## A DEED OF A DOG.

*From the Artisan (sent to us by "Podgers").*

THE following legal document is self explanatory. It is a deed transferring a certain dog from one individual to another. The transfer took place in Massachusetts. We have purposely altered the names of the contracting parties, and of the city and county, to spare the said parties the annoyance that a fuller publicity might bring:

*Know all men by these presents,*

That we, Arthur Thompson, Jr., of Fall River, in the county of Berkshire, and commonwealth of Massachusetts, merchant prince, and Elizabeth W. Thompson, wife of said Arthur, in her own right, in consideration of the love and affection we bear to Henry W. Coleman, of said Fall River, mariner, and of divers other good and valuable considerations us therefore moving, the receipt whereof can never be adequately acknowledged,

Do hereby give, grant, bargain, sell, convey, remise, release, and forever quit claim, transfer, set over, and set on to the said Henry W. Coleman two individual halves of a certain dog, hound, mastiff, bulldog, collie, setter, pointer, harrier, retriever, beagle, pug, spaniel, terrier, cur or canine creature, now known as Tu Tu Thompson, but hereafter to be called Tu Tu Coleman; situated when last seen, in the position of one about to "eat the crumbs which fall from his master's table," and bounded and described as follows, viz: Beginning in the dining-room at breakfast, thence running northeasterly through the kitchen to a bone and a biscuit; thence turning and running southerly and westerly in an irregular curve, in the direction of a certain black cat, to a point where said cat intersects with a cherry tree standing on land now or late of Joshua Crane; thence turning sharply and running in a straight line, under the fence, to a swill tub standing on land of one Robeson, there measuring 3ft. at every step; thence turning southeasterly and walking slowly to the point of beginning. Containing all that he can hold, more or less, and being the same dog described in a certain license dated May 1, 1889, and recorded with the records of the Town Clerk of said town of Fall River.

To have and to hold the said Tu Tu, by a string attached to his collar, with all the privileges and responsibilities thereunto belonging, to the said Henry W. Coleman and his heirs and assigns forever, or until said string breaks.

And we hereby, for ourselves and our heirs, executors and administrators, covenant with the grantee and his heirs and assigns, that we are seized with simple terror of said Tu Tu; that we have good reason to sell and convey him as aforesaid; that he is free from all incumbrances except stomach-ache, monkey mange, rabies, hydrophobia, sunstroke and gross and confirmed habits of raiding swill-tubs, running to fires, sheep-killing and terrorizing the neighborhood; that we will, and our heirs, executors and administrators shall warrant him to run away whenever called; to consume blacking in any form, liquid or dry, from boots, bottles or stoves; to religiously observe all dog days; and when at sea to be thoroughly competent to act as the watch dog of the dog watch; and that we will defend him against the lawful claims of Mr. Robert Thompson, but against none others.

Reserving to us and our heirs and assigns an estate in fee-tail in said Tu Tu, with the right of docking the tail just behind the ears on the breach of any of the conditions of this deed.

Provided, however, and this conveyance is made upon the express condition that the said Henry W. Coleman shall feed and water said Tu Tu once in each and every day without recourse to us in any event, and shall procure for him on or before the 1st of May in each year a license as a first-class victualler.

In witness whereof, we, the said Arthur Thompson, Jr., and Elizabeth W. Thompson, hereunto set our hands and seals this 1st day of May, in the year one thousand eight hundred and eighty-nine.

ARTHUR THOMPSON, JR.,
ELIZABETH W. THOMPSON.

In presence of Charles A. Swett, W. W. Taylor.

FALL RIVER, May 1, 1889.

*Commonwealth of Massachusetts, Berkshire, ss.*

There personally appear before me, a justice of the peace within and for said county, the above-named Arthur Thompson, Jr., well known to me and to the police, and acknowledged the foregoing instrument to be his free act and deed.

C—— K. W——, Justice of the Peace.

## NATIONAL BEAGLE CLUB FIELD TRIALS.

ON Tuesday morning the trials to be held by this club during this week commenced very auspiciously indeed. There were about 25 spectators and all of them evinced the keenest interest in the sport. Owing to the protracted drought the ground was very dry, only in the very early morning, while the ground was damp from the haw frost, did the scent lie at all well. The draw for Class A, dogs 13in. to 15in., took place on Monday night and resulted as follows: Pottinger Dorsey's Lee II. with Somerset Kennels' Storm (absent). Forest Beagle Kennels' Forest Hunter with W. H. Child's Tony Weller. H. G. Hornnaker's Ring with H. L. Kreuder's Roy K. Somerset Kennels' Glory with W. H. Ashburner's Base.

The judges were Messrs. W. S. Clarke and Joe Lewis. The start was on Tuesday morning, at 8:10, on the outskirts of Nanuet, N.Y. Owing to Storm's absence, Tony Weller and Forest Hunter were the first down; Tony was handled by Frank P. Smith and Forest Hunter by Mr. Jamieson, his owner. They were cast off in a field by the side of the road and worked through swampy ground, hunting out old trails with an occasional whimper, but neither worked with much vim. Tony got on a warmer trail and took on a little burst in the bottom land, but was soon at fault; then they were put on the hot trail of a started rabbit, but soon lost it. This was the order right through the heat. Tony's work was the best, showing more natural hunt and "get out." They were called up at 8:45.

RING—ROY K.—At 9 o'clock these two were cast off, Ring being in charge of F. W. Chapman and Roy K. was handled by A. Eska. They started where the others left off. FOREST AND STREAM man put up a rabbit after some ranging around by the dogs, and dogs were put on bunny's trail. Ring crossed it and struck it in the fern patch, but headed off in the wrong direction. Roy had a try with head in the right line, but did not follow it. After this we worked out a lot of ground to no particular good, and dogs were up at 10:25. Ring hunted with the most vim, but had little head qualities. Roy K. loafed and was content to follow when the other led.

GLORY—BASE.—Glory was in the hands of Charlie Peabody, and W. H. Ashburner handled his own dog. They were down at 10:30. Soon after starting we got into a dense growth of rushes, and several hares were started, but the growth was too thick to see the dogs, and as we were going out Base started game and carried us along at a merry clip through a dogwood patch and woods to hillside, where he lost. Base struck it again, closely followed by Glory, but soon was at fault, giving us time to get a breath. This was lively hunting and opened our "pipes" thoroughly. Some cold trailing then took place and then in wood bottoms some merry work ensued, and dogs were up at 10.50. Base had probably the luck at first, but he led afterward and showed himself a level-headed worker and fast; Glory was also no slouch and was always on hand. This was the best heat so far, and when it ended we were on the "drip." Lee then ran a bye alone for 30 minutes, getting on to several good trails in the woods and doing good work. The judges consulting, left in Tony Weller and Base, Lee II. and Glory.

*Second Round.*

TONY WELLER—BASE.—Down at 11:47 in open on hill. Rabbit got up by Judge Clarke, but Tony drawn to it failed to catch on, ground getting very dry. Base had cast ahead when he struck it hot, and led us a merry scramble of a half mile circle, Tony packing to him well at first, but after, Tony did back-trail work. Base was at fault at edge of woods, and failing to strike dogs were put in the open. When in thick grass Base struck it and led us nicely over the field, when we lost again. A rabbit was here put up, and though dogs were laid on trail could not follow it; wind and dry ground against them. Another rabbit was furnished, but no work could be done on it. At 1:02 dogs up, and Base had shown himself very much better than his opponent, who has gone off in his work. Base is very level-headed and a resolute worker.

LEE—GLORY.—After lunch in the open at 1:40 these two were cast off. A rabbit was started by spectators and hounds were put on. Lee II. was first to tongue, and with one or two checks led the pace through the woods, Glory keeping well to him. Lee made some intelligent casts when at fault; in fact both dogs worked intelligently. Lee showed the most hunting sense and was a very busy worker.

*Final Round.*

LEE II.—BASE.—The judges made no mistake in looking for the winner from these two. They were put down at 2:40 in open by cover. There was a good deal of tonguing here for a while, but neither dog could get away, Base showing conspicuously at times. Across a nasty swamp Lee struck it hot and carried us over railroads, but lost in edge of woods, through woods and into open, when another little chase ensued, but soon at fault; old trail very likely. Both then started something warm, and away we went through cover, both dogs going nicely with plenty of music; outside the cover they lost. Rabbits were plentiful here, and going back into woods Lee did most of the leading, getting on two or three rabbits and doing the best running, the pace being very hot; in fact all followers were pretty well pumped out when the decision was given in Lee's favor at 3:55.

Judges decided Lee II. first money.
Base second money.
Glory third money.

No one could quibble at this decision and "My Maryland," therefore, walked off with both first and second money, third going to Bernardsville, N.J. Both Lee and Base are intelligent workers and very busy. Probably had Glory had familiar handling he would have felt more confident, Mr. Peabody having only had him in hand four days. This ended the day's work, which was, all things considered, a good one. If a little rain should fall the scenting will be much improved. The trials will be continued through the week.

## NATIONAL BEAGLE CLUB MEETING.

Meeting called to order 7:45 P. M., Oct. 24, at the Kreuder Homestead by President Chapman. Present: H. L. Kreuder, H. V. Jamieson, W. S. Clarke, W. H. Ashburner, Pottinger Dorsey, Henry Hansler, George Laick and John Bateman. Treasurer's report read and accepted. Minutes of meetings held July 1 and 28 approved. August A. Knoblauch, Jersey City, and C. Staley Daub, Frederick, Md., elected to membership.

It was then moved that the club take official action on letter of Mr. Phœbus advocating the raising of standard for height to 16in. It was decided that the club retain the present standard of 15in. as the maximum. It was voted that the club hereafter offer only silver plate as special prizes in place of cash money prizes.

After another motion was lost the election of officers for ensuing year resulted as follows: President, H. L. Kreuder; First Vice-President, H. F. Schellhass; Second, J. W. Appleton; Third, John Bateman; Secretary-Treasures, George Laick; Executive Committee with the above, F. C. Phoebus, Geo. W. Rogers and H. W. Lacy. After some general conversation the meeting adjourned.

## FLAPS FROM THE BEAVER'S TAIL.

TORONTO, Can.—Mr. Irving L. Smith, of Montreal, has sold the black, white and tan English setter dog St. Lambert Rake (Warwick Rake—Brighton Speed) to Mr. J. S. Corregan, Whitemouth, Manitoba.

Protests still continue to come in. One has been lodged against the bull-terrier bitch champion Starlight for winning in the open class at Ottawa. The C. K. C. has been asked for its decision.

Dr. Wesley Mills, president of the C. K. C., has been elected president of the Montreal Veterinary Medical Association in connection with the Faculty of Comparative Medicine and Veterinary Science of McGill University and also president for the fifth time of the Association for the Study of Comparative Psychology of the same university. The latter studies all that relates to animal intelligence.

H. B. DONOVAN.

## KENNEL NOTES.

**Kennel Notes are inserted without charge; and blanks (furnished free) will be sent to any address.**

### NAMES CLAIMED.

☞ **Prepared Blanks sent free on application.**

*Kildare Rugby, Kildare Belvidere, Kildare Swiveller, Kildare Bushrod, Kildare Fairfax, Kildare Digby, Kildare Gladys, Kildare Gretna, Kildare Dinah and Kildare Vixen.* By W. L. Washington, Pittsburgh, Pa., for Irish setters, six dogs and four bitches, whelped Aug. 3, 1892, by champion Dick Swiveller out of The Marchioness.

*Robin Hood, Starlight II. and Moonlight.* By D. F. Mitchell, Clayton, N. Y., for white bull-terriers, one dog and two bitches, whelped Oct. 15, 1892, by Dole's Gully the Great out of Dole's champion Starlight.

*Quite Stormy, Real Stormy and Zephyr.* By F. B. Zimmer, Gloversville, N. Y., for white, black and tan beagles, two dogs and one bitch, whelped Oct. 4, 1892, by Stormy out of Myrtle the Mouse (Elora Rambler—Elora Blue Bell).

*Kent's Brake.* By H. L. Keyes, Worcester, Mass., for lemon belton English setter dog, whelped July 16, 1892, by Draco Kent (Kent II.—Fedora Laverack) out of Lady Kent (Kent II.—Lady Kendel).

*Kent's Lad and Kent's Dream.* By H. L. Keyes, Worcester, Mass., for blue belton English setter dog and bitch, whelped July 16, 1892, by Draco Kent (Kent II.—Fedora Laverack) out of Lady Kent (Kent II.—Lady Kendel).

### BRED.

☞ **Prepared Blanks sent free on application.**

*Rochelle Topaz—Merry Monarch.* Rochelle Kennels' (New Rochelle, N. Y.) black and tan terrier bitch Rochelle Topaz (champion Broomfield Sultan—champion Meersbrook Maiden) to their Merry Monarch (Halifax Charlie—Nell), Oct. 2.

*Tough—Corktown Comet.* Corktown Kennels' (Ottawa, Ont.) cocker spaniel bitch Tough (Wildair—Belle) to their Corktown Comet (Obo, Jr.—Dot Smirle), Sept. 3.

*Rideau Romola—Corktown Cupid.* Rideau Kennels' (Ottawa, Ont.) rocker spaniel bitch Rideau Romola (Bob Obo—Cleo) to Corktown Kennels' Corktown Cupid (Obo, Jr.—Dot Smirle), Oct. 3.

*Nellie—Tip Obo.* P. J. Keating's (Toronto, Ont.) cocker spaniel bitch Nellie to Corktown Kennels' Tip Obo (Bob Obo—Cleo), Aug. 22.

*Ainstey Daisy—Heather Amphin.* E. Brooks's (Hyde Park, Mass.) Dandie Dinmont terrier bitch Ainstey Daisy (Heather Sandy—Leomester Gyp) to his Heather Amphin (Ettrick—Yashmod), Sept. 9.

*Heather Madge—Laird o' the Heather.* E. Brook's (Hyde Park, Mass.) Dandie Dinmont terrier bitch Heather Madge (Duncan—Heather Peggy) to his Laird o' the Heather (Pool's Dick—Loudon's Nettle), Aug. 7

*Fannie K.—Eberhart's Cashier.* Eberhart Pug Kennels' (Cincinnati, O.) to their Eberhart's Cashier (champion Kash—Lady Thora), Sept. 9.

*Jess—Blemton Shiner.* G. Pettis's (California City, Cal.) fox-terrier bitch Jess to J. B. Martin's Blemton Shiner (Blemton Rubicon—Blemton Brilliant), Sept. 19.

### WHELPS.

☞ **Prepared Blanks sent free on application.**

*Dorothy.* C. P. Lawshe's (Trenton, N. J.) bull bitch Dorothy (Caliban—Hillside Girl), Oct. 7, four (one dog), by A. J. Hatch's Rustic Swell (Kittering Jubilee King—Rustic Belle).

*Edgewood Fly.* Desert Kennels' (Salt Lake City, Utah) bull-terrier bitch Edgewood Fly (Duke—Alice), Sept. 17, seven (three dogs), by his Little Prince (Bendigo—Kit).

*Fancey.* M. Murphy's (Brooklyn, N.Y.) greyhound bitch Fancey (Gay City—Suppliant), Sept. 8, three bitches, by Jas. Black's Flash (Hu'c Hollo—Phebe Mayflower).

*Ion.* J. R. Purcell's (Hickory, Tenn.) pointer bitch Ion, Sept. 22, six (three dogs), by his Jupiter (Tom Bowline—Belle C.).

*Lida Hovey.* J. R. Purcell's (Hickory, Tenn.) pointer bitch Lida Hovey (Dick Swiveller—Bloomo III.), Sept. 18, eight (five dogs), by his Flockfinder (Old Staunch—Flake of Flockfinder).

*Nannie Brairdus.* J. R. Purcell's (Hickory, Tenn.) English setter bitch Nannie Brairdus (The Dude— ——), Sept. 15, twelve (eight dogs), by his Ned Buntline).

*Flake of Flockfinder.* J. R. Purcell's (Hickory, Tenn.) pointer bitch Flake of Flockfinder, Sept. 29, nine (four dogs), by his Flockfinder III.

*Broomfield Madge.* Rochelle Kennels' (New Rocelle, N. Y.) black and tan terrier bitch Broomfield Madge (Jackson's Patrick—Jackson's Queen), Oct. 5, six (five dogs), by their champion Broomfield Sultan (champion Broomfield Turk—Broomfield Belle).

### SALES.

☞ **Prepared Blanks sent free on application.**

*Hero—Kenora whelps.* St. Bernards, whelped Aug. 27, 1892, by W. H. Dixon, Jamestown, N. Y., an orange and white dog each to Mollie Mason, Cleveland, O., and W. H. Odell, Evansville, Ind., and an orange bitch to Frank Hanchett, Jamestown, N. Y.

*Berkshire Caution—Zetta whelp.* Fawn, black points, mastiff dog, whelped Aug. 10 1892, by F. B. Zimmer, Gloversville, N. Y., to E. B. Browning, Baltimore, Md.

*Sinbad—Empress Josephine whelp.* Orange and white rough St. Bernard dog, whelped Aug. 15, 1892, by Werowance Kennels, Trenton, N. J., to Col. Van Cleve, Somerville, N. J.

*Jubilee—Juno whelps.* White, black and tan beagles, two dogs and one bitch, whelped July 21, 1892, by F. B. Zimmer, Gloversville, N. Y., to B. A. Fox, Richmond, Va.

*Jubilee—Ripple whelps.* Beagles, whelped July 27, 1892, by F. B. Zimmer, Gloversville, N. Y., a white, black and tan dog to Willard Wilson, Jr., same place, and a black, white and tan dog and bitch to B. A. Fox, Richmond, Va.

*Corktown Coxey.* Black cocker spaniel dog, whelped April 20, 1892, by Tip Obo out of Tough, by Corktown Kennels, Ottawa, Ont., to S. Henderson, same place.

*Wanda.* Black cocker spaniel bitch, whelped June 30, 1890, by Bob Obo out of Cleo, by Corktown Kennels, Ottawa, Ont., to J. F. Eder, Williamsport, Pa.

*Corktown Crusoe.* Black cocker spaniel dog, whelped May 23, 1891, by Obo, Jr. out of Dot Smirle, by Corktown Kennels, Ottawa, Ont., to J. F. Eder, Williamsport, Pa.

*Rumpus.* White, black and tan beagle dog, by Elora Rambler out of Elora Millie, by F. B. Zimmer, Gloversville, N. Y., to Geo. Robbins, same place.

*Prince of Ellerslie.* White bull-terrier dog, whelped April 26, 1892, by Barney O'Hea out of Grove Duchess, by H. M. Howes, Somerville, Mass., to C. M. Kohn, Montgomery, Ala.

*Royal Rosey.* White, black and tan beagle bitch, whelped Aug. 6, 1891, by Royal Krueger out of champion Twinkle, by F. B. Zimmer, Gloversville, N. Y., to L. W. Clute, Ballston Lake, N. Y.

*Rocket.* White, black and tan beagle dog, whelped April 29, 1892, by Elora Rambler out of Elora Beauty, by F. B. Zimmer, Gloversville, N. Y., to C. H. Strickland, Deep River, Conn.

## ANSWERS TO CORRESPONDENTS.

*There is no charge for answering questions under this head. All questions relating to ailments of dogs will be answered by Dr. T. G. Sherwood, a member of the Royal College of Veterinary Surgeons. Communications referring to other matters connected with Kennel Management and dogs will receive careful attention.*

A. W. S., Andes, N. Y.—Consult our kennel advertising columns for reliable breeders of mastiffs

C. L. MITCHELL, New Haven, Conn.—The greyhounds Lady Vivian and Sir Richard, are not registered. We have no other means of finding their pedigrees.

READER, Monticello, N. Y.—I have an old pointer dog, and he has a sore about as large as a half-dollar on the outside of each hindleg, just below the hips. The hair is off, and they have small holes in at times and discharge matter. Ans. Apply the following ointment:

| | |
|---|---|
| Bal. Peru | ʒ ii. |
| Tr. benzoinco | ʒ i. |
| Ung. zinci ox | ʒ vi. |

Mix. Apply twice daily. Also give an aperient.

X. Y. Z.—I have a cocker spaniel puppy about 11 months old, a bright and healthy dog, but he suffers from a lame hind foot. Two months ago he had a bad swelling on it which I supposed was an abscess, but it did not suppurate, and after a while subsided and disappeared. The foot remained tender, however, and has now become sore again, being raw and swollen between the toes. Will you please tell me how to treat him for it? Ans. Soak the foot twice a day in a warm solution of creolin 1-20, then apply zinci ointment and bandage.

INQUIRER, Toronto, Can.—Please give me the pedigree of the imported St. Bernard Barry (A. K. R. 2,150) and list of prizes awarded to him. Ans. In regard to this dog the A. K. R. prints the following: "This dog was purchased abroad by Mr. C. H. Pedder and passed into the hands of Messrs. Arnold, Constable & Co. on arriving in this country. Nothing is known at present as to where the dog was bought or his pedigree. Messrs. Arnold, Constable & Co. disposed of Barry to Mr. Rodney Benson, who in turn sold the dog to its present owner (St. Bernard Kennels, Clifton, Staten Island). The editor of the A. K. R. is personally conversant with the history of this dog so far as known."

### World's Fair on Steel.

SEND twenty-five cents to F. A. Lord, Phenix Building, Chicago, Ill., and obtain a fine steel plate picture of the World's Fair grounds and buildings, suitable for framing.—*Adv.*

At the store of D. H. Solis, 932 Arch street, Philadelphia, may be seen an enormous grizzly bear that was recently mounted by W. W. Hart & Co., the taxidermists. The bear measures 11ft. in height, and was estimated to weigh over a ton when in the flesh. The skin came from Alaska and was Indian dressed.

# Canoeing.

## Cruisers and Cruising.

COBOURG, Oct. 19.—*Editor Forest and Stream:* In your last issue I notice "Cayuga's" graceful response to my challenge. Allow me, through your friendly columns, to assure him that I heartily sympathize with him in his cruising proclivities, and agree that a mere trial of speed would by no means settle the question of who had the best all-round boat. We have undoubtedly heard too much about fast boats and not enough about useful and handy ones of late, and I, like "Cayuga," want to know if "Nessmuk" and "Seneca" have no successors.

"Cayuga" is right in his surmise as to the purpose for which Elsa was designed. Speed was an object, but not the first and only aim. He is wrong in supposing me indifferent to the delights of the rod and gun. I can enjoy casting the winsome fly into the eddy behind the great granite boulder with the best of anglers, even when the trout are not rising freely; and can tramp contentedly through the bush for hours even if I get only a solitary partridge. But these pleasures are only secondary to the exhilaration of a lively bout to windward in a fresh breeze on blue water, or an intricate piece of navigation through unknown waters with only chart and compass as a guide; or again, a run in a cedar canoe down some rapid river where at any turn the strong current may develop into a boiling rapid and every sense is on the alert to detect the sunken rock or impassable waterfall.

Nature! Aye, I can enjoy her works to the full, and some ten years of camp life have not dulled my appreciation of the pleasures of the social pipe and chat and the glowing coals of the camp fire, with the moon casting a broad silver band over the quiet waters of the lake and glistening on the dewy bottom of the upturned canoe; everything hushed and quiet save the lap, lap, of the wavelets on the beach and the occasional hoot of the owl from the big dead pine tree back of the camp.

"Cayuga's" references to my logs of the cruises of the Sylvia and the Winnie are quite too flattering, but if any one cares for a similar narrative of a cruise on better known and more frequented waters I will respond to his request and spin a yarn of the experiences of the Elsa and her crew during a 300 mile cruise from Cobourg to Montreal completed only a few days since. Had I the pen of a William Black I might attempt a description of the beauties of the Thousand Islands in Indian summer, minus the summer tourist and plus the October coloring, and I might try to do justice to the majesty of Lake Ontario during an equinoctial sou'wester. My powers of description being very limited, however, I can promise nothing more than an unvarnished narrative of an exciting run down the great lake and river toward the sea. HENRY K. WICKSTEED.

[We can answer for our readers that anything from our correspondent's pen will be welcome to them; we know of no truer disciple of "Nessmuk" and "Seneca" than the skipper of the Sylvia.]

## CANOE NEWS NOTES.

The Chicago C. C. met on Oct. 10 at the residence of Mr. C. W. Lee, for election of officers and a general discussion of canoeing matters in the West. The following officers were elected for the coming year: Captain, J. H. Ware; Mate, A. W. Kitchin; Purser, H. B. Cook. Mr. E. Hough, of FOREST AND STREAM, and Dr. Jas. A. Henshall were elected to honorary membership. After the formalities were disposed of all adjourned to the dining room and partook with characteristic vigor of the refreshments provided. The club was fortunate in having with them for the evening Commodore Munger, ex-Secretary Woodruff and Mr. Crawford, of Dayton, O.—C. W. L.

# Yachting.

IF any one but "Podgers" had penned the harsh and cruel statements which the FOREST AND STREAM's reputation for fairness to both sides compels us to publish this week, we should have attributed them to either a misconception or misstatement of the facts. Knowing, however, the strict impartiality and the freedom from all prejudice of our correspondent, we feel that any attempt at explanation on our part could but be unavailing. Like the unfortunate victims of the Mikado,

"His terrible tale we can't assail,
With truth it quite agrees.
His taste exact for faultless fact,
Amounts to a disease."

THE position of the New York Y. C. in regard to the new deed of gift is very clearly shown in the answer of General Paine to the newspaper men at the first meeting of the special committee. The question written and sent in to the committee was, "Under the instructions to the committee incorporated in your resolution, is not the committee bound to hold to the policy that the Cup, if won by Lord Dunraven, must and will be held under the new deed of gift only?" General Paine's answer was brief and to the point: "This challenge is under the new deed of gift."

DIVESTED of all irrelevant details, the main issue is plainly stated: The New York Y. C. declares that it will not accept a challenge for the America's Cup unless the new deed of gift is recognized as legal and binding by the challenger. Lord Dunraven has asserted positively that he will not challenge under the new deed, and the leading British yacht clubs have made the same assertion. Such being the case, a race can only be possible through the square backing down of one party or the other.

MR. ROYAL PHELPS CARROLL has placed himself on record as a thorough sportsman by the statement which he made at the meeting of the New York Y. C., to the effect that if Lord Dunraven's new yacht should prove under 80ft. waterline, his new 84-footer would not be available to defend the Cup. There may still be some yachtsmen who consider it sportsmanlike to beat a smaller yacht by a larger one, but Mr. Carroll is not one of them.

## The Deed of Gift Discussion.

THE Boston *Herald* devotes nearly a column of its space this week to the FOREST AND STREAM in an attack which more closely resembles abuse than argument; but the real issues in dispute are so few and simple, and so purely technical, as to give no excuse to the *Herald* for ignoring them and resorting to personalities, a method of fighting which we do not propose to follow. Without attempting to reply to the *Herald's* attack in detail, or in kind, we quote several of the least irrelevant of its remarks:

"In this week's issue it [FOREST AND STREAM] again takes up the old cry, and says about the new deed that 'it was adopted secretly and hastily by a small party in the club, and no opportunity was given to the members at large to discuss or vote on it.' In the light of events during the past two weeks, if common sense and decency had prevailed, no such remarks would have been used.

"On Oct. 4 Lord Dunraven's challenge was received by Secretary Oddie. Two weeks' notice was given the members that the challenge would be acted on Tuesday, Oct. 18. The meeting was widely noticed in the press, and the members had ample time to talk the matter over between themselves. At a meeting specially called to consider Dunraven's challenge, the club, after the new deed had stood five years and had been thoroughly discussed by the press and the members, again approved its conditions by a unanimous vote of the members present. This surely is an answer to the above statement."

What connection can exist between the meeting of Oct. 3, 1887, at which the deed of gift was changed, and that of Oct. 18, 1892, at which Lord Dunraven's letter was considered, the *Herald* does not state. The meeting of Oct. 3, 1887, was held three days after the last Thistle race, the call being hardly within the legal limit As this special and hastily convened meeting was nominally called for the transaction of a lot of trivial business relating to a reception to Mr. Bell, a dinner to Messrs. Paine and Burgess, a testimonial to Mr. Burgess, thanks to the Police Department, etc., it attracted little attention, and few members were present, only fourteen of them, we understand, being qualified to vote.

At this meeting the America's Cup was taken out of the hands of the New York Yacht Club, and turned over to a committee of five, to do with absolutely as they pleased; the club at large having no further power in the matter. The deliberations of this committee were guarded with the utmost care, and nothing was known of their disposition of the cup until the new deed was finally executed by them and Mr. Schuyler. When at last read at an open meeting of the club, the deed had been adopted beyond possibility of change.

It is on these plain facts that we base our statement that the change of conditions was made hastily, secretly, by a few men, and in an unusual manner, and that the new deed has never been submitted to a vote of the yacht owners of the New York Yacht Club. At the meeting on Oct. 18 no vote was taken on the new deed, but a vote was taken which amounted to a repudiation of one of its most important clauses, that relating to the dimensions. The best reply which the *Herald* has to offer is that two weeks' notice was given in the case of a meeting held for another purpose five years later.

Again the *Herald* says: "The predictions of the FOREST AND STREAM that no more challenges would be sent while the present deed existed have fallen flat. Two have been sent, and the latest is to be acted on Tuesday night."

For once the *Herald* quotes us correctly. We said several years since that no foreign yacht club would challenge for the America's Cup under the new deed of gift. In 1889 a challenge was issued by Lord Dunraven, indorsed by the Royal Yacht Squadron; but only because it was understood that the holders would not insist on the new deed. As soon as the true state of the case was made plain, both Lord Dunraven and the R. Y. S. withdrew the challenge. Again within the past month a second challenge has come from Lord Dunraven, as yet unindorsed by a yacht club; but it is made expressly on the condition that it is not under the new deed.

Our criticism that the cessation of racing for the Cup has injured building and racing in America, brings out the following from the *Herald*:

"Of the harm it—the new deed—has done to American yachting in stopping all international racing there is no need to speak—the results are too plain, says the New York paper. This is another one of its old cries. Compare yachting to-day as it is on both sides of the water. Two big 90ft. steel schooners were built on this side last season, and another 84-footer is now building at Bristol, and she is to go across for the cups. The fast Wasp has made a record, and the data obtained from the 21ft. class is more than was ever found out from the past races for the Cup. Herreshoff in sending the Wenonah across put life into yachting in Scotland."

In the three years 1885-6-7, when international racing was at its height, there were built the following yachts, from 70 to 90ft. or over: Puritan, Priscilla, Mayflower, Volunteer, Atlantic, Sachem, Merlin, Œnone, Titania, Shamrock, Marguerite, Constellation and Iroquois, a fleet of 13 fine yachts in three years. In the five years, 1888 to 1892, there have been built Katrina, Sea Fox, Lasca and Alcea, four in all. Of course racing has flourished in the smaller classes and a few cruising yachts have been built, but in the large racing classes the era of building began with Genesta's challenge and ceased abruptly with the new deed of gift, a curious coincidence, if nothing more.

Such methods as those of the *Herald* can only be displeasing to fair and impartial spectators, and disappointing to those partisans of the new deed who find in it almost the only paper which has not withdrawn its first hasty indorsement of the action of a part of the New York Y. C. in 1887.

## Lord Dunraven's Challenge.

AT the first meeting of the special committee on Oct. 17 only Gen. Paine and Messrs. Fish and Rogers were present. On the following day a second meeting was held at the office of Fleet Captain Peabody, at which Messrs. Canfield and Smith were also present. A reply to Lord Dunraven was framed and despatched by Saturday's mail, but its nature is not yet known.

The New York *Times* comments as follows on the challenge:

"The New York Y. C. has at last found a way to accept a challenge to race for the America's Cup without demanding the dimensions of the challenging vessel. This is unquestionably a hopeful sign, but it by no means insures a race next season. Whether it be enforced or not, the clause calling for dimensions is still in the deed of gift governing the cup, and gives any club holding the cup the power to demand dimensions if it feels disposed to do so. This clause is unfair and unsportsmanlike, and no matter how many concessions may be made, the New York Y. C. can escape the charge of trying to take an unfair advantage of an opponent only by expunging the clause entirely. Taking advantage of the mutual agreement clause in order to work around the dimensions clause is a poor substitute for the doing away with the latter.

"The situation of to-day is practically the same as it has been ever since the present deed came into existence. The New York Y. C. is trying to establish the deed as a fair document and is working harder to do this than ever before. The wording of its resolutions, however, is well calculated to obscure the main issue, which is, whether English yachtsmen will accept the new deed. Lord Dunraven, on the other hand, is evidently under the impression that concessions are equivalent to a waiver of the deed, whereas one race under the deed will establish it for all time.

"It would save much unnecessary correspondence if the subject of the deed were settled first, for it is unlikely that English yacht clubs will challenge when they learn that in case their yacht won they would have to accept the 'instrument in writing lawfully executed,' and thereafter enforce its terms. Lord Dunraven's challenge is not official. It will have to be forwarded by a recognized yacht club, unless indeed the New York Y. C. should interpret 'mutual agreement' to mean that anybody can challenge."

## Lord Dunraven and the New Deed.

THE position of Lord Dunraven in regard to the new deed is very clearly stated in a letter recently written by him to a New York yachtsman, in which he speaks as follows:

"It is I think evident that as long as the present regulations remain in full force, no challenge is likely to issue from the United Kingdom; whether the opinions of yachtsmen who object to some of these regulations are justifiable or not, is really beside the question. What we have to deal with is the fact; and the fact is that international racing is at a standstill, and is likely to die out altogether if no race takes place next year. Such an eventuality would be a matter of the greatest regret to me as a lover of yacht racing; and I have, therefore, written to the New York Yacht Club to ascertain whether it is not possible to arrange a match for next year.

"I am strongly in the opinion that, in the case of an international challenge cup, the conditions under which it should be raced for ought to be settled by a mixed committee representing at any rate the two nations most interested in the matter, namely, the United States and the United Kingdom; and in the interests of sport I wish that course could be pursued in the case of the America Cup. But this is not the case, and the matter of a 'pious opinion.'

"In mentioning to the New York Y. C. my principal objections to the present rules, I am speaking merely for myself; but at the same time I believe I am justified in assuming that my views would meet with pretty general acceptance on this side. My main objection is to the dimension clause. Length on the load waterline being the chief factor in determining speed, should be given with the notice of challenge, but no other measurements should be required. To be compelled to furnish all the principal dimensions of his vessel is too onerous upon a challenger. Length on the load waterline, if desired the Custom House register, is, I think, sufficient to protect the challenged party from being taken in any way unawares.

"As the object of international racing is that the best ship and the best handled ship should win, the competing vessels should be as nearly as possible identical in length on the waterline, and the courses should be as free as possible from all adventitious circumstances. The question of courses is best left to be settled by mutual agreement, but a rule should be made respecting length, and to prevent the possibility of a recurrence of such a discrepancy between the estimated and measured length, as occurred in the case of Thistle. If the New York Y. C. see their way to remodel the deed of gift in accordance with the suggestions on these points in my letter to them, I will challenge; and in the interests of sport I most sincerely hope that my suggestions may prove acceptable to them, and that I may be able to send a vessel across to compete for the America Cup in 1893—a year most appropriate for such a contest."

The Riverside Y. C. closed the summer season on Oct. 15 with a dance at the club house, Riverside, Conn. The club has prospered greatly during the year, and with its increased membership has outgrown the present club house. Plans are now ready for extensive alterations and and additions this winter, and with the opening of next season the club will have one of the finest houses and best harbors on the north shore of Long Island Sound. The work of dredging the harbor will be carried on by the Government during the winter. This year the club has secured winter quarters at 39 West Thirty-first street, New York, where the members will meet. During the winter the club may give a series of lectures on yachting subjects.

## La Gloria.

SAILING AND CRUISING BOAT.

THE little boat whose lines are here given belongs to the series of small sailing and cruising craft of light draft that was so fully illustrated in the FOREST AND STREAM in 1886-7,* one of which was reproduced two weeks since. The chief peculiarity of these boats, the sneakbox, the Barnegat cruiser, and the FOREST AND STREAM cruiser, is the excessively full waterline—a peculiarity a few years since found only in boats of this class, but now carried to an extreme degree, and apparently with satisfactory results in the larger classes of yachts.

The present design is based upon that of the Delta, published on Nov. 3, 1887, the beam, draft and midship section being about the same, and the displacement but little greater. At the same time an effort has been made to produce a handsomer and more stylish boat, and to realize such advantage as may be had through a moderate overhang forward, the stern being carried out to give a graceful finish, with some added power. The original drawing was made over that of the Delta, to the same scale, 1½in. to the foot. As this made a rather larger craft than was desired, a scale of 1¾in. was used to reduce the length to about 15ft.

The drawing here shown has been reduced in the process of photo-engraving from a final drawing of the smaller size to a scale of 1in. to the foot; from which drawing the following table of offsets for the smaller size was made out. The table of offsets for the 18ft. size was taken from the original larger drawing, the waterlines in which were 3in. apart, and do *not* correspond with those here given. In each size the distance of the vertical stations apart is exactly 1-12 of the waterline, but in the 18ft. boat the various waterlines are spaced 3in. apart; while in the smaller boat they are but 2in. The heights in both cases are measured from the baseline, the heel of the scag being a little below this line. The details of the two sizes are as follows:

TABLE OF DIMENSIONS.

The small figures indicate eighths of an inch.

| | 15ft. 4in. l.w.l. FT IN. | 18ft. l.w.l. FT. IN. |
|---|---|---|
| Length over all | 20 1 | 23 6 |
| l.w.l. | 15 4⁴ | 18 |
| Overhang, bow | 1 3⁴ | 1 6 |
| stern | 3 5 | 4 |

BODY PLAN.

SAIL PLAN "LA GLORIA"—CRUISING AND SAILING BOAT.

La Gloria was designed for Mr. M. T. Bennett, of the New York C. C., and was built by the St. Lawrence River S., C. & S. L. Co., of Clayton, N. Y. The centerboard shown is of plate iron, weighing 50lbs., and little or no ballast is carried in sailing single-handed, save a cruising outfit of stores, cooking utensils and tent. She is very stiff with her crew of one on the gunwale; in ordinary sails about New York Bay in the vicinity of the club house she carries four men very comfortably. The rig was originally made for but never used on another boat, and differs from the sail plan here shown in that the mainsail is a leg of mutton, set with a yard, the boom being some 2ft. shorter than in the drawing; the jib, mizen and total area are about the same.

Any one of the numerous rigs illustrated from time to time in the FOREST AND STREAM, the jib and mainsail, yawl or cat yawl (the canoe rig), may be adapted to the boat, but the yawl rig, with either a lug or a boom and gaff mizen, is probably as good as any. The boat handles well under her rig, though the center of effort is well aft. A boomkin is needed for the mizen, and the main sheet works best on a traveler placed well aft over the rudderhead. In case the strain on the boom end is too great when on the wind, a snatch block may be used, at about a third of the length in from the end, through which the sheet is led from the traveler block to the hand or cleat.

The boat, even in the smaller size, contains a good deal of room, which may be arranged to suit the taste of the owner. In La Gloria there are two bulkheads, placed as shown, at the fore end of trunk, and just abaft the cockpit. A square hatch in the deck just forward of the mast opens into the forward compartment, while a door in the after bulkhead gives access to the after space. Permanent seats may be arranged as shown, or more space may be had by keeping the cockpit clear and using cushions or movable boxes for seats. The tiller is quite short, so as to clear the body when the helmsman is seated well aft; in single hand sailing the weight of crew should be further forward, and a longer tiller is consequently necessary.

The scantling and method of construction described in connection with the Delta will answer for the present boat. If a more elaborate finish is required, the upper strake, transom and planksheer, with the forward and after partner pieces, may be of mahogany, the deck being of white pine. The boat is fitted with oars and rowlocks.

## "Podgers" on a Cutter.

SAN FRANCISCO, Oct. 12.—*Editor Forest and Stream:* *Veni, vidi,* but I did not *vici*, which I suppose I must translate for you to save you the trouble of taking down your big books, and which means—I have had a sail in a blasted English cutter, you know. I came, I saw, and was not conquered. All these years I have contented myself by looking on and witnessing the sufferings of those who sailed cutters and sailed in them, and extended my heartfelt sympathies.

They say all things come to those who wait. I have had almost every thing come to me that was disagreeable, but have been spared a cutter until recently, which fills the bill of "all things," and I have little now to fear that can ruffle the serenity of my declining years.

A friend in his kindness of heart who meant well invited me to go out for a sail in his cutter, the only one, I am pleased to say, on this coast. He said, "I know your predjudice against that manner of craft, but come along and let me convince you of your error." I said to myself it is strange that people there are, intelligent, respectable human beings, who actually believe in cutters. It occurred to me that it would be interesting to witness this form of insanity in actual practice, and also being averse to decline an invitation from the source, an old and valued friend, I decided to accept.

It was a beautiful sunny afternoon, such charming weather as is kept on tap here—a pleasant five-knot breeze when we went on board. The craft was built here from a regular English cutter design by Burgess—about 30 odd feet over all. There were three of us, a boy and the crew of one. Being a guest, I did not volunteer to help get up sail, and for a good reason, there was not room on deck for more than two to work. She had a cockpit, and when the owner and the small boy effected a lodgment and the long tiller was shipped, such a notice should have been hung out as we see on the French omnibusses when full, "*Complait.*" for there was no room for any one else. Fairly under way, this fact was demonstrated by the coming aft of the helmsman, who took a position on the windward combing with the most weighty portion of his body outside of it and legs hanging down inside the cockpit. The other two were required to work the two jibs, or staysail and jib, the crew lying on deck and crawling on his belly forward and aft, as occasion required, while your correspondent submerged himself in the companionway, standing on a lower stair, with head just above the opening, keeping close watch of the boom, which, according to cutter methods, hung low and nicely calculated to just clear the top of the head of a short man—but not his hat, which custom required should go overboard the first tack: hence all cutter men wear knit caps.

By standing on the stair and barely showing a nose above, and ducking expertly every time she tacked, the few remaining hairs of a head that had been too often hit by booms of small boats to leave much sense in it (*vide* being found aboard a cutter) were preserved with scalp intact.

At the first filling of her sails she went over on her side until the lee deck was under water. I looked around to see where the squall came from, but no squall was evident. My friend noticing my surprise said, "She goes down easy until she gets to her bearings, as you see, but she won't go any further." I mentally hoped not, as I saw nothing loose on deck for a life preserver. She may not go any further, I thought, but she goes to that point on a slighter provocation than any boat I ever set my foot on before, and that far she continued to go and to stay until the cabin windows were awash and the keel must have dried off in the sunlight. Standing in the companionway and leaning against the lee side gave me the position of the leaning tower or a half blown over tree, and was exceedingly tiresome. For relief I went below to find the cabin floor standing up edgewise, and as she gave a lurch at the moment I brought up against her side, nearly standing on my head.

There were a good many boats out sailing and one, a sloop, one of those despised light draft centerboard craft, had the temerity to walk to windward of us—just think of that; to windward of a cutter; oh, ye disconsolate, and standing up, passed us, blanketed us, and was soon half a mile ahead. To think that it should ever be said and that I should see it; that a so-called skimming dish should have the cheek (and the legs) to outwind, outsail and out-Herod a cutter. The boat of all boats, the chosen of our English brothers, who knows it all, and when we fall down and worship and humbly repeat our form of prayer: "Oh thou who knowest all things and can build better and faster boats than we, allow us humbly to copy thee in this and be English in all things, yea, even to turning up the bottom of our trousers and ejaculating by Jove, you know."

My stay below was short, for to my shame be it said I had to rise to the surface. It reminded me of on one occasion being on board an English steamer when a young chap in the cabin began to show positive signs of intense sickness, which the stewardess observing, called out as she made a dash for him: "You cawn't be sick 'ere, you know. You cawn't be sick 'ere; sir," to which he as the crisis came, gasped: "Cawn't I? Cawn't I, though? Just see me." So I must confess that after the record of a hundred trips by sea and years of yachting with never a qualm, I had to climb to the surface for air to save myself from emulating the Englishman.

We returned to anchorage and when all sail was off the craft resumed her not normal but semi-occasional position, *i. e.*, when at anchor.

My friend, glowing with enthusiasm, remarked: "Well, you can't say she is not a dry boat, anyhow. We never took a drop aboard." I said: "Dry, I grant you, at least one side of her, the one that was in the air, and as water is averse to flying to windward, then following curved lines over an object and backward into a cavity, it could not well reach the cockpit." My friend was evidently disappointed at my want of appreciation of cutters. I do confess I am likely to remain in my present benighted condition. The cutter education in one lesson was a failure. I could not comprehend the beauties of the system in such a brief time; French without a master would be easier.

I am sorry to hold opinions so adverse to the theories and teachings of the FOREST AND STREAM, but I am still a subject of a call to the unconverted.

I shall build no cutter this year, neither shall I purchase the Bedouin or any one of the many for sale. And why for sale? (Do you know of one that is not?)

I know I am lost forever in the estimation of the editor, and doubtless he laments seeing such evidences of my benighted condition—but doubtless will set it down more in sorrow than anger—and print under protest my opinions of cutters.

PODGERS.

## YACHT NEWS NOTES.

Mr. Wm. A. Slater, of Norwich, Conn., owner of the steam yacht Sagamore, will build this winter a larger steel yacht, to be 227ft. over all, 32ft. beam and 14ft. 6in. draft, with ample coal capacity for long cruises. She will be bark rigged and will carry water ballast. The name of the designer is not yet made public, but it is stated that he is a young man as yet unknown.

A new yacht club by the name of the Pastime has been organized at Newark, N. J., the officers being: Com., Fred Weslow; Vice-Com., Henry Duerr; Sec'y, John Leen; Treas., Joseph Berch; Meas., Henry Hender; Fleet Surgeon, Dr. McCaffary. The club has a fleet of 12 boats ranging from 20 to 40 ft.

Among the steam yachts which will winter at the basin of the Gas Engine & Power Co., on the Harlem River, are Tillie, Viking, Seneca, Ladoga, Puzzle, Trophy, Osprey, Flying Dutchman, Oriole, Clermont, Reva, Oneida and Satellite.

The Philadelphia *Inquirer* is responsible for the statement that in the event of a match being made, Lord Dunraven's yacht will be an enlarged Valkyrie, but with "a greater curve to her buttock and *fetlock* lines."

The report of the loss of the Caterina was unfortunately true, the yacht grounding on Oct. 5 at 4 A. M., only one of her crew of six, Henry Diaper, the mate, reaching shore.

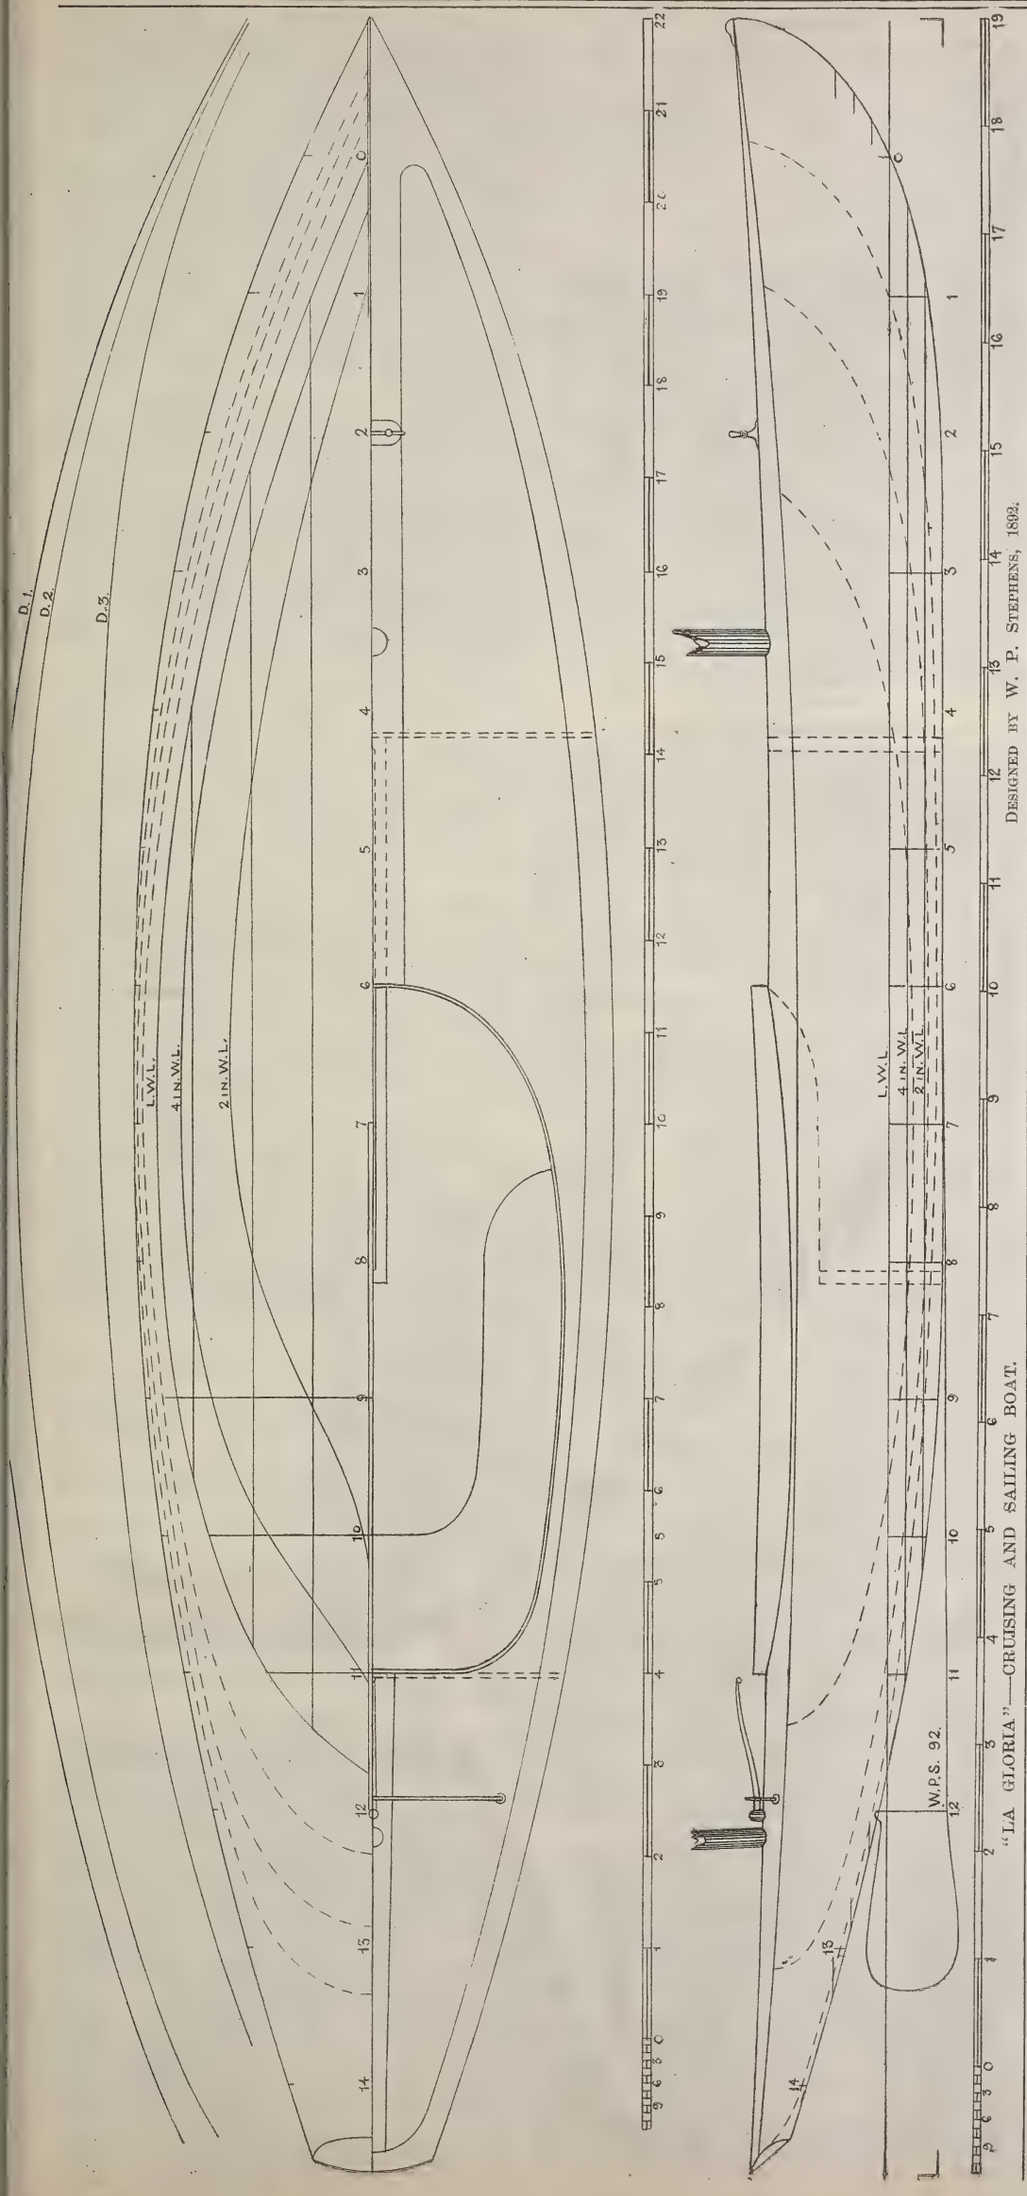
We call attention to the advertisement of Messrs. Cox & King on another page. The steam yacht mentioned is one of the finest of modern boats.

The Canarsie Y. C. closed its season on Oct. 22 with an entertainment at the club house in which a fine chowder played a prominent part.

The Corinthian Y. C. of California closed the season with a dance on Oct. 15 and a squadron sail on the following day.

The sweepstakes race of the Michigan Y. C. was started on Oct. 15, Alice Enright beating Princess by 4m.

The Pavonia Y. C. closed the season on Oct. 16 with a clambake at its Jersey City house.



# Rifle Range and Gallery.

### Military Rifles in Newark.

NEWARK, N. J., Oct. 22.—The weekly shoot of the First Brigade Rifle Association was held on the 200yd. ranges at the Shooting Park to-day under rather unfavorable weather conditions, the light being fitful and the wind swinging in a tantalizing fashion from "11" to "2 o'clock." All the members used Springfield military rifles with Buffington sights and front-sight covers, the shooting being done off-hand. Below are the detailed scores:

| | | | | | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|---|
| Priv C H Townsend | 4 | 4 | 4 | 3 | 4 | 5 | 4 | 5 | 4 | 4 | —41 |
| | 4 | 4 | 5 | 4 | 4 | 3 | 5 | 3 | 5 | 4 | —41 |
| | 4 | 4 | 4 | 5 | 4 | 5 | 4 | 5 | 4 | 5 | —44 |
| | 5 | 4 | 4 | 5 | 4 | 4 | 5 | 4 | 4 | 4 | —43 |
| | 5 | 4 | 5 | 4 | 4 | 5 | 5 | 4 | 4 | 4 | —44 |
| Maj D L Wallace | 4 | 4 | 5 | 3 | 3 | 4 | 4 | 4 | 5 | 4 | —40 |
| | 4 | 4 | 4 | 4 | 4 | 3 | 3 | 4 | 3 | 4 | —37 |
| | 4 | 4 | 4 | 3 | 3 | 4 | 4 | 4 | 4 | 3 | —37 |
| | 3 | 4 | 4 | 4 | 3 | 3 | 4 | 5 | 4 | 4 | —38 |
| Capt H B Schureman | 4 | 4 | 3 | 4 | 4 | 4 | 4 | 3 | 4 | 4 | —38 |
| | 5 | 4 | 3 | 3 | 3 | 3 | 3 | 4 | 4 | 3 | —35 |
| | 4 | 4 | 4 | 4 | 4 | 4 | 3 | 4 | 5 | 3 | —39 |
| Capt G W Church | 5 | 4 | 4 | 4 | 3 | 4 | 4 | 3 | 4 | 4 | —39 |
| Capt W H Howard | 4 | 4 | 4 | 4 | 4 | 3 | 4 | 4 | 3 | 3 | —37 |
| | 4 | 3 | 3 | 3 | 3 | 5 | 4 | 3 | 4 | 4 | —36 |

Townsend used U. M. C. .45-60-400 carbine ammunition, all the others using Frankford arsenal .45-55-405 carbine.

## Ephrata Shooting.

EPHRATA, Pa., Oct. 16.—The members of the North End Rifle Club held their regular monthly off-hand shoot last Friday afternoon, distance 200yds., Standard American target being used. The weather was all that could have been desired—no wind, clear, etc. The following scores were made:

| | | | | | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|---|
| L M Wiest | 6 | 7 | 6 | 5 | 6 | 8 | 9 | 10 | 6 | 5 | —68 |

| | 5 | 7 | 6 | 6 | 6 | 6 | 5 | 6 | 6 | 7 | —60—221 |

The next meeting will be rest shooting, to be held Friday, Oct. 28.

D. B. LEFEVER, Sec'y.

## Chicago Rifle.

CHICAGO, Ill., Oct. 20.—The following scores were made by members of the Garden City Rifle Team, at their practice shoot, at Burry and Erickson Gallery, 146 S. Halstead street, Oct. 11. It was shot off in teams, under the captaincy of Messrs. C. H. Hankle and Sorensen. The following scores were shot:

| Hankle's Team. | | Sorensen's Team. | |
|---|---|---|---|
| S H Burley | 104 54 114—272 | Al Sorensen | 106 55 110—271 |
| C A Hankle | 105 53 106—264 | G O Nejsa | 106 50 105—261 |
| J C Marlin | 100 46 101—247 | A McBean | 110 56 100—266 |
| G W Gibbs | 97 47 109—253 | J Polites | 99 53 101—253 |
| R McBean | 104 42 104—250 | Mrs Thornton | 97 53 100—250 |
| Thos Ford | 100 45 102—247 | F Mibohef | 98 45 87—231 |

The sweepstake was won by Mr. H. S. Burley, 117 out of a possible 120 points, Chicago, Oct. 14.

BURLEY—HANKLE.

Mr. H. S. Burley defeated C. A. Hankle, in a rifle match for $50 a side, on the evening of Oct. 17. The match was shot in Burley and Erickson's Gallery, 146 S. Halstead street. The conditions were open sights, off-hand, 25yds., 150 shots each, at Massachusetts paper target. Six shots constituted a score, hence there were 25 scores for each, which were as follows:

| Burley | Hankle |
|---|---|
| 65 64 65 67 63 | 60 64 61 57 65 |
| 63 69 62 67 63 | 64 66 56 67 59 |
| 63 66 67 64 63 | 67 58 64 61 62 |
| 63 67 63 70 64 | 61 65 60 64 66 |
| 63 64 64 67 61—1617 | 65 66 63 61 67—1568 |

## Garden City Rifles.

CHICAGO, Oct. 19.—The members of the Garden City Rifle Team met for their regular weekly practice at Burley & Erickson's gallery, 146 South Halsted street, Tuesday evening, Oct. 18. The members were divided into two teams, captained respectively by Messrs. C. A. Hankle and Al Sorenson, and a team match was shot under the conditions and rules governing their weekly contest. The match resulted in favor of Capt. Hankle's team as the following scores will show:

| Hankle's Team. | | A Sorenson's Team. | |
|---|---|---|---|
| W J Gibbs | 112 54 109—275 | A Sorenson | 103 53 107—263 |
| C A Hankle | 105 51 106—262 | H S Burloy | 97 53 108—258 |
| G O Vesja | 102 55 105—262 | Martin | 100 51 87—238 |
| J E Long | 107 50 106—263 | Erickson | 104 50 90—253 |
| A McBean | 109 57 111—276 | Mrs Thornt'n | 92 52 96—240 |
| Thos Ford | 94 50 96—240 | R McBean | 104 51 150—260 |
| J Polites | 94 53 88—235—1813 | C E Long | 94 52 88—234—1746 |

A sweepstake followed the team contest, which was won by Mr A. McBean with a score of 111 out of possible 120 points.

# Trap Shooting.

**All ties divided unless otherwise reported.**

### FIXTURES.

**If you want your shoot to be announced here send in notice like the following:**

Oct. 27.—Reading (Pa.) Shooting Association, sparrow tournament, at Black Bear Inn.

Oct. 27.—Maplewood (N. J.) Gun Club open tournament, combined with tenth team contest of N. J. Trap-Shooters' League.

Oct. 27-28.—West Newburgh Gun and Rifle Association tournament, Newburgh, N. Y.

Oct. 27-29.—Fulton Gun Club tournament, at Atlanta, Ga.

Nov. 23-26.—Milwaukee (Wis.) tournament, targets and live birds.

Nov. 24.—John A. Hartner's sixth annual tournament, Bishop's Driving Park, Baltimore, Md.

1893.

May 23-25.—Knoxville Gun Club tournament, $1,000 added to purses. Also valuable merchandise prizes.

June 12-16.—New York State Sportsmen's Association tournament, at Rochester.

## DRIVERS AND TWISTERS.

Some curious combinations are run foul of by those who travel around the country, and a full share of them come within the range of the newspaper men who frequent trap tournaments. And some of these combinations show how easily some people can be imposed upon. A case in point has reference to a combination gun used by a West Virginian during the Martinsburg tournament. This man had a hard and close shooting gun, and between events he was heard to say that "any man who shot anything but a Greener would be a loser." Tom Keller inquired if the speaker used a Greener and received an affirmative answer, the gun being handed over for his inspection. As Tom opened the gun a quizzical look o'erspread his jolly features, and without saying a word he handed it over to "us" with the request that we name the make. Without a moment's hesitation we said "it's an L. C. Smith." And sure enough it was. It appears that the owner of the gun had inquired for a second-hand Greener, without knowing the difference between that famous maker's guns and a Winchester rifle. Some enterprising dealer in second-hand guns being anxious to oblige the prospective buyer had taken a second hand L. C. Smith gun, and after removing the rib had fitted on a W. W. Greener rib and had also covered the "Smith dog" on either lock plate with a small brass plate bearing the word "Greener," and all these days the poor misguided buyer had been flattering himself that he was blessed in the possession of an imported gun.

During the twelfth shoot of the Connecticut State League, at Willimantic on Oct. 11, there was a meeting called to order by H. A. Penrose and a State association was organized. The following officers were elected: J. W. Webb, Willimantic, President; H. A. Penrose, New London, Vice-President; Allen Willey, Hartford, Secretary; F. C. Fowler, Moodus, Treasurer, and a Board of Directors composed of H. A. Penrose, H. L. Edgarton, Willimantic; Mr. Bates, New Haven; Mr. Whittlesey, Hartford, and W. M. Thomas, Bridgeport. The name of the association is the Connecticut State Shooting Association, and tournaments will be held annually. As all the officers and directors are active workers they expect to make this association second to none. Where the first annual tournament of the association will be held will be determined at a meeting to be held within the next sixty days.

At a meeting of the Lake St. Clair Fishing and Shooting Club at the Russell House, Detroit, two resolutions were offered, to be passed upon at the next regular meeting in January. One authorizes the increase of membership in the club by five, and limits the amount of their entrance fees. The other provides that the annual dues be increased. The resolutions are intended to provide for the payment of the club's indebtedness. The board was authorized to re-engage Steward Dwight L. Whitney for another year. This action will be received with delight by the members of the club generally, their families and friends, for Mr. Whitney has proven by his ten years' service with the club that he is one of the most able as well as popular stewards in the country.

The Essex Gun Club held its monthly shoot on Al. Heritage's Marion grounds on Oct. 20, there being a fair attendance. The sport opened with a 5 bird sweep in which Moore killed 5, as did Henry, Breintnall and Hughes getting 4 each, and Thomas 3. In the club shoot at 10 birds per man Henry killed 10, Breintnall 10, Walters 10,

Moore 9, Hughes 7, Morris 7, Thomas 7, Terrill 6 and Cromellin 6 The final event was at 5 birds, the scores being: Walters 5, Breintnall 5, Moore 5, Thomas 5 Hughes 4, Cromelin 4 and Morris 3. Those who took part in the shoot at Newton, N. J., on Oct. 18 were treated to a game dinner in the evening by two members of the gun club who served up 43 woodcock shot by them on the previous day.

The monthly medal shoot of the Syracuse Gun Club was held on their Croton street grounds on Oct 18 in a very brisk wind. Each man shot at 50 bluerock targets, the scores being as follows: First class, Mann 37, Holloway 36, Spangler 33, Becker 31. Mosher 26. Second class, White 31, Ginty 31, Frazer 31, Duguid 30, Holden 28. Third class, Dey 26, Harwood 23. In the shoot-off the tie for second class medal, at 10 targets each, Frazer broke 8. Ginty 7 and White 6. Harvey McMurchy shot at 50 targets and broke 39.

From the Ohio *State Journal*: "Poor 'Shorty' Bacon, well-known to trap shooters in Ohio, is in ill luck. He hired a man to dig his potatoes, and the hired help stole his watch; he attended the Mt. Sterling, Ky., tournament, got disgusted at the miserable management and came home only to learn that his favorite pointer dog had been stolen; he recently lost the best horse on his farm by death; went to the Finley shoot and his $250 Greener ejector wouldn't work. Shorty, this is hard luck."

The Maplewood (N. J.), Gun Club held its monthly cup and open shoot on Oct. 22. Each man shot at 50 singles in the cup contest, the winner being J. W. Smith, who broke 47. Ferd Van Dyke broke 45, E. D. Miller 45, W. R. Hobart 43, R. H. Breintnall 43, W. Drake 41, C. Dean 35, S. Tillou 35 and J. Van Idenstine 35. In a series of ten target events, the following numbers were broken and missed: Dean 35 15, Van Idenstine 44-16, Breintnall 47-13, Drake 48-12, Parry 8-2, Van Dyke 28-2, Hobart 18-2, Smith 27-3.

The Island City Gun Club, of Wheeling, W. Va., on whose grounds will be held the initial tournament of the West Virginia State Sportsmen's Association, has 25 active shooting members and the most complete grounds in the State. The club shoots at bluerock targets, thrown from expert traps by North's electric pull. The club will arrange to cater to a big crowd on Thanksgiving Day.

The Wessner Gun Club has been organized at Tamaqua, Pa. Shoots will be held at Wessner's Hotel on the last Tuesday of each month. Three handsome gold medals, costing $40 each, will be awarded montly to the persons making the three highest records; to the first a gold medal, to the second highest a silver medal, and to the third highest a silver medal.

The following officers have been elected by the Mount Kisco (N. Y.) Rod and Gun Club: President, George S. Birrell; Vice-President, Al. Betti; Secretary, Dr. E. Dunn; Treasurer, George Sutton; Manager, G. V. Birrell; Trustees, John Wood and James Kennedy. The club starts with 25 active members and shoots every Monday afternoon on the grounds of John Martin.

On Nov. 17 a big crowd of experts will assemble at John Erb's "Old Stone House" grounds in Newark to take part in an open-to-the-world sweepstake at 25 live birds per man, $25 entry. The event will start at 2 P. M., and among the entries are Samuel Castle, C. M. Hedden, H. E. Smith, Allen Willey, John Riggott, W. S. Canon and M. F. Lindsley.

W. R. Hobart's new score sheets are very convenient for clubs. Each sheet is ruled for 12 scores of 25 shots each, with lines at the head for date, place, number of event and squad, amount of entrance fee and number of moneys. They are put up in pads of 50 each, and with each 100 sheets are supplied three sheets of carbon paper.

The Yale Gun Club, of New Haven, has elected the following officers: President, P. B. Herita, '93 S.; Captain, F. F. Randlet, '95; Secretary and Treasurer, C. Anderson, '94 S. The first shoot will be held at Springfield with the Harvard Gun Club on the day of the football game.

The initial shoot of the West Virginia State Sportsmen's Association for the Protection of Fish and Game will attract a big crowd to Wheeling on Thanksgiving Day. Both live birds and artificial targets will be used. The members of the Island City Gun Club will do the hustling.

During the tournament of the West Virginia Sportsmen's Association there will be contests for both the live bird and target championships of the State. This tournament should occupy two days instead of one.

"Billy" Wagner, the popular sportsman from Washington, D. C., was in town this week. "Billy" came on to arrange for the manufacture of his new rapid-loading machine, which experts pronounce the finest in the market.

Jimmy Thompson of Martinsburg is a prominent politician as well as an enthusiast in sporting matters. His influence in the West Virginia Legislature will greatly benefit the new State Sportsmen's Association.

John A. Hartner is making great preparations for his annual tournament to be held at Bishop's Driving Park, Baltimore, Md., on Thanksgiving Day.

The final shoot of the New Jersey Trap Shooters' League takes place to-day on the grounds of the Maplewood Gun Club just above South Orange.

The secretary of every gun and sporting club in West Virginia is requested to send his name and address to J. W. Penn, Wheeling, W. Va.

The target and live bird tournament to be held at Milwaukee, Wis., Nov. 23-26, will be a star affair and will attract shooters from all over the country.

A very cleverly arranged catalogue is the one gotten out by the Wilkesbarre Gun Company, descriptive of the arms made by them.

Chicago, the World's Fair and the world's tournament will be the absorbing topics in sporting circles during the next few months.

Al. Heritage says he will hold a tournament at Marion the latter part of November. There will be one target and one live bird day.

F. G. Moore and J. H. Richmond, of the New Jersey Shooting Club, have been in Sussex county, N. J., after feathered game.

Ed Landvoight, of the Capitol City Rod and Gun Club, of Washington, D. C., has gone off on a deer-hunting trip.

West Virginia clubs and unattached sportsmen should not fail to correspond with J. A. Penn, Wheeling, W. Va.

During the live-bird shoot at Somerville two men received scratches on the face from shot fired by "bushwackers."

The report of the Riverview Gun Club tournament, received as we go to press, will appear in full in our next issue.

The boys were amused at the primitive hook and ladder outfit run to a fire on the first night in Martinsburg.

A "newspaper match" will be one of the attractions during the November tournament at Marion.

"Ginger and the 12-bore Parker" shot a great race for the championship cup at Martinsburg.

The usual weekly shoot at live birds will take place on John Erb's Newark grounds on Saturday.

Herbert Knight and Harry E. Smith, of Newark, have been shooting ducks in Great South Bay.

The Wheeling, West Virginia contingent "shot out of sight" at Martinsburg.

Will Apgar was the life of the party during the live bird shoot at Somerville.

"Wanda" can talk as strongly as her husband on the subject of wood powder.

Tredway's "Comfort Recoil Pad" will be put on the market in a short time.

Martinsburg trap-shooters are to have a new club house and grounds.

Newburg, N. Y., will catch a number of Jerseymen to-morrow.

"Wanda" is very proud of her prize won at Martinsburg.

Go to Newburg to-morrow, even if you cannot go to-day.

C. H. TOWNSEND.

## Columbus at Indianapolis.

WHAT was doubtless a pleasant little shooting event if shot according to programme, is thus set forth in the title page of a high art, hand-painted folder just at hand from Indianapolis: "Yourself and friends are invited to land in Indianapolis 400 years later than Columbus and enjoy the holiday set aside to commemorate his great discovery. An all day shoot at North End Shooting Club grounds, Monon Park, Friday, Oct. 21, 1892, beginning at 9:30 A. M. Take College avenue-Fall Creek electric care to Nineteenth street, thence two squares east."

By the way, the FOREST AND STREAM report of Indianapolis shoot last week was a scoop. But that's nothing.

That Executive committee of the Illinois State Sportsmen's Association will have two or more members out of town this week and next. President Organ must keep after them and catch them. It is time and more than time something should be done about that World's Fair shoot. But let not the public be troubled. The shoot will be here and it will be a success. Chicago will do it and do it well. E. HOUGH.

## Watson's Park.

BURNSIDE, Ill., Oct. 12.—The following is the score made here to-day by the South Chicago Gun Club at 20 live pigeons each, for club medal, under new Illinois State rules:

A W Reeves..... 21212221120121111112—19
L C Willard..... 12112102221211112212—19
John Watson..... 21111212210021121111—18
P Miller..... 22110212212012100010—15
C F Templeton..... 11101111110001001111—15
F E Willard..... 20211111210211012121—18
Dr Larkin..... 00121111212111121210—17

In the shoot off between Reeves and L. C. Willard at 5 birds, Willard won, killing 5 straight to Reeves 4; Reeves lost his last in the 5.

Target medal, 20 bluerocks each: Miller 17, Reeves 14, Templeton 12, L. C. Willard 20, F. E. Willard 23, Larkin 5 (out of 21), Dr. Clement 10 (out of 27).

*Oct. 18*.—Scores made here to-day by the Chicago Shooting Club for club medal, 20 live pigeons each, new Illinois State rules:

Wadsw'th10211222222221112221—19 Watson...12222121102222122112—19
Atwater..21111222111012221211—19 B Rock...21012212012011111111—17
Kleinman22122112222212112110—20

Wadsworth, Atwater and Watson being allowed one dead bird each added to their score, makes them tie with Kleinman. Tie will be decided next meeting.

*Oct. 20*.—Audubon Club, for club medal, 20 live pigeons each, new Illinois State rules. Only two members showed up:

Felton....12111202112012220111—17 Wadsw'th21101121222221111122—19

This gives Wadsworth the medal for keeps, he having won it the requisite number of times.

*Oct. 21*.—Scores in open sweepstakes at live pigeons, new Illinois State rules. Three sweeps were shot, each at 7 birds, entrance $5, divided 60 and 40 per cent.:

| | | | |
|---|---|---|---|
| No. 1: | | | |
| G Kleinman | 1212211—7 | Capt Anson | 1111212—7 |
| A J Atwater | 1222011—6 | Patterson | 2220210—5 |
| A W Reeves | 2010111—5 | W T Best | 2010221—5 |
| No. 2: | | | |
| Kleinman | 1112121—7 | Patterson | 1222211—7 |
| Atwater | 2212111—7 | Reeves | 1201112—6 |
| Anson | 0211222—6 | Best | 1222210—6 |
| No. 3: | | | |
| Kleinman | 1211112—7 | Patterson | 2122212—7 |
| Atwater | 2221212—7 | Reeves | 2111101—6 |
| Anson | 1211111—7 | | |

In shoot-off for first, Patterson dropped out on his sixth and Anson on his seventh; Kleinman and Atwater each killed 9 straight and divided.

The wind up was a $1 freeze out. Patterson quit on his first and Reeves and Best on their third; Kleinman, Atwater, Anson and Hall each killed 7 straight and used up the purse.

RAVELRIGG.

## A Kansas City News Budget.

KANSAS CITY, Oct. 16.—A sensation was created here Friday by the announcement that E. D. Fulford had challenged J. A. R. Elliott for a series of five matches at 100 birds each for $1,000 and the wing-shot championship. This challenge is the result of a considerable amount of "chewing the rag" between Fulford and Elliott since the former's defeat by the Kansas City man for the *American Field* cup, and Fulford's defi is not unexpected. As soon as the formal challenge is promulgated Elliott will as formally accept it. The understanding is that the five races shall take place in December in five different cities. Fulford naming one place in the East, which will probably be Harrisburg or Pittsburgh and Elliott one in the West, which will be Kansas City. The shoot here, however, will not be on the "hillside" grounds, as Fulford objects to them, but on some level spot to be mutually selected. The other three matches will probably be shot at Indianapolis, Cleveland and Cincinnati. It is to be understood that the winner of a majority of the races is to be styled the champion and the general impression here is that Elliott will win not only a majority, but probably all five races.

There have been three club shoots during the past week, the Kansas City, O. K. and Foresters', each holding their monthly medal shoots.

The monthly shoot of the Kansas City Gun Club furnished good sport and brought out a large field. The birds were a fair lot and some very pretty kills at long range were made by several of the members. J. Lee Porter won the medal on a score of 10 straight. Mr. H. McMurchy, representative of the Hunter Arms Manufacturing Company, of Fulton, N. Y., was a guest of the club and shot with the club, killing a clean score of 10 birds by some very pretty shooting. The score was:

| | | | |
|---|---|---|---|
| J B Porter | 0212222122—9 | Frank Graham | 1220120221—7 |
| F J Smith | 0222111222—9 | J E Guinotte | 0020101001—4 |
| George B Orr | 0011101111—5 | H McMurchy | 2111121121—10 |
| Oscar Cogswell | 2222121011—9 | A B Cross | 1212222202—9 |
| J L Porter | 2111211222—10 | M Heim | 1112210222—8 |
| J W Jackson | 1021111011—8 | G Schoder | 0101121110—7 |
| W S Halliwell | 2112121101—9 | W V Rieger | 0111022110—7 |
| E W Hinman | 1221211100—8 | George Dugan | 2010101200—5 |
| J K Guinotte | 1022222222—9 | E J Becker | 0101000000—2 |
| Ben Hellmes | 1100020000—3 | W Crosby | 1110102011—7 |
| J A Bolen | 1020212212—8 | Con Holmes | 0000122200—4 |

The Foresters' Gun Club's first medal was won by Victor W. Floweree, after an exciting shoot-off with J H. Knoche. Thomas James and J W Jones, all having tied on 13 out of 15 live birds. L. S. Mohr won the second medal on 12. The score:

| | | | |
|---|---|---|---|
| J S Harrison | 0220221200022222—10 | J A Young | 0021212020022o2— 9 |
| J A Moninger | 20o0021212100o0— 7 | N Scarritt | 1120100110o001o— 8 |
| L S Mohr | 0111011110101111—12 | F Hoover | 0200012101111202— 7 |
| E W Kinnan | 1211o10022101111—11 | F J Graham | 1020101100010221— 8 |
| J H Knoche | 1101122122022222—13 | A A Whipple | 2001011022312011—10 |
| Thomas James | 2211022110221111—13 | Vict Floweree | 2112211022122012—13 |
| V F Boone | 0012210100121221—10 | Frank Groves | 1110o11o2101221—11 |
| J W Jones | 1112111111210011—13 | | |

The birds shot at by the O. K. Gun Club were a fast lot, and pretty work was done. J. B. Porter, Oscar Cogswell and Bob Mize tied on 9, and Porter won the shoot-off. The score:

| | | | |
|---|---|---|---|
| Bob Mize | 1211112o22—9 | Lee Porter | 2o21120111—8 |
| H P Stewart | 1000020213—5 | Billy Everingham | 2010121120—7 |
| Ed Hickman | 1120111012—8 | J Thompson | 0220202100—5 |
| Oscar Cogswell | 1122111101—9 | J E Guinotte | 2012122110—8 |
| Jim Porter | 2202222222—9 | William Bryant | 0112101110—7 |
| F J Smith | 2102112022—8 | | |

At a recent meeting of the Missouri Fish and Game Protective Association, held at the Shooting Park in this city, with President Frank J. Smith of the Kansas City Club in the chair, and James Whitfield as secretary, director W. V. Rieger presented a communication from J. K. Gwynn, Executive Commissioner of the Missouri World's Fair Commission, asking the co-operation of the members of the State association in securing specimens for an ornithological display for exhibition at the World's Fair. A resolution was adopted calling on all members of gun clubs that are members of the State association, and all sportsmen and commission men who handle game, to aid in securing specimens of the birds and waterfowl that inhabit the State of Missouri, and sportsmen of Missouri who are readers of FOREST AND STREAM are urged to aid in the work. Specimens should be forwarded by express as soon as practicable after being killed to Frank Dixon, taxidermist, No. 16 East Sixth street, Kansas City, Mo., who has been employed by the World's Fair Commissioners to prepare the exhibit. The shipments need not be prepaid, as provision is made for express charges by the Commission. It is desired to have a pair of each specimen of bird or waterfowl that makes its home in the forests, prairies, lakes and streams of the State. After the World's Fair closes the exhibit is to be presented to the State University Department of Natural History.

Gun club matters have commenced to interest the local wing-shots since the weather began to grow cool, and there has been plenty of shooting during the past week. On Wednesday last the Kansas City cup, emblematic of the local wing-shot championship, was finally disposed of. The cup shoot was first inaugurated during the winter of 1887-8, the trophy, a handsome silver cup valued at $250, being presented by a number of prominent citizens and business men. The original conditions that governed the race were that it be shot for annually under the old rules then in force, at 50 birds, 10 singles at 21, 26 and 30yds. respectively, and 10 pairs of doubles, with the understanding that the winner should be subject to challenge by any member of a Kansas City gun club at any time during the year.

The inaugural shoot for the cup was held Jan. 2, 1888, and in the main shoot Ed Bingham and W. B. Twitchell tied on 43 out of 50, and the former won in the shoot-off. Bingham defended the cup successfully during 1888, beating four challengers. He defeated W. B. Twitchell on Feb. 22, by a score of 37 to 30; J. E. Riley on March 29, by a score of 37 to 35; the late Drury Underwood on April 19, by a score of 36 to 29, and Frank J. Smith on May 24, by a score of 38 to 25.

In January, 1889, the conditions were changed, making it a 30 bird race: 20 singles and 5 pairs and to be shot for quarterly. On January of that year, W. M. Anderson won the cup on a straight score of 30 kills in a good field of wing shots. In April, J. A. R. Elliott commenced to show championship form and after tieing Ed. Bingham on 36, shot the latter out for the trophy. The following July, Andy E. Thomas won the cup on a score of 29 out of 30 in hot company. In October there was a lively shoot for the honors, and Frank Parmalee, of Omaha, a guest of the gun clubs made the best score, 29 out of 30, but the cup being a local trophy went to James Anderson who was next highest with a score of 28.

Ed. Hickman won it in January, 1890, on a score of 27, and James E. Riley took it in April on the same score. In July, James A. Bolen, who won the cup at the final shoot last Wednesday, captured the trophy on a straight score of 30 birds, and in October James B. Porter won it on 28

The conditions were again changed in January, 1891. There was a scarcity of birds in January, and it was shot for at 20 singles, Ed. Chouteau winning on a score of 19, and it was then decided that a 25 single bird race, American Association rules, should hereafter govern the cup race. On April 3 J. Lee Porter won it on a score of 24 out of 25. On July 13, Ed Hickman won the cup on 25 straight, and successfully defended it twice more in succession by scores of 24 in October and 23 in January, 1892, and by reason of having won it three times consecutively he claimed the Lefever diamond medal which followed the cup. The rough Charlie Smelzer, Lefever's local representative, he was awarded the medal, but his right to that trophy is disputed on the ground that the conditions required it to be won three times in one year, whereas one of Hickman's victories was in 1892, and the other two in 1891. In April of this year, Fred C. Maegley won the cup on 23, and in July, Jim Elliott won it after a hot race with Lee Porter. They killed their 25 straight and Elliott was forced to kill 10 more straight to win.

The interest in the cup shoot having lagged by reason of the difficulty of any one winning it three times in one year in order to make it his personal property, a meeting was called of those interested in the cup, and it was decided to hold a final shoot for it and the winner take it. The date set was Wednesday, Oct. 12, and although the weather was anything but favorable there were 14 entries for the prize, and it was won by Jas. A. Bolen on a score of 24 out of 25, and the bird lost was an easy hovering incomer that fell dead out of bounds. The wind blew a gale across the traps from south to north, and while the birds were not naturally a particularly fast lot, being rather slow to wing, they went off with the wind at a terrific gait when they did spread their wings, and it took quick work to get them. The birds were rather an uncertain lot and made the race an open one, but the wind held strong during the entire afternoon and there was little advantage on an average. There was some particularly brilliant work done at long range by J. B. Porter, Lee Porter, Walter S. Halliwell, Frank Graham and Geo. Youmans. The veteran James H. McGee judged the shoot and James Whitfield was the official scorer. The following is the detailed score of the shoot:

WHITFIELD.

## Somerville Bluerocks and Pigeons.

The tournament of the Somerville (N. J.) Gun Club held on Oct. 19-20, was a fairly successful affair as tournaments are now figured. On the opening day the attendance numbered a dozen, including "Dutchy" Smith and Neaf Apgar, of Plainfield; Enoch Miller, of Springfield; Seymour Smith, of Plainfield; W. S. Bishop, of White House, and Tom Brantingham, of Plainfield. Bluerock traps and targets were used. After the seventh event Miller, Apgar and Charley Smith were obliged to shoot from unknown traps and were given the long end of the game at that, but little attention being paid to the rulings of the indicator. The result was that early in the afternoon they drew out and left for home as did several others. The scores of the day's work are here given, the events in order being as follows: Nos. 1, 2, 5, 7, 8 and 9. 10 singles, $1 entry; Nos. 3 and 6, 15 singles, $1.50 entry; No. 4, 20 singles, $2 entry:

No. 1: Miller 9, Manning 9, Apgar 9, "Dutchy" 8, Smith 8, Force 5.

No. 2: Smith 9, Miller 9, Manning 8, "Dutchy" 8, Apgar 8, Force 4, Voorhees 3.

No. 3:

*The Second Day's Shooting*

was at live birds, under American Shooting Association rules. The birds were a fairly good lot and were assisted in their flight by a strong wind. Among those present were Mr. and Mrs. M. F. Lindsley, of Hoboken; W. C. Apgar, of Frenchtown; E. Shepherd, J. D. Voorhees and J. S. Force, of Bound Brook; Dr. P. J. Zeglio and J. S. Zeglio, of Warrenville; M. H. Rupell, of Milford; Geo. Baldwin, of St. Paul, Minn.; Dan Terry, of Plainfield, and R. Milburn, of Pattenburgh.

J. S. Zeglio was referee. The several events resulted as below.

The events in order were as follows: No. 1, 4 pigeons, $3 entry, 3 moneys; No. 2, 5 pigeons, $5 entry, 4 moneys; No. 3, 7 pigeons, $7 entry, 4 moneys; No. 4, 8 pigeons, $8 entry, 4 moneys; No. 5, 5 pigeons, $5 entry, 3 moneys; No. 6, miss and out, $2 entry, one money:

## GREAT SHOOTING IN WEST VIRGINIA

### State Association Formed.

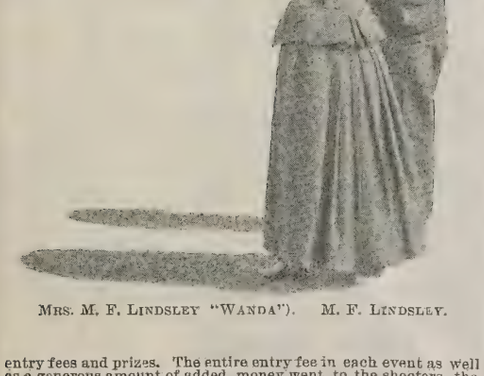
ABOUT eighteen miles below historic Harper's Ferry lies the picturesque town of Martinsburg, county seat of Berkeley county, West Virginia, and here on Oct. 18-19, was held a trap shooting tournament that will long be remembered as one of the most pleasing and thoroughly enjoyable affairs that has ever been held in that section. The affair was a grand success, not on account of the number of entries or the number of targets thrown, but from the fact that from start to finish everything worked smoothly without a jar between the management and the contestants; the promises of the management were fulfilled to the latter; the list of entries comprised the names of shooters from over a dozen different places, and above all everybody was in a Columbus Day humor and bound to have a good time. In this endeavor they succeeded admirably.

Martinsburg has a population of close on to 10,000, and is one of the most thriving towns in the eastern section of the State, having extensive manufacturing interests and a class of business men who are fully up to the requirements of the times. A number of its streets are well paved with macadam. The scenery in the vicinity is fine as it is in all parts of the Shenandoah Valley of which this section is a part.

The shoot was held on the base-ball grounds situated on a high piece of cleared land about a mile and a half from the depot and from here could be obtained a clear view of the Blue Ridge Mountains, while away off in the distance could be faintly seen the Shenandoah Range. The shooting was done from one set of five traps, two Keystones and three bluerocks. The traps were placed about 40yds. in front of the old baseball grand stand. In front of the stand was a restaurant booth where soft stuff and solids were dispensed. To the right of this was a large wall-tent for the use of the shooters. On the left was the secretary's office and black-board stand.

This shoot was supposed to be a combination affair under the management of a committee of sportsmen representing Martinsburg, W. Va., Hagerstown, Md., Charlestown, W. Va., Winchester, Va., Shepherdstown, W. Va., Plainfield, W. Va., Tuscarora, W. Va., and Staunton, Va. When it came down to a business point, however, the work devolved upon the representatives from Martinsburg and Winchester, the others failing to materialize. The labor of arranging details and carrying the affair to a successful issue was done by James F. Thompson and R. C. Burkhart, of Martinsburg; Harry W. McVicar, John Miller and George W. Haddox, of Winchester; and James Thatcher, of Tuscarora. The clerical work, such as arranging and distributing programmes, arranging prizes, attending to the taking of entries, division and payment of purses, was all done by that prince of good fellows James F. Thompson, who also went down in his pockets for the necessary cash with which to carry on the affair.

The grounds are admirably adapted for target shooting, being perfectly free and open, giving the sky for a foreground. It was a few moments after 9 A. M. on the 18th when the first shot was fired and at that time there were a good number of shooters on hand. There was Arthur W. Du Bray, the ever welcome and always popular Southern representative of the Parker gun, who had with him the self same smile and pleasant manner as of old, and who opened the eyes of the talent by the manner in which his "16-bore Parker" pulverized the targets. Shooting under expert rules, he and his little gun held their end up in great shape.



Then there was jovial Milt Lindsley and "Wanda," full of the good points of American wood powder, and who were in a jolly humor despite their 325-mile ride from the wilds of Hoboken and a subsequent two-hour search for a hotel, said search being made after 2 A. M. on this morning.

Flitting here and there with a pleasant word for everybody was "Tee Kay" Keller, of Plainfield. From Wheeling, W. Va., were a jolly crowd, comprising J. A. Penn, G. W. Lemmon, J. E. Wright, E. C. Meyer, R. B. Burt and M. Dinger, a fast-paced lot of shooters from the Island City Gun Club and prime hustlers for the sport in all sections. It will be remembered that Penn, Lemmon, Meyer, Wright and Burt comprised the team that won first place in the team match at Atlantic City, N. J., July 5. They are a jovial lot of sportsmen and popular wherever they roam.

From Winchester came C. F. Nelson, G. W. Haddox, J. H. Haddox, H. W. McVicker, John Miller, L. L. Seals, P. Polhemus, H. H. Baker, L. O. Miller and R. S. Baker, all active in the shoots of the Winchester Gun Association and good shots.

The Martinsburg contingent comprised Jas. T. Thompson, R. C. Burkhart, Jas. Burkhart and L. C. Gerling.

The programme was a good one both as to numbers of targets,

MRS. M. F. LINDSLEY "WANDA"). M. F. LINDSLEY.

entry fees and prizes. The entire entry fee in each event as well as a generous amount of added money went to the shooters, the targets at 2 cents each being extra. This made some nice pots.

The most interesting event of the day was the one at 25 singles per man, for 20 contributed merchandise prizes. During the day some good scores were rolled up despite the fact that a troublesome wind held sway. The shooting was kept up until after 5 P. M., when all hands started for supper. The majority of the visitors put up at the LeClair Hotel.

Below will be found the results of the day's work:

A STATE ASSOCIATION FORMED.

In the evening, pursuant to a suggestion thrown out at the ground quite a party went to the residence of James F. Thompson for the purpose of holding a meeting to discuss the feasibility of forming a State sportsmen's association. In response to an invitation from Mr. Thompson, A. W. DuBray, T. K. Keller, H. W. McVicar and H. H. Baker also attended.

The meeting was called to order by Mr. Thompson, Mr. Penn acting as secretary. Dr. Myers stated that the sportsmen of West Virginia were very much in need of a State association which would look after the protection of its fish and game interests, prevent fishing and shooting out of season and see that the waters were kept stocked with fish, and that such association could also lend material aid to trap-shooting interests. He stated also that there was no better time than the present for the formation of such an association, as it was the opening of the game season when every one was interested in the sport and would lend a helping hand. Another point in favor of immediate formation was that the Legislature was about to meet and consequently necessary fish and game laws should be formulated at once.

Messrs. Dinger, Wright, Burt, Thompson, Lemmon and Penn also spoke in favor of immediate action.

In response to an invitation Messrs. DuBray, Keller and the FOREST AND STREAM also spoke on the subject, encouraging the formation of an association which should take in all clubs and individual sportsmen in the State.

Dr. Myers then moved that those present form an association to be known as the West Virginia State Sportsmen's Association for the Protection of Fish and Game. The motion was carried.

James F. Thompson, Martinsburg, was elected president; J. A. Penn, Wheeling, secretary, and W. Goshorn, Charles Town, treasurer.

It was decided that the list of vice-presidents should comprise one from each club in the State.

The secretary was instructed to correspond with the secretaries of all sportsmen's clubs in the State asking them to join the association and to co-operate in the carrying out of its objects. He was also instructed to request each club to elect a member to represent it as a vice-president of the association.

The election of a board of directors and other necessary officers was laid over until a later date.

The members of the clubs present paid each an assessment to cover the expense for notices, etc., to be sent out by the secretary.

Before adjournment a discussion was held on the advisability of holding a tournament and business meeting at an early date, and it was finally decided that this would be best. On motion it was therefore decided that a tournament at targets and live birds should be held on the grounds of the Island City Gun Club, at Wheeling, on Thursday, Nov. 24 (Thanksgiving Day); that at 8 o'clock on the evening of that day the State Sportsmen's Association should hold a meeting to perfect the organization and elect officers to fill all vacancies; that the secretary should request every sportsmen's club in the State to send delegates to said meeting and that all sportsmen who were not members of clubs should also be requested to attend.

This closed the business of the evening, and after a vote of thanks had been tendered to Mr. Thompson for his hospitality to the sportsmen present, the meeting adjourned to meet at Wheeling on Nov. 24.

It has been my privilege of late years to attend a great many meetings of sportsmen, but never before have I seen business transacted with such dispatch as on this occasion. It was 7:25 when the party entered Mr. Thompson's house and just 8:30 when they said "good night" to their host, the discussion, organization and election having occupied about an hour.

That this association is destined to be a success and to greatly benefit the sportsmen and their interests in the State cannot be doubted. Although organized by trap-shooters, the premier objects of the organization will be the protection of fish and game and the carrying through of such legislative measures as will be the most advantageous to sportsmen in general. In return for this the lovers of trap-shooting will, as a matter of course, expect some support in the development and advancement of their favorite pastime. The promoters of the scheme are all enthusiasts in sporting matters and it is hoped that every club and every sportsman in West Virginia will assist them and attend the meeting in Wheeling on Nov. 24.

*Wednesday, the Second Day.*

The attendance on this day was not quite as heavy as on Tuesday, but the shooting was spirited. The early morning was clear but toward 11 o'clock huge black clouds appeared and every indication pointed to a heavy storm. Along about 12 o'clock, however, the wind began to blow a gale and from that time until the shooting was ended the targets flew in all conceivable ways. Every once in a while there would be a lull in the wind and the boys would begin to flatter themselves that they would be able to stand easy when along would come a cyclonic blast that would almost take them off their feet and would send clouds of dust across the field and into the shooter's eyes. It was hard shooting weather, as the scores will show.

There were several interesting events scheduled for the day, one of them being a contest for teams of five men each, $5 entry per team, with $10 added. The management made a mistake by putting this on as the second event of the morning, the result being that as a number of the shooters were not yet on hand only two teams entered. Had this race been billed for the middle of the afternoon it would probably have drawn out four teams.

A mistake was also made in shooting a 25-target contest for a silver cup in the morning. This cup, which was a very handsome article, was presented by Jas. F. Thompson. The entry fee was the price of the targets. "Tee Kay" Keller started the ball rolling by breaking 22 targets, a big score under the circumstances and one which was expected to win. Wright, of Wheeling, however, afterward put up a score of 23, being followed by R. B. Burt with 23. Even this was not enough to win, as the combination of "Ginger" (M. Dinger, of Wheeling) "and a 12-bore Parker gun" succeeded in crushing 24 targets, the result being that the smiling little Wheeling boy is owner of the pretty cup and of the title of "champion of the United States" (Wheeling included).

The next important race was one at 20 targets each for a number of merchandise prizes, including a silver loving cup. The cup became the property of R. B. Burt.

During one of the heavy blows that I have mentioned the wind demolished a temporary stand alongside of the shooters' tent, scattering the lumber in all directions, but fortunately injuring no one.

Despite the fact that over half of the towns interested had failed to send shooters to the scene, the tournament was a pronounced success, and one which reflects creditably upon the enthusiasts who were in charge.

The scores of the second day are here given in detail.

## The Erie Gun Club.

The regular monthly shoot of the Erie Gun Club was held at Woodlawn Park, L. I., on Wednesday, Oct. 19. Twelve members competed for the club medal and extra prizes. C. Plate took the medal and first prize, and C. Detlefsen won the second after a good race with M. Elssasser. The score:

Club shoot for medal and extra prizes:

H Dohrman.....2000110—3 H Janskowski.....0021110—4
C Plate.....1111112—7 D J Lynch.....2000122—4
F Greff.....0001001—2 C H Luhrsen.....1012012—5

J Schmadeke.....02100—2 C Detlefsen.....11011—4
D Lynch.....00101—2 M Hayden.....21121—5

Elssasser had to kill 8 straight for second, C. Plate third.

## The Rivertons Again Victorious.

The return match between the teams of the Riverton and the Blooming Grove clubs took place on the grounds of the latter on Oct. 14 under most favorable circumstances. The weather was perfect, mild, with a gentle air and not a cloud. The friends of both clubs turned out in good numbers and great interest was shown in the success of the match. Nothing was left undone to make the guest at home and their record shows they felt so.

## Highland Gun Club Tournament.

Des Moines, Ia., Oct. 21.—The annual fall tournament of the Highland Gun Club commenced Tuesday morning, Oct. 18, with a fair attendance. The weather was fine with quite a strong wind to make the targets uncertain, and to help the live birds outside the boundry flags.

Bluerock targets and North's electric pull was used. The live birds were shot from King's ground traps, and were a good lot for this season of the year.

Among the visiting sportsmen were C. M. Grim, Clear Lake, Ia.; McBride of Victor; Rexroat, Virginia, Ills.; Elliott, of Kansas City, Mo.; Read, Parmalee, and Latshaw, of Omaha, Neb.; McFarland and Dauthett, of Osceola; Frazier, of Clinton; Durant and Sessions, of Algona; Kraft, of Ottumwa; Hoover, Stump, and Hoffman, Oskaloosa, Howard and Wobland, of Berwick; S. A. Tucker, of Parker gun fame. Mr. Tucker goes from here to Davenport. Quite a number of the boys will attend the Charter Oak Shoot, Oct. 24 and 25, and go from there to the Omaha Tournament, Oct. 26, 27 and 28.

*The First Day.*

C. W. Budd.

## Columbus Day at Claremont.

The members of the New Jersey Shooting Club and a number of their friends enjoyed Columbus Day in a sociable manner on the suburban shooting grounds at Claremont, near Communipaw. The grounds of the club have been greatly improved of late and are now in good condition for live bird as well as target events. The old marsh in front of the club house has been partly filled in and a 50yds. boundary marked by a 2ft. wire fence.

The day was a good one for live birds, but when it came to shooting bluerocks the high wind cut up such antics that clean scores were at a premium. The attendance was fair, among those present being R. H. Breintnall, W. R. Hobart and Ferd. Van Dyke, of Newark; F. G. Moore, W. F. Compson and J. H. Richmond, of New York; E. E. Bigoney, of Bayonne; Neaf Agpar, of Plainfield; George Baldwin, of St. Paul, Minn.; Dr. F. S. Horton and Dr. R. H. Mason, of Peekskill; F. S. Simpson and "Uuncle Billy" Hughes, of Jersey City and Al. Heritage of the same town; M. F. Lindsley, of Hoboken, and last, but not least, a 16-bore Parker gun behind which was A. W. Du Bray, the popular Southern gun salesman. Mr. Du Bray had just run up from Washington where we left him at midnight on Thursday in company with "Tee Kay" Keller. The opening events were at live birds, the birds being of fairly good quality. The high wind assisted them in their flight and made some of them veritable "screamers." Nevertheless the scores were fully up to the average. The events in order were as follows: No. 1, 7 birds, $5 entry, two moneys, 21yds, boundary; No. 2, 10 birds, $10 entry, three moneys, 50yds, boundary; No. 3, 7 birds, $7 entry, 80yds. boundary, three moneys; No. 4, 10 birds, 80yds. boundary, $10 entry, three moneys. The scores:

| Fessenden | ..... | ..... | ..... | 1001211111— 9 |
| Simpson | ..... | ..... | ..... | 1011121121— 9 |

In the second event "Uncle Billy" Hughes had hard luck in losing his tenth bird, which, although mortally wounded, was driven over the line by the stupidity of the boy who was retrieving. The bird fell within a couple of feet of the boundary, and the boy, instead of approaching him from the outside did so from the inner field. As he reached for the bird it made a dying effort and fluttered over the boundary, where it was found dead.

The live-bird traps were now removed, and the party spent the rest of daylight in smashing bluerocks, the scores of the various events being appended:

## Blooming Grove Park.

The closing meet for 1892 took place Oct. 15 to 17. The gathering was large, and the contests were exciting, as the younger shots made good scores, pushing onward and upward, and in some cases the crack shots were so handicapped as to be out of the race. Every one was in the best of spirits, and with the glorious mild days, perfect clear sky and grand foliage of the forest, nothing more satisfactory could have been wished for. The various scores are added:

Live bird contest, subscritpson cup, 25 birds, ties at 3 birds:

| | | | |
|---|---|---|---|
| Bacon | 22 | Fairchild | 19 McCoon 16 |
| Worthington | 24 | Willigerod | 14 Decker 19 |
| Loomis | 24 | Foot | 19 Smith 15 |
| Breintnall | 24 | McKeever | 19 Keyes 12 |
| Lawrence | 23 | Engle | 20 Green 22 |
| Kennedy | 19 | Nash | 19 Cromelin 18 |
| Ells | 13 | | |

Shoot-off: Worthington 3, Loomis 2, Breintnall 1. Cup won by Worthington.

Clay bird contest, 25 birds, ties at 5 clays, handicap 10 to 19yds., one trap 14 to 18yds., three traps unknown angles, winner to go back 2yds. each time:

| | | | |
|---|---|---|---|
| Lawrence (20yds) | 18 | Smith (15) | 19 Kennedy (12) 22 |
| Loomis (18) | 19 | Foot (14) | 14 Ells (12) 18 |
| Engle (16) | 12 | Gunther (14) | 10 Bacon (12) 22 |
| Green (16) | 15 | McKeever (14) | 10 Decker (12) 15 |
| Breintnall (18) | 17 | Worthington (16) | 15 Eastman (12) 15 |
| Cromelin (18) | 14 | Nash (14) | 8 |

Kennedy won on shoot-off.

Decker Rifle Cup, 200yds, off-hand, open sights, Creedmoor target, 10 shots, each contestant handicapped to equal or beat his best record:

| | Score. | Record. | | Score. | Record. |
|---|---|---|---|---|---|
| Cromelin | 36 | 30 | Bacon | 28 | .. |
| Eddy | 33 | .. | Gunthur | 38 | .. |
| Loomis | 39 | 40 | Kennedy | 33 | 33 |
| Lawrence | 38 | 41 | Nash | 39 | 37 |
| Decker | 34 | 35 | Foot | 39 | 39 |
| Keyes | 42 | 41 | Engle | 38 | 38 |
| Eastman | 29 | .. | McCord | 37 | 15 |
| McCoon | 9 | 20 | Ells | 31 | 26 |
| Smith | 36 | 33 | Barlow | 28 | . |
| Post | 32 | 36 | | | |

Prize won by Keyes.

Rifle contest, two classes, 200yds, off-hand, open sights, 10 shots, Creedmoor target, ties 5 shots, 12 entries, handicapped to beat best record:

Class A.

| | Score. | Record. | | Score. | Record. |
|---|---|---|---|---|---|
| Lawrence | 40 | 41 | Engle | 36 | 33 |
| Keyes | 40 | 41 | Nash | 34 | 37 |
| Loomis | 32 | 40 | Post | 29 | 36 |
| Foot | 39 | 39 | Nash | 34 | 37 |

Foot won.

Class B.

| | | | | | |
|---|---|---|---|---|---|
| Decker | 34 | 35 | McCoon | 12 | 20 |
| Smith | 29 | 33 | McCord | 15 | 15 |
| Kennedy | 37 | 33 | Gunthur | 24 | 24 |
| Cromelin | 33 | 30 | Fairchild | 24 | 24 |
| Green | 22 | 21 | Eils | 31 | 31 |
| McKeever | 13 | 21 | Worthington | 31 | .. |

Kennedy won.

## Ephrata Guns.

The members of the Ephrata, Pa., Gun Club, held a special meeting Oct. 15, to shoot at flying targets thrown from half a dozen traps. The following parties enjoyed the sport and made scores as follows:

Sharp.....1111111101 1111101111 1111111111—28
0111111111 1111111011 1011111011—26

0011111111 0001011111—14
Heinaman.....00000 1001010110 1110101011—12
Urich.....1101111011— 8

The club will hold its regular meeting next Saturday afternoon.

The Rochester Rod and Gun Club claims June 12 to 16, 1893, inclusive for the annual tournament of the New York State Association for the Protection of Fish and Game, to be held on their grounds. The Rochester hustlers have already begun active work and have secured the Rochester Driving Park, which affords ample room, and are easily reached by two electric railway lines, cars running every five minutes. There is a good hotel on the grounds. They have also arranged that the convention meeting shall be held in Royal Arcanum Hall, a large, well-appointed and finely ventilated room. The club has decided to charge only 3 cents each for all targets used during the 1893 tournament. The Rochester boys intend to hustle steadily from now until next June and to have an annual tournament that will eclipse anything previously undertaken.

### The West Side Trap League.

THE West Side Trap League of Long Island finished its series of five shoots on Thursday, Oct. 20, at the West End grounds, Coney Island. It was merely a match between the Atlantic and Coney Island Rod and Gun Clubs as to which should take the first and second prizes. The former led at the start by one bird, and increased on the lead in the last match by four more, winning by a total aggregate score of 439 to 434. The score of shoots:

| Atlantic. | | Coney Island. | |
|---|---|---|---|
| R. Droyer | 1121122111—10 | J. A. Eppig | 2221202101— 7 |
| C. Morris | 2122211111—10 | J. Hyde | 1210122212— 9 |

### Jeannette Gun Club.

THE Jeannette Gun Club, of New York, held its regular monthly shoot at Dexter Park on Friday, Oct. 21. Fifteen members competed for the several class medals at 10 birds each. C. Meyer won the first with a straight score of 10, H. Hoop the second with 9 and C. Loeble the third. The scores:

Club shoot for medals:

| | | | |
|---|---|---|---|
| C Offerman | 1001210011—6 | A Christen | 2111220110— 8 |
| H Otten | 0211102012—7 | T Rothnan | 1020102220— 6 |
| C Loeble | 1211112010—8 | C Meyer | 2111122111—10 |
| C Dish | 2111100002—6 | J H Krager | 1021112210— 8 |
| C Doscher | 0012001210—5 | R Hurshfeld | 0121010011— 6 |
| C Cordts | 1021002212—7 | F Reishardt | 0010211012— 6 |
| R Busse | 1120112201—8 | M Meyer | 1210010100— 5 |
| H Hoops | 0112112112—9 | | |

Two sweepstakes of 3 birds each:

| | | | |
|---|---|---|---|
| Heye | 001—1 011—2 | Otten | 011—2 110—2 |
| Rothnan | 110—2 111—3 | C Meyer | 111—3 110—2 |

### The Emerald Gun Club.

THE regular monthly shoot of the Emerald Gun Club was held at Dexter Park on Tuesday, Oct. 18. Two elegant gold medals are placed in competition by the club. The classes A1 and A striving for the premier trophy, while classes B and C contended for the other. Of the twenty and odd competitors of to-day in the different classes of the Emerald Gun Club, the 30yds. men are designated as Class A1, Class A standing at 28yds., Class B at 25yds. and Class C at 21yds, irrespective of bore of gun. The Class A1 men have already each won a Class A medal, and are therefore handicapped the extra two yards in distance and must also win the Class A trophy four times, to the 28yds. men thrice in order to retain it as personal property, the last winning necessitating the use of the first barrel mostly, as the second barrel counts but one-half bird in the total. Messrs. Doemick, Remsen and Dr. Hudson, of Class A, having won it twice each and Messrs. Voss and Schortemeier, Class A1, three times, each succeeding contest now becoming of greater interest. As seen by the scores, ex-President Regan shot out Nick Maesel on the tie and retains the Class B medal. All contestants excepting Class C men shoot from five traps, unknown trap to be pulled as designated by the indicator. Class C shoot from known traps and the scores generally show that all of the members are properly handicaped. Then taking under consideration that the butt of the gun must be held strictly below the elbow until the bird is on the wing, a 70 per cent. average of kills for the year is equal to fully 85 per cent. when shot under the rules which allow the gun to be placed to the shoulder when calling "pull." At the last Dexter Park trophy contest the team was short five of their best men, the scores of that day showing the Emeralds at the bottom of the list, but with the absent five of last time, Messrs. Cassebeer, Elliott, Simpson, Knowlton and Quimby in the team at the final contest for the trophies on Nov. 15, the Emerald Gun Club may do somewhat better than the elegant aggregate of 76 out of 100 their team scored the last time.

Regular club shoot for medals:

| | | | |
|---|---|---|---|
| R Regan | 2121202222— 9 | E Doeinck | 1211111101— 9 |
| P Butz | 1111201230— 8 | A Henry | 1211111212—10 |
| Dr Klein | 0002000002— 2 | J McDonough | 0002000100— 2 |
| Dr Hudson | 1212010009— 5 | T F Russell | 0220001212— 6 |
| C Maesel | 2111210212— 7 | H Thau | 0101121110— 7 |
| J Maesel | 2111210212— 9 | Q C Gehring | 1122111101— 9 |
| Dr Leveridge | 1202222120— 8 | P Fitzgerald | 1022002010— 5 |
| J H Voss | 0222122021— 8 | C Swindell | 2110101010— 6 |
| T Cody | 0000021000— 2 | M Quinn | 1000100001— 3 |
| W Hogan | 1120110000— 5 | A Maesel | 1011111221— 9 |
| G Remsen | 1211220122— 9 | J Horn | 2100100111— 6 |
| G H Moore | 1020101001— 5 | | |

Sweepstake, $1 entry:

| | | | |
|---|---|---|---|
| H C Gehring | 21202—4 | T F Russell | 12200—3 |
| N Maesel | 11121—5 | Dr Leveridge | 12110—4 |
| J H Vose | 11211—5 | M Quinn | 11002—3 |
| G Remsen | 01000—1 | R Regan | 12221—5 |
| Dr Hudson | 02122—4 | W Hogan | 12222—5 |
| E Doeinck | 21101—4 | A Blinn | 11111—5 |

### Falcon Gun Club.

THE members of the Falcon Gun Club turned out for the first time in several months up to their club limit on Thursday, Oct. 20, ten members competing at 10 birds each, from H and T traps, under modified Long Island rules, bird killed with second barrel to count as a half bird. H. Miller just managed to outshoot Pop Van Stader, another seventy-year-old wing-shot, by a half point. The score:

| | | | |
|---|---|---|---|
| G Voeze | 1111110020—6½ | J Hermann | 1101022011—6 |
| J Moller | 1021112111—8 | H Van Staden | 1111111110—9 |
| J Meyer | 2202101122—5½ | C Doscher | 0110202010—4 |
| J Bohling | 1011201001—5 | J Isenman | 0220202021—3½ |
| H Miller | 1111101111—9 | C Moller | 1100122211—6½ |

### New York German Gun Club.

THE members of the New York German Gun Club held their last outing at Dexter Park, L. I., on Wednesday, Oct. 19. P. Garms, Sr., a veteran of over 70 years of age, made a score of 8, tieing J. Wellbrook and H. Thomford. On the shoot-off the veteran missed his seventh bird and lost. H. Thomford won the club's medal for the season's shooting. The score for club's gold medal:

| | | | |
|---|---|---|---|
| F Sauter | 1121202—6 | J Klein | 0012201—5 |
| J Wellbrook | 1112111—8 | J Goerlitz | 2110110 1—6 |
| P Garms, Sr | 1111112—8 | M Ahles | 0200211 1—5 |
| J Frazer | 2220010 1—5 | A Lucas | 2101100 0—4 |
| P Garms, Jr | 1110200—5 | G Stradtman | 1012012 3—6 |
| J Boseuecker | 1010121 1—6 | V Loewer | 1111101 0—6 |
| H Thomford | 1112121 2—8 | J Steinagel | 1110120 1—6 |
| M Bonden | 1000120 2—4 | J Johannes | 0110120 2—5 |
| J Schlicht | 0011121 0—5 | C Lemonie | 3110220 1—6 |
| J Busch | 2021011 1—6 | | |

Team shoot, 2 birds, losing side pay:

| | | | |
|---|---|---|---|
| Bosenecker | 11—2 | P Garms, Jr | 11—2 |
| Wood | 00—0 | P Garms, Sr | 02—1 |
| Schlicht | 11—2 | Lemonie | 10—1 |
| Loewer | 10—1 | Klein | 21—2 |
| Steinagel | 21—2 | Lucas | 00—6 |
| Sauter | 02—1 | Bonden | 02—1 |
| Thomford | 00—0 | Wellbrook | 11—2 |
| Frazer | 12—2—10 | Goerlitz | 00—0— 9 |

### Ridgewood Gun Club.

THE last shoot of the season by the members of the Ridgewood Gun Club was held on Wednesday, Oct. 19, at Richmond Park, L. I. John Schlieman won the medal for the second time, but S. C. Gehring holds the winning average of the season, 48 out of 50. The score:

| | | | |
|---|---|---|---|
| J Schlieman | 1111011—6 | H Weidman | 0000010—1 |
| C Deakelman | 1000100—2 | C Kadel | 1001111—5 |
| J Daly | 1000101—3 | F Ibert | 0111011—5 |
| B Guenche | 1101001—4 | G Durster | 0100011—3 |
| C Neigel | 0011011—4 | C Wagner | 0010100—2 |
| K Schneider | 1101000—3 | P Eppig | 0111100—4 |
| L C Gehring | 0101111—5 | C Laeger | 1001010—3 |
| I Martin | 1010011—4 | J Kraemer | 1011011—5 |
| C Noetes | 1001010—3 | | |

### U. M. C. Shells.

THE Union Metallic Cartridge Co. send us the following extracts they have received from two noted shots:

John Brewer, champion wing shot of the world, writes: "I wish to show the American trap-shooters the advantage of using U. M. C. 'Trap' shells. For close pattern, even distribution and penetration, I do not think they are equaled by any other make in the world. In the last 500 pigeons I shot at have used the above gun cases, making an average of 98⅛ out of 100."

We have also one from Mr. E. D. Fulford, under date Chicago, Oct. 3, he writes: "I broke 198 out of 200 targets at the Gun Club grounds last week in a high wind with your 'Trap' shells."—*Adv.*

The Breech-Loader

AND HOW TO USE IT. By W. W. Greener. Illustrated.

1892. Boards, 288 pages. Price, 75 cents.

THE AUTHOR'S INTRODUCTION EXPLAINS:

This treatise is written for that numerous class of sportsmen who delight in a day's shooting, but have neither the time nor the means to make the sport a life's study. Published at a popular price, it will, it is hoped, reach many who have hitherto been deterred from shooting, believing it to be an expensive recreation. The author's aim is to induce all who can to participate in a manly sport, and to advance the interests of those who can look to the gun for pleasure, health or occupation. The book is not written for experts, nor for those who have special opportunities for the acquisition of the art of shooting; and in order to make it as attractive as possible to the general reader, many matters which would interest the enthusiastic shot only have been omitted.

## *FAMILIAR ACQUAINTANCES.*

### THE MINK.

THE little fur-bearer, whose color has been painted darker than it is, and singularly made his name proverbial for blackness, is an old but not so familiar an acquaintance of the angler and sportsman as he was of them and of the country boy of two score years ago.

It was a woeful day for the tribe of the mink when it became the fashion for other folk to wear his coat, which he could only doff with the subtler garment of life.

Throughout the term of his exaltation to the favor of fashion, he was lain in wait for at his own door and on his thoroughfares and by-paths by the traps, dead-falls and guns of professional and amateur trappers and hunters, till the fate of his greater cousin the otter seemed to overtake him. But the fickle empress who raised him to such perilous estate, changing her mood, thrust him down almost to his old ignoble but safer rank, just in time to avert the impending doom of extermination. Once more the places that knew him of old, know him again.

In the March snow you may trace the long span of his parallel footprints where, hot with the rekindled annual fire of love, he has sped on his errand wooing, turning not aside for the most tempting bait, halting not for rest, hungering only for a sweetheart, wearied with nothing but loneliness. Yet weary enough would you be if you attempted to follow the track of but one night's wandering along the winding brook, through the tangle of windfalls and across the rugged ledges that part stream from stream. When you go fishing in the first days of summer you may see the fruits of this early springtide wooing in the dusky brood taking their primer-lesson in the art that their primogenitors were adepts in before yours learned it. How proud one baby fisher is of his first captured minnow, how he gloats over it and defends his prize from his envious and less fortunate brothers.

When summer wanes, they will be a scattered family, each member shifting for himself. Some still haunt the alder thicket where they first saw light, whose netted shadows of bare branches have thickened about them to continued shade of leafage, in whose mid-day twilight the red flame of the cardinal flower burns as a beacon set to guide the dusky wanderer home. Others have adventured far down the winding brook to the river and followed its slowing current past rapids and cataract to where it crawls through the green level of marshes beloved of water fowl and of gunners, whose wounded victims, escaping them fall an easy prey to the lurking mink.

Here too in their season are the tender ducklings of wood-duck, teal and dusky duck, and all the year round, fat muskrats, furnishing for the price of conquest a banquet that the mink most delights in.

In the wooded border are homes ready builded for him under the buttressed trunks of elms or in the hollow bolls of old water maples, and hidden pathways through fallen trees and under low green arches of ferns.

With such a home and such bountiful provision for his larder close at hand, what more could the heart and stomach of mink desire. Yet he may not be satisfied, but longs for the wider waters of the lake, whose translucent depths reveal to him all who swim beneath him, fry innumerable, perch displaying their scales of gold, shiners like silver arrows shot through the green water, the lesser bass peering out of rocky fastnesses, all attainable to this daring fisher, but not his great rivals, the bronze-mailed bass and the mottled pike, whose jaws are wide enough to engulf even him.

Here, while you rest on your idle oar or lounge with useless rod, you may see him gliding behind the tangled net of cedar roots or venturing forth from a cranny of the rocks down to the brink and launching himself so silently that you doubt whether it is not a flitting shadow till you see his wake so silent that you wonder that it breaks the reflections lengthening out behind him.

Of all swimmers that breathe the free air none can compare with him in swiftness and in grace that is the smooth and even flow of the poetry of motion. Now he dives or rather vanishes from the surface, nor reappears till his wake has almost flickered out.

His voyage accomplished, he at once sets forth on exploration of new shores or progress through his established domain, and vanishes from sight before his first wet footprints have dried on the warm rock where he landed.

You are glad to have seen him, thankful that he lives, and you hope that, sparing your chickens and your share of trout, partridges and wild ducks, he too may be spared from the devices of the trapper to fill his appointed place in the world's wildness.

## *MR. DIXON'S ROBINS.*

REV. THOS. DIXON, JR., is a New York clergyman, who has attracted considerable attention by preaching on topics of the times. He has made local politics the subject of sensational sermons and has scored city officials unmercifully. Tammany Hall has been the principal object of his attacks, and not long ago he figured in a police court libel case brought against him by one of the Tammany excise commissioners.

For this reason, when, one day last week, Mr. Dixon, the champion of law and order, was intercepted by a Staten Island game constable, taken before a justice and compelled to pay a good fat fine for shooting robins contrary to the law, it was quite natural that the incident should promote public hilarity. The newspapers, Tammany and anti-Tammany alike, made the most of their opportunity to get in their digs at the Rev. Thomas Dixon, Jr. The wittiest reporters were sent to write up the Staten Island end of the affair; the editors discoursed solemnly on the enormity of the killing of song birds by a clergyman; the rival cartoonist held the clerical robin slayer up to public gaze, and the rhymsters sung of his exploits in most atrocious verse. In short, newspaper readers, and that means everybody, had a steady diet of Dixon robins, and the town has been pointing its finger at the unfortunate individual ever since.

This manifestation of public condemnation of the violation of the game laws is, as the advertisements put it, "grateful and comforting." Nevertheless, it must be borne in mind that if Mr. Dixon had not made himself by his clerico-political activity a prominent mark for the newspapers, his robin-shooting would have been dismissed by the news editors in a four-line item.

Moreover, in fairness to Mr. Dixon it is to be said that he is only one of a multitude of gunners who have potted robins in the autumn without recognizing the heinousness nor even the impropriety of their act. As a matter of fact, until this year the robin has had official recognition as a game bird in the New York law, just as it has to-day in the laws of some other States, as Connecticut, Rhode Island, Maryland and North Carolina. Indeed there are sections of the country where the robin is best known not as a song bird, but as a component of potpies, and Mr. Dixon happens to have come from such a section of the country.

We take it, that Mr. Dixon's acquaintance with the robin of this latitude is confined to the wild creature of the October woods, which is not at all the domestic bird of the door-yard and orchard in spring and summer; and under these circumstances he might urge that, being unfamiliar with the robin of sentiment, he could not reasonably be expected to share that sentiment, which is the robin's best protection. But even this plea cannot excuse him.

For Mr. Dixon's chief offending, as we see it, is that as an intelligent individual, who by the obligations of his profession and walk of life is bound to conform to the laws and to set a good example, he has recklessly and ignorantly rushed into law breaking, when that very ignorance is in itself an aggravation of the offense. In these days of game protection and game laws, the very first duty of a thinking man, who proposes to go shooting or fishing, is to inform himself as to the legitimacy of his sports. In shooting the legal maxim that ignorance of the law excuses no man is doubly and trebly true. Mr. Dixon might readily have ascertained that robins were protected by the New York law of 1892, not as "song birds," but specifically as robins. Having failed to exercise ordinary discretion and to use the commonest caution in this respect, Mr. Dixon has richly deserved, as he would probably admit, all the unenviable notoriety given his Staten Island robin-shooting.

And then, Mr. Dixon is a regular reader of FOREST AND STREAM; he told a *Times* reporter that he had bought a copy of this journal on his way down to Staten Island. Is this the fruit of our preaching all these years?

## *CARE OF LIVE GAME.*

FEW subjects present greater interest to the sportsman than the care of game birds in captivity and their transportation from one point to another. Over a large portion of the Eastern States game birds and quadrupeds are practically exterminated, and to obtain shooting without making long journeys, it is necessary that such depleted covers should be restocked.

To offer the greatest probabilities of success this work should be done on a considerable scale. Individual efforts toward restocking are constantly being made, and some of these are fresh in the minds of our readers; but nowhere has the work been conducted on so broad a platform as in Massachusetts under the wise care of the Massachusetts Fish and Game Protective Association's Committee on Acclimatization. Of this committee Mr. Henry J. Thayer is the secretary, and it has fallen to him to superintend much of the work. His experience in this field has thus been more extended than that of any other man in the country, and it is with great satisfaction that we present to-day his paper, entitled "Transportation and Care of Live Game."

The value of this article will be apparent to every one at all interested in the subject. Mr. Thayer wastes no words in glittering generalities but gives a column and a half of specific instruction, drawn from his own wide experience and covering no less than seven species of game, five of which are entirely new to the country in which they have been introduced.

As is very natural, the more we learn about this interesting subject the more we desire to know, and it is to be hoped that observations are being conducted in Massachusetts, which, in the course of a year or two, will tell us how these various species of wild birds have thriven. Of course a single failure—the entire disappearance of a lot of birds turned out—is by no means conclusive evidence that a particular species cannot be acclimated in a given locality. But there would be great encouragement in learning that any one of the species, not native to the region, which was turned out, had flourished and done well.

While Mr. Thayer has been doing the good work of writing this article for the benefit of his brother sportsmen he has suffered a severe misfortune in the burning of his camp at Monomoy, Massachusetts, and the consequent loss of gun, rifle, rods and canoe. Outside of the money loss involved most of us realize how serious a thing it is to lose one's old shooting implements, and we can sympathize with Mr. Thayer in his misfortune.

THE fund for the Audubon monument has been completed and it is stated that before long the stone will be in position and appropriate ceremonies for its dedication will take place. It has required years of time and a great deal of work to raise the amount of money neccessary for the erection of this monument, and all New Yorkers, as well as all lovers of nature, may congratulate themselves that the efforts of the various committees who had the matter in charge have at last been crowned with success. The stone is simple but effective, a base of granite shows a medallion of the great naturalist, and above this is a shaft of North River blue stone ending in a Runic cross, on which are carved some of the birds and animals which are inseparably connected with the name of Audubon.

# The Sportsman Tourist.

## A NIGHT IN THE WOODS.

ONE day late in the fall of 1887 just before the first snow fall of winter, I left my husband's lumber camp to return to my home in the settlement, a distance of three miles through the woods, and as the afternoon was well advanced when I started, I knew that I must walk briskly to reach home before nightfall, for as I must ferry myself across the Penobscot River at a point where the water ran very swiftly, and the boat and oars all being well coated with ice, it would be unpleasant and perhaps dangerous to attempt to cross after night had fairly shut down. Realizing this I hurried along the path, over which I had been many times before.

At a distance of a mile and a half from the camp the path ran through a swamp that was now flooded with water from recent rains. At this point I was obliged to leave the path and go through the woods to avoid a slough that was about fifty rods in length. But I stepped boldly into the woods, never dreaming but that I should make connections all right and strike the road at a point below the slough.

After some minutes' rapid walking I found I was diverging from the right direction, but how much I could not tell. I should have reached the path by this time if I had kept the proper course, still I was not uneasy, for I thought surely a few moments more will bring me out to the path, or I shall find some indications of its being near, trusting to chance to guide me aright. I soon found myself in a dense thicket of alder bushes just high enough to reach a couple of feet above my head, and growing as thickly together as the quills on the back of a porcupine. It was impossible to see a rod clearly in any direction. Working my way slowly along, I at last got clear of the alders and found myself on more open ground. I could see off at my left a sharp narrow ridge which I recognized as a range of small hillocks called the "horse-back" which began on the east bank of the Penobscot, at a point near my home, and terminated ten or twelve miles to the east. I made my way toward this ridge, thinking that I could easily follow along its summit, which was in no place more than 100ft. across, and so reach home safely. But when I had gained the top of the ridge I found I had not the least idea in which direction to turn. Was the way home toward the right or toward the left? I did not know. My self-confidence now deserted me, and I was obliged to recognize the full grown startling fact that I was lost. Daylight had now entirely faded and the faint light afforded by the stars seemed only to make everything more indistinct. There was no wind moving, everything was sombre and still. As I stood there in the weird silence, a feeling of helpless, hopeless loneliness came over me impossible to describe. It is like no other sensation. It is not exactly fear, but a stupefying, unreasoning, withering dread of you know not what. The fact that it is entirely uncalled for—and as in my case there was no cause for fear—only makes it the more aggravating. I sat down on a fallen tree, resolved to conquer and banish this foolish, helpless feeling, and when I had so far succeeded as to be able to reason clearly, I made up my mind that I must stay in the woods all night sure. I knew no one would think of looking for me until the next day, for my husband would believe me safe at home, while those at home would think that I had concluded to stay at the camp, as I had often done. So there was nothing for me but to accept the situation with the best grace possible.

I always carry a revolver when walking in the woods, for I will confess to being terribly afraid of a bear. I am sure I don't know why I should be so much afraid of them, for I consider the common black bear quite harmless unless attacked, and the black bear is the only sort found in this vicinity. I have seen them quite frequently in my rambles in the woods and have sometimes been quite near them, but they always seemed to be as anxious to increase the distance between us as I was, and that is saying a good deal. In taking my revolver from my pocket to examine and reload it if necessary I found two bunches of matches, placed there for safe keeping by some one while my jacket hung on the wall in the camp. With the revolver and matches in my possession I began to think my situation not so bad after all. I could now build a fire and, I believed, get through the night with some degree of comfort.

I now began to look about for something with which to build my fire and some suitable place in which to build it. Walking along a few rods I found a pine tree lying on the ground that had evidently been shattered by lightning. It gave a royal heap of kindling wood all ready for a match, which I was not long in applying. After my fire was well under way, and as the moon had now risen, I walked along the top of the ridge. Though determined not to lose sight of my fire, I was not satisfied with my accommodations for the night and still had a faint hope of finding something that would enable me to find my way out. The light from the fire would be visible a long distance, as there was nothing to intercept it. The undergrowth had been burned away years before, leaving here and there a dead tree, with the bark fallen off, standing white and ghostly in the moonlight. As I moved along slowly and cautiously for fear of stumbling, I suddenly heard a sound that fairly froze me. I knew what it was too well, I had often heard it before, but never when I was alone; it was the sound of some animals tearing rotten wood in search of insects. My old fear of a bear returned, reinforced by the hour, the place, and the fact that I was alone and lost in the woods. I could think of no other animal that procured its food in that manner or whose strength enabled him to rent and break wood with such violence.

After I had stood listening for perhaps five minutes, though it seemed five lifetimes, my mind began to take in the situation, and I thought that if I returned to my fire without disturbing this unseen terrorizer, I should be in a shiver of dread all through the long night, but if I went near him and frightened him, and I could see him run away as I felt sure he would, then I should have no more fear of him. So, by taking my courage in both hands and telling myself what a miserable coward I was, and how I should despise a man with no more physical courage than I was now displaying, I forced myself to advance steadily toward the sound, which still continued. I walked very softly, for I did not wish to frighten the creature before I had an opportunity to see him. I soon discovered him on the trunk of a leaning rotten stub quietly working away. He did not hear me come up.

The shadows prevented me at first from getting a fair view of him, but presently he slightly changed his position and turned his head and looked at me over his shoulder as I stood about twelve feet distant, and then, thank heaven! I saw it was not a bear. I was so overjoyed to find that it was not my special torment that the brute's round, glistening eyes and gleaming white teeth as he drew his upper lip back with a snarl, looked to me almost pleasant. It was a Canadian lynx. Those who have ever seen one of those cowardly creatures with its ugly, cat-like head, will agree with me when I affirm that this fellow was a scary-looking chap, as he gazed at me without moving a muscle. I was so intensely gratified to find that it was not a bear that had caused me such a wretched fright that for a moment I stood perfectly still, with no other feeling save that of thankfulness. Then, while the brute continued to gaze into my eyes the thought came to me that if I could shoot him I should have something to tell of, and perhaps it would not be unseemly to brag about it a very little, considering the circumstances. I knew it would be a difficult thing to do, owing to the uncertain light, but I determined to try it at any rate. Slowly moving my hand toward my pocket I drew out my revolver, and taking aim as well as I could at the broad forehead of the lynx, I fired. He sprang nearly five feet into the air and fell dead not more than three yards from my feet. The ball had penetrated his head just above the eye. It was a good shot and I was correspondingly elated with it.

Leaving my prize where it lay I retraced my steps a short distance, and, turning to the right, continued to make my way in the same direction in which I was walking when my "bear" drew my attention from all earthly concerns, and held it fixed exclusively on himself. After walking perhaps a mile, for I had little idea of distance and none of time, and I could just see a glimmer of light from the burning pine, I came to a break in my elevated roadway, a notch in the horseback—I knew of several such. I also knew that the lumber men sometimes made use of those natural gateways to pass through the horseback with their teams. And if there should prove on examination to be a path through this one I might yet reach a human habitation and not be obliged to pass the night in the woods. It was worth trying for, anyhow. Clambering down the steep side of the notch I reached the bottom, where it was so dark I could not see a yard before me, but a few steps brought me out into the moonlight, which was still insufficient to allow me to make a close examination of the ground. Lighting a match and holding it near the ground, I saw the prints of horses' hoofs plainly outlined in the soft earth. It being late at night I reasoned that the teams that had made these tracks were the last that had passed, and were on their way homeward, their destination being probably some camp in the vicinity. Lighting a match every few rods to make sure of the hoofprints, I traveled perhaps a mile, when I came in sight of a glimmer of light; drawing nearer I found it came from the window of a camp. I walked up to the front entrance, and, looking through the window, I saw a number of men mending their garments, making axe handles or playing checkers, but none whom I knew. I passed around to the back door, sure of finding the cook in this direction. I was cold, tired and hungry, and glad to find a warm place with people about me once more. I rapped on the door and it was opened by a stranger. A man who was reading at the table looked up as I came in. To my amazement it was my husband. The man who opened the door was the cook, the men who opened the front door were all well known to me, but I was so completely dazed, so lost as it were, that I did not recognize them. The next morning my husband accompanied me home, and then, after a long search, found and brought home my *loup cervier*, and I hope never again to be lost in the woods at night.

MAINE, 1892. M. A. P.

## THE PANTHER'S SCREAM.

"STANSTEAD" seems to think that it is a myth.

Possibly it may be, but if so it is a terribly realistic one when heard in the forest after night.

It might be almost impossible to prove that the panther has a demoniac yell, because it is always uttered in the silent watches of the night in the forests, on the inaccessible cliffs of the mountains, or under other conditions in which the animal cannot be seen.

And yet, that the panther does scream, the writer has no more doubt than he has of anything that is not demonstrable by ocular or other incontestible proof.

Did "Stanstead" ever hear the wailing of the wind as it shrieked at his window on a cold and blustering December night?

Doubtless, yes! But can he prove that it was the wind and not a "myth?" Did he see it when it rattled his casement and screamed its loud lament in the silent watches of the night?

Supposing that "Stanstead," on one of his rambles afield, should find a dog sitting close behind the mangled carcass of a sheep, so recently killed that the eye was not yet glazed, that the dog was busily engaged licking blood stains from his own breast and legs, with tufts of wool yet sticking between his teeth, would he, or would he not, firmly believe that the dog had been guilty of killing his own mutton?

Well, "Stanstead" could be no surer of the facts in either of these cases than the writer is that the panther *does* scream. It is not much of a story, but such as it is I give it.

It was away back "befo' the wah, sah!" in the summer of Lincoln's first campaign, I was spending my holidays with a young friend in Clinton county, N. Y. Poor fellow; he sprang to arms at his country's first call in the following year and died in the Chickahominy swamps. I was there at his invitation to join him in an outing in the Adirondacks. We went into the Saranac region and spent four weeks among the trout, and on our return made arrangements to return in late October for a week's deer hunting.

The time came around, and I returned to keep my appointment. I found that Charley (that was my young friend's name) had all arrangements made and had engaged an old deer hunter of great local fame, to accompany us on our trip.

I will not linger over details, but will come down to the night on which I got into a cold "funk" while watching a deer lick.

We had been in the woods for a week and had met with but poor luck. The dogs had started a number of deer, but we somehow always got on the other runway from that which they took. Our guide had succeeded in killing two, but Charley and I had neither of us got a shot. Our youthful hopes had been gradually dissipated and we had got restless under our bad luck and wanted to return home. The guide finally suggested that we should watch a couple of licks that he knew of at some distance from camp.

This we agreed to do, and taking our blankets with us to wrap up in for warmth, we set out before dark and he placed us separately at the licks, about a mile apart, and returned to camp, giving us the bag to hold on the snipe hunt.

Confound his old picture! I know now that he had been playing us for suckers all the way through, sending us where he knew we would do no good, only to scare up game for him to shoot at, and taking advantage of our youthful enthusiasm to get all the easy work of camp and make us do the hard and rough.

The only reason why he sent us to the licks was to make us so tired and sleepy the next day that we would not want to start for home.

He got fooled, though, that trip, for by sheer good luck I killed a beautiful buck stone dead in his tracks, before I had sat there for half an hour. It was pitch dark before I got his entrails out, and gathering the material for a good fire I piled them up ready to ignite should it get too cold before morning, and rolling myself up in the blankets with my head pillowed on the buck's neck and my gun under the blankets by my side, I fell fast asleep.

It was past midnight when I awoke.

I can scarcely call it awaking, for I just suddenly changed from a condition of sound and dreamless slumber to a perfect consciousness of all my surroundings, and that a chill of nameless dread and terror was clogging the blood in my veins, and that I was in some terrible danger.

I threw the blankets back, grabbed my gun and fired it off into the darkness, without realizing what I was doing, and then, with trembling hand, struck a match and started my fire.

As the first fitful flashes illumined the surrounding gloom, my fear passed away, and I laughed at myself for my silly terror.

In a few moments I lay down again, and was becoming gradually drowsy as I watched the sparks from my fire, and the swaying of the leaves overhanging it, as they tossed about in the ascending current of hot air.

Suddenly, from the depths of the forest, there burst upon the silence a wailing cry, such as I had never heard before, but which I knew at once to be a panther's voice from descriptions of those who had heard it. To say that I was frightened is hardly needful. I was not only frightened, I was in a blue funk. The forest shades became peopled with crouching, slinking forms, with baleful eyes and glistening teeth, and I crouched with my back to the fire, and followed with straining eyes the flickering of the shadows among the trees.

Again, upon the shuddering air came that cry, like a human voice in despairing agony. Strange to say, this second cry served to dispel a great part of my fear, and I arose and replenished the fire. From that time until morning I sat with my gun across my knees, keeping a sharp lookout, but not really afraid. Remember, friends, I was only 18, and a youth of that age is apt to get pretty badly rattled under more favorable conditions than those.

As soon as objects were fairly discernible in the gray dawn, I raced into camp, routed old "Gash," the guide, out of his blankets, got the dogs, and ran back to my deer.

The instant the dogs arrived they took the scent, and went baying over the very locality where the yells came from during the night, and soon passed out of hearing up the mountain side. We followed as fast as we could in the direction they had taken and in half an hour could hear them again. They had found and treed the creature and in a few moments we came up to him lying out upon the limb of a great birch tree, looking down calmly at the baying dogs.

A shot from each of our rifles tumbled him dead upon the ground. We measured him as he lay, and from tip to tip he was just 9ft.

He was a male and a beauty, and had his skin not been spoiled in the dressing I think it would still ornament some corner of the old homestead as a remembrance of the boy who early left the old home nest.

Well, we skinned him and returned to get my deer and pack him to camp.

We examined the ground carefully around the scene of last night's adventures, and found where the animal had completely encircled the spot where the deer and I lay, coming in one spot to within 20ft. of me.

I believed then, and believe now, that it was only my providential awakening and firing the gun that kept the creature from springing upon me.

The tracks of all four of his feet could be plainly seen in the soft earth, planted close together, and firmly sunk in the ground, as though they had been imbedded by the rocking motion that cats give themselves before they spring in order to obtain firm footing.

It may be that he would have sprung upon the carcass of the deer instead of upon me, but I don't believe it. I think he knew perfectly well that the deer was dead, but that there was something else there that wasn't.

On our return to camp we found Charley had breakfast ready and impatient of our delay. He had seen no deer, and had heard nothing during the night. In fact, I always thought, although he never acknowledged it, that he soon went to sleep upon his watch and never woke up till morning.

Such are the grounds upon which I base my firm belief in the panther's yell.

If the sounds I heard that night were the products of the imagination, or the "howlet's dismal cry," then they fitted in remarkably close with the facts.

Perhaps it was the voice of the *loup garou?*

CALIFORNIA, October. AREFAR.

---

"This must be a fine stream for trout," said a pedestrian to a man who was fishing. "I think so, too," said the angler, "for I have been fishing here for an hour and can't get one to leave it."—*Boston Commercial Bulletin.*

# Natural History.

## CANADA LYNX IN MAINE.

BETWEEN 1840 and 1850 Canada lynxes were more common in the woods of Maine than foxes are to-day, especially in the northern sections of Oxford, Franklin and Somerset counties, in this State. In 1840 the Hudson Bay Company exported to Europe seven or eight thousand skins from British America. But they have decreased to such an extent that a trapper seldom sees a sign of them nowadays.

The Canada lynx is about 3ft. in the length of the body, standing 21in. high. It has a round head like our domestic cat, but much larger. Its fur is long and soft, and, when prime, of a beautiful stone-gray color along its sides, and mixed on its back, with long hairs tipped with black, and under its body is white, beautifully mottled with black spots. Its ears stand erect and are quite conspicuous, being tipped with a tuft of black hair, and on either side of its lower jaws is quite a bunch of gray hair, mixed with black. Its tail is about 4in. long, tipped with black. In summer time the lynx has quite a different appearance, being of a reddish-brown color.

The eye of the lynx is very large, round and bright, and is capable of staring at you for a long time, and it was believed by the ancients that they could see through opaque bodies, and even through a stone wall; hence an old expression, lynx eyed, to represent keenness of sight. Another fable was that their water, or urine, contained a valuable stone called *lapis lincurius*.

The early French writers ascribe to the lynx that habit of stretching their length on the limb of a tree and waiting for deer to pass under them, when they drop upon them, tear their throat and drink their blood. The late John M. Wilson, Esq., a surveyor of the Rangeleys, told me he once saw a lynx on the limb of a large tree directly over his head, but as he passed quickly and quietly along the creature did not move from its position, but eyed him with a steady gaze until he was out of reach.

The French give it the name of *loup cervier* or deer-wolf, which is vulgarized to *lucivee*; it is also called bob cat on account of the shortness of the tail.

The lynx is a good swimmer, taking to the water naturally in the summer season. They will cross lakes miles in width and swim as fast as a good canoe man can paddle. They are infested by fleas in fearful numbers, and woe to the hunter who lugs one home on his back. The lynx is as ferocious a beast as exists in the wilds of Maine. I have often said I would sooner attack a black bear single handed than a lynx. It is impossible to tame or domesticate them. The natural yellow of their eye will grow light and silvery by eyeing the living animal and waiting awhile for it to grow mad; it will soon appear like livid fire, and it would challenge the nerve of a strong-minded hunter to look them out of countenance. It is my opinion that this animal seldom, if ever, attacks a man when enjoying the freedom of nature, but if cornered and unable to escape no doubt would defend itself to the finish.

In the year 1851 the late L. F. Durkee, Esq., of Magalloway, killed one of these animals in the deserted house on Richardson Farm, Mollychunkemunk Lake, with a club; it happened in this wise: Mr. Durkee entered the house through the woodshed, and a large male lynx ran ahead of him into the house. Mr. D. followed, taking a stick of wood in his hand. Getting cornered in the pantry the lynx faced about for a spring, when a lucky blow with the club of wood settled the skirmish.

Mr. Robert Torrey, of Cambridge, Mass., with a party of young men on a hunting expedition to the Rangeleys, camped one night at Upper Dam before the lodging conveniences were built there, and in the night time were awakened by one or more lynxes creeping around very near the sleepers, and it was not until a bright light was made and firearms were resorted to and a big rumpus made, that the lynxes departed.

In 1842, when I first arrived at the Rangeley Lakes with my traps for trapping operations in the then extremely wild and unexplored wilderness, game of all kinds was abundant, especially fur-bearing animals. Prominent among the latter was the lynx; so plentiful were they that one could not cross a lake or enter the thick woods in winter without seeing their tracks in the snow. They often traveled in squads of from two to five, following the shore of the lake, or on the river bank, or through thick swamps and over high mountains. They were quite a formidable beast of prey, subsisting on young deer, hares, grouse or any other luckless animal they could capture. There was a bounty on their heads, and the pelts brought a good price in the market, so my first attention as a trapper was given to them.

They would screech fearfully when in a trap and could be heard for miles, and were frightfully savage, especially when first captured, and being as large as a large hound dog, we felt compelled to approach them with caution. When startled they appeared as large as a deer, with head erect and fur puffed out, they looked grand and savage. They are able to leap fifteen feet on a level, but often when walking, stepped very short, only a few inches.

My second winter trapping in the Rangeleys I caught and shot forty-nine of these lynx—having all sorts of experiences with them. I would sometimes find them in the tops of the highest trees with the trap and a log, at which time it would tax my greatest skill to secure them. I had traps set on both sides of Mollychunkemunk Lake, so I could go up one way and down the other to tend to them. One day I tracked five coming through a swamp near Aziscohos Mountain. I followed them and they took to the lake, going down on the south side, and on my way home I got three of them.

I have sometimes caught them swimming the lake, when I could easily shoot them.

Lynxes exhibit as much inquisitiveness as a woman. They would come around my camping places nights, often screeching loud enough to raise the hat on one's head, and after I left camp they would scratch open the hot ashes and burn the hair from their feet, as well as steal whatever they wanted from the camp. In Maine this lynx feeds chiefly on the white hare (*Lepus americanus*), and in the capture of this animal they are very sly, creeping on a fresh track with the greatest caution, until within five, ten or fifteen feet of them. Then with a screech which paralyzes the game they make the fatal leap, almost certain to seize the rabbit.

They do not hide the remains of the animal as a dog would, but leave it partly eaten, for the next hungry creature that comes along. They prefer a warm dinner, but can be toled into a trap by a fish or the carcass of a bird or rabbit. They have no home, but are constantly traveling.

When they bring forth their young they usually make their nest in a hollow log or fallen tree and drop three or four kits at a litter, about the size of a wharf rat, of a brown color, spotted like a fawn.

About the year 1860 Professor Agassiz, of the Museum of Comparative Zoölogy, at Cambridge, sent for me to come to him, which I did. He said he wished to arrange with me to procure for him specimens of all the wild animals in the State of Maine. He wanted them to exchange with the Paris Zoölogical Gardens and Museum, for articles and objects which could not be purchased with money. I asked him if he wanted a live skunk, he said a very "leetle" one! I procured that year, by my own hunting, about one thousand dollars worth of animals—from bears to mink—among which were many specimens of live lynx. I caught them in steel traps, and tended the traps daily. They usually got caught by the end of the toes, and the thick hair on the foot was such a protection that the trap did not injure them.

I had much trouble in learning the best way to carry them on my back, as they were very ferocious and would bite and tear fearfully with their claws, and I often had to carry them eight or ten miles through the wood.

One day I was traveling along the dense swamp below a pond with quite pack on my back and a small hatchet in my hand. It was the 6th day of May, but there was considerable snow on the ground, when without any warning a lynx leaped across my path within a few feet of my head and ran a few rods, then faced about, crouching in a position for a spring. I threw off my pack and then threw my hatchet at her, which went over her head and beyond her, upon which she ran away in the direction of the hatchet. I ran after her and picked up my hatchet, and followed her tracks on the run. I had not gone far before I came suddenly face to face with her, perhaps thirty feet away, and she was again in position to spring. This time I threw my hatchet with more precision, and hit her in the side, knocking her over. I ran to her and saw she was trembling fearfully. I felt for a string, but had none in my pocket. They were in my knapsack. I got out my pocket handkerchief and twisted it, and grabbed the cat to tie her legs, but she was reviving, and before I could tie her legs she became the liveliest corpse of the season and tore my clothes and flesh fearfully; but I had no thought of losing that $25, and by main force I tied one of her legs to a little tree. I then left her and went back to my knapsack and got a string I carried for the purpose, and cut a crotched stick, put the prongs over her neck, bringing her to the ground, and choked her until I could tie her legs together firmly. I then put her in a loose sack I carried for the purpose, and with a small cord tied to the lower and upper corners of the sack made a pack, putting it on my back, with the rope over my head and across my breast. I then found she would stick her claws and teeth through the bag and my coat and into my back. Then I broke evergreen boughs and placed them between the sack and my back. This worked well. I then had to carry the beast nine miles on my back through the woods home.

On my arrival at home in the dusk of evening, my family were in the front yard enjoying the beautiful balmy evening air. I asked one of my boys to bring a lantern, and I continued on to the barn a few rods away, and soon the lantern came and a friend who was plastering my house by the name of Charles Powers. We entered the barn and I closed the door behind me, which made the man suspicious, and he asked me what I had in my pack. I threw it off and untied it without answering, and out came the old lynx with two of her feet clear of the strings, and she jumped up with a loud spit, and up went Powers on to the scaffold 6ft. from the floor, without a thing to cling to. Nothing but fright could ever have helped a man to such a feat.

I put her in a box with slats over the top, and the next morning she had three little kits with her, one of which I have now in spirits. One I gave the Natural History Society of Portland, Maine, and one to the Cambridge Museum. The kits lived three days on cow's milk, but their mother would take no notice of them. They were armed with sharp claws and nice little teeth at their birth.

At one time I brought home a live lynx and put him in the box over night. Early in the morning I went to the barn to see how he was, and just as I opened the big door where the box was, one of my neighbors came along the road, and seeing me there he called in. He was a moderate sort of a man and had been an itinerent Methodist preacher, but was growing out of that. He was a great chewer of tobacco. He came up to me and shook hands and turned around and sat down on the cat-box. At that instant and quick as lightning the lynx struck his claws into the seat of his trousers and into his flesh, and at the same time giving one of his loudest spits and snarls. The man jumped nearly 2ft., holding on to the hinder parts of his trousers—the whole thing was so suddenly and neatly done that whenever it occurs to me even now, after forty years, I find myself laughing.

When the lynx strikes with its claws he does not hold his grip, but renews his strike. Of course when he strikes, you jerk back, and his claws being circular, they hold the flesh and it tears.

In tying a lynx's legs, it is impossible to touch them without his striking your hand with his claws, the only way to do is to make a slip noose or clove-hitch, hold it down close to his foot and drop it over, then draw it up, one foot at a time, while you have him on his back. I have captured one at night, and being too far from home had to camp out and take him the next day. In that case I take the lynx from the sack and hitch him in the opposite corner of the camp, and I have been startled almost out of my wits by suddenly waking and, before I could think where I was, seeing those two balls of fire staring at me, and sometimes the creature would give one of its most approved yells while I was quietly dreaming, and bring me out of my balsam bed all standing.

They are of the untameable, wild kind of creation. Never could an adult lynx be tamed, in my opinion, but a kitten might be, I think. I have sent many of them to Europe, but many die on shipboard—they become seasick and die in fits. This animal is now nearly extinct in the Rangeley lake country, but in the forties the woods were full of them.

I have trapped and killed several hundred of these lynx in the twenty five years spent in the early days of the history of the Rangeleys, when the wolf had driven the red deer from the State and moose occupied almost every mountain for their winter yards.

In those days it was a common occurrence to see almost every animal of the woods swimming the lakes, or meet them face to face in the forest.

BETHEL, MAINE. J. G. RICH.

## BOLDNESS OF THE CANADA LYNX.

THE following account of the boldness of the Canada lynx in winter was published in FOREST AND STREAM March 1, 1888, as a part of one of the series of Rock Climbers' letters. The time was the beginning of the previous winter, the place St. Mary's Lakes in northwestern Montana, and the people a little hunting party of four men who had been climbing the rough mountains in search of sheep, scenery, white goats, health, huckleberries and other things. The account is from the pen of our old correspondent, "Yo." He said: "The men hugged the fire pretty closely during these bitter cold days. A walk of two or three miles up or down or across the lake was all they ventured on, and no signs of game were seen. Now and then the track of a fox or a bay lynx would be seen, where these prowlers had passed along near the lake shore, hoping to surprise a wounded duck upon the beach, but of true game animals there were none about. There was no especial reason why the men should climb the mountains in such weather. They had plenty of wood and the greater part of three fat goats hung upon a tree within 3ft. of the door.

"One night this meat caused a little excitement in camp. It was perhaps two o'clock on a bright moonlight night, when Yo, who from some cause or other was half awake, heard a noise as of something falling, followed immediately by the sound of galloping quite near the tent. The first idea that flashed through his brain was that one of the horses had come up to the tent, knocked something over, and being frightened had galloped away. The dogs, however, at once set up a tremendous barking, and the sound of the retreating footsteps stopped so quickly that it was evident that no horse had made it. Thoroughly awakened, he raised himself on his elbow, just in time to see Jack getting up, and in a moment more the latter had stepped out of the tent and called out, 'Something has carried off a ham of meat,' then an instant later, 'Why, I see the darn thing there in the brush!' Yo rose and went to the door, and from the blanketed forms in the tent came the question, 'What is it?' and the recommendation, 'Shoot the darned cuss!' Jack reached into the tent for his gun, and both men cheered on the dogs who could be plainly seen against the white snow in the bushes dancing around a dark object sitting there. That the dark object was not at all disturbed either by their dancing or their furious barking was made sufficiently plain by its quiescent attitude, and the further fact that it was crunching the bones of the captured meat and was evidently making a hearty meal of it. At length, encouraged by cries of 'Sick him, Keno,' 'Go for him, Babbette,' the dogs mustered up pluck enough to rush in upon the creature, but they did not stay there long. The animal suddenly assumed enormous proportions, flew up in the air as if propelled by a mighty spring, and came down again on the back of the largest dog. The latter gave one wail of anguish, and stood not upon the order of his going, but fled at once out on the prairie 50yds. behind the tent, where he positively rent the air with his howls and yelps, while Babbette, who accompanied him, continued to bark in a half-hearted way, as if saying 'Come out here into the open, if you dare.' Meantime the creature had once more turned his attention to the meat.

"'Well,' said Jack, 'I guess he calculates he'll drive us out of camp, but we'll see first if we can't get that meat back.' He then fired four shots at the animal, which calmly went on with its meal until the fourth shot had been fired, when it again sprang into the air and bounded off into the deeper shadows of the brush. Jack stepped out to where the animal had been, picked up the ham, brought it back and hung it up in the tree, and then they went into the tent and crept into their blankets again. A good deal of speculation was indulged in as to what the animal was. That it was a cat of some kind was evident, and it had scarcely seemed large enough for a mountain lion. It was probably a wildcat or a Canada lynx, but all hands agreed that it had courage enough for a lion of the largest size.

"The next morning before breakfast Jack went out to where the meat had been brought from and returned with a little tuft of hair, gray, mixed with rufous, which had been knocked off by the ball and evidently belonged to a lynx or a wildcat. The depression in the snow where the animal had sat showed by its small size that it had not been made by a mountain lion. After breakfast Jack and Yo took their rifles and started out on the animal's track to see where it led to. It was readily followed, as it wound about through the thick willows, and about thirty steps from where it had left the meat was a bed where it had lain for some time, and in this bed was a drop or two of blood. Evidently it had not been much frightened by the row, and it was quite possible that they might come upon it anywhere. They followed the tracks very carefully, proceeding as noiselessly as possible, and stopping every few steps to look. When they had gone nearly 100yds., the tracks swerved suddenly to the right, and just as they had turned to follow them, Jack, who was ahead, made a motion with his hand and stopped, and Yo, stooping and looking under his arm, saw the animal not 20yds. away. It was lying in the sun at the foot of, and beyond, a great spruce tree, and only its hips were visible from behind the tree. Jack motioned to his companion to shoot, but before he could do so he was obliged to creep several yards to the right under the low spreading branches of a willow. This exposed nearly half the animal's side and the shot was fired as close to the tree as possible. At the report the animal gave a spring and stretched itself out on the snow in the death agony. It proved to be a Canada lynx of the largest size, and as it lay there, its thick legs terminating in huge paws armed with long claws, gave it a much more ferocious appearance than it was really entitled to. An examination showed that Jack's shot of the night before had grazed one of the forelegs, not penetrating the flesh,

but just knocking loose a little flap of skin, from which scratch a few drops of blood had flowed. This would, of course, entitle Jack to the skin, for by old-time hunters' law, established and sanctified by long custom, the first shot that draws blood is entitled to the hide and half the meat. They carried the carcass back to camp and skinned it."

## THE PANTHER'S SCREAM.

THE ZOÖLOGICAL SOCIETY OF PHILADELPHIA, Fairmount Park, Oct. 28.—*Editor Forest and Stream:* The discussion as to whether the so-called American panther does or does not scream, would be shorn of much of its length by reducing the negative statements to all that they, in the nature of evidence, can be—simple statements of the fact that the particular observer making them never heard a panther scream.

To all such I offer the assurance that if they will take up their quarters in any zoölogical collection containing living specimens of the species for such a length of time as the convenience of the animal may require, they will become sufficiently familiar with the sound to distinguish it from the voice of other beasts and birds, even when lying rolled up in their blankets in the frosty night air of the glorious Rockies.

The only question then remaining might be as to what is and what is not a "scream," and while the dividing line between discord and harmony may be somewhat loosely drawn, I venture the individual opinion that the term is peculiarly apt, when applied to the rather explosive, high-pitched and harsh voice of the puma.

ATHUR ERWIN BROWN.

### More About the Thread-Fin.

BY request Mr. R. V. R. Schuyler has furnished to the U. S. National Museum the following additional facts about the curious little fish mentioned in FOREST AND STREAM Oct. 27:

"The fish in question is unknown in this section, as the drawing in question was made from one of the first that was caught here (Biloxi, Miss.) The fishermen evidently surrounded a small shoal of these fish, as they had about two bushels of them.

"They were caught in a seine drawn over a very hard bottom, the water being about 5ft. deep. The fish were all of a size and all exactly alike. The weather was very warm when they were taken. I showed a couple of them to a number of gentlemen, but no one could tell anything about the fish. Small as they were, they were put on strings and shipped to New Orleans."

When Hornaday was in Borneo he collected a species of thread-fin in fresh waters which had the lower rays of the breast fin remarkably prolonged, their length being several times the length of the body. These separate threads are organs of touch, and can be moved independently of the pectoral fins. Many species of thread-fin are known.

### The Fall Migrations.

THE CEDARS, Oakdale, L. I., Oct. 29.—Sunday, Oct. 23, opened bright and beautiful, and was ushered in by an avalanche from the north of all varieties of warbles. Never in my residence of over twenty-five years on Long Island, have I witnessed such a migration of songsters, as have blessed us with their happy presence, and sweet voices to the date of my writing. I think I have seen millions of robins, bluebirds, yellow birds, and many other varieties whose names are not familiar to me. It is delightful to see and hear how happy the vast multitude of little innocents are, as they wing their cheery way to their homes in the Sunny South, and bid us a long farewell, ere they return again, when spring's warm hand has unlocked the streams and the trees put forth their buds and blossoms. Now that they have left us, how much we shall miss their sweet notes and innocent glee. We must content ourselves by living on the memory of the pleasure the little fellows afforded us.

They have about all sung us their last farewell now, and naught is left but big strong Bob White (Long Island Bob White). ALFRED A. FRASER.

### A Fly Given to Ink.

*Editor Forest and Stream:*

While marking some of my shells the other day, I happened to be using a stub pen, and, as I put the figure nine (9) on them, a small amount of ink was left on the loop and on the back of the figure, and also on the line which I drew under the figure to distinguish it from a six. As I marked I pushed away the marked shells a little to one side. Looking up, by some chance from my work, I observed that a fly was on top of one of the freshly marked shells, with his proboscis in the ink. I watched him carefully and saw that after he had drained the first small "pool" in the loop, he went to the back and also to the line underneath the figure, completely drying the places as if recently blotted. After rubbing his head with his forefeet and crawling around, he went down the shell and up another, but as the ink had almost dried up by this time, he only had one drink. He then flew away, apparently in the best of spirits. PHILOHELA MINOR.

MILTON, Mass., Oct. 28.

### Panthers and the Hair.

RIDGEWOOD, N. J., Oct. 28.—*Editor Forest and Stream:* Hair does not "raise" or stand on end, even at the sight of a panther. What does Rudyard Kipling say? Here it is: "It is a mistake to say that hair stands up. The skin of the head tightens and you can feel a faint prickly bristling all over the scalp. That is the hair sitting up." This was precisely what happened to me on the occasion of my first encounter with a tiger from a howdah in India in 1873. It describes my symptoms exactly. Hair just sits up! A. J. KENEALY.

### World's Fair on Steel.

SEND twenty-five cents to F. A. Lord, Phenix Building, Chicago, Ill., and obtain a fine steel plate picture of the World's Fair grounds and buildings, suitable for framing.—*Adv.*

### Election Day.

EVERY sportsman who goes into the woods Election Day should wear one of the Fairfield Rubber Company's "self-feeding" shooting vests. They are the best on the market, and a never ending source of satisfaction to shotgun shooters.—*Adv.*

# Game Bag and Gun.

## TRANSPORTATION AND CARE OF LIVE GAME.

*Editor Forest and Stream:*

So far as I am aware, nothing has heretofore been written which might be of assistance to sportsmen desirous of restocking with game their favorite covers.

With this apology, and fully aware of the incompleteness of this article, I will state some experience gained thus far in connection with work of the Massachusetts Fish and Game Protective Association's Committee on Acclimatization, hoping it may be of use to others; the game handled consisting of about 3,500 head, including pinnated grouse, sharptail grouse, English partridges, Oregon mountain quail, Gambel's partridge, Virginia quail and Northern hares.

To sportsmen wishing to procure live game the suggestion is made, first of all, that if they can procure what they wish through reliable dealers in game they will save money, time and vexation: the prices charged may seem excessive, but as a rule will not prove so in the end.

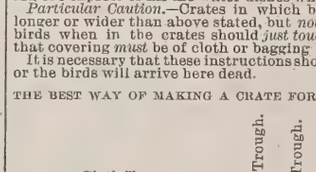
Game birds should be packed in low cases with a fair amount of side room, but low, so that birds cannot crowd one on top of another—since this is the greatest cause of loss in transportation.

The following are good shipping rules, and if one can have them observed, with ordinary care, birds should arrive in good order:

DIRECTIONS FOR SHIPPING LIVE GAME.

Birds should be put in light crates or boxes, with slats in front and back, with cloth top, and tins or dishes for food and water fastened on outside of crate so the birds may feed without spilling or fouling food and water.

Prairie chickens and pheasants must not be sent more than 5 in each compartment of crate, which should be 15in. high and about 24in. long and broad.



Quail must not be sent more than 15 in each compartment of crate which should be 6in. high and about 20in. broad and long.

Corn, either loose or on the ear, should be put in feeding troughs of crates in which chickens or pheasants are sent, and wheat or rye when quail are sent; also a small quantity of gravel should be put in with the grain. A card should be fastened on the coop, asking the express to fill the water dishes when needed.

*Particular Caution.*—Crates in which birds are shipped may be longer or wider than above stated, but *not higher*. The heads of birds when in the crates should *just touch* the top covering, and that covering *must* be of cloth or bagging and not slats or boards.

It is necessary that these instructions should be exactly followed, or the birds will arrive here dead.

THE BEST WAY OF MAKING A CRATE FOR SHIPPING LIVE BIRDS.

This can easily be made by taking an ordinary box of proper height, sawing off half of one end, putting slats on the new end and tacking on a cloth or bagging top.

As a rule, however, inexperienced shippers think they know better how to pack and give too much head room, but with disastrous results. On one occasion two shipments arrived the same day from almost the same locality. One lot, packed according to directions, eighteen dozen quail in number, lost a total of two birds dead. The other, only thirty-five quail in all, came packed in a box 4ft. long by 20in. square, divided in two compartments, and on arrival had remaining four birds alive, all of which died within three days. The reason for this was that at every disturbance the birds would start to fly—as game birds do when startled—bruising themselves and those beneath. When properly packed they cannot leave their feet nor trample other birds.

Grouse and other large birds should also have burlap around the sides of their crates as well as on top, otherwise they are quite liable to break legs and wings by thrusting them through the openings.

Pinnated and sharptail grouse are usually good travelers if used well, not being very restless and needing little care.

Virginia quail should have careful attention on their journey, especially needing plenty of fresh water. They oftentimes arrive in extremely poor order on account of a rough journey. It is a common occurrence to take from the crates birds which have died of starvation although provided with water and food in abundance, the reason being that they do not feed well when constantly disturbed; and after an unusually rough experience many may die for two or three days after arrival at their journey's end, apparently from exhaustion. When practicable it is better to transport them by water rather than by rail, as being more quiet they feed much better and are less disturbed.

The Gambel's partridge seems to endure transportation the best of any variety of small game tried thus far, and in fact this bird appears to show unexpectedly good qualities as game. They are prolific, and seem to be very hardy both as regards heat and cold, and although running badly in open, bare country, as does also the Virginia quail under like conditions, still, when found in good cover they seem to lie as well to a dog and to show as fine game qualities as the latter. They are also very handsome birds and are said to have good table qualities. It may well repay sportsmen to investigate regarding this bird.

My experience with animals has been limited to the Northern hare, although having received offers enough to stock a fair menagerie. Very tender as regards transporting, the hares require special care. There must be entire isolation one from another, else they will fight to the death. They also require quick handling even in cold weather.

English partridges, when well packed seem to be very hardy travelers, but every attempt to introduce this bird in the Eastern States has thus far been without marked success; in most cases entire failure.

When desirable to keep birds more than a short time in confinement a number of essentials should be observed.

A coop large enough for considerable freedom should be used, or, very much better, a light, well ventilated room with plenty of sunlight.

The sides and top *must* be of some soft, yielding material or the birds will die from concussion of brain or broken necks.

Wire poultry nets will *not* do, being too harsh and unyielding, and will take the skin and flesh as well as feathers off their heads, besides often crippling the birds badly in other ways. Something better may be found, but ordinary unbleached cotton cloth tacked loosely from supports will do well and probably is as cheap as anything for the purpose.

Pieces of fish net (of proper mesh so as not to entangle the birds) if stretched in front of windows will serve to let in a good supply of sunlight, but should not be less than a foot from the window frames, as when startled the birds will usually fly toward the light, and when on the wing have considerable momentum.

For quail in particular some kind of perch should be arranged where the sunlight falls, as they seem to love to bask in the warmth, crowding together like a swarm of bees, sometimes two or three deep and crushing those beneath, the whole bunch moving with the sunlight.

If readily procurable it is well to have some evergreens or other small trees or brush in the corners or at the sides, as they become less frightened if some refuge or place of concealment is near when they are disturbed.

Ample supply of clean, fresh water is needed, and water jars such as are used in poultry yards are very good for the purpose and cheap. Virginia quail need considerable water, fully two quarts daily for 100 birds; other varieties much less, and prairie chickens very little, although they do drink some.

Grain of different kinds should be given, but (although I may be in error) the use of much corn or buckwheat should be avoided on account of their heating qualities. All grain fed should be well soaked in water before feeding, and plenty of sand or fine gravel provided for digestion; one hundred quail will make away with fully a pint of sand per day, and other birds in like proportion. Green food, such as cabbage and apples (if cut open), birds are fond of, and they produce good effect.

Rats and mice probably do little harm save eating grain left for the birds; but it is possible that they may at times attack the birds themselves, though it has never happened in my own experience. The vermin most to be feared are bird lice, which can best be kept in check by leaving heaps of dust or fine coal ashes for the birds to burrow in. If kept in confinement long they are apt to be badly affected unless good provision is made for dusting.

Coops should be cleaned when foul. Allow plenty of fresh air. Wounded or sickly birds must be removed at once and kept in separate quarters. If not removed, wounded birds have no chance of living; the well ones kill them to a certainty. Also, except for the purpose of caring for the birds, the less they are visited, and consequently disturbed, the better it is for them.

Finally, if one is contemplating procuring game, orders should be placed early in the season, certainly before Jan. 1, and much better for all concerned if early in the fall.

Game cannot be shipped after the breeding season commences by the breaking up of the coveys, and very few birds are trapped after March 15, or even earlier in forward seasons.

It is an open question whether loosing game in the autumn and feeding through the winter is better than liberating in the spring. HENRY J. THAYER.

## ADIRONDACK NOTES.

NORTHWOOD, N. Y., Oct. 26.—While on a little tramp in October I saw what appeared to be a charred stump; I watched it a moment, and it moved. I then saw it was a partridge. Its back was black with streaks of brown running up and down its feathers. Its breast was of a mottled brown. I could not distinguish its sex.

A party of four recently returned from Moose River. Three of them had a pair of antlers each. The reason the fourth didn't makes the boys smile. Fred was out for a still-hunt on Thursday and saw several does, but not a deer that he wanted until late in the afternoon; then he saw an antler above a brush heap. He waited and watched, seeing the brush move and hearing the deer eating. After an hour's waiting he saw the deer's neck between two trees. He shot and had the satisfaction of seeing the deer fall. As he walked toward it he saw a nice buck running away from him, but as he had a head that would bear mounting he didn't shoot. When he got to the deer he found he had killed a nice big doe.

Bears were never more numerous. Seven have been shot or trapped within three miles of Northwood's post-office. A very exciting bear chase was had around Flae Brook last week. Guy Richardson shot a bear back of his house and killed it. With the bear were two cubs. The next day a party was organized to hunt the cubs. With the aid of several dogs a cub was started opposite Jule Allens. The bear ran a mile or more, then he took to a tree. The men came up to where the dogs were jumping around and pawing the air. After fifteen minutes of craning necks one of the men saw a tuft of hair and he shot it. The hair landed in the midst of the dogs, while the men danced around and shouted "Sick 'em," "take 'im," and other exhortations. They finally concluded the vicious cub must be dead. He was very dead. Then one of the party saw something where the fight had been. He picked it up and then the party looked sheepish. It was the detatched tail of a big coon. The members of that party tried to keep still about their bear hunt, but two of Northwood's hunters found a dead coon almost chewed to pieces where the fight had been.

The Ohio City boys say no more about the fox that Northwood boys run on the first day of the deer-hounding season. RAYMOND S. SPEARS.

### In the Old Dominion.

SURRY COURT HOUSE, Va., Oct 19.—Game is plentiful here this season and consists of deeer (there has never been known a better season for them than this), turkeys, squirrels and partridges. There is now some very good fishing in the creeks around here; large numbers of chub are being caught. The chub is what is known in most sections of the country as black bass. A. B. G.

**No notice taken of anonymous communications.**

## ON THE SUNFLOWER RIVER.

WE three "tenderfeet" had been honing for a bear hunt for some time, so about the first of November we left Indianapolis bound for the Sunflower River in Bolivar county, Mississippi. We arrived in due time at the little station of —— on the New Orleans R. R., about 110 miles south of Memphis. The town consisted of a saloon, two general stores, a saw mill and several small dwellings, situated in a heavily timbered country.

We were strangers in a strange land, but the people were kind and obliging, and in answer to our inquiries informed us that deer, turkey and small game abounded in the immediate neighborhood, but if we wanted bear and panthers the best place to find them was up the Sunflower some twenty-five miles on Black Bayou. As an evidence of good faith we were shown a half-grown cub at the saloon fastened with a chain, and the stuffed hide of a panther over 9ft. long, both captured on the Sunflower.

We were also regaled with some panther stories that were calculated to make us feel a little shy on the panther question. For instance, the boss of the saw mill said he was cutting timber with a gang of men back in the woods a few weeks before, when one morning early one of his men had occasion to go out in the cane, when a large male panther sprang from a leaning tree on to the back of the man while the latter was in a squatting posture. The weight of the animal bore the man to the ground, and he cried out for help, but before it arrived the ferocious cat had killed him with one crunch of his powerful jaws, breaking the poor fellow's neck. A colored man told us he was hunting squirrels with a shotgun, when passing through a heavy piece of timber where the cane was very high and thick, he saw a large panther on the side of a tree, in the act of climbing up it. Without waiting to think what the consequences might be he fired both loads into the panther back of its shoulder and killed it. This was the same panther whose hide we saw at the saloon. After hearing these stories and many more we came to the unanimous conclusion that we hadn't lost any panther, and if they would let us alone we would remain strictly neutral on our part.

But we were determined to have a bear, panther or no panther. So after laying in a supply of provisions we hired a colored man and brother to haul us and our plunder over to the Sunflower, some six miles away. Arriving at the river we bought some lumber at a sawmill and soon built us a flat-bottomed boat 18ft. long, 4ft. wide and 1ft. deep. We calked it with oakum, bought at Cairo, and pitch from the mill, and made it as dry as a powder horn, and after fitting it with rowlocks and seats, and with oars and rudder, we launched her on the placid bosom of the river.

While we were engaged in building the boat two young men who lived near by, both of whom were "mighty hunters before the Lord," promised to take us with them on a bear hunt. So one morning bright and early we started, the hunters each mounted on a pony, while we brought up the rear afoot, accompanied by eleven hounds of all ages, sizes and colors, but each and every one equipped with a deep bass voice.

Our route led through the dense timber and heavy canebrakes of the river bottom. Every little while one of the younger dogs would go off on a deer trail—which performance always called for a great deal of cussing from the natives—but the old dogs knew their business and kept close behind the ponies with preternatural gravity depicted on their countenances.

After a couple of miles we came to a cypress swamp, where bear tracks were plenty and fresh. The cypress knees were torn by the bears and the great cypress trees were raked and scratched by them where they had stood on their hindlegs and clawed down like a cat. We saw where they had torn the bark off the trees ten feet from the ground—unmistakable evidences of a "big un." All of these signs made us tenderfeet feel pretty dubious, as we expected the war to begin any minute. Finally one of the old dogs struck off on a trail, baying at every jump. The natives said it was a bear sure and that old Lead—all good hounds are called Lead or Drum—would soon overtake the bear. After a chase of perhaps twenty minutes we could tell by the sound that the bear was brought to a stand, and we set out with the hunters to where they said the bear was. Sure enough, when we came up there stood the bear with his back to a large tree fighting off the dogs, when one of the natives killed him with his rifle.

After skinning the bear they put the meat in large sacks made for the purpose and hung to the saddles and the hunt was over.

The next morning we started on our twenty-five mile trail up the river. The water in the stream was quite low and clear and about 100ft. wide. The banks were from 15 to 25ft. high, and the cane grew to the very edge of the bank. Doc and I each pulled an oar, while George steered. Our progress was slow, as the current in some places was quite swift, but the greater part of the way was dead water.

Five miles from the mill we left the last cabin behind us and were in a dense wilderness. It was our first introduction to a country where for twenty-five miles on either side no human being lived, where no stock was running, and where every track was that of some wild animal.

The first day we saw no game except ducks and squirrels, but in the afternoon of the next day, and only a mile or two from where we intended going into camp, we saw a bear in the river getting a drink, but before we could get our guns he had scampered up the bank and into the cane. We had the pleasure of gazing on his backs wet with water that had dripped off of him. We saw two more bear swimming the river some 300yds. away, and looking for all the world like big Newfoundland dogs with just their heads out of water. We fired several shots, some coming pretty close, but didn't hit them. The river bank was literally clawed down where the bears climbing up the banks would leave the marks of their sharp claws in the soft clay.

We finally came to where a small stream ran into the river, and knew from the description we had received that we had reached our destination, and began looking about for level ground enough to put up our tent. This was no easy matter, as the banks generally rose direct from the river 25 to 30ft. But fortunately we did find a level place just large enough for our purposes, and, better yet, close by a spring of clear water strong with iron and sulphur.

Our tent came so near occupying all the level ground that we could almost step from the front door on to our boat.

After putting up the tent, getting a lot of firewood and cutting enough cane, from which we stripped the leaves to make our beds, and then getting supper, we were so tired that we went to bed as soon as it was dark.

We were awakened the first night by hearing some large animal falling or rolling down the steep bluff just back of the tent. It was too dark to make any investigation till morning, even if we had cared to do so, but as soon as daylight appeared we could see the tracks of a large bear where he had scrambled back up the hill. For the life of us we couldn't see how the bear came to fall down the bluff, but he had fallen, for we could see where he had torn up the dewberry vines in trying to catch himself as he came tumbling down.

We had been told that there was a lake back from the river about three-fourths of a mile where we would be sure to find game, so we determined to cut a path through the cane to it. The cane was very thick and from ten to twenty feet high and impassable for anything in the shape of a man, but several years before there had been an attempt made to drain the ditch, and by crawling on your hands and knees up the old ditch bed it was thought possible to get to the lake. After several hours hard work the writer succeeded in reaching the lake, which he found to be a bayou about a mile long and a hundred yards wide. The water was clear and deep. Large cypress and oak trees grew on the margin of the lake, and a strip of tolerably clear timber some fifty yards wide extended around it between the cane and the water. I began cutting a path with my hatchet in the direction of the camp while George cut toward me. By hallooing occasionally we could tell just where each of us "was at" and finally came together about half way between the lake and camp. We now had a good path direct to the hunting ground, and felt like we had done a good day's work.

The next day we set out to explore the lake. We found plenty of bear signs. They had a beaten path around the lake and in soft places we could see fresh tracks, made that morning, as large as my hat, while the ground under the persimmon trees looked like a lot of hogs had been there. This began to look interesting to us, and we expected to have a bear fight in about a minute. Doc and George went up, while the writer went down the lake. The wind was favorable and I kept my eyes peeled, expecting every minute to run foul of a bear, and sure enough, just beyond a thicket I heard one walking in the edge of the water. The brush was so thick I couldn't see him, but I heard him come out of the water and begin turning over logs hunting for worms and rooting around like a hog. About this time I became pretty nervous and thought the track was getting pretty fresh, but knew it would never do to back out now, so I began crawling through the thicket toward the bear. I must have got within 50yds. of him when he heard me and went galloping off into the cane, making as much noise as a yoke of cattle and beating down cane as thick as my wrist with his heavy body.

My experience convinced me that the only way to get a shot at a bear would be to find a good place where they would be likely to come for water and wait for them. So I found where a large tree had been blown down into the lake, with its body some 10ft. above the water, and crawling out as far as I could get, found I had a good view of both sides of the lake for 100yds. I could see great numbers of fish in the clear water directly under me, while flocks of ducks swam up and down within 10yds. of me, unconscious of my presence. Gray squirrels were very numerous and tame; they would come close to me, and didn't seem to care who or what I was, but on the other side of the lake a large fox squirrel (something rare in that country) in hunting for grapes spied me out and began making a terrible fuss about it. I thought sure that squirrel would kill himself barking. He would bark till he turned black in the face and would run up and down a large grape vine, jerking his tail and cussing me for everything he could think of.

I have sat perfectly still at the root of a tree and had deer walk up in plain view within 20ft. without seeing me, but you can't hide so the sharp eyes of a squirrel won't find you out.

While seated in my treetop a large otter came swimming by. I could have shot him easy as not, but didn't want to lose a chance at a bear. I waited till it began to grow dusk and went back to camp, where I found the boys. They had had no better luck than I—saw plenty of sign, but no bear.

About a hundred yards above the tent a large drift had formed in the river, and George said he believed he would go there and try for a channel cat. He cut a dry cane about 15ft. long and baited his hook with a piece of squirrel liver. In a few minutes I heard him calling for help; and running up to the drift found he had hooked some kind of large fish and couldn't get him out without help. We finally landed it, when it proved to be a beautiful channel cat of at least 12lbs. weight. We found it no trouble to catch all the bass and salmon we wanted; in fact, the river seemed to be full of fine fish.

While George and I were fishing, Doc went back to the lake to kill some ducks. About sundown we heard him calling for help and firing his gun. When going to his relief we found him wandering up and down the lake completely lost. The wind had blown the cane down over the path where it left the lake, and Doc would go past it every time. He finally got scared and thought he would have to climb a tree and wait for morning or else make bait for bears.

One day George took his stand near the edge of the lake, and after waiting patiently a while a large bear came out of the cane and began drinking at the lake, not over 75yds. away. George was a good shot and could plug a squirrel in the head nearly every time; but the sight of the bear rattled him so that he fired too low, and the bullet struck the ground just under the bear. This scared the bear worse than the bear scared George, and he jumped several feet in the air and was soon out of sight in the cane.

After this none of us could get a shot at a bear, although we had no trouble to get all the deer and turkey we wanted.

We watched the lake and the river patiently for a week and finally gave it up, loaded our baggage in the boat and floating down the river to the mill, shipped it to the railroad and came home.

We give it as the result of our experience that the only successful way to hunt bear is to hunt them with dogs trained for the purpose. One can still-hunt for deer and turkey (and in our opinion that is the true and most sportsmanlike way to hunt deer), but he can't do much good in hunting bear that way. Their sense of smell, sight and hearing is so acute that the chances are ten to one that the bear will discover you before you do him and make his escape.

On our return home I had the pleasure of meeting and dining with Mr. R. E. Bobo, who owns a large plantation near the small station on the railroad named for him. Mr. Bobo has a large pack of the very best bear dogs and is an enthusiastic hunter. In 1879 he personally killed 304 bears, 52 wildcats, 47 panthers and 66 deer. Who can beat this record? C. C.

RUSHVILLE, Indiana.

## AGAIN THE HUNTING RIFLE.

*Editor Forest and Stream:*

Mr. Aztec objects to large bores in hunting rifles "on account of weight, of the tearing of game, danger to stock, etc.," but does not object to 8 or 9lbs. in weight of rifles. His reference to the bloodshot condition of haunch and other parts should be left out of a discussion relating to the use of rifles by sportsmen, as I think "the haunch or other parts" should not be shot at, excepting, perhaps, bears. And it is of no account whether they are "bloodshot" or otherwise (large bores preferred). The principal thing to bear in mind in hunting with a rifle is getting a correct aim and selecting a deadly spot to hit when one shoots. As my old guide used to say when instructing the inexperienced, "Pick out the spot you want to hit and kill him." In a majority of instances the range is point blank and all shots should be made forward of "the midrib." Therefore the question of caliber in rifles should be confined to that which is most effectual up to, say, twenty-five rods.

A large hole will let out more blood than a small one in a given time and I contend that the large will produce better results than the small bores. As to the condition of meat, whether the animal is "dropped" or otherwise killed, "Aztec" should know that where a bullet traverses meat which is ordinarily eaten the blood will settle even though the animal "dropped" to a shot eventually penetrating to a point that paralyzes. And he might conceive the idea that an express bullet would do more harm to meat so penetrated than the ordinary solid shot. "The danger to stock, etc.," need hardly come into the discussion, for a rifle of any caliber shot near settled regions is dangerous to stock, etc. WALLOT.

*Editor Forest and Stream:*

Many of your correspondents that favor large calibers have told of the killing power of their favorite weapon, claiming the shock is great enough to kill some of the larger game in their tracks, while the smaller calibers striking in the same spot would only wound, or at best cause slow death and perhaps loss of meat. My first experience in shooting deer was with a Sharp's old reliable, the game a large buck standing rear end to, looking over his shoulder. As I could get no better chance I took careful aim and fired. The bullet of .56cal. entered the hindquarter a little to the left, ranged through, breaking the bone, entered the bowels and so on to the heart, lodging in the brisket. As your correspondent "Aztec" says, in theory he ought to have dropped, but he did not; he ran at least 75 or 100yds. before giving up. On another occasion I shot a medium-sized buck coming full tilt, head on, the bullet of .44cal. striking him in the breast, smashing his heart to fragments. He still continued to run for some distance and not a drop of blood could be discovered on the yellow leaves far at least 40yds. of the distance covered.

In all my experience I have never known but one deer to drop in his tracks, he being shot through the neck, high up, the bullet striking the spine. From the first I have contrived to reduce my calibers from .56 to .44-40, then .40-65, from that to .40-60; my next love was a .38-55, which has given me the best satisfaction, being not too heavy, at the same time the powder charge being great enough to drive the bullet home. In my opinion it all depends on where the animal is struck. If shot too far back he will give the hunter a long chase, though the bullet be shot from a small cannon. If I had lost any grizzlies I should probably use as large caliber as I could get, but for all game found in the Maine woods the little .38-55 does the business in grand style. As I said before, it all depends. A. N. B.

JAMAICA PLAIN, Mass.

### Wild Goats in British Columbia.

EDGAR, Neb., Oct. 26.—I returned from a trip to British Columbia last month (along the east shore of the Gulf of Georgia), where we had a royal good trip. We were about 150 miles north of Vancouver, and from 35 to 50 miles inland. Owing to the difficult nature of the country to travel about in I decided at the last moment not to take my camera along, and very much regretted it when too late, as I had several fine opportunities to photograph the white goat, as we saw quite a number of them, and they were not very wild; in fact, I was at one time within 30ft. of an old goat and her young kid, and think that owing to the nature of the ground I could have got within 20ft. of where she was quietly standing chewing her cud, with the kid lying at her feet. They were up on a rock and in good position to have made a good picture of. We saw several bunches of them, but did not molest them much as we only killed what we wanted for eating. The goats up in these mountains do not seem to be afraid of a man at all. We also had some fine fishing. E. E. H.

### Killed Four, Wounded Six.

FREMONT, Ind.—*Editor Forest and Stream:* The Steuben *Republican* notes that "Eli Rinehart, one of the hunters who recently went to northern Michigan, has written Wm. G. Croxton under date of Oct. 9 as follows: 'We began to hunt Friday morning and have hunted two days; have killed four deer and wounded six more. Game is plenty.'" This speaks for itself. If their luck continued until the 25th there must be nothing but cripples left in Michigan to keep up the supply for another season. Such men should come out of the woods and use their shotguns for small game only. MC.

## BOSTON SPORTSMEN.

MR. F. R. SHATTUCK, well-known to the readers of the FOREST AND STREAM, says that he finds considerably many quail in the Boston markets, since the open season begun, and he notices that the birds are plump and fine. The additional time given to the close season has given to the birds more time to mature, and the good results are very apparent. Such is another of the good works of the Massachusetts Fish and Game Protective Association.

Mr. J. F. Dwinell, of Dwinell, Heyward & Co., has got back from his annual partridge hunt at Upton, Me. At first he found the grouse very scarce, but later, as the trees were cleared of leaves, the shooting was much better. The birds were wilder than he has ever observed them before in the same localities. They have also changed localities a good deal; sections where they were plenty last year and the year before affording no birds this year, while in the woodroads and carries where there were very few last year he found his best shooting this year. He hunted the most of the time with two guides, and his total record was ninety-six partridges, beating his former records. The birds were generally so wild that they had to be shot on the wing, or from the trees, after they had flown.

Dr. Lewis T. Foss, of Court street, Boston, has just returned from a hunting trip to Nicatous Lake, the famous home of Jonathan Darling, now game warden. Mr. Foss brings with him a fine buck deer weighing 223lbs., which he had the good fortune to shoot on the shores of that famous lake. At Bangor the game warden and everybody else who saw it pronounced it the finest deer that has yet passed through that city this season. It was on exhibition at the Revere House café, where it attracted a good deal of attention.

Occasionally a coon is found in the Bay State. One was shot the other day in the woods at Wayland. The animal weighed 25lbs., and was considered very large game for that part of the country. The lucky sportsmen were N. B. Hartford and Wm. Perkins, of Watertown, who were up there on a gunning expedition. They also shot a number of partridges, rabbits and woodcock. Since their adventure with the coon dozens of sportsmen have hunted the same woods for more coon, but have taken none. An old resident is reported to have said that only one other coon had been seen in that vicinity for fifty years, and that one was shot about a week before the 25-pounder taken by Messrs. Hartford and Perkins. It is a curious fact that the raccoon in New England has a way of appearing in sections where he has not been seen previously for many years. One or two are taken and then there are no more for another long period of years. A gentleman was telling me the other day of going back to the old partridge hunting grounds of his boyhood in Maine a year or two ago with a friend, also born and reared in the same town. They killed a raccoon that weighed over 25lbs. Neither had ever seen a coon in that section before, nor had the oldest inhabitants. None have since been taken there.

Mr. Adams, of Adams & Chapman, Boston, and Fin Killam, of Reading, have just returned from a partridge hunt at Berwick, Me. They found the shooting pretty good and got fifteen birds. More partridges are now coming into the Boston market, and from Maine, too, though it is unlawful to ship them out of the State. Since the leaves have got off the trees the birds have been taken in better numbers. Messrs. Adams and Killam had some good dogs, as well as being expert hunters.

Mr. E. M. Gillam, commercial editor of the Boston *Advertiser*, has gone on his annual vacation. He started Friday evening, by Fall River line, and will go to Vineland, N. J., the home of his mother. He takes both dog and gun with him. At Vineland he will meet his brother, A. M. Gillam, sporting editor of the Philadelphia *Record*, also his brother, M. M. Gillam, the writer of the celebrated advertisements of Postmaster-General John Wanamaker. Mr. M. M. Gillam has been connected with Mr. Wanamaker's clothing house, in the capacity of writing advertisements, for many years. All three of the Gillam boys are lovers of dog and gun, as also was another brother who died in Boston some years since, while in the service of the Boston *Post*. Mr. A. M. Gillam will bring a setter and a couple of hounds with him, and the boys will hunt a good deal of their vacation time. The law is off on quail, partridge (called pheasant there), deer and rabbit on the first day of November, and the hounding of deer is permitted for one month. The Gillam boys have hunted in that section for years, and are thoroughly acquainted with the country. They have heard of a number of coveys of quail, and will early be on the ground at the opening of the season. If there are any deer to be had they are likely to get them. Still the hunting in such parts of the country is very badly overdone.

Mr. Henry S. Fisher, salesmen for the Arlington Mills, and with Harding, Whitman & Co., is about the happiest hunter in Boston at this time, and well he may be. He returned from Maine with a fine bull moose as a trophy. The animal, or rather the carcass, was on exhibition at Tucker & Roak's market on Tremont street on Monday. It weighed over 1,000lbs., and the antlers measured 48in. across. Mr. Fisher killed him about 40 miles above Medway, on the East Branch of the Penobscot River. With his guide he had gone some four miles into the thick woods from the lumber road. They came upon the moose, with a cow. Mr. Fisher fired at the bull when he stood sideways to him, and being a good shot the back of the animal was broken, but too far back to bring him down at once. Mr. Fisher says that the beast then began the greatest running he ever saw from any creature with his back broken and his hindlegs doubled up under his belly. He had to follow him some 30 rods before he could get another chance for a sure shot. The second shot, through the shoulders, brought the forest giant down with a great crash. But then the troubles of the successful hunter began. He had already shot a fine deer that morning. He saw the deer and fired at it. He saw it get away, or thought he saw it, for a deer jumped and ran from the spot. He told his guide that he had missed the deer. Dod said, "No, sir. You have dropped him dead. Come, and I will show you." They went to the spot, and sure enough, there was the deer, stone dead. It was another one that had got away.

But here they were in the woods with nearly 1,200lbs. of game and only two men to get it out. They had to go back a long distance to find a team, and it was four or five days before they got back to the moose again, with an improvised "jumper" and a horse. They had to cut out a road from the main lumber road into the woods where the moose lay. The beast was loaded on the "jumper" and Mr. Fisher and his friend started on ahead. They actually got a long distance ahead and "waited for the train" or the "jumper" with the moose on it, to come up. It did not come. The next morning they went back and met the team, only a short distance out from the place where the moose was killed. The "jumper" had broken down and had to be mended, and this consumed a good deal more time. In short it was several days after the moose was killed before it was out to the settlement. Mr. Fisher says that it would have been an easy matter to have killed the cow moose, but he does not believe in such hunting, even if the law permitted it. He is a lucky hunter in Maine. He got two deer in that same section last year. He deserves all of his good fortune. The head of his moose he left with a taxidermist in Bangor to be mounted. None of the meat will be suffered to waste. This moose was evidently an old one and a fighter. His hide showed many marks of former battles.

SPECIAL.

## CHICAGO AND THE WEST.

[*By a Staff Correspondent.*]

CHICAGO, Ill., Oct. 21.—It would occasion no surprise if any night now there should appear written on the heavens above Chicago the flaming legend, "Shaving, 15 cents; bay rum extra, 5 cents." Indeed, this sign should by right surmount a city which resembles nothing so much as a gigantic barber pole in the colors of its outer garb. Chicago is decorated. Chicago celebrates. Chicago, center of Columbia, and for a year, at least, the center of the world and the world's interest, keeps open house for all good readers of their geographies and history books. Ah! Columbus, if you could but see—if you could but know this inheritor, this darer, this successor which succeeds, this city which never brought back excuses for results, but laid down facts and accomplishments at the end of every quest: this city, which hoped and built its own fulfilment, this city; so large and vigorous that it cannot dream big enough for its own future—this city which reversed belief, which sought in the West and found a world!

"In 1801 Chicago was a swamp," says one of the current guide-books, "in 1811 a small military post, soon to be abandoned, and to be the scene of a terrible Indian massacre; in 1821, again an insignificant military station: in 1831, a village of 12 houses, without mail routes, post roads or post-office; in 1841 an incorporated city, with 5,752 inhabitants; in 1851 rapidly assuming commercial importance, on the eve of possessing railway communication with New York; its population numbering 34,437: in 1861 its population almost quadrupled, and its shipments of breadstuffs increased tenfold within a single decade; in 1871 rich, proud and magnificent, bidding fair to outstrip the most famous commercial cities of either the Old or New World, but suddenly, on that memorable October night, almost swept out of existence, only to rise triumphantly from its ashes in more than its former splendor; in 1891 the greatest railroad center, live-stock market and primary grain port in the world; the scene of the activities of over a million and a quarter of toilers, and still advancing with rapid strides."

It was only in 1818 that Illinois, now leading all the other States in cereal productions and mileage of railroads and even ranking fourth in manufactures, was admitted into the Union, with a population of about 30,000, mainly settled in the southern part of the State. To-day Chicago has a population nearly fifty times that which the whole State had on its day of statehood.

The area of Chicago is 169 square miles, or 108,160 acres, and its opaque "rivers" are crossed by sixty-three swing bridges and two tunnels. Not long ago, residents tell us, the fishing was good in these streams for pike, bass and mascallonge. Mascallonge and bass were abundant at the lower part of Lake Michigan and near the mouth of the Calumet River. To-day there are ducks, snipe, prairie chickens and a World's Fair within the limits of Chicago. This fall some of the 3,000 policemen of Chicago arrested offenders for shooting ducks within the city limits, within four miles of the World's Fair.

Chicago is the center of 30,000 miles of railway, owned by thirty-eight companies, which lead direct to some of the finest sporting grounds of the world. Chicago has over sixty trap-shooting and fishing clubs, and thousands of sportsmen, of as high aims and accomplishments as any in this land. Chicago believes in fair play. Chicago honors Columbus. Chicago looks like a barber-pole. This is Chicago's busy day.

### Quiet in Sports.

It is probable that less hunting was done this week in the West than in any similar period for years. Every body came to Chicago. Day before yesterday 100,000 paraded the streets, and 500,000 looked on. Life was a burden on the streets. Yesterday the yellow crests on the helmets of the Sioux Indian cavalrymen were drowned in the crowds who flocked to see the troops of the United States army parade in the park. In a building which would have roofed a quarter-section of wheat or corn, 1,000 voices sang in unison to a crowd unnumbered. Orators of the land spoke to a corner of the crowd, and two full bands squeaked weak and faint, lost in the distance like little whistles. It may well be thought that the current interest was not afield. Not much of news is to be chronicled.

The flight of ducks is now well south. Sharp frost is probable to-night, and that will send the teal down south of here. The northern mallards are now dropping in. The snipe are now working south. Quail shooting has not yet begun, but will be in swing as soon as the frost cuts the weeds down. Chicken shooting is over.

### Mostly Horicon.

There has been no good duck or snipe shooting on open or free waters of late about here. Last week on Horicon Marsh Mr. B. Dicks killed seventy-three jacksnipe in one day, all on one little bog not 30yds. long. It was flight shooting, the birds coming in too light on the black mud, and while it lasted must have been exciting sport. I saw this same bog the next day, and it was sown with shells. The birds had become shy, and I only got sixteen, though they could be seen working in hundreds further over in the marsh. By paddling along the edge of the bogs, good shooting could have been had.

On this same marsh, which has offered about all the duck shooting this fall of which definite accounts have been received, Dr. Buechner last week one day bagged 16 mallards and 4 other ducks, Mr. Stone bagged 9 mallards one day, and Mr. C. S. Wilcox got 19, nearly all mallards, in one day, also getting 20 ducks the next day and 24 the day following that. Messrs. Lamos and Prickett were up, and had some shooting doubtless, though they had not reported at last accounts. The weather was warm and very bad for duck shooting last week, but on the day I was out I saw thousands and thousands of ducks, a great many mallards and pintails. They would rise high when startled, and go off in a body to some open water on the marsh, and settle down all together, not "working" well at all. When a good storm comes somebody is going to have mighty heavy shooting up there.

On the "upper club" grounds, on this same Horicon Marsh, the birds are also abundant. Indeed, there is no difference between the grounds as duck preserves, and together they make the finest duck marsh now left in the West. Dr. G. J. Clark and Mr. F. M. Lawrence, of the upper club, go next Tuesday for a week's shooting at the club. They killed respectively 19 and 28 ducks one day last week. Mr. P. F. Stone, often mentioned as the efficient manager of the Diana, or 'lower Horicon Club," will meet the above gentlemen and go over the marsh with them. Mr. Stone is about to take hold of the upper club also, and will set it solidly on its feet and market its unsold shares. This is a FOREST AND STREAM idea, and a most fortunate one for all concerned. Ultimately, I do not doubt these two clubs will be practically one, and will own a magnificent property. In ten years a share in such a property will be worth $2,500. The ducks of the country are going. Horicon Marsh can be made a perpetual preserve. We have nothing like it in the country. Mr. Stone is a manager of a stalwart sort, and things look very favorable for a proper handling of a marsh whose privileges have in the past been imperfectly estimated. The issuing of permits will probably be stopped, a better club house put up, etc., etc., and the steps made rapid toward making this the best club property now available. This will be hard on the shooters who have clung to the idea that this was still open ground, but it is the only way to save Horicon Marsh from the fate which has overtaken Fox Lake, Koshkonong, Poygan, Winneconné, Butte des Morts and other duck grounds once famous and apparently exhaustless.

The last two shares in Diana Club were sold to Mr. De Golyer, late of the "De Golyer Club" on the Kankakee, of which I have written, and to which Mr. Ward, Mr. Cook and other gentlemen of Chicago, Mr. Widdicomb, of Grand Rapids, etc., belonged for some time. The old Kankakee grounds were sold for farming land, and these former club members, I understand, were looking for a chance to purchase other good ducking grounds when Mr. De Golyer bought into the Horicon Marsh on the last possible basis, as far as the lower club was concerned. Last week Mr. De Golyer went up to the new place, and was out two days, though he met with bad weather—which is to say, good weather—and so got little shooting.

Mr. R. R. Street, of New York, purchased the first share of the upper club under the new regime, and goes up next Tuesday to look over the grounds.

Mr. F. C. Donald, of this city, after a year of hard work, has resolved upon two weeks of air, and hesitates between Dakota and Horicon, though probably he will go to the latter place, where he will get better shooting than in Dakota.

While I am on this fruitful Horicon theme, I cannot refrain from sharing the amusement I have had in reading over the old constitution of this "upper club," which was gotten up, as may be understood, some years ago. Art. 3 of the constitution says, under head of "Purpose of Organization":

"The business and purposes of said corporation is the cultivation and practice of music; the refinement of both mental and bodily powers; the obtaining proficiency in sharpshooting with rifle, pistol and shotgun; and in handling the sportsman's hook, spear and net, the protection of wild game out of season, and its legitimate and scientific capture in season, and the culture among its members of gallantry, sociality, temperance and morality."

It is needless to state that when the new constitution is arranged, the "sportsman's spear and net" will be left out of it, though I trust the highly commendable clause as to gallantry, sociality, etc., may be left untouched.

### Unknown North Country.

The Canadian despatches say: "J. R. Tirrell, of the Canadian Geological Survey, has just returned from the exploration of the Athabasca country. Tirrell traveled 600 miles north of Regina. He was three months in the country lying north, and found that it was composed largely of granite, with volcanic rocks, which will doubtless prove rich in minerals. Iron appeared to be plentiful. For 400 miles north of here the land is good. Beyond that are rock and sand. This region is the wintering grounds of herds of caribou, which come down in October from the treeless and barren country north. Moose and bear are also plentiful. This country has never been explored before, and many inaccuracies were found on maps, in all of which the district was marked "unexplored." Such large natural features as Lake Athabasca and Walleston Lake were found to be laid down erroneously, being from thirty to forty miles out of true position. Lake Athabasca is clear fresh water, and is as large as Lake Ontario, Lake Walleston being nearly the same size. The Chippewas of this region are a peculiar people. They have prominent crooked noses and allow their long black hair to fall over their faces. They have no intercourse with white men. Well up the Caribou River the party came to the most beautiful lake they had ever seen, called Cree Lake. Tirrell describes this as being as clear as crystal, without a tinge of blue, and one can see to the bottom at great depth. On the homeward journey Whitefish Lake was surveyed. Although this is the third largest lake met during the whole trip, it has never appeared on maps. Tirrell has obtained enough information about this region to enable him to get out a new and accurate map."

### Carolina Quail.

Mr. Geo. L. Eddy, of Racine, Wis., writes me Oct. 19:

"DEAR SIR—As an old friend and subscriber of FOREST AND STREAM I want a little information. Whereabouts inland in North Carolina can I go this winter for a few weeks and find nice climate combined with fishing and a little shooting and have a little outing? I read this past

summer of some such locality but it has skipped my memory. I can't recall where I saw the article. What can you recommend? P. S. Will Dr. Thomas ever pay his deer fine? Conscience is a great thing."

A stranger in North Carolina would be likely to meet with trouble from the Farmers' Alliance, under whose workings much of the land there is posted. If Mr. Eddy could be present at the Eastern field trials at High Point in November, or the Central trials at Lexington in December, he could get much better information than is possible from this point. The gentlemen there would direct him and help him, I think. If Mr. Eddy would write to Mr. Geo. Leach, High Point, N. C., his letter would doubtless receive courteous attention. As to the article on North Carolina I cannot say, unless it was one of those written by Mr. Chas. Hallock. The latter gentleman knows much of that country, and a letter in care of FOREST AND STREAM would find him.

### From New Mexico.

Mr. W. F. White, general traffic manager of the Atchison, Topeka & Santa Fe Railway, in company with a .50cal. Winchester express and a few friends, started some time ago on a hunting and fishing trip in New Mexico. Their car is expected back within a week and should bring a pleasant story with it from that old land of dreams and deer and pleasant days. E. HOUGH.

175 MONROE STREET, Chicago.

## GAME IN PORTLAND, OREGON.

*Editor Forest and Stream:*

We of "the wild and woolly West" find a grim sort of pleasure in teasing our Eastern friends a little now and then.

While they can boast population, wealth, refinement and superior advantages in many respects, we can "sass" them back about ducks, deer, elk, trout and Mongolian pheasants.

But you must understand that Portland is no cross-roads. It is a city of nearly a hundred thousand inhabitants, including Mongolians, but nevertheless it is somewhat wild if not woolly.

Last year three deer were killed within the corporate limits.

A week ago to-day Al Guist and a friend bagged four dozen jacksnipe within the corporate limits, which, considering the fact that our city is compactly built and without those "wildcat" additions that make so many Western cities geographically extensive, must be regarded as rather good work with the shotgun and retriever.

To-day Al, M. F. Sloan and myself started out about 11 o'clock to give our dogs a little exercise and a swim in the Willamette. Al and Sloan took their guns along simply to encourage the dogs, while I carried my cane for the same purpose. We were gone less than two hours. Al bagged three Mongolians and a ruffed grouse with his little No. 16, while Mr. Sloan knocked down a brace of handsome Chinamen, all within 200yds. of the North Portland public school house where a dozen or more instructors daily teach "the young idea how to shoot," and as Brother Sloan remarked, "where we had to turn the corners of the blocks to avoid running over the houses."

Then the boys took a turn along the edge of Guild's Lake and secured a half dozen snipe.

The ordinance prohibiting the discharge of firearms within the city limits was badly shaken if not actually broken, for the manufacturing portion of the city was still beyond us.

Besides giving the dogs necessary exercise we gave ourselves a nice game dinner you see; but as the dogs worked well and the boys lost no birds, readers of the FOREST AND STREAM need not go to the shool house yard for any big bags until its forests are restocked.

S. H. GREENE.

OCT. 23, 1892.

## LONG ISLAND QUAIL.

OAKDALE, L. I., Oct. 29.—For the two dreary months to come we can while away many pleasant hours on the golden stubbles throwing shot after these little streaks of brown. The outlook for quail shooting this fall is very encouraging. Never before have the birds been protected as now. Twenty thousand acres of land in this vicinity have been leased by clubs and private parties and stocked at great expense. Poaching, trespassing, snaring and trapping, shooting in the close season and shooting on the Sabbath are things of the past. Game constables, well paid, are scattered all over this portion of Suffolk county and all the railroad depots are being watched night and day.

All law-abiding sportsmen are under deep obligations to Mr. H. B. Hollins and members of the South Side Sportsmen's Club for their untiring energy and perseverance for this great change in the right direction. And they are all waiting patiently for Tuesday, Nov. 1, to reap the reward of their labors.

It will be interesting to know who will have top bag on that day and how many shells it will take to bring the birds to bag. ALFRED A. FRASER.

## A NEW HAMPSHIRE BEAR POCKET.

LANCASTER, N. H., Oct. 22.—If any of your readers think they have lost a bear it might be well for them to examine the country hereabouts, for there seems to be a large and varied stock to select from. During the past ten days four have been killed here within five or six miles of our village. The largest one, brought in to-day by Victor Leavitt, weighed 315lbs. and yesterday the same party brought in a smaller one, the weight of which I have not at hand. I reckon Mr. Levitt has a bear "pocket" located. Personally, I would not object to being in one of Mr. Hough's "pockets" alobg with the quail and chickens he tells of, but when it comes to being in such a confined space with a 315-pound bear I think I would rather not be "in it."

I think the reason of their unusual boldness is due to the scarcity of nuts in the woods, and they come more into the open in quest of food; gathering apples from a farmer's orchard without first obtaining permission was the cause of the downfall of two of the above mentioned.

Bears are not uncommon in this section; hardly a season passes that several are not taken in Jefferson and Whitefield, adjoining towns, and of late they seem to be on the increase.

I heard a farmer from the eastern part of our town remark to-day that he had given up sheep raising in disgust, as the bears killed enough each year to knock out all the profit.

Meanwhile, we shall endeavor to hold this invasion of "b'ar" in check, but if matters become serious I shall call on the readers of FOREST AND STREAM for assistance.

ROB.

## INDIANA SMALL GAME.

FREMONT, Ind., Oct. 17.—*Editor Forest and Stream:* I notice your Chicago correspondent in his article of Oct. 8 speaks of thousands of quail in Indiana. I am very sorry to say that in Steuben county or this part of it, quail are not as plenty as they were last season. Wet weather, I think, killed most of the early birds. There are a good many late hatched that are just able to fly. Woodcock have been more plenty this year than they have been for five years. While hunting woodcock this fall I have seen but few partridges; they were all old birds. Squirrels plenty, mostly fox squirrels. Chickens and ducks are almost a thing of the past with us. MAE.

VALLONIA, Jackson county, Ind., Oct. 21.—The copy of the *Game Laws in Brief* has come to hand. Both my brother and myself think it a valuable little pamphlet. It gives all particulars as compact as in a nutshell, and we think the illustrations are excellent, so life-like. We need a good rain here before quail hunting can be very good. We were out once, but it being so hot and dry we did but little shooting, in fact, got disgusted with the hunt, and the guns and dogs will rest until the weather is more favorable. J. T.

## THE CINCINNATI QUAIL CASE.

FISH AND GAME COMMISSION.—Cincinnati, Oct. 29.—*Editor Forest and Stream*: In answer to yours just received making inquiries in reference to the recent quail case in our city, beg to say that Mr. Roth, proprietor of the St. Nicholas Hotel, had been looked upon here as one of the most persistent violators of the game law. He seems to have taken the position that it was a great hardship that he could not serve game in and out of season as he saw fit. The case was tried by one of our magistrates who found Mr. Roth guilty and assessed a fine, and as our magistrates in cases of the violation of the game law have final jurisdiction the case could only be taken up on error. The case will now go to the General Term, and if that court sustains the courts below we presume Mr. Roth will want to try the Supreme Court of the State of Ohio, and we sincerely trust the Supreme Court will sustain our law, which will not only require Mr. Roth to pay fine and costs, but he will have a very heavy attorney bill to pay, as he has one of our best legal firms in the city to defend him. The final disposition of the case will be looked forward to with a great deal of interest.

JOHN H. LAW, Fish and Game Com.

### What He Was Going To Do.

CAPON IRON WORKS, W. Va., Oct. 9.—Here I am away out in the wilds of West Virginia, roaming the mountains and enjoying the magnificent scenery, fine air and new experiences. I shoot a squirrel now and then, or catch a bass in Capon River, and have had one snap shot at a turkey in the brush, but failed to score, though feathers flew. Am going to slaughter both deer and turkey this week, or—make a desperate attempt.—O. O. S.

### What He Did Do.

NEWTOWN, Pa., Oct. 17.—I am now at home once more, safe arrival from "cohn pone," fried chicken and biscuit. As far as big game is concerned, the hunt was a fizzle. We were not in it. I knew it was too early to do good work, but my friend could not go later, so we made the best of a bad matter. But in other respects we enjoyed the trip very much. The scenery just now among the Alleghenies is just simply indescribably gorgeous. Nowhere else can such a gorgeous picture be witnessed. That whole billowy Appalachian upheaval is one mass of color on a scale so grand and beautiful that it takes a man's breath away and leaves him speechless. —O. O. S.

### Deer Plenty in Vermont.

THE train hands of the through freight from St. Albans, arriving at Rutland about 8 o'clock yesterday morning, met with a peculiar experience at Pittsford, about eight miles north of Rutland. It was in finding a young deer entangled in a wire fence by the side of the railroad tracks. They stopped the train to extricate the animal and found it to be a young buck about two years old, fat and sleek. The animal was unharmed, and was taken into the "caboose" and carried to Rutland, where it attracted a great deal of attention. Gen. Ripley, who is interested in the game laws of the State, ordered the animal returned to where it was found and allowed to go its way. It has become a common thing to find deer roaming about the hills in the vicinity of Rutland, and as the State laws are quite severe in the matter they are seldom molested. A few years ago several animals were turned out on those hills for the purpose of propagation, and there are daily evidences that the experiment will prove successful.—*Springfield Republican.*

### Oregon Duck Shooting.

PORTLAND, Ore., Oct. 25.—Last Sunday, the 23d inst., W. A. Story, H. H. Beal, Fred Beal and Wm. Greenwald at Cline Lake, thirteen miles below Portland, in five hours killed 316 ducks. Of these 156 were mallards and the balance mostly widgeon. The shoot was made with 600 shells, as the boys did not anticipate any such a chance. Is not this a remarkable shoot?

S. H. GREENE.

### A Maine Moose Case.

IF the writer, who signs his communication "Fairplay," will send us his name or afford us means to verify the statements contained in his letter of Oct. 17 relative to a Brooklyn millionaire's unlawful moose killing in Maine, we will be obliged.

### Pennsylvania Game.

TITUSVILLE, Pa., Oct. 16.—Birds are very scarce this fall in this vicinity, owing to the havoc created in the nesting season by the cold weather and prolonged rains of this spring, culminating in the terrible flood that destroyed 62 lives and a million dollars in property in this unfortunate city early in June. Among the birds the woodcock have naturally been the chief sufferers.

Three of us in a hard day's gunning over a large stretch of territory, with three accomplished setters, were so fortunate as to bag 6 grouse and a woodcock on the opening day, Oct. 1. Only 2 grouse beside these were found. On another day later, Owe and Greely B., two of the smoothest shots in this part of the State, and myself killed 2 woodcock only after another day's exertions.

Many grouse were last winter picked up frozen stiff, being previously weakened by hunger. It almost seems like murder to cut down the survivors this fall, they have had so much to contend with. C. F. E.

MUNOY, Pa., Oct. 31.—There was some duck shooting on Muncy Dam yesterday. Several black ducks were seen, but the sport was interrupted by rising wind. At this season after a storm there is fair sport.

Bass fishing is fairly at an end, though only a week ago twenty were caught by two gentlemen who knew where to find them. Few large fish have been caught. The average weight is less than a pound for the season. They were fairly plenty.

A few days ago fourteen quail were seen running about the streets of Muncy.

In the mountains ruffed grouse are reported plenty, but very shy. Squirrel shooting has not been up to the average.

There are yet in our streams some things that ought to be inspected by our fish warden. Several suspicious constructions were seen not long ago in Loyalsock Creek.

Deer are reported plentier than formerly near English Centre, Pa. M. E. J.

### News from the Saginaw Crowd.

DAWSON, N. D., Oct. 17.—Had good sport in the Bad Lands—7 deer, 1 antelope. Here we have not done much, as it has been warm and the geese have not come down yet, though we have killed about 100. The duck shooting is good. W. B. M.

## VIEWS OF THE ROBIN.

MANY robins have been killed in New York State this year, although the law forbids it. There has been a great slaughter of the birds on Long Island and on Staten Island. Rev. Thomas Dixon, Jr., of this city, was fined by a Staten Island justice last week for killing robins. When interviewed by the reporters Mr. Dixon gave out this statement for the press:

I have just returned from a Pennsylvania hunting trip and on the train read the reports of my alleged killing of song birds on Staten Island. These reports, particularly those fathered by the United Press are mostly melodramatic fiction and my alleged utterances a pure invention.

The facts are as follows: I have not felt well of late, and have been compelled to take as much outdoor exercise as possible. Tuesday noon I went over to Staten Island to my old home, to practice wing shooting before taking a hunt for ruffed grouse and woodcock in Pennsylvania, which I had planned, and from which I have just returned with a good score. I practiced on sparrows and roons, supposing them both pests. I killed thirty-one of these birds in three hours' practice. Mr. Lisk arrested me for killing "song birds." This arrest was made with most feverish haste and brutality. He was trembling from head to foot with the excited instincts of a vulture, thinking of his possible share of the spoils, and when I asked him for his authority, he drew his club from beneath his cloak and rushing at me tried to push me down without the slightest provocation. I called a carriage and drove to Justice Acker's house. The birds were counted and the fine paid, Mr. Lisk solemnly swearing for the sake of $10 that four common sparrows were thrushes! I did not remain in the Justice's private office more than five minutes, and not one syllable of the alleged conversation took place.

In my opinion it would be most unseemly for a preacher or anybody else to kill a song bird. But this is the first intimation I have ever received that a robin is a song bird. It was, of course, a valuable piece of information. At least, I paid $165 for it. In my native South the robin, so far from being considered a song bird, is regarded as a disreputable, gluttonous pest. On Staten Island, however, he has been deified. In my soul I am sorry for the people whose stock of song is so low as to prize as divine the cry of the robin. I repent in ashes. I would not knowingly ruffle the feelings of a savage by taking the brass ornaments from his nose, for he doubtless thinks them beautiful.

Still, I cannot help marveling at the keenness of ear of the law-maker who first discovered music in a robin. That man, in my opinion, should have a medal. I hope the Game Commissioners will take a part of my fine to start the fund. The man who can discover music in the cry of a robin could doubtless find a symphony of Beethoven in the movements of a sand fiddler if given encouragement; and I doubt not that such a man would succeed at last in locating the "lost chord" in the bray of an ass. Genius should be encouraged.

For the next few days I shall devote myself strictly to tiger hunting, and if as successful as with robins I'll not complain at the expenses. THOMAS DIXON, JR.

NEW YORK, Oct. 28.

The following note on the "Robin North and South was printed in the *Audubon Magazine* and is reprinted as timely and illuminative:

A New York correspondent who has been traveling in Virginia, expresses surprise at finding the robin there esteemed only as an article of food. Strange as this may have appeared to him, it must be remembered that the robin is looked upon very differently in the North and in the South, and this is because the bird itself and its associations are changed. The robin of the South is by no means the robin of the North; there is almost as complete a transformation as that of the bobolink of Northern meadows into the rice bird of Southern fields.

In the North the robin is a domestic bird; it nests confidingly in the lilacs by the porch, is busy all day long in the yard and fields about the house, and at sunset sounds its cheery call from the topmost bough of the pear tree. From its first coming as one of the heralds of the glad springtime, and through the summer, it is a familiar and cherished part of the outdoor surroundings of every country home; of all birds it holds first place in the affections of old and young; and when the country boy goes to the city and grows up amid brick-walled streets, he always sees the home pair of robins in the picture of the little white farmhouse, which memory so often recalls.

But summer ended, over the robin comes a change; he forgets his song, leaves his haunts in the dooryards, grows wild and shy, shuns mankind, and takes to the woods and swamps. Then going South, the birds gather in flocks, and lose the individuality which has so much to do with making them recognized and welcome in the North. They are no longer domestic in their ways, and there are no tender associations to protect them and stay the hand of the gunner. The mockingbird, not the robin, is the home bird of the South. Perhaps if the mockingbird, leaving his music and his manners at home, should betake himself to the North, with companions in flock, all plump and delicious for a potpie, he might fare no better than the robin at the South; and then the traveler from Virginia or Georgia or Florida, encountering mockingbirds on New York hotel tables, would have good ground to suggest, as our correspondent does, that the residents of one section of the country should spare the birds dear to the people of another section. When the Audubon Society shall have accomplished its mission, all useful and beautiful birds will be protected everywhere, and like all citizens of a common country enjoy security and immunity when they take a notion to travel

## THE KEKOSKEE FISH STORY.

It is not surpising that the Kekoskee fish story should meet with "doubting Thomases" in this very matter of fact period. In fact one has but to say "fish" to bring to the surface all the incredulity in man. Sim's "Big Lie" or Gulliver's grandest exaggerations sink into insignificance in the mind of the average reader when compared with a truthful fish story, set forth in a quiet, dignified manner. It is true that a close analysis of brother Hough's story reveals some inconsistencies, but as yet no one seems to have paid the least attention to them, having undoubtedly relegated the whole to the already long list of remarkable "fish stories." We wish to add our mite to the wonderful tale. At the time mentioned we resided in the western portion of Fond du Lac county, Wisconsin, some thirty miles or more from the hole in the lake from which the fish were taken. At that time what is now known as Horicon marsh was a lake, this hole being in the northeast part of it. It was in the winter season, but the sleighing was good; therefore the wagon portion of the story must be eliminated that absolute truth may prevail. The reports of the marvelous supply of fish soon reached the people living at a distance from the lake, and from far and near the farmers and others with two-horse sleighs, on which were wagon boxes, went to the lake, forked up a wagon box heaping full of fish, and took them to their homes, where many fed them to their hogs, as has been stated, while others skinned and salted them. The fish were principally bullheads, with an occasional pickerel. We have seen as many as five loads of these fish pass through our little village in one evening, and that was but one of many roads that was traveled by parties going to and from the lake. The east side of the old lake is indeed a veritable Arcadia, and many are the interesting tales of hunting, fishing and Indian war scares that a diligent writer might unearth among its quaint and unvisited inhabitants.

AKABA.

BOSTON, Oct. 27.—*Editor Forest and Stream:* In your issue of the 20th "Nutmeg" expresses his regret at my comments on the Kekoskee fish story, and speaks of my "casting discredit" on Mr. Hough's "plain statement of fact," and attributes my action to "a spirit of jealousy of the scientific attainments of the West." "Now this is most alarming," to use the words of Little Buttercup in "Pinafore." Those who read my article must see that it was written for the express and only purpose of bringing to the support of Mr. Hough's statements a new line of argument and that in the article I expressly and unequivocally asserted my belief in the story. Pray, Mr. Editor, what more can a man do? "Nutmeg" claims to live in St. Louis and "much nearer Kekoskee and the Widow Sneider and Old Santa Anna" than I, and therefore to know more about the facts in the case.

Now, though a resident of Boston, which "Nutmeg" sneeringly refers to as "the home of pure science, not to say the forcing house of speculative philosophy," let me say that I have spent years in Wisconsin and northern Illinois and believe I could give "Nutmeg" points on Western matters generally. Moreover, I do not believe that "Nutmeg" lives even as near to the scene of the story as St. Louis. His name is suspicious and he must belong to the wooden variety. No sir, I want him to understand that Mr. Hough and I believe that story, whether any one else does or not, and that it isn't the right thing to cast doubt on the sincerity of either of us. Brought up as I have been in my humble way on "pure science" and the simple methods of "speculative philosophy" I resent the imputations of guile made by one who evidently knows little of science, "fine" or otherwise, and who, judging from his language, takes "speculative philosophy" to be some sort of a vegetable.

While I am writing let me express my gratification that the question of the panther's ability to scream is fairly started. I wish I knew how and where we left off with the "woodcock's whistle" and the "coon's whicker."

C. H. AMES.

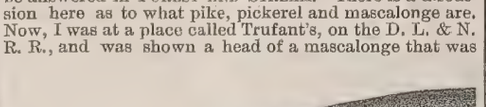
## THE BIG ALLIGATOR GAR.

MR. WILLIAM J. LEES, of St. Louis, has informed the secretary of the Smithsonian Institution about the capture of a monster gar in the Mississippi River at Carondelet. The fish, which belongs to the species called alligator gar, or manjuari, is one of the largest and most formidable predaceous inhabitants of our fresh waters. It is a native of the Lower Mississippi Valley, extends southward to Mexico, and is credited also to the Island of Cuba, where the name manjuari is applied to it.

In 1820 Rafinesque published a description of the alligator gar from which we extract the following remarks: "Its length is from 4 to 10ft. One was caught which weighed 400lbs. It lies sometimes asleep or motionless on the surface of the water, and may be mistaken for a log or a snag. It is impossible to take it in any other way than with the seine or a very strong hook; the prongs of the gig cannot pierce the scales which are as hard as flint, and even proof against lead balls! Its flesh is not good to eat. It is a voracious fish. Its vulgar names are diamond fish (owing to its scales being cut like diamonds), devil fish, jack fish, garjack, etc. The whole body covered with larger stone scales, lying in oblique rows; they are conical, pentagonal and pentahedral, with equal sides from half an inch to one inch in diameter, brown at first but becoming of the color of turtle shell when dry. They strike fire with steel!"

The development of the gar has been studied by Mr. Alexander Agassiz, who found some resemblance between it and the sharks in the brain, the mode of development of the breast fin, and of the formation of the gills. The young gars "move very slowly and seem to float quietly, save an exceedingly rapid vibration of the pectorals [breast fins] and the tip of the tail. They do not swim about much, but attach themselves to fixed objects by an extraordinary horse-shoe-shaped ring of sucker appendages about the mouth."

The eggs are deposited in the spring; they are large, adhesive, and resemble toads' eggs. The young eggs of the common bony gar, naturally laid, were hatched in six days.



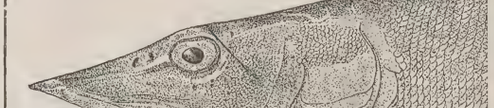
The gar taken at Carondelet was evidently the largest on record if no mistake was made in its measurement; its length was given as 21ft. 7in., and its jaws 5ft. Peter Heil and Ed. Brown were fishing from a boat with a stout line and a strong hook baited with beef. After the gar was struck it towed the craft and its occupants rapidly for a space of three blocks when its strength became exhausted, and the huge captive was fastened with a wire rope, to become an object of curiosity to hundreds of admiring visitors.

If Rafinesque had lived to read FOREST AND STREAM of June 5, 1890, he would have reconsidered his statement about the vulnerability of this bony monster, for he would have learned how "L. M." and his friend Howard Douglas harpooned three alligator gars in Bigbee River during a short fishing trip.

Readers who wish to see a figure of a gar-pike nearly related to the alligator gar should turn to plate 241 of the "Fishery Industries." T. H. B.

## PIKE, PICKEREL AND MASCALONGE.

LANSING, Mich.—I would like to ask you a few questions in regard to the names, length and weight of some fish to be answered in FOREST AND STREAM. There is a discussion here as to what pike, pickerel and mascalonge are. Now, I was at a place called Trufant's, on the D. L. & N. R. R., and was shown a head of a mascalonge that was said to weigh when caught, 60lbs., and have been told that they never grow so large.



HEAD OF PICKEREL.

(Cheeks and opercles completely scaled.)

HEAD OF PIKE.

(Cheeks scaly. Lower half of opercles naked.)

HEAD OF MASCALONGE.

(Lower half of cheeks and opercles naked.)

How large does a genuine pickerel grow and what is the color of its meat?

How large is the largest mascalonge known, the weight of which can be proven?

What is the difference between a grass pike and a pickerel? G. M. K.

[The common pickerel seldom exceeds 6 or 8lbs. in weight, and its limit is said to be 10lbs. The flesh is white and savory, but often dry and inclined toward toughness. Moreover, it is very full of fine bones. The largest mascalonge recorded appears to be the 100lbs. specimen mentioned in "Fishery Industries," U. S., page 464. That was taken at Milwaukee in 1868 by Mr. Schultz. Mr. Ludwig Kumlein, who communicated the statement, said its accuracy was vouched for by many reliable persons. The grass pike is the common pike of the Great Lakes. It differs from the pickerel in many respects, and notably in color and size. The pickerel has a network of narrow, dark lines covering the usually greenish sides, while the pike has the sides thickly covered with pale blotches, nearly as large as the eye, and arranged almost in rows on the grayish or green-gray body color. You should send to FOREST AND STREAM for its numbers containing descriptions and figures of the pike, pickerel and mascalonge, which will enable you always to distinguish these fishes without difficulty. These are dated April 2 and 9, and May 14, 1891; the last especially will help you to fix the differences in your memory.]

### Vermont Trout Season.

VERMONT Legislature now is session. Bill introduced in the House Oct. 19 prohibits the taking of trout for a period of five years. Referred to Committee on Game and Fisheries. F. E. A.

## CAMPS OF THE KINGFISHERS.—XIV.

### CARP LAKE, MICHIGAN.

### The Carp Lake Camp.

[*Continued from page 358.*]

I WAS determined to take a trout out of that stream above the bridge, if I had to follow it to its source.

The woods on this side were more open, and I had little trouble in getting to the water.

The stream above the bridge widened to 50 or 60ft., and many of the best looking places were out of reach without "cooning" a treacherous log or "teetery" limb, and taking the chance of a sousing in the icy water and afterward strip and dry my clothes in the sun, at the mercy of the deer flies and skeeters, as "Br'er Roach" did once upon a time in the past on Cedar River, and "ye Editor," on the same stream, which episodes were still fresh in my memory.

I had to content myself with fishing along the bank where there was an occasional opening through which to drop the hook, but the results were not very satisfactory.

In the hundred yards or more that I followed up the stream I took four trout, two of which were strung on a twig to carry back to the boat, another—a little one under the limit—returned to the water, and the fourth and last was left jerking and twisting in the water in plain sight, a victim to his own smartness, for he had taken a turn or two around some sunken limbs 5 or 6yds. out in the stream, and I was forced to break the line and leave him to his fate.

I tied on another hook and went on up a few rods, and lost another yard of line and the hook by getting fast, but this time without "hanging" a trout.

The tangle was getting bad again and I turned back disgruntled and out of humor with that part of Cedar Run, and its profanity-breeding surroundings, stopping on the way to find that my smart trout had worked loose, at which I rejoiced, for I had been feeling a trifle mean because I had been unable to get out to the submerged limbs and release him.

Back at the bridge I found Kelpie busy on a log with the lunch, but believing it a good practice not to eat when you don't want to I tied on and baited another hook to try the deep hole below the bridge, where Kelpie said he had taken a 10in. trout and lost another good one.

The "good one," or one that Kelpie said "bore a striking resemblance to him," seemed to have forgotten all about the recent pricking from Kelpie's hook, for as the current carried the squirming worm near a sunken log he came out from under it with a quick flirt, sucked in worm, hook and all—the water was so clear I could see the whole performance—and turned to go back under the log, but somehow he lost his bearings and took the wrong direction, and before he found out how the catastrophe came about he was gasping and flopping on the grass at the end of the bridge, wishing, as Kelpie quaintly "guessed," that he had staid under the log till the cyclone was over.

While Kelpie finished his lunch I tried the hole again, and although I saw another trout I could not induce him to bite; he had no doubt been a witness to the crazy antics and disappearance of the other one, and "had his doubts" about worms with strings to 'em.

When Kelpie had cleared off the table (log) and put the remainder of the lunch back in the boat we crossed the bridge and fished down the stream a matter of 50yds. in the open water to where it narrowed to a rod or more, but we got nothing except two or three little fellows that were returned to the water, and then as the sun had tilted away over past the noon mark we concluded to get in the boat and fish along down and get out on the lake before darkness overtook us, for to get caught in that stream after dark in a canvas boat meant shipwreck sure, and a night in the "bresh" with a million or two hungry skeeters that would suck the blood out of us till we would be too transparent to make a shadow when morning came.

When we got out in the stream we found it would take the whole time and attention of one of us to manage the boat in the swift current to keep her off the logs and snags and hold her steady in desired places when necessary, while the other fished.

Kelpie insisted on "standing" the first watch as sailing master by sitting flat down in the bow of the boat, where with an oar braced against the bottom, or by hanging on to a bush or projecting root along the bank he could hold the light craft, while I stood up in the stern, hanging down stream, and fished below.

The stream was open enough for free casting, but as we had no flies along we had to content ourselves with the means at hand. I tried worms for the first hundred yards or so, but the result was not very gratifying, and I killed one of the trout and fashioned a nondescript fly, or lure, out of the anal, and one of the ventral fins by placing them on the hook in such a way that they would twist in the water like a spinner when acted on by the current.

This "happy thought enticer"—with which I had scored a failure on the "big trout of McConnell's Creek"—proved to be just what the trout of Cedar Run had been waiting for all summer, and almost the first cast started trouble among them; however, it required little casting, as the current would switch the fly (?) nearly anywhere required by a lateral movement of the rod tip either to the right or left.

Standing up in the boat I could see all the likely looking places and deep holes before we got too near them, and a "stop her" to Kelpie would bring the ironclad to anchor at about the right spot to fish without too much line out to handle well, and when we wanted to move again "drop her down a little, Kelpie," and the current did the rest.

Every few yards, or rods, as the boat floated over sunken logs or a tangle of roots, trout would dart out from under or among them—2, 3, 4, and 5 in view at a time—and flirt out of sight up or down stream, those going below to be routed out again when the boat came along, or to remain in hiding under the bank, or behind a log, mayhap, till we got by.

The stream seemed to be alive with them, and we kicked ourselves with vehemence, mentally and figuratively, because we had not made some trips to it before, instead of wearing ourselves out threading the tangle of McConnell's Creek, Fouch's and Maybert's, not counting Alexander's Creek and the little stream near Daddy Nolan's.

The sport grew so exciting and engrossing that at times four or five trout were flopping in the bottom of the boat at once before I could spare the time to put them on the stringer hanging over the side, for it would have been "agin natur" to stop fishing a hole, or, if it please the æsthetic better, a pool, as long as there was a trout in it with his mouth open ready to take in the swirling fins.

All this time I was having a heap o' fun with the deer-flies; at least that's what Kelpie called it from his low seat in the bottom of the boat where they didn't bother him, but gave their undivided attention to "the ole cuss standin' up in the stern."

As we came up the stream in the forenoon they had not annoyed us, but now it seemed the hot afternoon sun had limbered them up and put vigor into 'em, and they had sallied forth on the war path, each one armed with a red hot needle, and each individual blood-sucker of the entire swarm of some hundreds looking for the ole cuss in the stern, as it appeared from a "cuss-ory" view of the situation.

The "sampling committee" had probably made a call on Kelpie over in the bow, and finding his blood too thin for sustenance, passed the word to the others to give him a wide berth, and the blessed old sinner was sitting there without a fly around him, watching me with a soft grin on his face, chuckling slyly to himself and looking as complacent as a kingfisher on a limb that had just swallowed a couple of 2in. shiners.

If there is an insect, bird or beast on the face o' this livin' airth with a more ironclad "nerve" than a deer fly, I have failed to run across it.

When one gets a "toe hold" and settles down to business and you make a pass to scare him away, missing, it may be, by less than a thirty-second of an inch, he don't scare worth a d—ime, nor budge, but keeps right on boring for blood with his red hot drill till you scrape him off or smite him out of existence.

They are the most headstrong, heedless, persistent, stick-to-you, soul-harrowing pests that infest the North Woods, and any one that can stand up against their attacks for an hour without splitting the commandment bearing on profanity into a thousand splinters need have no doubt about a blessed hereafter. From a swarm of hungry deer flies, good Lord deliver us, or words to that effect.

They settled on my shirt, neck, hat and face, and I was kept busy as a bob-tailed cow in fly-time scraping them off by ones and twos, and handfuls, with one hand, while I handled the rod with the other.

When I hooked a trout, and had to use both hands to reel him in and release the hook, the bloody-minded "varmints" had me at their mercy for the time, and then the cuss words, blue-tinted, ornamental and otherwise, that rent the air were a caution to the unregenerate.

If Kelpie thought the atmosphere smelled a trifle sulphurous he said nothing; he only grinned and enjoyed the performance going on at the stern—and it was, no doubt, worth the price of admission.

The trout bit more eagerly as we went down the stream and the flies grew less annoying, or it may be that the sport got so "overpowerin'" that I forgot all about the flies, but Kelpie guessed that "a good many got killed in the fight, and a good many others had fallen into the water, disabled by having their wings scorched, which accounted for their thinning out."

At any rate, I forgot the combination of a good many of the plain, every-day cuss words and found more time to attend to the trout and string them when they became too much exhausted to flop in the bottom of the boat.

KINGFISHER.

## ANGLING NOTES.

### "Days in Clover."

IN one of my notes in FOREST AND STREAM last July I referred to an angling outing on the Itchen in the south of England, by "The Amateur Angler" and "Piscator Major." It is an open secret that "The Amateur Angler" is Mr. Edward Marston, the head of the great London publishing house of Samson Low, Marston & Co., and that "Piscator Major" of his sketches is his son, Mr. Robert B. Marston, editor of the London *Fishing Gazette*.

The elder Mr. Marston is the author of several works that have an interest for the angling fraternity, and one that has just been issued with the title, "Days in Clover," is certainly one of the most fascinating and dainty little volumes that I have had the pleasure of rading. The author is an accomplished man of letters, and he is a fisherman, and something of a naturalist, and a lover of country sights and sounds, and not without a delicious sense of humor; and, withal, a keen observer of nature in her varying moods. There is a charm about his writings that causes one to forget all the worries and perplexities of life and wander by his side in his various outings, where all is blissful peace and quiet; and when the last page of the book is finished one feels that he is parting with a kindly friend who has taught him how to live in the world to make his life brighter and better. The book costs but one English shilling and is just the right size to put in one's pocket as a panacea for a score of ills real or imaginary. I wish I might present copies of "Days in Clover" to hundreds of fishermen, for after reading it they would be ashamed to kill undersized trout if they had a spark of conscience left, and no one of them would dare to exaggerate his catch, for the author, who says he is an old man, and who writes with the freshness of youth, and overflowing with gentleness and the milk of human kindness, and love of everything good, would, somewhere between the covers of the book, say the words that would prove a rebuke—mildly and gently administered—to practices that were questionable. One does not wonder that Piscator Major says of him, "He is the best man I ever met. God bless him!"

"Days in Clover" is composed of fourteen letters, and some of the titles are, An Outing with Izaak Walton, A Day's Fly-Fishing in August, The First of October, The Last of October, My Holiday on the Wye, Angling Sketches, A Day or Two on the Itchen, The Itchen Revisited, My Holiday in Wales, etc. Here is a quotation: "I saw a rise in a likely hole; I swung my fly dry and cast it with the utmost precision. My little 'red rail' floated upright and jauntily over the spot where I had seen the rise, and a big trout came at me. I struck in the ninety-ninth part of a second, but I was too late. The fish in this stream consider him a 'duffer' who cannot strike in the one-hundredth part of a second, and that, I regret to say, is a point of perfection at which I have not yet arrived. The ninety-ninth I can reach easily. Again I threw over him; again he came at me. I missed him again only by that one-hundredth vibration—a narrow squeak for him, you may be sure; but he knew his superiority and clearly enjoyed the fun of playing with a duffer. He became bold and careless; he tried the ninety-ninth vibration of a second by way of experiment, and I had him. He jumped half a yard clean out of the water, and otherwise fought like a demon, enraged more, I am certain, at being caught napping, as it were, in this way, than if he had been fairly hooked, as he knew he ought to have been, in the one-hundredth part of a second, that infinitesimal point of time making all the difference to these very learned fish."

Just one more quotation, a short one:

"I may here say that I never go a-fishing without the Major. I try his wonderful patience a great deal; when I am dry-fly fishing I have a way of swishing off my flies in trying to dry them, to say nothing of constantly getting caught in the opposite bank or in a tree; or else I leave my flies a mile or two behind me, stuck fast in thistle or grass, while I have steadily fished on, unconscious of my loss. The Major always comes to my aid and puts me right for a fresh start; in fact, I could never fish at all, but for his ever ready help at hand."

The book is not all about fishing, and I can say of "Days in Clover," as the Amateur Angler wrote of a volume that he once reviewed, "This is a book which no gentleman's or angler's library (the terms are synonymous) should be without."

### Dame Berners and Wynkyn de Worde.

I hold that it is not nice to be hypercritical, but to be critical within certain bounds is a duty, and as such I write what follows.

In "American Game Fishes" is a chapter upon the

A SNAP-SHOT OF OUR GUIDE.

(FOREST AND STREAM Amateur Photography Competition.

striped bass, written by the late Mr. Francis Endicott, in which occurs the following passage: "Contrary to the precepts of the late Wynkyn de Worde (A.D. 1491) who, in his introduction to the famous 'Treatyse on Fysshynge,' holds forth in this manner." Here follows the quotation. At first glance it might appear that Wynkyn de Worde was the author of the "Treatyse" for which he wrote the introduction, but Mr. Endicott himself in an article in "Sport with Gun and Rod" has said that Dame Juliana Berners was the author of the book, which was "emprynted by Wynkyn de worde," but that is not why I refer to the matter. I know that it is claimed that Dame Berners did not write the book at all, because the treatise is not included in the Book of St. Albans of 1486. In Mr. George W. Van Siclen's American edition of the Treatyse is the preface to the English edition of 1827 in which the date of the first publication of the Book of St. Albans is given as 1488, but Bibliotheca Piscatoria, Westwood and Satchell (1883), makes the date 1486, which is ascribed to her.

The treatise first appeared in 1496 (not 1491, as Mr. Endicott is made to say) in the Book of St. Albans of that date, and later (1500) it appeared by itself, which brings me to the point I wish to make. The quotation which Mr. Endicott ascribes to Wynkyn de Worde "in his introduction" is this, in part: "And for by cause that the present treatyse sholde not come to ye hondys of eche ydle persone whyche wolde desire it yf it were emprynted allone by itself put in a lytyll plaunflet, therefore I have compylyd it in a grete volume of dyverse boyks, etc." This quotation does not appear in the introduction by Wynkyn de Words or anybody else. Bibliotheca Piscatoria says of the edition of 1500, the one giving the treatise by itself for the first time: "This edition appears to have been published as a 'lytyll plaunflet' notwithstanding the caution of the authoress against this course, given in the concluding paragraph of the treatise in previous editions, which in this instance is omitted." That tells the story. The extract quoted by Mr. Endicott is not in the introduction, and was not written by Wynkyn de Worde, but it was written by the authoress and formed the concluding paragraph of the book, as will be found by referring to Mr. Van Siclen's American edition. This is a small matter, perhaps, but errors uncorrected grow and take root, and in time become so fixed that it is impossible to correct them, therefore I think it well to nail them as soon as they appear.

A. N. CHENEY.

### Bass and Young Shad.

WE learn from Fish Commissioner H. C. Demuth that black bass fishing has been poor of late in the Susquehanna River on account of the large numbers of shad going down to the sea. The bass are so well filled with shad that they will not take live bait. Fishing has improved, however, during the past week. As the river is very low and entirely free from the culm of the coal mines which was so annoying last year, he thinks late fishing will be good unless heavy rains set in.

## MORE ABOUT CHIPOLA.

COLUMBIA, Ala., Oct. 29.—Several inquiries have reached me asking as to the locality, health, accommodations, etc., of Chipola or Cypress Lakes, Calhoun county, west Florida. The lake is about the frost line, as oranges, lemons, Japanese plums and other tropical fruits grow here to perfection. It is within twelve or fifteen miles of the Gulf of Mexico on the south, and nearer to St. Andrews Bay on the southwest, and constant sea breezes through the immense virgin forests of balsamic pine insure fine, vigorous health to residents and visitors. The hotel accommodations are good. Two well kept hotels and many private boarding houses on either side of the lake furnish visitors with good fare, etc., at $1 per day or much less by month. These houses all have well-constructed canoes and batteaux, which are furnished free, and guides either for hunting or pointing out the best fishing grounds can be had for a trifle.

From Oct. 15 to May 1 the hunting and fishing are all you could desire.

Any person desiring to visit the lakes can readily reach them via Savannah, Ga., and S. F. & W. R. R. to River Junction, thence by steamer to Iola, where hacks convey to the lakes, two miles distant, or via Atlanta, Ga., to Columbus, Ga., and steamer to Iola, via Montgomery and Eufala, Ala., and steamer; or via New Orleans or Mobile and P. & A. R. R. to River Junction and steamer to Iola. Society good. Several churches, several general stores, in fact any and everything that a hunter or fisherman wants to make him healthy and happy.

PISCATOR.

## THE NAVARRA SALMON.

SAN FRANCISCO, Oct. 20.—I promised to investigate at the proper time and report upon the question of salmon fishing in the Navarra River, the scene of my former triumphs in taking that gamy fish, and which location I have always advocated as affording splendid fishing; but alas, the hand of the vandal has nosed out my favorite ground. I have just learned that the deadly seine is being plied with the usual effect, and rod fishing is spoiled. I had anticipated being able to write to the several gentlemen who purposed joining me here for a raid upon the Navarra, but I cannot encourage them to come since the river has fallen under the ban of seining.

The river for three miles from its mouth is tide water, with scarcely a perceptible current, hence is easily seined, and as the salmon come in with the flood tide the vandals lie in wait and scoop them up, and what they don't get are so frightened and demoralized as to destroy rod fishing almost entirely, and thus I am all broken up in my expectation of having one of my good old times when I landed thirty or forty in a day's fishing; so I say drat the selfish Italians, who are thus invading our sacred grounds and robbing us of our sport.

It is possible I may conclude to try my luck up there, and if things are not as bad as represented I will herald the news to my expectant fisherman friends in the East.

PODGERS.

### The South Mountain Fishing Club.

FOR downright, hard-working, enthusiastic, never-to-be-discouraged, painstaking anglers let me bring forward this aggregation of Washington men famous in literature and law. You may count their numbers on the fingers of your two hands, but the names of their acquaintances and friends would fill many pages of FOREST AND STREAM.

Late in October a party of six of its members were on their favorite Potomac River fishing grounds, between White's Ferry and Edwards' Furnace, a beautiful stretch of water, about five miles long, one-quarter mile wide and varying from 4ft. to 15ft. in depth. There were Major T. B. Kirby, Mr. Fergus Ferriss, Col. Richard Bright and Messrs. John P. Miller, A. J. Kaiser and E. M. Hood.

For three days they fished assiduously with the live "Baltimore minnow" or black-banded fresh-water killifish, and their total catch was 94 black bass. The water was remarkably low and clear—so clear that "Cliff," a FOREST AND STREAM correspondent, who was on the river further down, said he could see the point of his hook in five feet depth. As a consequence, the bass were in the deep holes and dainty about biting.

Many of the fish were small, but some of them were large enough to satisfy the ambition of the average angler anywhere. Major Kirby caught a 3-pounder that fought like a giant, and Mr. Miller made the record with a beauty weighing 5lbs. 9oz. on a rusty pair of spring scales. The club is a unit in placing the actual weight above 6lbs. There was trouble with that fish first and last. After five minutes' furious play the bass found a convenient snag on the bottom around which he wound the leader, and there he concluded to stay and did stay fully fifteen minutes, when some one started him with a long pole and the sharp struggle was renewed. Miller won—and lost. The fish was vanquished, boated and strung; but he was lost before the party reached the landing. The record remains, and the bass will linger in memory while the record lasts.

T. H. B.

### Trout of Third Connecticut Lake.

LANCASTER, N. H., Oct. 22.—I notice in your issue of Sept. 22 "Ompompanoosuc" speaks of the trout in Third Connecticut Lake as differing in shape and color from the trout of other waters in that section. I noted the same thing last June, that being my first trip to Third Lake, and to me they seemed identical with the trout taken in the Diamond Ponds, being more silvery in color and slimmer built, and far more gamy than the average brook or pond trout, and again having a meat of a pronounced salmon color, similar to the Diamond Pond trout. I have always contended in a modest way that there are two species of trout in Diamond Ponds—the short, deep, brown-backed, white-meated trout, and the long, slim, silvery-sided, blue-backed, red-meated trout. You can catch both under similar conditions and in same locality. If they are the same trout, "what makes the difference?" I make these statements in "fear and trembling," as I have in mind discussions concerning this same subject in the past.

I am glad "Ompompanoosuc" visited Third Lake and has noted the difference in the trout from those of neighboring streams and lakes.

ROE.

## SOME SAMPLE "INVESTIGATIONS."

THERE is neither time, nor space, nor patience to follow the *American Game and Fish Laws* by Henry Austin of the Suffolk Bar through a tenth part of its plagiaristic appropriations from the *Book of the Game Laws*. A few specimen pilferings must suffice to illustrate the dishonest methods practiced. Here is one of the Connecticut local fishing law cases referred to in the "Open Letter." Sections 2476, 2477 and 2478 of the Connecticut Public Statutes read:

SEC. 2476. Every person who shall take any fish from Waramaug Lake, in Litchfield county, between the first day of April and the first day of July in any year, shall be fined not more than five dollars, or imprisoned not more than twenty days, or both.

SEC. 2477. Every person who shall draw or use any seine or set net or set line for taking fish in Waramaug Lake, in Litchfield county, shall be fined not more than twenty dollars, or imprisoned not more than thirty days, or both; and whenever any person shall be seen or found upon the shores or waters of said lake with a seine, set net, or set line in his possession, it shall be *prima facie* evidence that such seine, set net, or set line, is used by such person in violation of the provisions of this section.

SEC. 2478. Every person who shall take any black bass less than six inches in length from Waramaug Lake with a hook and line shall immediately return it into the water of said lake, and every person taking said fish and failing to return the same as aforesaid shall be fined not more than five dollars or imprisoned not more than ten days, or both.

These three sections are condensed in the *Book of the Game Laws* and thence conveyed by Mr. Austin thus:

*Book of the Game Laws.*

Waramaug Lake, Litchfield county—2476 forbids fishing between April 1 and July 1. 2477 forbids use of seine, set net or set line; possession of net or seine *prima-facie* evidence. 2478. Bass of less than 6in. must be returned to the water.

*Mr. Austin.*

Waramaug Lake, Litchfield county; forbids fishing between April 1 and July 1; forbids use of seine, set net or set line; possession or net of seine *prima-facie* evidence. Bass of less than six inches must be returned to the water.

And so on for two and a half pages of his book.

There is in Georgia a county named Bulloch. Chap. 390, Laws 1889, relative to Bulloch county, reads:

SEC. I. *Be it enacted by the General Assembly of the State of Georgia*, That it shall not be lawful for any person to hunt with dogs, or firearms, or implements of any kind, on any lands not his own in the county of Bulloch without the written consent of the owner of the lands or the persons having such lands in charge, after such owner or person having such land in charge has given written notice by placing the same on said land or given such person or persons written notice forbidding such person or persons from hunting or fishing on such lands.

SEC. II. *Be it further enacted*, That it shall not be lawful for any person to catch or entrap fish with hook and lines, seines, gill-nets, cast-nets, or in any other way in any streams or ponds on any lands not his own in the county of Bulloch without the written consent of the owner of the lands or of the persons having such lands in charge.

SEC. III. *Be it further enacted*, That it shall not be lawful for any person to shoot, kill, trap, snare, net or otherwise destroy any wild turkey, wild duck, partridge or quail in the county of Bulloch between the first day of April and the first day of October in any year.

SEC. IV. *Be it further enacted*, That it shall not be lawful for any person to buy, sell or offer for sale in said county, between the first day of April and the first day of October in any year, any wild turkey, wild duck, parrridge or quail.

SEC. V. *Be it further enacted*, That for every violation of any provisions of this Act etc.

The *Book of the Game Laws* by a typographical error printed Bullock for Bulloch, and with parrotesque precision Mr. Austin's shears follow copy, typographical error and all. That is one of the beauties of the shears mode of "investigation." Here are the two digests:

*Book of the Game Laws.*

Bullock.—[Act 390, Laws 1889. —Unlawful to catch, kill, pursue, sell or possess any wild turkey, wild duck, partridge or quail, between April 1 and Oct. 1; or to hunt or fish on lands of another without written consent of owner after notice has been given.]

*Mr. Austin.*

Bullock County.—Unlawful to catch, kill, pursue, sell or possess any wild turkey, wild duck, partridge or quail, between April 1 and October 1; or to hunt or fish on lands of another without written consent of owner after notice has been given.

The Georgia Burke County Act would fill a column of FOREST AND STREAM in this type. Here it is as it appears in the *Book*, and as material which Mr. Austin "derived from the Revised Statutes, Codes, and latest enactments of the respective States:"

*Book of the Game Laws.*

Burke.—[Act 209, Laws 1889, is similar to Richmond county act given below, save that it forbids killing wild turkeys and partridges between April 1 and Oct. 1; and forbids possession or sale of summer duck or dove between April 1 and Aug. 15.]

*Mr. Austin.*

Burke County.—Similar to Richmond County Act given below, save that it forbids killing wild turkeys and partridges between April 1 and October 1; and forbids possession or sale of summer duck or dove between April 1 and August 15.

And so on to the end of the chapter.

Mr. Austin says he derived his material from the original sources. The editor of the *Book of the Game Laws* will give a new gun to the first person who will tell him where Mr. Austin got the New Jersey non-resident paragraphs outside of the *Book of the Game Laws*. Here is the first paragragh:

*Book of the Game Laws.*

Non-Resident Requirements. —[The law relative to non-residents is given on a preceding page. The only society whose by-laws require membership in the society as a condition precedent to non-residents shooting or fishing in New Jersey is the West Jersey Game Protective Society, whose jurisdiction extends only to the counties of Camden, Gloucester, Atlantic, Salem, Cumberland and Cape May. See following paragraph For other parts of the State no. non-resident licenses are now r quired.]

*Mr. Austin.*

Non-Resident Requirements. —The only society whose by-laws require membership in the society as a condition precedent to non-residents shooting or fishing in New Jersey is the West Jersey Game Protective Society, whose jurisdiction extends only to the counties of Camden, Gloucester, Atlantic, Salem, Cumberland and Cape May. (See following paragraph.) For other parts of the State no non-resident licenses are now required.

But it would take pages of FOREST AND STREAM to follow Mr. Austin's "investigations."

### A Stupid Blunder.

One who criticises the blunders of others should avoid blundering himself. I stated last week that the errors contained in Mr. Henry Austin's *American Game and Fish Laws* related to 33 States and Territories. Instead of 33 I should have said 38. This is the record shown in the copy of Mr. Austin's work annotated by me.

CHARLES B. REYNOLDS.

### To whom it may concern:

The *Book of the Game Laws* published by us is a copyrighted work.

The pamphlet entitled *American Game and Fish Laws* (by Henry Austin of the Suffolk Bar, Boston, 1892), contains certain material which is an infringement of our copyright in the *Book of the Game Laws*, which infringement, we are advised by counsel, is actionable at law.

All persons are hereby warned against selling or offering for sale the infringing work, as we shall take measures to enforce our rights and protect our property.

## WHITE PERCH OF THE POTOMAC.

WASHINGTON, D. C., Oct. 25.—A few days since I went down the Potomac to fish for white perch. On the recommendation of jovial Captain Blake, of fishing fame, I stopped off at Riverside, near the mouth of Nanjemoy Creek, in Charles county, Md., where I was comfortably cared for. Accompanied by the proprietor of the store, post office and a large share of the adjacent territory, and a boatman, I reached the fishing grounds about 11 A. M. These grounds, or "shoals," as they are there called, are about two miles from the Riverside wharf and one mile from the Virginia shore. The term "shoals" is a little misleading, as the water consists of an extended shoal containing pools from 6ft. to 12ft. in depth, and the most successful fishing is done in these pools.

I used a rod; the other two members of the party used "drop lines" until I rigged up my other rod and prevailed upon mine host to try it. While he did not find this method much more productive than the "yanking" process, he soon discovered that it afforded "oodles" more of fun. We baited exclusively with hard crabs which probably accounts for the limited variety of fish taken. After taking a few perch we moved, took a few more, moved again and then settled down to business. As a rule we did not "monkey" long with the pretty silver-sided fellows after they were hooked; occasionally, however, when two were fighting at once I tested their fighting qualities, but didn't find them dead game.

Soon after 4 o'clock we cried "enough," and on counting and weighing our catch found we had 177 perch and three white catfish, weighing in the aggregate 113lbs., exclusive of a score or so of smaller ones thrown back. I will agree with my critical brother of the rod that this is not very artistic sport if he will agree with me that it is pretty lively fun. JERE. WILLIAMS.

### The Susquehanna Salmon.

COLUMBUS, Oct. 29.—Noticing your reference to the above subject in last issue reminds me that when engaged in fishculture near Philadelphia some twenty years ago, I was, on two or three occasions, called to Wilkesbarre, Scranton and other points in that region of Pennsylvania in connection with fishculture, fish stocking, etc. Of course I heard much about the early fisheries of that region, particularly from old men, some of whom quoted their ancestors. Quite generally reference was made to the great quantities of salmon in the Upper Susquehanna, and I found that they really referred to the pike-perch; indeed, they appeared to be the principal fish in those waters when I was there, and were said to have been far more plentiful fifty to sixty years before. I was somewhat surprised upon being told in Harrisburg several years later that these so-called salmon were introduced into the Susquehanna through the efforts of Hon. Simon Cameron. MILTON P. PEIRCE.

### October's Glorious Close.

NEWTOWN, Pa., Oct. 27.—The weather is simply glorious. I couldn't stand it yesterday, so I took my rod, and with my "youngest" went to the historic Neshaminy and fooled along the banks, now so far from their flowing company (owing to the protracted drought); and tried to tempt the bass, but without returns save from sunfish, of which we caught a mess: and came home across the browning pastures and through the woods, which, half-denuded of their summer vesture that filled the hollows and rustled pleasantly beneath our feet, gave charming vistas unseen till now. Nature is quick with recompense.

O. O. S.

### Destruction of Fish by Naphtha.

ON the Volga River naphtha is transported in leaky wooden barges and a great deal of it escapes into the stream. In times of floods this poison is spread on the adjacent flats. The naphtha has killed or driven away many fish and infected others so that their flesh is no longer eatable. The highly-prized sterlet, a small sturgeon, is one of the noteworthy examples. On the overflowed meadows vegetation has been destroyed, as well as the insects and larvæ which constitute part of the food of fishes.

### About Nets.

THERE are nets in American waters that reach a distance of five miles without a break; single seines valued at from one to two thousand dollars; single fisheries representing investments of $50,000 or more, and one concern manufactures nets and twines, for fishing purposes solely, whose capital is $350,000 The American Net and Twine Co. (who have a modest card in our advertising columns) is the concern referred to, and they are our present authority for all the above particulars regarding commercial fishing. There is no doubt that they understate rather than exaggerate the importance of the industry.

## Fishculture.

### RAINBOW TROUT IN VIRGINIA.

WE are indebted to Comissioner Marshall McDonald for a copy of the following letter from Gen. J. D. Imboden, of Damascus, Va., relating to the rapid growth of rainbow trout in the Laurel Fork of Holsten River. Similar accounts from other sources confirm the report of the successful introduction of this handsome game fish into Old Dominion waters. The rainbow will thrive and multiply in streams which are too warm for the reproduction of the brook trout, and thus the area of trout waters has been greatly extended. Gen. Imboden says:

"Four years ago 800 California trout and 200 mountain trout were put in the Laurel Fork of Holsten here, and have made their way up into the mountains above us, and have done magnificently. I have caught a number myself, and have seen them quite frequently taken by other anglers.

"The California trout have run this year from 1½ to 3½lbs. in weight. In August one was landed after a struggle about two miles above where I live, and was brought to my office to be weighed and measured. Extreme length, 23½in.; depth behind the gills, 7in.; thickness of back, nearly 3in.; from extreme points of forked tail, 6in.; weight by my scales, 5lbs. 8oz. avoirdupois, by balance at nearest store 5lbs. 10oz. This is the largest one I ever saw. More than 20 people saw it before it was cleaned and cooked. A female last season had her nest within 20ft. of my office, on the Laurel, at the mouth of Beaver Dam Creek, and when the eggs hatched the nest for a square yard looked almost as red as blood, there were so many for two or three days until the little fellows left. We fed them corn meal by throwing it in the stream a few feet above, and small as they were they seemed to catch and eat the particles."

## The Kennel.

### FIXTURES.

#### DOG SHOWS.

Nov. 22 to 25.—Brooklyn. H. W. Huntington, Sec'y, 148 South Eighth street.

Dec. 6 to 9.—First Annual Dog Show Hermitage Kennel Club, Nashville, Tenn. Robert C. Stockton, Sec'y.

1893.

Jan. 3 to 6.—Mohawk Valley Poultry and Kennel Club. F. B. Zimmer, Sec'y, Gloversville, N. Y.

Feb. 21 to 22.—Westminster Kennel Club, New York city. Jas. Mortimer, Supt.

April 4 to 7.—New England Kennel Club, at Boston, Mass. J. W. Newman, Sec'y.

May 3 to 6.—Pacific Kennel Club, at San Francisco, Cal. Horace W. Orear, Sec'y.

June 13 to 17.—World's Fair, Chicago.

Sept. 7 to 10.—Hamilton, Ontario. A. D. Stewart, Sec'y.

#### FIELD TRIALS.

Nov. 7.—International Field Trials Club, third annual trials, at Chatham, Ont. Amateur Stake, Nov. 7. Open Stakes, Nov. 8. W. B. Wells, Sec'y.

Nov. 7.—United States Field Trials, at Elizabethtown, Ky. P. T. Madison, Indianapolis, Ind., Sec'y.

Nov. 8.—New England Field Trials, at Assonet, Mass. E. Knight Sperry, New Haven, Conn., Sec'y.

Nov. 14.—Fourth Annual Trials of the Brunswick Fur Club, at Princeton, Mass. J. H. Baird, Sec'y.

Nov. 15.—American Field Trials, at Columbus, Ind. W. J. Beck Sec'y.

Nov. 21.—Eastern Field Trial Club Trials, at High Point, N. C. W. A. Coster, Sec'y.

Nov. 28.—Philadelphia Kennel Club Trials, at High Point, N. C. F. G. Taylor, Sec'y.

Dec. 5.—Central Field Trials, at Lexington, N. C. Col. Odell, Sec'y.

Dec. 19.—Irish Setter Field Trials, at Lexington, N. C. Dr. G. G. Davis, Philadelphia, Pa., Sec'y.

1893.

January.—Pacific Coast Field Trials, at Bakersville, Cal. J. M. Kilgarif, Sec'y.

Feb. 8.—Southern Field Trials, at New Albany, Miss. T. M. Brumby, Sec'y

### NATIONAL BEAGLE CLUB FIELD TRIALS.

THE trials of this club, field trials, I mean, were brought to a successful close on Friday evening last, and once more this energetic and enterprising specialty club has demonstrated that beagle trials are not only feasible but also an acceptable addition to the many sports which may be enjoyed by those in fairly robust health and favored with stout legs. If one aspires to be in it with the dogs at every turn, stout lungs are also a *sine qua non*. The idea of holding beagle field trials was at first ridiculed in many quarters by those unacquainted with the conditions under which the beagle owners in this northern country hunt the "Mollie Cottontail." The trials of 1890, crude as they were in conception and more so in the training most of the dogs displayed, demonstrated, however, that such trials could be carried out, and experiment proving practical, preparations were at once made to get stock that would do better in 1891. Last year the trials were still more successful, and this year there was little of the 1890 crudeness apparent. The dogs were nearly all trained, and with few exceptions under good control. The difference in the latter respect struck me very forcibly, because I did not attend the trials in 1891, and remember that in the first meeting the lack of control the owners had over their dogs was a continual source of annoyance, and the subsequent discussion in FOREST AND STREAM on this subject evidently bore good fruit.

It is all very well for some hunters to say that when their dogs are on a trail they cannot be called off—nobody desires to do that unless the dogs run into very thick cover where they might keep running for a week. The control is when the dogs are searching and casting round for the trail the hunter is able by hand or voice to draw them to likely spots or to where he has seen a hare start. There are a score of difficulties to be met with in a day's hunt that may be overcome, and a pleasant day's sport be the result, if the dogs are trained to remember that they are hunting for their owner and not altogether for themselves.

Although the country about Nanuet, where the trials were held, is charming to a degree, and just at present, when the leaves have assumed their autumnal tints, in some parts gorgeous in coloring with the distant Palisades and Highlands of the Hudson forming an azure background, still it is a rough country where we hunted. There is too much cover and the ground is rocky in a good many places, making it hard going both for man and beast. The hares were rarely until the last day found in the open, and most of the trailing was done in cover. Probably, however, all things considered, we cannot hope to do much better in the North, though we should surmise that some parts of southern New Jersey, down in the pine lands for instance, and Long Island, would afford more level country and better hunting. This should be a subject for investigation before next year.

The number of spectators in daily attendance compared more than favorably with the other field trials down South, and I may as well give the list of those who were there: Col. DeLancey Kane, of New Rochelle, N. Y.; Messrs. Pottinger Dorsey, Newmarket, Md.; W. H. Ashburner, Yeadon, Pa.; F. W. Chapman, H. V. Jamieson and Dr. Taylor, Melrose, Mass.; Herman F. Schellhass, Brooklyn; Charles E. Peabody, Salem, N. H.; Bradford S. Turpin, Dorchester, Mass.; H. Hanson, Fall River, Mass.; H. Catesby Doud, W. Palmer; John Bateman, Gravesend, L. I.; J. W. Appleton, New York; W. S. Clarke and A. Parry, Linden, Mass.; Frank P. Smith, Philadelphia, Pa.; Joe Lewis, Moodus Conn.; James Moylan, Jersey City; W. Tallman, New York; Mr. and Mrs. Mann, Brooklyn, N. Y.; C. Eska, Nanuet, and of course our host, H. L. Kreuder, through whose efforts we were housed, fed and generally made to feel at home, and probably the most thankful man in the lot when Sunday came was the owner of the "Kreuder Homestead." He must have been pretty well used up. We used his kennels, his house, his writing paper, his stamps and pretty nearly everything else that could be found in a well regulated house. He didn't mind it, the same genial smile welcomed every one. A very pleasant week was spent by all. Game was hardly so plentiful as could have been wished at times, but the extreme dryness of the ground affected scent to such an extent that there was no such thing as getting on to a trail and working it out to a finish; it was lost even if "hot," in a short time, and it was no difficult matter for "bunny" to have the dogs at fault.

*Wednesday*

the second day was ushered in with a cloudy sky and light rain for an hour or so, hardly sufficient to be of much benefit to the dogs. The dog class 13 to 15in. having been decided on Tuesday, was duly chronicled in FOREST AND STREAM last week and to-day the ladies of that division tried their luck, for luck it was in a good many cases. The draw on Tuesday night resulted as follows:

Forest Beagle Kennels' Vick R. with Pottinger Dorsey's Venus III.

Middleton Kennels' Snow with Rockland Kennels' Fanny Racer.

Rockland Kennels' Zillah with Glenrose Beagle Kennels' Parthenia.

Glenrose Beagle Kennels' Gypsey A. with Forest Beagle Kennels' June Rose.

Both hounds were handled by their owners, H. V. Jamieson having Vick R. They were cast off in an open field at 8:07, Venus at first got to work in the quickest manner. A great deal of ground was traversed, Venus still doing the best hunting though she could find nothing. Moving to another field Vick got into her gait and did the leading; still no game until a hare was kicked up by someone. Dogs were laid on and Venus was first to strike, and both dogs drove "puss" to thick cover where they lost. Afterward Vick found again and hustled the quarry smartly to a stone wall where it went to earth. Working back to open field nothing more was done and dogs were taken up at 9:20. Down 1h. 13m.

SNOW—FANNY RACER.—Charlie Peabody handled Snow and A. Eska had charge of Mr. Kreuder's Fanny Racer. Cast off at 9:25, neither showed much "git up and git." Snow eventually struck a trail and Fanny followed, but not ambitiously, and bunny was lost altogether. Dogs were worked across a field, Snow doing the best hunting. Then we tried for a hare that had been marked, but it wasn't at home; further on, however, a hare was started by Snow and lost. Fanny then took up the trail and hustled bunny to some scrub oaks across a roadway, when both dogs were at fault. Snow got on to another and some fair hunting ensued, Fanny showing herself at times a bit of a babbler, which is likely to impress one at first thought with the idea that she is busier than she really is. Dogs up at 10. Down 35m.

PARTHENIA—ZILLAH.—F. W. Chapman, her owner, handled Parthenia and Zillah was under C. Eska's orders They were put down at 10:10 in open field and Zillah soon showed herself much the faster worker, Parthenia evidently not taking kindly to the ground, which was here very rough and stony and covered with briers. Plenty of old trails were sniffed over, but they led to nothing livelier. This may have been the fault of the dogs, as they did not work very close. Hunting down hill toward the railroad track, into scrub oaks, both tuned up, but Zillah, getting the line first, made a short drive toward the briers, where they lost, and though they tried hard bunny proved too sly for them. A search in the open once more proved fruitless and dogs were called up at 11:40. Down 1h. 30m. Zillah was the best worker of the two, doing some intelligent, busy hunting; but as she was afterward found to be undersized she was excluded from further competition in this class.

JUNE ROSE—GYPSEY A.—Cast off in a weed field it was seen that each was handled by its owner. June got down to business in the liveliest manner, and putting up the fur drove the quarry at a smart pace, followed by Gypsey, to a brier patch. There was a good deal of trailing and warm work generally here, but they failed to hold the scent, June doing most of the leading, showing her usual good trailing qualities and neglecting no part of the ground in her quest; she is very level-headed. The running here was very difficult, the thick briers making it impossible to follow the dogs at times. Gypsey can do better than she did in this heat, as she was handicapped by condition, and though the spirit seemed willing the flesh gave out. They were called up at 12:30. Down 45m. The company then got on the trail of the lunch basket and they left nothing to swear by but the handles. During digestion the judges decided that Fanny Racer and Parthenia were out of it, which left Venus and Vick R., Snow and Gypsey A., and June Rose a bye to run in the

*Second Series*

VENUS—VICK R.—The signal to start was given at 1:10. The judges wanted to see these two especially, work together again. Venus trailed along a wall and was unwilling to leave it, paying no attention to her owner. Meanwhile Vick R. was beating out the likely places in the briers, but to no purpose. Taken down to scrub oaks both hunted with vim, Venus doing better than at first, but could not be con-

JUDGES CONSULT.

trolled, much to the disgust of her owner. Here Vick gave tongue, and after some stylish work jumped the quarry and drove it for some time at a merry pace, hustling bunny into the woods and swamp. Venus meanwhile proved too headstrong and neglected her owner entirely, thus failing to get on the trail at all. Called up at 1:40. Down 30m. Mr. Dorsey was disgusted with his bitch, and picking her up in his arms made a bee line for his temporary home. It is safe to say that before Venus appears in public again she will know how to spell—obedience.

SNOW—GYPSEY A.—Cast off at 1:45 P. M. As usual, they were in the brier patches, and though working industriously they failed to find. They were then taken to where Vick had driven the hare in the last heat, but did not strike at once, and Judge Lewis accidentally kicked the hare. Gypsey hit off first, giving tongue in her usual high key, but Snow, making a wider cast, picked up the trail a long way ahead of her and went off alone at a rattling pace that tried the powers of all to keep in sight. Bunny headed for the swamp, Gyp following, too, but lost trail and was helped by handler. There was plenty of music to be heard for some time, but the judges and reporters were out of it and fast in the briers far behind. Eventually the hare was lost in the swamp, but Snow had done the smartest work. Drawn off to an open field Snow ranged the better of the two, and dogs up at 2:28. Down 43m.

JUNE ROSE A BYE.—This bitch was then worked alone through the open fields for some time, doing the same honest, level-headed work as usual; she may be a little slow but she is very thorough and sure, quite fulfilling her promise as a youngster in 1890. She followed an old trail for some distance, but failing to get warmer she was called up, and with Snow she was sent off in the

*Final.*

JUNE ROSE—SNOW.—This heat was for blood and to decide which should have the choice of moneys. Mr. Parry did the honors by providing us with a hare, and dogs were drawn to where the gentleman from Linden rose the fur. The dogs picked up the trail in great style.

W. S. CLARKE, JUDGE.

F. W. CHAPMAN, PRES. JOE LEWIS, JUDGE.

After this hare was worked to a loss in a weed field another hare was started Snow was the first to open on it, and led us toward where both were at fault; June was first to find, and both chiming in, some lively work was indulged in with the quality of it in June's favor. Some hit-and-miss work in woods then took place, in which Snow did well, leading one little merry burst, which bothered some of us to keep in sight, the briars being very affectionate and bestowing their favors impartially. Then some give-and-take work ensued as each lost and in turn struck the line in casting. In this June Rose showed probably the best, getting the most leads. Further down in woods a hare was found in her form; hare "lit out" and dogs thrown on, literally June Rose was the first to tongue, and away they both went ding-dong and hustled that bunny for 10 minutes till all hands were dripping wet and pumped out. June Rose clearly showed her superiority, and the judges called the dogs up at 3:50; down 1hr 20m. The judges decided that June Rose was entitled to first prize, Snow second, and Gypsey A. and Vick R. divide third money. This was a perfectly just decision, for though Snow was snappy and good on hot trail, when it came to downright head work June Rose had the advantage. This concluded the day's work, and some of the boys were not at all sorry, as the rough ground and the briars were very trying.

*Thursday.*

The class for dogs 13in. and under had several entries, but with the exception of Bradford S. Turpin's Clyde they did not fill. A meeting of the field trial committee was held and decided that Clyde should run a bye, and be entitled to whatever prize the judges should think fit to give, according to the work he did. Although Clyde did not run this bye till dusk I might as well give the account of it in its proper order. At 4:50 P. M. Clyde was put down just near Mr Kreuder's house in open field, and working to alder swamp he thrashed his ground out well, hunting out all the likely places and was snappy and full of judgment. In a few minutes he made a start and drove the hare hot for some distance, when he was at fault. Circling nicely he picked up the trail again for another short run, checking, but soon on the line again, working it across a turnip field to a swamp, driving well and closely. Judge Clarke was satisfied he was good enough for first and said so. Clyde was taken up at 5:35. Down 45m.

In the bitch class for 13in. and under the draw was:

H. Hanson's Desdemona with Glenrose Beagle Kennels' Butterfly.

Rockland Kennels' champion Lou with W. F. Rutler's Mollie.

Rockland Kennels' Zillah a bye.

The start was an early one, the first brace being cast off at 7:50 in a new part of the country just out of the village. This was a more cultivated section with open grass fields, and, in fact, all that could be desired except hares, and there was the trouble and dire disappointment, still we made the best of it and frowned down any suggestions about trying the country we were in yesterday. Open fields and woods with one rabbit was better than briars and unlimited bunnies. The day was a glorious one, no wind to speak of and the sun shining brightly, but as "Bradley" remarked, "A good day to be alive in but a bad one for hunting," and so it proved, for it was the worst game day we had had so far. However, Desdemona, handled by H. Hanson, and Butterfly, by F. W. Chapman were soon busy at work slowly picking a place to a find hare, but it was not till 8:20 that Mr. Turpin conjured up a bit of fur. Dogs were laid on and Desdemona struck the scent first, carrying it down the hill, but Butterfly getting into the line carried it up the hill again, when Desdemona scurried us along for 20yds. and lost. Crossing the road Desdemona struck it and led for a few yards when Butterfly took the lead with plenty of music till lost at bottom of hill again. A lot of desultory work with a whimper now and then ensued and dogs were called up at 8:50. Down 1h. A difficult heat to gauge, as there was little between them, and that little but indifferent. The ground was too dry to hold a scent long enough to swear by. Desdemona's voice is her chief charm.

LOU—MOLLIE.—Handsome little Lou, handled by her owner, and Mollie, handled by Charlie Peabody, were cast off at edge of woods at 8:55. A lot of ground was searched over without a whimper from the dogs, but numerous disgusted grunts from those who had to follow, and especially when Mollie trailed a horse to his shady lair in the bottoms. At 9:30 Mr. Kreuder had Eska take hold of Lou, and soon after Lou opened on top of hill but did not carry it on. Mr. Dorsey had marked a hare in open and Lou was put on alone, then Mollie came up and both worked into woods without tonguing. Lou opened and Mollie brought up; a check followed a short run. At edge of woods Mr. Hanson saw a hare and Lou getting on carried us along at an easy gait and then lost; here she did some intelligent casting and showed herself much superior to the other. Mollie tumbled on the trail and gave us a breather. Then Hanson saw hare again and fired, missed, and dogs being laid on away we went, and circling bursts took place, with Lou doing most of the work. Dogs called up at edge of woods after a check, at 10:15; down 1h. 20m. Lou had the best of it though Mollie also did fair work considering the ground, and why she was left out of the subsequent proceedings altogether I cannot understand.

ZILLAH (*a bye*).—She was handled by Eska. The judges, in deference to the wishes of the Butterfly—Desdemona owners, who thought the frost was against them in the early morning and wished for another try, concluded to let them run with Zillah. As it proved, this acted detrimentally, for Zillah's superiority was all the more conspicuous. Zillah's work had been pretty well gauged the day before, when she ran so well with Parthenia, so that it was only necessary for her to do her time in this stake. Cast off in open grass field at 10:25, we worked to where a hare had been marked in the other heat, but getting there the bird had flown and the scent too. Jamieson was equal to the occasion, and put up a hare and Desdemona was first to open, but Zillah soon led for 20yds. when she was at fault; casting and finding Zillah raced on and lost. Some casting round with a whimper or two, and dogs were called up at 10:55. Down 30m. Zillah was faster, cleverer, and the leader all through. It did not take long to decide that in the

*Final,*

LOU AND ZILLAH should run off for first place, and they started in edge of woods at 11:10. Working over toward the Blauvelt farm where those briers are, a long hunt ensued in the open. After some time a brace was put up in weed field and dogs drawn to the line. Lou opened but Zillah was quickest away, and rushed the quarry to thick briers, where she lost; casting further down Lou caught on and led the race through the briers to woods outside, followed by Zillah Judges thought this would do and called them up at 12:09. Down 59m.

Both worked well, but the younger bitch was smarter in casting, Lou, as became her years and dignity, not caring to indulge in too much gaiety. The judges took a little walk and returning delivered this opinion: Zillah first, Lou second, third withheld. This startled the owners of the "ineligibles" but they took their medicine as sportsmen should, and gulping down an anathema on things in general and the weather in particular they prepared for the Derby. Personally I wondered why Mollie had been forgotten. It was now lunch time, and at the old gate corner was an appetizing spread of roast pork and beans, and it was good. Col. De Lancey Kane and J. W. Appleton joined us here, and, though they brought an air of New York City with them, they tackled the beans with all the relish of a New Englander.

THE DERBY.

Lunch over and the pipe ashes cleared away, the draw for this stake was read as follows:

Glenrose Beagle Kennels' Fifer with Somerset Kennels' Millard.

Somerset Kennel's Charm with Rockland Kennels' Fanchette.

FIFER—MILLARD.—F. W. Chapman looked after Fifer and Charlie Peabody had charge of Millard. This was the second appearance of the Somerset dogs, and it proved that Mr.

MR. POTTINGER DORSEY AND LEE II.

Absolute Winner, N. B. C. Trials, 1892.

Phœbus has some good stock in his kennel. At 1:06 in open weed field both started slowly. After crossing two fields a hare was started and dogs drawn to trail, and trail carried to dense thicket at edge of woods. In the briers Millard tongued, but could not hold the trail; afterward, picking it up in another spot, he led us a merry clip for 30yds. Peabody started another hare and Millard led Fifer and all of us on a hustling spurt to the briers again, where a check followed; quarry either ran into the wall or along it. Then Millard led us out of briers along the wall. Taken from this bad part, through some other cover, Millard shortly struck a trail and led a merry pace for 50yds. and lost, cast, picked up and had another little burst. Evidently several old trails here that bothered Millard. Fifer wasn't in it, and they were called in at 1:53. Down 49m. Millard had pace, hunting sense and good judgment, and showed up well by contrast.

CHARM—FANCHETTE.—Cast off at 2:07 in open weeds and it was seen that C. E. Peabody had charge of Charm and Fanchette was under Eska's orders. This was a most unsatisfactory heat. Ground was too dry and game had gone off somewhere. A lot of ground was covered and we all

took it pretty easy as we had lots of time. Passing one of the neatest farms we had seen during the week we worked down into open cover. Judges, reporters, spectators, everybody constituted themselves beaters, and to "Billy" Tallman fell the fur, but he let it go, and the dogs being drawn over the trail not a whimper was heard and neither hunted with any vim, Fanchette, especially thinking it somewhat of a lark and indulging in a solo and a "skirt" dance to and fro with evident satisfaction. A move was made toward the village, and at edge of wood Charm tongued two or three times, but no go. Up at 4:18. Down 2h. 11m. Neither did anything, but Charm was much the best as far as mere hunting went. We then walked to the village and getting Millard went out again to settle the

*Final.*

CHARM—MILLARD.—These were both from Somerset Kennels and Peabody handled them under Judge Lewis's orders, Judge Clarke being busy with Clyde who was running for his stake in another direction. The dogs were put in some swamp cover near the "Kreuder Homestead" and a likely

MR. H. L. KREUDER AND ZILLAH AND CHAMP. LOU.
First and Second, Class D, 13in. and under.

spot it proved. The FOREST AND STREAM man put up a rabbit, and Millard catching on led the other into the thick cover where they drove puss ding-dong with lots of glorious music for several good turns, and as they would probably keep in this cover all night if not called off, they were caught at 5:40. Millard much the best, an active, level-headed youngster that will do to watch in the future; just outside of the thick cover in the open, one time he gave us a very pretty sharp trail, but brought up at the thick cover again. Coming into the house we were told what Clyde had done in his bye. This was a poor day's sport but better is expected to morrow.

*Friday.*

The judges having decided that Millard won first and Charm second in the Derby,

FIFER—FANCHETTE were cast off at 7:35 in the swamp, opposite the Homestead, to try for third money. The morning was a capital one for scent, rather dull and cloudy, and the air had that damp feeling that proclaims a good hunting morn, but after a hare had been started neither dog picked up the trail. Hare was seen, and crossing a field Fifer hit the trail off and went a fair gait followed by Fanchette both trying vigorously. Quarry lost, then Fanchette ran some birds up and third prize was given to Fifer at 8 A. M.

*Absolute Winner.*

The trials were gradually coming to a focus, for now we had settled the winners in every stake and the judges were still alive and comparatively fresh. The crucial test was now to come in finding out from the five good first prize winners which should win the club medal, that denotes the best beagle, officially, of the year in the field. The first to come out were

LEE II.—CLYDE.—Down at 8:30 near cornfield in the open. A hare soon started in corn and dogs drawn to the line, when Clyde was first to tongue, and both dogs took us merrily across the field and lost, but Lee found, working more carefully by the fence at the left, where he hustled bunny in great shape, Clyde a close attendant, though the big one outfooted the little fellow, game as he was. Lee II. is a very good 15in. A check followed, then another little run, a check and Lee led off merrily again with plenty of music. Trails were very mixed and several hares were seen. Clyde did some intelligent finding, but working in the corn rows was bad for scent. Down near the woods a hare put up, Clyde first on, followed by Lee, who quickly took the lead, rushed bunny out of woods along the field, with a check or two, into some rough stuff, then out into the open. This was hot work and bellows were soon to mend all round. Both at fault, then Clyde had a turn taking scent up across ditch, then lost in woods. Lee taken to a clump of weeds in open put out a hare which ran to woods. Clyde would not leave but was afterward caught and taken to other side of field. Meanwhile Lee failed to get the trail of the hare that crossed the field. Dogs up at 9:12. Speed and driving in favor of Lee, but Clyde was also a merry, busy worker, and both hunted intelligently.

MILLARD—JUNE ROSE.—The sun came out now and made it uncomfortably warm, especially as the two dogs did some lively work. At 9:15 in corn Millard struck a trail, but soon was at fault. June in her careful way picked up the trail and carried to ditch, where they were checked in thick cover. Dogs drawn over to corn again where hare had been seen. Millard tongued first, but soon was lost in contrary trails; hare came out and crossed the open; dogs laid on, June taking up the warm trail, and both drove for blood, Millard being a little too quick for the other. Up at 9:55.

ZILLAH—CLYDE.—Down 10:18 in pasture. Clyde was handled by A. Parry and C. Eska had Zillah. Zillah jumped a hare in open and ran by sight to swamp. Here they were at fault some time and Clyde worked the turn, but lost again. Clyde cast wide, the other close, but neither found. Another hare was started afterward by Zillah, and Clyde harked to her. Some pretty work ensued, Clyde leading, and they were driving when called up at 10:15. The work was fairly equal, perhaps Clyde being a bit the quicker.

The judge wishing to see Lee in the open and judge of his hunting tactics again, he was put down with Zillah at 10:20. Lee got on a hare after a good deal of backing and filling, but soon lost, and dogs ordered up at 10:44.

*Final.*

LEE II.—MILLARD.—This was the deciding heat, and at 11:05 they were cast off in the open by railroad track. A lot of ground was gone over without result. Then in stubble both tongued and worked quarry toward posted ground; drawn off and taken to bottoms. Some good hunting on old trails by Lee was a feature here. He proved a careful, level-headed worker, but Millard was also an ambitious little chap, and only needs age to be a "hummer." A few yelps were heard and Millard showed a disposition to hunt back, and would not keep up on the line. In scrub oaks both were put in together. Millard starting on a trail, lost; then hare was sighted and Millard did some pretty work, both hustling bunny across the field to a check; then Lee carried the trail back to fern field, when they lost, but Lee went in the right direction, Millard working too much to one side; though a hot trail was close, he showed himself a little green here. Another run and a check, and Millard should again have picked it out, but Lee took the right trail and the heat was decided in his favor at 12:15. Three cheers were given and Mr. Dorsey was congratulated all round. Millard will do to watch another time, as he was certainly a good second.

Mr. Pottinger Dorsey's Lee II. was whelped June 27, 1887, and is a heavy marked black, tan and white dog of handsome form and a winner on the bench at New York in 1890 and '91. He is very near, if not quite, the limit in height. His work was marked by careful judgment and good hunting sense. Somerset Kennels' Millard is a smaller dog, whelped Jan. 1, 1891, and is of a more racy build than Lee, fast and quick in his work generally and with a little more practice will make it warm for any dog; indeed, he did it here.

After dinner a pack race was arranged between Rockland Kennels' pack and Glenrose Beagle Kennels', for a club medal. Rockland Kennels ran champion Lou, Fanny Racer, Roy K. and Zillah, they doing some very pretty pack work, keeping well together, and one little burst across a field by a wall side was extremely stirring, plenty of music and the proverbial "napkin" would have covered them. Afterward Glenrose Kennels put down Butterfly, Parthenia, Fifer and Gypsey A., but Fifer's unwillingness to keep with the others, bolting several times, and their inability to find game lost them the race to Rockland Kennels. This finished the meeting, as darkness was coming on. Rockland Kennels also won the bench show kennel prize. H. W. L.

## AMERICAN COURSING CLUB.

GREAT BEND, Kansas, Oct. 24.—The seventh annual meeting of the American Coursing Club is now in progress, and bids fair to be of interest. Members are here from over a goodly section of country—Kansas, Colorado, Illinois, Dakota, Wisconsin and New York. California is not represented. Hares are reported abundant. The weather at this writing is pleasant. The club house has not been moved and the grounds are the same as those of previous years To-night there were made 38 entries in the All-Aged Stakes, and 27 entries in the puppy Derby. Last year there were 46 in the All-Aged and 22 in the Derby. The hotels and horses are about the same as in previous years.

At the business meeting to-night Dr. Shaw, vice-president, was in the chair, following Mr. Watson, president pro tem, It was announced that Mr. E. H. Mulcaster, of Waupun, Wis., would judge the running, and that Arthur Massey would act as slipper. The judge was instructed to order when to slip, the slip steward to be dispensed with.

Mr. Luse thought that the Pearl of Pekin-Chicopee Lass protested decision ought to be taken up. There had been so much talk over it that it seemed time to act. He moved to take it up. The executive committee were hard as badgers to draw out. It became evident that they intended to be on both sides of the case if possible, and would shift the responsibility on the club if they could do so. It growing late, Mr. Price moved to postpone action on this case until the regular annual meeting. This was carried.

Mr. Luse moved to suspend the National rules as to pedigree under which the club ran, and to use the American Coursing Club records, not barring any dog on account of unknown pedigree, but to admit any dog on payment of registration fee of 25 cents. Carried.

The following new members were admitted: Dr. A. J. Cattanach of Denver, Col.; Messrs. Ed. Martin of Midway, Kas.; Will E. Stokes and Chas. Hooper of Great Bend, Kas.; Michael Allen of Chicago; H. G. Nicholls and J. Harvey Rew of Mitchell, S. D.; E. H. Lyon of Emporia, Kas.; J. R. Ballard of Winfield, Kas.; Abe Bowen of Chase, Kas.; E. H. Mulcaster of Waupun, Wis.

The puppy class this year bids fair to be unusually strong, if one can tell by a look at the specimens. Messrs. Page and Lowe nominate a good lot out of Mr. Lowe's kennels. Mr. Luse of course has some entries. Messrs. Price and Royce, Mr. Lyons of Emporia, Mr. J. Herbert Watson of New York and others have on a lot, any of which may go dangerously near the bottom of the list. In the All-Aged Stakes, naturally, the entries are better known, and many of the old goods are here, as will be seen later on. Mr. Luse has the two little bitches, Lady In Black and Lady Barton, always hot company, also some of the string lately owned by Mr. Phister of Cincinnati, and Mr. Lowe's kennel offers the best of his 4-year-olds, and from Denver come the much famed bitch Pearl of Pekin, Monk Bishop, very likely a better one, and Irish Lass, a white whose fame is not yet. Mr Watson has here the fast black Royal Crest, which was so well thought of last year. All in all, there will be plenty of work cut out. Drawings were made late to-night, as announced by wire. Runnings go early to-morrow morning, by the card.

*Tuesday, First Day, Oct. 25.*

The day was the best in every way ever known in the history of the club. The weather was delightful, bright, but not too warm. The crowd of beaters was just large enough and not too large, and for once in a way was tractable and pleasant, possibly owing in part to the presence of a deputy sheriff. No ugly wrangles or loud-mouthed criticism of the judging was heard, and indeed the judges' work was above criticism. Lastly, most important of all, perhaps, and certainly most pleasant, the supply of hares was never so good

H. V. JAMIESON AND JUNE ROSE.
Winner Class B, 13 to 15in.

and the runnings were gotten off without long and tedious walks over the hard alkali pastures. Barring an accident or two for which he was not in the least responsible, Arthur Massey was as usual perfect with the slips. The first three courses of the morning were run off within 25 minutes after leaving the club house. The entire first series of the All-Aged was run off and the party done with the 7 miles' ride to town an hour before dark—a record of 19 courses and over two dozen starts in better time than ever was shown before. The success of the day put everybody in the best of spirits, and the day was thoroughly enjoyable in every way, showing as it did a pretty sport followed in the proper manner.

The day had some interesting features and some brilliant work. The popular memory was well in evidence when Mr. Watson's Royal Crest went in with Master Peter. Royal Crest's reputation rested on a brilliant though losing course as a puppy last year, but he was known and backed for much of a favorite this year, though his brindle mate should naturally have offered odds. That oddity in greyhounddom, Lady In Black, made the most brilliant exhibition of the day, and caused anew the query as to what it really is that gives a dog quality in performance. Her litter sister, Lady Barton, also as usual proved very fast and clever, and the two left the field well liked for an advanced place. The Bit of Fashion bitch, Belle of Eltham, made little showing, and Norwegian, "half-brother to Fullerton," and popularly thought a good chance therefore, proved distinctly disappointing. Lord Neverstill showed in high form and went a favorite.

Besides the Winfield representative, Mr. Ballard, the two Dakota men, Messrs. Rew and Nicholls, and other new faces on the grounds, the line had re-enforcements from an unex-

NATIONAL BEAGLE CLUB FIELD TRIALS, 1892.

pected source. Messrs. Walter Haltiwell, Billy Rieger, A. L. Bennett and M. Heim, all well-known shooters of Kansas City, were on the grounds taking their initiative in a sport hitherto unfamiliar, but apparently very enjoyable at the time. These gentlemen will remain after the meet and shoot in this section for a few days. Ducks and quail are very abundant.

The lunch served at the grounds to-day was one feature which could not be called pleasant. It was, indeed, highly discreditable, a feast much worse than Barmecide—suicide would be nearer it. Moreover, the field party was kept waiting an hour and a half while this absurdity of a meal was in course of preparation.

AMERICAN FIELD CUP STAKE—Open to the world, for thirty-two or more all-age greyhounds. Entrance fee, $10, the winner to receive 10 per cent. of entrance money and cup ($100 cash) donated by Dr. N. Rowe, editor *American Field*; also a solid silver cup, donated by D. C. Luse, owner of American Coursing Kennels, cup to be won twice by the same kennel, to be withheld if stake be divided, the runner up 50 per cent. of the remaining entrance money; third and fourth, 25 per cent. each, of the money remaining after second division.

*First Series.*

Running began at 10:15 A. M., first brace being

LIVING YET—DOLLY.—Mr. Luse's white dog, Living Yet, was quite too much for Dr. Shaw's white and brindle bitch, the old-time Dolly, though the latter closed ahead on a following course on a hot hare which was not killed. Living Yet ran up, working the hare tidily for a quarter of a mile and won in hollow fashion.

BLUE PRINCE—PRINCE CHARLIE.—Blue Prince is a Dakota dog, owned by Mr. H. G. Nicholls, of Mitchell, S. D. He met a hot one in Mr. Lowe's Prince Charlie. Prince was favored but ran unsighted, closing, he ran wider on his turns, and though he killed, the eminently business-like work of Charlie gave him an easy win.

LADY BARTON—FLYING DUTCHMAN.—Mr. Luse's bay freak never ran a neater course or scored a cleaner win. Dutchman was favored, but Lady drew by twice, once on the outside, placed him, took the hare from him, killed and won.

QUEEN—SNOWBALL.—Mr. Martin's Queen, unlike many other queens, had no pedigree, but she got there *tout le même*, Mr. Heizer's Snowball making it interesting meanwhile. Snowball was the better for a half mile, neither too handy at it. Queen then drew by, working the hare cleverly for a quarter of a mile. Snowball drew ahead, but did nothing, the hare going off. Queen won.

SPORTING PRESS—IRISH LASS.—Sporting Press is really Bobby Smart's old-timer, Miss Smart. Messrs. Hayman and Hough, press representatives, nominated her on Uncle Bobby's promise to have her on hand in due time. Yet being three times called in open court, the red dog came not, but made default, much to the newspaper men's disgust, who wanted a run for their money. According to time-honored form and custom, they kicked, called for "justice" and served notice of their intention to file a protest and tear up the internal machinery of the executive committee. Irish Lass had a bye with Arthur Massey's O'Rourke, who on three legs ran around and picked up the hare. Lass a bye.

LORD NEVERSTILL—BOODLER.—Mr. Lowe's bench winner Lord Neverstill and Mr. Bowman's bitch Boodler made a bad go of it, both well nigh unmanageable in slips. Boodler broke loose and Neverstill followed suit. Put in again, under Arthur Massey's protest that Neverstill's collar was too loose, a hare was started and Neverstill threw himself on his back, unhandsomely fighting and struggling to get loose. He slipped the collar over his head and had a hard course alone, losing the hare, though showing a great turn of speed and cleverness. Boodler was not slipped. No course, but some loud kick, of course, though Massey was not to blame and the owner of Neverstill was distinctly at fault.

DRY TIME—CHLOE.—Another unfortunate accident. The slips hung. Chloe got off, but Dry Time was thrown end over end. Chloe made a gallant course alone on a hot hare, which broke to the hills. No course. The slips were now changed.

CLARA—FANNY.—Mr. Luse's Clara was in whelp and could not have been asked to win, though she helped Fannie, who had the better of the luck and the scoring. During the course Lord Neverstill for a third time broke away, and joined the course, not however, affecting the result. Mr. Lowe was very properly fined $5 for allowing his dog to run loose. Fannie won. Mr. Lowe should carry a hook and line and bait, so as to catch his loose dogs.

SOUSIE—PEARL OF PEKIN.—Sousie is a clever bob-tail, bred by Mr. Lowe and owned by Mr. Haigh of Illinois. Pearl of Pekin is Mr. Bartel's much advertised Denver bitch, on whose protest in the Chicopee Lass course last year the brave-hearted executive committee of the club has been struggling nobly for a year to act. Sousie gave Pearl almost as good a drubbing as Chicopee Lass did. Sousie led up 10 lengths in 100yds., turned, wrenched 4 times, turned and led, placing Pearl, who apparently could not run enough to keep warm. Pearl then led to the hills, but neither got anything out of the hare after that. It looked as though Pearl of Pekin had fought once too often. Sousie beat Pearl pointless.

BEST OF FASHION—NETTLEFIELD.—Mrs. Pope's dog was absent, possibly side-tracked between here and Brooklyn. Shaw's Dolly went down to run the bye, and the dogs were slipped, but were not sighted and did nothing.

The above mentioned struggle to get something to eat now followed. After the mockery Mr. Nicholls put in Blue Prince to do a turn with Nettlefield in the unfinished bye, and the latter showed herself very handy, killing alone.

LORD NEVERSTILL—BOODLER.—These now got a course in earnest. Neverstill seemed not in the least hurt by his two sprints of the morning, and went a cracker. The hare favored him and he held it to several points, taking it again from Boodler after placing her. Boodler came stronger, made a game bolt ahead and killed in her stride. Lord Neverstill won.

DRY TIME—CHLOE.—These now got their course, a short one but brilliant, though one-sided. Mr. Watson's fawn bitch showed a great turn of speed, tripped, came about like a flash and killed. Dry Time won.

ROYAL CREST—MASTER PETER.—There was great interest in this course, Mr. Watson's black dog Royal Crest carrying a bit of money besides his owner's good wishes. Sulky-looking Peter, however, ran good enough to beat anything. Crest was the better up, then exchanging followed, both dogs very wide on their turn in the high grass. The hare was a corking good one, and they lost it finally in the grass after a bruising run. As the hare straightened out, Peter led, not scoring much. At one-half mile Crest was placed, but did not make much of it. Peter now drew ahead, seeming for a time to have the hare in good control, and showing great speed and staying quality. Crest followed gamely, but was out of it, though he made a fine showing on the whole. He was hard, but perhaps a bit too fine-drawn. Master Peter won.

LADY IN BLACK—JIM K.—Mr. Luse's weedy looking little black bitch Lady In Black was evidently a favorite when she went in with Mr. Michael Allen's Chicago dog Jim K. At first Jim was not well sighted, but after all were well extended Lady In Black simply glided ahead as if the other were tied. Lady went in, needing no help, worked the hare merrily and called forth general admiration. On rough ground Lady caught a horrible cropper, rolling over three times. Apparently none the worse, she whirled up into line and went at it again, once turning almost on her heel in a drive for the hare. Jim was placed here, but Lady took his chance away and rushed to a kill alone. Lady In Black won.

"Now-you-oughtn't-to-do-that" way. The club has always been too lenient in such matters, and as a result finds itself much further back than it need be in the progress toward being a model organization. The result has not yet been disastrous, to be sure, but nerveless dogs, nerveless men and nerveless managements come to grief sooner or later, and the rule will not be broken here. The executive committee of this year was a good example of an executive committee without any wish to offend anybody, no matter what anybody might have done or be doing. This may or may not be the best sort of executive committee in the world. The same policy colored the conduct of the whole management.

The party left the club house at 9:45 and put in a good day's work, getting off 22 courses, in spite of delays in putting up hares in the morning. The judging was good, and the kicking far below the average in volume, which again afforded a grateful though unexpected change. Great improvement also was visible in the lunch, which at 1:40 was announced in loud tones by the *chef*, "A bowl of soup and a square meal, 35 cents," which I am sure must impress every one as reasonable enough.

Two surprises happened and two favorites went down. Lady In Black made no showing of any worth, and Lord Neverstill ruined his brilliant record of the day previous by quitting rank in his course, after having it all in hand. The puppies made a good showing and accounted for as many hares as the old ones. Mr. Watson had the misfortune to see his last dog thrown out to-day, his puppies proving too young to go the pace, and Dry Time, his old one, meeting too hot company. Mr. Watson, however, bore his losses very philosophically, although he at length entered protest on the Aladdin-Laura decision on the ground that Laura was over age for the Derby. Mr. Watson is a model club member, and there is room for many like him, if New York can supply them. He is regarded here with considerable distrust, however, because he doesn't kick. A man's health is not thought good unless he kicks plenty. Even the horses kick at a coursing meeting. A Great Bend saddle covers a multitude of sins, and sometimes carries an equal multitude of them.

Running was first taken up in the puppy stakes.

GREAT BEND DERBY STAKE—For 16 or more greyhounds, 18 months old or younger. Entrance fee, $5; the winner to receive 50 per cent. of entrance money, $60 cash, donated by the Morrison House, Great Bend, and silver cup by National Greyhound Club, of New York city. The runner up 50 per cent. of the remaining money; third and fourth 25 per cent. each of money remaining after second division. Affidavit of age must be made by owner.

*First Round.*

JIM FLYNN—ROY'S CANARY—Mr. Allen nominated another loser, the Price & Royce Roy's Canary giving him just one taste of it. Roy led for a quarter of a mile, taking little out of the hare. Jim drew by, Roy drew by in turn, and held ahead for the hills. Roy's Canary won.

BOOMERANG—QUEEN.—Mr. Bartels's Boomerang beat Mr. Roetzel's Queen in hollow manner. Boomerang ran a great puppy, holding the hare at command for 20 points quite ahead of Queen, who ducked in for the kill. Boomerang won.

In this course Porter, handler of Boomerang, ran ahead of the judge, shouting. The judge entered complaint to the committee. It is needless to state that that august body did nothing whatever but mildly caution the offender. It will probably caution the next man who does the same thing.

DRY BROOK—RAVEN.—One of Mr. Watson's Burnaby—Drytime puppies and another Price & Royce entry. Raven cannoned against Dry Brook at the go off, and the little yearling was too light to stand it. Raven then did it all in a short and brilliant course, killing with merit. Raven won.

MAY DAY—SYLPH.—Mr. Lyon with May Day met yet another Price & Royce puppy. This was a most punishing course, and the longest yet run in the meet, probably three miles, certainly hard for puppies. Sylph led up and kept ahead throughout, though doing little with the hare, which circled back wide and then led for the hills. Doubling back at the fence, the hare was either killed or went to earth. Owners of Sylph thought she killed, and at any rate Sylph won.

NANCY—ROYAL RUBY.—Mr. Lowe's Nancy was by no means good enough for Mr. Lyon's Royal Ruby. This was, however, a most spirited little course, the dogs having perfect control of the hare throughout. Nancy was at first unsighted, but when she got in, scored, Ruby took it up and from then on had far and away the best of it in the rapid exchanging, showing ahead and going closer, though both were too inexperienced to turn well. Racing ahead, Ruby caught the jack by the hindleg, and both were then such greenhorns they did not know how to kill, apparently. Royal Ruby won with much to spare.

KETCHUM (*a bye*).—Mr. Mulcaster's imported Roy was drawn against Mr. Laidlaw's Ketchum, but Roy had gone off form and was drawn. Ketchum ran a bye with Queen, who helped him much.

ROME MARBLE—SIR HUGO.—Price & Royce's Rome Marble made a close thing of it with Lowe & Page's Sir Hugo. The lead up was pretty. Hugo a shade the better. There was small merit in the turn that followed. The hare then led for the hills, and the pair were evens on the scanty work they got out of her after that. Rome drew away from Hugo and led, but could not score in the judge's opinion. Sir Hugo won.

AMERICAN COURSING CLUB MEETING, 1892.

*Wednesday, Second Day, Oct. 26.*

A cold, raw wind from the Rocky Mountains made the ride out more uncomfostable. The crowd was not as large as on the day previous, there being a circus in Great Bend whose attractions were too much for many of the local habitues of the coursing grounds. One buggy load of drunken hoodlums made some trouble early in the day, which was rebuked by the management in the customary

FANTAIL—LIGHTFOOT.—Mr. Lyon's Fantail and Mr. Luse's Lightfoot. The latter led up and never gave the other a look in, working the hare alone over a long course to a pretty kill. Lightfoot won.

ALADDIN—LAURA.—Mr. Watson's Aladdin, Mr. Luse's Laura. Aladdin set a burning pace, raced up ahead for 3 points and added 4½ more quite ahead of Laura. The greater age of the latter then began to tell against the speedy black. Laura drew by and followed the hare, not scoring, for a long go. Aladdin "chucked it up" at this stage of the game, and so lost a course he had won. Laura won. Later Mr. Watson protested this course on Laura's over-age.

TRALES, JR.—BUCKSKIN. — Mr. Moses's Trales and Mr. Ballard Winfield's dog Buckskin. Trales, Jr., led up and was distinctly better for a quarter of a mile. Buckskin, however, drew by, got a turn out of the hare and a wrench later, scoring enough for a very shaky win indeed. Returning, Buckskin put up another hare and coursed it a quarter of a mile, the whole a very sufficient pipe-opener for him, at least, since he got a mile or two of hard going.

FLYING FOX—REDWOOD.—Mr. Allen's Flying Fox and Mr. Lyon's Redwood. The latter led up and worked ahead to very scanty scoring for half a mile. Fox then drew by but did not score afterward. Redwood won.

WASTED TIME—DELSARTE.—Mr. Watson's last puppy met Rew's Dakota dog Delsarte, by Lord Neversettle out of the Eastern bitch Prima Donna. These found nothing till after lunch, when they got a hills jack. The dogs were led in single slips, and Wasted Time was hung for a moment, Delsarte meantime to the turn. Wasted Time then drew up on the turn, got two turns of her own and a wrench. Delsarte then drew by, took a turn and followed as the hare led to the bluff, the young puppy not being strong enough to close in Delsarte won.

SCAVENGER—ROOK.—In Scavenger Mr. Lyon had a tiny one, thin as one's finger almost, but he was quite too much for the Price and Royce puppy. Scavenger was favored by the hare, but went a hot gait, sticking close to the hare for 4 points. Rook was placed for 5 points, and then Scavenger worked up a score of 13 to 5. Scavenger raced up to kill, tripped and came a somersault, placing Rook. Scavenger raced by twice, and then killed to much merit, scoring 18½ to 6½ points. Scavenger won.

WHITE LADY (*a bye*).—Lowe and Page's White Lady ran her bye with Jim K., "Fox" Kinney of Ireland riding after with great *éclat*. This closed the first round of the Derby.

*All-Aged Stakes—Second Round.*

Running was now begun in the second round of the All-Aged Stakes.

LIVING YET—PRINCE CHARLIE.—For one mile Living Yet outclassed Prince Charlie as much as ever one coursing dog did another, taking 9½ points quite ahead. Charlie was placed, but Living Yet raced by him no less than five times. As the dogs tired, they turned wide. Living Yet kept the lead for a time, Charlie pluckily staying up. After a long hard time of it, Charlie put on more steam and passed Living Yet, who then incontinently quit in his tracks and had to lose his grand course. Had he gone 100yds. further he would have won, for the hare was lost in the grass. Prince Charlie won.

LADY BARTON—QUEEN.—On the supposition that she would not be needed Mr. Martin, owner of Queen, had left her in town and she was absent when called. Mr. Luse, owner of Lady Barton, agreed to drop the course to the foot of the series, and accordingly Mr. Martin set off for town, eight miles, with his team in full gallop. He made the sixteen miles in a little over an hour. Mr. Luse had changed his mind and claimed a bye for Lady Barton to Mr. Martin's just disgust when he learned of it. Belle of Eltham gave Lady a pretty bit of help in a good working course in and around the carriages, Lady Barton showing much cleverness and killing.

IRISH LASS—LORD NEVERSTILL.—Neverstill being bad in slips they were led single. In the slip Lass was favored and was first up. Neverstill at once drew by and handled the hare at 5 points, thence doing the work in elegant style for three-fourths of a mile, when he had shot his bolt. Lass then drew by, but it was only a follow. Neverstill kept after for a short distance, and then to the surprise of every one quit in his course and was loser of all his clever work. Irish Lass won.

DRY TIME—FANNY.—Dry Time ran up and turned fast enough, but fell wide. Fanny sprang in for some smart work and a kill. Dry Time not closing. Fanny won.

SOUSIE—NETTLEFIELD.—These first got a short-no-course, and then caught an old-fashioned W. W. Carney brand of long rabbit. Nettlefield ran up, worked the hare nicely for the usual short burst at first, and then the hare got her gait and led for the hills. Sousie never showed in it from start to finish, and made no trouble for the other to beat her pointless. Nettlefield won.

MASTER PETER—LADY IN BLACK.—This was the unexpected. Instead of a close course it was a one-side one. Master Peter was a known good one, and a favorite with many, but he had no license to beat the black freak so easily as he did. She may not often be so fast as she was yesterday, and she is known for an irregular performer. Her work to-day was not that of yesterday certainly, and she showed nothing extraordinary when placed. It was all over but the flag after the lead up, which Peter had with much to spare. Peter turned and fairly left Lady standing. He was a wonder for a big dog, and clung to his hare like a monkey, and was so speedy and handy as to surprise even his warmest admirers. He allowed Lady only two points, and had eight and a half to the good, when he drove for the hare and killed handsomely. Master Peter won.

BRITAIN YET—MONK BISHOP.—Monk led up, but to little merit, as the hare turned to him. In possession, he knocked out five and a half points, and showed clever. Britain drew by and scored, placing Monk, who held it in hand to the close, working the hare handsomely. Driving to kill, he tripped the hare and both reached it together in the kill. Britain for the 50yds. before the end was running very cunning. Monk Bishop won.

WOODFORD BOY—PRINCE RUPERT.—A short course, but enough. Boy led up, turned, placed Rupert, then raced in and killed. Woodford Boy won.

WHAT CARE I AND LADY GRACE were now ordered in. A hare sprung near by, just as Arthur Massey was fastening the collar on What Care I, and the latter broke away and coursed the hare for over a mile, a very punishing experience. At this, Uncle Bobby Smart, rough diamond that he is, declined to put his dog, Lady Grace, in the slips until the following day. "I want the other dog to have a fair show," said he, "I don't want to win without a course run." "But d—n me!" he added, "I can beat that other dog to-day or to-morrow, or any other time." There are worse sportsmen than Uncle Bobby.

MASTER GLENDYNE was now put in for his bye, but it grew dark before any hare was found and the day closed with two courses of the second round undecided.

*Thursday, Third Day, Oct. 27.*

Early in the day two of the cook ladies at that admirable hostelry, the Morrison House, struck and quit work. The result is not yet, but it is hoped that all the cooks will strike and go far, far away. They could not be replaced with worse. The lunch at the grounds, admission to which was negotiated by means of a meal ticket issued by the aforesaid hotel, was worse, if possible, than ever before. The able executive committee and estimable vice-president drove off in the morning and left the judge to shift for himself in the matter of getting out to the grounds. The representatives of the press took the judge into their wagon and saved him an eight-mile walk. The 1892 executive committee of the American Coursing Club ought to be executed themselves. They spent more time masticating linen and tending to dogs than they did to watching after the order of things. The management to-day was as inefficient as could be made to order. In the past seven years the dogs of the club have improved. The men have not. They are the same weak-hearted, well-meaning, easy-going, indecisive, afraid-of-their-shadows lot. They hold this club back. They do not make it what it should be. They let it go at sixes and sevens, without order, without system, and without more than the barest regard for the rules which they permit to lie as dead letters on their books. The dogs furnish the sport here. The club is but a faint and inefficient guardian of that sport. Yesterday, as was mentioned, a handler rode clear in front of the judge, who complained. The man was "cautioned," In the last course of to-day a recent and officious importation from Ireland, called "Fox" Kinney, who has been anxious to instruct America in coursing, rode so close up he nearly went over the dogs. The judge was asked if he intended to lodge complaint. "What would be the use?" said he. "I tried that yesterday." He did, however, enter complaint and no attention whatever was paid to it. Another case of fright. So large a crowd is, of course, hard to handle, but that the crowds are now so selfish and disregardful of the club's interests is due mostly to the weakness which has so long left open disorder unsuppressed and violations of rules unrebuked. A day in or ahead of such a crowd is anything but sport. These plains are America's Altcar. A magnificent club body could be built up here, but it never will be under the old policy. A move from this point for a year or so, at least, might be one of the best things that could happen for the real welfare of the club. It was but a rotten exhibition that the American Coursing Club made of itself to-day.

THE WATSON-LUSE PROTEST CASE.

As stated above, Mr. D. C. Luse, a member of the executive committee, had his bitch Laura protested in the puppy stakes yesterday for over-age, by Mr. J. Herbert Watson, his opponent. This case came on for trial at the club house this morning before the start, and occupied a couple of hours. The associate members of the committee, Messrs. Page and Lowe, sat as court, plaintiff and defendant appearing without counsel. Mr. Brougher, a notary public, swore the witnesses. The trial was made as formal and just as possible, and the judges in the unfortunate matter did the best they knew in their unpleasant business.

Mr. Watson called Dick Taylor, well known in this country and respected. Mr. Taylor testified that he saw a litter of Jessamine puppies (Laura was entered as by Lord McPherson ex Jessamine) at William Horine's farm, where Jessamine was kept for Mr. Luse. The puppies were then two months old or so. That was the week before Thanksgiving, 1890. Arthur Massey also saw them and said, "Let us keep watch of this lot and see if they don't go in entered as puppies in '92." He had so watched them. He knew Laura.

Arthur Massey, called by Mr. Watson, swore he saw the litter at Horine's a week before Thanksgiving, 1890, while at the quarry there for a load of stone. He knew their markings. Knew every dog Mr Luse had. Knew where she (Laura) was kept. Knew that Laura was whelped in the fall of 1890 and was at least two months old when he first saw her in the Jessamine litter.

*Mr. Luse*—"Did I ever tell you I had a Lord McPherson-Jessamine litter?"

*Massey*—"Yes, you did, at your own house."

Mr. Watson rested his case. Mr. Luse, the defendant, called William Horine, the farmer who kept Jessamine for him. Horine swore that Jessamine was brought to him in the winter of 1891, came in heat in April, and he sent her back to Mr. Luse, who bred her. She was then returned to the farm and whelped in June, 1891. Those puppies had been kept on the farm since then, these two, "the white one and the other one." We had another litter the fall before, but not these. This June litter was the only one whelped there. There was no fall litter. Might have been a few of Luse's running around. Had some greyhounds himself and a bird dog. Cross examined by Mr. Watson and by Mr. Page, Horine said these other older puppies that lived around the house might have been 4 months old in November of 1890, at least 3 months old. Didn't know their history or pedigree. Knew they were not whelped there by Jessamine.

Mr. Luse called Wm. Horine's son, John W. Horine, who told the same story as his father.

*Young Horine*—"Jessamine came to our house in 1890—"

*Old Horine, interrupting*—"You mean 1891."

*Mr. Watson*—"I object. Let the witness alone, to tell his own story."

Young Horine said he did not see Dick Taylor or Arthur Massey call. They must have come for a load of rock. Mr. Watson now called for the rule, to separate the witnesses, which was allowed.

Mr. Luse called C. Alley, who said he worked near Horine's. A year ago last July saw some young pups there. Was not much posted on dogs, and did not notice these much. Couldn't say as to their mother. Pups might have been six weeks old in July. Couldn't describe the pups. Was not positive as to their color. Saw a yellow puppy. It ran in his mind there was likely more than one puppy, maybe two. Never noticed close.

Mr. Luse called George Horine, a younger son of William Horine. He did not agree with the rest of the family in all details. He said Jessamine came to them in the fall, not in the winter. Thought the "brindle pups" were born in June, about a year ago. Said the other pups that lived there were six or seven months old at November of 1890. That was the lot in which Mr. Luse's Living Yet, Starlight and others came in. These were six or seven months old by Thanksgiving of 1890.

The elder Horine was recalled, and said that the dog Woodford Boy, running in the All-Aged Stakes this year, was out of that earlier litter.

*Dr. S. J. Shaw, breaking in*—"Yes, those Ridenour dogs, you mean. Now, I ran a brother to that dog last year in the All-Aged Stakes, and lost $10 on him. Luse ran Robin Hood, the stumptail, the same year, in the Puppy Stakes. Ridenour told me my dog was 23 months old. So Luse must have run a 23-months puppy last year."

Mr. Luse was sworn. "I bred Jessamine to Lord McPherson in April, 1891. I never saw her whelp. Saw the pups soon after. Laura was of that litter. This is all I have to say. I have no argument. Do as you like."

Arthur Massey and Dick Taylor were both recalled, and repeated their earlier assertions positively. They had seen old man Horine at the farm as they came away, the day they saw the litter of puppies, in November of 1890. They had then resolved to watch the litter.

It was now nearly 11 o'clock, and the party went afield, the case adjourning. At the lunch hour the case was taken up again. Mr. Watson called Lewis Woodburn, a bright boy, whose testimony turned the scale. He swore that in the early fall of 1890 Mr. Luse had told him that he (Luse) would have to go out to Horine's to kill a Jessamine litter of puppies, as Jessamine had got in whelp to an inferior greyhound, and he didn't want any curs. Never knew that Mr. Luse did kill the litter, though.

At noon the committee brought in their decision. They disqualified Laura, giving the protested course to Mr. Watson's dog, Aladdin. The other puppy, Flying Fox, which was of the same litter as Laura, was already beaten and needed no action.

The start was not made till 11 A. M. The day was clear and very hot, and the dogs had a hard time of it which drew "long" jacks.

*All-Aged Stakes—Second Round.*

WHAT CARE I—LADY GRACE.—Lady made smart work of it for a good bit, beating What Care I pointless. The latter was placed but failed to score. Lady led for the hills. Lady Grace won.

MASTER GLENDYNE (*a bye*).—Mr. Lyons, owner of old champion Trales, which was fat and out of all running condition, did the rather singular act of letting his stud dog go in with his son, hard and fit, for this bye. Master proceeded to make a monkey of his Dad.

*Derby—Second Round.*

Running was now taken up in the puppy stakes, and some pretty running was seen.

ROY'S CANARY—BOOMERANG.—Boomerang ran a scorcher. He was as brilliant to-day as yesterday, and a good one all over. Boomerang led up, scored, showed wonderfully close and speedy and made a hollow mockery of it, scoring 24 points and killing all for himself, beating the Canary pointless. Boomerang won.

RAVEN—ROYAL RUBY.—In a sharp and twisting lead-up little difference showed, the hare swerving. Raven then raced by and killed within 100yds. Raven won.

SYLPH—KETCHUM.—A bruising no-course on a hare that went to the hills. The dogs had a mile and a quarter in the hot sun.

SIR HUGO—LIGHTFOOT.—Lightfoot appeared phenomenal. Hugo led, took a turn and two wrenches. The hare made the usual line for the hills, and was fast. Lightfoot drew by, and did the feat of getting work out of the hill hare after she struck the hard road. No other dog has done that this year, and it has rarely been done here before in any year. Yet Lightfoot crowded the hare clear out of the road, brought her back, wrenched her hot, worked her all alone and drove her from the hills time and again. Hugo was placed for a brief moment, but Lightfoot was very niggardly of his hare and took her away again, crowding her all over and at length driving in for a single-handed kill. All this was at the end of a mile and a quarter course on a hot day. Usually when the hare gets lined out for the hills little work is afterward taken out of her, let alone a kill. This was therefore a remarkable course. Lightfoot won.

The party now went in for lunch. The photographer was there as usual. Members of the press sought to make up a little group of a private nature, showing the men they wanted in. It was with the utmost difficulty that they kept out divers other club members, who wanted themselves and their dogs thrust into a picture which was wholly a private matter. The omnipresent average grounds spectator was also there and could hardly be kept out of the chance to get himself into a picture, thinking it very unfeeling when asked to stand back.

After lunch two stray dogs were found running around the grounds. One of these joined in the Aladdin—Buckskin course. It was later shot, in a very barbarous and brutal way, with a shotgun loaded with fine shot, writhing and yelling a long time before it died. This was a foxhound. The other was a shepherd, and was shot, but not killed. These stray dogs are annoying, and are hard to catch, but it is very hard to see the legal right the club has to kill them. The exhibition to-day was unpleasant.

ALADDIN—BUCKSKIN.—A very near and lively thing on a twisting hare only two-thirds grown. Aladdin was quite the better up and took a run of points, but Buckskin drew by and had the better of the swift exchanging that followed, killing ahead. Buckskin won.

REDWOOD — DELSARTE.— Delsarte shouldered Redwood hard for 25yds., trying to get over to the hare. Getting by, he turned, Redwood going wide. Breaking for the hare they cannoned, both going over in a great mix-up. In the exchanging which ensued both showed still lively and unhurt, Delsarte the better for a couple of turns. Redwood was placed to score, but Delsarte drew by and ran a game, followed to the hills. Redwood quit rank in his course. Delsarte won.

SCAVENGER—WHITE LADY.—These got a short no-course, and then were slipped at 200yds. on a hill hare on the buffalo grass. Lady in 500yds. led up, turned three times and forced the hare away from the hills. Scavenger drew in for two turns, placing Lady for another. Scavenger then took up the running, worked out three turns handsomely ahead, drove in on a hard burst and killed with great credit. This was another remarkable and unusual course, in that after a mile on a hot hare, the dog could do such clever work and at close quarters. One could only wonder where Scavenger found it in his under sized body to do such work. Scavenger won.

SYLPH—KETCHUM.—These now went in again. Still another unexpected exhibition of performance at the close of a long and punishing course. Sylph had the first of it and scored to place Ketchum, who lost, Sylph again scoring. The hare was fast and had by this time led them a long way. After they had done three-quarters of a mile, Ketchum drew by and turned the hare square back, Sylph holding but a moment. Twice more Ketchum passed her, getting work out of the hare, and at length placing Sylph to kill. Ketchum won. This closed the second round of the Derby.

*All-Aged Stakes—Third Round.*

The first course in the third round of the All-Aged was

PRINCE CHARLIE—LADY BARTON.—These got a pretty slip. Lady Barton, always a phenomenon to start, sprang three lengths ahead at the slip. Charlie, however, drew by her on the run up, and got the turn, slightly favored by the hare. Lady Barton then gave him a perfect go-by on a straight drive, turned the hare and snapped her up in her own style, showing there was much left in her yet. Prince Charlie was off in one leg. Lady Barton won.

IRISH LASS—FANNIE.—A cottontail passed, and Fannie slipped her collar, but was headed back. A jack was started, and she coursed it a quarter of a mile alone, fortunately losing it. Put in again, Fannie got the run-up, a bit favored, on the next hare, and thence out ran a whooping ocurse, the hare carrying the two clear over the flats to the hills, probably two and a half miles, a hard course indeed. Fannie took three go-bys and six turns, placing Lass then for some minor work. Lass grittily held on, but as the procession lined up Fannie drew by and maintained her superiority in wonderful style, all considered. The hare was lost. Fannie won.

NETTLEFIELD—MASTER PETER.—Master Peter had now become a red-hot favorite, and showed truly a great dog. Peter ran up for 2 points, and scored 9½ points ahead, placing the bitch to score. Peter then raced by, sticking close to a hare certainly fast, taking a lot out of her, and placing Nettlefield for a chance, which she improved but scantily after three-quarters of a mile. In high grass near the road Nettlefield was misled, and made a long push to the left for what she took to be the hare, Peter meantime bringing the hare to the right. Unsighted, Nettlefield bounded about, trying to catch the course, but stopped still eager. Peter showed able to stay, though he did not kill. Nettlefield was on three legs all the week, her left hind leg being in bandages for a bad cut. Master Peter won.

MONK BISHOP—WOODFORD BOY.—In a mixed-up lead there was little to choose, though Woodford Boy got the first work. Monk drew by. The hare ran around the club-house and through the crowd. The dogs had to race for their exchanging, Monk Bishop the better, he going a good one. Monk Bishop killed and won.

LADY GRACE—MASTER GLENDYNE.—Master Glendyne was drawn lame, with a leg apparently ruined by a strain. Bobby

Smart's Lady Grace was thus so lucky as to get a bye. This she ran with her kennel mate Girl's Favorite. They put the hare to earth and she was later dug out. As Lady Grace gets a bye in the next round, she quit to-night sure of some money.

This closed the exercises of the day, as the church reporter puts it.

*Friday, Fourth Day, Oct. 28.*

The last day of the meeting was pleasant, so far as the weather was concerned and so far as the dogs were concerned. For the rest not so much can be said. It is anything but sport of a gentlemanly nature which is seen at the finals of the American Coursing Club's meetings. Three years ago there was an unseemly and ungentlemanly lot of kicking by those who wanted to win and did not. Last year came up the disgraceful Pearl of Pekin incident, whose shiftless and nerveless handling by the committee made the club a laughing stock. This year was to be no exception. Mr. Lowe was again beaten, beaten fairly, decisively and unquestionably in the last course, as everyone but himself saw and said. Instead of taking his losing gamely and like a man, he began his usual kicking, and before the judge had turned his back or had time to raise the flag, declared that his dog had won and that the other did nothing. This talk he continued for an hour, making a spectacle of himself. His discourtesy to the judge in the field was never rebuked. As usual, Mr. Lowe announced that "he would never come on these grounds again." That is all fable. He will come as long as any, for he must advertise his dogs; but it would be well did he keep his often expressed resolution, and stay away from all coursing meetings whatever until he learns to take an honest beating like a sportsman. His conduct has been unworthy a member of the club.

In all this sea of trouble the conduct of the judge, Mr. Mulcaster, was an island of relief. Mr. Mulcaster was quiet, courteous, careful and yet firm throughout. He judged this meeting admirably and in an admirably, gentlemanly manner. The club never protected him, never supported him, never looked after him. He rose superior to the club.

The business meeting of the club, adjourned from last night to convene on the grounds, was adjourned again till evening. Inasmuch as it then lasted over seven hours in session, the adjournment was very possibly a wise one.

In the middle of the afternoon there was another disgraceful and disgusting incident. Confusion in the crowd arose. A lad of perhaps six or eight years was heard crying out, and appeared with a bleeding weal extending half about his neck. He said that a man in a carriage had cut him about the neck with a whip for unavoidably crowding up too near the carriage. The ruffian who did the brutal and outrageous act was pointed out, and for a moment was in danger of what he certainly should have had, a horsewhipping out of the grounds. Dick Taylor—Uncle Dick, bless his heart—plucky little fellow and real man that he is, when he saw what was done and who had done it, made at the carriage and had the brute half out of it before Deputy Spencer could stop him. Spencer then legally arrested the wretch and sent him to town. All credit to Deputy Spencer. He made the first and only arrest ever made on these grounds, where dozens ought to have been made. Two hoodlums yesterday were pulled out, but released.

An officer has now to contend with a growth of ruffianism in the crowd of spectators which is the direct result of the timorous, scared, indecisive action of the club in past years and up to this time. The club has let these things grow on its hands because it was afraid to tackle them. Incidents like the above of to-day show that a day in the field at the meeting of the American Coursing Club is not a day of gentlemanly sport, and that the meet itself is no place to go for sport or pleasure, and that such a weak-backed and inefficient club does not deserve the encouragement or support of gentlemen interested in honorable sport conducted in a manly and honorable way. The earlier predictions made in the FOREST AND STREAM reports of this meeting are coming true, and coming true fast. This week they have raced up to their fulfillment. I shall add later the action of the club meeting this evening, and shall then venture the question, How far is the American Coursing Club from the ignominious end and swift obscurity which come to nerveless dogs, nerveless men and nerveless managements?

This may all be thought harsh, severe, perhaps unjust. It is neither of these. It is the truth. These are the facts. The public is entitled to the news and to the facts, impartially and fairly stated. Owners of dogs should know about this club before they send dogs here or come here themselves. If this club is not right, the fact should be known. If a fearless exposition of the facts will lead to a general shaking up and a reorganization or a reformation, then much good has been done for the proper and gentlemanly sport of coursing. But to try to conceal or smooth over these matters would be to do the worst of injustice to the sport of coursing. If all this hurts the American Coursing Club, well and good. It is time it died if the truth will kill it. And it is high time that we had, either here or somewhere else, a coursing club truly American and not so merely in name—a club American in fairness, in manliness, in gentlemanliness and in sportsmanship. This club this year has not been such.

The wisdom and the necessity of these remarks will be self-evident when the report of the business meeting of to-night is read. When it becomes necessary to put before the world facts such as transpired here this week it is certain that the club has gone near to outliving both its dignity and its usefulness in the sporting world.

Whenever there shall be established any personal bias, any unfairness or any inaccuracy of statement on my part in anything I have said in regard to this club or its members, I am ready to tender my resignation from sporting journalism.

Running began at 10:12 A. M. in Puppy Stakes.

*Derby—Third Round.*

BOOMERANG—RAVEN.—Boomerang was quite too much for the little one. The hare served Boomerang, who thus lost the lead. In the exchanging he was far the better and drew ahead to stay. He came back from the hills with a terrible barb-wire cut. His right hindleg had a piece of skin torn off as large as one's hand and a wound a half-inch deep in the muscles. Boomerang won.

KETCHUM—LIGHTFOOT.—Litter brothers, with a lot of finishing quality and repeaters, as they showed to-day after yesterday's work. Ketchum led up in a long run and got his six ahead, placing Lightfoot, who fell out of it, but kept close. These two puppies appeared about as certain to catch a hill hare as any. Ketchum crowded this hare back from the hills, and Lightfoot was hardly by when Ketchem drove in and killed, 1¼ miles from start and away back in the flats. Ketchum won.

BUCKSKIN—DELSARTE were put in next and got a hot, undecided, brilliant, and as close a course as could be seen, each taking 10 points.

SCAVENGER (*a bye*).—Royal Ruby was put in by Mr. Lyons to go the bye with Scavenger, and, to tell the truth, she beat Scavenger shamefully.

LADY BARTON—FANNIE—were now put in to go in the fourth series of the All-Age. They ran another undecided, and a long and pumping go, clear to the hills, perhaps a mile and more and a lot of work. Lady Barton more work at start, Fannie closing strong and killing.

BUCKSKIN—DELSARTE.—These now having had a breathing spell went in again. Delsarte was faster up and got his six points, giving the hare the first wide turn to the hills. Buckskin then drew by, took it up, and got work out of the hare on soft ground. On a swift double, Delsarte came back, and the hare again swerving, he was thrown out unsighted for an instant, Buckskin drawing off. Delsarte followed, and at the barns pulled up, perhaps unsighted, as he was far back. Buckskin won.

*All Aged Stakes—Fourth Round.*

Lady Barton and Fannie were held over their two courses to give them a chance to recover from their hard undecided.

MASTER PETER—MONK BISHOP.—Peter won by the decisive run-up and kill of merit. In the exchanging it was much an even thing, and one could only admit that Monk Bishop had more in him than had at first been seen. He ran game and true, and was clever, though not fast enough for the grand brindle that beat him. On two of the turns Peter ran with his ears up when behind the white one. It would, however, be hard to see in this more than the result of a hard week's work on a 4-year-old dog, for he seemed eager and keen enough, and game as a pebble. Master Peter won. Mr. Porter kicked.

LADY BARTON—FANNIE.—These went in again for another long and bruising course, over a mile. Lady Barton led up in a long slip, took first and second turns, wrenched the hare and had her six ahead, then getting more work. In the flat race out, Fanny took three go-bys, and Lady Barton two, Fannie showing ahead then. All she could do was a couple of turns. The two killed together apparently, this letting the freak in for an easy enough thing. Lady Barton won.

LADY GRACE (*a bye*).—Lady Grace went her bye with Mr. Watson's Dry Time, who beat her every way. Grace came back with two pads half off and a front foot and leg raw half up. The punishing nature of these hard buffalo-grass grounds was again apparent. Adjourned work for lunch.

*Derby—Fourth Round.*

BOOMERANG—KETCHUM.—The cocaine bottle was brought into frequent use, and Boomerang was put in again to go, though he looked a sad sight with his leg cut half off. Not very well sighted, and the hare serving the red collar a bit, they at length lined out and Boomerang was far faster up, taking 8 points ahead, and going a corker in spite of all Ketchum drew by for a follow, but they took little out of flats. The dogs had to kill or follow a two miles course to the hills. They killed at length, Peter making the kill. His score was 31 points, Prince Rupert's 24 points.

*Derby—Final.*

Boomerang came back from his last course with the additional injury of two pads torn off. He was drawn.

Scavenger won first, Boomerang runner-up.

*All-Aged Stakes—Final Round.*

LADY BARTON—MASTER PETER.—The judge gave Master Peter over an hour's rest, and he then went in against the triple winner, the plucky red feather-weight which had hung so stubbornly to the stakes this year and the two years previous. Lady Barton ran up, but the turn was very questionable. Peter took three go-bys, Lady Barton two. Peter then led and gained. Both seemed very tired and the hare outfooted them. The hare ducked into some smartweeds on a dry pond-hole, and Peter quit and turned about. The hare then appeared on the bank, but was not seen by the dogs. It was much pleasure to see the judge's hat come off promptly for an undecided.

MR. J. HERBERT WATSON, DRYTIME AND ROYAL CREST.
American Coursing Meeting, 1892.

Lady Barton had now had two very long and hard courses in the morning, one short one with Lady Grace in the afternoon, and her undecided with Peter. Master Peter had run one short course in the morning with Monk Bishop, the bruising bye with Prince Rupert and the undecided with Lady Barton. It became a question whether they should go in again or go over till next morning. The usual wrangle ensued. Mr. Luse wanted to go in and finish it. Mr. Lowe with a burst of humanity wanted it to go over. It went to that august, severe body, the executive committee. Mr. Luse and Mr. Lowe both were members of the committee, and it had to go to the third member, Mr. Page. Mr. Page, as usual, promptly got on the fence, and all subsequent events failed to dislodge him. It probably never will be known just how it was decided, but it was finally agreed by Mr. Lowe to go to slips.

As Mr. Lowe went through the crowd leading Master Peter, a woolly Kansas bronco tried his hand, or rather his hind leg, at kicking too, catching Peter in the short ribs. The dog yelped, but as he was heavily blanketed, was probably more scared than hurt. It was, however, not all over for the dogs. A hare got up, and as Arthur Massey was trying to sight the dogs, Mr. Lowe rode up and rode over the dogs, or rather over his own dog. His horse struck Peter hard enough with his leg to throw the dog on his back, of course pulling Lady Barton over too, in a baddish mix-up. No protest was entered here. The game brutes had the right to protest, but they got up and went on to do what was asked of them. Neither was cut or lamed.

Another hare was sighted, and Arthur Massey gave them a careful slip. The jack was good and stiff, and after all the events of the day, these two were a grand pair to stop her. Lady Barton led up distinctly, turned sharp, and wrenched the hare. Peter raced by. He placed Lady Barton, who brought the hare back on a turn, wrenched it as she reached, then drove in and killed inimitably, rolling over on the bare ground.

Lady Barton won first, Master Peter running up. The latter has certainly improved much since last year, and is a wonderful greyhound, fit for any company we have in this country at least. Lady Barton is not his equal in looks, but comes of a strain which has been hard to shake out of the stakes here for some time. She is better fit for this work than Peter, who is probably too large for the plains, though not too large for soft ground work. Lady Barton is a perfect killer. Master Peter shares a peculiarity of Mr. Lowe's Lord Neversettle dogs. They are good goers, and take scoring well enough, but are not able to kill, and so get long and pumping courses which could be won as well by an early kill. Liberty, Mr. Lowe's bitch of the Master Peter litter, was a clever killer. The others never were handy with their teeth. Had Master Peter killed his hare in sixteen points, instead of thirty-one, in the Prince Rupert bye, he would have come to the slips in the final with a per cent. in his favor. As a grand coursing dog he is not surpassed here. This much can be said without injustice to the phenomenal little bitch that beat him. Lady Barton saves much grand stand work by killing her hare. It was near between them, but she beat him fair and on her merits.

The proposed Consolatian Stakes, for a $25 cup offered by Mr. Roger Williams, of Lexington, Ky., no entry fee to be charged, was not taken up, and little interest seemed taken in it.

OFFICERS AMERICAN COURSING CLUB MEETING, 1892.

SUMMARY.

ALL-AGED STAKES—*First Round.*

| | | |
|---|---|---|
| D. C. Luse's w d Living Yet—Trales—Dick's Darling. | beat | Dr. S. J. Shaw's w and bd b, Dolly—Trales—Humming Bird. |
| Lowe & Page's w and bk d Prince Charlie—Lord Neversettle—White Lips. | beat | H. G. Nichols's be d, Blue Prince—General—Flora. |
| D. C. Luse's f and w b, Lady Barton — Trales — Dick's Darling. | beat | T. W. Bartel's w and bd d, Flying Dutchman — St. Patrick—Daisy Dublin. |
| Ed. Martin's f b, Queene—Pedigree unknown. | | D. N. Heizer's w b Snowball—Trales—Lady Milly Glendyne. |
| T. W. Bartell's w and bk b, Irish Lass—St. Patrick—Daisy Dublin. | beat | *a bye.* (Sporting Press absent). |
| Lowe & Page's bd d, Lord Neverstill—Lord Neversettle—Partera. | beat | Abe Bowman's w and bd b, Boodler—Smily—Bess. |
| J. H. Watson's f b, Drytime—Britain Still—Haytime. | beat | Alfred Haigh's be b, Chloe—Flink—Kansas Blue Bell. |

| | | |
|---|---|---|
| J. P. Roetzel's bd b, Fanny—Keno—Jennie. | beat | D. C. Luse's w b, Clara—Green Tick—A'Eanone. |
| Alfred Haigh's w and bk b, Sousie—Lord Neversettle—Dame White Lips. | beat | T. W. Bartell's w b, Pearl of Pekin—St. Patrick—Daisy Dublin. |
| D. C. Luse's w and bk b, Nettlefield—Dick Day—Camborne. | *a bye.* (Best of Fashion absent). | |
| Lowe & Page's bd d, Master Peter—Lord Neversettle—Partera. | beat | J. H. Watson's be d, Royal Crest—Green Tick—Royal Rate. |
| D. C. Luse's bk and w b, Lady In Black—Trales—Dick's Darling. | beat | Michael Allen's f d, Jim K.—Imported Paddy—imported Fly. |
| Alfred Haigh's bd and w d, w d, Britain Yet—Prince Trales Glendyne—Busy Bee. | beat | D. C. Luse's bd and w b, Belle of Eltham—Jester—Bit of Fashion. |
| T. W. Bartell's w and bd d, Monk Bishop—St. Patrick—Daisy Dublin. | beat | D. C. Luse's w and bd d, Lord McPherson—Trales—Dick's Darling. |
| Michael Allen names Wm. Horine's Woodford Boy—Lord McPherson—Jessamine. | beat | D. C. Luse's bd and wd, Norwegian—Jester—Bit of Fashion. |
| Lowe & Page's w and bk d, Prince Rupert—Lord Neversettle—White Lips. | beat | C. A. Hooper's w and be d, Nelson—Trales—Belle Smart. |
| Arthur Massey's f and w b, What Care I—Trales—Lightning. | beat | N. Q. Pope's bd and w d, Poland Duke—Balkis—Cassandra. |
| Robert Smart's be b, Lady Grace—Trales—Miss Smart. | beat | E. H. Lyon's bk b, Girls' Favorite—Trales—Bessie Lee. |
| Alfred Haigh's w and bd d, Master Glendyne—Trales Little Lady Glendyne. | beat | E. H. Mulcaster's f and w b, Gilda—Mentor—Gladys. (Gilda drawn). |

*Second Round.*

Prince Charlie beat Living Yet.
Lady Barton a bye.
Irish Lass beat Lord Neverstill.
Fanny beat Dry Time.
Nettlefield beat Sousie.
Master Peter beat Lady In Black.
Monk Bishop beat Britain Yet.
Woodford Boy beat Prince Rupert.

*Third Round.*

Lady Barton beat Prince Charlie.
Fanny beat Irish Lass.
Master Peter beat Nettlefield.
Monk Bishop beat Woodford Boy.
Lady Grace a bye.

*Fourth Round.*

Lady Barton beat Fannie.
Master Peter beat Monk Bishop
Lady Grace a bye.

*Fifth Round.*

Lady Barton beat Lady Grace.
Master Peter a bye.

*Final.*

Lady Barton beat Master Peter and won. Master Peter second, Lady Grace third, Monk Bishop and Fannie divided fourth. (No actual fourth dog in this stake.)

Lady Barton, first, wins the title Champion of America, $185 stakes and the *American Field* cup ($100 cash); also the D. C. Luse silver cup. Lady Barton weighs 42lbs. and is 4yrs. old; in color, red; a compact greyhound of no extraordinary gift except that of performance.

Master Peter, second, is a brindle, 69lbs. weight. 4yrs. old. A grand looking running machine every way. Won $92.50.

Lady Grace, third, is a useful black bitch, weight about 45lbs., 3yrs. old. Wins $23.12.

Monk Bishop, divided fourth, is a powerful white, about 63lbs., 2½yrs. Won $11.56.

Fannie, divided fourth, is a dark brindle, about 47lbs., about 4yrs. Won $11.56.

## GREAT BEND DERBY.

*First Round.*

| | | |
|---|---|---|
| Price & Royce's r b, Roy's Canary—Major Glendyne—Humming Bird. | beat | Michael Allen's bk d, Jim Flynn—Jack—imported Sport. |
| T. W. Bartell's bk and w d, Boomerang—Lord Never settle—White Lips. | beat | Joe Roetzel's w and f b, Queen—Keno—Belle. |
| Price & Royce's bk b, Raven—Major Glendyne—Humming Bird. | beat | J. H. Watson's bk b, Dry Brook—Burnaby—Dry Time. |
| Price & Royce's be and w b, Sylph—Major Glendyne—Lady Alice. | beat | Ed. H. Lyon's bd b, May Day—Trales—Meta. |
| Ed. H. Lyon's bd b, Royal Ruby—Trales—Tenee. | beat | Lowe & Page's bd b, Nancy—Lord Neversettle—Partera |
| A. Laidlaw names J. S. Airhart's bd d, Ketchum—Major—Clipper. | *(a bye).* | |
| Lowe & Page's w and bk d, Sir Hugo—Lord Neversettle—White Lips. | beat | Price & Royce's w d, Rome Marble—Major Glendyne—Lady Alice. |
| D. C. Luse's f b, Lightfoot—Major—Clipper. | beat | Ed. H. Lyon's bd b, Fantail—Trales—Meta. |
| D. C. Luse's f b, Laura—McPherson—Jessamine. | beat | J. H. Watson's bk d, Aladdin—Burnaby—Dry Time. |
| J. R. Ballard's f b, Buckskin—Cochran Frank—Skippy. | beat | G. N. Moses's w and bd d, Trales, Jr.—Trales—Brilliant. |
| Ed. H. Lyon's r d, Redwood—Trales—Tenee. | beat | M. Allen's w d, Flying Fox—McPherson—Jessamine. |
| J. H. Rew's h and w b, Delsarte—Lord Neversettle—Prima Donna. | beat | J. H. Watson's be b, Wasted Time—Burnaby—Dry Time. |
| Ed. H. Lyon's bd d, Scavenger—Trales—Tenee. | beat | Price & Royce's bk d Rook—Major Glendyne—Humming Bird. |
| Lowe & Page's w and bd b, White Lady—Lord Neversettle—Partera. | *(a bye).* | |

*Second Round.*

Boomerang beat Roy's Canary.
Raven beat Royal Ruby.
Ketchum beat Sylph.
Lightfoot beat Sir Hugo.
Buckskin beat Aladdin.
Delsarte beat Redwood.
Scavenger beat White Lady.

*Third Round.*

Boomerang beat Raven.
Ketchum beat Lightfoot.
Buckskin beat Delsarte.
Scavenger a bye.

*Fourth Round.*

Boomerang beat Ketchum.
Scavenger beat Buckskin.

*Final.*

Scavenger beat Boomerang (drawn) and won. Boomerang second, Buckskin third, Ketchum fourth.

Scavenger, first, is a tiny one, 18 months, brindle; won $67.50 and National Greyhound Club silver cup.

Boomerang, second, is a good-looking black and white dog over 60lbs., 14 months; won $33.50.

Buckskin, third, is a rangy one, fawn, 18 months; won $8.37.

Ketchum, fourth, is a strong one, red, 16 months; won $8.37.

## The Annual Business Meeting.

At the regular annual business meeting, at the Morrison House, 8 P. M. Friday, Oct. 28, the vice-president, Dr. S. J. Shaw, was in the chair, Ira D. Brougher, secretary, being assisted by J. Harvey Rew, secretary pro tem. So far as known no minutes were read and no treasurer's or secretary's report was read, though confusion was so general this may have been done. Under suspended rules and by one ballot the following officers were elected: President, Dr. N. Rowe, of Chicago; Vice-President, Dr. S. J. Shaw, of Great Bend; Secretary, Ira D. Brougher, of Great Bend; Treasurer, J. V. Brinkman, of Great Bend. By ballot, Messrs. A. C. Schermerhorn, of Great Bend; C. G. Page, of Chicago and Dr. A. J. Cattanach, of Denver, were elected members of the executive committee. Messrs. G. N. Moses, Dick Taylor and D. C. Luse, all of Great Bend, were chosen for the ground committee. Mr. E. S. Medberry, of Great Bend, was elected an honorary member. On Mr. Watson's motion the club voted to raise by subscription, a special prize for "best greyhound in the show," to be tendered the National Greyhound Club for their bench show of Nov. 24. Messrs. Lowe and Shaw subscribed $5 each and it stopped at that for the time.

Mr. Watson started the discussion on the proposed international meeting for 1893. Mr. Brougher stated that only two appointees of the president's committee on this work had agreed to serve, Mr. Watson and Mr. J. R. Price. Mr. Price had agreed to subscribe $500 and Mr. Pope $500 more, conditional upon fifty other men subscribing $50 each, it being desired to raise a total purse of at least $5,000. Mr. Watson thought it should be started. Several promised to subscribe. Mr. Watson moved to circulate a subscription list for a guaranteed fund, conditional upon the entry of 32 dogs from England and other countries outside of America. This carried, and here action in the matter came practically to an end. A recess of half an hour was then taken. The parliamentary action of the body was very loitering.

### THE PEARL OF PEKIN PROTEST.

After the recess the Pearl of Pekin—Chicopee Lass matter was taken up.

*Mr. Page*—"For the executive committee I would say we have referred this matter to the club."

*Dr. Royce*—"That can't be done. The by-laws instruct the committee to settle all such mooted cases."

*Mr. Luse*—"That means, the committee of the year when the event took place."

*The Chair* (Mr. Watson in the chair)—"It is so understood. That committee was composed of Mr. Page, Mr. Lowe and Dr. Shaw."

*Mr. Page*—"I would like to hear from the secretary."

*Mr. Brougher, Secretary*—"Last fall Mr. Bartels told me that if Edmonds, who ran over Pearl, would make affidavit that he did so accidentally, he, Bartels, would relinquish all claims. Edmonds did make such affidavit. I thought that settled it, and paid over the money to the California men. Dr. Shaw also heard Bartels say this. The affidavit was turned over to the committee."

On instruction, the secretary then read an affidavit made by Mr. Bartels, he swearing, "I never at any time withdrew my protest in the Chicopee Lass—Pearl of Pekin controversy of 1891."

*The Chair*—"All this is out of order. The Chair rules that this executive committee shall file a report, either a majority report or both a majority and minority report, if they cannot agree."

*Mr. Brougher*—"This protest was sent up to the National Greyhound Club, and they referred it back, saying they had no jurisdiction."

*The Chair*—"The committee of National Club so referred it because there had been no decision here. This matter now rests with the committee of this club and I call for their report."

*Mr. Luse* (of the committee)—"If the executive committee could not refer this matter to the club or if the club refers it back to the committee I suppose the committee must report."

*Mr. Page* (of the committee)—"Why can't we just leave all this for the club to settle?"

*The Chair*—"Ruled that the committee has charge of this matter and must report."

*Mr. Luse*—"Why don't they say what they think? They've been a year at this."

A lot of shilly-shally talk now ensued from Messrs. Page and Lowe, they continually dodging the responsibility of going on record and the chair still insisting that their report was called for and must come in. In this Mr. Watson, chairman, showed the first business-like and decisive action of the evening, and formed an admirable contrast to the committeemen on the fence.

*Mr. Schermerhorn*—"If this committee have not agreed why let them bring in two reports, but for heaven's sake let them do something."

*The Chair*—"That report is again called for."

*Mr. Lowe* (very reluctantly)—"Well, that is to say, to be sure, I thought at first, on the rules, Pearl of Pekin should have the course. After the Edmonds affidavit I thought the club should take the matter up, and voted to refer it."

Mr. Lowe was now at length on record. It was still more difficult to get Mr. Page on record. Mr. Page is a pleasant man, a nice man, a good-looking man. I should think he would make a good real estate or dry goods salesman, if he didn't get tied in his own mind as to which of two articles he really wanted to sell. He was pressed hard, but it was half an hour before he could be induced to say what he and Dr. Shaw thought about it. It was well-known that they agreed, and that their report would be a majority report. Everybody patiently waited, and the mill meantime ground on.

Mr. A. C. Schermerhorn, of Great Bend, is blessed with that useful commodity, horse sense. He got square up and said what he thought. "I think a man ought to stand by his agreements," said he. "Mr. Bartels should be compelled to keep his word, even though he goes back on it himself. I would have voted to give Pearl of Pekin that course if Bartels had not said what he did. He left his case in bad hands when he said what he did, but he said it. I think now this club should sustain the secretary's action and give the case to Chicopee Lass. I do this just because Bartels has made this last affidavit. It comes with bad grace from him and it sets me against him. A man's word ought to tally with his affidavit, and be as good as his affidavit. Now, Bartels came to me, and put his hand on my shoulder, just before he left here last fall, and he said, 'Now, this is all settled if Edmonds makes that affidavit.' Edmonds did make it. I am against Bartels on account of his action in this."

Mr. Luse thought from what Mr. Bartels told him at the depot as he started home, that Mr. Bartels did not consider the matter settled when he left.

*The Chair*—"The question is, does not Mr. Bartels seek to take advantage in a legal way, and seek to sneak out of a place where he had put himself? But that is not the point before the house. I call once more for the report of the other members of that committee. Order, gentlemen. Let us now hear from Mr. Lowe and Mr. Page."

*Mr. Lowe*—"I allow the protest."

*Mr. Page*—"I disallow it. In this I speak only for myself, Dr. Shaw being absent."

*Mr. Hayman* (of the *American Field*, and an honorary member)—"I call attention to the fact that Dr. Shaw is already on record in this matter. He has published over his own signature his agreement with what Mr. Page has just said."

*The Chair*—"Ruled that Dr. Shaw's vote is with Mr. Page. You now have a majority report, gentleman, disallowing the protest. Will you vote its acceptance?"

*Mr. Schermerhorn*—"I move to sustain the secretary's action, accept the report, and disallow the protest."

*The Chair*—"It is not plain that motion is in order. Now that the committee has reported a decision, the matter can go up to the National Greyhound Club."

*Mr. Hough* (an honorary member)—"Just pardon me a moment. Could not the National Club again refer it back to the American Coursing Club, and that body back again to its own executive committee, and so on. How long a time is needed to settle this five minutes business—five years?"

*Dr. Royce*—"The matter never could be delegated or taken out of the hands of our own executive committee."

*Mr. Hough*—"It could never be taken out of their hands without amending the by-laws of this club. It has been in their hands all along. Therefore, now that a report has finally been screwed out of them, this matter is settled. An acceptance of the report is not in order, for the report is only an announcement. Your by-laws say the decision of the committee must be final. There must be something final. This majority report is not tentative, but final.

*The Chair*—"The chair so rules."

Thus finally ended the notorious Pearl of Pekin protest case, really settled a year ago and held thus by the shilly-shallying and indecisive action of a timorous committee, to the detriment in reputation of a club whose high board of appeal did not know the rules and by-laws under which they acted, and who were only with the utmost difficulty urged into an expression of opinion which should have been made 365 long days ago. The original position of last year's FOREST AND STREAM report of this meet is thus sustained and the "overwhelming testimony" and the "ironclad rule" have gone rattling down the grooves of time.

Votes of thanks were now passed to the judge and slipper, to the courteous and efficient secretary, Mr. Brougher, to Dr. Rowe for the annual cup and to the press. In the confusion of the moment it was forgotten to pass a vote of thanks to the executive committee for making their report.

### THE D. C. LUSE EXPULSION CASE.

It was now past midnight and the tired members were slipping off to bed. Still there seemed something in the air, and finally it was gradually precipitated. Uncle Bobby Smart called for action on the Luse case, for entering as a puppy a dog over age. Mr. Lowe, for the committee, reported that Laura, the entry in question, had been disqualified. The report was accepted. The chair could not get an expression further from the club. All were afraid. At length Mr. Hayman, of the *American Field*, stated that he thought some action should be taken toward expelling Mr. Luse from the club. The case ought to come up and be tried, if for nothing but justice to Mr. Luse. Several members had told him they would at once resign from the club if Mr. Luse were not expelled, and it seemed that the American Coursing Club would soon be a thing of the past.

Mr. Lowe called for Mr. Luse. Mr. Luse said with some heat:

"That disqualification was wrong, and I will prove it later. I say I have been treated wrong. They saw they couldn't run me out of the stakes, and so run me out this way. I will prove it by good men, additional to those who testified for me the other day."

*Arthur Massey*—"Yes, and isn't one of the men you mean to bring in a man who was convicted of perjury in the court?"

*The Chair* (Mr. Watson)—"This case is closed and done. It cannot be re-opened."

Mr. Luse declared the disqualification to be spite. He had three times beaten Mr. Lowe in the runnings, and Mr. Lowe took this means of getting even. Mr. Lowe very heartily disclaimed any such motives. The chair called for order.

It was urged by Messrs. Royce and Hayman that the decision was in, that the club had now in its ranks a man who had had a dog disqualified. It remained only a question of the club saving itself. Neither had any personal motives against Mr. Luse.

*Uncle Bobby Smart*—"We don't need a man like that in this club. The club would be ruined if it had a reputation like that."

*The Chair*—"Well, gentlemen, what is your wish. All this talk is to no purpose and out of order. Will some one make a motion? Will some one else take the chair? As protester in this case, it might look better for me not to take the chair in this."

No one took the chair. Mr. Smart then moved that Mr. Luse be expelled from the club. Dr. Royce timorously, and "just to get it before the club," seconded it. In discussion, Mr. Page, the general peace-maker, strove assiduously to get on both sides the fence again. "Now, isn't there some way we can fix this up?" said he. Everybody wanted to fix it up. Just one hour was spent before the motion was put. It was suggested by Mr. Hayman that private ballot be taken. Mr. Luse called for a rising vote. In this he showed a skillful handling of his own case, for he knew there was no one there bold enough to stand up and vote. The chair ruled the vote must be taken *viva voce*, in the usual manner, a rising vote to follow if the chair should then be unable to decide. The question was then put.

Ayes, 0.
Noes, 0.

Not a man there had dared to vote for or against. Truly a deadlock!

Mr. Lowe asked, "Is there a quorum present?"

*The Chair*—"The chair rules there has been a quorum, and so is one now."

Mr. Luse asked how many members made a quorum. The by-laws were sent for. Meantime those present were counted and it was found there were twelve, exclusive of Mr. Luse and of two honorory members, Mr. Hayman and Mr. Hough. The latter begged to be excused from being considered as of the club in this matter and cited a precedent that an honorary member should not vote. He felt that the honorary election was merely formal courtesy to the paper he represented, and preferred to be left in no position but that of a press representative, without voting or expressing an opinion in a case which was purely one of the active club's alone. When the by-laws came to hand it was discovered that it required ten active members to make a quorum. Mr. Luse urgently raised the question as to what constituted an active member. A half hour was consumed while the secretary looked over the books and sought to find who were and who were not active members. Much discussion of proper notification, time of paying dues, last year's dues, and some other year's dues now arose. Mr. Luse asserted that Mr. Lowe was not an active member and had not paid his dues and had no right to enter dogs. Mr. Lowe explained that two years ago his winnings were withheld on the understanding that they were to be applied on his dues. The club really owed him money yet. The chair at length put an end to the discussion and ruled that there was a quorum, more than ten active members, present.

Mr. Luse now raised the question of proper notification for trial in a case like this, as provided in the by-laws. The chair ruled that the previous trial of the accused before the committee, his presence at this meeting, and the general discussion were notification sufficient under the provisions.

In all this another half hour was taken up, and action seemed as far off as ever. Finally, at half-past two o'clock in the morning, Dr. Royce moved the previous question.

Ayes, 0.
Noes, 0.

More deadlock in this discreet and truly conservative body of sportsmen.

The chair called for a rising vote. Not one member of those present rose to support the motion to expel. Dr. Royce was sitting on the arm of his chair and the secretary undertook to count him, but he sat down swiftly with a scared look on his face. The chair asked for those opposed.

One solitary member, Joseph Roetzel, had courage to get up and vote as he thought. The motion to expel Mr. Luse was therefore lost and he remains a member of the club.

The meeting now adjourned at 3:45 in the morning.

"Now you are going to hear from me," said Mr. Luse, "and hear from me loud! I've won here before, and I'm going to win again. You have got me stirred up and you are going to hear from me loud!" No doubt. No doubt there will be a nice kettle of fish before all this is relegated to history. But isn't the club a dandy, and doesn't it transact its business in a hustling, fearless way? The bare facts are plenty for the comment.

Mr. Luse was tried under Rule 6, and cannot be tried again. He can be brought before the National Greyhound Club on motion of the members of the American Club or on report of its executive committee, under Rule 42, if memory serves rightly, and the National Greyhound Club could re-try the question of his expulsion. There is talk of this, but nothing definite.

As to the resignations of the other members, people are always talking about resigning from things. Probably not more than one or two resignations will occur. Bless your heart, this is just a pleasant little family matter, and it will all come right in the spring or in the fall. There won't be any international coursing meet here next year, but the American Coursing Club, in name, will be here, the ghost of what it ought to be, to realize at last that it has brought its own troubles on itself by its own shiftless, weak and indecisive policy, and to go at length, when coursing elsewhere has developed in its practice into a sport that is really sportsmanlike, either into a new way of conduct and a better future, or into that oblivion which awaits nerveless dogs, nerveless men and nerveless managements. E. HOUGH.

175 MONROE STREET, Chicago.

## E. F. T. ALL-AGED STAKE LATE ENTRIES.

ENGLISH SETTERS.

NAMKE PHILIP—Namke Kennels' white and orange dog (Roy Monarch—Saddlebags), 1889.

CHITA—Namke Kennels' black and white bitch (Count Howard—Calico).

POINTERS.

PROMOTION—Fairmount Kennels' liver and white dog (Lord Graphic—Belle Bishop), 2 years.

W. A. COSTER, Secy.

*Correction.*—Thorndale, English setter, is owned and entered by Hempstead Farm Kennels, and the pointers Hempstead Duke and Hempstead Comet are also owned and entered by Hempstead Farm Kennels and are by Duke of Hessen out of Lass of Bow. The pointer Sanford Druid was bred by Mr. E. C. Norrish and is owned and entered by Hempstead Farm Kennels.

# DOG CHAT.

### A Kennel Club for Detroit.

The new kennel club recently formed in Detroit, Mich., has a rather peculiar name, but its members evidently mean business. The old Michigan Kennel Club having seemingly died a natural death, the many fanciers of the City of the Straits have for some time had a new organization in view. "The City of the Straits Kennel Club, Limited," is now the name of the new organization, and the first meeting was held Oct. 10, in the office of Mr. E. B. Welton, Mr. Guy Welton being the prime mover. The encouragement given by those attending was so practical that another meeting was called Oct. 17. Several plans of organization were formulated and another meeting held and the name of the club as stated above decided upon. At present the membership includes Harry Shelden, G. M. Hendrie, J. H. Alexander, H. Muir, Dr. G. Nicolai, Chas. Backus, Thos. Blake, C. W. Wolfertz, T. C. Ouelette, A. L. McCrae, Geo. H. Ellis, W. G. Young, A. T. Knowlson, Guy D. Welton, Dr. C. E. Fenton, John Herbertson, A. D. Welton, F. C. Cook, H. Beaumont, E. B. West, W. Genicke, Judge E. Haug, Earnest Mann, Allen Frazer, Charles Thurman, J. W. Garrison, Geo. H. Collins, J. F. Tyler, Jacob Cline and J. H. Ross. Local dog shows are to be held and one good show every year to fall in the circuit after Pittsburg if possible. The club is to be run on business principles, and not altogether on sentiment. The club, if properly managed, is bound to bring Detroit to the front in dog matters, for there are a number of breeders in this city. Among them Harry Shelden, H. Muir, G. M. Hendrie and J. H. Alexander have kennels of fox-terriers, Dr. Nicolai raises noted great Danes, Charles Backus breeds cockers and greyhounds, Thomas Blake revels in cockers and whippets, Irish setters are bred by C. W. Wolfertz, H. Beaumont, Judge Haug, A. D. Welton and J. W. Garrison, T. C. Ouellette, A. T. Knowlson, D. C. E. Fenton, of Essex, and John Herbertson lean toward cocker spaniels, G. H. Ellis, of Windsor, and W. G. Young have greyhounds. G. H. Collins has the St. Louis Gordon Kennels of Gordon setters, J. F. Tyler also breeds Gordon setters and Jacob Cline represents the English setters. The following officers were elected at a meeting held Oct 24: President, George M. Hendrie; First Vice-President, A. L. McCrae; Second Vice-President, H. Muir; Secretary, Guy Welton; Treasurer, C. K. Backus; Directors, Dr. Nicolai, C. W. Wolfertz, A. T. Knowlton, T. E. Ouellette. The club has applied for membership in the American Kennel Club, and if accepted steps will be taken in claiming dates for a show.

### Russian Wolfhounds.

Last week we exclusively mentioned the importation by Mr. James Mortimer of a Russian wolfhound, but we did not know that she was a celebrity. Mr. Mortimer writes us: "I don't know how you manage to get hold of all the news. I intended to have kept my Russian wolfhound importation a secret until the New York show, when I could have shown her fit and well. As the secret is out, I may as well tell you that the bitch was sent me by Mr. Geo. R. Krehl. I saw her at the Kennel Club show, Islington, where she won third prize in a very good class, first and second being won respectively by the Duchess of Newcastle's Lebedka and Zarlada II.; vhc. reserve going to Mr. Huntington's Zerry, hc. to Otlika, another good bitch that had won a medal at St. Petersburg, first Leeds, second Edinburgh, etc. It was generally conceded that Zmeika, the bitch I have imported, should have been second, the Duchess of Newcastle herself volunteering the statement that Zmeika was a better specimen than Zarlada II. Zmeika was bred to the Duchess of Newcastle's Kaissack, Mr. Geo. Krehl selecting the sire. Kaissack is a very powerful and typical dog that has done a great deal of winning, and has a great reputation as a stud dog, which he has in no wise disgraced, for Zmeika gave birth to fourteen puppies (six bitches) on the White Star steamship Cufic. All are doing well with the aid of foster mothers, which I was very fortunate in being able to find. Zmeika is, I think, the largest bitch of her breed that I have seen, and is full of quality. She is also very beautifully marked in head, with white body. The puppies are strong and healthy, and I have every reason to be more than satisfied with my purchase. Zmeika was born in 1890. I have her pedigree, a very swell affair, printed in Russia, but it is all Greek to me." Then he very cruelly adds: "I will bring it in (the pedigree) when I come to town and get you to interpret it." This serves us right for dabbling in the "Psovoi" nomenclature.

### Omaha Bench Show.

Our report and list of awards of the show not having reached us in time must be held over till next week, and perhaps it is just as well, considering the crowded state of our columns this week. The liberal prize list brought some of the best dogs in the country to this far Western city, and of course meeting with little competition, the prize list would read like a repetition of fall shows. In the dispatches we find that Mr. Lewis's Fernwood Bruce, Io, etc., took care of St. Bernards. Mr. Charles E. Bunn's Mastiffs Edric, Sinolan and others scooped up most of the money. Imperator, the Great Dane, was also shown, and Wolverine Kennels had a good kennel of their dogs on hand. The Brighton Kennel (Mr. T. G. Davey's), showed the Omahoys what a good pointer is like with Lady Gay Spanker and others, and Mr. Hyland had Ossining there too. Dr. Dixon's Gordons were in Ben Lewis's team of forty dogs, he winning the handler's prize. W. C. Downing's Benzine was the best English setter. Geo. Bell took on a choice lot of his noted cockers and Fascination won the specials. The Carlowrie Collie Kennels took the lion's share of the collie prizes, and the Ilwiss Kennels of Bulldogs from Chicago had that breed to themselves. Mr. Ballentine's pugs took the money for these dogs. The judges were Mr. John Davidson and Dr. H. M. Cryer. About 325 dogs were exhibited and the club, owing to their liberality, scored a distinct success both in the quality of the dogs and attendance.

### American Coursing Club.

Mr. Hough, in his excellent report of the American Coursing Club's meeting, gives us a very good idea of the worse than weak state the club seems to be in at present. Such weak-kneedness and vacillation will make the club a laughing stock to the coursing world. In horse racing, coursing and kindred sports it is especially imperative that the rules be strictly lived up to and correctly interpreted. If racing has its board of control it would seem as if the coursing element in Great Bend stands very much in need of some such body with the backbone and intelligence to correct existing evils. The consideration of the Pearl of Pekin and Chicopee Lass affair is ludicrous in the extreme and will certainly create a feeling of distrust among right-thinking men. Their action in the Luse expulsion case is reprehensible; if expulsion is too severe (?) there should be some punishment meted out to a man who will thus falsely seek to get the better of his fellows who are sportsmen. The East was well represented by Mr. J. Herbert Watson, of Brooklyn, who brought his legal education to bear upon several matters during the meeting, especially in the events of the Luse false entry case and the "Pearl of Pekin incident" farce.

In contra-distinction to the proceedings at Great Bend, it is a pleasure to turn to a review of the Beagle Club trials. There may have been at times a difference of opinion, but judges were always pleased to explain and everything went as smooth as possible, there being no such thing as a kick. The evenings were spent in pleasant conversation in a quiet and orderly manner, a regular love feast, as one of the men remarked. The judges did their work well; at no time did they loiter, but were always intent upon their duties which were arduous in the extreme. All were pleased to see Mr. Dorsey, that old-time beagle breeder and exhibitor win with Lee II., and though he got a knock or two he remarked to us, "They gave me a little of the bitter at first, but the sweet at the end made up for it." There is talk of another field trial being held about Christmas near Boston, a sort of local affair, but we trust it will not be found necessary to create a side club to carry it out. Better have it under the present club rules and all keep together. These little splits often do a great deal of harm, eventually.

### Brooklyn Dog Show.

THE bench show committee of the N. G. C. are fast getting things into shape for their big dog show this month, and indications are that they will have an entry more than large enough to fill the building. The following railroads will carry free those dogs who are accompanied by owner or caretakers on showing identification tickets: N. Y. C. & H. R. R., Erie lines, Central of New Jersey, New York, Ontario & Western, Pennsylvania, Michigan Central, New York, New Haven & Hartford, West Shore, Delaware, Lackawanna & Western, Grand Trunk, Lehigh Valley, Philadelphia & Reading, Baltimore & Ohio and Chesapeake & Ohio, and the express companies will carry dogs at their usual liberal rates—prepaid double rates and free return. They are the Adams, American, Wells, Fargo & Co., New York & Boston Dispatch Co. and Long Island. The National Greyhound Club have made the following additional classes: Class 18A, bloodhounds, challenge dogs and bitches, club medal; 70A, Clumber spaniels, dogs and bitches, $10 and $5; 79A, bulldogs, dogs under 45lbs., $10 and $5; 79B, bulldogs, bitches under 45lbs., $10 and $5; 113A, Irish terriers, puppies, dogs and bitches, $5 and $3. Classes for dogs and bitches will be subdivided when five of each sex are entered. All great Dane specials, excepting those offered by the N. G. C., are for club members only. Two challenge classes have also been made for this breed. A number of additional specials have come in but space is too precious to give them in full this week.

### Hamilton Local Dog Show.

That Hamilton is a progressively "dogly" town has been patent to all for some time. Their latest venture shows that without outside aid they can hold a very respectable exhibition. The gathering of local dogs on the evening of Oct. 24 at the Palace Rink, Hamilton, was held under the auspices of the Hamilton Kennel Club, of which Alderman A. D. Stewart is the secretary. Confined strictly to local dogs the entry of 148 is a gentle reminder of what the club could have done had they held a regular show this fall with proper inducements in the way of money prizes. Local men, members of the club, officiated as judges, their special idiosyncrasies being in most cases considered in governing their choice. The following is the list: Bedlington and black and tan terriers, Mr. Andrew Murdoch; boarhounds, wolfhounds and whippets, Mr. R. B. Harris; fox-terriers, Dr. Griffin; collies and St. Bernards, Mr. E. R. Close; spaniels and pugs, Mr. W. B. Palmer; Yorkshire and toy terriers and King Charles spaniels, Mr. John Hackett; great Danes, Newfoundlands and Dalmatians, Mr. A. D. Stewart; harriers and foxhounds, Messrs. E. Tinsley and Wm. McDonald; mastiffs and Dandie Dinmonts, Mr. H. P. Breay; fox-terriers, Mr. J. W. Morden; setters and pointers, Mr. E. Tinsley; greyhounds, Messrs. A. Murdoch and Wm. McDonald. We are sorry that space this week forbids our giving the full list of awards, and in view of the local aspect of the affair it is scarcely necessary. In spaniels there were 32 entries, chiefly cockers. Greyhounds also showed a good entry, and of course among the 22 fox-terriers some well known dogs were found. Foxhounds, St. Bernards and toy terriers were next in order of numbers, the other breds having as a rule about one or two entries each. The H. K. C. continues to do good work, and during the two years in which it has been in existence it has done much to foster the breeding of good dogs. The officers of the club are to be congratulated on the results of their efforts in this direction.

### An Important Decision.

The Court of Appeals affirmed judgment Oct. 25, in the case of George B. Gallup, appellant vs. August Belmont and others. This was an action brought against the defendants, the officers of the American Kennel Club, for alleged libels published in the *Kennel Gazette*. It will be remembered the articles complained of alleged that in September, 1889, the advisory committee of the A. K. C. ordered the suspension of the Albany Club for the nonpayment of the prizes awarded by it at its bench show, held in March, 1889, and that, no official notice having reached the office of the American Kennel Club, all the officers of the Albany Kennel Club, of whom plaintiff was one, had been suspended. The general term sustained the demurrer upon the ground that such publications were not libellous on their face and were not calculated to injure the plaintiff in his character. Thus ends another chapter of the suspension troubles.

### Suffolk Coronet.

Mr. A. D. Stewart, with that restless spirit with which he is imbued, felt that he could not rest content, for a time at least, until he secured a monopoly of the stud fox-terriers in his township. Suffolk Coronet, owned by Mr. J. W. Morden, was a big thorn in the way, therefore it was plucked and now is an inmate of the Bonally Kennel. Mr. Morden writes us that the dog has been very successful, but this stud business took up a good deal of valuable time, and he decided to let Alderman Stewart have his way for a year or two. Suffolk Coronet was originally Blemton Coronet, and did some winning both in Mr. Belmont's and Mr. Mortimer's hands, but since he has been in Canada he has attended strictly to his home duties and has not been seen in public till last week's local show.

In speaking of the Hamilton show we are reminded of a letter appearing in a contemporary signed "Sunshine," in which the writer questions our remarks regarding certain handlers taking their dogs to Ottawa in preference to Rochester. For the information of this bright individual we might as well say that on the boat coming from Kingston to Cape Vincent this very subject was brought up and no other than Ben Lewis, in the presence of Messrs. Spracklin, Teg, Thomas and others, counted up the dogs they would have taken to Rochester had not the unfortunate conduct of the Rochester people caused the abandonment of the Hamilton show. If "Sunshine" wishes more light on the subject he is at liberty to appeal to those named for further indorsement of what we said.

Major J. M. Taylor's new book containing records of all field trials and bench show dogs, and "men" too, will be ready, he tells us, by Saturday. We have seen an advance volume, and it is quite handsome in appearance. It contains a record of all that happened in the field trial and bench show world in America from 1874 to 1891 inclusive. Pictures of a number of the principal sportsmen, field dogs and bench show winners are given. In the records of field trials, etc., he gives ownership, name of dog, sire, dam, color, breed, prize won and handlers of all field trial winners. The handlers' records alone required three months work in investigating, and is interesting reading. All beagle trials, collie trials, and coursing meetings are also recorded. Then there is an alphabetical list of all sires of field trial winners, and also of all the dams of field trial winners, and this alone is invaluable to breeders Lists of officers and standards of all specialty clubs are given, also a list of all the bench show records of winning dogs, judges names, etc.: in fact the record data is bewildering in its completeness, and we can only afford to merely speak of a tithe of the records which have taken the Major about two years steady labor to complete. There are over two hundred illustrations, and the book will prove invaluable to both field men and exhibitors. The price will be $5, and, considering the amount of information given, that cannot be gained from any other source, the price is little enough.

An exciting wolf chase took place at Wallace, Neb., Oct. 23. Twenty-five greyhounds were used in the fun. Wolves were plentiful, but the intention was not to kill them. So after the dogs had run one down in a two-mile chase, the hunters jumped from their horses and pulling the dogs off secured the wolf and put it in a cart. Another wolf was bagged in the same way, and the rest getting scared it was difficult to sight another. Then the 'trail hounds," whatever these are, were brought up, and some good sport ensued, interfered in somewhat by the numerous wire fences. This is sport with a smack of danger in it, but anything else seems tame to the Westerner.

The Eikridge Hunt Club, of Baltimore, Md., ran a drag at Catonsville, Oct. 26. They have a new pack of English hounds, thirteen in number, and an English whip, who accompanied the hounds over. Mr. Alex. Brown is the master. The ground was very dry, but the hounds gave a good account of themselves—doan't cher know.

A special show of dogs will be held in Toronto, January or February next, to determine which dogs shall represent Canada at the World's Fair show. A commission of five, to be appointed by the C. K. C., will make the selection. The Minister of Agriculture has authorized Prof. Saunders to assist the club financially in making arrangements for the show.

In presenting the pictures of dogs and members of the Beagle Club in this week's issue we are reminded that credit is due to the *Illustrated Sporting and Dramatic News* for the spirited sketch of beaglehunting in England, published in FOREST AND STREAM of Oct. 20, which proved of great interest to those present at Nanuet last week.

The Mitchell Kennel Association, of Mitchell, S. D., held a grand coursing meeting Nov. 2 and 3, and hung up valuable cash prizes to be competed for by the thirty or more greyhounds entered. Arthur Massey, of Great Bend, Kas., officiated as judge at the meeting. A valuable silver cup, donated by the association was offered in the consolation race. This is the first meeting of the kind held in the State.

The owner of Ocean View Park, San Francisco, Cal., is trying to arrange an international match with Australian dogs and an all-American match with crack dogs of the Eastern States. The latter arrangements will be made in a week or two. Members of the American Club are expected to bring thirty-two of their crack dogs. The match will be a sixty-four dog stake—California against the pick of the East. Mr. Canavan offers a good inducement for the Eastern men to come there. He will pay all entrance fees for the thirty-two dogs, all expenses of dogs and horses used in training, and of the men sent with the dogs, and beside this will give a $100 cup, together with a stake of $1,280 in cash. The first prize will be $640 cash and the $100 cup, second prize $320, and third and fourth prizes $160 each. It will be the greatest coursing event known in California, and will probably take place about Thanksgiving.

A meeting of the New England Field Trial Club will be held at the Town Hall, Assonet, Mass., Monday, Nov. 7, at 9 P. M.

A meeting of the field trial committee of the National Beagle Club was held on Wednesday night to consider the question as to whether the only remaining entry, B. S. Turpin's Clyde, should be allowed to fill in class C. It was moved and seconded that the single entry should be allowed to fill and run the allotted time before the judges, and merit of dog be left in the hands of the judges, and pool divided according to Rule 1, *i. e.*, forty per cent. of entire pool to go to first of class. This was the only fair way to treat Mr. Turpin's entry, as it would have been manifestly unfair to bar his dog unless the prize carried some condition as to the number of dogs entering before the stake could be run.

Mr. W. W. Bainbridge has purchased the pointer Nick C. (champion Nick of Naso—Nellie) and the pointer Fedora (champion Graphic—King Bow's Dawn); also the St. Bernard Beauty II., a granddaughter of champion Duke of Leeds, by Plato ex Wanda.

We are sorry to hear that Mr. Child's Tony Weller was shot by some miscreant after the dog's return from the beagle trials. It is hardly possible Tony will recover, as his spine is injured.

We have received the Seminole Kennels' new catalogue, and it is replete with notices of good things in the way of collies, Irish setters and pugs. Each noted dog in the kennel is described, and on nearly every page is a half-tone of one or other of their celebrated dogs. The catalogue is a further proof that this large kennel means to stay in it and keep as near the top as possible, and we wish their owner every success.

Mr. C. S. Hanks has secured T. W. Turner to manage his kennels at Seacroft, Mass. Mr. Turner was for several years head kennelman to Mr. H. W. Cooper, Ashburne, Derbyshire, Eng., and has dabbled in fox-terriers quite a good deal.

At a meeting of the Irish Setter Club, held Oct. 24, at Glenside, Pa., Messrs. Ray Tompkins, Elmira, N. Y., and Arthur R. Sharp, Taunton, Mass., were elected members. Advertising bills amounting to $39 were ordered paid.

## ROD AND GUN AND CAMERA.

As a recognition of the important place of amateur photography in its relation to sports of the field and prairie and mountain and forest and stream, the FOREST AND STREAM offers a series of prizes for meritorious work with the camera. The conditions under which these prizes will be given are in brief as here set forth:

There will be ten prizes, as follows: First $25. Second $20 Third $15. Fourth $10. Six of $5 each.

The competition will be open to amateurs only.

The subjects must relate to FOREST AND STREAM'S field—game and fish (alive or dead), shooting and fishing, the camp, campers and camp life, sportsman travel by land or water.

There is no restriction as to the time when the pictures may have been or may be made—whether in 1892 or in previous years.

Pictures will be received up to Dec. 31, of this year.

All work must be original; that is to say, it must not have been submitted in any other competition, nor have been published.

There are no restrictions as to make or style of camera, nor as to size of plate.

A competitor need not be a subscriber of FOREST AND STREAM.

All photographs will be submitted to a committee, shortly to be announced. In making their awards the judges will be instructed to take into consideration the technical merits of the work as a photograph, its artistic qualities; and other things being equal, the unique and difficult nature of the subject.

Photographs must be marked only with initials or a pseudonym for identification. With each photograph should be given name of sender, title of view, locality, date, and name of camera.

The photographs shall be the property of the FOREST AND STREAM. This applies only to the particular prints sent us.

From time to time we shall reproduce by the half-tone process samples of the work submitted, and should the interest in FOREST AND STREAM'S Amateur Photography Collection prove to be what is anticipated, we may ask for an expression of opinion by a vote of all our readers after the manner of the successful and famous "Camp-Fire Flickering Vote." Such popular vote will be quite distinct from the award by the committee.

### He was Surprised, but We are Not.

NEW YORK, Oct. 27, 1892.

*Forest and Stream Publishing Co.:*

DEAR SIRS—When I was first asked to advertise in FOREST AND STREAM, the suggestion struck me unfavorably, for I thought that yours was a class paper and would be of little use to my business. However, I was at last persuaded to give you a trial for a short time, and I have been greatly surprised at the results received from this advertisement. It has been running now three weeks, and I can say without exaggeration that I never used a medium for advertising which brought me such large returns in so short a time, and at so trifling a cost. I congratulate your company and myself on these good results. Yours very truly

ALFRED J. CAMMEYER.

# Yachting.

THE reply of the Cup committee to Lord Dunraven, as read at the meeting of the New York Y. C., contains little of moment other than the quoting of the very peculiar resolution passed at the previous meeting of the club, "That while the trust deed obliges the club having the custody of the cup to accept the conditions therein prescribed, if so elected by the challenger, as it also permits such club to accept any conditions mutually agreed on, this club regards any further understandings or agreements as unnecessary, and will make no agreement that, in the event of becoming a challenger, it will adopt said terms in its challenge."

As a specimen of "English as she is wrote," this sentence is worthy of a place in the new deed itself; it would be a difficult matter to frame the same number of words into a more indirect or round-about answer to a plain question.

The first two clauses amount to nothing, and might well have been omitted; the final clause simply means that the club does not consider it necessary to discuss the prime question of the legality of the new deed. Whether Lord Dunraven and his prospective backer will also consider such a condition as unnecessary before challenging, remains to be seen.

APROPOS of the measurement discussion, Lord Dunraven makes the following suggestion in the *Field*:

SIR—Though the arguments anent measurement for rating are, I think, proceeding on false premises, namely, that the present rule produces an undesirable type, a change in our rule appears imminent. Would it be possible, before recasting the rule, for the council of the Yacht Racing Association to approach our American cousins with a view of ascertaining whether an interchange of opinions would be likely to result in the adoption of a uniform system in both countries? Such a consummation is so devoutely to be wished that the possibility of attainment would fully justify the continuance of our present rule for a reasonable time. DUNRAVEN.

There is probably no good reason why a system of measurement which is applicable in one country should not be equally good in another, and the advantages of a common system of measurement between at least the United States and Great Britain are too clear to call for proof. It would mark a great advance in yachting if the next change of rule by either side could be made in conjunction with the other, giving one common rule for both nations.

THE comments of the Boston *Herald* on the deed of gift are rather vague this week; in fact, it goes so far as to term that important document a "deal." Of course it still declines to discuss the issue of the legality of the new deed, and of the manner in which it was adopted, the sole allusion to this matter being as follows: "About the secrecy business of five years ago, the late Philip (?) Schuyler had the terms of the new deed two days in his possession, and carefully went over all of its clauses, and returned it to the members of the New York Yacht Club." Every one knows that the new deed was submitted by the committee to Mr. George L. Schuyler; our point, which the *Herald* as usual dodges, is that it was not submitted in any way to the members of the New York Yacht Club until it had been finally executed.

THE most remarkable statement in Mr. Smith's semi-official defense of the New York Y. C. is the following: "If he [Lord Dunraven] wins the cup we do not require of him that it should be held under the deed of gift. He can hold it to be challenged for, subject to the conditions under which he won it, or he can be even more liberal if he so elects." Directly opposed to this positive statement of a member of the Cup committee is the equally positive statement of another member, Gen. Paine, that "This challenge is under the new deed of gift." With these two statements before him it is not strange that the meaning of it all is not clear to Lord Dunraven, or even that charges of quibbling and equivocation are made by the opponents of the club.

THE representative of the Boston *Herald* has visited Bristol and returned with the interesting information that the mast of the Carroll 84-footer is to be made from a 22in. stick. From this valuable data he proceeds to evolve the various details of the new boat. His statement that the boat is to be built *à la* Thistle, concealed from all save designer and workmen, we cannot credit, as such methods are entirely un-American. Locked doors and soaped windows may be the proper thing on the Clyde, but no American builder would descend to such tricks.

IT is not to be wondered at that, as Lord Dunraven says, the meaning of this clause is not clear to him; but its practical operation is well understood on this side. In the event of his winning the races the America's Cup will not be delivered to him until he has signed a paper acknowledging the new deed as the only valid instrument under which the Cup can be raced for. All the verbosity and circumlocution in the world cannot change this plain fact.

## New York Y. C.

THE regular October meeting of the New York Y. C. was held on Oct. 27 with Com. Gerry in the chair.

The following members were elected as a nominating committee for the next board of officers: Lloyd Phoenix, Ralph N. Ellis, Archibald Rogers, Robert Center, W. P. Douglass, W. E. Iselin, E. M. Paddock, J. R. Platt, E. E. Chase, and H. C. Ward.

The following members were elected: F. de Funiak, Dr. S. H. Dickson, Lieut. B. H. Buckingham, Nathaniel Reynal, Nathan Seeley, Alfred Hooper, T. R. Hostetter, Lieut. J. P. Wilson, Horace P. Hutchins, T. Henry Mason, Joseph Decker, A. E. Tower, and Roland S. Pettit.

The letter sent by the Cup Committee to Lord Dunraven was read, being as follows:

NEW YORK, Oct. 20, 1892.

*My Lord:* Your letter of the 16th of September was submitted to the New York Yacht Club at a meeting held Oct. 18. The club appointed a committee of five, with power to arrange a match for the America's Cup with any qualified yacht club upon the terms of the "new deed of gift," with the exception that no dimension except the length of the load waterline need be given by the challenger, and the addition that neither yacht shall exceed by more than 2 per cent. the length upon the load waterline named by the challenger, and any excess over the length upon the load waterline named by the challenger on the part of either yacht shall be counted double in calculating time allowance; provided that no yacht of the specified rig either now existing or under construction, and known to be available for the use of this club in defending the cup, shall be barred or penalized.

This committee cannot, of course, say what yachts excepted by the above proviso exceed by 2 per cent. the load-water line of your vessel until they are informed of the intended length.

We note that the above terms seem to infer the time allowance of the New York Yacht Club, which we therefore consider part of the proposition.

We would further add that as to the details of sailing the match alluded to in your letter, we think they can be easily arranged after a challenge has been made in the proper form by a qualified yacht club.

Regarding your Lordship's proposition that "it is to be understood and agreed that should I win the cup the club obtaining the custody of it shall hold it open to a challenge on the same conditions as those under which I challenged," we are instructed by the New York Yacht Club to reply "that while the trust deed obliges the club having the custody of the cup to accept the conditions therein prescribed if so elected by the challenger, as it also permits such club to accept any conditions mutually agreed on, this club regards any further understandings or agreements as unnecessary, and will make no agreement that in the event of becoming a challenger it will adopt said terms in its challenge."

This committee heartily concurs with your Lordship in expressing the hope that next year may be productive of a most interesting international contest.

I have the honor to remain, very respectfully,

CHARLES J. PAINE, Chairman.

## Lord Dunraven and the New Deed.

THE following lengthy interview with Lord Dunraven was cabled to New York by the Associated Press on Monday:

LONDON, Oct. 30.—Lord Dunraven has given to the Associated Press, in an interview, a statement of his position in connection with the challenge he recently sent to the New York Y. C. for a race for the America's cup.

Since he returned to London last week Lord Dunraven has refused to discuss the challenge, but in view of the apparent hitch in the negotiations he consented before departing for Scotland last evening to explain his position.

Being asked, "Are the chances for a race good?" he replied:

"I cannot possibly tell. I hope so, but a definite opinion is impossible until I hear further from the New York committee. Judging from what I have seen in the American press, I greatly fear the chances are doubtful; but—excuse my saying so—I do not attach much importance in such cases to newspaper gossip."

"To what do you especially allude?" Lord Dunraven was asked.

"A New York paper of Oct. 20 states that the New York Y. C. had voted that 'while the deed of trust obliges the club having the custody of the cup to accept the conditions therein prescribed, if so elected by the challenger, as it also permits such club to accept any conditions mutually agreed upon this club regards any further understandings or agreements as unnecessary, and will make no agreement that, in the event of it becoming a challenger, it will adopt such terms in its challenge.'"

"The meaning of this is not clear to me," continued Lord Dunraven. "If it means that the club declines, should it become the challenger, to bind itself absolutely to observe the conditions of my challenge, I quite agree and resolve never to think of asking them so to do. If it means that the club through which I challenge, in the event of my winning, must hold the cup under the full terms of the new deed of gift, then we are no further forward than we were in the case of the Valkyrie, and this projected race will also break down."

"Must that obviously be the meaning of the resolve?"

"No, not obviously, but I admit that it looks like it. The New York club must have known that it would be useless to revert to the position which broke up the Valkyrie match, and would have simply declined my challenge."

"But if under the new deed of gift your challenge can be accepted and you are at liberty to accept a similar challenge, are not all of your wants fulfilled?"

"Certainly not. For simplicity's sake I will confine my objections to the dimensions clause, and for the sake of argument will assume that I am challenging the representative opinion of yachtsmen and yacht clubs here. When the Royal Yacht Squadron in 1887 stated that the new deed would be fatal to international racing it spoke for us all. Opinions have not changed. I am perfectly certain that no challenge will issue from us according to the terms of that deed."

"It is true the deed contains a clause permitting the challenger and the challenged mutually to arrange the dates, the courses and other conditions, and also to waive the ten months' notice. It is under this permissive clause that the Valkyrie's challenge was accepted. It was pointed out that thereunder the Royal Yacht Squadron, if it won, could accept any challenge it liked. That may or may not be so. The meaning of the donors is a matter for lawyers to decide."

"For myself I say that the fact specially mentioned that ten months' notice may be waived means that the other main rules may not. In any case our position cannot depend upon legal interpretation of the phrase. We object to the deed as unfair in the abstract. I am unwilling to do anything that can be construed as implying that we think it fair in the event that we are challenged.

"Please understand that in my conditional challenge I ask no sort of favor from the New York Yacht Club. I do not ask for conditions which in my humble opinion should govern international races. Taking the deed of gift as a basis, I suggest the smallest possible alteration that I think will make sufficiently fair conditions to all concerned. I challenge under certain conditions. If the New York Club accept, good; but whether it accepts in accordance with or defiance of the deed of gift is no matter to me. But I insist that if I win I not only may but must accept a challenge on the same conditions."

"Of course it does not follow that I can accept a challenge under those conditions only. I do not mean that at all.

"If I win the cup and the New York Club challenges, there is nothing to prevent them from so doing under the terms of the deed if they like. I could not possibly refuse such a challenge. They may furnish me with not only the length on the load-water line, which I consider sufficient, but also with the beam load-water line, and other stipulations of the deed. They may send me a midship section, the length of her lines or the vessel herself if they like. I could not possibly object. On the contrary, I should be exceedingly obliged. My proposal in no way limits the powers of a future challenger. It does not involve any admission on the part of the New York Yacht Club that in their opinion the conditions of the deed of gift is too onerous. Nor will it prevent them, as possible future challengers, from giving practical proof of their faith by giving in their challenge all dimensions mentioned in the deed. I only insist that it be perfectly clear that I hold the cup on the same terms under which I challenged, and that in no way sanction rules which as applied against myself, I consider unfair."

"But would you not be practically annulling the deed of gift?"

"I think not only—putting it partially in abeyance. The opinion is freely expressed here—and I think not here only—that Mr. Schuyler had no legal right whatever to agree to the new deed, and that the cup is legally under the old deed. I think that the New York Club might consider the intention of the donors. If the latter meant international challenges to encourage racing, it must be evident to every one that the objects are frustrated by an instrument rendering international racing impossible.

"I confess I do not see any legal difficulty or who would object if the club should amend the deed to enable the club to carry out the donor's intentions. I fail to see how the New York Club can in any way satisfy themselves by agreeing to my proposal. It would be easy to stipulate that the club transmitting my challenge should hold the cup if it wins subject to a precisely similar challenge, provided that it be not thereby debarred from accepting a challenge containing the dimensions provided for in the gift. But such a proviso appears to me totally unnecessary. No club will refuse a challenge because it contains more information than is required."

"Then, if the New York Yacht Club insists that the cup must be held according to the full terms of the deed, does your challenge fail to the ground?"

"Yes, but I cannot believe that the New York Yacht Club contemplates such action, which would be simple reverting to the position that broke the Valkyrie challenge, and is obviously equivalent to meeting the present proposal with a flat *non possumus*."

"Will you, in any case, build a yacht to defend the cup offered by the Royal Victoria Club, for instance?"

"Really, I have no thought about that. I do not know whether it is true that Mr. Carroll has ordered a cutter of the Herreshoffs which he intends to bring here. I hope the report is correct. Unless some one builds, and I see no indication at present to fear Mr. Carroll, I shall not have much sport.

"One cup lies with the Wendur, the other with the Iverna. Without disparagement to my friend Lord Calldon's ship, he might as well sail a Thames barge as the old Wendur against the new Herreshoff. The utmost possible would be got out of the Iverna, but she is not as good as the Thistle. You know what the Volunteer did to the latter. I can guess the fate of the Volunteer with the new Herreshoff. I am afraid the big cutter would have an exciting time. The forties would have a chance in very light weather and that's about all. We are badly situated at present. With a possibility of a change in the rating rules, no one is inclined to build. All the same, I sincerely hope Mr. Carroll will come. He will find all our regattas open to him and he will meet with a very hearty welcome."

As Lord Dunraven was about to depart the reporter asked: "Are you sanguine of success should your challenge for the America's cup be accepted?"

Lord Dunraven replied: "If you mean as sanguine as when I challenged with the Valkyrie, certainly not. I have an immense opinion of Herreshoff's boats. It is probable my antagonist would be designed by him and she will be very hard to beat, but I should like to try conclusions. If the cup could only be placed under regulations fairly satisfactory to both parties, racing for it would be frequent, and in course of time we should bring it here. But it might take time. The big Herreshoff is an unknown quantity at present—to us at any rate."

The last quarterly number of the Proceedings of the United States Naval Institute is devoted entirely to a very full report of the six lectures on "First Aid to the Injured, and the Transportation of the Wounded," delivered last winter by Dr. Henry G. Beyer, Passed Assistant Surgeon U. S. Navy, to the first class of cadets at Annapolis. A large number of good illustrations supplements the text.

## Newspaper Comments.

The New York *Recorder*, which has thus far supported the new deed through thick and thin, deals with the present state of affairs in true Donnybrook Fair fashion—where you see a head, hit it—and in the course of one article contrives to get in a blow at the Royal Yacht Squadron, Dixon Kemp, Lord Dunraven, Mr. Watson, the Seawanhaka Cor. Y. C., and last of all, sad to say, at the New York Y. C. itself, the latter being as follows:

"The New York Yacht Club, in the matter of Lord Dunraven's challenge, has made up its mind to masticate a small dish of crow and try to keep it down. It is not the huge platter of that unsavory bird presented for the delectation of their palates by the Britisher. That in good sooth might have been too much for the premier yacht organization of the Western World to swallow, much less digest, but in the olla-podrida which the club has undertaken to partake of, the flavor of crow—faint, it might be—permeates and predominates like the morsel of garlic in a well made Spanish omelette.

"The New York Yacht Club virtually agreed to give up this objectionable deed of gift for whose provisions it has fought so strenuously three years ago. That was its little dish of crow. I hope it may prove palatable. The situation has not changed in the slightest degree. By its action the club concedes that the document was originally unfair. It admits that it was the work of sea lawyers and not of sportsmen, as the *Field* has always contended. John H. Bird, who drew up the deed, told me that Gen. Paine fully agreed with every word of it, and that it was also approved of by most of the representative yachtsmen of New York and Boston. The opinions of these yachtsmen have undergone a wonderful change in a short time. Kemp has made hosts of converts. He deserves congratulations."

While the *Recorder's* statement of the situation may not be far wide of the truth, no other paper has yet ventured to depict it in such harsh and cruel language. The *Tribune* says: "The pressure of public sentiment and in a measure a change of heart on the part of the members of the New York Y. C. have made another race possible. That faction which would place barriers in the way of an international race has lost its numbers and its prestige. The healthy sporting sentiment of the club has asserted itself and the popular side now is the one which favors making every possible concession if by so doing a race can be brought about and the long deadlock broken. That contingent which two years ago considered it high treason for one to lift his voice against the last deed of gift now fails placidly into line, and each vies with the other in expressions of delight at the concessions made. This change has not been brought about without long and hard work on the part of the better elements of the club and by a general public sentiment which even the New York Y. C. could not wholly ignore. It is high time that the members of the New York Y. C. realized that while the public neither knows nor cares what they do as a club, yet as trustees of the America's cup they hold in trust the honor of American yachtsmen and the maritime pride of the nation, and the public demands, and has a right to demand, a strict accounting. Not so long ago a prominent member of the New York Y. C. said: "I don't see what the newspapers and the people have got to do with the cup anyway. The members of the club are the only ones who have a right to say anything. Such a case as this is of course hopeless, and auger gives place to pity."

## Rights or Concessions?

THE New York papers of Oct. 30, published the following cable:

LONDON, Oct. 29.—The *Field* to-day publishes a very severe arraignment of the New York Yacht Club, brought out by the club's letter to Lord Dunraven regarding a race next year for the America's Cup. The *Field* accuses the club of attempting a confidence trick, and says it is to be hoped that no British yacht club will be found complaisant enough to back a challenge made under the new deed of gift or while the deed is in existence.

Continuing, the *Field* says that the American people should understand that the obstacle to a contest for the America's Cup in American waters is the manner in which certain members of the New York Yacht Club have tempted with the trust confided to them by five American gentlemen since 1857. The club, it adds, was made the trustee for the whole yachting world. The terms of the trust have been so altered that the aims of the donors have been frustrated."

Very naturally this criticism has given offense to the New York Y. C., and has resulted in an interview on the part of the representatives of the various papers with Mr. James D. Smith, one of the older members, an ex-officer of the club, who has taken a prominent part in all past negociations over the cup, and is now on the special committee of five.

In the course of an extended interview, Mr. Smith expresses himself very freely in regard to Mr. Dixon Kemp, at the same time citing the names of previous challengers as fully satisfied with the treatment accorded them by the New York Yacht Club.

The latter portion of the interview is as follows:

"'Since 1851, when the America captured the Cup, up to the present time we have made a variety of concessions to the challenging party under the mutual agreement clause. I may summarize some of them as follows, without regard to chronological order:

"'First—The change from an inside course to an open course.

"'Second—With regard to time allowance, that in the event of a failure to agree there should be no time allowance.

"'Third—Making the races best three in five, with the proviso that in the event of failure to agree upon these terms the possession of the Cup should be settled by one race over the inside course.

"'Fourth—Consenting to have the races sailed over both windward and triangular courses.

"'Fifth—Changing the length of the course.

"'Sixth—Changing the time limit for making the race.

"'Seventh—Waiving the time required under the deed of gift for making a challenge.

"'Eighth—Accepting only load waterline length from a challenger instead of the various dimensions stipulated for under the deed of gift.

"'Ninth—To sail only one yacht against the challenging yacht instead of a fleet, the America having won the Cup against a fleet of British yachts.

"'Tenth—Agreeing to match a yacht not more than 2ft. longer on the load waterline than the challenging boat under the penalty of double time allowance for all excess of length beyond that.'"

This decalogue of favors sounds well to the casual reader, but will not stand a very close analysis.

In the first place, the interpretation of the mutual agreement clause which the club is now insisting on is the strongest possible condemnation of its course in the past in refusing to make any agreement with challengers, and forcing one yacht to sail against the fleet, in granting one race only, in insisting on a course notoriously unfair to the deeper vessels of the challengers, and in declining a mutual agreement as to size of defender and challenger. So far from being concessions, the club has exacted the most onerous conditions, only abandoning them one by one as it has been compelled by public opinion.

The restrictions as to dimensions were never in the original deed, but were made by the club, and have only been abandoned within the past two weeks in order to induce a challenge.

As we understand the recent action of the club, the "no time allowance" clawse, would work to the detriment of the challenger, and not to the benefit, has not been abandoned, but in the event of any late disagreement just priorto a race, the club has still the right to fall back on this clause, and to meet Lord Dunraven with the largest yacht at its disposal, without time allowance. This point, like most of the others in the new deed, is not very clear, but as we understand it, a disagreement at any time permits the defender to avail himself of the unfair provisions of this clause.

It is a matter of history that the inside course after being condemned for years by many American yachtsmen, was only abandoned when the club realized that the 22ft. draft of Mayflower and Volunteer was more heavily penalized than the 13ft. draft of Genesta and Thistle. Similarly, it was not until the theory of the superior speed of the centerboard boat down wind was exploded and her superiority to windward fully demonstrated that the clause calling for windward starts was thought of.

Many of these matters, like the starting of the fleet against one yacht, are dead issues, and so little to the credit of the New York Y. C. that we have no desire to resurrect them, but when a representative member of the club is so unwise as to dig them up and present them in false guise as evidences of the club's generosity and liberality, it is his fault and not ours if we are forced to expose them.

There is more in the history of the past Cup races to hurt than to help the club, and it will do well to confine all future discussion to the abstract, but most vital question of what conditions constitute a fair match to-day between two yachtsmen. If there is to be any more racing for the America's Cup it must be under conditions which are recognized by both American and foreign clubs as absolutely fair and sportsmanlike to both holder and challenger.

Lawley & Son have nearly finished their 70ft. steamer and have framed the Providence schooner. They are getting out the frames for a catboat for St. Johns, N. B., from a design of Mr. Burgess, and have also ready the design for a 90ft. steam yacht which they may build for Mr. R. E. White.

### Mutual Agreement.

So much has been said about Gen. Paine's discovery of the "mutual agreement" clause which was to smooth away all obstacles and bring about a renewal of racing, that it might well be supposed that there was really something new to it all. On the contrary, a mutual consent was one of the most prominent features of the true deed of 1857, though it has been frequently ignored by the New York Y. C. in treating with challengers. The only difference in this respect between the true and and the new deeds is that in the former the making of a match by mutual consent is considered first, following which are certain conditions which only come into play in the event of a failure to agree. In the new deed, on the contrary, the much vaunted mutual agreement clause is preceded by the dimensions clawse, imperatively compeling a certain mode of procedure, including the sending of the dimensions, before any question of mutual agreement is considered. That under pressure the club is willing to depart temporarily from the method of proceeding which it has laid down, does not prove that this method is neither unjust nor dangerous.

Gen. Paine's interpretation and exaltation of the mutual agreement clause is so directly at variance with the repeated declarations of the club and with its past policy, that it is no wonder that it comes to some of the members with the charm of novelty. When in 1876 the Royal Clyde Y. C. made overtures for a mutual agreement as to size, the New York Y. C. decided that as it built no yachts itself, and could not dictate to owners, it could place no limit on size, and must accept in the trial races any yacht however large owned by a member. This excuse was made for the failure to agree on a common size for defender and challenger.

Again two years later, when Lord Dunraven challenged with a 70-footer, the decision of the club was that its duty, as the custodian of the Cup, compelled it to meet the challenger with the fastest vessel at its disposal, regardless of inequality of size.

Either of these claims, if true in 1887 or 1889, would prevent the club from agreeing to Lord Dunraven's request to-day. That they are as absurd and groundless as we then pronounced them is shown by the present action of the club; in its eagerness to secure a challenge on any terms, both of them are forgotten, and the club practically binds itself to provide a defending yacht which shall not exceed the challenger by more than a small margin, if at all.

The mutual agreement which it has just offered to Lord Dunraven is far more liberal than the one which it refused to consider in the case of the Royal Clyde Y. C. The sad part of the matter is that after such a practical condemnation of its course in the past, the club has failed either to delude itself into the idea that it is giving up nothing, or the other party into the opposite idea, that it has conceded everything.

### Michigan Y. C., Special Match.

DETROIT—LAKE ST. CLAIR.

The race of the Michigan Y. C., on Oct. 15, between the three 35-footers Alice Enright, Princess and Josephine, is remarkable from the intense interest which it has created, and the unusual amount of petty squabbling which has accompanied the negotiations from first to last. We clip the following item from a local paper, one of many comments of a similar tenor:

"The usual matinee yachting *conversaziome* began at the Hotel Cadillac yesterday afternoon and continued with a few intermissions up to midnight. Landlord Graves noticed with some dismay the rather spirited session and asked Frank Puddefoot, the café manager, if the boys were training for a Wild West show. If the discussions over the Josephine-Princess-Enright race continue to grow in violence until the day of the race it is hard to see how the time will pass without some one being killed. It is apparently impossible for yachtsmen to discuss the coming event without accompanying violent gesticulations."

The match came about through an offer of the Michigan Y. C. to put up $200, provided the owners of the Enright, Princess, Josephine and Lulu B. would each put up a similar sum, making a purse of $1,000 for a match. The Lulu B. declined, so the club finally agreed to put up $250, each of the remaining three boats to put up the same sum.

As soon as the agreement was made the trouble began. One of the conditions being that no yacht should be over the 35ft. class, and the Princess measuring more than this, her owners, as we have already mentioned, sawed notches in the stem and sternpost for the purpose of evading the measurement. This proceeding naturally created a disturbance, and in addition Josephine entered a technical protest against the Enright on the ground that her forfeit had not been put up at the required time, while the Enright in return refused to consent to a postponement which the Josephine desired to complete her preparations.

The Enright was fitted with lead and steel plate on the lower edge of her board, the Princess was put in shape and prepared for measurement as stated, and the Josephine was hauled up and a lead keel of three tons bolted on, with a steel centerboard working through it. Work was carried on continuously day and night for twelve days, but it finally became evident that the Josephine could not be ready by Saturday, Oct. 15, the date set, and a petition was circulated and widely signed asking for a postponement to Monday, to which, however, the Enright would not consent. The result was that only she and the Princess were at the line on Saturday morning.

The course was ten miles to leeward and return, the day clear and warm, the water smooth and the wind light. At the line was the steam yacht Grace, the judges' boat, having on board, besides the owner and guests, the judges, Com. Joseph Nicholson and Com. Geo. W. Gardner, of Cleveland; Mr. Mills, also acting as a judge; timers, Vice-Com. John A. Heames, Edward Grace and James R. Hayes; director, E. C. Sullivan; the regatta committee, Vincent Field, J. E. Harris and A. L. McLeod; Walter Oades, representing the Alice Enright; Judge William Look, of the Josephine; E. Brady Wendell, of the Princess; Thomas Lynch, C. H. Gale and representatives of the press.

The two yachts were measured in the early morning, the result being:

| | Sail Area. | Sq. Root. | Waterline. | S. L. |
|---|---|---|---|---|
| Enright | 1,754.27 | 41.88 | 34.02 | 37.95 |
| Princess | 2,316.23 | 48.12 | 34.80 | 41.46 |

The start was made at 10:50:30, the yachts being timed:

Enright ... 10 53 56 Princess ... 10 58 26

Both carried spinakers and clubtopsails, the wind being quite light.

The Enright proved the faster down wind, the times at the turn being:

Enright ... 1 23 49 Princess ... 1 30 24

On the wind Princess gained, but failed to pass the Enright, the latter winning by 14s. The full times were:

| | Start. | Finish. | Elapsed. | Corrected. |
|---|---|---|---|---|
| Alice Enright | 10 53 56 | 2 55 44 | 4 01 48 | 3 57 32 |
| Princess | 10 58 26 | 3 00 01 | 4 01 35 | 4 01 35 |

After the race the Josephine's owners secured a lawyer and with his aid served a protest on the stakeholder on the following grounds: That the final deposit on behalf of the Enright was not made to the stakeholder personally, and that when the money was put up the Enright's owners gave notice that it would be withdrawn if the method by which the measurement of the Princess was decreased—cutting notches in the stem and stern at the waterline—was recognized by the regatta committee; that the alterations to the yacht in time for the race were delayed through the death of a workman, which was purely an act of God; and that the Enright was not measured at Schweikart's slip on the morning of the day of the race, as required by the articles.

Meanwhile, the Princess has challenged the Enright for a race for $250 per side, while the Josephine has challenged her for a race for $500 per side; but there is no prospect of another race this year.

## YACHT NEWS NOTES.

The life of the yachting reporter in the West is evidently not entirely one of champagne and truffles, if we may judge from the following extract from a Detroit paper, the incident occurring at the close of the recent Enright-Princess race: "Arriving at the club anchorage the Grace stopped long enough to afford those on board the funniest scene of the day. Two afternoon paper representatives were anxious to reach the M. Y. C. telephone, and when a boat was lowered both tried to get in the bow. This wouldn't do, so one had to go astern, where it appears he did some tall thinking while a boy pulled them in to the float at the club. As the dinghy approached it he climbed over the bow and made a leap. The other reporter had designed his intention and jumped just long enough ahead to cause his rival to light on the absorbant surface of the Detroit River. It was shallow and he was only saturated to the knees, but he grabbed his apparently successful rival by the last leg and brought him to earth with a thud. This gave them an even start, and together they raced for the telephone, spending five minutes looking for it and failing to discover the much-wanted commodity. Finally one proposed they flip and see who was to get first call and it was accepted, the one falling in the river losing. The house man then showed them where the 'phone was and all ended happily.

The latest development in the Alva case was an application to the U. S. Supreme Court on Oct. 18 by counsel for Capt. Morrison for leave to file a petition for a writ of prohibition to prevent Judge Nelson of Massachusetts from proceeding upon the libel filed against Mr. Vanderbilt by the owners of steamship H. S. Dimock. The court was also asked for leave to file a petition for a writ of mandamus requiring Judge Addison Brown of New York to reinstate the suit brought by Morrison against steamship Dimock, William K. Vanderbilt and other persons claiming damages by reason of the collison on Oct. 24. All the justices of the U. S. Supreme Court were present at Washington. The court granted motion and also gave leave to file a petition for a mandamus on the United States district judge for southern New York to compel him to take up the case for trial. The motion was made returnable the second Monday in November.

The annual meeting of the Ohio Y. C. resulted in the election of the following board of officers: Com., John E. Gunckel; Vice Com., J. H. Southard; Rear Com., Henry Tracy; Sec't'y, George W. Stevens; Treas., Frank B. Hartman; Fleet Surgeon, Dr. Woods; Meas., D. Stephens; Fleet Captain, Capt. R. Craig; Directors, J. V. San Fleet, D. W. Strouz, J. W. Boos and F. N. Quale. Com. Gunckel is an old member of the club and an enthusiastic yachtsman. He has long been active in the service of the club, and as its chief officer he is certain to place it in a position of prominence among the lake clubs such as it has never before engaged.

Lawley & Son are making preparations for an important improvement in their basin at City Point, South Boston. The basin will be extended 166ft, to the line of the reserve channel, with a wharf over 12ft. wide enclosing it. Sheer legs for hoisting masts and boilers will be put in, and the entire basin will be dredged. Lawley's is a favorite place for laying up, and the basin is always overcrowded. The firm has always had an enviable reputation for honest work and reasonable prices, and its excellent facilities for work and supplies induce many to lay up and fit out there.

The yachtsmen of Seattle have met with disappointment on the occasion of their first international regatta on Oct. 6. A number of yachts from other places, some from British Columbia, were present, but after waiting for three days the races were abandoned for want of wind; the money collected for prizes being deposited in bank for some future occasion. Great interest is manifested in yachting just now on the coast, and the sport may be considered as permanently established.

The schooner yacht Halcyon, after a career of several years as a smuggler, has lately been seized by the Customs authorities of Victoria, B. C., at the instance of the United States officials, on the charge of entering the waters of a British port in an irregular manner. Her last expedition was an attempt to smuggle ninety Chinese and a large amount of opium into the United States. She is, we believe, the old schooner Halcyon, formerly enrolled in the fleet of the Pacific Y.C., of San Francisco.

We call attention to the steam yacht Sanibel, advertised on another page. She was specially designed for Florida, possessing good accommodations on a very limited draft, and is an excellent yacht for Southern waters. She has made the trip from New York to Florida and back successfully, and gave good satisfaction during a winter's use in Florida.

The volume of "United States and Canadian Yacht Clubs," for 1892, contains a very full list of yacht clubs, officers and club members in mere compact form than the large yacht lists. It is neatly gotten up, with some good photos of yachts and club houses. In the future it will be published by H. P. Gibson, 181 Broadway, New York.

Barbara, 40-footer, is now advertised for sale, and Mr. C. H. W. Foster has in contemplation the construction of a 46ft. fin-keel, the design for which has been made by Mr. W. E. Waterhouse.

At City Island Wood Bros. are preparing to build the 82ft. steamer designed by Mr. Gardner. Nameless, Nemadjy and Pyxie are hauled up side at their yard.

Webber, at New Rochelle, is building a 25-footer from his own design, a centerboard boat of 3ft. draft.

Alcæa, schr., has had her channels removed and will dispense entirely with the main, while the fore will be reduced to half their width.

## Rifle Range and Gallery.

### Hudson Rifle Club Tournament.

The fourth annual prize shooting festival of the Hudson Rifle Club was held at 35 Giles avenue, Marion, N. J., Oct. 25, 26 and 27. The festival was the most successful, satisfactory and finely conducted affair the Hudsons have ever held, and everything was quietly and skilfully operated. Tuesday evening was devoted mostly to the members shooting on the "Target of Honor," and the ring target was rather slow in making scores. Dr. Goode and Messrs. A. and G. Plog were among the guests present on that evening.

Wednesday evening opened more lively than the previous night and it was then the fun began, as there was a large attendance of friends and guests of the members, who tried their hand at the pasteboard "just for the fun of the thing."

At 10 o'clock on this evening the "Target of Honor" closed, and at 11 P. M., under the supervision of Col. Middleton and Senator Evans, the club's reliables, announced that the Target of Honor prizes were ready for distribution according to each man's score, beginning with the highest. The following comprises names, scores and prizes: 1st, J. Rebhan 68, six kegs of lager. 2d, M. Hoff 66, gold medal, two hams and $1. 3d, A. Matz 66, one-half gallon extract of vanilla and $2.50. 4th, H. L. Hansen 65, barrel flour and $1. 5th, J. Smith 64, two magnificent pictures and frames presented by Messrs. Schoverling, Daly & Gales, N. Y. 6th, Thos. A. Reynolds 64, one ton of coal. 7th, Chas. Staderman 59, handsome basket of flowers. 8th, Chas. K. Bird 58, one ton of coal. 9th, W. Murseh1 56, barrel of flour and $1. 10th, H. E. Boddey 53, barrel of flour and $1. 11th. J. J. Evans 52, one case wine, order for a hunter's cap and $1 cash. 12th, A. Heidorf 45, one box soap and $2. 13th, J. Buch 37, one pair shoes and knife. 14th, B. Theil 36, box cigars, picture and $1. 15th, S. Middleton 35, gallon of whiskey and a ham. 16th, H. Hahlenbrock 29, one ton of coal. 17th, C. Schleimacher 17, shaving set and knife.

It can well be said that the boys will have plenty to keep them alive and warm during the winter months, as the prizes were all of a useful or ornamental nature, and great credit was given to the two gentlemen who arranged the distribution, and all were well pleased and satisfied.

Thursday evening was the most exciting and interesting during the tournament. Hardly had the lights been lit, when Messrs. Dorrler, Ross and Holges, of the Zettler, and Messrs. Rosenbaum and Zettler, Jr., of the Empire rifle clubs, of New York, arrived and were ready for action. Mr. J. J. McBride, of the Hill, was also early on the grounds.

After the usual "blow off" my gun business had been attended to by the New York delegation, shooting commenced in earnest. M. Dorrler led with 72. 72 closely followed by W. Rosenbaum's 71, 72, and H. Holges' 71, 71. While the others were looking for the high honors Mr. Dorrler contented himself by resting, but Michael had not long to rest, as little "Rosey" landed a 74 which did not at all suit him; so crack, crack went the rifle, and before long a full score of 75 and 73 was made by Dorrler. Then Messrs. Zettler and Holges started to even up with "Rosey" and Dorrler, but with poor success, as luck seemed to be against both of these gentlemen; and about this time Mr. Ross, who had been so quiet in and for a time the markers had plenty to occupy their time.

Later in the evening the dear "Birdie" Vogel, of the Miller Rifle Club, and Mr. McCoy, of New York, arrived, but neither of these gentlemen were able to get the worm Dorrler had secured.

J. Rebhan and A. Malz took a few hits at the targets, but did not benefit their previous scores very much. The attendance during the evening was very large, and a great many friends dropped in and enjoyed the excitement, among them being noticed Messrs. Trainor and McCoy, G. W. Morgan, W. B. Simmons, J. Reynolds, O. Segar, Dr. Goode, T. T. Reynolds, A. Plog, G. Plog, Capt. Reinhardt, Palisade, R. C., and others. After the close of the shoot a grand collation was served by the club, and if any one went away hungry it was because they could not enjoy good "sole leather" and "Jersey" lightning, as there was an abundance of everything and from the general expression everybody was well pleased.

The prizes on the ring target were distributed by Capt. Hansen and Secretary Bird, after which three rousing cheers were given and all retired, leaving the headquarters in darkness and having enjoyed a good evening. The following scores were made on German ring target, three shots, possible 75:

| | | | |
|---|---|---|---|
| M Dorrler | 75 73—148 | L Vogel | 70 70—140 |
| W Rosenbaum | 74 72—146 | C Zettler, Jr | 69 69—138 |
| H Holges | 73 72—145 | H Hansen | 68 68—136 |
| J Rebhan | 74 71—145 | M McCoy | 66 62—128 |
| F Ross | 72 72—144 | C E Bird | 59 57—116 |
| A Malz | 73 70—143 | J J Evans | 55 54—109 |

Before the close of the shoot "Birdie" Vogel offered to challenge M. Dorrler to shoot a 100 shot match, open sight rifles, 200yds., on Sunday, Nov. 5, and it is a question whether "Birdie" has as much backbone to meet his opponent as he has of wind. One thing is certain, that his fate is doomed if he appears for the match, and several H. R. C. members have already offered big odds on Dorrler.

The Eagle.

The officers and members of the H. R. C. offer their heartfelt sympathies to Mr. John Coppersmith, of Newark, N. J., for the loss of one near and dear to him and his family.—C. E. Bird, Sec'y.

### Rifle Shooting Under Difficulties.

Just imagine a wind that varies at short intervals from fifteen to thirty-five miles an hour and switches like a flash anywhere from "4" to "12" o'clock and you have an inkling of the conditions under which was held last Saturday's practice of the First Brigade Rifle Association at the Newark Shooting Park. The writer has shot over these ranges in all kinds of weather for a number of years, but never has he seen such a baffling wind as that of Saturday. Using the Frankford ammunition (45-55-405), the members of the party were obliged at times to use from 1½ to 1¾ points of wind on the "Buffington," and even this proved insufficient when an extra blast caught the bullet. Had the party been shooting on an open range such as Sea Girt or Creedmoor, they would have been unable to "keep on" to a 4×6 target, or even to hold a rifle to the shoulder in some of the gusts. Only three members reported and those who remained away were fortunate.

The scores made were as follows:

| | | | | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|
| Major D L Wallace | 4 | 4 | 4 | 4 | 4 | 4 | 4 | 4 | 4 | 4—40 |
| | 4 | 4 | 4 | 4 | 4 | 4 | 4 | 4 | 4 | 5—41 |
| | 4 | 4 | 4 | 4 | 0 | 4 | 3 | 4 | 3 | 4—34 |
| | 5 | 3 | 4 | 4 | 4 | 4 | 3 | 4 | 4 | 4—39 |
| | 4 | 4 | 4 | 4 | 4 | 4 | 5 | 5 | 4 | 4—42 |
| Captain W H Howard | 4 | 4 | 4 | 4 | 4 | 3 | 4 | 4 | 5 | 3—39 |
| | 4 | 4 | 4 | 5 | 4 | 4 | 8 | 4 | 4 | 4—40 |
| Private C H Townsend | 4 | 4 | 4 | 4 | 4 | 4 | 4 | 4 | 4 | 4—40 |
| | 4 | 4 | 4 | 4 | 4 | 0 | 4 | 4 | 4 | 3—35 |
| | 3 | 5 | 4 | 4 | 4 | 5 | 5 | 4 | 4 | 8—41 |
| | 4 | 3 | 4 | 4 | 5 | 5 | 4 | 5 | 4 | 4—42 |
| | 4 | 5 | 5 | 4 | 4 | 4 | 4 | 4 | 4 | 4—42 |

The association will shoot at the above range every Saturday afternoon until further notice. The association is gaining strength right along and its organizers intend if possible to secure as members, every member and officer of the First Brigade, N. G., N. J., who is interested in the development of skill in the use of the State arm, with a view to securing increased facilities for practice. The only place at this time where the State troops can shoot is at Sea Girt, fifty miles away from any command in the brigade. The brigade needs one or more ranges for its own use and if the above association gets proper support from the shooting men, both officers, non-com's and enlisted men, it will be able to secure such ranges. Within a few months the association will begin to practice on the 33yd. range in the armory where they will devote their attention to shooting from the prone as well as the standing position.

### Cincinnati Rifle Association.

Cincinnati, O., Oct. 23.—The Cincinnati Rifle Association held its regular practice shoot at its range to-day and made the scores as appended below. Conditions, 200yds. off-hand, Standard American target:

| | | | | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|
| Gindele | 10 | 9 | 6 | 6 | 10 | 9 | 8 | 7 | 7 | 9—81 |
| | 5 | 9 | 7 | 9 | 9 | 8 | 8 | 8 | 10 | 8—82 |
| | 8 | 9 | 8 | 10 | 10 | 9 | 10 | 9 | 7 | 10—90 |
| Weinheimer | 6 | 7 | 3 | 9 | 7 | 5 | 5 | 8 | 9 | 10—71 |
| | 7 | 6 | 9 | 7 | 7 | 9 | 4 | 5 | 7 | 8—69 |
| | 5 | 10 | 3 | 6 | 8 | 6 | 5 | 10 | 9 | 7—69 |
| Payne | 8 | 8 | 10 | 6 | 6 | 8 | 10 | 5 | 10 | 9—80 |
| | 10 | 9 | 7 | 7 | 8 | 8 | 8 | 10 | 7 | 10—84 |
| | 8 | 7 | 8 | 10 | 8 | 8 | 8 | 5 | 7 | 9—76 |
| Hauck | 5 | 9 | 8 | 6 | 7 | 9 | 8 | 8 | 10 | 5—74 |
| | 8 | 7 | 7 | 6 | 7 | 3 | 6 | 4 | 5 | 7—59 |
| | 3 | 5 | 5 | 4 | 4 | 8 | 9 | 8 | 6 | 5—58 |

| | 6 | 6 | 5 | 8 | 8 | 7 | 6 | 6 | 5 | 6—67 |
| | 0 | 9 | 6 | 5 | 7 | 10 | 5 | 6 | 6 | 6—69 |
| Stegner | 8 | 7 | 9 | 5 | 8 | 5 | 10 | 6 | 5 | 5—66 |
| | 3 | 6 | 6 | 4 | 5 | 8 | 4 | 8 | 10 | 7—61 |
| | 9 | 7 | 6 | 10 | 7 | 8 | 9 | 10 | 6 | 6—78 |
| Topf | 8 | 9 | 8 | 4 | 5 | 7 | 5 | 6 | 8 | 8—68 |
| | 7 | 6 | 6 | 7 | 7 | 10 | 5 | 9 | 0 | 9—67 |
| | 6 | 10 | 3 | 5 | 5 | 7 | 5 | 5 | 9 | 8—66 |
| Simon | 10 | 7 | 5 | 9 | 6 | 4 | 6 | 9 | 10 | 10—76 |
| | 7 | 6 | 0 | 3 | 10 | 9 | 9 | 6 | 5 | 8—76 |
| | 7 | 3 | 10 | 4 | 5 | 8 | 6 | 7 | 9 | 9—73 |
| Drube | 9 | 7 | 6 | 10 | 9 | 10 | 10 | 6 | 8 | 7—79 |
| | 8 | 7 | 4 | 7 | 6 | 7 | 8 | 6 | 10 | 7—70 |
| | 8 | 6 | 5 | 10 | 7 | 8 | 5 | 7 | 5 | 8—70 |

### Belleville (Ill.) Sharpshooters.

Oct. 16, which was the day set for the fall festival by the Belleville Sharpshooters, could not have been a more pleasant day than it proved to be. The morning train which arrived from St. Louis brought a carload of shooters, and after forming in line they were escorted by the Belleville band to the Shooting Park. Then the fun commenced, and there was no cessation until 5 o'clock, when the targets were rung down. After the award of prizes by their genial president, Mr. D. Schneidewind, the visitors left for home on the evening train with the usual remark, "We always have a good time when we go to Belleville."

Man target: W. Bauer 93 points; Chas. Baptie 88, V. Rapp 88, F. Kurka 88, J. Molles 87, M. Kacer 86, J. Wiget 84, D. Schneidewind 84, S. G. Dorman 83, J. Steffen 83, C. K. Dunkerly 83, L. Priester 78, H. Vogel 77, R. Bethman 77.

Point target: S. G. Dorman 256 points; W. Bauer 243, J. Wiget 209, D. Schneidewind 157, V. Rapp 153.

Ring target: D. Wiget 65 points; D. Schneidewind 64, Charles Baptie 62, Heuchens 60, V. Rapp 59, F. Kurka 58.

Man target, 5 shots, possible 30 points: J. Molles 26, F. Ettling 26, H. Vogel 25, W. Boun 24, S. G. Dorman 24, R. Bethman 23, V. Rapp 23, Huchens 23.

Namrod.

### Port Chester Shots.

Port Chester Rifle Club, Oct. 22, 200yds., off-hand, standard American target:

| | | | | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|
| J Smith | 7 | 10 | 6 | 5 | 7 | 7 | 5 | 6 | 9 | 6—68 |

| | 4 | 8 | 5 | 6 | 4 | 8 | 3 | 5 | 5 | 4—52—103 |

R. McNeil, Jr., Secretary.

## Trap Shooting.

All ties divided unless otherwise reported.

### FIXTURES.

If you want your shoot to be announced here send in notice like the following:

Nov. 2.—Connecticut Trap-Shooter's League tournament, at New Haven.

Nov. 15-16.—Ted Ackerman's tournament, at Stanton, Neb.

Nov. 17.—Newark Gun Club live bird tournament, at John Erb's grounds, Newark, N. J.

Nov. 22-23.—Union Gun Club tournament, at Springfield, N. J. First day targets; second day live birds.

Nov. 23-26.—Milwaukee (Wis.) tournament, targets and live birds.

Nov. 24.—John A. Hartner's sixth annual tournament, Bishop's Driving Park, Baltimore, Md.

Nov. 24.—West Virginia State Sportsmen's Association tournament, at Wheeling, West Virginia.

November.—Al. Heritage's tournament, at Marion, N. J.

Nov. 24 —Arlington Gun Club tournament, at Cleveland, O.

Dec. 28-29.—Jacksonville (Fla.) Gun Club's fifth annual tournament; $500 guaranteed purses; $300 in money and merchandise prizes added. Professional experts barred. Bryan Taliaferro, Sec'y.

1893.

May 23-25.—Knoxville Gun Club tournament, $1,000 added to purses. Also valuable merchandise prizes.

June 12-16.—New York State Sportsmen's Association tournament, at Rochester. H. M. Stewart, Cor. Sec'y, 412 Ellwanger & Barry building, Rochester, N. Y.

## The Independents are Jersey's Champions.

"WELL, ve knowed ve was sure bei dot erster place," said "Dutchy" Smith, captain of the Independent Gun Club, when his team won its ninth victory in the series of shoots of the New Jersey Trap-Shooter's League, at Maplewood, on Oct. 27. And "Dutchy" may well be proud of his team for winning nine out of ten contests and rolling up the splendid average of 110 3-10 breaks out of a possible 125, or a percentage of 88.24. Not only this, but his pet team rolled up the highest four totals made during the tournament, namely 115, 114, 113 and 112. The highest scores made by other teams being 110 and 111 by the Maplewoods. Once the Independent team fell down to 97 breaks, but on no other occasion did they break less than 108 targets in a race.

The weather on the date of the final shoot was delightfuly mild and until well along in the afternoon overcoats were laid aside. There was scarcely enough breeze to carry off the smoke. The absence of wind was very much regretted when in one of the squads there were four men using black powder, the smoke from which settled like a pall over the traps. The light was not of the best, there being a troublesome haze at times hanging over the trees in the foreground.

The Maplewood Gun Club, on whose grounds the final shoot was held, is one of the best known clubs in the State, and one which does more shooting than any other club in Essex county. Its grounds are situated on a high tract of land back of the D., L. & W. railroad tracks, about three-quarters of a mile from the Maplewood depot. To reach them one must cross three or four fields, pass through a sparse wood and run the risk of piercing the person and tearing clothes by scaling a couple of barbed-wire fences, those blessings to farmers, but abominations to trespassers. A very neat and conveniently arranged club house of good size is on the grounds and behind this is a heavy wood. Directly in front of the house and about 250 yds. distant is a sparse wood extending for several hundred yards to the right and nearly to the railroad on the left. The right and left sides of the field are clear, and to the left can be seen the Orange Mountains, the wooded slopes of which at this season present a beautiful combination of colors in foliage.

The shooting was done from two sets of five traps each. One set of bluerock traps was placed directly in front of the club house, bluerock targets being thrown from them. These are the regular traps of the club, and on these the team race was shot. The leaves on the trees in the foreground were of every conceivable color and tint, and with the hazy atmosphere gave a puzzling foreground, and one which precluded the possibility for the big scores which usually prevail when the Jersey cracks get together. A look over the scores will show that in other than the 10-target events "straights" were few and far between.

The second set of traps was arranged about a hundred yards to the left of the club set. Here were Keystone traps throwing Keystone targets. The foreground was a trifle better than for the club set, but the unevenness of the ground made shooting as difficult as on the others.

Charles W. Brown, acknowledged to be the "chief hustler" for the Maplewood boys, was early on the grounds, and when the first contingent of shooters arrived everything was in tip-top shape for their reception. A temporary booth had been erected in one of the club house and here Mrs. C. W. Brown dealt out toothsome beans, *à la* Boston, savory coffee and other delicacies to tempt the palate of the ever hungry sportsman.

Among the earliest arrivals were Lieut.-Col R. Heber Breintnall, of the South Sides, of Newark; Wm. R. Hobart, secretary-treasurer of the New Jersey League, who brought along an armful of his excellent score sheets; Enoch D. Miller, of Springfield, and Ernest Fisher, of Newark. J. Warren Smith, of Orange, was also an early bird. A little later appeared C. M. Hedden, the veteran Newark field and trap shot, who is bemoaning the loss of his favorite setter, killed a few days previously, said dog having the reputation of being the best quail partridge dog in the State. Then there was "H. G." Getzler, a rattling good shot from the metropolis, who insists that he must use 4dr. of black powder in his 12-bore gun, and who causes the boys' ears to ring in consequence; Tom Brantingham was there from Plainfield with his high-colored "Princeton" sweater; Ferd. Van Dyke with his Francotte gun, New London diamond and same old childlike smile; "Uncle Billy" Sigler, who had a bad attack of rheumatics, but still shot a killing pace, and the ever jolly "Dutchy" Smith, captain of the Independents, of Plainfield. A still later train let out Oscar Hesse, the good-looking Red Bank expert, who is booming Walsrode powder and taking lots of orders; Asa Whitehead, the giant secretary of the Passaic Gun Club, of Newark; Eddy Collins, Fred Quimby's loading expert; Meyer, of the Boiling Springs; Fred. G. Moore, "Claremont" of the New Jersey Shooting Club, and "Big Jim" Smith, of Hackettstown. Still later we see "Little Neaf Apgar, Squire's right-hand man, who shoots left-handed and who is manager of the State League; Seymour G. Smith, of Middlesex Gun Club fame, who is beginning to get among the boys once more; Ernest O. Geoffroy, of the Woodsides, and F. H. Heller, his clubmate.

Sweep followed sweep in rapid succession until 3 P. M., when the team race is called. By this time Hall, Coeman, Bower, Jelleme and Abbott, of the Passaic City Gun Club, have appeared, as have Koegel, Hassinger, Schork and Heinrich, of the East Side—Mutuals; Heritage ("Old South Paw"), of the South Sides; Walters and Tom Dukes of the Woodsides, and the prince of practical jokers, Fred Quimby.

The Maplewood Club had arranged a very attractive program of open to all events, and these were well filled. The shooting was done under the revised rules of the American Shooting Association, and all shot from known traps at known angles, under the rapid-firing system.

The team match drew out seven teams, as follows: South Side Gun Club, Woodside Gun Club and East Side—Mutual Gun Club, of Newark; Boiling Springs Fish and Gun Club, of Rutherford; Passaic City Rod and Gun Club, of Passaic; Independent Gun Club, of Plainfield, and the Maplewood Gun Club, of Maplewood. Asa Whitehead and Isaac H. Terrill alternated as referees, and C. H. Townsend, trap editor of FOREST AND STREAM, was official scorer. Each team comprised five men, and each man shot at 25 bluerock targets. The first team to complete its score was that of the Maplewood Gun Club, which rolled out the fine aggregate of 111 breaks. The champion Independent team followed with 113, this being the top score of the day. Up to the 115th round it looked as though this team would excel its former record of 115 breaks, but "Dutchy" made a miss and Brantingham and Sigler followed his lead. The leading individual scores were C. Drake's 23, J. L. Smith's 24 and W. R. Hobart's 24.

The making of a clean score by C. Drake made him the winner of a handsome medal offered by the Standard Keystone Target and Trap Company to the shooter scoring the highest aggregate number of breaks in four consecutive contests. Up to this time E. D. Miller had a record of 95, R. H. Breintnall 93, Neaf Apgar 92, C. Smith 92, F. F. Moore 92, C. Drake 91 and Frank Post 90. The only one who could improve his chances, even by breaking straight, was C. Drake. Drake, who buckled down to business, fairly pulverized his targets and beat Miller out for the medal by a margin of one break in the aggregate. It was a nervy exhibition and the "blonde boy" deserves credit.

The full scores of the day's work are appended:

Maplewood G. C.

Drake.....1111111111111111111111111—25

No. 12, 15 singles, entry $1 50: Lemmon 5, H. G. 11, Claremont 12, Van Dyke 11, Miller 11, W. Smith 14, H. King w., O. Bots 6, Apgar 15, S. G. Smith 11, Jedell 6, Dutchy 13, J. L. Smith 12.

A FEW FACTS AND FIGURES.

The above shoot brought to a close what can confidently be claimed to have been the most successful series of contests ever held by a State or other league, and one which has gone a great way toward promoting a renewed interest in trap-shooting, as well as cementing a bond of good fellowship among the members of the clubs interested. The meetings, ten in all, have passed off without a jar or wrangle of any description, owing to the careful attention to details on the part of Manager Apgar and Secretary Hobart, who have devoted a great deal of their time to the running of the team contests.

The league was organized last winter by those who had been interested in the old Essex County Trap-Shooter's League. The first shoot was held on the Newark grounds of the Woodside Gun Club, on Feb. 22, there being eight teams entered. The second shoot, held on the grounds of the Passaic City Rod and Gun Club, drew out ten teams. In the third contest, on the grounds of the Brunswick Gun Club, ten teams entered. Nine teams shot in the fourth contest, held on the Boiling Springs Gun Club grounds. The fifth contest took place on the grounds of the South Side Gun Club, when ten teams shot. In the sixth contest, on the Independent Gun Club grounds, there were nine teams. At the seventh shoot, held on the New Jersey Shooting Club's grounds, there were also nine teams, as there were in the eighth shoot, held by the East Orange Gun Club. Seven teams took part in the ninth shoot on the East Side-Mutual grounds and seven also shot at Maplewood in the final contest.

In each case the club on whose grounds the team contests were held also arranged a number of open to all sweepstakes events and in some of these there were as many as 58 entries. At the shoot held on the South Side grounds there were 65 individual shooters on the grounds and at the Passaic and Boiling Springs shoots there were about the same number. The shooting during these open events was of the very highest order, as is usually the case when the talent of New Jersey gets together, which means that those who do not come up to the 90 per cent. mark are practically "not in it." At all of these meetings the utmost good feeling prevailed and many friendships were formed between clubs and individuals.

While it is to be deplored that there was not a closer competition for the leading honors, the outcome of the team contests was still satisfactory to all concerned. After the Independent team had won six contests it was feared that the interest would flag, but this was not the case, at least not to the extent that was feared. Had the team of the Independents been pushed harder it would have added zest to the various contests.

Another thing to be regretted is the rule which allowed men to change teams in the various contests. We have always contended that no man should be allowed to shoot on more than one team during a series of shoots. Of course, during these shoots it was legalized by the rules, but in the next series it should be prohibited.

During the series 88 team scores were shot, these calling for 10,975 targets, of which 8,399 were broken, the average per shot being 95$^{39}/_{88}$, or 76.45 per cent. The number of targets broken in each contest in order was as follows:

| | | | |
|---|---|---|---|
| 1st..... | 8 teams.....770 | 6th..... | 9 teams.....841 |
| 2d..... | 10 teams.....947 | 7th..... | 9 teams.....868 |
| 3d..... | 10 teams.....948 | 8th..... | 9 teams.....875 |
| 4th..... | 9 teams.....822 | 9th..... | 7 teams.....677 |
| 5th..... | 10 teams.....960 | 10th..... | 7 teams.....691 |

The following table shows the scores made by the teams in the various contests, and also gives the average of each team, the number of targets shot at and the percentage of the team:

| Clubs. | Scores. | Shot at. | Broke. | Aver. | Per ct |
|---|---|---|---|---|---|
| Independent— | | | | | |
| 100 112 114 | 97 108 115 110 113 112 113 | 1250 | 1103 | 110$^{3}/_{10}$ | 88.24 |
| Maplewood— | | | | | |
| 106 93 97 | 98 104 108 110 101 106 111 | 1250 | 1034 | 103$^{4}/_{10}$. | 82.72 |
| South Side— | | | | | |
| 79 105 106 | 102 106 108 103 103 105 107 | 1250 | 1022 | 102$^{2}/_{10}$ | 81.86 |
| New Jersey— | | | | | |
| 94 103 104 | 95 88 96 102 108 ... ... | 1000 | 790 | 98¾ | 79 |
| Boiling Springs— | | | | | |
| 92 99 109 | 107 105 93 98 95 84 93 | 1250 | 975 | 97½ | 78 |
| Woodside— | | | | | |
| 104 93 93 | 104 103 ... 95 90 94 97 | 1125 | 873 | 97 | 77.60 |
| Passaic City— | | | | | |
| ... 85 75 | 72 96 93 88 97 85 90 | 1125 | 781 | 86$^{7}/_{9}$ | 69.42 |
| East Side-Mutual— | | | | | |
| 95 92 77 | 70 95 94 75 91 91 80 | 1250 | 860 | 86 | 68.88 |
| Brunswick— | | | | | |
| ... 72 95 | ... 89 64 ... ... ... ... | 475 | 320 | 80 | 69.93 |
| East Orange— | | | | | |
| 91 93 78 | 77 66 70 87 77 ... ... | 1000 | 639 | 79¾ | 63.90 |

The places held by the teams in the several contests are here shown:

| | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 |
|---|---|---|---|---|---|---|---|---|---|---|
| Independents | 1 | 1 | 1 | 5 | 1 | 1 | 1 | 1 | 1 | 1 |
| Maplewoods | 2 | 5 | 5 | 4 | 4 | 2 | 1 | 4 | 2 | 2 |
| South Side | 8 | 2 | 3 | 3 | 2 | 2 | 2 | 3 | 3 | 3 |
| New Jersey | 5 | 3 | 4 | 6 | 9 | 3 | 3 | 2 | .. | .. |
| Boiling Springs | 6 | 4 | 2 | 1 | 3 | 5 | 4 | 6 | 7 | 5 |
| Woodside | 3 | 5 | 7 | 2 | 5 | .. | 5 | 8 | 4 | 4 |
| Passaic City | .. | 7 | 10 | 8 | 6 | 5 | 6 | 5 | 6 | 6 |
| East Side Mutual | 4 | 6 | 9 | 9 | 7 | 4 | 8 | 7 | 5 | 7 |
| Brunswick | .. | .. | 8 | 6 | .. | 8 | 7 | .. | .. | .. |
| East Orange | 7 | 5 | 8 | 7 | 10 | 6 | 7 | 9 | .. | .. |

It will thus be seen that the Independent team won first place eight times, and tied once for the same position with the Maplewoods. This tie occurred at Claremont, and at the succeeding shoot on the grounds of the East Orange Club the representatives of the sporting journals were given to understand that the above tie would be decided by the total scores made by the teams on that day. The Independents made 113 to the Maplewood's 101, and as a matter of course the papers stated that the tie had been won by the Independents. At last Saturday's shoot, however, members of the Maplewood club denied all knowledge of having agreed to shoot off such tie. Hence this matter will have to be discussed at the next meeting of the league. In the sixth contest the Maplewoods and South Sides tied for second place and this will also come up for discussion.

Appended is a list of all who made 80 per cent. or better shooting in five or more contests of the series:

| | Shoots. | Per cent. | | Shoots. | Per cent. |
|---|---|---|---|---|---|
| E D Miller | 9 | 92.44 | W R Hobart | 10 | 86 |
| C Smith | 5 | 91.20 | W Smith | 10 | 84.80 |
| T Breintnall | 10 | 90.40 | E Phillips | 8 | 84.50 |
| R H Breintnall | 7 | 90.26 | F Van Dyke | 9 | 84 |
| N Apgar | 9 | 89.77 | E O Geoffroy | 8 | 84 |
| F G Moore | 7 | 89.14 | C Hedden | 9 | 83.55 |
| W Sigler | 5 | 88 | J Purdy | 6 | 83 33 |
| J L Smith | 6 | 87.33 | E Collins | 9 | 81 77 |
| C Drake | 10 | 87.20 | J H Richmond | 5 | 81.60 |
| F Post | 6 | 86.66 | C Dean | 9 | 81.33 |
| W F Simpson | 5 | 86.40 | A Whitehead | 6 | 80.66 |

In all 124 individuals took part as members of the several teams.

The leaders in the contest for the Standard Keystone medal offered for the best four consecutive scores were: C. Drake, 23, 24, 24, 25—96 (winner); E. D. Miller, 24, 22, 25, 24—95; T. Brantingham, 24, 23, 22, 24—93; R. H. Breintnall, 23, 25, 24, 22—93; N. Apgar, 24, 23, 22, 23—92; F. G. Moore, 24, 25, 23, 20—92; J. L. Smith, 21, 22, 23, 24—90; F. Post, 22, 22, 23, 23—90; W. R. Hobart, 20, 23, 23, 24—90.

Scores of 25 were made by the following: Miller, C. Smith Drake, W. Smith, Moore, Collins, Breintnall.

Scores of 24: Apgar, Miller (four), Brantingham (three), C. Smith, Squires, Drake (three), J. L. Smith, Baar, Purdy, Moore, Richmond, Hobart, Hedden, Whitehead.

Scores of 23: Apgar (three), Miller, Brantingham (three), C. Smith, Sigler (two), Soper (two), Dean (two), Drake, W. Smith (three), Addison, J. L. Smith, Van Dyke (two), Geoffroy, Purdy, Moore (two), Richmond, Post (two), Hollister, Meyer, Keller, R. Dukes, Hobart (three), Breintnall (three), Phillips (two), Bram, Shaw, Coeman, Van Nuis.

There were fifty-six 22s made during the series.

The prizes have been won as follows:

For greatest number of matches won, $20, Independents, who also win a 12-gauge Lefever gun presented by the Lefever Arms Company for the highest team average in seven contests; average 112 5-7, or 90.17 per cent.

Second prize, $15, Boiling Springs Gun Club.

Third prize, $10, won by the South Side Gun Club.

Fourth prize, $5, won by the Maplewood Gun Club.

Club winning fifth place the greatest number of times, a case of mounted quail presented by Schoverling, Daly & Gales, won by Woodside Gun Club.

For winning sixth place greatest number of times, ten bags of chilled shot, presented by Tatham & Brothers, won by Passaic City Rod and Gun Club.

For winning seventh place the greatest number of times, six bags of chilled shot, presented by the Le Roy shot and lead works, tied for by East Side—Mutual Gun Club and East Orange Gun Club.

For winning eighth place the greatest number of times, four bags of chilled shot, presented by the Le Roy Shot and Lead Works, won by Brunswick Gun Club.

Highest individual score in first match, one year's subscription to *American Field*, Thos. Brantingham; same in second contest, one year's subscription to FOREST AND STREAM, F. S. Moore; third contest, one year's subscription to *Shooting and Fishing*, F. G. Moore; fourth contest, one year's subscription to FOREST AND STREAM, R. H. Breintnall; fifth contest, one year's subscription to *Sporting Times*, C. M. Hedden. Where ties occured in the above contests they were decided by the scores of the succeeding shoot.

A solid silver soup ladle, presented by the *Sporting Times* for the best individual average in not less than seven contests, was won by E. D. Miller, average 92.44 per cent. C. H. TOWNSEND.

## The Great American Handicap.

NEW LONDON, Conn., Oct. 27.—As the target season is about over we shall go to work at once on our grand live bird tournament, which will be held the second week in January, and at which the grand American handicap will be shot. This will without doubt be the most important event ever shot in America, and as we are already beginning to receive inquiries in regard to the same have decided to allow individuals to enter at any of the offices of the members of the Interstate Manufacturers' and Dealers' Association in New York city. Their names and addresses are as follows: Forest and Stream Pub. Co., 318 Broadway; American Field Pub. Co., 19 Park place; Henry C. Squires, 178 Broadway; Jacob Pentz, 8 Murray street; J. A. H. Dressel (U. M. C. Co.), 313 Broadway.

Entries will also be received by Chas. Tatham, of Tatham & Bros., 82 Beekman street, and Mr. M. F. Lindsley, of the American Wood Powder Co., 50 Wall street, and such entries will be entered on one of the books at the offices first named.

In making application for entrance, either by mail or in person, a forfeit of $10 will be required. The balance to be paid on or before Jan. 1, 1893. The entrance for the handicap event will be $50. Anyone failing to pay the balance of entrance money within the specified time shall forfeit the same, and it will be added to purse given to the winners of the handicap. The purse will be divided (the first season) 60, 30 and 10 per cent. The added money given by the association will be added to the first money. The handicap for each purse must be shot down to one man. We will have circulars and entry blanks ready to mail on Nov. 15. Entry books will be at the different offices on Nov. 1. The handicap book for the present will be kept at 313 Broadway, and the distance from which each individual will shoot will be published not later than ten days after entering.

We have before mentioned that entries would not be received until Nov. 1, although several pigeon shots of America have written about same, desiring to know how much money it was necessary to inclose to enter the handicap. Mr. F. C. Fowler, of Moodus, Conn., has applied for entrance and inclosed a forfeit of $10, so under the circumstances will accept the same and enter it as soon as the books are received from the printers. His handicap will be 26yds., as he has never shot a live pigeon out of a trap. In this connection we will state that entries for the handicap will close on Saturday, Dec. 31, 1892.

Twenty-six yards will be the limit for handicapping. The scratch mark will be extended from 30 to 32yds., and that will be as far as any individual will ever be handicapped.

H. A. PENROSE.

## Riverview Gun Club Tournament.

THE first tournament of the Riverview Gun Club, of Amsterdam, N. Y., at McClary Driving Park was well attended by members of Eastern N. Y. State Trap Shooters' League. The early morning was threatening, but about 10 o'clock some thirty visiting shooters loaded down with gun-cases and shells climbed the hill to the shooting grounds. Among them we noticed the Saratoga "delegation" in force, Messrs. Gibbs, Peters, "Buck" Coster, Harry Levenston, and Ramsdill, along with them the crack Roberts, of Rupert, Vt. The genial secretary of the N. Y. Trap Shooters' League, Horace B. Darby, who edits the "Gun, Rifle and Rod" department of the Albany *Argus*, trudged on ahead with his score sheets along with John Y. Sanders, Taylor, Rockworth, and Leon, of Albany, Greer, Betts, Farman came later in the day. Dr. Wessels and Harry Bancroft of the Canajoharie Gun Club we found on the grounds, also Alvin Walrath and Fred Partiss of Johnstown. W. H. Cruttenden (the kingbird trap and target "Crutty"), of Cazenovia, had charge of the traps and did general "hustling." On his travel to Amsterdam he was accompanied by Geo. Mosher, of Fulton, N. Y., who shoots and sells the famous "L. C. Smith guns" for the Hunter Arms Co. Salisbury of Canastota came along to try a hand with Mosher in smashing targets. The Riverview Club members we found out in full force, doing all they could to make the tournament a success.

The general hustlers and workers were the Pres. Robert M. Hartley, Capt. A. B. Briggs, G. V. Hartley, and Messrs. Pierce, Trull, and others. There was some "kicking" by a few about the management of entries, etc., but this being their first tournament the members did the best they could, and that is about all anyone can do (kicked and all).

The traps threw the birds hard, with a stiff wind from the west and traps facing east it helped to make the shooting extremely difficult. The wind would catch the targets and they would fly up a couple of feet in nearly every case. Considering the wind the scores made were far above the average. The following are the scores:

No. 1, 10 kingbirds, entrance $1, three moneys: Walrath 10, Mosher 5, Salisbury 7, Bancroft 4, Wessels 9, Reamer 5, Rockworth 9, Sanders 8, Roberts 8, Levengston 10, Partis 4, Leon 7, Greer 6, Peters 5, Buck 10, McGinnis 9, Kenmore 9, Betts 9.

No. 2, 10 kingbirds, entrance $1.30, four moneys: Mosher 10, Peters 10, Buck 9, Kinmore 10, McGinnis 10, Roberts 9, Betts 8, Walrath 7, Sanders 9, Rockworth 7, Bancroft 8, Wessels 8, Salisbury 10, Taylor 10, Crutty 8, Leon 7, Greer 8, Partis 6, Levengston 8, R. M. Hartley 6.

No. 3, 10 kingbirds, entry $1.30, four moneys: Sanders 9, Rockworth 9, Salisbury 7, Wessels 8, Levengston 8, Reamer 5, Mosher 9, Peters 7, Buck 10, Kinmore 9, McGinnis 9, Roberts 10, Betts 10, Bancroft 5, Leon 5, Taylor 10, Crutty 6, Richards 8, Walrath 7, Partis 7.

No. 4, 15 kingbirds, entry $2, two moneys and four merchandis :

| | | | |
|---|---|---|---|
| Mosher | 111111111111111—15 | Betts | 101011001111111—11 |
| Peters | 111111111111011—14 | Taylor | 111111101111111—15 |
| Buck | 111111111111111—15 | Sanders | 111111101111111—14 |
| Kenmore | 111111111111111—15 | Rockworth | 111111111111101—14 |
| McGinnis | 010111101111111—13 | Leon | 111011011011011—13 |
| Roberts | 111111111111111—15 | Levengston | 111111111111101—14 |
| Wesselis | 111111111111101—14 | Greer | 111011010100101—10 |
| Sallsberg | 111101100011110—10 | Walrath | 111111111110101—13 |
| Crutty | 101111101011110—12 | Devendorf | 101101111110111—13 |

No. 5, 10 kingbirds, entry $1.30, four moneys: Mosher 8, Peters 8, Buck 10, Kenmore 9, McGinnis 8, Roberts 8, Richards 7, Taylor 8, Crutty 9, Betts 8, Wessels 9, Salisbury 8, Rockworth 8, Washburn 4, Levengston 10, Walrath 10, Leon 9.

No. 6, 5 live birds, entry $2.50, two moneys: Sanders 3, Mosher 4, Levengston 3, Bancroft 4, Walrath 2, Farman 5, Wessels 2, Peters 4, Watson 2, Rockworth 5, Leon 4, Betts 4, Salisbury 4 Armstrong 2, Buck 2, Thorn 4, Devendorf 4, Greer 5, Roberts 4 Parties 3, Crutty 4, Reamer 2.

No. 7, 20 kingbirds, entry $2.60, five moneys:

| | | | |
|---|---|---|---|
| Mosher | 111111111101101111—18 | Taylor | 001010111111111111110—15 |

Prizes: Mosher, 1 year's subscription *Daily Recorder;* Buck, box cigars; Roberts, silk umbrella; Rockworth, derby hat; Sanders, 1 year's subscription *Shooting and Fishing*, box cigars; G. V. Hartley 1 year's subscription *Sporting Review;* Salisbury, outing shoes; Levengston, silk hat, case claret wine; Walrath, carving set, bag shot; Taylor, 200 loaded shells; Crutty, 1 year's subscription *Sporting Review*, box cigars; Leon, 1 year's subscription FOREST AND STREAM; Betts, box cigars; Wessels, 1 dozen whisk brooms, box cigars.

No. 10, 10 kingbirds, $1.30 entrance, 4 moneys, unknown angles: Mosher 8, Peters 9, Buck 9, Kenmore 8, McGinnis 7, Roberts 7, Sanders 10, Wessels 8, Rockworth 6, Levengston 8, Walrath 6 Betts 8, Partis 8, Bancroft 8, Taylor 8, Watson 3, Leon 6, Armstrong 5, Thorne 9.

No. 12, 10 kingbirds, $1.30 entrance, 5 moneys: Mosher 8, Peters 7, "Buck" 10, "Kenmore" 9, McGinnis 9, Roberts 8, Sanders 10, Richards 7, Wessels 8, Levengston 10 Walrath 9, Armstrong 8, Bancroft 5, Taylor 10, Devendorf 8, G. V. Harley 8.

Averages: For best averages in Events 2, 3, 4, 5, 7, 8, 10 and 12, 100 targets. Buck, 95 per cent, first, won W. E. Cross gold medal valued at $25; Sanders and Kenmore, second, 93 per cent., divided $6; Harry Levengston, third, 93 per cent., $3; Taylor, fourth, 91 per cent., $1; Mosher, fifth, 90 per cent.; Dr. Wessels and Roberts, sixth, 88 per cent; Gibbs and Peters, seventh, 86 per cent.; Walrath, eighth, 84 per cent.

## Chicago Traps.

CHICAGO, Ill., Oct. 28.—There seems to be an impression current in the East, though from what cause I cannot learn, that there is to be held in Chicago next spring a grand trap tournament under the immediate charge of the World's Fair, the tournament, indeed, to be a part of the Fair and one of its attractions. I cannot imagine how such a belief can have gained ground, and should not have known of its existence except for a visit from Mr. R. E. Cox, of New York, who is now in this region seeking a possible location for his old business of buying and handling pigeons for the trap, wherein he is well known in the East. Mr. Cox says that Mr. Neaf Apgar advised him that the World's Fair would be running a tournament all next summer, and both thought that this would offer a chance for business.

There was some talk long ago about a tournament under the auspices of the World's Fair, but nothing came of it, and no steps were taken toward what for many reasons would be an impracticable project, for want of room if for nothing else. It is probable, therefore, that the unfortunate trap shooters of this and other countries will not have the pleasure of shooting for the Nation's money, at the Nation's pigeons, or targets. The June tournament of the Illinois State Sportsmen's Association has, however, always been referred to as the "World's Fair tournament," and president Organ at one time contemplated strengthening the hand of that association by getting some of its members deputized as officers of the Fair. This, however, would alter the real nature of the shoot, or strengthen its resources.

The truth is, that World's Fair tournament is as yet all in the air. It is easy to see that it will be a big affair, but how to make it biggest and best is still a study. President Organ has called a meeting of the executive committee of the Association for next Monday evening, and at that time there will be every effort made to formulate a plan for a work that certainly should be begun before long and prosecuted earnestly.

It was once suggested that a call be issued to the trap clubs of the country, asking for a contribution of $1 per capita, to go toward a world's open purse. The plan has good and bad features. If successful, it would still leave open the grave question, Who is going to run this World's Fair tournament of the Illinois Association next June?

That there will be a big shoot goes without saying. It will take a week, perhaps two weeks, to run off the State shoot for the championship badge alone, certainly two weeks to decide that and the club team championship also. With the number of shooters who will be present, it is safe to say that an open tournament of 30 or 60 days would not find the end of the shooters and the shooting enthusiasm. This tournament would follow right on after the State shoot, at Watson's Park, Burnside, and it would make big money for its management. But who is to be that management? Can it be the officers of the Illinois State Sportsmen's Association? Can they, or any of them, give up 30 or 90 days of time to the tournament? If they cannot, which of the Association's members can? It would make the Association rich, but how can the Association afford to pay the price for such riches?

### A COMPANY SUGGESTED.

It has been suggested, and I do not off-hand think of any better suggestion, that a stock company should be formed to run this World's Fair open tournament, to put up purses, employ assistants, and in short, to run this shoot and take its profits. This company by its officers would represent a compact and movable force of ready, practical efficiency. It could be made up of men whose names would guarantee fairness and honesty. It could go to the leading manufacturing concerns interested in sports, and ask for large cash donations, with every prospect of success in obtaining them. With what the company could offer in cash and what a good, heavy sweepstakes entry would add, it seems easy to believe that very large purses would be in competition, doubtless larger than any ever seen before in this country. Thus, Mr. Organ's suggestion of a $25 miss-and-out shoot (even a 10 birds sweep might take weeks to shoot to a finish) might mean to the winner a neat fortune of itself should the suggestion be taken up.

There is no need for any company, if the State Association can swing the open shoot. If it cannot, some such idea must probably be entertained. The company idea would have the desirable qualities of offering a management compact and direct in action, and moreover accessible and responsible. There might be worse ideas, but this is only one suggestion, and has never been taken up. The definite plan of action is not yet determined upon, but when announced it will, we all hope, be found worthy of Chicago and of the World's Fair. This Association has a heavy contract to fulfill, but it is not in the habit of failing. The burden of this world's tournament rests not on the officers of the Fair, but upon the Illinois Association. The rights and privileges of this tournament belong to the Illinois Association. Whether it can avail itself fully of these, or whether it will find it necessary to delegate some of the privileges with some of the cares are questions now urgent, and we hope soon to be answered.

### THE CALUMET HEIGHTS CLUB

held a most enjoyable shoot Oct. 16 on its grounds on the lake shore, at Calumet Heights. A large number of members and invited guests were present. The competition was keen and interesting. Delightful weather favored the event. The club house is situated on the shore of Lake Michigan, about 25 miles from Chicago, in the midst of a wilderness.

The first shoot was a practice shoot.

No. 2, team shoot for price of birds, 9 birds: Patterson 5, Lamphere 8, Isbell 7, Carson 4; total, 24. Bingham 8, Booth 8, Drake 1, Chamberlin 2; total, 19.

No. 3, team shoot for price of birds, 4 birds: Lamphere 1, Bingham 3 Isbell 2, Carson 1, Drake 3; total, 10. Booth 3, Patterson 2, Fleming 2, Davis 2, Chamberlin 0; total, 9.

No. 4, 9 birds: Lamphere 6, Patterson 5, Booth 5, Isbell 5, Chamberlin 4, Nichols 4, Fleming 5, Carson 6, Davis 1, Bingham 8, Carlisle 5, Purdy 1, Heikes 7. Bingham first, Heikes second.

No. 5, 15 birds: Booth 12, Patterson 13, Heikes 14, Bingham 13, Carson 11, Davis 6, Willard 10, Isbell 6, Lamphere 11. Heikes first, Patterson second.

No. 6, 15 birds: Heikes 10, Patterson 8, Bingham 6, Booth 11, Lamphere 10, Carson 8. Booth first, Lamphere second.

No. 7, 9 birds: Drake 5, Pierce 1, Fisher 7, Purdy 1, Hinkins 1, Chamberlin 1, Fosket 1, Carson 4, Waters 4. Drake first, Waters second.

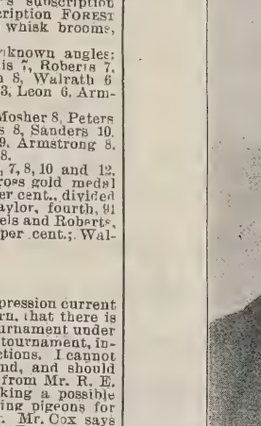
No. 8, 9 singles, 6 doubles: Booth 7, Bingham 8, Lawphere 7, Patterson 8, Drake 6, Heikes 8, Purdy 8, Chamberlin 2, Divided.

No. 9, 15 birds: Chamberlin 7, Wills 1, Allen 0, Stevenson 4 Nichols 5, Pierce 9, Carlisle 3, Fosket 0, Fisher 4. Heikes 1, Purdy 0 Hillis 1.

No. 10, medal shoot, 25 birds: Isbell 18. Booth 20, Patterson 15. Lamphere 13, Fleming 17, Chamberlin 11, Pierce 15, Hinkins 2, Stevenson 3, Davis 5, Wills 2, Carson 17. Booth first.

No. 11, 15 birds: Booth 9, Patterson 10, Bingham 9, Lamphere 7, Carson 10, Willard 12, Breckinridge 6, Isbell 9. Willard first, Carson second.

No. 12, consolation shoot, 9 birds: Isbell 7, Breckenridge 4 Davis 4.



Messrs. Heikes, Bingham and Booth were handicapped by being required to hold the gun over the left shoulder before calling "pull." The club offered prizes in all shoots. To make it more interesting, the shooters made small sweepstakes of some of the events.

## Scores of the Moodus Interstate.

BELOW are the results of the various events shot during the Interstate Manufacturers and Dealers' tournament at Moodus, Coun , on Oct. 25 and 26.

*The First Day.*

No. 1, 10 singles, 75c.: Fowler 9, Brainard 7, Hobart 8, Apgar 10,

H. A. PENROSE.

President Interstate Manufacturers' and Dealers' Association in 1892.

Penrose 7, Edgarton 8, H. G. 5, Ayer 7, Alger 6, Mack 9, McGinty 5, Richmond 8.

No. 2, 10 singles, $1.00: Penrose 5, Hobart 10, Apgar 9, Treat 9, Mack 9, Brainard 9, Fowler 10, Mosher 8, Edgarton 8, Ayer 7, H. G. 6, McGinty 7, Alger. 7, Ventres 8.

No. 3, 15 singles, $1.50: Penrose 12, Hobart 11, Apgar 12, Edgarton 11, Fowler 13, Mack 12, McGinty 13, Brainard 7, Ventres 5, Richmond 13, Ayer 7, Alger 11.

No. 4, 20 singles, $2.00: Penrose 11, Hobart 14, Apgar 17, Edgarton 18, Fowler 18, Mack 19, H. G. 15, McGinty 13.

No. 5, 15 singles, $1.50: Penrose 12, Apgar 14, Hobart 13, Edgarton 14, Mack 10, McGinty 12, Alger 9, Brainard 11, Treat 5, Ayer 9, Fowler 12, Richmond 11.

No. 6, 10 singles, $1: Penrose 10, Apgar 8, Hobart 6, Fowler 8, Mosher 9, Alger 9, Edgarton 10, Mack 7, McGinty 9, H. G. 9, Potter 6, Richmond 6, Brainard 10, Smith 7, Ayer 7.

No. 7, 10 singles, $1: Fowler 8, Edgarton 8. Apgar 7, Penrose 7 Hobart 6, McGinty 8, Purple 10, Alger 5, H. G. 9, Ayer 6, Mack 8, Brainard 4.

No. 8, 10 singles, $1: Penrose 7, Apgar 8, Hobart 10 Fowler 9, Edgarton 9, Potter 6, McGinty 8, Brainard 10, Mosher 7, H. G. 9, Mack 10. Alger 7, Purple 7, Cook 9, Ayer 8.

No. 9, 10 singles, $1: Treat 4, Richmond 10, Purple 9, Cook 9, Penrose 6, Edgarton 7, Hobart 10. Fowler 9, McGinty 8, Potter 6, Smith 8, Mack 8, H. G. 8, Apgar 10. Alger 7, Ayer 5.

No. 10, 10 singles, 75 cents: Apgar 9, Penrose 10, Hobart 10, Brainard 9, Alger 5, Edgarton 8, Fowler 10, Treat 8, Mosher 9, McGinty 10, H. G. 9, Cook 10, Mack 10, Purple 7.

*The Second Day.*

No. 1, 10 singles, 75 cents: Hobart 10. Fowler 9, Ayer 6, Cowee 9, Williams 10, Alger 6, Merrill 8, Penrose 4, Bristol 9, Longden 10, Richmond 5, Brainerd 8, Apgar 8, Potter 7. Treat 10.

No. 2, 10 singles: Penrose 8, Apgar 8, Hobart 8, Fowler 10, Cowee 10, Alger 7, Mosher 9, Smith 9, Ayer 7, Bristol 8, Longden 9, Williams 10, Brainard 10, Merril 8. Richmond 9.

No. 3, 15 singles, $1.50: Fowler 13, Potter 13, H. G. 11, Penrose 12, Apgar 14, Hobart 13, Purple 9, Cowee 12, Bristol 11, Longden 14, Williams 8, Richmond 11.

No. 4, 20 singles, $2 entrance: Penrose 15, Apgar 15, Hobart 15, Fowler 19, Cowee 16, Merrill 13, Bristol 18, Langdon 17, Brainard 16, Williams 17, H. G. 13.

No. 5, 15 singles, $1 50 entrance: Fowler 13 Penrose 12, Apgar 14, Hobart 13, Alger 11, Richmond 13, Purple 7, Cowee 12, Longden 13, Bristol 14, Merrill 10. Williams 12.

No. 6, 10 singles, $1 entrance: Hobart 8, Apgar 8, Penrose 6; Brainard 5, Fowler 8, Cowee 9, Purple 6, Beebe 1, Potter 4, Longden 10, Bristol 9, Williams 9, Merrill 5.

No. 7, 10 singles, $1 entrance: Hobart 6, Penrose 4. Apgar 10, Fowler 5, Cowee 9, Bristol 10, Merrill 6, Longden 9, Cook 8, H. G. 7.

No. 8, 10 singles, $1: Penrose 8. Apgar 8, Hobart 9, Fowler 8, Banning 9, Leonard 6, Cowee 10, Purple 9, Bristol 8, Longdon 9, Beebe 6, Miner 5.

No. 9, 10 singles, $1: Fowler 8, Cook 9, Hobart 9, Apgar 8, H. G. 6, Bristol 7, Cowee 8, Longdon 8, Beebe 2, Alger 5.

No. 10, 10 singles, 75 cents: Penrose 8, Apgar 7, Hobart 9, Fowler 9, Cowee 9, Miner 5, Best 7, Bristol 9, Richmond 7, Cook 8, Banning 9, Merrill 8, Longdon 10.

## The Tournament at Newburgh.

THE West Newburgh Gun and Rifle Club, which held its initial tournament on Oct. 27 and 28, is a new organization, having been formed last spring. It is comprised of some very enthusiastic sportsmen and officered as follows: Pres., J. J. E. Harrison; Vice-Pres., D. Brown; Sec'y, Geo. G. Chandler; Treas., J. A. Wood. The grounds of the club are situated about 200yds. from the old-fashioned and homelike hostlery known as Gedney's Hotel, and are reached from the Erie depot by a two-mile drive over a well made but terribly dusty macadamized road, the road leading by many stylish suburban residences and comfortable looking farms. The trap-shooting is done on a high piece of ground, which affords some fine views of the surrounding country. The club has a neat club house and shoots from a set of five traps set behind an earth screen.

The weather on both days was favorable for outdoor sport. The management of the shoot was attended to by J. J. E. Harrison, H. C. Higginson, George Taggert, David Brown and W. P. Rayland, who did all in their power to make the affair a success. Mr. Brown attended to the work of receiving entries, dividing and paying out moneys, while Mr. Taggert did the scoring. The attendance was not as heavy as was anticipated, but still there were enough on hand to give zest to the contests. The scores ran low, only two straights being made during the two days. The targets and traps worked well and the foreground was clear, so that the poor averages were unaccountable. Targets were deducted from the purses at the uniform rate of 2 cents each.

Below are the results of the first day's work:

No. 1, 10 Keystones, $1 entry: Taylor 9, Likely 8, Taggert 7, Kissam 6, Higginson 5, Kerr 4, Stansbrough 3, Wood 2,

No. 2, same as above: Kerr 9, Higginson 9, Gettle 9 Taylor 8, Kissam 7, Stansbrough 7, Likely 7, J. Rhoades 7, G. Rhoades 6, Gibbs 6, Post 6, Thonet 1.

No. 3, 15 Keystones, $1.50:

| | | | |
|---|---|---|---|
| Rayland | 111111101111111—14 | Thonet | 111100101101011—10 |

*The Second Day*

drew out about the same number of entries as the preceding one, among the new comers being Mr. and Mrs. M. F. Lindsley, of Hoboken, N. J., H. Gattler, of Greenport, W. R. Hobart of Newark, Dr. Horton and Dr Mason, of Peekskill.

The event of the day was the one at 10 live birds $10 entry with 13 names on the list. The curious part of this shoot was that although the birds were only fair flyers no one succeeded in killing more than seven. "Wanda's" sixth bird escaped both barrels and settled on a tree, from which a few moments later he was knocked by a stone thrown by a boy. The scores of the day's shooting are here appended.

No. 11, 10 keystones, $1 entrance: H. G. 7, Thonet 6, Light 6, Post 10, H. C. H. 5, Wood 7, Taylor 8, Kerr 3, Lindsley 9, Case 5, Likely 9, Rayland 7, Stansbrough 8.

## Annie Oakley's Return.

LAST Saturday evening we received the following:

"CONTINENTAL HOTEL, Newark, N. J., Oct. 27.—Will you kindly call and take dinner with us about 5:30 or 6 o'clock to-morrow (Friday) evening. We shall be very glad to see you, as we have just returned from Europe. Truly yours, FRANK BUTLER.
ANNIE OAKLEY."

Here was a nice pickle of fish. An invitation to take dinner on Friday and on said Friday we were at the Newburgh tournament while said letter was traveling about to find us. And worse still, to lose the coveted opportunity of being one of the first to welcome "Little Sure Shot" to her native heath, to which she had been a stranger for four long years.

But what can't be cured must be endured, so all we could do was to repair to the Continental and make amends for tardiness. Arriving at the hotel we were given the warmest kind of a greeting by the returned travelers, both of whom looked in splendid health, despite the arduous duties imposed upon them in the eleven different countries visited with the Wild West show.

Miss Oakley looked the picture of health, and, in fact, she said she never felt better than at present. She has the same pleasant smile and clear look as of old, and shows little or no trace of her hard work. During the past four years she has never failed to give her two performances daily when the show was in season, besides doing more or less practice work, match shooting and hunting. This record clearly proves that "Little Sure Shot" possesses an iron constitution.

All of her shooting paraphernalia was brought out for our inspection, and the collection is a fine one. Included in the lot is a Francotte bearing the name of Von Lengerke & Detmold, New York, this gun—a 12-bore—having been built on precisely similar lines to a high-grade Purdy. The "service gun" of Miss Oakley, with which her exhibition shooting has been done for over five years, is still in prime condition, although the stock, with innu-

merable scars, looked as though it had passed "through the wars." There was also an elegantly constructed .32cal. oval-bore rifle, built for shooting at the running deer target at Bisley. This is a magnificently-built weapon, and in the near future we hope to have the privilege of giving it a trial. Another fine weapon is a superbly gold-mounted Smith & Wesson revolver.

Miss Oakley has probably the largest and most valuable collection of medals and jewelry ever collected by a markswoman, some of the latter being superb in their style of work. The collection comprises, rings, bracelets, pins and necklaces without number, some of which were presented to her by European potentates who were captivated by her superior style of shooting. Wherever she appeared she received an ovation and had the entree of the best houses. She had, while in England, the privilege of shooting with the Hurlingham Gun Club, being the first professional shot who was ever honored thus. In one of the shoots on these grounds she won first paize alone by killing four English bluerocks in a miss and out event. Speaking of the relative quality of the genuine English bluerock, Miss Oakley says that those which are classed as "medium" are far superior to what American shooters call hard birds.

Over the mantel in Miss Oakley's parlor is a mounted English bluerock which was the winning bird in her match with Mr. Chapman, an English expert. She killed 19 birds to her opponent's 18, each shooting at 25. The birds for this match were brought on to the field, each in a separate box, and she says they were the finest lot of flyers she ever saw. This she considers her best work in England. She had previously won a big prize at Milan by killing 14 straight in a miss-and-out, but the Italian birds she says are not to be compared to the good ones of England.

"Little Sure Shot" has mastered many difficult feats since she left American soil, one of the most taking being the breaking of two glass balls, these being thrown in the air and fired at while sitting upright in the saddle on a horse that is leaping a hurdle as the shots are made. She has also become an accomplished rider of the bicycle and makes many difficult shots while propelling the machine.

Miss Oakley is about to purchase a farm somewhere in the rural districts of New Jersey in order to have a place of retreat when off duty. She will remain in Newark until the 9th inst., when she goes to Altoona, Pa., when she will take part in a 25-bird match against "Billy" Clark, of Altoona. From that place she will go to her aged mother's home in Woodland, Dark county, Ohio, for a lengthy visit.

### Veterans at the Traps.

ALTHOUGH the town of Bound Brook, N. J., has a goodly number of expert live bird shots very few matches have been shot there of late years. The town has no regularly organized gun club, and when its experts want to enjoy a day's sport at the traps they are obliged to go elsewhere. With the advent of new blood, however, the place is very likely to claim a full-fledged club in the near future. One of the most enthusiastic smooth-bore manipulators of the place is James H. Force, well known as a member of the old Middlesex Gun Club, of Plainfield, and as the former proprietor of Force's Hotel in that town. Mr. Force removed to Bound Brook seven months ago and embarked in the hotel business and is now trying to awaken an interest in live bird shooting in the vicinity of his new home.

Chief among the live bird shooters of Bound Brook is "Uncle" John D. Voorhees, who is over 70 years of age but still as enthusiastic over the sport as in his early days. "Uncle John" is known and loved by every shooter in New Jersey and never fails to put in an appearance at nearby tournaments when live birds are used.

Recently "Uncle John" and "Jimmy" Force got into a good-natured discussion as to their own relative merits as live bird shots, the outcome being the arrangement of a match at 20 birds each for $50 a side, the match to be shot at Bound Brook on Oct. 24. On the appointed day the principals and a number of their friends put in an appearance as per agreement, bringing along with them several crates of good birds.

The opening event of the day was the above match, which was shot under Hurlingham rules, except the boundary which was 50yds. Both men were in good form and some fine kills were made. The score follows:

| | |
|---|---|
| Force | 22021202201212202O—14 |
| Voorhees | 20022010221010002012—11 |

The match was followed by three sweepstakes at 5 birds each, $5 entry, of which the scores follow:

| | No. 1. | No. 2. | No. 3 |
|---|---|---|---|
| Forest | 00121—3 | 21002—3 | 01110—3 |
| J H Force | 12102—4 | 02012—3 | 00000—0 |
| C Smith | 11111—5 | 21211—5 | 11120—4 |
| P Jov | 01121—4 | 01110—3 | ..... |
| J D Voorhees | 21122—5 | 00111—3 | ..... |
| E Shepherd | ... | 01100—2 | 00122—3 |
| W Anderson | ... | 20102—3 | 00111—3 |

## DRIVERS AND TWISTERS.

The last shoot of the season of the Bemis Park Gun Club, of Omaha, Neb., was held on Oct. 22. It closed a very successful season. Increased interest has been taken in the club, and the regular shoots have resulted in a very noticeable improvement in the marksmanship of the members. The prizes offered at the opening of the season have been awarded, and the first prizes, consisting of two handsome gold medals, were won by H. E. Chubback and Stockton Heth. George W. Loomis and William Salisbury are the winners of second place and elegant shell cases. The special prize, offered for the greatest improvement during the season, a steel fishing-rod, was won by Harry Reed The corduroy shooting coat, offered by the Bemis Omaha Bag Company to the member participating in the greatest number of shoots, was won by F. H. Blake.

The Boiling Springs Gun Club, of Rutherford, N. J., held its annual meeting on Oct. 27 and elected the following officers: Pres., Ed. A. Jeanneret; Vice-Pres., C. H. Coe; Treas., Lewis Laue; Sec'y, P. A. Jeanneret; Cor. Sec'y and Capt, Cornelius Collins. Directors, Ed. A. Jeanneret, C. H. Coe, Cornelius Collins, W. H. Huck, R. H. Peck, Lewis Laue and E. V. Jochem. The club will hold their regular shoot on the first Wednesday after the first Monday in each month, beginning at 2:30 P. M., for the next three months. The first shoot will be held on Nov. 9 The shoots are for cash prizes, each member to shoot at 25 bluerock targets, known traps, but unknown angles.

A shooting club has been organized at Monroe, Mich., with the following officers: President, Austin Wing, of Detroit; vice-president, J. S. Goddard, Chicago; treasurer, F. S. Sterling, of Monroe; secretary, L. J. Osborn, Chicago; trustee, W. C Sterling, Jr., of Monroe. The club consists of 12 members, two from Detroit, five from Chicago and five from Monroe. It has been named the Liberal Shooting Club, for one of the rules is that all game shot must be distributed among the members. The Sterling marsh has been secured and more is to be secured soon.

To the New Jersey Trap Shootere' League: In your next series of shoots award your championship trophy to the club winning first place the greatest number of times, and award all other team prizes on the basis of the best averages in say, four-fifths of the contests, and don't allow a man to shoot on more than one team during a series. Also arrange one or more individual contests, say at 25 targets per man, these to be continued through the series of tournaments, prizes of fair value to be awarded for the best average in four-fifths of the shoots.

That little 16-bore Parker shot by A. W. Du Bray is playing havoc with live pigeons in this vicinity. On Tuesday, October 25, at a social gathering on the Claremont grounds, Du Bray shot at forty live birds, 28 and 30 yds. rise, 25 yds. boundary and killed 39. The genial Southern salesman usually holds a gun pretty steadily when a live bird is in range, and his recent exploits have proven conclusively that a 16-bore is deadly.

W. G. Clark, of Altoona, Pa., will hold a tournament at the Wapsononock Shooting Park, on Nov. 10-11, when both live birds and targets will be used. The great feature will be daily exhibitions of shooting by Miss Annie Oakley, "Little Lure Shot," this being her first appearance in this country since 1889. Miss Oakley and Mr. Clark will also shoot a match at twenty-five live birds each.

Al. Heritage says his tournament to be held at Marion the latter part of this month will comprise one day's shooting at targets and two days at live birds. As an incentive for shooters to take in both the live bird days Mr. Heritage will give $15 to first and $10 to second average in all programme events for the two days.

The Beatrice Gun Club has been organized in Lincoln, Neb., and the following officers elected: President, F. E. Kimball; Vice-President, E. L. Thrift; Secretary, W. D. Moulton; Treasurer, Paul Walter. Arrangements were made for a three days' shooting tournament during the first week in November, open to the State.

Enoch D. Miller notifies us that the Union Gun Club will hold a tournament at Springfield, N. J., on November 22-23. The first day will be devoted to Keystones and the second day to live birds of which a big lot will be on hand. Stages will meet at trains at the Millburn depot.

These officers have been elected by the Middletown (Pa.) Shooting and Game Protective Association: President, Samuel Gingrich; Vice-President, John Marquart; Treasurer, Michael Sheesly; Secretary, Leonard R. Hipple.

W. R. Hobart would like to correspond with all gun clubs in New Jersey in reference to the second series of shoots of the New Jersey Trapshooters' League. His address is 59 Halsey street, Newark, N. J.

Knoxville and the 1893 shoot are interesting trap shooters all over the country. It is not often that a club can be found with the hardihood to add $1,000 to the purses for a three-days' shoot.

One of the "Know-it-alls," who hashes up alleged trap news for an Ohio paper, says that the coming Elliott-Fulford matches will be nothing but "gate receipt contests." Bosh!

The Central Gun Club, of Long Branch, N. J., intends to call a public meeting of all Monmouth county sportsmen, for the purpose of discussing a revision of the game laws.

The shoot of the West Virginia State Sportsmen's Association, to be held at Wheeling on Nov. 24, will be a big affair, as every club in the State expects to send representatives.

The New Jersey Trap-Shooters' League will hold a meeting in a few days for the purpose of settling up the accounts for the series of shoots just ended.

The Fairdale Gun Club, of Kansas City, Kas., has elected officers as follows: Z. W. Drake, General Manager; James Bates, Secretary; and John Hall, Treasurer.

Milwaukee will be the center of attraction on the 24th to 26 of this month. The Gun Club property was not destroyed in the recent fire.

The Newark Gun Club will hold an all-day's shoot at live birds on John Erb's grounds on Nov. 17. A big stock of birds will be on hand.

The initial shoot of the newly formed Connecticut State League will be held at New Haven on November 9.

The West Newburgh Gun and Rifle Club will hold a trap tournament the later part of April or early in May.

The Riverview Gun Club, of Amsterdam, N. Y., will hold a shoot on Thanksgiving Day.

Has the New Jersey State Sportsmen's Association gone out of existence?

The Essex Gun Club will hold its monthly shoot at Marion on Nov. 17.

What is the matter with the proposed team race at New London?

The Newark Gun Club will shoot at John Erb's on Nov. 10.

Don't forget the Altoona shoot on the 10th and 11th.

C. H. TOWNSEND.

### A Series of Washingtnn Tours for the Fall and Winter via Pennsylvania Railroad.

As the various seasons come and go the principal points of interest, as well as those for enjoyment, put in their claims for the attention of the tourists and the traveling public generally. The Pennsylvania Railroad Company, through its tourist department, are continually on the *qui vive* in selecting for their series of tours seasons and destinations best adapted for the comfort and pleasure of their patrons. These Washington tours which are announced for this fall and winter are among the most select and choicest of Pennsylvania Railroad tours, and are so well timed that it gives to the tourist the best traveling season and opportunity of seeing the National Capital in active operation. The second tour of this series will leave New York in a special train of Pennsylvania Railroad standard coaches on Nov. 10, and the round-trip rate of $13 00 will cover transportation in both directions, as well as include hotel accommodations at the principal hotels in Washington. Tickets, including meals *en route*, $1.50 additional. The tours will be of three days' duration. Later tours to this interesting city are announced to depart Nov. 24, Dec. 15 and 29. Application for itineraries should be made to the Pennsylvania Railroad Ticket Agents or Tourist Agent, No. 849 Broadway, New York.—*Adv.*

### A New-Subscriber Offer.

A *bona fide* **new** subscriber sending us $5 will receive for that sum the FOREST AND STREAM one year (price $4) and a set of Zimmerman's famous "Ducking Scenes" (advertised on another page, price $5)—a $9 value for $5.

This offer is to *new* subscribers only. *It does not apply to renewals.*

For $3 a *bona fide* new subscriber for six months will receive the FOREST AND STREAM during that time and a copy of Dr. Van Fleet's handsome work, "Bird Portraits for the Young" (the price of which is $3).

MESSRS. ADOLPH ISAACSEN & SON, of 92 Fulton street, New York, are breeders of the well-known brand of "Sure Pop" ferrets, guaranteed to be rat hunters and killers from the word go. They also have on hand terriers that are specially trained to hunt in company with ferrets, and which, while they are great ratters, will not harm the ferrets no matter how much they are provoked by the latter. The combination is very effective.—*Adv.*

## *OUR AMATEUR PHOTOGRAPHS.*

IF the estimate may be based on the requests for amateur photography competition conditions the interest in what the FOREST AND STREAM has undertaken to do in this direction is widespread.

Now that so many outers have returned or are returning from the outing of 1892, with camera souvenirs of the vacation time, we hope that our collection may not be forgotten.

With the co-operation of amateur photographers we are giving some capital pictures of outdoor sport in field and wood, and in lake and stream. The addition of camera sketches to the pen pictures by FOREST AND STREAM contributors has been recognized as a happy thought.

## *FAMILIAR ACQUAINTANCES.*

### THE BULLFROG.

THE flooded expanse of the marshes has shrunken perceptibly along its shoreward boundaries, leaving a mat of dead weeds, bits of driftwood and a water-worn selvage of bare earth, to mark its widest limits. The green tips of the rushes are thrust above the amber shallows whereon flotillas of water-shield lie anchored in the sun, while steel-blue devil's needles sew the warm air with intangible threads of zigzag flight.

The meshed shadows of the water-maples are full of the reflections of the green and silver of young leaves. The naked tangle of button bushes has become a green island, populous with garrulous colonies of redwings. The great flocks of wild ducks that came to the reopened waters have had their holiday rest and journeyed onward to summer homes and cares in the further north. The few that remain are in scattered pairs and already in the silence and seclusion of nesting. You rarely see the voyaging muskrat or hear his plaintive love calls.

Your ear has long been accustomed to the watery clangor of the bittern when a new yet familiar sound strikes it, the thin, vibrant bass of the first bullfrog's note.

It may be lacking in musical quality, but it is attuned to its surroundings, and you are glad that the green-coated player has at last recovered his long-submerged banjo and is twanging its water-soaked strings in prelude to the summer concert. He is a little out of practice and his instrument is slightly out of tune, but a few days' use will restore both touch and resonance, when he and his hundred brethren shall awaken the marsh-haunting echoes and the sleeping birds with a grand twilight recital.

It will reach your ears a mile away and draw you back over the happy days of boyhood when you listened for the bullfrogs to tell that fish would bite and it was time for boys to go afishing.

In the first days of his return to the upper world of water this old acquaintance may be shy and neither permit nor offer any familiarity. The fixed placidity of his countenance is not disturbed by your approach, but if you overstep by one pace what he considers the proper limit, down goes his head under cover of the flood. Marking his jerky course with an underwake and a shiver of the rushes, he reappears to calmly observe you from a safer distance.

Custom outwears his diffidence and the fervid sun warms him to more genial moods, when he will suffer you to come quietly, quite close to him and tickle his sides with a bullrush, till in an ecstacy of pleasure he loses all caution and bears with supreme contentment the titillation of your finger tips. His flabby sides swell with fullness of enjoyment, his blinking eyes grow dreamy and the corners of his blandly expressionless mouth almost curve upward with an elusive smile. Not till your fingers gently close upon him does he become aware of the indiscretion into which he has lapsed, and with a frantic struggle he tears himself away from your grasp and goes plunging headlong into his nether element, bellowing out his shame and astonishment.

Another day as you troll along the channel an oar's length from the weedy borders, you see him afloat on his lily pad raft, heeding you no more than does the golden-hearted blossom whose orange odor drifts about him, nor is he disturbed by splash of oar nor dip of paddle, nor even when his bark and her perfume-freighted consort are tossed on your undulating wake.

As summer wanes you see and hear him less frequently, but he is still your comrade of the marshes, occasionally announcing his presence with a resonant twang and a jerky splash among the sedges.

The pickerel weeds have struck their blue banners to the conquering frost, and the marshes are sere and silent and desolate. When they are warmed again with the new life of spring, we shall listen for the jubilant chorus of our old acquaintance, the bullfrog.

## *A MASSACHUSETTS MUDDLE.*

THE Massachusetts Association for the Protection of Game and Fish caused the arrest of a Boston restaurant keeper for having exposed quail for sale in the close season. The defense set up was that there was no law in Massachusetts forbidding the sale of quail at any season of the year; and this defense was accepted by Judge Adams, of the Municipal Court, who thereupon dismissed the case.

This is the way in which such an anomalous condition of affairs comes about. The game law of 1886 in the first section forbade the killing of quail, woodcock, ruffed grouse, etc., between certain dates; and in the third section prohibited the sale of such game during the periods within which killing was forbidden by the terms of the first section.

In 1891 a law prescribing seasons for killing was adopted. This was an independent new law, not an amendment of the first section of the old law, which section was declared to be repealed. The repeal of the first section, it was held, nullified the third section with respect to quail and the other species designated.

While it certainly could not have been the intention of the Legislature to remove prohibition of sale in close season, and while the enactment of the 1891 statute in its present form was manifestly a piece of carelessness, Judge Adams's ruling appears to be sound. But whether or not the present law forbids the sale of game in close season, it may be practicable to provide a new law early in the next session; and if that shall be done, the consequences of the blunder cannot prove of a grievous nature. The moral is that eternal vigilance is the price of game protection, and the vigilance must be exercised in the framing of statutes quite as diligently as in enforcing the laws.

REV. J. B. HARRISON, the well known apostle of forest preservation, has been talking on his favorite theme to the people of his own State of New Hampshire. Public forestry meetings have been held in the midst of the political campaigning, and that under such conditions the gatherings have been large and the audiences interested is a demonstration both of Mr. Harrison's skill as a teacher and of the gratifying growth of forestry sentiment. Mr. Harrison has a way of talking hard, common "horse" sense; he discusses the forestry problem on the hard-pan basis of the profit and loss involved for the people of the Granite State; and by so demonstrating the practical bearing of the subject upon the financial welfare of the people, he is preparing the way for the adoption of a better and wiser economy.

## *THE FALL'S SHOOTING.*

UP to the present time the shooting in the Eastern States has not been good. Birds are apparently more plenty than usual, but they are very hard to find. This results from the extreme dry weather of the past two months, which has so parched the ground that the scent does not lie at all. The dogs cannot smell the birds, and either run over them without giving the gunner warning or else pass them by unnoticed. The result in either case is the same. This drought appears to have prevailed over almost the entire country, for the same story is heard from the Atlantic Coast almost to the Mississippi Valley. In a few places there have been local rains, which have moistened the ground sufficiently to make it possible for the dogs to use their noses, but such places are the exception to the rule. Out in Kentucky things are so bad that the field trials which were to be held there have been given up on account of the drougth, and the scene of the trials transferred first to Columbus, Indiana, and again to Mississippi.

But while the drought makes the shooting bad and the bags light, it is certainly a good thing for the game supply. There is always water enough for drinking, and the birds scattered out on the dry uplands are safe except when by accident they are stumbled on and two or three shots are had at the bevy. To one species, however, this dry weather brings danger: the woodcock cannot feed in parched, hard ground, and is obliged to resort to the swamps and wet places whose area is now so greatly contracted. Usually in autumn these birds are dispersed over a wide range of woodland and hillside, but in times of drought they may be found in great numbers in the few damp spots that remain in the dried-up swamps.

Reports which come to us from Connecticut and Massachusetts state that the woodcock are shifting now, and under ordinary conditions the flight should be at its best at this very time. Nov. 10 is a red-letter day on our woodcock shooting calendar. All New England reports tell of abundance of quail and ruffed grouse, but there is universal complaint of the dry weather, and the leaves are said to have hung on the trees longer than usual.

But little can be said as yet of the prospects for the duck shooting. We hear prophecies of a cold, hard winter. It is said that there has been an early and unusually large migration of small birds, that the wild geese and ducks have all gone south already, that the muskrats have built high, that the goose bone is hard and dark, and that the corn husks are thick. So, it is said we are to have a hard, long winter. Let us wait and see. A cold, stormy winter usually means good fowl shooting.

## *SNAP SHOTS.*

It is understood that a shipment of wild animals captured in the Yellowstone National Park is now on its way to Washington for the National Zoölogical Park. The list is as follows: Two yearling elk (male and female) and two calves (male and female), one mule deer (female), two red foxes (male and female), two black bear yearlings (male and female), three bear cubs (two male, one female), one badger (male), one beaver (male). The three bear cubs were taken from two different mothers, both of which were followed by twins. One of the four captured cubs died. In each of these two families the mother and one cub was cinnamon color, or brown, and the other cub black. Captain Anderson, Superintendent of the National Park, had some other animals in captivity, but—one night his yearling bullock broke into the pen where the antelope was kept, and the next morning it was found that the latter had gone where the good antelope go. A wolverine died. The shipment under consideration will, however, make a considerable addition to the stock of animals now in the National Zoölogical Park.

The late Elihu Phinney, of Cooperstown, New York, was a life-long, consistent, active and influential advocate of the protection and preservation of nature's bounties of fish and game. He believed and held to the belief by preaching and practice and by example that one generation should enjoy these good things of the earth, only with a jealous regard for the generations to follow.

It is hoped that there may be a good attendance and a profitable discussion of interests at the meeting of the executive committee of the New York State Association for the Protection of Fish and Game at Syracuse next Thursday.

# The Sportsman Tourist.

## A TRIP TO WYOMING.

THE town of Gardiner, built on the northern confines of the Yellowstone Park, is a typical frontier settlement. The Park line is said to run through the middle of the single street. South of this the mountains rise from a narrow belt of plain, bordered on the east by Gardiner's River. North of this line a few frame or log buildings stand on a lofty bluff some 300yds. from the Yellowstone River. The intervening space is occupied by an assortment of empty cans, old hats, broken stoves and cats who are, perhaps, enjoying a tenth existence, but who have certainly lost grasp of their nine earthly lives.

These acres, generously provided with material for a widespread pest, are purified by the clear air and seem to be no source of anxiety to the natives. Indeed, when I called the attention of my courteous host to a smell which indicated an open drain, at least, he, being furnished with a sense of humor, told me that that was impossible, because there wasn't a drain in the place.

From Gardiner we packed south through the Park. It will not be wise to give here those details which are set down in the excellent guide books which one can buy. We had an advantage in starting after the tourist had finished and being, for the time, in sole possession of our route of travel. We camped in full sight of Old Faithful, who tossed up sheets of shimmering silver for us by sunset and moonlight, and sunrise, and other kinds of illumination. We looked at leisure into the boiling blue of the crater of the Excelsior Geyser and rode at ease, except for the freaks of the pack train, along the beautifully tinted beach of Shoshone Lake.

And here I make a contribution to the literature of beaver sticks. The beach at Shoshone Lake is composed of pebbles of volcanic origin of dim blue and pink and maroon shades of color, and these pebbles stretch out from the shore under water for a considerable distance. Behind the beach at one spot there is a little slough or pond with a still inhabited beaver house at one end of it, and a plain fresh drag trail from the slough, through the willows and across the beach.

Now white wands recently peeled by beavers lay off shore a little distance in the lake, some few of them floating and others resting on the pebbly bottom.

It will be seen that these latter could not have been held in place by being imbedded in mud or other adherent matter, for the bottom, as I have said, was of pebbles. Moreover, the sticks were freshly stripped, and the fact that some few were floating on the surface goes to show that they were not waterlogged. Now what held down those sunken sticks?

Through the Park we traveled by wagon roads and beaten trails and saw no game, not even a porcupine; but on the edge of the timber reserve we caught some trout, and our bill of fare took on an air of more varied luxury.

We had a simple but effective outfit. A lodge and a large wall tent, two excellent men, ten ponies, my companion the doctor and myself. One article of furniture I had never before seen carried with packs, that was a sheet iron stove. It was about a foot wide, nine inches high and two feet and a half long. It had a door in one end, a stove hole and a place for a pipe on top, and it had no bottom. You cleaned off a space of ground, set down the stove and heaped a little dirt around the edges. Then you had an opportunity for some cooking and a great deal of grateful warmth. To pack this article you turned it over, put in it the stove pipe, in a telescoped condition, also the bake oven, the hobbles and ropes and other loose things, enough to fill it up; then it was corded up in a canvas and had the excellent virtue of exactly balancing my bed on the other side of the horse.

We followed down the Snake River and came out of the timber reserve near Jackson's Lake. For some time we had been able to catch glimpses of the point of a thin blue cone over the ridges that bounded our view. Here we came in full sight of the Grand Teton, to which the cone belonged, as well as the rest of the Tetons, including Mount Moran. This broken range rose on the west and south of Jackson's Lake with Alpine grandeur, strongly resembling the northern spurs of the Rockies in the chief mountain district. Mount Moran, probably because it was nearest to us, seemed the most impressive. It purported to have no secrets and did not hide away its ice fields in dark recesses, but carried them like breast plates on its broad, scarred front.

There is said to be an account extant of the ascent of the Grand Teton by an early explorer; but cautious rumors say that the ascent has never been made otherwise than in fancy.

The explorer's imagination in that case rose to a creditable height, and an object in life is still left to some climber who has conquered all the world beside.

From Jackson's Lake we came to a neighborhood much frequented by elk. The mountains were rather low, and the ascents easy. There were long, grassy openings in the evergreen woods that clothed the greater part of the mountain sides, and here and there were aspen groves and patches of willowy marsh. On favorable nights we could hear the bulls bugling their long flute-like whistle with the hoarse roar that follows. Often several old fellows would be holding concert at the same time. Sometimes, even, the bulls proclaimed their challenge during hunting hours, and helped us greatly. But to one earnestly desiring meat or trophies I address this word of wisdom: "Walk!" You will be told that you can ride all over the country, which is practically true; that elk take an interest in horses and come near a rider to study the mount, and other statements of this kind. It will save a great amount of labor to ride to the vicinity where you hope to find your game. Then get off and use all the learning at your command about the direction of the wind and noiseless methods of approach, for, if game be scarce and shy, you can get it in no other way, as a usual thing.

Fortunately in our case game was neither scarce nor shy. On some days you would see nothing but a few porcupines, more or less. At other times one or the other of us would see as many as 20 or 30 elk in an afternoon and very likely get a shot at one of them.

I myself wore a mascot in the shape of a cartridge belt with a bear's head engraved on the buckle. This was found by our packer, George Gray (his true name was Arthur Henry, but no one, except perhaps his sponsors in baptism, called him that), at an old camp, and I put it on because a great hunter among my friends wears one like it. The first day it brought me a spike bull, and I astonished the company by bringing the meat home myself. For it appears to be the custom even among the adventurous Britons who frequent the region to have a guide always at their elbows to insure against losing their bearings, and always to leave their dead for the guide to cut up and pack in the next day.

The mountain where I killed this bull is called Gravel Peak, and its summit and northern exposure lie in the timber reserve. The peak is composed of pebbles of volcanic origin like those on the beach at Shoshone Lake, but bound together by a hard cement so as to make an enduring rock. On a peak of similar formation a little further east, I found quite a lot of silicified wood and brought down with me a large piece to confound all doubters.

We next moved camp to a small lake higher in hills. On the way thither the Doctor and I road ahead, spied some elk afar off and had the luck to successfully stalk a reasonably presentable bull. Another surprise was in store for our men, for we not only found the way to the new camp unaided, but brought in the bull's head with its accompanying pelt packed on one of the horses.

This we were told was quite unexpected in dudes; for it must be understood that all persons not native to the land are dudes in this region. Even the most battered old campaigner seems to have taken a plunge into the fountain of youth and fashion when he strikes the limits of the Park.

An exception may perhaps be made in favor of Mr. Roosevelt, who appears to have the faculty of awakening the deep regard and admiration of the mountaineers, but the rest of the world are dudes without escape.

At the little lake we stayed for some days with only one noticeable excursion.

It was storming snowballs, that is small round hard pellets of snow which could be classed neither with flakes nor hail, nor sleet. Now and then the storm would lull a little and a faint bellowing came down the wind.

Billy (whose real name is Thomas Elwood) said that the noise indicated that there was an elk within a mile of us. The estimate did little credit to Billy's ear for music, but it was my day for a walk anyhow so I set out up the mountain.

The storm kept up and the intervals of silence on the bull's part became longer until I thought that my intended victim had left the country, but at last my courage was revived when I had almost reached the crest by again hearing the well-known note.

Peering over the top of a ridge I saw on an adjoining knoll, some three or four hundred yards away, a famous sight. A herd of about thirty cows were held there by five or six bulls. The latter wandered through the band lowing or harshly bawling in noisy challenge, like domestic cattle excited by a storm. The cows that showed a tendency to stray were promptly followed and prodded back by some watchful male, and once two old fellows, after an infinite amount of fuss, lowered their heads and charged together with a crash. For a moment they swayed, pushing against each other; then one of the combatants jumped lightly aside and the victor resumed his pompous patrol.

The bulls seemed to have several notes, but the usual voice was a strident, reedy whistle followed by a kind of barking bellow. I did not notice any clear flute notes, and thought that perhaps the latter might be an effect of distance, rendering the strident quality of the whistle inaudible.

For about a quarter of an hour I sat watching the show, until I began to grow uncomfortably cold, then came the question of getting a shot.

The distance was too great to select any single animal in the shifty crowd with a reasonable chance of hitting it, and I wanted no cows nor did I want to cripple any animals uselessly. Silently backing down into the gulch, I followed behind a fringe of trees, and when I again came in sight of the elk I found that they had come part way to meet me. The cows were lying down and a small bull stood a hundred yards away. Soon a big fellow took the place of the smaller bull, and I took quick aim and dropped him.

The rest of the band plunged down into some desperate country on the other side of the summit, and although two or three vainglorious males waltzed around showily in the rear I was too much shaken by the climb and the cold to take a decent running shot. So I took off the head and pelt according to the rules of art, and got back to camp well content, while the storm held on with increasing vigor.

Nothing of great interest occurred after that during our stay.

Once I heard the shrill squeak and saw the stumpy little body of a chief hare among the slide rock, but though we changed camp we got no more good heads. A partial thaw had taken place, and the crumbling of the crusted snow made stalking difficult.

My companion, I forgot to say, had already secured his maiden antlers, and I got one bull calf to replenish our failing larder, beside buying a bear skin from some trappers near by.

Then we dropped down the Snake River, riding through lovely weather, the air crisp yet vibrating with the rays of the clear autumn sun.

We crossed the Teton Pass, getting views of those impressive mountains from every side. We found a genial, accommodating Mormon, who took our baggage in his wagon and drove us in two days to the railroad, where we again entered the great and usual world.

H. G. DULOG.

### Dry Covers in Pennsylvania.

TOWANDA, Pa., Nov. 5.—The season for quail and rabbits opened in this State on Nov. 1. A number of our prominent sportsmen tried their luck afield, but found quail very scarce and hunting difficult for dogs, owing to a very dry autumn. Snider, Brown and others made a bag of two grouse and one woodcock; Laplant, shooting alone, killed one woodcock, one grouse, one quail and one rabbit; Graves, alone, three woodcock; Turner, Decker, Montanye and Dittrich together bagged seven quail.

W. D. DITTRICH.

## MOOSE HUNTING IN NOVA SCOTIA.

*Editor Forest and Stream:*

My last moose hunting trip to Nova Scotia, I am sorry to say, was not as successful as I hoped. I chose a rather out of the way place as a starting point, as heretofore I have found too many parties of hunters going in by way of the more accessible points.

Almost the first thing we saw after landing in the Province was the head of a large bull which was claimed to have been killed the day before.

Our hunting grounds were on the headwaters of the Shelburne River, and we were to meet our men with ox team and provisions at Indian Fields. We had a drive of ninety-five miles, taking nearly two days. We found our men waiting for us, and loading our things on the ox team went some five miles back across the barrens to where we made our main camp. We kept our camp here for a week, going out every afternoon and staying out all night on the grounds, where we were to call the next morning. We had four unusually good mornings for calling. On the first my companion heard a bull, but he wouldn't come. That was the only indication of moose during the week. I saw quite a large bear on a barren one afternoon, but failed to get a shot.

We then decided to move our camp, and went some nine miles further and called morning after morning with no success; in fact there did not seem to be a moose in the whole region. One night it rained quite hard and we stayed in camp. Toward morning it cleared, but was quite windy. My companion woke up about daylight and thought of going out a short distance back of the camp to call. His man was willing to go, but said there was hardly any chance, so it was given up. After breakfast we were sitting by the fire, when my man, who had gone some 100yds. back of the camp, came in saying there was a moose in some birches back of the camp. We took our rifles and crept out, but it was too late. It seems that the moose was traveling across the barren and came within 250yds. of the camp and turned and ran back; and my man heard him when he went through the bushes. From the size of the track and the noise his horns made we thought it was a large bull. In the afternoon we started out each with his caller, going in a different direction. That night I heard two moose and tried calling them in the morning. My caller, who was on top of a ridge, saw them both at quite a distance away. They walked slowly into a thick spruce swamp and after waiting about an hour we decided they had lain down. My man proposed that we should try to still-hunt, I said, "We will go to camp and get my companion and bring him over here this afternoon and perhaps he may get a shot in the morning, as the moose are likely to stay here if left undisturbed." So we went to camp and found my friend rather blue. He had tried calling the night before just at sunset, and a moose had come when it was too dark to see him, within 60yds. of them and had got scent and gone off. I told him to "brace up," we had two waiting for some one to kill them.

Back we went that afternoon and at night heard the moose again. At daybreak we placed my companion where we thought the moose would come out, I went some distance away on the other side of the ridge and sent the caller to the high ground to call. I stayed in my place for more than an hour without hearing anything. I noticed the caller was not calling, and looking up to him he made signs that he had seen the moose. I left my place and worked quietly toward where we had left my companion, intending to get within some 300 or 400yds. of him. Suddenly I heard the moose moving in the swamp directly opposite me; I crept in at once toward them and got a glimpse of one. I saw they were walking along just in the edge of the swamp, and I backed out from where I was and ran some 150yds. to get in ahead of them. I crept toward the edge of swamp again and got there just as the moose came along. I killed one almost in its tracks and wounded the other. The wounded moose went off through the swamp and we did not follow him. I did not get a chance to shoot him where I wanted to, as there was a large rock between us and I had to stand on my toes to see over it, and had to shoot him high in the shoulders. In fact, I ought not to have tried to kill both, one was enough and gave us all the work we wanted to get it out. It seems both of the moose came within about 60yds. of where my companion was posted and stayed for nearly an hour in the swamp directly opposite him. He didn't know what to do; he could hear them moving about and see the tops of the birches and small trees sway about as the moose brushed against them; but he never got a glimpse of them, as the growth where they were was very thick. He kept thinking they would show up on the edge of the thicket and was afraid he would start them if he tried to get nearer. Finally, they walked slowly in my direction.

My time being up, I had to start out. I had arranged to be in the woods two weeks, and the morning I killed the moose was my last, whether I killed any game or not. My friend stayed a week longer, but did not get a shot.

My companion on this trip was a gentleman from the West, who had hunted and killed a good many deer. He had never hunted moose, and wanted very much to kill one. He certainly deserved to get at least one. He worked hard, and had traveled a long distance, but luck seemed dead against him.

Altogether it was the poorest hunting I have ever had in Nova Scotia. Heretofore I have always heard a good many moose and seen plenty of fresh signs. I rather blamed myself for choosing such a place in preference to the region I hunted last year; but on my way home I met one of a party who had been hunting on the grounds I was on last year, and he said the woods were full of hunting parties; only two moose had been killed, and his party had not seen one, had heard one answer their call, but he did not come. I heard from another section, where I hunted on two previous trips, that but one moose had been killed there, and one of the best native hunters had spent three weeks without getting a shot, it being the first time in five years that he had come out without killing one or more moose. It certainly seems as though it was an off year in the Province for moose.

The grounds I hunted on my previous trips were not very far from where we were this year; a day's tramp from our last camp would have taken us to either of the places. An acquaintance of mine hunted the last two

seasons on the same ground we were on, we made one of our camps at the spot he camped on last year. He killed on his two trips three moose, wounded three more, saw twelve in all, and heard others. Yet we could not find them, nor even see them. I still think there are a good many moose in Nova Scotia, but I think the day for successful calling has passed. The moose have been called and fooled so much, and have heard so many unearthly sounds intended for calling, that they are very suspicious. An old hunter, who came to our camp one day, said, "I have hunted moose for fifty-two years and have killed hundreds of them. Years ago I could go out and call, and the bulls would answer and keep answering as they came. Now, darn 'em, not one of five will answer at all, and, if they come at all, come quietly and from some direction where you are not looking for them." I think the old man was about right, and that many a moose comes to a call, but you never know it. For instance, a bull comes up quietly to a call, he is likely to stop in the edge of some thicket three hundred or more yards away, and stand there watching for a long time; and if you move at all he sees you and turns around and sneaks off; and you never suspect there was one about. Also they will circle around the place the call came from, and if there is the slightest wind they quietly leave when they cross the wind of you.

There is this much about moose calling as it is done in Nova Scotia, it is pretty hard work. Staying out night after night, some two to four miles away from camp, without a fire, so as to be ready to call at daybreak, gets to be rather monotonous if you do not hear or see your game. Winter hunting in the Province is rather hardier. I tried it once, and although we killed three moose, I do not want any more of it. After the rutting season is over, about the 1st of November, is said to be a good time to kill a big bull. At this time they do not travel much, but browse a good deal and lie down often, and prefer to do so on open ground in the sun, and can be seen at quite a distance; they are very indifferent and do not seem to be on the lookout for danger. At this time they are good for nothing as far as the meat goes, being very thin. I have never hunted them at this season; the above is what I am told by the native hunters.

The game laws of Nova Scotia as far as the protection of the moose is concerned are simply a farce. The Provincial government says, "In order to preserve our moose from being exterminated we must impose a hunting license of $30 on each non-resident sportsman." A sportsman goes to Nova Scotia on a hunting trip; he spends his money on the steamers, railroad, stage lines; buys his provisions there, hires his men, and for every moose he kills will leave at least $200 in the Province; that is, averaging the number of sportsmen with the moose they kill. He may not see a moose or fire a single cartridge from his rifle, yet the protection of the moose requires that he shall pay $30 extra for his license just the same. I know two men, each of whom spent between two and three weeks hunting moose; they left over $400 in the country. Neither of them got a shot at a moose; the only use one of them made of his rifle was to shoot at a hawk, which he missed, the other only shot a few shots at a rock, yet they paid $60 license fees, making their trip cost them fully $500.

Not one moose out of every 25 killed each season is killed by visiting sportsmen. The native hunters, the Indians and the white men are the ones who will exterminate the moose. They kill them when and how they please; they snare them, kill them with dogs, in season and out, with no regard to numbers. How often are they fined? Occasionally a snarer is caught. Last year some were caught. There were about a dozen in the gang, but there was only evidence against two or three. They were find, but I understand a compromise was made, and it was not to the full extent. The rest of the gang made up their share of the fine. They were afraid the convicted ones would squeal if they didn't; it did not cost them as much each as the sportsman pays for his license. If the moose in Nova Scotia are not exterminated until the non-resident sportsman kills them all they will last until the day of judgment. C. M. STARK.

## ECHOES OF THE PANTHER'S SCREAM.

*Editor Forest and Stream:*

I have read with considerable interest the discussion concerning the scream of the panther, cougar, mountain lion or California lion. Negative evidence in this age of investigation is not considered to be of much value. No one should make the mistake of supposing that because he has never observed a thing the declaration of one who has been more favored is erroneous.

As the result of twenty-seven years' observation and, it might be said, intimate acquaintance with this animal in all the Western Territories, the writer can say most positively that it can, and occasionally does, cry, scream, howl or yowl, whichever the observer may prefer; and that there is no more startling, blood-curdling sound than its voice heard close at hand in the silent woods after dark, when they are most given to crying.

My acquaintance with the cougar began at the mouth of the Columbia River in 1865. I had killed three elk and was, with one companion, packing out the first back load about dusk to the canoe, in which we had left our arms. We heard stealthy steps following us but a few feet behind, which we thought was the noise of rabbits in the dense sal-lal brush. We were soon undeceived, however, when the most weird and mournful cry rang out, loud and prolonged, causing us to make a hasty rush to the canoe, into which we piled and pushed from the shore. Although we expected to pack out the rest that night we concluded not to do so. In the morning we found two quarters eaten and the rest mauled through the dirt and brush, which everywhere bore the marks of their remarkably large feet and claws.

In 1870 I established a camp in a wild part of the Medicine Bow Mountains, Wyoming, which was my home for over two years; during which time we depended entirely upon large game for fresh meat, of which we always had an abundance hanging in camp. The second night of its occupation the mules gave notice that something was prowling around, which we thought to be wolves. After everything was quiet there arose the old familiar call of my tawny acquaintance, waking everybody and causing the mules to snort and plunge.

Our camp was infested with these animals. We never knew how many were around, but were certain of two, who fearlessly entered camp on dark nights for the refuse of the cook house, and kept up such a fearful screaming that the men complained they could not sleep and requested permission to put out poison to get rid of them. I sat up many nights to get a shot, often crawling stealthily toward their voices, only to hear them soon after in an opposite direction. One night when the moon was bright I heard the call and saw the cougar distinctly outlined on a ridge at the distance of about seventy-five yards. It was apparently the size of a large Newfoundland dog and was switching its sides with its long tail. I waited until it called again, then fired and missed. Twice we saw one plainly just before sunset on a prominent rock overlooking camp, and each time our attention was first called by its voice. I endeavored unsuccessfully to catch them in beaver traps, and spent days hunting them in the mountains without ever getting a fair shot.

On one occasion while hunting several miles from camp we killed a number of elk which we spent the afternoon packing out in reach of a wagon, and then laid down covered with blood in a cottonwood grove to sleep the sleep of tired but happy hunters. We heard a faint rustling in the dark, evidently not more than 15ft. from our heads, which we agreed was a skunk or marten, when again the voice of this night prowler arose, raising at the same time our hair until we could get hold of the rifles. On this occasion I heard for the first time a "spit" catlike sound which sometimes (perhaps always) follows the loud cry, but which can only be heard when close to the animal. In the morning we found about one-third of our meat eaten; one quarter, hanging 8ft. high, had been pulled down and carried about 60yds. Although our meat was not 200yds. from us we heard not a sound during the night in that direction. We had evidently been trailed to our resting place before they touched it.

The disturbance in camp from these animals finally became so great that I gave permission to put out poison, and although we could find but one half-grown one, we never again heard their voices, much to my regret.

To me the cry has always seemed like *moo woo-o-o-o-woo*, long drown out with a rising inflection, followed by falling, and sometimes terminated by *yow*, which then has an unmistakable catlike sound.

I do not mean to state that the animal is always caterwauling like a vagabond tomcat, for a more stealthy, wary animal, when necessary, does not exist; but I believe its voice usually needs the stimulant of hunger or the scent of blood and fresh meat.

If any one is further interested in this subject let him go to the Central Park menagerie, New York city, about 4 P. M., feeding time. He may then hear some of their cries, modified of course by the restraint of captivity.

W. L. CARPENTER.

*Editor Forest and Stream:*

If a cat has nine lives a popular fallacy must have at least ninety and nine, for it is almost impossible to kill it and its name is legion; and they exist in all forms and shapes.

Take for instance the so-called equinoctial storms. Notwithstanding the assertions of meteorologists and weather experts to the contrary, 999 persons out of every 1,000 of our intelligent countrymen believe and are certain that we are in for a big three-days' storm whenever the "sun crosses the line."

Until quite recently columns of (figuratively speaking) "blood-curdling" tales have been written and published about the wounded "grizzly" following the terrified hunter up into a tree, where a desperate combat would take place, generally ending by the hunter with his big hunting knife hacking off one of old "Ephraim's" paws, etc.

I was, I believe, the first to assert through the medium of FOREST AND STREAM that *Ursus horribilis* is not a tree climber; still it is now a common belief among the miners and hunters of the northern Rockies that the "silver tip" can climb a tree.

I first made my acquaintance with the panther in my early boyhood days, only forty years ago, and have kept up a partial acquaintance since that date. In my early days when I heard an unusual sound in the woods or on the mountains I was told that it was a "panther's scream," and I then believed it. As I grew older I learned that while every old "settler" and hunter said that a "painter" screamed like a woman, none of them ever saw one of those animals while actually screaming, and no two would give the same noise in imitating the scream, though all agreed in one particular, that when surprised while eating or standing over the carcass of a deer the "painter" would, open-mouthed, utter a shriek like *yik* or *ye-ek*. This sound I have myself heard them make when disturbed at their feasts.

When I was old and large enough to carry a rifle, I began to follow up these "painter screams," not only during the daytime, but with companions on bright moonlight nights, and on those hunts we never saw any fresh signs of a sneak-cat; but we learned that a screech owl could give a variety of screeches outside of their regular gamut, and we also learned another fact, which is not generally known even among hunters, that the red fox can and does on certain occasions give a "hair raising" scream that would make the woods and mountain sides ring and re-echo seemingly for miles around us. On those night hunts we had many other interesting experiences, though we caught no *Felis concolor*.

In some localities along the Pacific slopes and on Vancouver Island, in British Columbia, panthers are very numerous, and I have found the Indian hunters there familiar with their habits. When questioned about the panther's scream, they invariably reply in their Chinook jargon. "Swad-wa wake hy-as skoo-kumely. Lee-loo pee sis-ki you tinas puss-puss nah," which means, "Panther never scream, wolf and bobtail lynx hallo." Still in the face of the above facts I am forced to believe that in some southern localities and under certain conditions that the panther does scream, for such straightforward testimony as "Mississippi Lowlands" gives us in your this week's issue, cannot be disputed. The writer accompanied by gun and dog intends to spend the coming winter in the Mississippi lowlands, and we pray that we may ourselves hear that sound.

My personal experience which extends well over the northern portion of this continent, is that the opinions of the average white trapper and hunter (unless he happens to be an educated man), cannot always be relied on; they are full of fallacies and are oftentimes ignorant of many traits and habits of the animals they hunt and catch, though the said habits are well known to the naturalist. When any of the northern readers of the FOREST AND STREAM meet a person who has heard a panther scream, get that person to give you an imitation of the sound, and make a note of it. After you have met a half-dozen or so of such persons, refer to your notes and you willfind that each person differs from the others as to the sound of the much talked of scream.

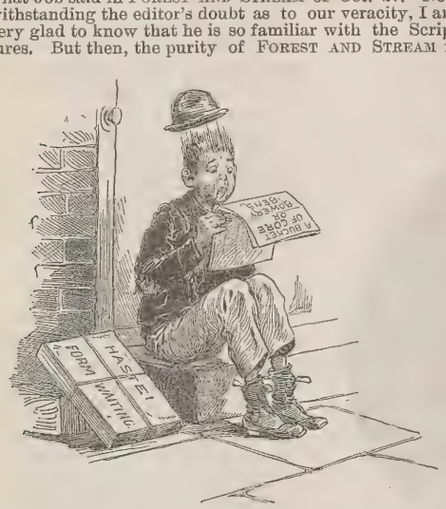
I tender to you, Mr. Editor, my humble apology for having unwittingly in my former letter reopened this subject, and will for some time to come listen and not talk. STANSTEAD.

HIGHGATE, Vt.

## HOW A SNAKE SHEDS ITS SKIN.

BUFFALO, N. Y.—*Editor Forest and Stream:* Among the contributions of your correspondents who have discussed the manner in which a snake sheds his skin, I do not remember that the actual occurrence of molting has been witnessed. As such an event—or part of it—once fell under my observation, I send it.

The snake was a rattler about two feet long, which had been caught near Portage, N. Y., and was on exhibition in a glass case at a drug store in Perry, N. Y. When dusting off the case in the morning the proprietor noticed that the snake's skin was rough or loose at the back of the head. A little later a distinct ring of new skin was visible between the head and the old skin. When I saw the snake in the afternoon, about four inches, or perhaps six, of the body was free from the skin, and the work of emergence was proceeding slowly and with difficulty. The body would shorten and expand under the old skin very much as the body of an eel grows rigid in the hand when grasped. Then while the old skin was held tight by the expanded part within, the part immediately in front of the old skin extended, narrowed, and one or two rings slipped out of the skin, which was slowly inverted just as the finger of a tight glove is inverted when it is removed from the hand. After a period of rest the process was repeated, each effort freeing, I should judge, about one-sixteenth of an inch of the body. As the box in which the reptile was confined was less than a foot deep, the opportunity for observing the shedding was exceptionally good, since no one would care to get in such close proximity to a rattler in his native wilds. The whole process was not completed when the store closed for the night, but in the morning following the cast off skin lay on the bottom of the box, while his snakeship was resplendent in a bran new suit. I inclose a photo of a young woodcock which our botanizing party found in the spring, which may serve as an appendix to the "Mrs. Woodcock's Home" series. I. P. BISHOP.



# Camp-Fire Flickerings.

"That reminds me."

## "PANTHERS AND THE HAIR."

ERROR driven in and clinched is exceedingly hard to eradicate. Even when the clinches are cut it don't come out easy. It's easier to stay in a rut than to climb out. How many thousands of years did it take to disabuse men's minds of the belief that the earth was flat, or that the sun swung around the earth, or that an eclipse of the sun was a sign of impending doom, or that witches were realities? How many thousands of people nowadays believe in the sea serpent, hoop-snakes, that potatoes planted in the full of the moon will all go to tops, that an opossum's young are born in the pouch, that panthers don't scream, that snakes spit, that a hen "sets" and that whisky is a good thing for the stomach? The idea that a person's hair don't rise on occasions of intense fright is one of those errors people hang on to simply because they have never experienced or seen it. That proves nothing. That would be great evidence in court, now, wouldn't it?

The editor calls upon us to state whether we are telling the truth when we say that "our hair stood on end," and says that "scientific authorities (!) assure us that the hair rising belief is a notion without substantial basis in fact." Authorities indeed! Much they know about it! Why there are plenty of authorities ready to make affidavit that they never saw a panther, yet they exist. This is more of that so-called science that discredits the Bible, and promotes unbelief in that sacred book. You heard what Job said in FOREST AND STREAM of Oct. 27. Notwithstanding the editor's doubt as to our veracity, I am very glad to know that he is so familiar with the Scriptures. But then, the purity of FOREST AND STREAM is

Phenomenon of the effect of a panther story on a messenger boy as he hastens from the photo-engraving establishment of Mr. H. C. Brown to the FOREST AND STREAM press rooms with cuts that the make-up is waiting for.

evidence sufficient of such familiarity. The idea of so-called authorities putting up their mental "five" against such an array of opponents as was marshaled in the issue referred to is simply ridiculous. Men who have unexpectedly been saluted by the blood curdling scream of the panther, or have come suddenly face to face with a grizzly don't want to be bothered by "authorities."

I suppose such "authorities" would claim also that "there is no substantial basis in fact" that blood curdles. Here is opportunity for more argument, but as Kupling Ripyard says, that is another story. When a man feels his hair stand up, he has no use for argument. In proportion as a man has brain power so does it act on the follicular nerves running to each individual hair. The brain acts in different ways. In the case in question it is unconscious cerebration, as it is in cases where hair is turned white from fear or fright. Authorities don't dispute the latter, do they? Scarcely. Well, if the brain can dissolve the pigment in the hair, as an electric current is shot through any substance to alter its consistency, why shouldn't it have power to elevate the hair? It takes men of brains to experience such shocks. An idiot couldn't have a hair raising, and I don't believe an "authority" could either. Job and Shakespeare, and Virgil and Judge Greene, and Arefar and Mr. Rushton and the rest of us sportsmen know whereof we speak.

There was a man once, who, I think, lived up in Wisconsin, and he went out to the woods to chop wood, and he had on a cap over which he tied his handkerchief to protect his ears, knotting it under his chin, for the weather was cold and windy. Suddenly from out a thicket he was approaching, there smote upon his ears the awful, hand-in-your-checks scream of a panther, such a scream as nothing in the wide world but a full grown healthy panther can emit. The man forgot his axe, forgot his dinner pail, forgot everything but his legs and home and put straight for it, and when he got there, which he was so fortunate as to do, and attempted to remove his cap, and found that his hair had risen straight through it (for it was tied down and couldn't rise as they usually do), and had clinched his handkerchief so that it was woven fast to his cap, and that the hair follicles had become so shriveled and weakened from fright that a mass of hair came off with the cap, I say do you suppose that man wanted any authorities to attempt to prove to him that hair don't rise? When a man says he knows a thing by such experience, that closes debate. O. O. S.

### Literal or Figurative?

THAT is the question FOREST AND STREAM asked me in issue of Oct. 27. I delayed answering that I might think about it, and I have come to this conclusion. It was a figurative expression that I believe to be the literal truth. Just at the time when a man's hair "stands on end," he does not have a mirror before him, and perhaps cannot be sure. But there's a mighty queer feeling under one's hat, that makes the owner think his hair knows about what's going on in the woods. If you don't believe it, take in the concert as I did, and then tell us what you think of it. J. H. RUSHTON.

### Frozen Fact about the Scream.

ARIRONDA, Oct. 31.—*Editor Forest and Stream:* Though long silent, I still live, and live to offer my unimpeachable testimony to the fact that the panther does scream, whereunto I will bring forward the attestation of the panther itself. It is as absurd to assert that the panther does not utter loud cries when moved by anger, love or pain, as it would be to make a similar assertion of the familiar domestic cat.

I have heard its cries under all these conditions a thousand times, while hunting and fishing and while sitting by my lonely camp-fire in the primeval wilderness of Adironda.

I may say, without fear of being accused of nervousness by those who have also heard it, that notwithstanding the frequency of the experience, each recurrence has caused an involuntary start, so loud, sudden and terrific is the sound.

But to the proof that the panther does scream. During the past winter a fine young cow belonging to a neighbor was killed by a panther while ranging the woods for browse, as is quite common with cattle of this region where hay is scarce. The cow had calved quite recently and had a full udder when killed. This the panther did not touch when at first he feasted on the carcass, and before he returned to obtain a second repast all that remained was frozen solid. The condition of his food supply did not prevent the panther from making a full meal, wherein was included the udder with the congealed milk which it contained.

The gorged cougar then retired to his lair, but not to sleep, for his interior was assailed by a colic so excruciating that he rushed forth in a frenzy of agony. Apparently not knowing or caring whither he went, he sped directly through the one short street of the little mountain hamlet where I now reside, and was seen by almost every inhabitant, myself included, all being summoned to doors and windows by the ear-piercing yells that issued from the fanged jaws of the monster.

At every leap he uttered as distinctly as a human voice could and with twenty-fold volume, the words, "I scream! I scream!"

Some would have it, "Ice cream! Ice cream!" believing that he made agonizing protest against the treacherous delicacy that was rending his interior, but I hold firmly to the opinion, and probably I am the coolest observer among some twenty-five or thirty, that he was proclaiming to all that he did then and there scream, as he most indubitably did.

And if my word needed such substantiation, I could bring the twenty-five or thirty good and truthful persons to bear witness.

There is some potent property in the atmosphere of Adironda which makes it impossible for one who breathes it to tell a lie. Yours for truth,

MAJOR JOSEPH VERITY, U.S.H.M.

# Game Bag and Gun.

*"Game Laws in Brief," United States and Canada, illustrated, 25 cents. "Book of the Game Laws" (full text), 50 cents.*

## A MAINE HUNT.

THE reports of big game in Maine continue most remarkable. There is not the slightest doubt but what deer have made a big gain during the year, and there is little question but what more moose have been killed in that State this season thus far than any season since the stringent game laws were passed. A gentleman from Phillips, Me., tells a sporting friend of mine that a moose has just been killed within six miles of that town, and he suggests that if my friend will come up on the first good tracking snow, he can be almost sure of a moose. A moose has also recently been shot in the neighborhood of Shirly, Me., in the last settlements of the Moosehead region. A gentleman, who has hunted in Maine a good deal, tells me that if the law preventing the shooting of cow moose at any time is enforced and the crusting of moose kept in check there is no doubt whatever of the continuation of that noble game in Maine.

Mr. W. H. Coggin, recently mentioned in the FOREST AND STREAM as starting for the woods north of Houlton, Me., on a hunting trip, has returned. To say that he is more than pleased with his trip would no more than express the truth, and to say that it was full of new experience and novel adventure to an amateur hunter, would give but a faint idea to the reader of what Mr. Coggin has gone through. He has a brother-in-law, Mr. W. H. Doane, of Hampden, Me., and this brother-in-law is a friend of Dr. W. B. Nason, of the same town. This Dr. Nason has a brother, C. A. Nason, who is one of the most enterprising and pushing lumbermen on the headwaters of the St. John River, or rather of the Aroostook River, a tributary of the St. John. His camps are on the skirts of Mooselick Mountain, and from that wild country he put in 4,500,000ft. of lumber last winter, and it may be mentioned that his logs were about the only ones that got down to the mills on the remarkably low water of the spring of 1892. It was done by sheer push, however. This winter he will put in between 3,500,000 and 4,000,000ft. Through the above-mentioned chain of friends Mr. Coggin obtained an invitation to visit Mr. Nason's camps for a hunt after big game. Included in the party were Mr. Doane, Dr. Nason, Mr. Charles Wales of Hampden, and Mr. Jacob Parker, a traveling salesman for Thurston & Kingsbury, a leading wholesale grocery house of Bangor.

The party went to Houlton, the principal town of Aroostook county, by rail. From that town to Mr. Nason's camps at Smith Brook it is seventy-five miles. Fifty miles of this distance, to the little plantation of Oxbow, the last settlement on the Aroostook River, the party made by team without particular adventure, except a splendid ride through a new country, with farms and forest intermingled. At Oxbow the real woods business begun, or rather some of it was water business, a most novel experience to the city boys it was. Twelve miles was to be made up the Aroostook River, here only a shallow stream, especially on the dry weather of the present autumn. A pair of horses were hitched to the bow of a batteau, the long and strong boat used by the river-drivers of Maine. All of the "duds" of the hunting party, as well as themselves were loaded into the batteau, and under the whip of an expert the horses were put into the middle of the river and started up stream. Rough and rocky is no name for the condition of that wild stream. Mr. C. A. Nason and a stout river driver were in the bow, to fend off the big rocks and boulders. But this was not all. The boat had to be pried off the rocks and skidded over the rough places. Part of the time the horses were in the water up to their bellies and part of the time they had to swim. Then the boat had to be poled with the harnesses unhooked. About the first adventure Mr. Coggin noticed was very early in the trip, when Mr. Nason jumped out into the cold water up to his armpits. This was done to fend off the boat from some rocks and to unhitch the horses. Soon the batteau came near going over, and all hands were jumping out into the water. Mr. Coggin suddenly found himself across the stalwart shoulders of Mr. Nason, and deposited on dry land. When questioned as to why he did it, as it was no worse for Mr. Coggin, in Mr. Coggin's own opinion, to get wet than it was for the others, Mr. Nason replied that he wanted him to keep dry as long as he could, for he would get wet enough before night without a doubt. This Mr. Coggin found to be true. All the boys were wet to their heads before the river part of the journey was done, and wading the river in October water had become a part of the fun, though a little cold at the first dip. But 12 miles up river was made in this way, when the batteau was left for another mode of travel, that first given to man. Camp Saponifique was at last reached, the first of Mr. Nason's lumber camps. But added to the part-by-batteau and part-on-foot travel, there was a distance of 12 lumberman's miles to be made on foot by tote road. Mr. Coggin expresses the same idea of State of Maine lumberman's miles as does every other sportsman who has tread them for the first time, "I'll wager that that 12 miles is more than 20."

But the Smith Brook Camps are reached at last, with the boys tired and so lame. "Oh, for home or anywhere!" "Can I ever sleep in these little bunks, with only spruce brush for an underbed?" "The cords of my left leg are drawn up so that I cannot straighten it. I shall die before I get out of this. Here I have been tramping in the mud and water all day, and not a particle of sweet cream or vaseline to rub my joints with! Why did I come There are not moose or deer enough in the Maine woods ——" "All up! all up!" in stentorian tones. "What is the matter? Oh, I have really been asleep. Now I know. The cook has come in from the cook and eating house and is summoning the men to get up to breakfast at 4 o'clock in the morning. In less than three minutes every man is out of his bunk and dressed. Dressed, did I say? Yes; well it did not take long, for they generally slept in about all their clothes. I will turn over and try to get another nap. No; I am awake and I will steal a march on the other fellows. I will quietly speak to my guide, that sturdy young fellow that the good Mr. Nason has assigned to me. I begin to like him already. Perhaps I can get a deer or a moose the first morning out."

Mr. Coggin was up before the rest of the party, and with his guide, each with a rifle, they started for "The Farms." "The Farms" are really no farms at all, but a long open space in the great woods, two or three miles up the side of Mooselick Mountain, above Smith Brook Camps. The opening is the result of a fire at some period, or else the soil is so thin that trees of much size do not grow. Here is a great feeding place for moose and deer. The guide suggested caution, as they traveled along over the newly fallen leaves. Soon he poked away the leaves. "There is a deer track," he remarked. "I guess he has not been gone a great while." Soon he stops again. "There is where a deer slept last night," he says. "He is not a great ways off, I judge." Mr. Coggin's heart was jumping out of his chest already. "Sh! sh! Look just behind that bunch of leaves and little spruces!" Mr. Coggin strained his eyes to the utmost, but could see no deer. The animal bounded and started to run, but the guide's rifle was to his shoulder in an instant, and though already on the run, the deer was hit. Mr. Coggin had previously suggested to the guide to fire; it was venison the first morning that he was after, and not mere sentiment. But the deer was not down, and by careful following, our friend Coggin got the final shot that finished him. It took but a moment for the guide to disembowel the game, a handsome doe. The body he threw across his shoulders, and they turned from the camp, already some three or four miles away, and down the mountain.

SPECIAL.

### The Rattlesnake as a Game Protector.

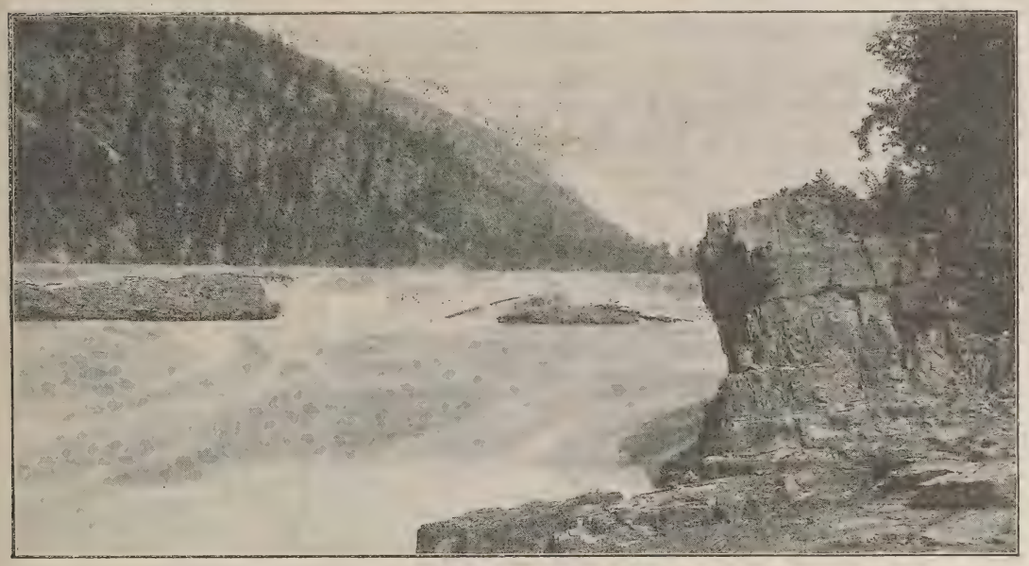
THE St. Augustine *News* of Oct. 31 reported:

"While Dr. Philips and Mr. S. W. Crichlow were out hunting yesterday, a valuable dog, belonging to the doctor, was bitten by a rattlesnake. The hunters afterward killed the reptile, but the dog is in a very serious condition. Mr. E. Oliveros, who was hunting in another place, came upon a rattler, which attacked his dog, but did not reach him. Mr. Oliveros killed the huge snake, and found it had eight rattles. None of the hunters were hurt."

Commenting upon which "Didymus" offers these reflections:

Somewhere in "Mother Goose's Melodies" may be found these warning words:

> Three children sliding on the ice
> All on a summer day,
> The ice it broke, they all fell in,
> The rest they ran away.
>
> Now had these children been at home,
> Or sliding on dry ground,
> Ten thousand pounds to one penny
> They had not all been drowned.



There's a time for all things—a time for sliding and a time for shooting, and had these "alleged" sportsmen been at home, or at some legitimate occupation instead of shooting quail in October, in direct violation of the law, ten thousand pounds to one penny they had not lost their dog, for rattlers have a subtler sense of honor than pot hunters, and merely stay out of their holes during the "close season" to protect the birds till the proper shooting season, when they quietly leave the field and go into winter quarters. But why "the subtlest beast of the field" should show such a lack of discrimination, and so little sense of justice as to strike the innocent and let the guilty go free is a mystery; surely the servant should not suffer for the sins of his master. DIDYMUS.

## MAROONING IN HIGH ALTITUDES.

BY CHARLES HALLOCK.

### Chapter I.

WHEN an Indian is about to die his highest aspiration, it is said, is to reach some ideal hunting ground where game is inexhaustible and intruders come not to vex or disturb. His upturned eyes have a far away look, and like St. Peter in his dream, he seems to see in the firmament aloft a great sheet let down by the four corners and filled with all manner of creatures which he is at liberty to kill and eat if he will but rise and bestir himself.

KOOTENAI FALLS.

But such elysiums are not exclusively ideal. That they exist in nature, even on the hither side of the great mortal divide, can be proven by other than second sight; and it does not require to die in order to reach them. For, right here, within the unexplored fastnesses of the five great parallel mountain ranges which rib the axis of the continent, the supremest realization may be found.

Within the month I have journeyed over the entire region made accessible by the Pacific extension of the Great Northern Railroad, which was opened to traffic only eight weeks ago. I have seen it all by daylight, and I can only say that the natural wonders which the new route disclosed were like a revelation from Olympus. Through gates ajar I gazed upon the red man's paradise! In the far distant perspective I saw the Temple of the Sun. Lakes bluer than Geneva laved the feet of the mountains. Rivers deeper than the gloomy Saguenay were hidden under their shadows. Cascades of crystal poured out of the defiles. Trout disported in every emerald basin. Elk, moose, deer, bear, caribou and cougar, I was told, thread each mural labyrinth. Goats, ibexes and bighorn sheep scale their precipitous sides. The sweep of eagles' wings brushes the snow from the shoulders of the high peaks.

Of such were cosmic glimpses going westward. Taking the back track slowly and doing the same route over again in detail, I have since been able to gather something more than a superficial view. Sometimes I would leave the rail and follow a pack trail for twenty miles astride a cayuse. Anon, I boarded a lake or river steamer and traveled fluvial distances greater than any in New England or the Middle States. Occasionally I made a dashing trip by canoe down some impetuous tributary. But, before I venture to delineate a region so interesting and eminently picturesque, and without doubt the most extensive natural game preserve in the world, it may be well in accordance with the editor's suggestion, to indicate what localities for hunting and fishing lie along the entire extension of the route from Havre, Mont. (where the road branches to Great Falls and Helena), to the Columbia River, a distance of some 650 miles, also what hotel and camp accommodations may be available, as well as the names of reliable guides, with some hints regarding present facilities for transportation. When I have enumerated these with some precision in the detail, the interested reader will be better prepared to appreciate the stereopticon of landscape which I shall spread before him. I will take him from Acheron to Parnassus.

Of course the country is all a virgin wilderness where no sound of axe or saw was ever heard until two years ago. Trees which lie prone are the victims of fire and windfall only. Unbroken forests cover the grand old mountain slopes and fill the gloomy cañons as far as eye can reach, and beyond their dark green limits tower the everlasting peaks white with snow. With the exception of prospectors, trappers and traders, who have tracked over it for half a century or so, few persons have penetrated its secret places. Nevertheless, there are well-beaten trails all over the flanks of the mountains and across the divides, and down to the lake side and river margin, where the wild goats and sheep clamber in single file in quest of precarious sustenance, and the herds of caribou cross in their yearly migrations, and the black bears and deer come out of cover to drink or forage in grassy meadows fringed with willow and red service berries. Very convenient for miners and sportsmen are these far-reaching thoroughfares which the instinct of brutes has demarcated with the intelligence of skilled cartographers. There are no surer or shorter paths to points of vantage.

In this secluded Arcadia I have loved to dwell, where the trout leaped in the outlet of the lake which flowed past the camp, and magpies, ravens, crows, camp robbers, squirrels and woodpeckers, and birds of unknown polyglot, whose language a Garnier might envy, filled the adjacent trees with loquacious chatter. Here I have sat at eventide and watched the kindling fire grow brighter while I listened for the sound of rhythmic oars returning home on the still surface of the lake. Sometimes when I am writing in the cabin, a mountain rat, maltese in color, with a tail like a squirrel, steals forth from his covert in a soap box and plays the mischief with loose articles lying around. These mountain rats are more mischievous than monkeys, and twice as cute. I must try to remember to give you my experience with the *Mustellus* who sublet that soap box in the camp. He keeps everything in disorder.

But I notice that I am wandering over pleasant bypaths to which the expectant reader has no clue. The Rocky Mountain climber needs a guide book, and I will therefore at once premise by stating that the orology of the Great Divide comprises, as I have mentioned, no less than five distinct parallel ridges which are popularly designated as the Rocky, Mission, Cabinet, Selkirk and Cascade ranges, and these are intercalated by the Flathead, Kootenai, Pend d'Oreille and Okanagon valleys with their profound basins and magnificent fluvial systems in comparison with which the Hudson and all New England rivers dwindle.

Beginning at Havre, a place of 600 population, with excellent accommodation at Mr. Rivers's "Windsor Hotel," when it is not overcrowded, I found a few mallards on the Milk River bottom and a good showing of sharptail grouse and sage hens in the vicinity. Thence westward for the next 130 miles it is sheep, horse and cattle country all the way to Cut Bank station, where it is stated that small mountain trout may be caught in spring, this being the most eastern point of its natural habitat. An acquaintance of mine, who stopped over there one night on business last week, amused himself by wiring a half dozen good-sized suckers and pickerel. This creek is crossed by a railroad bridge 250ft. high. At Blackfoot, twenty-six miles west of Cut Bank, is the center of a good antelope country, and by writing to Wm. Jackson, J. W. Schultz, Louis E. Pembrun or Joe Kipp, who captured the FOREST AND STREAM grizzly for Central Park in New York, their services can be secured. There are no more intelligent and reliable guides in the whole western country. The famous St. Mary's Lakes can be reached from Blackfoot Station. At Midvale, twenty-two miles further on, is an undulating mountain park, partly open, with ponds, meadows, water courses filled with trout, lots of blue grouse, deer and small game—a wide area with heather, furze, alder, sumac and willow, inclosed by foothills — very charming. Here lives Hugh Monroe, 108 years old, who named the St. Mary's Lakes*, and his oldest son, aged 78. He is known all over the West as a guide and Indian interpreter, and has dwelt in this vicinity for sixty years. Three miles north of Midvale, where the Great Northern Railway crosses the Mairas Pass through the Rockies, is the trail to Two Medicine Lake, with a high bridge crossing the Two Medicine River — beautiful haunts among the folds of the foothills. Four miles beyond this lake is another lake nestling right at the base of tremendous peaks, from whose shores, by the aid of a glass, bighorn sheep and mountain goats can be seen almost any day feeding on the high cliffs. In the swamps and heavy timber around the lake are moose, elk, deer and bear.

Summit Station is thirteen miles west of Midvale. It is 5,200ft. above sea level. Here the brooks and rivulets run west as well as east, the small beginnings of the Marias and Flathead rivers. Here is a wide area thirteen miles in length, almost level, with a swampy meadow interspersed with willows, tamaracks and spruce. Mountains with snow tower high above and around. Fires have swept two-thirds of the area. Here are a section house, tank, round house, coal yard, saloon, a cluster of log houses of which five are occupied, a lone grave inclosed by a picket fence, three dogs, men with fur caps and mittens, temperature 36°, ugh! If a hand car can be procured from the section men a trip can be

THE CAMPER'S PARADISE.

* There is another St. Mary's Lake and river in the East Kootenai district.

made to Bear Creek, 7 miles; Java, 8 miles; Essex, 4 miles; Paola, 5 miles; Nyack, 9 miles, and Belton, 11 miles; 45 miles altogether. Blue grouse by thousands on Bear Creek and myriads of trout. The scenery between these stations is magnificent, perhaps the finest on the route, and streams filled with trout line the way. From Essex there is another trail to St. Mary's Lakes. The Baring Brothers, London bankers, visited this region for several years. Down the Flathead River a grand voyage may be made in a canvas canoe for twenty to fifty miles, almost within sight of the track the entire distance, with only a few short riffs to carry around.

Belton is the starting point for Lake McDonald, a great body of water which fills a bottomless cleft right in the heart of the mountains, where big game of nearly all varieties may be found, and four varieties of trout running from 4oz. to 30lbs. in weight: black suckers, squaw fish and round whitefish, very palatable. At this season they gather at the inlet of the lake by myriads to spawn, and the big trout feed on them. Frank Gedulm, Miles Apgar and Charles Howe have cabins at either end of the lake, which is eighten miles long by four wide, rivaling lakes Luzerne and Thim in Switzerland for Alpine features. It is reached by an excellent trail of two miles through the pine forest direct from the station. The cabins are commodious, convenient and neat, and the cuisine is exceptionally good. There are half a dozen sailing craft, skiffs, batteaux and canoes on the lakes at present, and by next season there will be a naphtha launch 60ft. long. This lake is destined to be the most famous mountain resort in America within a very brief period, and will be sought by summer cottagers. Its future will be as eventful as Paul Smith's in the Adirondacks. The number of visitors this year has been large. The following names are taken from the register, to wit: Dr. Bird and L. Wissmeyer, Oklahoma; W. D. Hoard, ex-Governor of Wisconsin; E. A. Driver and E. R. Ripley, Riverside, Ill.; C. A. Mair, J. N. Marble and J. P. Brooke, of Chicago; Mr. Farnsworth, of Oconto, Ill; Judge Noyes and Mrs. Beatty and son, of Warren, Pa.; Bishop Gilbert and Mr. Shepherd, of St. Paul; Mrs. Burns and Mr. Judd, of Anaconda, Mont.; Charles Hallock, of New York; C. E. Le Munyon, Geo. Treat, Herbert Madison and Robert Phillips, of Great Falls, Mont.; L. Wakeman, of St. Cloud, Minn.; Dr. Curtis, L. Beard, J. J. Marsh, C. C. Treat and N. Kersey, all of Decorah, Ia.; F. A. Day, of Duluth; Messrs. Madison and Dickerman, of St. Paul; F. R. Mills, S. Pratt, W. Jennersen, J. Voght, J. Sheldon, G. H. Adams and wife, J. Foy and wife, Mr. Palmer, wife and two Misses Palmer, Mr. Stoner, Mr. Kenyon, F. Stallings, Supt. W. B. Green and F. Langerman, all of Kalispell, Mont.; General Manager A. L. Mohler, St. Paul, and Jas. Dundy and wife, Warnesky and wife, Pereiance and wife, Reed and wife, and J. Lewis, of Columbia Falls, Mont.—a total of 58 persons in all.

Six miles north of Lake McDonald is Camas Lake, four miles long, which lies in the heart of a sheep, goat and moose country. Frank Gedulm, with a party of three, came down with two fine goats while I was in camp. In this vicinity is a glacier covering an area of 25 or 30 square miles, which is a very interesting objective point. In the morning a thick mist gathers over it, but as the sun gradually comes over the mountains the veil lifts and the immense field of ice and snow shows its glittering surface, dazzling white. Horses can go over the trail.

Caribou are found in this vicinity in some numbers. It is said to be the most southern limit of their range. They feed just below the snowline on a clean white moss which depends from the trees, except in the month of April, when they come down to the valleys to drop their young. Very fine mounted heads and full specimens, male and female, may be found at Spokane, Great Falls and Bonner's Ferry, and other places in the vicinity. I have seen immense horns, one pair from a buck which is said to have weighed 1,100lbs. on the hoof, and a small pair from a cow which dressed 640lbs. Such weights seem almost incredible. Caribou of such size are not found elsewhere that I know of, unless it may be in Alaska. Moose are not rare.

It is likely that Camas Lake will be known hereafter as Ackerman's Lake, to commemorate the death of an Iowa sportsman of that name who was drowned there last September. Camas is the name of an edible root with stem like an onion, which deer and Indians are fond of. Twenty miles north of this lake is another glacier lying at the head of Glacier Creek, which flows into the North Fork of the Flathead. A good many goats may be found in the mountains in which Goat River heads, about ten miles from the British boundary line, near Bedlington.

Coram, a station 9 miles west of Belton, is a famous place for red deer, which congregate in a bend of the river. Mule deer and whitetails are found here together.

Whitefish Lake is accessible from Columbia Falls, 8 miles west. Here are deer, trout, blue grouse, partridge and fool hens. These three varieties of grouse are found all over the country west of the Rockies. Information of this locality can be obtained from Mr. C. T. Wernecke, manager of the Rocky Mountain Tourist Co., and from Messrs. H. H. Garr and J. B. Monroe.

At Kalispell, a town of 1,200 people, is headquarters for the Flathead Valley and the country lying north of it. A dozen lakes and streams are accessible from it, including the Flathead River and its three great forks, with their numerous tributaries, which have their sources in the mountains, the Stillwater and Whitefish rivers, Swan Lake, Blaine Lake, Foy's Lake, Pine Lake, Whitefish Lake, Trail Lake and many other fine bodies of water. Flathead Lake is 28×15 miles in extent. Four steamboats ply upon it. One of these took an excursion party of 150 persons to the Indian Reservation at the foot of the lake to inspect Mr. Charles Allard's herd of 90 buffalo which have been bred in captivity. This was on Oct. 3. Visitors may apply to C. E. Conrad, banker, or the agent of the Kalispell Town Site Company, for information. Capt. Cheney, of the steamer State of Montana, and Capt. Harding, of the steamboat Crescent, are familiar with the lower lake country. The editors of the *Graphic* have a snug shooting box on the Stillwater, in the upper country. Ducks are abundant in these waters, and it is said that no less than 27 varieties have been observed in the proper season, including redheads and canvasbacks. The United States Fish Commission propose to establish a salmon hatchery at Kalispell at a cost of $15,000, and two experts have been recently examining obstructions at the mouth of Clark's Fork of the Columbia, which at present prevent the ascent of the salmon into Flathead Lake and other waters in western Montana. Good hotel accommodations at the West House.

The Flathead Valley lies between the Mission and the Cabinet ranges.

From Kalispell to Spokane it is good hunting and fishing all the way. There are thirty railroad stations en route, and it will take space to specify all of them. Pleasant Valley and Lake View are desirable hunting localities situated west of the Cabinet mountains. This is a shallow body of water surrounded by lily pads, with many coots, dippers, and butter ducks along the shores. Wolf Creek is a clear, wide river which has never been fished except by construction crews. There are many shadowy ravines carrying gelid waters into the Kootenai. Oh! ye anglers! You have only to make a little journey of two or three thousand miles to reach the verge of living waters!

The Kootenai River is reached at Jennings, eighty miles from Kalispell and 1308 from St. Paul, from which a steamboat runs north each Monday to Tobacco Plains and Fort Steele, a Hudson Bay post in British Columbia. Messrs. Jones and Dupuy, merchants at Jennings and owners of the steamer Annerly, a 95ft. boat, will render sportsmen every assistance. It is 127 miles to Fort Steele. Mrs. McCracken, noted as the huntress of Montana, has a log store at Jennings, where a photograph may be bought with Madam in full shooting costume and two slain deer lying at her feet. This is a capital hunting and fishing point. Board can be had at the Annerly House for $7 per week. A trapper named Smith lives here. He has bought no less than 170 bear skins within the year, for which he paid from $18 to $50 each, not to mention mink, fisher, wolf, and wolverine. Back of Libby Creek station, an important mining town thirteen miles further west, there is good hunting and fishing. W. A. Hiller lives eight miles up the creek. He takes FOREST AND STREAM and is a good guide. From Libby Creek on to Bonner's Ferry, a distance of forty-nine miles, the Great Northern crosses a large number of streams which head in the Cabinet mountains off to the south. It is a country covered with dense forests spread over hills and mountains veined with precious metals. The Kootenai Falls, thirty feet high, dashing through massive walls of rock, are very picturesque. Yakt, Leonia and Crossport are great places for deer and may be easily reached from Bonner.

Bonner's Ferry is the head of the Kootenai River navigation. Steamers leave four times a week and take the tourists right into the heart of the Selkirk Range, the grandest in America. Kootenai Lake is 80 miles long, of unknown depth, and together with the river comprises 267 miles of inland navigation. Eight steamers ply on river and lake. The largest have abundant state-room accommodation. No grander trip can be found in Switzerland. Snow-capped mountains drop down to gloomy abysses and form a continuous line of serried peaks from end to end. All the way up the river, until the lake is reached, there are innumerable breeding places for water fowl. The Kootenai overflows its bottom at high water in the spring, excepting a narrow ridge along the margin, and every lagoon that the receding waters leave harbors a raft of ducks, swans, geese and brant. A British company with a capital of $200,000 is now engaged in building a dyke 110 miles long to reclaim the land for farming and grazing.

Right at Bonner, within a mile of the village, is a group of reedy lakes which I saw alive with water fowl one calm Sunday morning.

The Moyen River is reached by an eleven-mile trail from Bonner over the benches. Dr. Bishop and I took sixty trout there on Oct. 5 with flies, although August is supposed to be late in the season.

Mr. J. A. Macdonald, a real estate agent, is good authority on sport at Bonner, and so is Purser Jim McEachran of the steamer Spokane, William Doyle, William Lamb, William Ainslie and William Eaton (all Williams) are very good guides and know the whole country thoroughly. Mr. Ainslie took out a party into the mountains on Oct. 3, the day I left. They had four saddle horses and three pack animals, and were going to the head of Yahk after goats and sheep. Major Barnes and Mr. Rickart, who are Customs inspectors at the boundary line, sixty-three miles north of Bonner, are good men. There is an extensive but somewhat intricate system of interior communication by wagon, rail and steamboat in the Kootenai district, and upon the lines of railway which connects the mining town of Nelson, with its population of 1 200 souls, with Robeson, there are three hunters' lodges numbered 1, 2 and 3, which are furnished with camp stuff and kitchen utensils and rented at a nominal rate of $1 per day. Salmon and salmon trout are caught here with fly in the spring and with spoon in the fall. The river from Bonner to Kootenai Lake is very crooked, with clay banks and muddy bottom, and only a few trout are caught in its waters. It abounds with squawfish (a species of *Coregonus*) and suckers.

Pend d'Oreille and the Priest Lake country are great sporting regions, and so is Coeur d'Alene. These have been accessible for seven or eight years by the Northern Pacific Railroad, and are pretty well known. The Great Northern Road follows the Pend d'Oreille River, or the Little Spokane, nearly the whole distance to Spokane City. It follows the Pend d'Oreille for thirty-five miles, and then crosses it at the Albani Falls over two iron spans 300 and 180ft. in length, connected by rocky island in mid stream. At Newport, one mile west of Albani Falls, the Newport Transportation Company operates a line of steamboats to the Metalline District and sundry points on the river. Dr. Faust, editor of the Newport *News*, is well informed. Priest River enters the Pend d'Oreille a few miles east of Albani Falls, heading in a large lake of the same name. Rufus Cheney at the lake and Jim Judge and J. W. Horner at Priest River Station, are good guides. You can go by boat or trail from the station to Vermillion Lake, as it is known on government maps. A. M. Jenkins has a cabin at Priest Lake, and pack horses, and will come in to the station if written to at Priest River in advance of arrival. Rufus Cheney saw seven bighorns in one day, and is authority, I believe, for the statement that one such was shot there which weighed 400lbs.

At Chatteroy station, seventeen miles from Spokane, a drove of seven deer jumped into the brush just at dusk, as the team passed.

Spokane is the converging point of eight railroads, which render a large number of fishing and hunting resorts accessible. One of the most popular in the immediate vicinity is Spirit Lake, in Idaho, 35 miles distant. It is a perfect gem among the mountains, and a great game region. Mr. John R. Revers, of the Spokane Mining Exchange, and formerly of the New York *World*, hunts there a good deal, and so does W. D. Knight. Peter Rhoderback, an old soldier who lives at the lake, is a good guide.

In the Okanagon district, west of Spokane, there are antelope, elk, bighorn sheep, three kinds of deer and a species of small goat, not half the size of the big white goats of the main Rockies, and quite different also from the goats of Alaska. Some fine specimens may be seen at Meeker's gun stone in Spokane. They are much more comely and cleaner limbed than their big congeners.

Lake Chelan, a crooked body of water 60 miles long by 4 wide, lying among the mountains just west of the Columbia River, will become a popular resort as soon as the Great Northern Railroad is opened to traffic to the Columbia. Many parties of ladies and gentlemen from Spokane have been camping there the past season, and there are three steamers running regularly from the railroad crossing up the Columbia to the outlet of Chelan, and into the lake, and thence to all lake points.

With this most western point so far reached by the Pacific extension of this great trans-continental line, I conclude my lengthy memoranda with the admonition that game can be marketed in the State of Washington only during the month of December. The hunting season lasts until Christmas, at which time heavy snowfalls may be expected. Dogs and camp outfits are carried in the baggage cars free of charge.

[TO BE CONTINUED.]

## CHICAGO AND THE WEST.

[*By a Staff Correspondent.*]

KANSAS CITY, Mo., Nov. 3.—This morning, as I unfolded the drapery of one of Mr. Pullman's narrow but high-priced couches from about me, I found a small but urgent cockle-burr secreted in the blanket, in such position as enabled it to get the most out of life there was going. A cockle-burr is a simple thing, and ordinarily incites not so much to reflection and meditation as to immediate action and prompt profanity. In this case, however, I forgave the cockle-burr, and handled it tenderly. It was a cockle-burr with an alternative, and in alternatives there may be mistakes, and hence injustice. Either I got that cockle-burr out of one of the towels in the hotel at Great Bend, or picked it up somewhere during the two days' hunt in which I indulged near Great Bend after the hotel had ceased to be a necessity. The acquisition was very possible in either case, but out of charity I supposed the latter, and so regarded the small nuisance with a feeling kindred to affection, wishing the while that I were going West for more of them, and not East with this solitary reminder of joys that be these days of drear November.

Perhaps being constantly among sports and sportsmen will, after a time, take the wire edge off from an instinct which can never really be dulled. Men may be different in that way. In my own case, I believe that the impulse to get out and kill something is no longer any stronger than the pleasure of meeting new types of men, and of seeing new phases of this great big, wonderful, impossible, incredible America, wherein a man may live out his life in travel and yet not know half of the land fanned by the prettiest flag that ever swung on land or sea. From the blue grass land to the red rock land, from the wind-waved prairies to the quiet piñon country, what worlds, what peoples, what pictures. America for Americans—that is good doctrine. It is the best of earth to those who most deserve it. In smaller sense, too, it is a precious panorama whose individual pictures time shall one day sort out and enshrine. So big a heritage makes children careless for a while.

No panorama of America without the plains—that mysterious region which fascinated us when we were boys. This is the country of which Col. Long, who crossed Kansas in 1823, wrote as follows:

> There is an extensive desert in the United States. It extends from the base of the Rocky Mountains, 100 miles to the east, and 500 miles from north to south. There are deep ravines in which the brooks and rivers meander, skirted by a few stunted trees, but all the elevated surface is a barren desert, covered with sand, gravel, pebbles, etc. There are a few plants, but nothing like a tree to be seen on these desolate plains, and seldom a living creature to be met with. The Platte, the Arkansas and other rivers flow through this dreary waste.

This dreary waste is no longer such, except in part. Kansas has grown up in the desert, a level, apparently monotonous country in history and in natural features, but really often one of violence, of storm, of tempestuousness, of somber energy. In Kansas you will see the best that is now left of the Great Plains. This you will see best, again, in the Cheyenne Flats of Barton country, just above the great northern bend of the Arkansas. See these flats in a storm, or rather upon the verge of a storm, and you have a picture as startling, as distinct and as impressive as any you have seen anywhere, no matter how big the land with mountains, with forests or with sea. The picture is flat and even throughout in foreground and background, and the colors are few—grays, purples, storm colors—but the result, the effect, is there unmistakably. It is as wild, as desolate, as terrifying, as any scene of more theatric elements. Turn from the low lights of the little village on the far edge, leave out the big and desolate ranch house on the left, and look off over the Great Plains whose stories thrilled you. Face the foreboding clouds, feel the chilling wind cut through you, look off as far as you can see over the unsympathetic land—it is only a step then, as your heart sinks coldly in your bosom, to feel yourself the lost traveler of early days upon the plains. How you want a house! How you want a fire! How keenly you understand the feelings of the rugged settler, to whom his little house, low down and almost a part of the earth, seemed a palace, because it was a haven, a refuge, a home against this awing land, these pitiless clouds—a place cut off from the last rallying ground where Nature sullenly makes stand, and where, in wavering mirage by day and in streaming clouds of vapors in the night, phantom braves even now pursue their natural herds in phantom. My word, there are Indians there, and buffalo. I have seen them, large Indians and large buffalo. They will always be there, for these plains belong to Nature, not to man. If you doubt this, go there yourself and see. Go there of a black day in November. Ride down off the rim of hills in the wild evening, when you are cold, hungry,

apprehensive of you know not (because you don't happen to think it is the spirit Indians chasing you)—and then see if the light of old man Jones's house, one story, but a mansion, does not look to you the most welcome thing in all the world. I know it seemed that way to us. And when the ponies had pattered off the miles that still lay between us and the light, and when we had with difficulty pushed through the crowd of various expostulating dogs, and gained a seat under the roof and near the light, what a warm, relieved, happy, contented feeling came into the heart! You have to be a hunter to feel that way, because, unless you belonged to one of the two families who live on the Flats, you wouldn't be there unless you were a hunter.

Chauncey Jones, or old man Jones, as he is more generally called, has as yet had no artist to paint him, but he should have. He is one of many, a type, the old-timer, of whom too few are left. He used to shoot buffalo on the flats and sell the tongues to the emigrants down where the trail crossed Walnut Creek. He now grazes some cattle over the old wallows. His sons, John and Frank, shoot ducks these days on the "Black lake" pond on the north side of the flats, where Deception Creek overflows the level and so comes to an end. If you can not have a good time walking and talking and shooting with these, while the daughters, Nellie and May, stay at home and cook supper for you, then you aren't any kind of a man at all. But I suppose some one will be wanting to know just how many ducks we killed, and to this essential part of the programme I must hasten.

### Four Dozen a Day.

The two boys, John and Frank, had been averaging about four dozen ducks a day for some time. John told me that he thought he had killed 2,000 ducks himself this fall. This was all on a bit of lake about a mile square, so shallow that one could wade all over it. Its shooting properties lay in the fact that it was this year the only water on the Flats, and was moreover very abundantly supplied with feed. The Arkansas River is dry at the Bend this year. The only other water at all near, so far as I know, is the "salt marsh" below Raymond, twenty to thirty miles distant, where also remarkably good shooting has been had this fall. The conditions being such, and there being very few shooters on the lake in the Flats, the birds had refused to leave, and had offered the two Jones boys, who live only half a mile or so from the lake, a duck shooting privilege which might well turn almost anybody a dark green color of envy.

John and Frank were out on the lake when we arrived, and we went out in the dusk to have a look at the country. We found the wide and shallow lake with shores absolutely bare and affording no cover. The water-growth was from 12 to 16in. high, and scanty. To make a blind seemed impossible. Nevertheless the birds were flying in hundreds, every way we looked. We saw plenty of mallards and pintails, and great numbers of spoonbills and teal. While we lay in the dark along the bank, trying to get on the flyway of the ducks, we heard the chatter of four different flocks of white geese, and the sonorous honking of one flock of genuine Canadas. Repeated flashes of fire beyond us told where the boys were at work in the flight, and we knew that they shot into the flock of honkers, though we could not say with what success. We staid long enough for me to find that I had torn a big hole in one of my rubber boots, and so was *hors du combat*. Then, for fear of getting lost on the Flats, as even the Jones boys and their father, long as they have lived there, have been known to do, and as a stranger is almost certain to do, we pulled out for the house.

When the boys got in that night they told us that they had bagged that day 63 ducks and 1 goose. The goose was a Canada, and John killed it out of the flock we heard come over the marsh at dusk. Both assured us of good shooting the next day.

"The weather doesn't seem to make much difference," said John; "the ducks never leave the lake, but just fly around all over it, all day long." This Elysian state of affairs betokened ducks that were not educated, and I rejoiced, until I remembered about the torn boot.

"You can't do anything without hip boots," said John, "but you'll have time to drive over to Hoisington in the morning and get another pair. It's only two or three miles."

### No Boots, and No Balm.

Accordingly I went over to Hoisington in the morning, thinking to equip myself early and easily. Alas! the disappointments to which the human heart is subject. Not a store in the entire city—and there were two stores—had a pair of hip boots, though I was assured cheerfully that plenty were ordered and on the road, and that if I could wait a couple of weeks I would see Hoisington fuller of rubber boots than anything I ever did see. Not having quite so much leisure I went to the livery stables, to the gun stores, to every place, and made private quest for high boots. I inquired for local shooters, and even stopped on the street two or three men who looked as though they might have hip boots at home. It was of no use. There were no boots in Hoisington. At the time it seemed to me there was no balm in Gilead. I could see four hundred million ducks flying just out of reach, myself on the bank with no boots. This is something which Dante thoughtlessly left out of his Inferno. A punishment so exquisite in pain that no good shooting man could ever really deserve it.

I drove back to the lake, and John seeing me coming, rose up out of the scanty cover and waded out to meet me. "Johnnie," said I, "did you ever hear of the Chevalier Bayard?"

Johnnie allowed he didn't remember him.

"Well," said I, "the Chevalier Bayard was once lying on the field of battle, pretty much cut up and thirsty as usual—I mean cut up as usual—and another gentleman was lying near by in much the same shape. It came a question as to which of them should take a drink. 'You need this worse than I do,' the chevalier said. 'Go ahead. After you.'

"He was pretty white, wasn't he?" said Johnnie.

"That's whatever, my friend. He was a man worthy of imitation. Now, I couldn't get any boots in Hoisington."

"The —!"

"No. Yet still, my friend, I observe that you have on a pair of very good ones. I notice also in you a family resemblance to the Chevalier Bayard. Behold me! I am that other soldier. My necessity is a whole lot greater than yourn. Besides, I will give you six bits for those boots for the rest of the day. Shuck them off, Johnnie, or I don't know what I may do to you."

Johnnie shucked 'em, though I must say he did not do so for the money. "You're only here for one day," said he, "and I can shoot here every day. Take 'em along, and go right on out to my boat, you'll get plenty of shooting. I've killed eight already this morning."

There are plenty of Chevalier Bayards lying around in the country, if you only go about it right in developing them. From now on, Johnnie Jones has a warm place in my heart, and I owe him an obligation which no six bits can discharge. Still, feeling as I did about it, it was probably a wise thing for him to take off his boots when he did.

Putting my decoys—a dozen canvas ones—and a lot of shells into a sack, I waded out to the boat. It was a home-made affair that sat low down on the water. The heaviest of the scanty cover barely concealed it, and I saw at once that the only way to get any shooting was to lie flat down in the boat and keep still. So I put out my decoys, and got out my caller, and was soon in a very enviable frame of mind.

It did not take long to prove that Johnnie Jones was a duck shooter, and that he had picked the very best place on the whole marsh for his blind. A point of land jutted out just back of this spot, and narrowed the flight which passed over from one side of the lake to the other. Moreover, a great patch of torn up bulb grass and other water grass showed that the ducks had found plenty of feed near by. In my mind I complimented Johnnie while I thanked him in my heart.

About now two spoonbills came over and I turned over and let go, killing one and knocking the other down a little further than I probably ought. "Look at that," thought I. "Oh, but this is a snap. I'm a duck shooter from away back, and I'll kill a thousand ducks right here." Then a flock of gadwalls drew by, and I didn't get a feather; and a flock of teal went over and I didn't touch a teal; and a lot of spoonbills tried to light on the decoys, and I didn't get a spoonbill. After missing eight or ten shots I modified my views somewhat, and compromised on a hundred. It was about 10 o'clock when I began to shoot, and for a time I never saw ducks fly better, though it was nearly all long shooting. At noon it came off warm and the wind went down, so that the flight stopped partially. At that time I did not have quite a hundred ducks, but I did have seven in the boat and several in the weeds. The edge was off my appetite and I had boots to lend.

After lunch at Butler's, nearby, where Mrs. Butler, a sister of the Jones boys, cooked us a very good meal, we traded around some on the boot question, Frank taking my boots, I taking his and Johnnie resuming his own. Frank went over to Hoisington on business and Johnnie and I went after jacksnipe, of which we only got 4, the mud flat lately populous with them having dried up too much, so that we only saw 7 birds in our tramp. In my absence after the snipe, a gentleman from Hoisington sneaked up on my nice fleet of canvas decoys and shot the stuffing out of two of them. When I got back I found him in the boat, and we had a settlement then and there about those decoys. He was the most comically disgusted man I ever saw when I stated the price to him. "Gee!" he said, "that's more'n a feller'd get for a whole dozen of actooal ducks." I explained to him that it served him right for pot-hunting, and that he ought to have waited till the decoys were on the wing. Though vexed and angry with him to a degree, he seemed so humble and contrite about it that after he had settled and gone off in the marsh, I lay down in the boat and laughed till I ached.

In the half-day's work at the ducks, the three of us got a little over 30 birds. The evening being clear and moonlit, the geese did not come in on the marsh until it was too late for us. I pulled up my decoys promptly at sunset and hustled ashore quickly as I could, for although Butler's house was only a short distance, it had no window on the side next the lake, and would be easy to pass in the dark. Having been lost once on these flats I did not want to try it again. If you lose one direction there you lose them all.

"I got lost once going home from over here," said Frank to me, as we talked of this later, "and I couldn't tell where on earth I was. At last I hit a wire fence, and then I knew where I was, for it only had three wires. I knew the line fences had four wires, and the division fence three, so I got the line for home all right. I came in on the east side of the house instead of the west. Once a lot of Great Bend hunters spent the night in the coursing club's house, over in the middle of the flats, and started out early for the lakes over in the Carvey pasture. It was a foggy morning, and the first thing they knew they came square up against the club house from the east side, when they thought they had been going straight west from it all the time."

### Opening Day on Quail.

The following morning closed my stay at the duck marsh, and lack of time forced me to decline Mr. Jones's urgent invitation to go up Deception Creek after prairie chickens, of which he had a number located. This was Nov. 1, opening day on quail in Kansas, and I had promised Dick Taylor, eight miles from the Jones place, to join him in a quail hunt on opening day. Moreover, to make matters more obvious, I had Dick Taylor's dog, Dick, with me at the Jones place, although much to the dog's disgust I had not allowed him to retrieve ducks in the icy water.

I am satisfied that I am the luckiest man on earth about running across good dogs. If I should fall off a ship in the middle of the sea I would doubtless come up with a good bird dog in each hand. All over this country, where I couldn't take a dog of my own, I meet these trained dogs, in all sorts of shapes, but of just the sort a shooter needs. I don't mean dogs with lofty lineage, but dogs with nose, dogs that don't get tired, but which will range, point and retrieve—in short, dogs that is a solid and unalloyed comfort to shoot over, and dogs with which you can go out and get game. Now, of all these dogs whose acquaintance I have made at different time, I would rather have this same dog Dick. If he were mine the biggest $500 bill in the world wouldn't buy him. Dick's sire was Mr. W. W. Carney's old setter Mack, a handsome and well-bred dog, and his dam was an unknown quantity owned by Cal Krülly, of Great Bend. Dick himself is a stout, handsome fellow and more eager after the gun than any dog I ever saw. Everyone in the country takes him hunting and there is no shooter in Great Bend who does not use Dick more than his owner. Mr. Taylor always has a bird dog or two about him, and is an admirable trainer, but he does very little shooting, and seems just to keep the dogs as a sort of public convenience. Dick owns any man for master who can shoot a gun. Having been with me a whole day, he seemed to think I owned him, and when in our shooting either Mr. Taylor or myself killed a bird Dick always brought it to me. Instead of being vexed at this Mr. Taylor was amused and laughed at it. So you can see he is a pretty good sort of a man.

Frank Jones and I took the buggy and started on a leisurely drive over to Mr. Taylor's place in the morning. We were within half a mile of the house—which has a commanding site on a high hill and can be seen a long way from every side, even beyond the owner's wide acres—when Dick, who had been running along in the road, suddenly left it and came to a stiff point at the hedge row. Frank pulled up and tied the team, and I sought an opening in the hedge, Dick meantime occasionally looking back over his shoulder to see if we were coming, as if imploring us to hurry up. We did hurry, and on the rise of the bevy we got three birds. Then we followed them down the hedge and got a couple more, Dick picking out the singles in a way simply elegant. Swinging up the hedge on the other side of the field after some birds we had marked down, the dog began to road rapidly, stopping and looking back for us in a way of his own. Presently he pointed hard, and up went another bevy, but on the wrong side of the hedge, so that we got no shot. We could not see where the birds went, but Dick unquestionably marked them down, for when we got through the hedge he took us directly to them, on a bit of wheat stubble. On the scattered birds his work was fast and positive, with never a break nor a flush, and I remember no prettier experience than we had here. In a few moments we had an even dozen birds in our pockets, and so drove up to the house after fifteen minutes shooting, mightily pleased with everything in the world. Mr. Taylor and his pleasant family put us perfectly at home, and so went on an experience entirely too brief of Kansas hospitality and Kansas sport.

### Ideal Sport.

The country we were now in is quite unlike the Cheyenne Flats. It is rolling farming land, well settled up, with some hedges and occasional clumps of trees. Walnut Creek, lined with heavy undergrowth, runs a mile back of Mr. Taylor's house, which is only about four miles from Great Bend. In every hedge row, on every timber claim and in almost every bend of the creek, we found a bevy of quail. They were everywhere. Shooting began within ten minutes' walk of the house, and one hardly needed to go two miles from home at any time. Mr. Taylor had all the bunches located, and as soon as one was too much scatterred would lead off for another one. Shooting under such circumstances, in a country full of birds, with a guide who knows the haunts of each bevy, and with a dog which knows the business thoroughly and needs no admonitions and no handling—this certainly is ideal sport, and one cannot ask to see it surpassed. "There are quail all over this part of the country," said Mr. Taylor. "I could take you to new places every day for a week." A stranger would not fare so well, and would besides continually fall foul of the posted lands of the Alliance farmers. We shot most of the time on Mr. Taylor's land, or that of friends of his.

In the afternoon we were joined by a young man from town, Charlie Zulerman, who brought out his dog, a pointer. He and Frank took this dog and Mr. Taylor and I took Dick and went in another direction. We crossed the corner of a cornfield and picked up four birds, and then went on over to the creek, hearing the others shooting very often further east. Shooting along the steep and heavily covered banks of the creek we found to be difficult work, and the birds had a good deal of fun with us here. Dick kept on finding bevies and singles, however, and we kept on shooting. When we met the other party Mr. Taylor and I had seventeen birds in our pockets, Charlie had five and Frank four. Frank was trying the experiment of shooting 12-gauge shells in his 10-gauge gun, and it didn't work very well, I imagine. Going home we got half a dozen more birds, making a total for a few hours of very easy and leisurely shooting of something over forty birds during the day.

The next day I had to leave for the East. Of course a fellow always has to start for some place else just when he gets well located. Nevertheless, Mr. Taylor and I got into the buggy early in the morning and took a run over to a cornfield after some chickens, which we put up, but too wild for a successful shot. Then we drove toward the house again, and of course, as we passed a hedge Dick came to a point. Mr. Taylor left his mettlesome horse, Ned, without tying him, as the horse was used to shooting and had never made any trouble about it. This time, however, Ned felt different about it, and when three shots sounded quickly just behind him he started off on a dead run, only hitting the ground once in a while with the buggy. That broke up the shooting match. Mr. Taylor started after the horse and I started after him. Dick didn't care a cent about the runaway but went right on pointing singles all along the hedge, looking grieved because I wouldn't stop to shoot, but pulled him off his points. At a farmhouse Mr. Taylor stopped for a saddle horse to follow the refugee, who, as he heard, had struck the road and gone straight to town. "He's all right," said Mr. Taylor, with the usual Western philosophical way of looking at horse escapades; "I'll ride on into town and get him. You just come along to that clump of trees and go in there and shoot till I come back."

Doubting if he ever would come back with a sound horse and buggy, I nevertheless followed instructions, and as usual found a bevy of quail, of which I bagged three before they mysteriously disappeared, quail fashion. In half an hour I heard a shout and there came Mr. Taylor with the buggy, driving Ned, who looked very complacent and none the worse for wear. "They had him unhitched and in a livery barn when I got into town," said Mr. Taylor. A runaway here or there is nothing out in Kansas.

We now went back to the house again, and found that we had 7 quail accumulated somehow or other, without any work. I said good-bye to the family, much to my genuine regret, and again we started Ned for town. Fool-

ing along the road, never over three rods from the road or a hundred yards from the buggy, we put up three more bevies of quail within a mile of the house, and added 10 more to our string, Dick working like an angel. This was just the easiest, nicest shooting there ever was in the world, and under the pleasantest circumstances possible. I think I could have stood a week or two more of it without serious injury to my health, but it could not be, so I had to say some more good-byes and go, regretting more, certainly, to leave the shooting, than to leave my friends. And Dick, the dog—may he live long and prosper, and never meet a temporary master who does not know him as a wise and faithful servant, and therefore deserving of all kindness! There is only one man fit to own Dick, and that is Dick Taylor. Both man and dog are known through all that countryside, and are fit to be known through all the world.

### Western Notes.

LEAVENWORTH, Kas., Nov. 4.—The White River Utes, of Colorado, are this week reported to have left their reservation and gone into camp on Spring Creek, thirty miles below Meeker. They are killing hundreds of deer for the hides alone. The citizens are protesting against the wholesale slaughter of game, and have resolved to drive the Utes back.

From Ogden, Utah, comes a wild and apparently faked-up story regarding two Brooklyn, N. Y., men, Frank M. Conroy and J. F. Barkelow, who are said lately to have left Ogden to explore the caves of the early cliff dwellers along Nine-Mile Creek. Barkelow returned alone and reported that Conroy had fallen over a precipice with his burro, and that as he lay injured on a ledge below he was attacked by eagles, which drove him from the ledge and continued their onslaught upon his mangled remains.

Yesterday a St. Louis boy, Frank Smith, playfully snapped a .22cal. target rifle at a man named Sims Grace, lodging the ball in Grace's back. Grace may die. The boy was not aware that the weapon contained a charge.

Yesterday William Parks, of Kansas City, went out hunting and got the muzzle of his gun choked up with mud. He tried to clean the barrels out with his fingers, and in doing so shot off his left forefinger.

These incidents remind one of the exploits of hunter Dills, of Uniontown, Pa., three days ago. Hunter Dills crept up on Mr. Gates, who was in a blind calling turkeys, and firing a load of buckshot by guess killed Mr. Gates where he sat.

Snow fell in South Dakota Nov. 1. On Nov. 2 a blizzard was forecast for Kansas, but materialized only in a cold rain. The flight of geese is not yet all in over western Kansas.

A Fort Scott, Kas., man is buying a carload of dogs, whether for sausage or field trial purposes it is not declared.

A California little ostrich bird has just yielded 300 feathers, worth $65, at one sitting, or rather plucking.

The flight of wildfowl this week is so heavy on the Salt marsh south of Raymond, on the Santa Fe, that hunters from as far east as Topeka have come to take advantage of the shooting. The Rattlesnake pond holes below Great Bend are also affording good sport.

Much land is being posted by the Alliance men in Kansas. The farmers publish notices in the local papers warning trespassers to keep off their lands. They describe their lands by range, township and section lines, put up notices on the corners, and moreover chase an offender off when detected. This is all very well. It hurts nothing if all Kansas becomes a game preserve. The salvation of American game lies in the the trespass law.

Any one who has ridden or walked much in Western Kansas knows how the alkali dust of certain sections offends the skin of the face and lips. In a few days the lips become painfully sore and crack open, bleeding and refusing to heal. No one should use vaseline or cold cream for this trouble, for either will only make the trouble worse. The best remedy is collodion, which is rather a preventive. Spread upon the lips, it forms a tough, adhesive coating, which keeps out the air and dust. It is useful also to cover any abraded surface, or to apply about the finger-nails in case of hang-nails or other trifling wounds, which under cold air and alkali dust and alkali water, rapidly become very annoying. The collodion coats the skin like the film upon a photographic negative. Take the collodion bottle along on a trip to California or the plains.

### Death of Lieut. Schwatka.

Lieut. Frederic Schwatka, of Arctic and Alaskan fame, was found dying in the streets of Portland, Oregon, at 3 A. M., of Nov. 2. He died at 4:50 of the same morning; the cause of death being supposed to be an unintentional over-dose of laudanum, a bottle of which drug was found near him. This ends the life of a fortunate and unfortunate man, a man brave and yet weak, a man who sufficiently well illustrates the continual contradictions of human life and human accomplishment. E. HOUGH.

### Enforcing the Ontario Law.

BRACEBRIDGE, Ont., Oct. 22.—The first trial in this district under the Ontario game law was held to-day before Mr. James Boyer, J.P. On information of R. D. Brown, deputy warden of the Township of Stephenson, the following persons were arraigned and convicted of hunting deer out of season: L. Markle, B. Botterell, J. Preble and A. Markle, all of Brunell Township, and were each fined $20 and costs. These convictions will have a salutary effect throughout the Province and will show that the Ontario government intends to prosecute any cases which come under their notice.—*Toronto World, Oct. 24.*

### An Election Day Hope Not Realized.

NORFOLK, Va., Nov. 7.—The weather has been very favorable for ducks during the past few days, and a telephone from the Currituck Club grounds reports a large gathering of black ducks and sprigtails. I saw to-day a fine assortment of these birds at the commission house of Mr. J. B. White, who is a member of the Ragged Island Club. Grover Cleveland and President Harrison are both honorary members of the Ragged Island Club, and to-morrow, the 8th, being a sort of off-day for them the crowd is hoping they will be persuaded to put it in on the marshes. CHARLES HALLOCK.

## THE FALL MONTHS AT BILOXI.

BILOXI, Mississippi.—It has been my good—as well as my bad—fortune to visit Biloxi during the fall months for the past two years. My bad fortune was because I was compelled to make the trip to rid myself of an attack of malarial fever, contracted in the swamps; and my good fortune was in being able to find a place where I could have all the comforts of home and as fine fishing and hunting as can be found anywhere in the South.

We were called shortly before daylight the other morning, and after "discussing" a first-class breakfast prepared for our especial benefit by our sable friend Jessie, who presides over the destinies of the culinary department of the Montross, we bundled ourselves, dogs and guns into a very comfortable buckboard that Colonel Montross had in waiting for us. A drive of ten minutes brings us to the ferry across Back Bay, an arm of the gulf that puts in back of Biloxi, and into whose waters flow the Biloxi River. A quarter of an hour and we are across the bay, while another ten minutes brings us to an open field, where the dogs are invited to step down and out. The dogs were Punch, a four-year-old pointer, through whose veins flows the blue blood of Faust and Keswick; Queen, a lemon and white pointer bitch from the Hempstead Farm Kennels, and Lady Likely, a black, white and tan setter who can boast of such ancestors as Roderigo, Gladstone, Sue and others.

We had scarcely gotten our guns out of their cases and put together, when Paul, our driver, exclaimed, "Look at Queen!" Sure enough she had struck the scent, and with every nerve quivering was roading up a small opening by the edge of a heavy canebrake. She had not gone very far before she brought up solid. Calling the other dogs up we started toward her. The moment Lady and Punch crossed into the opening they saw her and backed her finely. The sight was a beautiful one—all three of the dogs standing as if they had been carved out of marble. Mr. King stepped forward a couple of paces, and up whirred a bevy of at least twenty-five birds; an instant later came the crack of three guns, when five of the feathered beauties left the bunch and fell, striking the ground with a thud.

At a word from their owner the dogs who had dropped to shot retrieved our birds finely. There was no use to look after the scattered birds, as they had pitched into the middle of a very heavy cane brake, where they were perfectly safe. Calling in the dogs we bundled into our buckboard and drove across a heavily timbered bottom to an open field beyond. Here the dogs were again put out. Before they had gone a hundred yards Punch, who was working among some palmetto scrub, "brought up standing." Once again the other dogs backed, a second more and the bevy was in the air. This time we did not do so well, the trouble being that all three of us fired at the same bird, cutting him into ribbons. We bagged three, however, and marked the rest of the bevy in the timbered bottom we had just crossed. As there was little or no underbrush in the bottom we decided to give it a turn.

On the edge of a small stream that ran down through the timber Punch again straightened out, and as Mr. King and myself walked toward him, we heard the flutter of wings together with the familiar half chirp and half whistle of a woodcock. I took a snap shot at him as he was going through an old tree top, and was gratified to hear my friend say, "you downed him." After picking my bird up we looked around for Lady and Queen, and found them standing in some palmettoes not fifty yards away. This time it was one of our scattered birds. As he cleared the brush, Mr. King's Greener cracked and the bird whirled over on its back as dead as a stone.

It was now getting along toward noon, and as the sun was nearly overhead, the heat made tramping about in the open anything but a pleasant occupation. We accordingly called a halt, and once more mounting our buckboard drove about five hundred yards to the banks of the Biloxi River, where, under the shade of some magnificent oaks we ate lunch.

While we were lounging about I noticed the swirls of some large fish as they fed among the lily pads that fringed the river banks, and Driver Paul informed us that in his opinion they were "green trout," but that he would show us to a certainty if we would have a little patience. He immediately began to skirmish through his pockets, finally producing a piece of what had once been a waterproof trout line. After straightening this out he began searching under the sweat leather of his hat. From this receptacle came a large and fearfully and wonderfully made fly. Red all over body, hackle, wings and tail. I thought that if trout would bite at any such fly as the one in question they must be green, sure enough. After tying fly and line together Paul went in search of a rod. This he soon found in a piece of cane about 7ft. long and as stiff as a poker. After making connection between the line and his improvised rod, our fisherman walked slowly and cautiously to the river bank. Imagine our surprise when at almost the first time the fly struck the water a fish took it and was unceremoniously "yanked" out of his native element and landed high and dry on the ground at least 10ft. from the water. For the first time I had an opportunity of examining a "green trout," and found it, just as I had supposed, a large-mouth black bass. While we were waiting for the day to get a little cooler Paul caught 5 more of his "green trout," showing conclusively that with the right kind of tackle one could have the finest kind of sport. When we were ready to make another start our gunner informed us that if we would drive back in the country three or four miles he was sure we would find "right smart" of partridges.

Nor was he wrong, for during the afternoon we flushed no less than ten bevies, out of which forty-six partridges fell to our guns, making our bag for the day fifty-seven partridges and one woodcock, not so very bad for our first trial.

The next time we visit that neighborhood you can be very sure that bass tackle will be part of the outfit. Two or three hours' fishing under the shade of the magnificent oaks that grow along the river banks will be a very pleasant way of passing the heat of the day. While talking over our day's work with Col. Montross, he told us that a little later when the bass left the shallows and sought the open water they were caught by the hundred in both gill nets and seines. At this rate it will not take very many years to deplete our waters of this gamiest of all fresh water fish. A little later in the season the writer and Mr. King are going to try our luck back in the country, where we are told there are any quantity of turkeys and deer, with an occasional bear thrown in. On our return I shall report. In the mean time I can truly say if a man wishes to find a place where he and his family can be perfectly comfortable, and at the same time have all the fishing, both fresh and salt water that he wants, together with very good shooting, Biloxi, Mississippi, is the place for him to come to. BILOXI.

## THE SYRACUSE QUAIL CASE.

SYRACUSE, Nov. 6.—The pot-hunter arrested by Game Protector Jackson for snaring seventy partridges near Cicero (not Constantia, as before reported), was brought before the police justice last week through the assistance of Andrews Bros. He was fined $50, the charges against the firm not being pressed. The name of this hunter is Benjamin Brackett.

Wednesday last warrants were issued by Police Justice Mulholland for the arrest of Andrews Bros. for having snared birds in their possession contrary to law. The Onondaga Sportsmen's Club were the prime movers in this action, and its interest is being looked after by Attorney Shinaman. Both H. B. Andrews and J. M. Andrews were arraigned. They pleaded not guilty, and their attorney raised the question that the justice had no jurisdiction, Justice Mulholland plainly told the defendants that he had the jurisdiction to try the cases, if the defendants so wished, but it was their privilege to give bail for the Grand Jury without first securing an order from a higher court. The accused gave bail in the sum of $500 each for the action of the Grand Jury. The bail bonds were signed by A. Ames Howlett, of the Lefevre Arms Co., and G. M. Barnes.

It is to be hoped that the Sportsmen's Club wins in this action, as it will prove a death knell to all such kinds of pot-hunters, and if full judgment is secured, $1,775, it will enlarge the club's treasury, as one-half goes to the State and half to the club.

Henry Johnson, game constable for the Onondaga Anglers' Association, has returned from Oswego county, where he has been on a "still-hunt" for offenders. Utter disregard is paid to the game laws in that section, and consequently game is very scarce. In one day he discovered and destroyed sixty partridge snares in the woods.

Three arrests were made last week of game snarers. They were William Trumble, George Trumble and Benjamin Brackett, of West Amboy. The last named is an old offender, being connected with the Andrews Bros. bird case and who was fined $50 in that case. He is also a noted offender in this kind of work. They will be tried before Judge Northrup some time this week.

The fishing in Onondaga Lake has been much improved the past year. Mr. Jackson says that only two nets were taken last month, and at present there is no net fishing being done in this lake. D. K.

## COLD BARRELS.

WILLIAMSBURG, Ind.—Noel E. Money asks an explanation of the fact that a hot gun barrel shoots harder than a cold one. It is because the expansiveness of gases is largely dependent on their temperature, and the cold barrel absorbs so much heat that it reduces the power of the propelling gases. O. H. HAMPTON.

RED BANK, N. J.—The appeal of Captain N. E. Money, manufacturer of E. C. powder, to the general public to solve the problem why his powder when fired out of a cold gun does not give the same velocity as subsequent charges, when fired out of a warm gun, is rather surprising, coming as it does from the manufacturer of a nitro powder. It is a well established fact that all nitros are very susceptible to cold, and therefore the loss of velocity of the first shot out of a cold gun is occasioned by the rapid cooling of the high pressure gases in the cold gun barrel. If Captain Money will experiment a little he will find that at 40° Fahrenheit a standard charge of 42grs. E. C. will lose 90ft. or about ten per cent. of its velocity, and that at a freezing temperature the loss is still greater, so as seriously to impair penetration. This fault, however, if known, is easily overcome and can be guarded against in loading. To guard, however, against atmospheric influences, dampness and dryness, is much harder, and this serious fault has been overcome by one nitro only, the new Walsrode smokeless. WHIPPOORWILL.

## MASSACHUSETTS DEER LAW.

Massachusetts has no law on deer except as to Plymouth and Barnstable counties, Session Laws, 1883, Chap. 169:

SEC. 1. Whoever hunts, chases, or kills a deer within the counties of Plymouth or Barnstable, except his own tame deer kept on his own grounds, shall forfeit for every such offense one hundred dollars.

SEC. 2. All acts or parts of acts inconsistent herewith are hereby repealed May 5, 1883.

There was up to 1886 a general deer law. Sec. 8 of the Public Statutes of 1882 provided:

SEC. 8. Whoever between the first day of December and the first day of November takes or kills a deer, except his own tame deer kept on his own grounds, shall be punished by fine of one hundred dollars.

This section was amended May 2, 1882, by Chapter 199, Laws 1882, Sec. 1, as follows:

SEC. 1. Section 8 of Chapter 92 of the Public Statutes is amended so as to read as follows: Whoever at any time in the year except Tuesdays, Wednesdays, Thursdays and Fridays in the month of November, hunts, takes, wounds or kills a deer except his own tame deer kept on his own grounds, and whoever on any Tuesday, Wednesday, Thursday or Friday in the month of November, hunts, takes, wounds or kills in any pond or river, or within two hundred yards thereof, a deer, except his own tame deer kept on his own grounds, shall be punished for each offense by a fine of not less than twenty-five dollars, and not more than one hundred dollars, etc. etc.

Chapter 276, Laws 1886 (passed June 10), enacted as a substitute for Chapter 92 of the Public Statutes, makes no mention whatever of deer, but does by Sec. 11 specifically provide for the entire repeal of Chapter 92:

SEC. 11. Chapter ninety-two of the Public Statutes, chapter thirty-six of the acts of the year one thousand eight hundred and eighty-three and all acts and parts of acts inconsistent herewith are hereby repealed.

This leaves only the Plymouth and Barnstable law, as given in the *Book of the Game Laws.*

### Denver Shooters.

DUCK shooting here this fall has been exceptionally good. Bryan Haywood, of the Queen City Gun Club, on Sept. 1 killed 27, on the 8th 37, on the 22d 54, on the 29th 59, on Oct. 5 114 and on the 19th 78. These were killed on the Queen City lakes and were all large ducks, being mostly canvasbacks and redheads. Hayward shoots a Spencer repeater when duck hunting and is the most expert wildfowl shot in this section.

Vic Kennicott and Sid Schroeter killed 29 mallards and 2 geese at Hardin last Sunday; on the same day at Fort Morgan D. L. Mechling and Geo. Robinson killed 52 ducks and one goose.

Bert Cassidy will start for the lakes in the vicinity of Loveland on the 10th and expects to kill any quantity of snipe, ducks and geese. John Collier, Geo. Tuck and myself expect to leave Saturday night for Boyd Lake, as we are informed that the wildfowl are coming in fast. Guy Chamberlin and Rudolph Kroeck have just returned from a hunting trip in Rouet county. They killed five bear and numerous deer and elk. Large game is more plentiful this fall than it has been for a number of years.

The Rocky Mountain Sportsmen's Association hold their fourth annual tournament at River Front Park on Nov. 10, 11 and 12. The managers have arranged an attractive programme and a large attendance is expected. The excitement in regard to buffalo hunters has all died out and the general impression is that it was a false alarm. TESEEBY.

### Birds in Virginia.

LEXINGTON, Va., Nov. 5.—I regret to report that in my experience of thirty years' shooting in this county, I have never before known birds to be as scarce as they are this season. Although we have had a dry summer, one peculiarly suitable for rearing young broods, the quail do not seem to have recovered from the effects of the deep snow of December, 1890, which killed them by thousands. A tramp of a day resulted in seeing not one single bird. Another day resulted in a bag of three. The largest bag made being thirteen.

I was not a little surprised to see in your last issue that a "New York correspondent who has been traveling in Virginia expresses surprise at finding the robin there esteemed only as an article of food."

I was born in Virginia, have lived here all my life, and I consider that, the mockingbird excepted, the robin is one of the sweetest, if not the sweetest, songsters we have. In Virginia the robin is, I fancy, quite as domesticated as in the North. I have known as many as four pairs to build in my yard, one pair building in a climbing rose on the porch.

The laws of Virginia prohibit the killing of the robin at all times, though I fear the law is not strictly enforced.

T. M. S.

### The Coon in Eastern Massachusetts.

FRAMINGHAM, Mass., Nov. 6.—I write a line to correct the impression given by the paragraph on the Wayland coon in "Special's" article in the issue of Nov. 3, that the presence of the raccoon in this section is of rare occurrence.

This town adjourns Wayland and coons are reported here nearly every year. Within the last three years I have handled five, all taken within five or six miles of my house; one of them I shot myself within 20yds. of my front door, from an elm overhanging a much traveled street, only about three-quarters of a mile from the town, and no large woods near. I have heard constantly of coons in this vicinity during a residence here of nearly forty years, but I may safely say that they are more often met with of late years than earlier, contrary to what we might expect.

I take advantage of the opportunity to express appreciation of the very interesting and instructive article by Mr. Rich on the lynx. It is the securing of such papers as these that tends to make FOREST AND STREAM a journal that "no one can do without."

F. C. BROWNE.

### Central New York.

ITHACA, N. Y.—Dr. Morris, of New York, known to all your readers, and Mr. Norton, of this city, came in from a shooting trip along the shores of Cayuga Lake the other day with a bag of forty ruffed grouse and woodcock. This, so far as I am aware, is by far the best bag scored in this vicinity this season. Complaints from this and adjoining counties have been quite general that the supply of ruffed grouse is limited, and my own experience, based on twelve or fifteen days afield, bears out the universal verdict. The cover for these magnificent birds grows more restricted with each recurring season in central New York, much to the regret of all the good fellows who love the dog and gun and wooded slopes. Why not shorten the season and stop, if possible, the impending extermination? Gray squirrels, "the oldest inhabitant" tells us, come once in seven years. This is one of the seventh years they are due, and I must confess they have been with us in force. M. C. H.

### A Toronto Quail Case.

THOMAS H. CLEGHORN, the Yonge street fruiterer, was charged with having exposed for sale some quail at his store. Mr. Hope, secretary of the Game Protective Association, swore that he saw the quail at the defendant's place of business. Mr. Cleghorn stated that he bought the quail in Chicago. The plea that they were imported did not enter into the question when the new statute of 1892 was looked up. Mr. Boyd raised the point that the Ontario Legislature could not pass legislation that interfered with trade and which fairly came within the purview of the Federal Government. It was a peculiar thing to his notion that the Dominion Parliament should place a duty on quail and then the Ontario Legislature should turn around and virtually prohibit the importation of them. His Worship administered the law as he found it and fined Cleghorn $10 and costs or ten days. Mr. Cleghorn immediately gave notice of appeal.—*Toronto Telegram.*

Quasimodo's little niece has been stopping with him, and occasionally making him smile with her quaint remarks. Here is the latest: "Uncle, do dogs get married?" "Married! No, my child, certainly not." "Then what right has Nettle to growl at Rover while they are eating their breakfast?" Quasi is thinking it over still.—*Drake's Magazine.*

# Sea and River Fishing.

## SALMO KAMLOOPS.

HOW AND WHERE WE FOUND HIM.

OUR vacation last summer, besides rest and recreation, had in view a special object. We sought the acquaintance of the landlocked salmon, ouinaniche, or by whatever other name the fish of that species might be known on our coast. We had frequently heard the designation silver trout and had sometimes taken young salmon in our streams before he had taken his first bath in salt water. We had heard of golden trout, but we were not going in the direction of Mount Whitney. But the most significant suggestion came from an English sporting journal, which had attracted our attention some seasons before and made a deep impression that the game fish corresponding with our idea was to be found in the waters of Kootenay Lake in British Columbia, and that he rose readily to the fly. A theory, too, quite attractive to a summer tramp who loves the rod, was advanced that the engineers had discovered that the difference in elevation between the fountain sources of Columbia and Kootenay rivers was slight, and that at some time of great flood, the sources of the former being higher, overflowed and carried spawn or salmon fry over and into the waters of the latter and so into the lake. There they developed into the landlocked salmon. When or exactly how this took place, so far as sport was concerned, made little difference to us for the while. The theory was pleasing because there was added romance, and was somewhat ingeniously supported by reference to certain historical accounts of Catholic missionaries who from the early settlement of our country are known to have intelligently and accurately observed and reported much valuable matter concerning their field of labor in the wilderness. Some old and musty books or records, too, were supposed to be on the shelves of the library of the British Museum which disclosed interesting and corroborating testimony.

However, without consuming too much space in your journal, the writer yielding to the fascinating influence of the story, awaited the arrival of his friend at the rendezvous in northern California where we had met, as was custom, to tarry awhile and gather pith and vigor to overcome the effect of sedentary habit before going further on. So inspired we passed through Portland in the early days of July on our way to Spokane Falls in the State of Washington, thence north by rail to Marcus and Little Dalles on the Columbia River, where we took the steamer Lytton, plying between the latter place and Revelstoke, a station town on the Canadian Pacific Railway. It was our purpose to stop off at Sproat's Landing at the confluence of the Kootenay.

There is a charm in this trip from Little Dalles to Revelstoke which stirs the blood and thrills the nerves. The little steamer sturdily fights her way through the wild waters which buffet her until she has passed the mouth of the Kootenay, for the great volume which pours out of Arrow Lakes meets the outpouring of Kootenay, and being forced into the narrowing channel, to be supplemented by the additional waters of Clark's Fork, or Pend d'Oreille as sometimes called, whirls, bubbles and hisses in a state of steamy fermentation. After passing the Kootenay come the Arrow Lakes, an expansion of the Columbia River, which greet you with smoother face until after a night's rest on the steamer you meet the cool morning shadows of the Gold and Selkirk ranges, with their glacial peaks which have been found to yield the right of way to the mighty Columbia. It takes a day and a night run from Little Dalles to Revelstoke, about twenty-four hours' time, and 230 miles river navigation.

Soon after taking steamer at Little Dalles we made the acquaintance of General Assistant Passenger Agent Brown of the Canadian Pacific Railway, who was enthusiastic in his recommendation of sport on the Kootenay, having just returned from the stream. He kindly gave us the use of the lodges then being built by his company for the accommodation of parties visiting the falls. We stopped over that evening at Sproat's Landing.

Kootenay Lake is elevated about three hundred and fifty feet above the level of Columbia River and discharges into it through a rugged but not narrow cañon with high gray granite walls. It is not bare of forest or undergrowth, but the timber does not appear to us of special value. The stream is twenty miles long and flows out of the extreme west end of the lake, which is nearly equal length with the river. It is broken by falls about midway between the source and confluence, the series of falls covering about three miles of the river's course. The first in ascending is the St. Agnes, which is about thirty feet vertical height on the north side and of such volume and velocity on the other, that the ascent of salmon from the Columbia is barred. They nevertheless gather at the foot in great numbers in the vain effort to ascend, and in consequence the fall was once a famous resort of the wild tribes for their supply. Within two or three miles further on, the other falls, Pillar and Geyser, are met with, respectively deriving their appropriate names from suggestions of nature. There is much beauty in the scenery, which appeals strongly to the best gifts of pen and pencil. The water is magnificent and fascinating in its display, and the whole scene is wild, bold and impressive.

So irresistibly inviting to the angler it was impossible to pass such opportunity, and so between these falls we found the sport we had anticipated and succeeded in taking the fish we were in quest of, to be afterward taken with surer identity in other waters of British Columbia, as will be described further on. We camped during parts of the second and third weeks in July; found the average temperature agreeable; the morning and evening fresh, we can hardly say cold; were not annoyed by insects; had during our stay occasional showers, followed by sunshine, which gave no discomfort, but added pleasure, for the bluebells, which never grew richer in Scottish Trossachs, with other dainty flora, always rose resplendently in recognition of nature's favor of sunshine and flower. We have heard since of the experience of others not so happy as was ours.

Breaking camp and returing to Sproat's Landing, now Robson, we met the Lytton again on her regular trip north through the lakes to Revelstoke. We had information that we would find our fish in the waters of Kamloops Lake, one of the Shuswap series, at its foot, where the South Thompson receives its flood and bears it to the Fraser, which mingles its volume and delivers it to the Gulf of Georgia.

Savona is the station, about two hundred and twenty-five miles east from Vancouver, where we found a hospitable host in Mr. Adam B. Ferguson. Here the best specimens were taken and the best opportunities afforded of observing the beauty and grace of this superb fish, whose gracious quality follows him to the table.

It strikes me like the sound of a trumpet, to use an expression of the gentle author of "Angling Talks," as I recall my friend's triumphant halloo as one evening his voice came cheerily up stream and I turned to behold him erect in the bow of his boat, every sense of the accomplished angler concentrated with new born joy as he realized that he had well hooked a superb specimen on his fly. Forty feet of line out straight and a flash of silver shot in the air and glistened in the rays of the setting sun. It was dangerous game for a novice, joy for an accomplished hand. Then the wild dash for freedom and the fierce struggle under the water. The reel clicked, hummed, and five times again under the strain of the practiced rod the silvery phantom flashed in air until at last, with steady and skillful play, the gallant struggle of the perfect fish, whether landlocked salmon, ouinaniche or silver trout, as we were to be advised scientifically, was over and the net inclosed him. Four pounds, and as silvery and bright as the dollar new coined and fresh from the mint. We unjointed our rods, and as we turned our faces toward the hostelry, from afar up the lake came the wailing cry of the loon.

Our vacation this summer was the natural sequence of last season's pleasant experience, and carried the purpose of not only renewing the sport with which we had become familiar, but also of securing specimens for scientific examination. With this plan we met at our rendezvous. My friend who got a day ahead of me, by an accident which was in no way a disaster, was on his way to Portland where I joined him early in July. He had carefully made preparation for preserving and bringing home some well-selected specimens of the fish known as silver trout, only, in the waters where we had found him, but so distinguished from other Salmonidæ that the Indian, in his own dialect, had honored him with a distinct name. Believing in the preservation of aboriginal native names, I choose to use it that it may become popularly known among anglers. We agree that Stit-tse is distinguished by better fighting qualities than any other of his species that we have taken in any waters west of the Mississippi. Almost any bright-colored fly lures him, but preference may be given to colors of the golden pheasant, with dash of silver tinsel on number two hook. The South Thompson at the outlet of Kamloops Lake at Savona is six hundeed feet wide and from fifteen to thirty feet deep, with current of six or seven miles per hour. Rainbow (*irideus*) and Dolly Varden (*Salvelinus*) trout are abundant at this point. The rainbow was locally named redsides, weighing not uncommonly as much as nine and a half pounds, and on hook or platter is only inferior to Stit-tse. Either of these fish, Stit-tse or rainbow, may be taken in the lake by trolling, and often of larger size. The better time for the anglers here is from June 20 to July 15 as a rule, depending somewhat on the condition of the waters, and the best is when the water is falling. The hotel is within one hundred yards of the lake, the best point for sport being a mile and a half from the hotel across the lake and is easily approached by boat, or on foot as the river is spanned by an excellent bridge at the outlet of the lake.

When we left Portland it was with the intention of going as far as Banff Hot Springs, with a side trip into new country also contemplated. We purchased tickets, going by rail by way of Tacoma, Seattle and New Whatcom to Mission Junction on the Canadian Pacific Railway, and thence to Savona, where we stopped to accomplish our purpose. The satisfactory result, which is due to the thoughtful preparation and excellent care taken of the specimens by my friend, is given in the following paper. G. B. C.

STOCKTON, Cal., October, 1892.

### Description of a New Species of Salmon.

*Oncorhynchus kamloops*, from the lakes of British Columbia.

BY DAVID STARR JORDAN.

(Copy of MSS. sent to Smithsonian Institution for publication).

*Oncorhynchus kamloops*, species Nova:

Head, 4½ in length to base of caudal; depth, 4½; dorsal rays, 11, not counting the rudiments; anal rays, 11 in one specimen, 12 in the other, besides 3 rudiments; scales, 30. 145, 26 (in second specimen 135 scales); about 120 pores; length of body, largest specimen, 16¼in.; smaller specimen, 15¾in.

Body moderately elongated, somewhat compressed, the general form resembling that of the silver salmon (*Oncorhynchus kisutch*); jaws in the typical specimens not prolonged, the maxillary extending beyond the eye, its length not quite half the head; snout slightly rounded in profile, the profile regularly ascending; eye large, about as long as snout, four and a half times in head; teeth moderate, some of those in the outer row in each jaw moderately enlarged; teeth on tongue and vomor, as usual in *Oncorhynchus;* opercles striate, not much produced backward; branchiostegal rays, eleven on each side; dorsal fin rather low, its longest ray slightly greater than the base of the fin, 1 3-5 in head; anal fin lower and smaller than usual in *Oncorhynchus*, its outline slightly concave, its longest ray greater than the base of the fin and a little more than half head; adipose fin moderate; caudal fin rather broad, distinctly forked, its outer rays about twice inner; pectoral fins rather long, 1⅛ in head; ventrals moderate, 1⅝ in head; gill-rakers comparatively short and few in number, about 6 plus 12 or 13.

Coloration, dark olive above, brightly silvery below, the silvery color extending for some distance below the lateral line where it ends abruptly; when fresh the middle of the sides in both specimens was occupied by a broad band of bright, light rose pink, covering about one-third of the total depth of the fish; back above with small black spots about the size of pin heads irregularly scattered and somewhat more numerous posteriorly; a very few faint spots on upper part of head; dorsal and caudal fins rather closely covered with small black spots similar

to those on back but more distinct; a few spots on the adipose fin, which is edged with black; lower fins plain; the upper border of the pectoral dusky; a vague dusky blotch on the upper middle rays of the anal; ventrals entirely plain.

The intestines had been removed and so no account can be given of the pyloric cæca.

The existence of this fish was first known to me from conversation with Mr. A. C. Bassett, of Menlo Park, Cal., a very enthusiastic angler, who had taken the fish in the Kamloops Lake in British Columbia. I was unable to identify the fish from the account given by Mr. Bassett. In going for a summer outing in July, 1892, Mr. Bassett went to Kamloops Lake and secured the two type specimens, which were carefully placed in alcohol and sent to me. The following statement of their habitat was furnished me by Mr. Bassett:

"These specimens were taken at the outlet of the Kamloops Lake into the South Thompson; the North Thompson flows into the upper end of the same lake. These waters connect with the Shuswap lakes, and this fish we find in all the tributaries of the last named lakes, also in Okanagan Lake, the waters of which flow toward the Columbia (the other lakes being tributary to the Frazer River). Reliable information gives the weight of the largest specimen ever caught in Okanagan Lake as 17½lbs. The Shuswap Indian name for this salmon is *Stit-tse*. They have been taken fifty miles below the Kamloops Lake in the Thompson River, but not in large numbers."

This seems to be a species of salmon entirely distinct from the five hitherto authentically recorded from the waters of the Pacific coast. There is not much doubt from the account of Mr. Bassett as well as from the appearance of the fish that it is a "landlocked" species of salmon. Its nearest relationships seem to be with the king salmon or quinnat (*Oncorhynchus tshawytscha*), but from the quinnat it differs somewhat in coloration, and especially in the very much smaller size of the anal fin and in the reduced number of branchiostegals. It is possibly descended from the quinnat, but in any event it is so modified that it must be regarded as a different species.

I have given the species the name of the lake from which it was first taken. One of the two type specimens has been sent to the United States National Museum, the other is in the museum of the Leland Stanford Junior University. With these two specimens was a small fish about 5in. long of the kind on which these salmon were feeding. This little fish was without spots, and has some eighteen rays in the anal fin. Apparently it is the young of the quinnat salmon; certainly it is not the young of the species in question.

The discovery of this landlocked salmon lends additional probability to the theory that the small landlocked salmon of the various lakes in British Columbia and Washington which has been known by the name of *Oncorhynchus kennerlyi* is really to be regarded as a distinct species as Dr. Bean has maintained and not as a form of *Oncorhynchus nerka*. The *kennerlyi* reaches a length of about 10 or 12in. and the weight of little if any more than a pound. It can be distinguished from the present species by its small size and by the very much greater number of its gill rakers, which if my notes are correct, are upward of forty in number in the Nerka. The small white salmon to which the name of *Salmo warreni* was given by Dr. Suckley is probably the female of the *kennerlyi*. I do not find among the various nominal species described by Dr. Suckley, any which seem at all to correspond to *Oncorhynchus kamloops*.

PALO ALTO, Sept. 12.

## POTOMAC NOTES.

BLACK bass fishing is still the rule here, and this month, especially during our Indian summer, good sport may be expected. In September and October many bass were taken, some very good ones, too. Major Kirby leads, so far as we are informed, with a 5½lb. bass. The Major is a member of the South Mountain Club, and his catch naturally enthuses the whole club. A Mr. Lewis recently had good fishing at the Little Falls of the Potomac, taking a number of very good sized fish. M. A. Tappan sought recreation at Romney, West Virginia, and had several days of splendid sport, catching all the bass desired. Romney is on the South Branch of the Potomac, which is one of the best black bass waters near Washington. Mr. H. C. Coburn showed me a very nice string of bass, seven in all, which he took off the Anglers' Club House a few days ago. The wind was very strong and made fishing from boat quite disagreeable, else he would have doubled his catch. Charley Laird and Henry Weye took a trip to the Great Falls recently, but met with poor success. Messrs. Hunter, Lanvoigt, Demonet and Hancock have made some fair catches. The Potomac water is clear and cold now, the temperature being 53°.

What a paradise for anglers Washington must have been twenty-five or thirty years ago. Gentlemen of the old school found 5, 10 and 15-pound rockfish more plentiful in their day than we do even yellow perch. A good story is told of M. Du Bante. This gentleman spent many an hour fishing from the Long Bridge, and one evening was rewarded in the capture of a 12-pound rockfish. The exact place of hooking the fish was carefully marked by a nick in one of the timbers of the bridge, and M. Du Bante from that moment felt a sort of individual ownership of that especial part of the structure. He hastened up town and of course had to let some one into his secret; so hurrying on he soon reached Hancock's restaurant, and there to the original host of that establishment, Andrew Hancock, he told all about the capture. "Andrew, I catch him; see?" Even the private mark—the notch in the bridge—was referred to. The next day M. Du Bante again repaired to the bridge, and who should he find sitting plumb upon his nick but Judge Bibb. Du Bante was furious and soon confronted Andrew with a charge of gross unfaithfulness for having told the Judge about the notch in the bridge. "How do you know," asked Andrew, "that I told Judge Bibb?" "Because no one but you knew anything about it," retorted Du Bante. Matters were soon adjusted. Judge Bibb failed to catch a 12-pound fish from the notch and Du Bante became reconciled.

At another time this same ardent angler was fishing for rockfish above the long bridge on the Virginia side of the river. Mr. ——, cashier of the Bank of the Metropolis, accompanied Du Bante and soon succeeded in hooking a fine fish. Du Bante was rather nervous. It happened that the cashier wore large colored glasses. "Let me land him, let me land him!" cried Du B., but the cashier proposed to have a full hand in the matter, and kept working the fish nearer the boat. Du Bante, growing more and more excited, exclaimed: "No, no!" "We will bring him up close to the boat," insisted the cashier. "And then, rockfish see green spectacles, and in five minutes be at Alexandria," thundered Du Bante. Sure enough, it is said, the fish in the wrangle was unhooked, and with a vigorous movement of the caudal portion of the body started for Alexandria, and was lost. When M. Du Bante had no longer use for his tackle, owing to approaching old age, he offered it to one of a new school of anglers for a modest sum, saying: "John, it is the finest you ever saw, only 25 years old."

In a talk with Mr. W. V. Cox some few weeks since he told me of the good trout fishing had in company with Messrs. Chappelle and Reynolds a year ago. This was in Difficult Creek, Indian Creek and the Blackwater, Garrett county, West Virginia. Trouting in these streams was very good. Indian Creek, though a very small stream, is said to be full of trout.

Gunners are out in force. Quite a number of quail have been shot just outside of the city. The weather has been so unusually dry that parties having good dogs do not care to work them in the bush until after a rain.

WASHINGTON, D. C., Nov. 3. BON.

## MORE KEKOSKEE CONFIRMATION.

*Editor Forest and Stream:*

Blessings on Mr. Hough! The Kekoskee fish story, while both entertaining and instructive, at the same time creates within one an increased desire for truth, and an utter fearlessness in adhering to the same at all times and under any and all circumstances. What a relief from campaign literature! Everbody hails the publication of this remarkable statement of facts, or statement of remarkable facts, as you like, with rejoicing. All appreciate it. Even the oldest fishermen surrender the palm to Mr. Hough, and betake themselves to a seat in the rear without a murmur. The Kekoskee version is a good one; but all must admit that it required the touch of a masterhand to put it on paper after the fashion in which it appears in FOREST AND STREAM.

But, aside from the merits of both the story and the writer, to whom we extend our most sincere thanks, I am personally conscious of a peculiar appreciation, in that it brings to my mind the earliest recollections of my childhood. The first sheet of water my wondering eyes ever looked upon was the Horicon; and the first fish I have any recollection of was a sleigh (not wagon) load of those identical Kekoskee bullheads. No, I did not mean to say it just that way after all; I must modify that assertion a trifle. They were not really Kekoskee bullheads, for they were not taken from the celebrated geyser; but they came from the same source, the Horicon, and were just as good. Although I was but a wee bit of a girl them—my years were few and I had not yet learned to date them—those bullheads made a never-to-be-forgotten impression on my mind. I have long felt like telling the readers of FOREST AND STREAM about them, but I somehow lacked the courage. Not that I feared anybody would doubt my word, but you see it happened so long ago that I feared some mathematical mind might go to work on the intervening years, exactly as Mr. C. H. Ames has already done on the product of the Kekoskee eruption, and perhaps make me out— but I won't say anything about it and it may not be noticed.

My paternal grandfather's home was situated on the ledge, a few miles up the lake from the unfortunate Kekoskee, and directly overlooking the then lovely little Horicon. It was in a beautiful spot, about two miles from the lake, and a charming piece of woodland lay between. At this point the ledge was very high, and in summer we looked down upon the tops of the trees, with their mass of green foliage, beyond which sparkled the waters of the Horicon. In winter when the trees were bare, it seemed only a step down to the margin of the lake. Here the Indians hewed canoes from the trunks of great trees, and it was a mystery to me how they were going to get them into the water when finished. In this woodland I first listened to the tinkle of a cow-bell, and always felt very much afraid of the sound; and that feeling has never left me. I can imagine no more lonesome and melancholy sound than that of a tinkling bell in the depth of a dense wood. Here many wonderful things were revealed to me in those days, and I begin to think it must be a wonderful place somehow: and am more and more convinced of the fact as I read, and re-read, Mr. Hough's fish story.

In this same wood I have seen men engaged in burning coal pits, and, in another locality, making maple sugar, and here, too, I fired my firsht shot at game. The gun was a hammerless (though my husband interrupts me here to say I must certainly be mistaken, as there were no hammerless guns in those days) and with the first shot down came a blackbird with red wings. Unlike the majority of feminine first shots, I never felt the jar of the gun in the least, and if it kicked at all I did not know it. My good fortune, no doubt, was due to the fact that the old hammerless was firmly held by the hands of my big brother, while I fired it with a match. Everybody, of course, knows something of the nature of a domineering elder brother, and I was just at the right age to do anything and everything he told me to. We thought it great fun then, but I am afraid it would take him a long time to persuade me to touch a lighted match to the tube of a gun now. That old, dilapidated gun was the only one I ever knew my father to own.

Another time we found game of much more importance than blackbirds, and we followed it, in company with my grandfather's old house dog, for many hours, and I was sent again and again to beg my father to come out and see what we had found. When at last he came and found that we were following a great lynx he was very much surprised, and immediately dispatched my brother for a man with a gun, while he stood guard at the roots of the tree which held our game. When the gun arrived the animal was soon brought down, and found to be a very large one.

But it was my original intention to tell what I know about K— no, Horicon bullheads, and I've got to talking and forgotten all about it, but I'll try it again.

It was in winter; we were paying a visit to my grandfather, and as the fishing was said to be very very good, my father, though not much of a fisherman, went down to the lake to try his luck, and he brought home a whole sleigh load. They fastened a large basket to the end of a long pole, cut a hole through the ice and dished them up by hundreds. We had all the fish we could eat for a long time, and then father had the story of his wonderful catch of bullheads to relate to his friends for the remainder of his life. While I have no recollection of the Kekoskee eruption, I have certainly eaten of the bullheads taken from the Horicon in the winter of 1860, and was, as one might say, brought up on the story of my father's wonderful catch.

While on a visit to the old place a few years since, I was sorry to find a great green marsh in place of the old-time Horicon Lake. The old trees have been cut down, too, and everything has changed—the memory only remains.

* * * * *

By the way, can FOREST AND STREAM give us any information as to the whereabouts of Mr. "Podgers?" We miss him even more, we think, than he once missed the bear stories; and we don't think it's fair for him to drop out of sight all at once, after getting us in the notion of hearing from him each week. MARION.

GEYSERVILLE, Cal.

## THE GAME CATFISH OF THE PECOS.

PECOS, Tex., Oct. 30.—*Editor Forest and Stream:* I have seeen it stated either in FOREST AND STREAM or Hallock's "Gazetteer" that the catfish is unfit to be fished for by gentlemen fishers, and unfit to be eaten except by blackguards and negroes—or words to that effect. I wish to take issue with him who made that remark.

I have found a catfish in the Pecos River which is as gamy a fighter as the black bass, and in the quality of edibleness is not inferior to any fresh-water fish known to me. His flesh is far better than that of the black bass. It is rich and savory, and of an excellent, delicate flavor. The fish is often very fat. This morning I sat down to a bountiful repast of them, from which I arose with a feeling of much satisfaction. Indeed, it is a fish for an epicure. Understand now that he who says this is no greenhorn as to fishes, but a man learned in that line.

They are very numerous in the Pecos. They are a handsome fish. They have small heads, forked tails, and the smaller ones are full of black spots on their sides, which are of a whitish color. As the fish increase in size, the white spots disappear, and he becomes almost white. When first taken from the water they glisten like new silver. They grow to a large size. Judge Nicholas Van Horn of this place told me to-day that he caught one not long since which weighed eighty-two pounds. He says they may be called a "channel cat," but are distinctly a "Rio Grande cat," being, as he thinks, confined to that river and its tributaries. I have seen what they call the channel cat in other parts, but they were not so handsome and grew not so large. When you go fishing, you catch these of all sizes, from a few ounces to several pounds' weight. They bite readily at grasshoppers, bullfrogs, or a chunk of meat of any sort. I judge they would also take a fly as readily as the mountain trout.

The soft-shell turtle also abounds in the Pecos, and I write him down the best by far of all turtles. I think there is no comparison between him and the green turtle of the seas in point of goodness of meat It lays a great many eggs, and they too are tip-top to eat.

The Pecos is a remarkable river. It flows through a region where the trees grow under the ground instead of above ground, through a wide, alluvial valley, whose soil is impregnated with sulphate of magnesia and potash or soda, and salt. Its water tastes strongly of these minerals and is not good to drink. It runs with a powerful current which where a little swollen carries with it more sediment to the cubic foot than any river in the world, I think. When not thus swollen it is a beautiful stream.

But judge not that the Pecos Valley is sterile. On the contrary, to judge by results it is of enormous fertility. They produce such great crops of sweet potatoes and onions here that I dare not state how much per acre, for I would hardly be believed. And I hold that the Pecos sweet potato is the best on earth. I am enthused over it, insomuch that I am continually exclaiming with Falstaff, "Let the sky rain potatoes!" The European grapes—*vitis vinefera*—are as successful here as in California.

Therefore, if any of your readers desire to turn philosophers and to grow fat on channel cats, sweet potatoes, turtles, grapes and wine, let them come hither. There is room enough, for folks as yet are powerful scarce in this great valley. All farming is done by irrigation from the Pecos and artesian wells, of which there are not less than 30 in this little town of 500 people. N. A. T.

## NEVADA NOTES.

MR. GEORGE T. MILLS, State Fish Commissioner for Nevada, has labored for several years past to bring the fishing in waters of his State up to their old standard. The Truckee and Carson rivers have been planted again with fish. The brook trout of the East, *Salvelinus fontinalis*, the rainbow of the West and landlocked salmon have been introduced. Mr. Mills states that he has put in upward of 100,000 fish a year in the Truckee alone. The introduced trout are found far superior to the native, or Tahoe, trout, as the latter is soft fleshed. The rainbow trout are doing especially well and now greater numbers of this fish are caught than of the native black-spotted trout. They are taken from ¼ to 5lbs. in weight and are considered more game than the natives. They take the fly regularly. Mr. Mills himself had the pleasure of catching a 4¼-pounder in the Carson River. A gentleman from Rene took one weighing 5½lbs. These fine fish were both taken with the artificial fly.

The Truckee and Carson rivers, and Lake Tahoe, have been planted with landlocked salmon from the Atlantic side. Those put in three years ago are beginning to show up well. One of 6lbs. has been taken and is evidence that suitable conditions prevail for their development.

Legislation has been secured from both the California and Nevada legislatures prohibiting the emptying of sawdust into the streams, and now nearly all of the mills have abated the nuisance and the Truckee is fast regaining her its condition. Suitable fish ladders have been erected at every dam in both Nevada and California, and the bottom of the river being free from sawdust the fish

find proper spawning places and are rapidly increasing in numbers.

As in many other States, the great drawback in Nevada to any extended effort is the lack of funds, the appropriation being but $10,000.

### A St. Lawrence River Catch.

CLAYTON, N. Y., Oct. 29.—On Wednesday evening last (26th) I saw a very handsome catch of fish lying upon the Hubbard House veranda.

It consisted of 2 moderate-sized, but most beautifully and clearly marked mascalonge, 5 pike (*Esox lucius*), weighing, I estimate, from 5lbs. to 8lbs., and last, but not least, a prize in the shape of a 7lb. pike-perch. The lucky anglers were Mrs. Hubbard, the worthy landlady of the popular house of that name, and her friend, Miss Eliza Wood. The bait used was Skinner spoons, No. 8, and James Green was their oarsman.

Green has since informed me that the second fish hooked by the ladies was a mascalonge, which, after being brought alongside the boat and treating them to an unceremonious shower bath, made good his escape. Green estimated this fish would have weighed 25lbs.

In justice to the ladies it should be stated that they were inexperienced in handling fish of this size, otherwise the result might have been more satisfactory.

There was a time in the history of the St. Lawrence River when the wall-eyed pike, or pike-perch, were quite plenty in this vicinity, but indiscriminate netting produced the usual results, and of late years the taking of one or more of this species is sure to be commented on. It is believed that a greater number have been taken in this vicinity during the past season than for many years previous.

Last August Clayton was favored by a visit from Commissioner W. H. Bowman, of Rochester, and Monroe A. Green, superintendent of the Caledonia Hatchery. Upon examination of the needs of our waters they expressed themselves as satisfied that we needed only a liberal plant of wall-eyed pike, which Commissioner Bowman assured us he would endeavor to have placed in the river next spring. CLAYTON.

### Sea Fisheries of Jamaica.

MR. EDWARD M. EARLE, of Jamaica, who is now on his way to England to perfect the details of his enterprise for the development of the fisheries of Jamaica waters, has shown us the manuscript of what promises to be a work of decided interest and value. The volume will treat of "The Sea Fisheries of Jamaica, Their Possibilities," and something of its scope may be inferred from these chapter titles: Fish Work, Fish Food Supply, Our Food-Fishes, Methods of Capture, Oyster Cultivation, The Turtle Trade, Proposed Fishing Operations, Curing Fish in the Tropics, Poisonous Effects of Some Fish, Sport in Jamaica, Fish of the Cayman Islands Mr. Earle's advancements in this special field and his public-spirited activity in the furtherance of Jamaica's fisheries are such as to warrant us in bespeaking a wide reading for his book.

### "Sand Lake Trout."

Park Rapids, the county seat of Hubbard county, Minn., is convenient to Shell Lake, Fish Hook Lake, Elbow Lake and the Crow Wing Lakes, which contain pike, perch, black bass, croppies, pickerel and mascalonge. It is likely to become a prominent fishing resort. It is on the line of the Great Northern Railroad. At Elbow Lake I heard the mascalonge spoken of as "sand lake trout." This is the furthest fetched yet. It is worse than calling a wall-eyed pike a salmon. Please make a note of it.

C. HALLOCK.

### Big Score.

ACCORDING to the Pittsburgh *Post*, Captain Tom Duff has made a great reputation as a successful angler. The Captain was out with the Wheeling Mark Twain Club, which camped at the head of Fish Creek Island, and in one morning he caught 45 bass, 7 pike and 5 catfish.

### ROD AND GUN AND CAMERA.

As a recognition of the important place of amateur photography in its relation to sports of the field and prairie and mountain and forest and stream, the FOREST AND STREAM offers a series of prizes for meritorious work with the camera. The conditions under which these prizes will be given are in brief as here set forth:

There will be ten prizes, as follows: First $25. Second $20 Third $15. Fourth $10. Six of $5 each.

The competition will be open to amateurs only.

The subjects must relate to FOREST AND STREAM'S field—game and fish (alive or dead), shooting and fishing, the camp, campers and camp life, sportsman travel by land or water.

There is no restriction as to the time when the pictures may have been or may be made—whether in 1892 or in previous years.

Pictures will be received up to Dec. 31, of this year.

All work must be original; that is to say, it must not have been submitted in any other competition, nor have been published.

There are no restrictions as to make or style of camera, nor as to size of plate.

A competitor need not be a subscriber of FOREST AND STREAM.

All photographs will be submitteed to a committee, shortly to be announced. In making their awards the judges will be instructed to take into consideration the technical merits of the work as a photograph, its artistic qualities; and other things being equal, the unique and difficult nature of the subject.

Photographs must be marked only with initials or a pseudonym for identification. With each photograph should be given name of sender, title of view, locality, date, and name of camera.

The photographs shall be the property of the FOREST AND STREAM. This applies only to the particular prints sent us.

### A New-Subscriber Offer.

A *bona fide* **new** subscriber sending us $5 will receive for that sum the FOREST AND STREAM one year (price $4) and a set of Zimmerman's famous "Ducking Scenes" (advertised on another page, price $5)—a $9 value for $5.

This offer is to *new* subscribers only. *It does not apply to renewals.*

For $3 a *bona fide* new subscriber for six months will receive the FOREST AND STREAM during that time and a copy of Dr. Van Fleet's handsome work, "Bird Portraits for the Young" (the price of which is $3).

## FIXTURES.

### DOG SHOWS.

Nov. 22 to 25.—Brooklyn. H. W. Huntington, Sec'y, 148 South Eighth street.
Dec. 6 to 9.—First Annual Dog Show Hermitage Kennel Club, Nashville, Tenn. Robert C. Stockton, Sec'y.

1893.

Jan. 3 to 6.—Mohawk Valley Poultry and Kennel Club. F. B. Zimmer, Sec'y, Gloversville, N. Y.
Feb. 21 to 22.—Westminster Kennel Club, New York city. Jas. Mortimer, Supt.
April 4 to 7.—New England Kennel Club, at Boston, Mass. J. W. Newman, Sec'y.
May 3 to 6 – Pacific Kennel Club, at San Francisco, Cal. Horace W. Orear, Sec'y.
June 13 to 17.—World's Fair, Chicago.
Sept. 7 to 10.—Hamilton, Ontario. A. D. Stewart, Sec'y.

### FIELD TRIALS.

Nov. 14.—Fourth Annual Trials of the Brunswick Fur Club, at Princeton, Mass. J. H. Baird, Sec'y.
Nov. 15.—American Field Trials, at Columbus, Ind. W. J. Beck Sec'y.
Nov. 21.—Eastern Field Trial Club Trials, at High Point, N. C. W. A. Coster, Sec'y.
Nov. 28.—Philadelphia Kennel Club Trials, at High Point, N. C. F. G. Taylor, Sec'y.
Dec. 5.—Central Field Trials, at Lexington, N. C. Col. Odell, Sec'y.
Dec. 19.—Irish Setter Field Trials, at Lexington, N. C. Dr. G. G. Davis, Philadelphia, Pa., Sec'y.

## PHILADELPHIA K. C. FIELD TRIALS.

### All-Age Entries.

*Editor Forest and Stream:*

I take pleasure in inclosing to you a list of the entries for the first open All-Age Stake of the Philadelphia Kennel Club field trials, which closed Oct. 15, to be run at High Point, N. C., Nov. 28. The entries number fifty, thirty English setters, twelve pointers and six Irish setters. This is a very satisfactory showing.

There were paid sixty second forfeits in our Derby Stake, so that we may look for a fine big field of starters.

ENGLISH SETTERS.

BEN HUR OF RIVERVIEW—Pennsylvania Kennels' black, white and tan dog (Ben Hill—Zoe W.), 4yrs.
SANDY GLADSTONE—S. M. Mitchell's orange and white dog (Breeze Gladstone—Delaware), 18mos.
ST. ANTHONY—Avent & Thayer's black, white and tan dog (Rowdy Rod—Celeste C.), 14mos.
RUPERT—Avent & Thayer's black, white and tan dog (Roderigo—Bo-Peep), 5½yrs.
BELLE S.—Avent & Thayer's black, white and tan dog (Roderigo—Bo-Peep), 5yrs.
NOVELIST—Avent & Thayer's black, white and tan bitch (Woodhill Bruce—Llewellyn Novelty), 3½yrs.
HARRY C.—Greenfield Hill Kennels' black, white and tan dog (Roderigo—Countess House), 4yrs.
COUNT RODERIGO—W. C. Kennerley's black, white and tan dog (Roderigo—Lady Gladesse).
BOB COOPER—Blue Ridge Kennels' white and chestnut dog (Roi d'Or—Miss Nellie Y.), 2½yrs.
GOSSIP—Blue Ridge Kennels' black, white and tan bitch (Roderigo—Belle of Piedmont), 3½yrs.
BRIGHTON TOBE—T. G. Davey's black and white dog (Locksley—Leddersdale II.), 3yrs.
PRIMA DONNA—E. J. Myers's blue belton bitch (Rockingham—Donna), 2½yrs.
DIAMOND—F. R. Hitchcock's back, white and tan bitch (Dick Roy—Cad's Pet), 3yrs.
ANNIE F.—F. R. Hitchcock's black and white bitch (Roderigo—Juno A.), 3yrs.
LENA—Charles Heath's black and white bitch (Prince Lucifer—Junean), 3yrs.
PETE—Charles Heath's black, white and tan dog (Prince Lucifer—Junean), 3yrs.
LORA—P. Lorillard, Jr.'s black, white and tan bitch (Gladstone's Boy—Ruby D.), 2½yrs.
MISS RUBY—P. Lorillard, Jr's lemon and white bitch (Gladstone's Boy—Ruby D.), 2½yrs.
COUNT ANTEO—P. Lorillard, Jr.'s lemon and white dog (Count Noble—Gladstone's Girl), 2½yrs.
ANTEVOLO—P. Lorillard Jr.'s white and liver bitch (Count Noble—Trinket II.), 3yrs.
GUY—Geo. T. Leach's black, white and tan dog (Gladstone's Boy—Lady). 5yrs.
COUNT GLADSTONE—A. Dill's black, white and tan dog (Count Noble—Ruby's Girl), 3 yrs.
NANON—S. M. Mitchell's black, white and tan bitch (Ben Hill—Mary S.), 3yrs.
GATH—W. B. Smith's black, white and tan dog (Gath's Joy—Dart), 2yrs.
BEN HUR FRANKLIN—W. B. Smith's lemon and white dog (Ike—Leda), 5yrs.
PLUTO—C. H. Phelps, Jr.'s black and white dog (Mars—Venus), 3yrs.
DAN NOBLE—A. J. Klofandar's black, white and tan dog (Gladstone's Boy—Flame M.), 2yrs.
TENNYSON—Fairmount Kennels' lemon and white dog (King Noble—Queen Vashti), 2yrs.
ROSEBUD—Fairmount Kennels' black, white and tan bitch (Czar— ——), 1½yrs.
THORNDALE—Hempstead Farm Kennels' white and black dog, Tom Bowline—Belle C.).

POINTERS.

PROMOTION—Fairmount Kennels' lemon and white dog (Lord Graphic—Belle Bishop), 2½yrs.
GROUSE—C. C. M. Hunt's lemon and white dog (Mainspring—Swain's Fly), 3½yrs.
PRAWN—Heywood-Lonsdale's liver and white dog (Crab—Polly Peachem).
DICKON—Heywood-Lonsdale's liver and white dog (Ightfield Dick—Ightfield Bloom).
HEMPSTEAD—Hempstead Farm Kennels' liver and white dog (Duke of Hessen—Lass of Bow).
HEMPSTEAD COURT—Hempstead Farm Kennels' liver and white dog (Duke of Hessen—Lass of Bow).
SANFORD DRUID—Hempstead Farm Kennels' liver and white dog (Exon Don—Sanford Quince).
HEINEKEN—J. R. Purcell's liver and white dog (Flockfinder—Yon), 4½yrs.
JUPITER—C. C. Cushing's liver and white dog (Tom Boline—Belle C.), 4yrs.
GENESTA—J. W. M. Cardoza's liver and white bitch (King of Kent—Hops), 4yrs.
DELPHIC DUKE—J. W. M. Cardoza's liver and white dog (Dick of Delphos—Genesta), 1½yrs.
DELPHIC DAISY—J. W. M. Cardoza's liver and white bitch (Dick of Delphos—Genesta), 1½yrs.
WILD DAMON—Charlottesville Field Trial Kennels' liver and white dog (Damon—Flora), 2½yrs.
OUTCAST—Charlottesville Field Trial Kennels' liver and white dog (King of Kent—Hops) 2½yrs.

IRISH SETTERS.

HOPE BORU—George E. Gray's red bitch (Brian Boru—Biddy), 2yrs.
MERLIN—C. T. Thompson's red dog (Grab—Flora), 3yrs.
HENMORE SHAMROCK—F. L. Cheney's red dog (Muskerry—Avoca), 4yrs.
ADONIS—R. E. Richards's red dog (Tim—Currer Belle III.), 2½yrs.
COLERAINE—Glenmore Kennels' red bitch (Fingal III.—Aveline), 2½yrs.
FINGLAS—Glenmore Kennels' red dog (Fingal III.—Aveline), 2½yrs. FRANCIS G. TAYLOR, Sec'y.

## NEW ENGLAND FIELD TRIAL CLUB.

### All-Age Entries.

*Editor Forest and Stream:*

I take pleasure in forwarding you the following entries for the All-Age Stake of the Eastern Field Trials Club's second annual trials, to be held at Assonet, Mass., Nov. 8 and following days. There are nineteen English setters, six Gordon setters and two pointers:

SIR FREDERICK—Seminole Kennels' blue belton dog (champion Royalty—Olinda), June 9, 1886.
POLLY II.—Bayard Thayer's black and white bitch (Lincoln—Polly).
TENNESSEE VANDAL—Oakland Kennels' black, white and tan dog (The Corsair—Effie Hell), Jan. 19, 1891.
DASH G.—H. B. Tallman' black, white and tan dog (Unm—Dot), June 24, 1886.
GROUSE—Joe Lewis's (agent) black, white and tan dog (MacD.—Pansy Mason), April 28, 1888.
TONY GLADSTONE—Joe Lewis's black, white and tan dog (Champion Paul Gladstone—Belle Ward), 1889.
KENT II.—Cohannet Kennels' blue belton dog (Count Howard—Lady Westmoreland), July 10, 1887.
THE CORSAIR—E. O Damon's black, white and tan dog (Dan Gladstone—Haydee), Aug. 9, 1887.
ROD'S WHIM—E. O. Damon's black, white and tan dog (Roderigo—Florence Gladstone), July 3, 1889.
JENNIE STEVENSON—E. O. Damon's black, white and tan bitch (Fred W.—May), Feb. 22, 1890.
MARK NOBLE—Chas. Kelley's black, white and tan dog (Gath's Mark—Fleety Noble), July 1, 1889.
MACK G.—E. S. Coggins' orange and white dog (Follett's Mack—Belle), Feb. 15, 1888.
WAGTAIL—O. W. Donner's black, white and tan dog (Roi d'Or—Belle Piedmont), 1890.
CLAUD—Fred H. Clark's black, white and tan dog (Roderigo—Lillian), May 20, 1886
OUR PET—Oakland Farm Kennels' black, white and tan bitch (The Corsair—Chula), April 11, 1889
MINCH—F. W. Whitlock's black, white and tan dog (Roderigo—Florence Gladstone), July 3, 1888.
MOLLY DALE—E. S. Gordon's black and white bitch (Gath's Mark Jr.—Belle Dale), May 1, 1890
BESSIE II.—Edward Brooks's black, white and tan bitch (Dick—Daisy), May 4, 1884.
REVERDY—J. L. Wells's orange belton dog (Gath's Mark—Rosa), Aug. 1888.

GORDON SETTERS.

COMUS—James B. Blossom's black and tan dog (Roy—Dot), February, 1888.
SALLY BEAUMONT—J. B. Blossom's black and tan bitch (Beaumont—Countess Flo), October, 1889.
FLOMONT—J. B. Blossom's black and tan bitch (Beaumont—Countess Flo), October, 1889
ARGUS II.—J. B. Blossom's black and tan dog (Beaumont—Venus), June 2, 1890.
RANGER B.—Noyes Billings's black and tan dog (Tom II.—Neva), July 30, 1887.
COUNT NOBLE—Miss S. A. Nickerson's black and tan dog Pratt's Ben—Aldrich's Belle), Feb. 15, 1890.

POINTERS.

DUKE—Henry Dutton's lemon and white ticked dog (Tempest—Nadjy of Naso), May 30, 1890.
GROUSEDALE—R. R. Moore's dog (Underwriter—Trix), Nov. 20, 1889. E. K. SPERRY, Sec'y.

## IRISH SETTER CLUB'S FIELD TRIALS.

### All-Age Entries.

*Editor Forest and Stream:*

The following are the entries for the All-Aged Stake:

COLERAINE—Glenmore Kennels' bitch (Fingal III.—Aveline)
FINGLAS—Glenmore Kennels' dog (Fingal III.—Aveline).
ELPHIN II.—Glenmore Kennels' bitch (Tyrconnel—Kinvara).
RUBY GLENMORE—Glenmore Kennels' bitch (Glencho—Magg.
WINNIE II.—Glenmore Kennels' bitch (Frisco—Grouse II.).
BETSY CRAFT—Glenmore Kennels' bitch (Keno—My Maud).
BEAU BRUMMEL—Glenmore Kennels' dog, (Elcho, Jr.—Red Rose).
RANGER—Glenmore Kennels' dog (Irish Elcho—Irish Belfast).
JERRY JARVIS—Seminole Kennels' dog (Elcho, Jr.—Maid).
BEDFORD—Jas. B. Blossom's dog (Minstrel—Aurore).
SQUAW—Dr. J. H. Meyer's bitch (Darrah Pat—Ruby Glencho).
LADY ALICE—H. B. Anderson's bitch (Redstone—Lady Noreen).
ADONIS—H. E. Richards's dog (Tim—Currer Bell III.).
HENMORE SHAMROCK—F. L. Cheney's dog (Muskerry—Avoca).
QUEEN VIC—W. H. Beazell's bitch (Kildare—Red Rose).
HARTE'S BESSIE—W. Harte's bitch (Carless—Jessie Loraine).
ESTELLE—Omer Villere's bitch (Nedio Red—Vineta).
MERLIN—C. T. Thompson's dog (Grab—Flora).
CURRER BELL IV.—G. G. Davis's bitch (Tim—Currer Bell III).
ROMAYNE—Dr. Wm. Jarvis's dog (Elcho, Jr.—Romaine).
HOPE BORN—Geo. E. Gray's dog (Brian Boru, Jr.—Biddy).
ELCHO'S MAID—Geo. E. Gray's bitch (Elcho, Jr.—Maid).
MAID OF BORSTAL—Nelson McIntosh's bitch (Inchiquin—Onota Belle).
HAWKEYE QUEEN—Perry and Switzer's bitch (Claremont Patsy—Nora of Claremont).

The entries in the Derby Stake last year were 13, and in the All-Aged 19, a total of 32. This year there are 22 Derby entries and 24 All-Aged, a total of 46, being an increase of 14 entries over those of last year. G. G. DAVIS, Sec'y.

## AMERICAN FIELD TRIALS PUPPY STAKE.

ENGLISH SETTERS.

MARK VAL JEAN—A. E. Field's dog (Gath's Mark—Lady Jean).
HARRY L.—A. C. Waddell's dog (Captain G.—June Warwick).
PEGGY B.—W. J. Beck's bitch (Gus Kneussell—Mazo Mana).

POINTERS.

TUXEDO—John B. McGuffin's dog (Ossian—Cornelia G.).
ALTO KING DON—A. B. Reeves's dog (King Don—Patti M. II.).
LADY FISHEL—U. R. Fishel's bitch (Devonshire Sam—Lady Wallace).
LEACHE'S BELL II.—W. A. Thompson's bitch (Grand Duke—Meteor's Dell).

IRISH SETTERS.

GLENMORE DONOWAY—Glenmore Kennels' dog (imported Finglas—Betsy Crafts).
GLENMORE FLYAWAY—Glenmore Kennels' dog (imported Finglas—Betsy Crafts).
DUDEEN—R. J. Withers's dog (Tearaway—Kenmare Cora)

W. J. BECK, Secretary.

## POINTS AND FLUSHES.

### Manitoba Matters.

CHICAGO, Oct. 22.—The *Free Press* (Winnipeg, Man.) has some crisp correspondence of late on matters pertaining to the Manitoba Field Trial Club and the Northwestern Field Trials Club. The two secretaries, Messrs. Johnson and Adams, are the chief writers of the correspondence.

The *Free Press* stated on official authority that the Manitoba Field Trial Club elected thirteen new members at its recent meeting, specifying Mr. Gotzian "and twelve other late members of that club" (the Northwestern).

Mr. Johnson, in his reply touching on this matter, said: "It is not true that twelve members of the Northwestern Field Trials Club resigned, but just one, Mr. Gotzian. * * I will enrich the Winnipeg general hospital $100 if even a fourth of the members mentioned, members or late members of the Northwestern Field Trials Club joined that club as stated."

Mr. E. D. Adams in reply stated as follows: "I would say that I furnished the information for that article, and must admit I did not notice the exact wording of that portion which refers to Mr. Gotzian and twelve other members of the N. W. F. T. C. as having joined our club, else I most certainly would have corrected it at the time to read 'supporters,' as it was not my intention to do the N. W. F. T. C. an injustice. The gentleman who proposed these members stated most distinctly they were or had been supporters of the N. W. F. T. C., and on reference to the published report of the trials of that club at Morris I find the names of several of them mentioned as having taken an active part therein."

Mr. Adams referred Mr. Johnson to Points and Flushes in FOREST AND STREAM of Sept. 8.

In reply Mr. Johnson, among other remarks, said: "He also suggests a perusal of FOREST AND STREAM, which he says will explain why the N. W. F. T. Club has an existence. It would be hard to get your readers to place much confidence in the veracity of that report when it is known that it was inspired from the same source as the official account of the Manitoba Field Trials Club's meeting." By "report," Mr. Johnson means the Points and Flushes referred to as being in the issue of Sept. 8.

The authority for all the statements in the aforementioned Points and Flushes was, as stated explicitly and fully therein, the minutes of the Manitoba Club's meetings as spread upon the club's books, and from the original correspondence preserved by the club as part of its records. There was no attempt to make out a case against Mr. Johnson. As stated at the time, or soon thereafter, in Points and Flushes, it was treating of matters which were common gossip in Manitoba. Mr. Johnson's version of the matter has been set forth fully in reply, so far as he has thought proper to present it.

There is one matter, however, that is worth the thoughtful consideration of both clubs, and that is that the unpleasant wrangling which has been begun and which is being perpetuated, will do neither club any good. On the contrary, it will do much harm in checking the growth of their support. Sportsmen who love sport for its own sake and have a feeling that there should be propriety and refinement in sportsmanship as well as out of it, will hesitate to join any public organizations if they are to become, at the same time, joint owners in a factional unpleasantness.

There is room enough for two organizations in Manitoba. There also is room enough in Manitoba for each club to run its trials on different grounds. There is nothing so particularly valuable or useful about Morris, Man., that it cannot easily be duplicated elsewhere. There is a broad field for the energies and talent of both clubs in furthering the interests of field sports and promoting the cause of good fellowship. A great deal of energy will be misdirected and lost, if expended in nursing grievances and making bright quirks.

In a letter received from Mr. Johnson, under date of Oct. 19, he says: "I am sorry you did not get our view of the case before publishing so one-sided an account. I could prove to you that the charges against our club were just the opposite, and could be fairly charged to the other." I can only repeat that, in my opinion, it is not too late for Mr. Johnson to present his refutation. Neither FOREST AND STREAM nor myself is endeavoring to make out a case against him. What has been written on the matter was intended for description of field trial matters in Manitoba. If the history lacks completeness and Mr. Johnson can supply the missing matter, it seems to me that he owes it both to himself and the field-trial public to publish the full and true history.

### Unbroken Dogs at Field Trials.

I have had a number of indorsements of what I wrote on the subject of unbroken dogs running in field trials. The following extract from the letter of a well-known trainer is so forcible that it deserves publication:

"No better plan could be adopted by dishonest competitors than to enter a string of rank duffers for the express purpose of defeating every dog they happened to be drawn against. You know it to be a fact that the best dog in the world cannot perform his work moderately well in company with an opponent which refuses to back, or crowds up when he should back at sight at any distance away from the pointing dog; or that jumps in and flushes or chases; or that needs to be yelled at to make him perform work that should be done voluntarily. Every trainer knows that no dog, however well trained, will work in company with a rank untrained dog and do his work well. A day's shooting in such company will demoralize a thoroughly trained dog to such an extent that several days' work, under strict discipline, is required to reconstruct him."

The unbroken dog has been given a thorough trial and generally was found wanting. The dash and energy of the unbroken state were found to be misleading. The wild dog of one year, rated high from what constituted natural qualities, was found to be worse the following year when broken. There is not one valid reason why an unbroken dog should be started in a competition, and there is every reason why such dog should be thoroughly broken.

### Classes of Field Dogs.

I have had in mind the importance of this subject, and have been intending to write on it for some weeks, but the columns of FOREST AND STREAM are crowded with such good matter every week that other good matter has necessarily been forced to await its turn in publication.

Concerning dogs as field performers, they can be divided into three classes, on their manner of doing field work. The distinction is a most important one, and must be learned sooner or later by all who aspire to a thorough knowledge of what constitute a dog's field qualities and how they compare relatively in a competition. Beginners never, in a field trial, estimate the work properly in respect to its relative value. They always look closely to the details, and the dog which gets the most points, etc., is, in their judgment, necessarily the best dog. They do not consider the class of the dog at all.

A high-class dog may have but one or two opportunities to show his abilities, yet he may show a quickness, capability, confidence and finish in his work that would far excel the work of a competitor which in quantity was much greater.

### The High-Class Dog.

No dog is more misunderstood and misrepresented than the high-class dog, and, strange as it may seem, field trial men have done the most to foster the contempt for high-class dogs—not intentionally, however, but none the less effectively. It seems strange that men would act in opposition to their own interests, but it is easily and often done in all lines of business, the love of gain being the impelling cause. Permanent success is sacrificed for the gain of the moment.

The high-class dog has suffered in the good opinion of the sportsmen at large for the simple reason that field trial men paraded the claims of certain dogs to high-class merit when those dogs had no such claims. The sportsman who often strenuously insisted on the high-class qualities of his dog quite as often hungered for fat stud fees in connection with his claim. The course of reasoning from a fat stud fee to a high-class dog is very direct, from some owners' standpoint.

The bogus high-class field trial dog has done much to depreciate the true high-class dog in the estimation of sportsmen.

The true high-class dog is such whether in a field trial or ordinary shooting. His qualities, briefly stated, are as follows: His disposition to work well and correctly is such that his training has not impaired any of his qualities. His range is wide or close, as the character of the ground requires In ranging over a rough country, or grounds partly open and partly cover, he comes out at the right point of his range to catch sight of his handler, and takes his course at all times from that of his handler as a base of operations. He works for the body scent of birds, draws to them with skill and judgement, and points at the proper distance from them, all being done with quickness and decision. He is sweet-tempered and delightfully obedient, receiving any order with cheerfulness and prompt attention. He directs all his efforts skilfully in the interest of the gun. His endurance is sufficient to meet any reasonable demands of shooting. He is "level-headed," a term which simply denotes a good, steady brain and the absence of nervousness or nervous excitement.

"Bird sense" governs all his efforts. The term denotes the skill, knowledge of the habits of birds and how to work skilfully and successfully in the interest of the gun, the memory of places, etc. The high-class dog stays out at his work, rarely works over the same ground twice in succession, yet he works out all the promising territory within his range.

The high-class dog is a rare dog indeed, and, in late years, has become scarcer, although plentiful as a speculation.

This sort of dog is most formidable in competition, and there is none better for practical field work. He works well without orders or assistance, and is happy in pleasing his master.

### The Bogus High-Class Dog.

This kind of dog is very numerous, and is not to be described on any basis of set qualities. They commonly present distinct qualities or peculiarities as compared one against the other, but they have a similarity in having one or more traits in common with the high-class dog, or traits which are similar apparently, but not in reality, as for instance, when a dog ranges wide and well so far as appearance goes, but lacks in judgment in working out the likely corners, and finds nothing, notwithstanding his imitation of good work.

This class of dog is most difficult to describe. The bogus high-class dog may range and find well, yet, from excessive nervousness or bad judgment, work badly on birds. He may run fast and range wide, yet work his ground with bad judgment, look to his handler for orders at every turn, and often be working behind his handler instead of ahead or aside of him. He may apparently be hunting well, but in reality he may be self-hunting; and at every opportunity he takes occasion to be lost to enjoy his self-hunting without interference. Judges do not deal so severely with this kind of a performer as they should. Sometimes the bogus high-class dog may have every appearance of a high-class dog in his manner of work, supplemented with his handler's assistance, such kind of dog being very inferior in intelligence. This kind will point on footscent and will require a lot of skillful helping from his handler to get him placed near the birds. In ranging he often casts behind the handler, works the same ground twice or more, and has no knowledge of the kind of places birds haunt; in short, is a high-class machine dependent on the handler for direction. This kind of dog, however, goes with so much dash and earnestness and does the work with such confidence that he often deceives both judges and spectators, the pretty points and great speed distracting their attention from the fact that the handler is furnishing nearly all the plans.

Then there is the hard-headed, disobedient dog which finds birds in his own way, and the shooter works to him. Loud whistling, hoarse shouting and much hard running are necessary in handling this kind of dog. He is a hustler, works to the gun part of the time and self-hunts in the rest of it. He is sometimes a half mile or more away in sight and sometimes he is a half hour out of sight. You will be told that all this is due to high-class. In short, the bogus high-class dog presents many forms of field performance. Judges should keep a sharper eye for his especial benefit. "Every dog has his day," but the bogus high-class dog has had his years.

This kind of dog may have a great deal of merit as a worker, but is only bogus when thrust into a class in which he does not belong.

### The Plug Shooting Dog.

This class is a most useful one. The name is of recent origin, and is used more to distinguish a good field dog from a field-trial dog. The plug shooting dog is infinitely superior, if a good performer, to the bogus high-class dog. The plug shooting dog may be a field-trial performer or a field dog, according as he is prepared and run. The name itself is misleading and is founded chiefly on a revenue basis, inasmuch the distinction between the plug shooting dog and the field-trial winner must be made as wide as possible with a view to high prices.

The field sportsman, one whose test is "an ordinary day's shooting, should not be hasty in his adverse conclusions in respect to field trial dogs. It does not necessarily follow that a dog is high-class because he is a winner, and it does not follow necessarily that a dog is high-class because his owner claims the quality for him.

Field trial judges, who have not already done so, would do well to note these distinctions. They have escaped the notice of some judges in the past.

### The Ordinary Dog.

The ordinary dog in a field trial may have one or two good qualities of some kind, but his abilities are so inferior that his struggle is hopeless if there are a few good dogs in the race. It is commonly a competition for him, including the united efforts of dog and handler.

The classes of dogs which run in field trials may therefore be divided into three.

1. The high-class dog, which works well to the gun, but independently of assistance from his handler.

2. The dog of many good qualities, but whose deficiencies have to be supplemented by the brains and assistance of his handler.

3. The dog which requires his handler to do a large part of the work and the thinking.

A more careful consideration of the class of the dog would enable judges to arrive at much more accurate decisions than they sometimes do at field trials.

### Kennel News.

I noticed recently in a contemporary the mention of the death of the famous field trial setter Chance, as a piece of news. There was in it no mention of the date of his death. He died many months ago. There was nothing newsy about the item at this late day.

The same contemporary is constantly and skillfully adding to a well-earned reputation for literary excellence, particularly in pure classical English construction. This week I notice some choice phrases for which the public should feel indebted and which it should cherish. The term "new beginner" was used, a term most comprehensive and satisfying. Again, a most finished phrase is as follows: "Mr. E. W. Jester writes us that he has sold *all* his hounds, *including* Babette," etc. No one can now doubt that when the gentleman sold them "all," he included the others.

### Art.

CHICAGO, Oct. 30.—I had the pleasure not long since of receiving from Mr. Edward Dexter, Buzzard's Bay, Mass., a photograph of Rip Rap and Maid of Kent, both famous in field trial history for great performances in competition. This photograph was from a painting by Mr. E. H. Osthaus, of Toledo, O., and it is remarkably spirited and skillfully arranged in respect to the pose of the dogs. There is a most pleasing fidelity to anatomical detail, a most important consideration in any painting of animals. The texture of the coat appears to be perfectly represented, a feature in which many painters fail more or less. The coat of a pointer is often represented in paintings by something which appears to represent a close-fitting seamless tin jacket, while the coat of a setter looks like amateur crochet work in yarn. Artists who take delight in their work and strive for a truthful portrayal of their subjects, as does Mr. Osthaus, are most desirable acquisitions to the guild of sportsmen. In a letter recently received I learn that Mr. Osthaus will visit the more important field trials this year. It will afford those who desire faithful portraits of their dogs a rare opportunity to get them, if they can succeed in making arrangements with Mr. Osthaus.

### The Untrained Dog.

While fully appreciating the shortcomings and harmful qualities of the imperfectly broken dog, I did not appreciate the fact that there are so many professional trainers who are fully aware of all the facts concerning the matter. Here are some extracts from a letter written to me by a trainer who stands equal with the best in or out of his profession. He says: "I quite agree with you in your recent letter to FOREST AND STREAM. There is no unknown quantity more entirely unknown than the merit of a half-trained dog. * * * It is the mode of reasoning, pursued by the judges, which is at fault. They say, here is a well-trained dog of no quality, and here is a dog of great natural quality but untrained. If trained, the latter could win it easily; and we cannot justly blame him, because it is the fault of his handler, and so the rank fellow gets it. How would it be on the track if a horse were allowed to break every time a competing horse crowded him, and he was thereupon allowed his time to recover, just because when he did not break he showed greater bursts of speed than his competitor? Then suppose the judges would say: Oh, well! It's the fault of his driver. If he held his horse on his feet he can out-trot anything on the track; therefore, in consideration of his showing the greatest natural trotting gait, we will allow him his time the same as if he had not broke his trot.

"It is all wrong. If I am anything I am practical, and too well up in my business not to know the comparative merit of dogs in different stages of training. * * * Any practical man knows the racing dogs are not hunting. Any animal in the wild state does not hunt in any such manner. I do not refer particularly to their pace, but to their manner of hunting, working out the ground intelligently and their general bird sense."

There is a great deal of practical wisdom in the foregoing. Field trial associations and field trial judges will not go wrong in their field trial practice if they hereafter insist that dogs competing in the trials be properly trained. They should also insist on less noise being made by the handlers than is made at an ordinary *charivari*.

There is not a single reason, founded on fairness, why dogs should not be properly trained, and there is every reason why they should be so trained.

### The American Language.

And now I desire to say something more about the English language (practically the American language) as used by some of the kennel press.

From a literary standpoint FOREST AND STREAM is admittedly without rival, and from any other commendable standpoint it has no superior. One has but to turn to its bright pages to see the results of the work of the skillful, educated editor, and to see the higher class of writings admitted to its columns. Its contributions are almost uniformly instructive and elegantly written; they are not a mass of trashy nothings. Briefly, its matter is written in the English language.

But, I keenly regret to write it, some journals use the American language with such added inspired philological idiosyncrasies as present themselves. In a mild, gentle manner I aspired to be a benefactor to the kennel world by improving, up to a colloquial standard at least, the editorial American language of a contemporary. It was visionary in theory and a failure in practice. For reward, I only expected the gratitude of the public. All self-imposed reformations are thankless attempts. I now attempt for fun what I before attempted as reform. The following is a valuable contribution to the American language noted in the news of the week:

"Unaware of the approach of an express train from Doncaster, the pack, which had been engaged in cub hunting, was crossing the Great Northern Railway, and was run into before the driver could *pull up*."

I do not think that American locomotive engineers "pull up" their engines, although drivers in England may do so.

"The huntsmen, who were following, narrowly *escaped losing* their lives." That is good.

"Which *includes* a *new* Scottish terrier *in* Ashley Plug," is not bad for "English as she is spoke," with a seasoning of vacuity.

"He arrived with the dogs all in first-class condition *in spite of* the very severe passage." How he could do so "in spite of" an impersonal or inanimate object is not explained.

There are numerous other quaint expressions, but space is too valuable to enumerate them in these columns. Besides it is wrong, inasmuch as many things which are not conventional are grandly picturesque. Magnitude and stability are always grand. Any one would cut a sorry figure attempting to smooth the Rocky Mountains with a blacksmith's file, or attempting to make a trout brook of the Mississippi River. The majestic grandeur of each would remain intact. Hence a man is facing disappointment when he attempts to reform the American language.

---

In last week's FOREST AND STREAM I noticed the mention that Mr. W. W. Titus had moved to Waverly, Miss., and would hereafter confine his training to dogs for field use. I received a letter of the same tenor from him. I believe that he will find his departure in business a profitable one, and will probably have more business offered than he can accept. But what I wish more particularly to mention is the loss to field trials by his withdrawal from active competition. He is a man whom everybody esteems and admires, and deservedly so. He ran his dogs skillfully, fairly and quietly. In the many years I have seen "Billy" Titus run in trials I never saw him attempt a mean trick or even take an unfair advantage. I never heard him roar as a kicker

In defeat or victory he was always considerate and gentlemanly. Aside from being friends, these are the reasons why I am especially sorry he will not be at the field trials in future. We need more like him. May he always prosper.

A new organization, composed of gentlemen of high standing, was recently formed at Canton, O., under the title of the Ohio Field Trials Club. It will hold its first trial for pointers and setters beginning Nov. 23. There will be a Members' Stake, All-Aged Stake and Puppy Stake. It is expected that there will be about forty starters in the two last mentioned. Mr. John Bolus, Wooster, O., will judge. The trials will be held at Zoar, O. Mr. A. H. Smith, Canton, is secretary. The purses will be over $400. Next year the club contemplates holding a trial in Ohio which will rank with the best in the land. B. WATERS.

## NEW ENGLAND FIELD TRIAL CLUB TRIALS.

[*Special to Forest and Stream.*]

ASSONET, Mass., Nov. 7.—On Monday evening, Nov. 7, the quiet little hamlet of Assonet, a typical little New England village, was invaded by the members of the New England Field Trials Club, all seemingly eager for to-morrow's fun. The club quarters are in the Town Hall, a more modern building and admirably adapted for the purpose, that is if a man does not mind a little publicity. On the first floor is the dining room and the town fire engines, the latter the facetiously inclined hint at as a very wise arrangement. Upstairs is a large hall where about fifty cots are arranged, which are to be our "roosts" during the meeting, but gives rather a hospital flavor to the gathering. At one end of this hall is a stage and piano, on which Messrs. Goodwin, Clarke, Higgins and Tucker discoursed sweet music till the "wee sma' hours."

Among the members present to-night are Messrs. W. A. Power, E. O. Damon, sprained ankle, crutches and all; L. A. Pearle, J. A. Ellis, C. H. Higgins, J. A. Garland, F. W. Whitlock, Harry and W. Tallman, George W. Lovell, J. L. Wells, D. A. Goodwin, Jr., F. W. Freeman, F. H. Clarke, N. Billings, W. W. Lewis, H. Merriman, H. W. Stokes, E. S. Hawkes, A. E. Davis, C. B. Dubois, C. R. Taylor, H. F. Keyes, F. H. Roberts, Hollis White, W. S. Clarke, J. C. Sharpe, Jr., A. R. Sharpe, C. P. Curtis, Walter Baylis, C. E. Davis, Dr. Hayward, and the judges, N. Wallace and W. A. Coster.

At 9 P. M. a meeting of the board of governors of the club was called and the following were present: W. A. Power in the chair; George D. Lovell, D. A. Goodwin, Treasurer Wells, Secretary E. K. Sperry, and Messrs. Clarke, Tucker, Damon, Hayward and Whitlock.

After the minutes of last meeting were read and approved, Mr. Whitlock announced the presentation of the two medals from the English Setter Club for the best dog and bitch at the trials from a bench show point of view. Mr. W. Tallman was selected by the club to award these as soon after the drawing for the All-Age Stake as possible.

The motion to change the method of making the Derby entries was referred to the Committee on Rules for consideration. Meeting adjourned.

A meeting of the club was then held, with these additional members present: Messrs. Merriam, Billings, Higgins, Pearle, Freeman, Ellis, J. C. and A. R Sharpe, Bayliss, Curtiss and Dubois. The following were elected members: S. S. White and G. W. Amory, Boston, Mass.; H. E. Twombley, Newton, Mass.; C. R. Taylor, Providence, R. I. The drawing for the Derby then took place, and resulted as follows:

Cohannet Kennels' Roy Kent with Dr. J. E. Hair's Albert's Daisy.

Oakland Farm Kennels' Tennessee Vandal with A. M. Tucker's Bud of Kent.

E. O. Damon's Rod's Mirth with Geo. W. Lovell's Dash A.

Geo. W. Lovell's Wild Lilly with Agawam Kennels' Druid Noble.

Willard W. Lewis's Rod Belton with D. A. Goodwin, Jr.'s Bradley.

A. M. Tucker's Rowdy Roy with E. O. Damon's Rod's Chaff.

H. B. Tallman's Nellie G. with T. W. Whitlock's Count Berkshire.

Noyes Billings's Roy Wilson, a bye.

ASSONET, Mass., Nov. 8.—*Special to Forest and Stream.* The morning opened very stormy and rain fell heavily. While this improved the ground and was badly needed, it prevented an early start.

About 9.30, however, the weather cleared and the sun came out. The big covered wagon was ordered up to convey us to grounds about two miles from the village, and at 10.05 the first brace,

ROY KENT AND ALBERT'S DAISY were put down near the Quaker church. A lot of ground was worked over and some of it very bare. In 45 minutes Roy was first to point almost on top of a bevy; Daisy brought to back; handler flushed, fired and killed. After this Daisy wheeled on a single very prettily, bird flushing while held for Roy to back. Another bird flushed down wind from Daisy, excusable. Down 57m. Daisy had the best speed, range, with fair nose. Roy Kent sluggish mover at first, livened up after.

TENNESSEE VANDAL AND BUD OF KENT.—This heat was all in favor of the setter, as Bud of Kent, the pointer, loafed most of the time and made one bad flush while just loafing around. After some careful roading Vandal nailed a single in thick cover, Bud refusing to back. Then Vandal did a nice piece of work on hill, pointing stylishly. Bud came up and walked right into a large bevy, both steady to wing. Vandal will do to go down again.

ROD'S MIRTH AND DASH A. were then put down. Both ranged well, but the setter Rod's Mirth showed up the best. A lot of travelling and lunch intervened before Mirth pointed two birds unsteadily in swamp cover. No further game found; down altogether 48m. Both got out to their work well, but the setter seemed to have most sense and speed on the work shown.

WILD LILY AND DRUID NOBLE.—This heat was all one-sided, the pointer running rings round Druid, who though he got out at time did not hunt with much sense. Lily was first to make a real point after Druid trying hard. This was on a bevy and Druid paying no attention to Lily, walked right into the birds for a very bad flush. On the singles Lily scored once beautifully but was backed indifferently. Her owner put bird up, shot and killed neatly. Dogs down 50m. Lily will stay in.

ROD BELTON AND BRADLEY.—Rod Belton did very indifferently, false pointing several times. Neither were certain on their points. Belton loafed round handler most of the time. A bevy was flushed and the several points were made by both on running singles, Bradley doing best. Speed, style and ranging all in Bradley's favor. He will stay in, probably. Down 49m.

ROWDY ROY AND ROD'S CHAFF.—This heat opened well, Rowdy pointing; Chaff also coming in, a bevy was flushed. Afterward in swamp Chaff got right on top of a bevy just in time, birds flushed wild. Afterward he got a single nicely of this bevy. A lot of false pointing was done by both in heavy cover; no further score. Chaff may stay in.

Count Berkshire being withdrawn,

NELLIE G. AND ROY WILSON went down. Roy was first to point running bevy. Nellie coming in to one side also pointed, birds were flushed, both steady. Then Nellie picked up a single. No more game was found, but Nellie ran rings around the other and showed herself a good hunter. Will stay in.

At 5 o'clock they were called up, as darkness had come on. A two-mile drive to the village and the first day's work was done. Birds were scarce, but the dogs, for Derbies, showed very good training and did well on the whole. There were about sixty spectators out to-day, and everything promises toward an enjoyable meeting. H. W. L.

# DOG CHAT.

### Death of Lord Melrose.

No sooner does Mr. E. H. Moore begin to feel as if his lane of ill luck had at last a turning than the death of Lord Melrose, the best St. Bernard he has yet bred, and probably the best American bred dog of that breed in the country, again entitles him to the sympathy of his fellow breeders. It is more than probable if the truth was known, Mr. Moore felt a greater regard for Lord Melrose than any dog he has had in his kennel, and he was justly proud of him. This dog died last Tuesday from gastric colic. Further particulars have not yet been received from Mr. Moore. Lord Melrose was only about 3½ years old and was champion Ben Lomond's best son, out of Recluse, both owned by Mr. Moore. Though Lord Melrose was a dog of good parts, with a well-shaped, massive head, straight forelegs and good bone, as well as a richly colored dog, barring his lack of face shadings, it was his gigantic size that at once made him conspicuous. He was, without doubt, the tallest St. Bernard in America. With the possible exception of Donald, he was the only dog that could safely be said to be over 35in. in height, and had his body filled out proportionately he would have been simply enormous. Lord Melrose was not extensively shown, but we believe his last appearance, at Rochester, qualified him for the challenge class. He has been used extensively in the stud during the past year, as he afforded a suitable outcross to the Plinlimmon blood, and we trust he has left something of worth behind him. Mr. Moore has our sympathy, but we are pleased to think that he still has a winning hand in the wonderful Alton—Judith litter, which contains such handsome dogs as Melrose, Alton, Jr., etc. Mr. Moore has now lost, within the space of three years, such celebrities as the mastiffs champion Minting and Ilford Caution, the St. Bernards champion Ben Lomond, Alton, Saffron, champion Plinlimmon and Lord Melrose, besides smaller lights, the aggregate value of which in cold dollars represents quite a little fortune. No wonder Americans are fighting shy of high-priced St. Bernards.

### How Many Dogs Were Killed?

"Podgers" sends us this clipping from a California paper: "A Seattle man, tired of the ordinary slow method of catching fish, threw a lighted bomb into the place where the fishes were last week and awaited developments. To his disgust a retriever dog he had with him jumped into the water, and seizing the explosive in his mouth made for the shore. When he landed the man realized that his only safety was in flight, but even that nearly proved futile, as the trained animal made a bee line to deliver the trophy at his master's feet. He would have succeeded, but the bomb got in its deadly work just in time, and soon nothing but the vacant spot where the dog used to be and the breathless man was left to telll the tale." We printed the same story the other day clipped from a Maine paper, and told of a Maine man and a Maine dog. How many dogs were killed by that same bomb?

### Show Dates.

Those kennel clubs which intend holding dog shows during the spring of 1893 must send in their claims for dates before Dec. 1. On that date the committee appointed by the O. K. C. will proceed to make a final allotment of dates in accordance with the club's intention to have the spring shows make a complete circuit. While this circuit plan has its advantages on the score of saving expense, etc., there is no gainsaying the fact that the dogs suffer from the artificial life they lead for several weeks in the hands of handlers, however careful the latter may be of their charges. Drawing from experience in this matter we should say that a divided circuit would be better, so that three weeks or a month could intervene, thus allowing the dogs and everyone else to recover from the strain of four dog shows in a month. Commence the season earlier if requisite, but let us have a recess in the middle, and men will be better able to do justice to themselves.

### Tony Weller.

We are exceedingly pleased to find that in Mr. H. E. Carrier, the S. P. C. A. in Philadelphia have an active agent. Through his efforts the miscreant, Thomas Williams of Cheltenham Township, who shot the beagle Tony Weller, was fined $10 and costs. Much credit is due Mr. Currier for the efficient manner in which he secured the evidence in the case. If agents of the S. P. C. A. can be relied upon to exert themselves in such cases, we should soon hear less of the indiscriminate shooting of dogs by wretches who have no more conscience than to cripple a dog and leave it to die, as was the case in this instance. It is Mr. W. H. Child's intention, we are told, to prosecute the shooter for damages, as Tony Weller, if he does not die from his injuries, will be of no further use to his owner.

### Nashville Show.

Secretary Morrow writes that the railroads entering Nashville are acting very nicely with the Hermitage Kennel Club; they offer to bring dogs through as baggage when properly crated and will give reduced rates for 150 miles around Nashville during the week of the show. The entries are beginning to come in and some of the best challenge dogs in the country are already entered, and the indications are that all classes will be well filled. Mr. Harry L. Goodman will be superintendent and receive and care for all dogs personally, so exhibitors who cannot come with their dogs will know they will be well cared for and have the best of attention. Entries close Nov. 22, so if you have not already received enough entry blanks write Robt. C. Stockton, 428 Church street, at once and he will give you full particulars.

### Irish Terriers.

Mr. Geo. R. Krehl, who steers the kennel division of the English *Stock Keeper*, still holds on to his pet breed, the Irish terrier, despite the attractions that several Russian wolfhounds, old ch. Eclipse, the collie, and some Bassets may have. He showed a taste of his Irish terrier quality at the late Swindon show, when in four classes he won four first prizes and the special. Daniel II. took challenge honors; Brian O'K., first open dogs; Meteor, first open bitches; and Dan's Gyp first in novice class. This is a nice little record devoid of any "ifs or buts" that would make any man, even a kennel editor who is supposed to be impervious to any feeling, do a bit of a crow.

### Heredity.

In an excellent paper on heredity which Mr. Abele recently read before a meeting of the Veterinary Medical Society in connection with the Ontario Veterinary College, a report of which we find in the *Canadian Sportsman*, he said: "The dog is so old he is a conundrum. He seems to have had nearly as many fathers then as now. All our pedigreed stock can be traced back to curs with no resemblance to the present types, but the distant origin is doubtful. When the Eskimo gets short of dogs he catches a wolf pup and adds it to his stock and in a few generations no trace of wolf is left. The Indians of S. A. have pet jackals they use for dogs. They are known to breed jackals to dogs with ease."

### Sale of Claremont Clara.

In telling us of the sale of his Irish setter bitch Claremont Clara (Claremont Patsy—Nellie Glencho) to the Seminole Kennels, Mr. F. H. Perry adds: "In my opinion they have one of the best bench show and field bitches ever bred. Clara ran in the Manitoba Derby, and all of the sporting papers gave her a good standing as to being a fast and wide ranger and a very high class field dog. I trust the Seminole Kennels will put this bitch to the front, especially in the field, as she has style, dash, energy and endurance that 'Irishmen' like to see."

### Irish Setter Lost.

Mr. F. H. Perry, of Des Moines, Ia., has lost his dark red Irish setter dog Rancho. The last seen of him was on the morning of Sept. 19, on the street going toward his home. He has a very small white spot on breast, one white toe nail on left hind foot. He was a very fast and wide ranger and a very eager worker. Had a pacing gait when not running. This dog must have been stolen, and should any sportsman run across him Mr. Perry would be glad to be informed of the fact.

T. S. Bellin, Albany, N. Y., has purchased in England from Mr. Bonly three wire-hair fox-terriers, which he expects to arrive in this country this month. He expects to exhibit them at the coming Brooklyn show. Mr. Bonly likes wires with a wire coat, and these dogs are said to be natural and good coated and never want the "barber" like the poodle-coated specimens that have often won here. One dog won this month at the Birkenhead, Eng., show and is by Rustic Trick out of champion Tack, twice winner of the 50 guinea challenge cup. She will make her first appearance at Brooklyn, and if breeding, make and shape, coat and terrier character mean anything it is expected by her owner that she will make a name for herself.

The steamer Nomadic, of the White Star Line, arrived Nov. 1, at pier 44 N. R., with an assortment of live stock on board. A bull-terrier was consigned to F. L. Dever, Peoria, Ill., which town seems to have struck a "bully" gait (no pun intended). To Mr. Wm. Iselin were consigned three boxes of English hares. The president of the Florida C. & P. R. R., Col. H. R. Duval, of New York, also received a coop containing a first prize Indian game cockerel. And Mr. W. A. Conklin, of New York, had four cases of swans and waterfowl consigned to him.

Our paragraph about Mr. Manice's new venture in bassets has stirred up Mr. Chas. F. Leland, of Cambridge, Mass., to telling us that he also has some dogs of this breed. At his Primrose Kennels, Newport, R. I., he has ten bassets in all, eight bitches and two dogs. Most prominent is Ninette (cb. Merlin—Blossom), and formerly owned by Mr. Everett Millais. Among the young stock are Primrose Folly and Peggy, and the dogs Primrose Juggler and Nabob. We are pleased to find there are so many of these quaint hounds in this country, and as Mr. Leland intends to show at New York and Boston next year Mr. Manice will not have a walkover.

Mr. E. H. Mulcaster, who judged at Great Bend, left that point Saturday, Oct. 29, for California and Merced meet. He takes with him Mr. J. Herbert Watson's likely one, Royal Crest, and will see him fitted and run.

The Cowley County Coursing Association, whose first meeting comes off Nov. 15, at Winfield, Kas., expects a thirty-two dog stake easy enough. Mr. H. C. Lowe goes from Great Bend to this meet with some of his good ones. Mr. J. R. Ballard, secretary of the Cowley County Association, attended Great Bend meet and got well down with the tough puppy Buckskin.

The Seacroft Kennels, owned by Mr. C. Steadman Hanks, have had an addition to their stock of Russian wolfhounds by the birth of six pups out of their bitch Khratka, by Leekhoi.

The black and tan terrier men in England seem determined to have a specialty club even if they (the clubs) die off every six months. The old English Setter Club seems to have fallen into innocuous desuetude and another one has come to light under the presidency of Mr. Berrie, with Dr. H. T. Foote, of New Rochelle, N. Y., and C. S. Dean, owner of Prince Eric, vice-presidents.

Jones—"Why on earth do you offer such a large reward for the return of that horrid yapping, snapping cur?" Brown—"To please my wife." Jones—"But such a large reward will be sure to bring him back." Brown—"Oh, no, it won't. He's dead. I drowned him myself."—*Judge.*

We note among the new offers for sale, the following: English setters, Dager & Osthaus. Buckeye Kennels; rabbit hounds, J. Hope; pointers, J. R. Pursell, Maumee Kennels; beagles, H. L. Kreuder, Albion Beagle Kennels, Woodside Beagle Kennels; fox-terriers, Bowman & Byrne, Wilton Kennels; Gordon setters, Thos. Satterthwait; Llewellin setters, Jos. Pullman, E. Beach; cockers, Geo. Bell.

As to that sheep dog picture—Why do the heathen rage, and the people *imagine* a vain thing? The text is very old, but it's very pat.

## BRONCHIAL.

*Editor Forest and Stream:*

As I am somewhat affected with asthmatic bronchitis I am desirous of finding a location which will arrest this disease. Some of my friends have suggested that I rent a small hotel in some part of the country beneficial to my health where game is plentiful, and I have no doubt but what their promises to keep the house full during game season would be fulfilled. I prefer Tennessee or Kansas, but if any of your readers know of such a place I would like to hear from them. I would move my kennel of Irish setters wherever I locate. CHAS. K. FARMER.

INDIANAPOLIS, Ind.

"Just throw me half a dozen of the biggest of those trout," said a citizen to the fish dealer. "Throw them?" queried the dealer. "Yes; and then I'll go home and tell my wife that I caught 'em. I may be a poor fisherman, but I'm no liar."—*Exchange.*

Works on Sunday—

Talks business seven days in the week—a "Forest and Stream" Kennel Special advertisement.

## THE NATURAL DIET.

FROM further advance sheets of Dr. J. Frank Perry's new book, "Kennel Secrets," we are enabled to publish an interesting chapter on "The Kennel Diet," discussing at length the rival merits of a vegetable or meat diet for dogs:

It is an indisputable fact, says Dr. Perry, that some breeders feed very largely on meat and their dogs do well. Not unnaturally, therefore, they believe it to be the all-important food. On the other hand, there are some who rely almost wholly on vegetables and starches, and they in turn are as strongly convinced that their diet is the only appropriate one for all dogs.

A novice accepts the theory of the first and feeds on flesh, but he does not meet with the success which he anticipated, and his dogs go wrong in the course of a few weeks and eventually become wrecks. Another tries the other theory, and with much the same ending—his dogs in time going to pieces.

The result of these unfortunate experiments would at first thought seem positive evidence that both theories were absolutely wrong, yet literally they proved merely that the diets employed were unsuited to the victims under the existing conditions. But had these dogs been placed under precisely the same conditions as those of the breeders whose radical views were accepted, then the results would undoubtedly have been different, and very likely both novices would have become ardent advocates of their several theories.

The fact is, there are many other influences which bear quite as heavily for or against the health of dogs as the dietetic, and one rightly fed may go wrong because of insufficient exercise, improper cooking, damp, draughty quarters, neglect of cleanliness, foul drinking water, etc., while another fed indifferently, on food poorly suited to his wants, may yet remain in good health under kindly hygienic influences.

Equally as correct conclusions regarding the potency of these influences can be drawn from the experiences of men, for they act upon them as on dogs. Sailors, for instance, on fairly long voyages are forced to subsist largely on beef and pork which are submitted to methods of curing that render them so indigestible the nutritive properties retained are in such form that a goodly proportion can be extracted only with exceeding difficulty. These meats, with biscuits—very often "weevilly"—and canned goods for only rare change, make up the most of their bill of fare. Yet where can be found a healthier, hardier class than this—and all due to the pure air they are in and the hard work they are required to perform. But put these same men on shore in close-built cities or towns, let them live indolently and on the same kinds of food they had on shipboard, and they must soon decline in health and vigor.

On this subject man is singularly inclined to jump at conclusions. One calls attention to the fact that he is of a family of giants and that neither he nor any other member of it had scarcely any meat during childhood. He sees the city youngsters of to-day fed on mixed diet containing a large proportion of meat, and from this he reasons that their undergrowth and washed out appearance are due to the meat. Yet he fails to realize that in his early years he doubtless consumed in the form of eggs and milk nearly if not quite as much animal food as they, and that in consequence of their peculiar situation in life these foods in fresh and pure state, and in abundance, are generally denied them, and meat is therefore substituted. He forgets, also, that he lived under very different hygienic conditions from theirs—he in the open country and in pure air, while they are in cities, which are rightly called the "graveyards of the human race;" moreover, that from his mother or father there came to him a sturdy inheritance, while to the youngsters he looks down upon were more than likely bequeathed infirmities which had been in their families for several generations.

Men have theorized over their own diet for scores of years, yet they are scarcely nearer agreement now than they were in the beginning. One calls attention to the fact that Scotch Highlanders, the Irish, the peasantry of Italy, Spain and Portugal, Chinamen, and other races thrive on oatmeal, potatoes, corn, chestnuts, olives, rice or lentils, with little or no meat, and that in Scotland a mountaineer will walk thirty or forty miles a day on oatmeal cakes or porridge with a little barley broth and a modicum of milk or butter, while an Indian palanquin-bearer will carry his burden twenty-five or thirty miles a day with only two meals of unleavened cakes and a little *ghee*.

Another points to the Eskimos, to the fishing population of Norway, and to the *Pecherais* of the southern end of South America, who subsist most of the time wholly on animal food: also to the fact that for months the hunters of the West have little or no food but the flesh of the animals they kill.

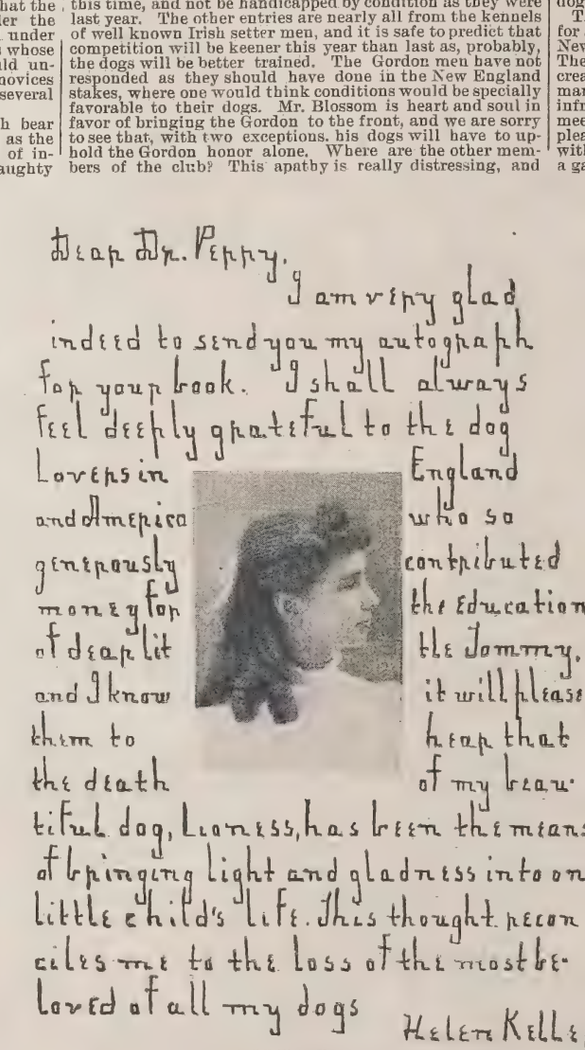
What do these facts prove? Merely that man can live on vegetable or on animal foods.

All this in relation to man's diet, while seemingly foreign, has a bearing on the diet of dogs, for he is singularly inclined to consider that their requirements are much the same as his own. But such reasoning is not always sound, for the dog is of a different order of animals and of different structure, and although he has accommodated himself to other than his natural diet, there must be limits to his powers in this direction. Nor does it follow that if one man is right and his dog is doing well on some peculiar diet all others who feed differently are in the wrong.

There is an old saw, "What is one man's meat is another's poison." Nearly all mankind to whom they are accessible can safely eat strawberries, but still now and then is encountered a person on whom they bring out a most annoying rash. Nature's first food for every child animal is milk—and yet there are not a few animals who are made ill by it. The egg is certainly one of the most harmless of foods, nevertheless instances are on record where the merest trace of it has caused convulsions.

But ignoring these idiosyncrasies, which are fortunately but rarely encountered in man, while if they exist in dogs they can scarcely be any more common, two persons seldom meet who are fond of and can digest with equal ease the same kinds of foods, and such being the case, individual peculiarities surely must occur occasionally among their humble companions so often fed from the table.

Another fact which has a bearing on the question under discussion is, that the immediate results of diet are by no means to be accepted as final. In other words, because a man or a dog apparently keeps healthy and strong for several years on nearly all meat or on nearly all vegetables, it does not follow that the chosen diet is a suitable one, for it might be doing harm and hidden changes be going on which must sooner or later result disastrously.



---

Messrs. H. G. Nichols and J. Harvey Reid, of Mitchell, who attended Great Bend meet, took back with them for entry, Sir Hugo, one of Mr. H. C. Lowe's likely puppies.

## FIELD TRIAL ENTRIES.

FIELD trial entries have been coming thick and fast the last week or two and a glance at the increased entries all round, with the exception of those of the old established Eastern field trials, plainly indicates the widespread and growing interest in field trials and "bird" shooting. The Eastern Field Trials Club seems to have been left in the race, and the attendance of sportsmen and general feeling among the handlers indicated as much last year. The club needs a shake up, and at the meeting for election of officers at High Point this week it is more than likely that some of the old officers will step down and let some new blood have a turn. This was hinted to us as probable during the summer by one of the oldest and most influential officers of the club.

The advance made by the Irish setter men is particularly gratifying to the lover of the red dog. The Glenmore Kennels, we know, have been busy with their entries all summer, and those they will choose to uphold the honor of the Kansas kennel will, no doubt, be put down in proper shape this time, and not be handicapped by condition as they were last year. The other entries are nearly all from the kennels of well known Irish setter men, and it is safe to predict that competition will be keener this year than last as, probably, the dogs will be better trained. The Gordon men have not responded as they should have done in the New England stakes, where one would think conditions would be specially favorable to their dogs. Mr. Blossom is heart and soul in favor of bringing the Gordon to the front, and we are sorry to see that, with two exceptions, his dogs will have to uphold the Gordon honor alone. Where are the other members of the club? This apathy is really distressing, and especially so when we see Dr. Meyer, a confessed Gordon admirer, letting his fancy run to the red dogs. Pointers, strange to say, will not be well represented at Assonet, only entries being forthcoming in All-Age Stake. The English setter seems to have the call all round.

HELEN KELLER.

## CALIFORNIA COURSING ITEMS.

*Editor Forest and Stream:*

Coursing—that is, legitimate coursing—has been rather dull on this coast during the past few months, but just now, on the eve of the great Interstate meeting at Merced, things are again brightening up and all the leashman of this city can be seen in the early dawn; some on foot, some on horseback and others in buggies, exercising their favorites and getting them into shape for the great meeting.

In the country districts, too, great care is being taken by many of the owners of their dogs, and it is pretty safe to say that if beaten it will not be for want of training. This Merced meeting is now looked upon by the various owners as the test of a greyhound, and the dog that can come out on top from the terrible ordeal gains for itself and owner a reputation that does not fade away in a few months, but remains a red-letter indelibly printed in the coursing man's calendar.

The Merced meeting commences on Tuesday, Nov. 15, and will continue from two to three or probably four days. The purses put up by the citizens of the city of the famous plain are most liberal, and should, and no doubt will, be the means of bringing together the greatest gathering of lovers of the leash that has yet been seen on a coursing field in America. The first prize is fixed at $400, the second at $200 and the third at $150, while dogs winnning three courses will get $20. It is almost certain that sixty dogs will go to slips.

It seems now that there will be no dogs from this State at Great Bend this year. This is certainly to be regretted, as there are some half a dozen of young dogs in and about this city that are popularly, and indeed with good reason, supposed to be good enough to hold Chicopee Lass's banner up with credit in any company. No doubt there has been some dissatisfaction felt over the Pearl of Pekin affair, and the seeming want of backbone shown by the officers of the American Coursing Club in not giving their decision in the matter long before this. Another reason, too, is the uncertainty of the stake amount, as there is nothing definite in sight but the $100 given by Dr. Rowe. As to what the purse may be does not count; it may be $300 and it may be only $100. This, it can be readily seen, is no inducement for the coursing men of this State to travel all the way to Kansas, however pleasing it would be to all of them to meet the Eastern gentlemen on their own grounds.

Now, it seems to the leash men here that the Kansas Club should take a leaf from the Merced people, and go down into their pockets and issue a programme guaranteeing certain amounts in each purse, and then depend on the public and dog men for that assistance that is never refused; but under any circumstances, say what the amounts would be, and be prepared to give it. Unfortunately the men who are the patrons of the leash in this State are not rich men; indeed, it may be said of them, with a very few exceptions, that they are quite the reverse, and consequently are not in a position to go so great a distance for mere pleasure. Again, I say if the Eastern gentlemen would but guarantee good purses it is almost certain that they could count on finding among them each year a fair sprinkling of the coursing men of California, and that they would find also among their dogs competitors second to but a few—if any.

The Occidental Coursing Club are making preparations for an open meeting on Thanksgiving Day at their park at Newark, which is situated some 25 miles from this city. The meetings of this club are always most enjoyable, and create quite a furore among all dog men. The meetings are managed with great care and precision, and the slightest infraction of coursing rules is never tolerated, hence their meetings are always looked forward to with the greatest pleasure. The Merced meeting this year will dovetail nicely with the Occidental's on this occasion, so there will be quite a gala time among the dog men of the coast in November next.

GAZEHOUND.

SAN FRANCISCO, Cal.

## GREAT DANES IN AMERICA.

*Editor Forest and Stream:*

I have endeavored through writings to help the breed, but grow daily stronger in my conviction that something more efficient is required, and I am going to breed great Danes and sell no progeny for some time to come. The great Danes bred thus far in this country are inferior, and I have seen or heard of none that are entitled to championship. The reason for this I have found in the fact that the material used in producing them is on a par with stock prized in Germany in 1880. Nowadays this sort of stock we are importing from sharpers and ignorants is not tolerated there at shows, but deemed good enough for America. The fight for supremacy between the two champions of Chicago, which two dogs differ so materially in the make-up, tends to lead the weak breeding attempts astray. We want a typical dog that will beat them both and is a good stock getter. Such specimen cannot be bought from sources from which we have been getting our great Danes. The reputation of being vicious originates from the mistake of wrong selections.

Some breeders are breeding for size and get a big dog, but nearly a mongrel. Others are breeding for type, and get snipy, houndy specimens with rat tails. Colors are mixed up in all shades of the rainbow. What is wanted is a combination of type, size and pure colors, to sacrifice not one point for the other and excuse the absence of type and character with an additional 25lbs. of flesh. I have bred great Danes successfully before, and lost money by it, and I am ready to lose again if I can be successful in producing something.

A. H. HEPPNER.

NEW YORK CITY.

## BROOKLYN DOG SHOW.

*Editor Forest and Stream:*

The premium list of the National Greyhound Club is to hand, and I am sorry to see the committee have only made one class for Scotch terriers. There are quite a number of these dogs both in the States and Canada, and at Toronto we had nine entries, all putting in an appearance. I think you will agree with me when I say the committees of dog shows should give all the encouragement in their power to breeders and exhibitors. Personally speaking, were my dogs to win first or second money, I would gladly waive my claim to the same if only the necessary classes were provided. As a matter of fact all terriers, except bull-terriers, for which there are no less than nine classes, have very little show, especially the rough-haired classes. Irish terriers have no challenge or puppy class, black and tans no challenge class, while Scotch, Dandies, Skyes and Bedlingtons have but one class each. Then again, bulldogs, poodles and toy spaniels are harshly treated. The premium list in many respects is very inconsistent and unlikely to commend itself to exhibitors unless they happen to be bull-terrier and beagle men, and my grumbling is but one instance of many I have heard.

W. T. FRASER.

TORONTO, Canada.

## ECHOES OF THE BEAGLE TRIALS.

IT is more than probable that next year the Beagle Club will provide regular prizes for the different events, as this percentage arrangement is not at all satisfactory to the majority of owners who ran their beagles this year. Another class will soon have to be provided. Now that there are so many winners of different classes it would be wise to arrange for a champion class. It is scarcely fair for the newcomers to have to contend on equal lines with the previous winners. This is the practice in vogue in other field trials, and the Beagle Club having now held their field trials, there are enough previous winners to assure an entry that will make competition very keen. This stake should in no way conflict with the "absolute winner" of the regular classes for the current year, or if thought best the winner of the challenge event could also be eligible to compete for the "absolute," though we should think the title of field trial champion would be sufficient honor. Another way would be to have a Champion Stake run at the end of the trials and the "absolute winner" only be eligible to compete of the dogs that ran that year. Thus this dog would stand a chance of winning both titles.

## DISTEMPER.

*Editor Forest and Stream:*

It is stated in *Chronicle* that Dr. J. Sutcliffe Hundall, the English veterinary surgeon, claims to have discovered a prophylactic against the bane of dogs—distemper. He says he has been experimenting for four years, and in recent tests, where he has exposed inoculated subjects of his practice to certain infection, he has found them incapable of contracting the disease. Can any one give me his address?

C. M. SELFRIDGE.

SAN FRANCISCO, Cal.

## FLAPS FROM THE BEAVER'S TAIL.

TORONTO, Can.—Mr. J. W. Morden, Hamilton, has sold the smooth terrier Suffolk Coronet, well known, to Mr. A. D. Stewart.

A good many spaniels leave Woodstock but still there is room for an occasional arrival. Mr. George Douglas has bought Yankee Hustler, a black bitch with a white breast, by Ebony out of Vic, from Mr. C. G. Browning, of Worcester. Mr Douglas has also sold the black bitch Lady Stanley, a four-year-old black bitch, by Robin out of Fraitzie, and the dam of several winners.

Fox-terrier breeders here will soon have a big choice of stud dogs. Mr. Stewart is putting three at stud—Suffolk Coronet, his last purchase; Raby Domino, sent over to him by Mr. Raper, and his new youngster, My Fellow.

Mr. Murdoch, Hamilton, was down this week. He told me their local show was most successful and that their exchequer is thereby increased to the amount of some $50. Not so bad when it is considered that the show was open to the public but for three hours.

I hear Mr. J. M. Harris, proprietor of the Hamilton *Herald*, has got over a good bull-terrier dog. His name I have not learned, but surmise it is Pride of the Navy, mentioned by the *British Fancier* of Oct. 14. If I am right he was sent out by Mr. James Brown, of Church.

Hamilton grows more doggy every day. I hear that several more good dogs are now located there, including a black and tan bitch recently imported from the United States by Mr. J. E. Anderson, and the collie bitch Mayflower (Bonnie Dunkeld—Merry), a winner at Hamilton and Ottawa, bought from Messrs. McEwen & Gibson by Mr. George Vanderlip.

Dr. H. S. Griffin writes me that his bull-terrier bitch Kathleen Mavourneen whelped a nice litter of four (two dogs) to his Principio last week. The importation of this brace was noted in these columns some weeks ago.

Mr. W. P. Fraser, Toronto, has sold a Scottish terrier bitch puppy, by Kilroy out of his Grey, to Mr. B. L. Clements, New York.

Mr. J. L. Gibb sent to his son, Mr. J. Gordon Gibb, of Lawrence, Kansas, a brace of fox-terriers and a collie dog. The terriers are Lloyd's Trump, by Punch out of Lady, Cotswold Daisy and Gibb's Madgie, by Pickle (Suffolk Coronet—Elora Tatters) out of Judith (Blemton Trump—Bachante). She was bred by Mr. Geo. Hanson. The collie is one of McEwen & Gibson's, a black and tan by Scotsman (Edgbaston Excelsior—Ryland Lady) out of Madge (Highlander—Hasty). Mr. Gibb has been most successful in exhibiting cattle, and is now about to try his luck with dogs.

A meeting of the executive committee of the Canadian Kennel Club will be held here on Friday the 11th at 8 P. M. Several important matters are to come up.

The Toronto Kennel Club met on Thursday, Nov. 3, and decided to hold a local show, open to members only, on Nov. 15. Mr. Wm. Brodie will be asked to judge all classes. The new club rooms will be opened to the members on Thursday, Nov. 17. Mr. A. D. Stewart of Hamilton will be asked to speak on his favorite breed, fox-terriers: Mr. R. W. Boyle on the cocker spaniel, and Mr. Brodie on any breed which he may select. Two dogs of each breed will be brought up for illustration.

Can any reader oblige me with the breeding of Quayside Lad, a Bedlington terrier imported a few years back?

H. B. DONOVAN.

## UNITED STATES TRIALS.

ELIZABETHTOWN, Ky., Nov. 6.—There are fourteen starters in the Derby. They were drawn to run in the following order: Troublesome and Mame S., Ginger Ale and Kent's Queen, Lady Peg and Onward, Boy's Faust and Earl of Kent, Croxie O'Bannon and Biz, David C. and Lad of Rush, Pomme de Terre and Kent Elgin.

The weather has been very dry, and the scenting is poor in consequence. Birds are reported as being very scarce. A large number of prominent sportsmen and Western handlers are here. The judges are Col. A. G. Sloo, Vincennes; Messrs. P. H. Bryson, Memphis, and B. M. Stephenson, La Grange, Tenn., the latter to judge in the pointer Derby: Maj. J. M. Renfroe and Mr. J. M. Freeman, the two judges who were to judge with Col. Sloo, may be present later to act. The quality of the dogs present is said to be very high. A light rain fell this evening, which will probably improve the conditions for work.

[*Special to Forest and Stream.*]

ELIZABETHTOWN, Ky., Nov. 7.—Notwithstanding having rains last night the scenting to-day was very poor. Birds are extremely scarce and the work therefore unsatisfactory and undecisive. But five or six bevies were found. Nearly all the work on birds was done in unfavorable cover. To-morrow the dogs will be run on different grounds and if the unfavorable conditions are found to be permanent it is probable the trials will be concluded elsewhere.

[*Special to Forest and Stream.*]

ELIZABETHTOWN, Ky., Nov. 8.—The pointer Derby was concluded to-day. Lad of Rush first, Mame A. second, Lady Peg third. Birds so scarce that club held a meeting and concluded with the unanimous approval of handlers to move to-night by special train to Columbus, Indiana, where grounds and abundant birds are assured. The club pays the expense. A large number of prominent field trial men in attendance.

[*Special from Indiana.*]

COLUMBUS, Ind., Nov. 9.—Horses scarce. Grounds and birds unsatisfactory. Weather bad. Trials postponed till February in Mississippi, before or after the Southern trials.

## KENNEL NOTES.

**Kennel Notes are inserted without charge; and blanks (furnished free) will be sent to any address.**

### BRED.

☞ **Prepared Blanks sent free on application.**

*Governor—Blemton Reefer.* G. B. Birrell's (San Francisco, Cal.) fox-terrier bitch Governor to J. B. Martin's Blemton Reefer (champion Venio—champion Rachel), Sept. 14.

*Shamrock Belle—Onota Belle.* E. Beaver's (Conshohocken, Pa.) Irish setter bitch Shamrock Belle (Henmore Shamrock—Daisy) to H. G. J. Hallowell's Onota Don (champion Chief—Bizreena), Oct. 8.

*Iroquois Rhoda—King Regent.* Werowance Kennels' (Trenton, N. J.) rough St. Bernard bitch Iroquois Rhoda (Mt. St. Elias—Lady Bernee) to Swiss Mountain Kennels' King Regent (Prince Regent—Duchess of Kent), Sept. 28.

*Lady—Bradford Ruby II.* Mrs. F. Knight's (Cincinnati, O.) pug bitch Lady to Eberhart Pug Kennels' Bradford Ruby II. (champion Bradford Ruby—Puss B.) Oct. 8.

### WHELPS.

☞ **Prepared Blanks sent free on application.**

*Rochelle Majestic.* Rochelle Kennels' (New Rochelle, N. Y.) black and tan terrier bitch Rochelle Majestic (champion Broomfield Sultan—champion Meersbrook Maiden), Sept. 15, seven (three dogs), by the r Merry Monarch (Halifax Charlie—Nell).

*Meersbrook Maiden.* Rochelle Kennels' (New Rochelle, N. Y.) black and tan terrier bitch champion Meersbrook Maiden (Meersbrook Chance—Meersbrook Empress), Sept. 28, six (three dogs), by their champion Broomfield Sultan (champion Broomfield Turk—champion Broomfield Belle).

*Sarah.* E. Brooks's (Hyde Park, Mass.) Dandie Dinmont terrier bitch Sarah (Border Jim—Fan), Aug. 22, five (two dogs), by his King o' the Heather.

*Myrtle the Mouse.* F. B. Zimmer's (Gloversville, N. Y.) beagle bitch Myrtle the Mouse (Elora Rambler—Elora Blue Bell), Oct. 4, four (two dogs), by his Stormy (champion Royal Krueger—Pussie).

*Flossie.* D. F. McCarthy's (Tiburon, Cal.) fox-terrier bitch Flossie (Blemton Shiner—Jess), Sept. —, five (three dogs), by J. B. Martin's Blemton Reefer (champion Venio—champion Rachel).

### SALES.

☞ **Prepared Blanks sent free on application.**

*Lavender.* Fawn Italian bitch, whelped September, 1888, by Prince out of Pearl II., by Eberhart Pug Kennels, Cincinnati, O., to J. W. Mack, Dayton, Ky.

*Lum.* Apricot fawn pug dog, by Eberhart Pug Kennels, Cincinnati, O., to Harry Campbell, same place.

*Jenny.* White, black and tan fox-terrier bitch, whelped Feb. 23, by Blemton Shiner out of Nell, by J. B. Martin, San Francisco, Cal., to Caldwell & Mercer, Seattle, Wash.

*Empress Josephine.* Orange and white rough St. Bernard bitch, whelped July 2, 1889, by Maximus out of Velvet, by Werowance Kennels, Trenton, N. J., to F. Smyth, same place.

*Pinto.* Orange and white rough St. Bernard dog, whelped July 27, 1892, by Gipsey Jack out of Nelly Bly, by Werowance Kennels, Trenton, N. J., to Rev. T. Hogan, same place.

*Major Domo.* Orange and white rough St. Bernard dog, whelped Feb. 1, 1892, by Hugo out of Iroquois Rhoda, by Werowance Kennels, Trenton, N. J., to H. Murray, same place.

*Hilda.* Orange and white rough St. Bernard bitch, whelped Feb. 1, 1892, by Hugo out of Iroquois Rhoda, by Werowance Kennels, Trenton, N. J., to Prof. Thos. White, same place.

*Bruce.* Orange and white rough St. Bernard dog, whelped Feb. 1, 1892, by Hugo out of Iroquois Rhoda, by Werowance Kennels, Trenton, N. J., to C. Golding, Sing Sing, N. Y.

*Ben B.* Silver fawn pug dog, whelped Aug. 1, 1892, by Patsy Bolivar out of Midget Nellie, by Eberhart Pug Kennels, Cincinnati, O., to Miss Hattie Jones, same place.

*Tricket.* Silver fawn pug dog, whelped Aug. 22, 1892, by Patsy Bolivar out of Mabel E., by Eberhart Pug Kennels, Cincinnati, O., to A. B. Noble, Council Bluffs, Ia.

*Miss Brownie.* Silver fawn pug dog, whelped Aug. 22, 1892, by Patsy Bolivar out of Mabel E., by Eberhart Pug Kennels, Cincinnati, O., to G. A. Huewe, same place.

*Midget.* Black and tan toy terrier bitch, by Eberhart Pug Kennels, Cincinnati, O., to Wm. Botts, Mt. Sterling, Ky.

## ANSWERS TO CORRESPONDENTS.

*There is no charge for answering questions under this head. All questions relating to ailments of dogs will be answered by Dr. T. G. Sherwood, a member of the Royal College of Veterinary Surgeons. Communications referring to other matters connected with Kennel Management and dogs will receive careful attention.*

S. D. B., Fort Wayne, Ind.—C. D. Bernheimer, Morey Kennels' Fairfield, Conn.

R. E. McE., New York City.—The dog is not at all too old, and "Training vs. Breaking" would be found very effectual.

C. M. S., San Francisco, Cal.—We do not know Dr. J. Sutcliffe Hundall's address. Write to the *Stock-Keeper*, 169 Fleet street, London, Eng.

J. S., Black Hall, Conn.—Please tell me the price and where I can get Mr. Ashburner's book on the beagle hound. Ans. The price is 50 cents. We can supply it.

BUFFALO READER.—Will you give me extended pedigree of Effie Elcho (15,515), owned by Wm. Denny, of this city? Ans. We can find no mention of Effie Elcho in stud books.

W. I. S., New York City.—Will you kindly give pedigree of Irish setter Jack, owned by James Lewis, the actor, in your next issue? Ans. We can find no mention of this dog in either of the stud books.

R. S., Wilkesbarre, Pa.—Will you kindly give me the number of Dreadnaught (mastiff), whelped May 5, 1886, dam Rena—also, let me know cost of pedigree in full. Ans. Dreadnaught (A. K. R. 3924) by Dictator (A. K. R. 1503) out of Rena (A. K. R. 262), by Duke out of Pride, by Duke (imported Romeo—imported Juliet), out of Juno, by Towser out of Josie. Duke, by Buff out of Belle.

F. R., Reading.—A mastiff about a year and a half old has on the side of him something similar to a tumor; it is soft, and at times it is large and then it goes down and is not noticeable; every day that change takes place. It is not quite as large as a hen's egg. The dog is very large and pretty fat. Ans. It is probably a serous abscess and will have to be opened. Take the dog to a veterinarian.

J. P. T., Atlantic City, N. J.—Can you tell me what to give my setter dog to cure a weak stomach? He seems to be unable to retain food, for almost immediately after eating he vomits. Especially is this the case after drinking. He is 4 years old and otherwise seems to be in good health. Ans. Give 10grs. of carbonate of bismuth every 3 hours shaken dry on the tongue. Feed entirely on minced raw meat for a few days, small quantities at short intervals. Limit the water to a few tablespoonfuls.

A CONSTANT READER, Lima, O.—Will you kindly give me the pedigree in full of English setter bitch Belle of Lima (A.K.C.S.B. 15,522)? Also of Van Allen, English setter dog, and is the strain a good one? Please give me the owner's name of each of them. Ans. Frank Cornelius's, Lima, O., Belle of Lima, by Duke of Bradford out of Queen Mab, by Ponto out of Lady Snow, by Duke of Montclair out of Prairie Rose: Ponto, by Belton out of Snow: Duke of Bradford, by Count Royal out of Nelly D., by Fleet out of Bess. Geo. Hull's, Lima, O., Van Allen, by Dr. Prim (15,715, Vol. VI.) out of Kate, by Fred out of Jessie, by Rosenthal's Nick out of his Flora II.; Fred, by Pride of the Border out of Fairy; Dr. Prime, by Pride of the West out of Dashing Primrose, by Dashing Monarch out of List, by Lincoln out of Petrel II.; Dashing Monarch, by Dash II. out of Moll. The strain is good.

### Business.

THE GLOBE OFFICE, Boston, Mass.—*Forest and Stream Pub. Co.*: GENTLEMEN—After a good fair test of the kennel papers, I take pleasure in saying that I shall hereafter run my advt. only with your paper and the *American Stock Keeper*. I have given the *American Field* and *Turf, Field and Farm* a good test. You can glean my opinion from the above. It seems a pity that personal matters could not be left out of the kennel departments of the various papers. I congratulate you on the high tone of your own department. May it long continue. HERBERT M. HOWES.

### Why Did Oliver Ask for More?

BECAUSE the sample he had had gave birth to the belief that more of the same would be a beneficial acquisition. Just so with FOREST AND STREAM kennel special advertisers. As thus: *Forest and Stream*—We are very much pleased with the numbers of inquiries received from our ads. in the FOREST AND STREAM, and we inclose you two more to be in *two* issues of your paper. Yours very truly, MAUMEE KENNELS (Box 294).

# Yachting.

WHILE the latest communication from the committee to Lord Dunraven has not been made public, it is plain that the situation is unchanged from that of two weeks ago. The question of a race to all appearances hinges on a quibble over the exact meaning of the word "hold." If Lord Dunraven can be persuaded that in "holding" the Cup open to challenge under the immediate conditions as to dimensions, time allowance and other secondary details that are accorded to him, he is not at the same time bound by the new deed of gift and nothing else, there will be a race. If, however, his Lordship is astute enough to understand that his challenge is considered by the New York Y. C. only as offered and accepted under the new deed, and that most of the objectionable features of this noted document are still in full force, there is little chance of his persisting in challenging. The present dickerings and bickerings are creditable to neither side; if the New York Y. C. is not prepared to annul the new deed, the proper course is to say so squarely and frankly. If Lord Dunraven really means what he has said, condemning the new deed as illegal in its origin and unfair in principle, the only dignified course open to him is to decline all terms, however tempting on the surface, which carry with them a virtual indorsement of the deed.

HAVING produced the fin-keel, Mr. N. G. Herreshoff has this year given some thought to a rule which would, if deemed desirable, bar this type of yacht. He has suggested the use of the displacement, D, as a divisor in the present formula, which would be then $\frac{L \times \sqrt{S} \times A}{D}$, a constant being used according to the unit of lineal or cubic measurement desired. Of course, such a rule would at once put a premium on increased displacement, to the confusion of fin keels of all sorts.

IN utter innocence of its sarcasm, the Boston *Herald* discusses seriously Lord Dunraven's remark that were he a holder of the Cup, he would gladly receive the full dimensions and even the entire design if a challenger insisted on the right to send them; thereby proving the deep duplicity of the present challenger. The present position of the New York Y. C. is that of insisting on its right to furnish that same information which every designer and owner desires to conceal; an *opera bouffe* proceeding which is too ridiculous for serious argument.

THE receipt at a late hour last week of a large amount of very important kennel news was responsible for the partial wreck of the Yachting and Canoeing departments. The attempt of a compositor to set up an interesting dog story with one hand while he was correcting the proof of a yachting article with the other resulted in some startling orthographic effects, but we hope that our position in relation to the new deed of gift will not be mistaken in consequence.

WE publish this week a letter from a yachtsman whose views as to the new deed are directly opposed to our own, and who commends the course of the New York Y. C. We need not remind our readers that while we propose editorially to make the best possible presentation of that side which we believe to be right, our columns are always open to those who dissent from us.

### Comanche.

THE steam yacht Comanche, of Cleveland, O., has laid in Manning's Basin for the past ten days, making the final preparations for a winter cruise to the West Indies. The yacht is interesting as being of American design and workmanship throughout, and the second seagoing steam yacht built on the Great Lakes. Her dimensions are: Over all 185ft., l.w.l. 165ft, beam 25ft, 2in., depth 13ft., draft 11ft. 3in. Her engines are triple compound, 14in., 23in. and 36in. by 24in; boiler 12×6ft.

So far as the American design is concerned, the less said the better; the builders would have done well to have copied any good English steam yacht. Not only is there nothing distinctively new or American in the model, but there is a strong resemblance to the ordinary British tramp steamer about the bows, with a general lack of style and finish to the whole design of hull and rig.

At the same time the work is in many ways commendable, the plating is smooth and well done, the workmanship throughout appears to be thorough and honest, and the interior arrangement and decoration are specially good.

The deck house is long enough to give a snug smoking room forward, a saloon with piano, from which the main stairway descends, a roomy galley and to cover the engine room.

The crew is berthed aft, with the officers between them and the machinery, and the owner's quarters are all forward. The main saloon and the various staterooms are large and well arranged, and the finishing and furnishings are in excellent taste. Light wood, oak and butternut has been used throughout, the joiner work and carvings being free from over-ornamentation. The forecastle even is finished handsomely in polished butternut; the officers' quarters are still more elaborately finished. The yacht is fitted with electric lights throughout, and with bathrooms, running water and all the conveniences of a well-equipped city house.

She has two pole masts, with a heavy rake, carrying square yards. She was built by the Globe Iron Works, of Cleveland, and is owned by H. M. Hanna, of that city.

The bridge is well amidships, with a large space over the forward end of the deckhouse. The side ladders are of a new and ingenious pattern, skeleton ladders, which fold flat as they are hoisted, and are then folded up and secured close against the outside of the bulwarks, out of the way and secure from damage, but ready to be lowered at a moment's notice.

### Lake Ontario.

BAY OF QUINTE.

BELLEVILLE, Ont., Oct. 31.—The yachting season is over in these waters, and a retrospective glance over the achievements of our local craft this year is not quite so pleasant as it was a few years ago, namely in 1884, when they won $870 out of a possible $1,185, and, barring accident, would have run their winnings up to $1,045. The simple fact is that our yachts have been beaten because they have been out-built. Owing to local conditions we will probably have to stay in the 40ft. class—the favorite here—behind the leaders of the procession. No resident of the Bay of Quinte district would build a Zelma or a Yama, as their draft is too great for cruising in these waters, and against such fine, powerful craft we cannot hope to win in their class with centerboarders. It may be different in the largest class. Norah, after one of the best races ever run, lost the Fisher Cup to Onward, a much more powerful boat, by only 46s., she allowing 3m. 19s. over a course of 26 nautical miles. The weather was just the thing for the victor, the wind being strong, with heavy puffs. Onward carried a dozen extra good heavy men, who made excellent shifting ballast, and would not, I think, have won without them. Norah carried only her regular crew, she is a low-sided and deep-waisted boat, and had a heavy load of water on her lee deck when on the wind, and a leaky cabin trunk filled her over the cabin floor in the last round. Taking these circumstances into account, it seems possible to improve Norah so much as to make her beat Onward. The attempt will, if I am correctly informed, be made, as the yacht has been taken to the shipyard at Desoronto, where her sides will be raised and she will be given a flush deck.

The rebuilding of Atalanta has been a long job, and she will remain here until next year. She will probably have a try for the Fisher cup before going to her future home at Chicago. Her sides have been raised 14in., and she has now a flush deck. The planking, all of which is new, excepting four strakes in the bottom, is of choice oak, and the old craft will be better and stronger than ever before. Mr. John Allen, our local shipbuilder, has done an excellent job.

PORT TACK.

Nellie, catboat, has been sold by M. F. Plant to Samuel Stenson, and Mr. Plant will, as recently stated, replace her with a new Crosby cat.

## Changes in Measurement Rules.

WHEN the present rule of the Yacht Racing Association was adopted in 1887, one of the provisions was that the rule should be unchanged for a period of seven years, unless repealed by a vote of two thirds of those present at a general meeting. Naturally there has been some opposition to the new rule at times, in spite of its obvious advantages over the old tonnage rule, but at no time has this opposition assumed a definite form, nor has any effort been made to secure the repeal of the rule before the original limit expired.

The fact that the coming season will be the last of the seven years has awakened of late a very active discussion of the rule, as it is necessary to the continuance of yacht building that if a change is to be made due notice must be given. The opponents of the rule have not only overlooked the vast improvement shown in the larger yachts, as in the present 20 and 40-raters compared with the 30-tonners and 40-tonners produced by the old rule; but they here laid to it all responsibility for extreme light construction, fin-keels, reduced displacement and other real or alleged evils.

The discussion of the question in the *Field* and the *Yachtsman*, though quite extensive, has thus far produced no practical results, although formulas by the dozen have been suggested. Many of the disputants have not contented themselves with the main issue of a desirable system of measurement, but have wandered off into the side issue of the measurement of the waterline and taxing of overhangs, going into elaborate mathematical demonstrations.

The present Y. R. A. rule, by length and sail area, is objected to by some on the ground that the principle involved is wrong, and that the hull only should be considered in yacht measurement. Thus far this party has not proved its case, but the ideas of measuring by either size or length of hull are firmly fixed in the minds of many yachtsmen.

The most practical discussion of the whole subject which has yet appeared is by Mr. Dixon Kemp in the *Field* of Oct. 22, a summary of the various methods of hull measurement used or proposed in the past. We reprint the article in full, as the subject is of no less importance on this side than in England. Mr. Kemp writes:

"An opinion has always been cherished by many shipbuilders that a measure of size, whole bulk or measured bulk, is the proper basis for a time allowance in competitive sailing. For at least thirty years this proposition has been propounded and refuted more or less successfully in our columns; and we refer to it now only because it cannot very well be avoided in discoursing on a bull measurement for time allowance. $\frac{L \times B \times D}{\text{Constant}}$ is the favorite form of the rule, where D is either depth of hold or draught of water. The rule $\frac{\text{Length} \times \text{Breadth} \times \text{Depth}}{95}$ was in use for many years in the United States—in fact it was the 'registered tonnage' of the country before Moorsom's rule was adopted—and it suited the shallow yachts of America, although probably it had not much to do in creating the shallowness. However, there is not much doubt if such a rule were adopted—whether depth or draft were used as a factor—that extreme shallowness of hull or draft of water would soon be the result and the draft of water would be pretty much the same forward and aft; in fact we should have the straight keel nearly parallel to the load waterline, formerly in fashion and still to be met with on some parts of the coast. If a depth rule were used in combination with a tax on sail, the shallowness or smallness of hull would be still more apparent.

"Displacement or immersed bulk has also been tried by the New York Y. C., in 1851, in the days of the America, and again in 1871, when the Livonia visited America, it being supposed that the rule would operate unfavorably on the heavy displacements of British yachts. After this the New York Y. C. tried whole bulk [cubic contents], which is the same as our registered tonnage, excepting that the measurement was to outside of planking instead of to inside of ceiling. In 1883 the New York Y. C. measurement committee, in reviewing these rules, came to the conclusion that any system which taxed breadth, depth or bulk would favor or foster an opposite quality. This pithy remark of the New York committee really sums up the whole situation with regard to systems of rating founded on the hull. It contains an unalterable principle, which is bound to guide the framers of a rating rule based on any quantity relating to the hull.

"One quality can be advanced in favor of internal capacity, or bulk, which we now use as registered tonnage, and that is, such a rule would encourage enormous scantlings. The frames would be of great moulded depth, and the plank would be thick, and all sorts of dummy material would besides be introduced in the way of casings over beams, frames and floors. Should, however, registered tonnage (R.T.) be introduced to obtain a co-efficient of fineness, $\left(\frac{L \times B \times D}{R\,T}\right)$ or $\left(\frac{\text{Sail area}}{R\,T}\right)$, then the object would be to cut down the sizes of the frames, etc., to the last possible point consistent with safety, and the alleged tendency of all rating rules would be emphasized. We are, of course, not arguing that the shipbuilders' rule would not class fairly enough existing yachts, but it is necessary to look very much beyond that in providing a rule for yacht designers to be bound by.

"The old British tonnage rule did not tax depth at all, breadth only being used besides length. This length and breadth rule was thus formulated for Custom House purposes (prior to 1854): $\frac{(L-B) \times \left(\frac{B^2}{2}\right)}{94}$ and was modified by the Y.R.A. to $\frac{(L+B)^2 \times B}{17.0}$. This rule was much easier on beam than the old Custom House rule, but it still produced nothing but narrow, flat-sided vessels, and was finally rejected, mainly for that reason. The considerations which induced these results would be revived should beam be taxed in any modified form; no matter how slight the tax, so long as length remains the more valuable quality, and draught of water remains untaxed, a narrow, flat sided vessel would be the result. Should depth of hold be taxed, a shallow T section would be the result; and if draught be taxed, a broad U section, shallow in proportion to what the section would be if only length and breadth were taxed. It should be noted that a rule which taxes length and breadth alone, like the old Y.R.A. rule, is practically the same in its effects as a $\frac{L\,B}{D}$ rule would be, as it compels a large use of depth, draught, and displacement, consequent on the cutting down of beam.

"If length and some fraction of breadth were taxed and used in connection with sail area, the most likely result would be (no limit being placed on length) a very small sail area and a long, narrow, canoe-shaped hull with deep lead keel.

"Another form of rating has been used, and indeed, still is used in France, by simply taking length and girth. A great deal was written against this rule in our columns in the year 1881, and before that date and since. The French rule is $\frac{\left(\frac{\text{Girth}}{4}\right)^2 \times \left(L - \frac{B}{2}\right)}{\text{Constant}}$. This rule, it will be seen, would tend to increase beam and reduce depth, because depth would stand at its full value in the formula, while beam would be used to reduce the value of the factor length. We do not think that rule would produce desirable results in the hands of our yacht designers, any more than a rule $\frac{\left(\frac{\text{Girth}}{4}\right)^2 \times \text{length}}{\text{Constant}}$ would,

"The girth here used is taken from gunwale across the deck and under keel back to the starting point; but girth from load waterline under the keel to load waterline has either been proposed or used, beam being only measured so far as it operated in expanding the V measurement taken. It is obvious that such a rule would encourage enormous tops, and designers would soon learn to design yachts to sail more or less on their sides.

"When we were discussing the girth rule in 1886, Mr. Mark Robinson, a marine engineer, proposed that the rating rule should be $\frac{\text{Sail area} \times \text{length}}{\text{Girth}}$ (the under water girth only being used). Such a rule naturally commends itself to a marine engineer, as it so much resembles one of the formulæ by which the co-efficient for steamboat performance is obtained: $\frac{\text{I.H.P.}}{\text{Area mid-section}}$ In fact, Mr. Robinson proposed as an alternative rule $\frac{\text{Sail area} \times \text{length}}{\text{Area of mid-section}}$, or $\frac{\text{Sail area} \times \text{length}^2}{\text{Displacement}}$ It is obvious that of these two formulæ the first would produce a large mid-section, and the second a large displacement; or comparatively mid-section and displacement might be large in both.

"It is equally obvious that a rule $\frac{\text{Sail area} \times \text{length}}{\text{Girth}}$ would tend to produce a vessel with a hollow T section, as the girth could be increased by the deep keel (to reduce the rating), while there need be little or no area to pile up the displacement and consequent resistance.

"The French yacht clubs formerly (prior to 1886) used a rule which much resembled a 'bulk rule' and was as follows: $\left(\frac{L \times B \times D}{\text{Constant}}\right)$ D (depth) in this rule was taken at the quarter beam, and this method of measurement fixed the size or area of section with a much greater exactitude than the old English way of taking depth to the top of floors.

"Of course the effect of such a rule would be to produce shallow beamy boats with T section.

"A size, displacement, or bulk rule, or a dimensions rule will lead to a reduction of the quantity to be driven, or of a cutting down of the least valuable of the dimensions in order in either case to obtain an increase in the element (length) which facilitates the driving of bulk. These are the inevitable consequences of any possible combination of length, breadth and depth in a rating rule unless one of the terms is used for reducing the resultant rating. If sail area (or the driving power) be included in the combination of terms, the reduction of bulk or displacement will be still more marked, inasmuch as taxing the driving power is pretty much like taxing the quantity driven. This represents the elementary situation presented to the yacht designer by the Y. R. A. rating rule. He is set the problem, say, of designing a 5-rater which in his eyes is represented by the figures 30,000 (5×6,000). These figures divided by the length of waterline show him what sail area will be allowed, and then he has to consider the following complicated propositions, weight being used as synonymous with displacement:

1. Weight retards speed.
2. Weight accelerates speed by increasing stiffness.
3. Length increases speed.
4. Increase of length diminishes speed (under some conditions) because it reduces sail area.
5. Increase of sail area reduces speed (under some conditions) because it reduces length.

"Thus the problem set before the yacht designer will be to drive as little weight as possible at the greatest speed possible, with as little sail possible in order to obtain the most advantageous length possible.

"The best possible combination of length, sail spread and weight to solve this problem and to design the most successful boat up to date has been produced by a tentative process, the designer having gradually increased length and decreased sail area, and decreased weight, making up for it (as righting power) by giving increased leverage to the lead keel,* and reducing the weight of material used in the hull, so as to obtain a maximum weight of lead. The objectionable features in this production are mainly smallness of hull and insufficiency of strength The length and the small sail spread are unobjectionable by themselves, and that it may be said, any objectionable peculiarity in the form of lead keel could at any moment be altered.

"From this view of the case it would appear to be highly important that, in any combination of dimensions and sail area in a rating rule, one dimension should be used to insure a sufficiency of bulk, it being assumed that the existing rating rule does not insure this; in the small classes at least, although no standard of sufficiency has been named. In fact, we believe that any fixed standard or hard and fast safeguard would be objected to. A rule which would insure a sufficiency of bulk is the one we proposed last week: Rating $\times \frac{L}{D^8}$, D representing the depth at the quarter beam measured from the deck level amidships. In existing yachts of what are admitted to be "wholesome types," this depth is about one-eighth the length of waterline, and where this depth falls short of that standard, a penalty would be imposed by the rule instead of insisting that the standard must be complied with. The tendency of this rule obviously would be to produce a boat somewhat of the old length class type with a large mid-section; but the exaggerated form of these boats would, perhaps, not be reached on account of the tax on sail. Another tendency would also be to reduce the beam in order that a greater length might be measured; this also would operate against the formation of a length class type.

"The general conclusion which we arrive at is that the most satisfactory hull rating (sail area being left out of the rule altogether) would be length of waterline alone; and next to that a $\frac{\text{Length} \times \text{Breadth} \times \text{Draft}}{\text{Constant}}$ rule, but either of these rules would be inapplicable to existing boats, and for the present, at least, should only be applied to the classes of 5-rating and under. We are even inclined to think that the Royal Windermere rule fixing a liberal maximum of breadth and draft for any given length would be better than L×B×D, taking length alone for time allowance, or length in combination with sail area. Thus, if the length and sail area be retained for the classes of 5-rating and under, the most simple way of insuring more sail being carried for any given rating is to limit the length. But this would not necessarily mean more bulk or depth of body, as the requisite power to carry the increased sail area might be derived from extra beam or extra draft, or both combined. The length check could, however, as already pointed out, be supplemented by limits to breadth and depth. The rule would then resemble the Royal Windermere rule, as well as the old C class rule.

"If length is to be left unrestricted, then we think some provision should also be made to insure a greater bulk of body. We do not think any rule which is 'easier on sail' than the Y. R. A. rule would do this. The enormous value of length is now so well understood that for any given rating more length and beam would be taken instead of more sail, and, if more sail were taken, that would not of itself insure the 'wholesome type' of yacht of which every one has an ideal, because stiffness to carry the extra sail would be provided by an increase in beam and not by an increase of bulk. Perhaps, however, a satisfactory hull rule, or an amended length and sail area rule, may be produced before the Y. R. A. measurement committee, adapted for the small classes. Under any circumstances we do not think it would be wise to enact that the rule shall remain in operation for a given number of years. The present rule, it will be remembered, was installed for seven years, unless repealed by two-thirds of those present at a general meeting.

"So far as the classes above 5-rating are concerned in the immediate future, there does not appear any necessity for limiting length if some provision is made against extreme shallowness of hull. As we have already pointed out, if beam is taxed to insure a fair depth of body, beam will necessarily be cut down to the extent it was under the old tonnage rule, and we think that, up to a certain proportion of beam to length, beam ought not to be taxed. For the sake of illustration, we can say that the proportion of untaxed beam is fixed at one-fourth the length, $\frac{L}{4}$, and any beam in excess of that to be added to the length used for the rating. Thus a 60ft. 40 rater, to escape penalty, would have to be of 15ft. beam, and the sail allowed would be 4,000sq. ft. If a greater proportion than 15ft of beam were used, either the sail area would have to be reduced, or the length would. For 17ft. beam the sail area would have to be reduced to 3,870sq. ft., or the length to 57·5ft.

"We have already pointed out that limiting length by the rating in the large class would prejudicially affect the production of vessels of the Lethe and Amphitrite class, and we need say no more on that subject.

"If, therefore, the present rating rule is to be retained, the simplest plan of obtaining the results which are regarded as desirable is, for the small classes of 5-rating and under to limit length, breadth and draft of water, but make the limits sufficiently large so as not to cramp designers. For the classes above 5-rating, place a tax on beam after it exceeds a certain proportion to length. What that proportion should be can be hereafter fixed, and when we placed it at $\frac{L}{4}$ we only did so to show how such a regulation would be worked."

* Of course, this means that the metric height is increased in exact ratio to the decrease in weight, so as to preserve an equal moment of stability at any practical sailing heel.

## Miramichi Y. C.

THE most interesting thing in the season's experiences was the way the old champion of many races, Kilbride, went to the rear in the hands of new owners. In Com. Miller's hands, and with him at the stick, she won 9 races out of every 10, and this year, under new management, she was the last yacht in, every time. Many a racer's reputation is due, in the same way, to skillful management. The new flagship, Maud, won only the last race of the season. But she improved steadily, and, with the alterations she is to undergo this winter, she will probably carry the commodore's flag to the front next season

Club members who think it necessary to have professionals to sail their yachts in races met with an eye opener this season. Calypso, a beamy boat of local design and great power, had always been handled by professional boatmen, and had always been beaten. Vice-Com. Stewart, with a crew of amateurs from behind counters, sailed her to victory this season, winning handsomely over the whole squadron, and in a subsequent race, under the same conditions of wind and water, she was handled by the crack professional helmsman of the river and badly beaten by the same opponents. Her owners have concluded that amateur handling is good enough for them in future.

The yachts are going into winter quarters after a good season's racing, cruising and afternoon sailing.

One keel has been laid for a new boat, and one or two more are talked of as probable. Calypso will have an overhanging stern next season and more headsail.

The utmost harmony has reigned in the club, and all the races have been conducted without a dispute of any kind arising.

## International Racing.

*Editor Forest and Stream:*

Looking on at the quarrel between English yachtsmen and the New York Y. C. from Canadian moorings, where I am in a position to view both sides of the question disinterestedly, I can see no reason, except English stupidity or pigheadedness, for failure to make a match for the coming season.

The Englishmen objected, with reason, to the measurement clause of the new deed and very properly refused to comply with it. The N. Y. Y. C. does not ask compliance with it, but offers to accept just what is offered—length on load waterline. Now what sense or reason is there in howling about that clause any longer? Some inconceivable stupidity persuades the Englishman that if they win the Cup they will be forced to exact compliance with the clause from future challengers. What nonsense! The winners will hold the Cup on the same terms as the N. Y. Y. C. holds it and will have precisely the same power to accept challenges. They can trust themselves, surely, not to exact the pound of flesh from challengers. If they win they can accept challenges that give the waterline length only, or challenges giving no dimensions at all.

The N. Y. Y. C. has promptly conceded everything in its power that Lord Dunraven asks, except that it refuses to debar or penalize existing yachts. This refusal renders it necessary for the challenger to build up to the size of the largest American cutter afloat or on the stocks, which is, I believe, about 84ft. If he intends to challenge with a big boat this refusal cannot embarrass him.

The N. Y. Y. C. has no power whatever, it seems to me, to make any agreement with anybody as to the terms that shall govern challengers when the Cup shall have passed into the keeping of other hands.

Public opinion has forced the holders of the Cup to ignore the clause. An English winner would not have the assurance to do otherwise than ignore it. These precedents would govern for all time and the objectionable clause would be as harmless as the blue laws of Connecticut.

If the English really want a race, and are not so stupid as their talk about the new deed suggests, there will be one. Their grievance has been removed, their terms have been accepted. It only remains for them to complete the formalities and build their boat. If they want any further concession, let them ask it. If, for instance, they want a match between 36-footers or 70-footers or 80-footers, let them say so, and suspend abuse of the New York Y. C. until the request has been acted on. Let them say what they want. My opinion is that the N. Y. Y. C. is just now in the humor to agree to any fair terms for a race. J. L. STEWART.

CHATHAM, N. B., Nov. 3.

[As we understand the issue, it involves much more than our correspondent assumes, and the dimension clause is but a detail. The true questions are as to the right of the New York Y. C. to return and receive again the Cup or to alter in any way the terms laid down by the original donors. After it has been proved that the assumed rights of the "surviving donor" ever existed and that any temporary holder could return the Cup and reassume the trust under new and different conditions, there still remains the question of the fairness and legality of these conditions. Until these questions have been settled, it is useless to assume that all objections to the abrogation of the original deed and the adoption of a new one have been removed because the New York Y. C. has been compelled to offer special inducements in order to obtain a challenge.]

*Harper's Weekly* deals boldly with the real issue in the following words:

"Should we have no race for the America's Cup, sportsmen throughout the land will know that the New York Y. C. has again prevented an international contest, and will consider the offering of a trophy which may indeed be a national one, in fact as well as in name. It is incredible that a club like the N. Y. Y. C., whose members include the ablest and most advanced yachtsmen in the country, should permit a handful of their number, cherishing the relics of ancient prejudices, to so misrepresent the club's and the country's sentiment. No sportsman can find fault with Dunraven's challenge, save possibly in limiting the size of yacht. That ought to be left open, and time allowance will equalize matters.

"This department has many times placed itself on record on this deed of gift problem, viz., that the new edition is neither sportsmanlike nor fair. All the resolutions the New York Y. C. might pass would not change the fact that this new deed of gift was railroaded through by a clique in the club who thought to play it very smart on the Englishmen.

"The N. Y. Y. C.'s present edition of the deed does not by any means represent the ideas of the five original donors, and every sportsman in America knows it. What right one of those donors, at the suggestion of the N. Y. Y. C., had to to change the spirit of the original deed has never yet been explained."

This [the committee's] reply is so muddled and mixed, however, that Dunraven may be pardoned for failing to comprehend it. It is signed by Gen. Paine, who is a splendid yachtsman and sportsman, but whose forte is evidently not writing letters. What the committee tried to say was that Dunraven's challenge would be accepted when sent under the mutual agreement clause of the last deed of gift, and that future contests might also be managed under the same terms. If this had been made clear to the Britisher he could have done nothing else but forward his challenge. The committee's letter was so misty and misleading that it conveyed just the contrary impression to what was intended. All of which shows that the committee ought to go to a night school and study "The Complete Letter-Writer," or some other equally valuable publication.—*Recorder.*

## The Loss of the Catarina.

WE copy from the *Field* the following account of the loss of the yacht Catarina, a brief notice of which has already appeared. The cutter Phryne was designed and built by the late Dan Hatcher in 1863, a wooden vessel 85ft. 10in. l.w.l., 14ft. 2in. beam and about 10ft. draft, 56 tons by the old Y. R. A. rule. She raced successfully for some years, but for ten years past has been a cruiser under the yawl rig, her name having been changed to Catarina. The account of her loss as told by her mate, Henry Diaper, the sole survivor, is as follows:

"The yacht Catarina, 56 tons, with six hands, viz., Thos. Scrase (master), Henry Diaper (mate), three able-bodied seamen, viz., Hayward Harnett, and Mason and Wiltshire (steward), sailed from Southampton on Sept. 8 last, and on the following day sailed from Cowes for Marseilles, calling at Portland, Weymouth and Falmouth, from which port she sailed on the 16th. She arrived at Gibraltar on the 27th, and sailed on the 29th for Marseilles; and nothing of consequence occurred until the morning of the 6th inst., steering a course for Marseilles; wind southeast, blowing fresh; course as per committee's letter under close-reefed mainsail, staysail and small jib.

About 3 A. M. sighted a revolving light on the starboard bow, which the master supposed to be Planier. I was mate of the yacht, and about five minutes to four o'clock I told the master, who had just gone to the cabin, that the light was very close, and I thought we had better lay to until daylight. He replied that we had better let her run until 4 o'clock.

At 4 A. M. called the watch, and before we had time to haul the foresheet over to windward she struck the ground. The master went below to get bluelights and rockets. When he returned on deck I asked him to get the boat out. He replied, "Not yet." Vessel lying on her beam ends and sea breaking over her heavily; vessel gradually sinking in the sand. We got the boat out and got into her, but she immediately turned over and we were washed out. We swam to the vessel again and got into the weather rigging. After awhile we tried to get out the dinghy, but she was washed away off the deck; we all got into the rigging again and afterward clung to the masthead, as the rigging was under water then. A very heavy sea washed us all off, and I saw no more of my shipmates except the steward, Wiltshire, who had got hold of a piece of wood. I found two deck planks and got on them, and drifted with the current, which carried me ashore, close to the lighthouse at Saintes Maries, as I have been informed. This was about 11 o'clock, and some French people took me to the village of Saintes Maries to the Syndic of Seamen, where I was very kindly treated. On the following day the body of Wiltshire was found and identified by me, and his body was buried in the cemetery there. On the 7th inst. I was sent to the Commissary of Marine at Arles, who was very kind to me, and I was well looked after while there. I was kept there to identify any corpses that might be washed ashore.

On the evening of the 7th inst. I was informed that a second body had been found on the beach at Beaudue, and on the 8th two more bodies were found in the same place.

On the 9th I proceeded with the Commissary of Marine of Arles, Mr. Kennedy, agent of the Royal Yacht Squadron at Marseilles; Mr. Frank Randall, an English gentleman resident at Arles, and the Rev. M. Saile, French Protestant clergyman, to the cemetery of the hamlet of Bacarin, where I identified the bodies as those of Thomas Scrase, master of the yacht, George Hayward, able mariner, and William Harnett, able seaman, who were all buried in the cemetery there, according to the rites of the Protestant Church, and the natives of the place showed the greatest respect and sympathy with us. The only body not recovered was that of Henry Mason, able seaman. The yacht had not carried away anything or suffered the smallest damage up to the time of going ashore, she did not make a bucketful of water, and we were all very happy and comfortable on board together. The great kindness and attention of Mr. Flaudrin, Commissary of Marine at Arles, of Mr. Frank Randall, of Arles, and of Mr.

Kenuedy, who attended to everything as representative of the Royal Yacht Squadron, and sent me home after the formalities had been completed at the British Consulate at Marseilles, I shall never forget; they could not have been kinder to their own sons. The vessel filled so quickly after turning on her side that there was no time to get the life-belts from below, and I did not see any one use the life-buoys on deck.

### Detroit Y. C.

DETROIT, MICH.—LAKE ST. CLAIR.

THE Detroit Y. C. closed its season on Oct. 21, by a fall regatta, sailed in a moderate and variable breeze, the course being from the anchorage off the Park House, around Grosse Pointe lightship, the "double cat" class rounding the "Dummy Light."

The times were:

| | Start. | Finish. | Elapsed. |
|---|---|---|---|
| FIRST CLASS. | | | |
| Princess | 1 53 13 | 4 44 57 | 2 51 44 |
| Crusader | 1 52 20 | 5 30 05 | 3 27 45 |
| Cora | 1 50 32 | 5 50 42 | 4 00 10 |
| SECOND CLASS. | | | |
| Josephine | 1 52 48 | 4 40 05 | 2 47 17 |
| Alice Enright | 1 47 08 | 4 36 26 | 2 49 18 |
| Lulu B | 1 52 18 | 4 59 12 | 3 06 54 |
| Gertrude | 1 55 .. | 5 09 28 | 3 14 28 |
| THIRD CLASS. | | | |
| Shamrock | 1 48 27 | 4 51 44 | 3 03 17 |
| FOURTH CLASS. | | | |
| Madaline | 1 46 30 | 5 02 49 | 3 16 19 |
| Ugo | 1 54 25 | 5 17 25 | 3 23 .. |
| Madge | 1 46 49 | ..... | ..... |
| FIFTH CLASS. | | | |
| Eureka | 1 53 20 | 5 34 20 | 3 41 .. |
| Let Her Go | 1 48 24 | ..... | ..... |
| DOUBLE CATS. | | | |
| Puritan | 1 50 52 | 4 34 50 | 2 43 58 |
| Nettie N | 1 46 20 | 4 37 50 | 2 51 30 |
| Lois | 1 49 40 | 4 45 13 | 2 55 33 |

| Josephine | 1 49 07 | 4 54 42 | 3 05 35 |

Enright wins both the Hanley watch and the Mabley trophy. Campau cup has been won by Princess twice and Crusader twice, and they will sail off. The Kramer trophy lies between Augusta S. and Puritan. Nettie N. was disqualified.

After the race the Josephine was sold by her owners to a new syndicate. The various challenges and counter challenges arising from the late sweepstakes have as yet resulted in nothing but talk.

### Lord Dunraven's Challenge.

A SPECIAL meeting of the committee was called on Nov. 4, Gen. Paine coming on from Boston to attend. All were present except Mr. Rogers, Mr. H. Maitland Kersey, Lord Dunraven's representative, was present by invitation of the committee. After discussion a message to Lord Dunraven was framed and sent by cable, the contents not being made public. After the meeting Gen. Paine, Mr. Smith and Mr. Kersey dined together at Delmonico's.

## YACHT NEWS NOTES.

Brunhilde, schooner, recently purchased from J. J. Phelps by D. H. King of New York, is now at Poillon's; where she has been completely overhauled under the direction of Captain Howard Patterson. She has been altered at bow and stern, greatly improving the ends and increasing the deck room, the new ends being planned by Captain Patterson. Mr. Driscoll, Poillon's foreman, did an excellent job with the stern, all the new work being got out and laid on deck before the yacht was docked; the old stern being then cut off and the new one erected. The cabins have been remodeled, the sheer has been changed and improved, and changes have been made in the rig, so that the yacht will come out greatly improved in appearance.

The new Maxwell schooner will be built by a comparatively new firm, S. L. Moore & Sou, of Elizabethport, N. J. The firm has carried on a large foundry and machine shop for many years, but it is only about three years since it put in a complete steel building plant on the shores of Arthur's Kull, or Staten Island Sound. It has already built the steel ferryboat Cincinnati and the practice cruiser Bancroft. The new schooner will be 110ft. on deck, 82ft. l.w.l., 22ft. 9in. beam, 10ft. draft, 3ft. 9in. freeboard, and will carry about 55 tons of lead. Her forward overhang will be 11ft., and after 17ft. The keel is straight for the greater part of its length, running up in a straight line, but at quite an angle from the end of the straight part to the forefoot.

The keel of the new Carroll yacht is nearly ready for the blocks at Bristol, while the steel frames are bent and drilled and the stern and sternpost are nearly ready. As the steel plate is on hand, the work of building will progress rapidly after the keel is laid. The 24ft. boat is partly decked, as is the 30ft., while the oak frames of the 90ft. steamer are bent.

Messrs. Stewart & Binney have made a design for a Canadian gentleman of a 36ft. cruising yawl. She will be 50ft. over all, 11ft. beam, and 8ft. draft. They have also in hand a design for centerboard cabin catboat 24×11ft. and a 16ft. boat for a lake in New Hampshire.

Avenel, steam yacht, in very bad shape after her late collision off Execution, is out at Poillon's for general overhaul and rebuilding.

Wadena, steam yacht, Mr. J. H. Wade, Jr., was at Halifax on Oct. 28, bound from New York for Cleveland, O.

Eclipse, sip, is out at Sondheim & Abrams, Twenty-sixth street, for a new and longer stern.

## Canoeing.

THE notice of the annual meeting of the A. C. A. executive committee is unusually brief this year, as the meeting will be held on Thursday next. Several notices of amendments have been published this fall, but as the report of the regatta committee has not been published, it will not be possible to make any amendments to the racing rules at the meeting. The distance from New York, Albany and Boston is likely to operate to prevent a general attendance on the part of members of the committee, but it is desirable that as many as possible should be present or at least represented by proxy. The principal business of the meeting will be the selection of a site for the next meet.

### In a Rowing Boat.

I.

WHILE this cruise and its narration were as yet things of the future, I had fancied borrowing a title and calling it the "The Story of the Rear Column," for it had been planned that the Vim, the Cruiser, the Sneak and the Bessie, with their respective crews were to precede the Dorothy, leaving Saturday afternoon and reaching the camping ground the same night. The latter was to follow on Sunday morning. From one cause or another, however, the Dorothy being the only one to start, the writer was forced to forego the satisfaction of seeing the above heading gracing this screed. A less startling one had to be chosen, for if the use of these military terms is allowable, we were advance, main and rear columns all in one.

We are firm believers with Nessmuk in "smoothing it," and in accordance with this belief all that could be done to make our short cruise pleasant was attended to beforehand; room engaged for our stay over night, lists made out of the different portions of our outfit, bills of fare for the four meals gotten up, and we lay the success of the trip at the door, so to speak, of this forethought.

Most of us will confess to a feeling of anxiety when it comes our turn to be cook, this planning of satisfactory meals—meals which will be not only of a suitable quality but also furnish a pleasing variety. We can look back to cruises in the days of our apprenticeship when we lived, like "Seneca's" friend, on "condensed milk and crackers." We do better now; in fact, not long ago, while one of the present crew was a guest at a camp supper, Mrs. "Bessie" requested Mr. "Dorothy" to make the tea; "he makes such good tea," she remarked sweetly—but that is another story. The point I wish to impress on the mind of the beginner is this: That if he will spend a few spare hours in working at his outfit—and who can imagine a more delightful occupation—making a list of the surviving "fittest" for future reference, he will find cruising a much more enjoyable way of spending a vacation than many of the published reports of cruises would give him reason to believe. This is not cruising, however, so, as I have a tale to unfold, let me begin.

I went down late Saturday night laden with the usual assortment of bags and bundles. It was a beautiful night, but quite cold; cold enough for a top coat, cold enough to make one think of open fires, ulsters and the price of coal. The moon had gone into the silver-plating business for the time being, and was very busy putting a coat on the earth. As it was nearly twelve o'clock when I reached the the boat-house, I was much more concerned over getting to sleep than in the view out of doors, and within a very few minutes from the time of my arrival the bundles had been dropped on the table and I was in my little bed—said bed consisting of four boat cushions laid on top of the lockers—fast asleep.

Like Sancho Panza I have a talent for sleeping. The day's duties, however, must have weighed heavily on my senses, for I awoke at six o'clock Sunday morning, an hour before my usual time, without the least desire to roll over for another nap. I turned out to find the day clear and cool, with a light south-east wind blowing, which lasted with varying degrees of force until night fall.

After a hasty breakfast I worked for two mortal hours at cleaning the boat and stowing our outfit, finishing just in time to change into decent boating clothes and to welcome my sister who arrived on the nine o'clock train, and who must figure hereafter in these lines as the coxswain. J. came down half an hour later shifting his clothes so quickly that we obeyed the coxswain's order to "Give way!" for the first stroke of our long pull at ten o'clock.

Our craft is seventeen feet long and closely resembles the well-known Whitehall boat both as to model and interior arrangements. She is very, very far from being an ideal cruiser, having been built to serve as a means of communication between the Landing and a certain little red house beloved of the crew and their friends; but as she carried us safely to our journey's end and back again, far be it from me to abuse her. Our outfit is stowed thus, commencing at the stern; rolled up snugly behind the backboard is the coxswain's oilskin cloak and ulster and our two coats; on the two stern sheets on each side rest the two hand bags containing necessaries for the toilet; the awning being rolled up and buttoned to the under side of one of these seats. The mess chest fits under the first thwart, with the water pail, which has a tight-fitting cover, resting against it; under J.'s seat is stowed the camp kit in its box; beneath mine lies the anchor and cable with a slight lashing around them; and on the bow seat the painter is flemished down, the boat sponge being underneath. While rowing, the small sprit sail—we only use it for running before the wind—lies on the thwarts to starboard, with the boat-hook to port. When under sail the oars occupy the same positions.

Dear, dear, how we improve! I notice in a recent article descriptive of a canoe trip, the simple camp kit and mess-chest of yore, now figure as a "camping kitchen" and "steward's pantry" forsooth! The two wooden boxes which I have mentioned by their simple names are representative of what other and more experienced cruisers consider best, each in its way. The mess-chest is 12×18×8in. with a cover fitting over and outside of it, said cover forming a very good tray, bread-board, etc. It is hardly proper to call either of these by a specified name as they are invariably used in conjunction with each other, being packed as best suit the exigencies of the situation.

On this cruise the one I call the mess-chest contained four china plates, three cups and saucers, the dish towels, some sweet crackers, a loaf of cake, a few boiled potatoes—for frying—and some cold roast lamb, all brought from home. The camp-kit box, 18×8×9in., held the tin pail, nested inside of which were the *flamme forcé* stove, the pepper and salt shakers, two glass butter jars with screw tops and a piece of salt water soap; the frying pan, knives, forks and spoons, can-opener, cork-screw, pliers (for lifting hot dishes), the strainer, bottle of alcohol and the waterproof box for matches. The sugar, coffee and tea were in square tin boxes with screw-tops, and the rest of the stores consisted of a bottle of strawberry-jam and one can each of corn, lima beans, tomato soup and duck paté and six eggs nested in the frying pan. These boxes are both sufficiently waterproof to resist a rainstorm. We do not calculate on upsets, the Dorothy not being that kind of a boat.

The only provision we made against the rain was to see that the coxswain's oilskin cloaks and the oilskin bag were on board. This bag is waterproofed with the recipe given in "Canoe and Camp Cookery." It is large enough to hold the four boat cushions, the hand-bags and all our coats; yet when not in use, folds up into a very small bundle. J. and I weighed the bother of taking each a suit of "oilers" against the chances of getting wet and risked the latter alternative.

The wind was ahead and tide against us as we left the float, the weather being simply perfect. We dug away, passing the breakwater, with its motley throng of boats and fishermen; up channel for a short distance against the strong ebb tide; a turn; a few hundred yards more pulling, and then the tide is with us. The wind is, too, so come to the oars and up goes the sail, I shipping the sprit while J. overhauls the sheet, passing it aft to the coxswain, who trims it and catches a turn around the cleat.

Now we take things easy for a spell, our course giving a free wind for about a mile. The turns and channels, however, are no respecters of persons, this particular one's direction soon being dead to windward, the sail comes down and oars are shipped again.

No act nor scene of the cruise has left so strong an impression on the panorama memory has preserved for me as this of setting or stowing the sail. Even now fancy recalls for me the sensation of trying to stand erect forward and furl the sail neatly while J. is lunging around aft for his oars, without the least regard for the difficulties of my situation. Again I am standing up, my toes curling downward as if to help me to hold on, sheet passed between my teeth to keep it out of the flapping folds of the sail and away from the tossing boom—the boat meanwhile pitching villainously in the short chop sea. I presume this was one of the faults of our outfit, and the advocate of some other rig who, perchance, reads this, will settle down deeper into his seat and mentally exclaim that we should have had his rig.

And now, as if to solace us for having brought the oars, down drops the wind. Down drops the perspiration, too, as we go on our way, by a low-lying island famed for years for the fish dinners served at its single hotel; by the dock, to be stared at by any quantity of fishermen who are bent on filling their baskets with the little snappers that are "jumping" all around us, and so on down to the main channel, which we reach just as a big excursion boat sweeps by, all three decks black with people, most of whom consider it necessary to wave a salute of handkerchiefs at every passing boat. No doubt it would have been more good-natured on our part to have responded to the one we received, but J. and I had both hands full making up against the last of the ebb tide, while the Coxswain was trying to decide what two catboats and a naphtha launch were going to do, therefore no heed was paid to the strips of linen fluttering at us.

It being now high noon, we anchored on the north side of the channel opposite the site of an abortive attempt at a "villa settlement." As soon as the anchor gripped in the sandy bottom the mast was stepped, the awning unrolled and spread over the boat from the mast to a short staff stepped in a brass tube screwed to the transom. The shade was very grateful. I recall reading in a friend's log-book an opinion of awnings on boats, and as he is an old boating man, I think it well worth quoting.

"Of all cruising appliances," he writes, "there is nothing so conducive to comfort and a sense of privacy as an awning for one's boat;" therefore, he who reads and is awningless should run and get one immediately.

When I planned at home that for this meal we were to have cold meat, fried potatoes, stewed corn, bread and butter, sweet crackers and coffee, I own it was with many misgivings as to whether all this could be done, and the various articles kept warm on a single alcohol stove. We managed very well, however, and this is how it was managed: The kit box has a lid on top which folds back, while the front one opens downward. This lid after the stove is lighted is closed up again, thus confining the heat in a small space.

While I opened and emptied a can of corn into the tin pail, adding a little water and a piece of butter, J. was peeling and slicing the potatoes; then all the tableware, condiments, etc., were unpacked and disposed of to the best advantage. The corn, now being piping hot, was set on one side, and the potatoes slipped into the frying pan. While these were sizzling in the hot butter, the meat was sliced and the first course was ready.

J. served the corn, the pail was given a hasty wash over the side, filled with fresh water for coffee and put on to boil, being quite ready by the time the meat and vegetables had vanished.

We were very busy for the next half hour, the only sounds the wind heard as it came blowing gently in under the awning were the clicking of knives and forks, and the rattle of cup against saucer, diversified by an occasional growl of disgust from J. and I and a milder exclamation from the coxswain, as a steamer passed by throwing up waves which tossed the boat about, and made us all reach for our coffee cups to prevent their contents landing in the wrong place. Finally, as the last morsel disappeared, one said "Ah!" and another said "Ah!" and although I was a poor third, I said "Ah!" too. Then, as was befitting after our arduous labars, we rested.

Presently J. remarked this would never do. We agreed with him and wanted to know what he was going to do about it. He suggested that we should set to work, clean up and "get a move on." J. is given to using slang. For the sake of a quiet life we put up our book and Sunday paper, with it's "complete novel given away to every reader," washed and packed up the dishes and stores, stowed the awning and sail, and getting the anchor aboard took to the oars again.

This channel reaches along behind a great summer resort. Piers project along the sandy shore at frequent intervals, each one ornamented with a row of fishermen, who never seem to catch anything. Two of these piers serve as landing places for as many lines of excursion steamers, and as at nearly every one of them boat liveries are established and, in the summer time, well patronized, the scene is always full of life and motion. It is not an uncommon thing to see one or more fine yachts anchored here; indeed, as we looked astern, we could see, beating up the channel, the sails of a schooner yacht, which was discovered at anchor the next day on our return, and proved to be the Fenella, N. Y. Y. C.

It was not long after we left our mid-day anchorage before we passed under the railroad bridge, which about divides our bay in half. Here we change off for an hour, J. going aft, the Coxswain taking his place at the oars. And now the wind picks up enough to make rowing against it hard work. The weather, which I have said was perfect, begins to look decidedly stormy. A bend in the channel enables us to lay a course; again we cease rowing and make sail.

The sky is overcast with great masses of smoke-colored clouds, and the wind coming in off the sea blows damp and chill. Phew! how the gusts come, striking the small sail, pressing the Dorothy down and down. The coxswain, who is sailing the boat, hangs on to the lee tiller rope in obedience to our command, but looks relieved when the puffs lighten up and the boat regains its equilibrium. As we drive along we pass a man in a shell who looks strangely out of place, so wintry is the wind and so summery is his costume.

This state of things continues for about two hours, until we have sailed up into a little cove, to visit which had been one of the objects of this expedition; but the light of other days is not shining on it now and the place looks deserted and gloomy. The only evidence of summer life in sight are a small skiff with a ragged sail, in which two youths vainly endeavor to overtake us as we go out of the cove, and a white rowboat, in which a young man was giving two elaborately dressed girls an afternoon's row. So dark and cool had it grown this group in the summer finery looked as much out of place as the single occupant of the shell had done.

W. B. MCCORMICK.

[CONCLUDED NEXT WEEK.]

### Algonquin C. C.

THE new club house of the Algonquin C. C., which has been in the course of erection for the past two months, has just been completed. It is one of the finest in the State, and standing on an eminence nearly opposite the old Cadwalader mansion, commands an excellent view of the picturesque Delaware for more than two miles in either direction.

It is a two story frame building about 40ft. square, but the tower walls are built of heavy stone and are well fitted to withstand action of the winter torrents. Adjoining the stone wall on the upper side is a breakwater, constructed at the expense of Mr. Edmund C. Hill, in order to render the little castle more secure.

The lower story of the building has 28 cribs where the canoes are kept. Upstairs is the toilet room, where each member of the club has a private locker and a club room about 20ft. square, with a large bay window looking toward the river.

The interior of the club house is of light wood finished in oil, and the club room has a large open fireplace which bids fair to make it both warm and cheerful even in the most inclement weather. It will be lighted by gas, and the fixtures to support the globes and chandeliers are to be of black enameled iron.

The furniture is to be upholstered in leather, and in about two weeks when all is in readiness the new club house will be opened with a grand reception. It will be used mainly for a club room until spring when the canoeing season opens.

The distance from the new club house to the island is but little over a mile, and by taking a street car as far as Cadwalader Place the members of the club can reach their summer camping ground more easily and quickly than they could when they were compelled to paddle all the way from the bridge.

Fronting toward the river is a portico and an open veranda, upon which one may sit and view the summer sunsets or enjoy the evening breezes. On the southwest corner is a tower, which, when lighted up, will be a sort of miniature lighthouse, throwing its rays far acros the water. The building complete will cost about $8,000.

The Algonquin C. C. is composed of the old Park Island Canoe Association and some of the residents of Cadwalader place. It has twenty-four members and the shares are all taken. Mr. Edmund C. Hill is the Commodore; Mr. E. D. Anderson, Vice-Commodore, and Mr. E. E. Booze, Secretary and Treasurer. The Board of Trustees consists of the above officers along with Messrs. W. C. Lawrence Fred Donnelly and Harry Allen.—*Trenton (N. J.) Times.*

### The Executive Committee Meeting.

THE following notice of the date and place of the annual meeting of the executive committee of the A. C. A. was received after we had gone to press last week:

The annual executive meeting of the American Canoe Association will be held at the British-American Hotel, Kingston, Ontario, on Thursday, Nov. 17, 1892, at 11 o'clock A. M.

W. H. COTTON, Commodore, A. C. A.

KINGSTON, Nov. 1.

### Vesper B. C.

THE Vesper B. C. inaugurated a new form of winter amusement on Oct. 26 in its first phonographic camp-fire. Beside a number of musical selections, the evening entertainment included phonographic songs and recitations by a number of well-known canoeists who were, of course, not present in person. Among these were Messrs. J. W. Cartwright, C. B. Vaux, C. B. Ashenden, Com. Wing, G. L. Metze, Dr. F. R. Rix and Thomas Nelson Page. The entertainment was unusually interesting.

### GIVE CALIFORNIA A CHANCE.

SAN FRANCISCO, Oct. 5.—*Editor Forest and Stream:* While the fishermen, the bearmen and the snakemen have been getting in their work, and having it all their own way, I have kept quiet and bided my time, but that came at last, and I enter the list with a consciousness of a fair show to a place in the front rank. Here is the story to make all previous candidates quail and hide their diminished heads. Print it; give California a chance. It is a quail story:

A few days ago James R. Holt, the big member of the Holt & Gregg corporation, left the big brickyard near Anderson for a quail hunt along the banks of the Sacramento River. Under a cover of brush he discovered a nice flock of the birds, but when he raised his gun to have a shot they disappeared. He felt satisfied that there were quite a number under a particular brush and he blazed away. The noisy fluttering which followed told him the result, and he ran for his prize, and just as he was reaching out his hand to catch a wounded quail, he was shocked to discover an enormous rattlesnake in the line of the bird. Jim, although weighing nearly 300lbs., jumped backwards 6ft. from the brush, and then gained his breath. He approached the birds again, with his gun cocked and ready for a sudden shot, and learned that the snake was dead. When he fired at the birds he killed the snake and six quail, although none of the birds or the serpent were in view. The snake had eight rattles and a button, and was 3½ft. in length.

And here is another one from the Spokane *Morning Review:*

No two better and more congenial prospectors and miners than Paul Becker and Swanson ever lived, and like all true men of the mountains, are full of expedients if any emergency arises. A short time since they started up the mountain to work on a prospect, and when about a mile from camp unexpectedly raised a flock of grouse that lit in neighboring trees. Here was a dilemma, no dog, no gun, without them no chicken dinner to relieve the monotony of "dry salt." A bright idea seized Paul. Said he, "Swansy, run back to camp and get the gun while I hold them here by playing dog by barking at them." Back Swansy went, while Paul used his vocal powers to their fullest extent in imitation of the canine bark. The ruse was successful; the birds sat still, no doubt thinking a genuine hunter of the most approved breed had treed them. Swansy returned on the double quick, and while he brought down bird after bird Paul kept up the bark, saying afterward "he almost split his throat, but the scheme succeeded, as fried bird and savory potpie later on attested. This plan of securing birds is now made public as no patent can be obtained.

### Game Heads and Antlers.

MESSRS. W. W. HART & CO., of 11 and 13 Jacob street, will shortly issue a handsomely illustrated catalogue of game heads and antlers. In addition to the half-tone cuts, it will contain a full list of prices for mounted moose, elk, caribou and deer heads, as well as heads and whole specimens ready for mounting, antlers and the smaller animals, birds and fish. It will also contain a list of rugs, with or without mounted heads, including lion, tiger, polar, black, brown and grizzly bear, leopard, tiger cat, wolf, fox, etc. This catalogue will be sent free to any reader of FOREST AND STREAM.—*Adv.*

# Rifle Range and Gallery.

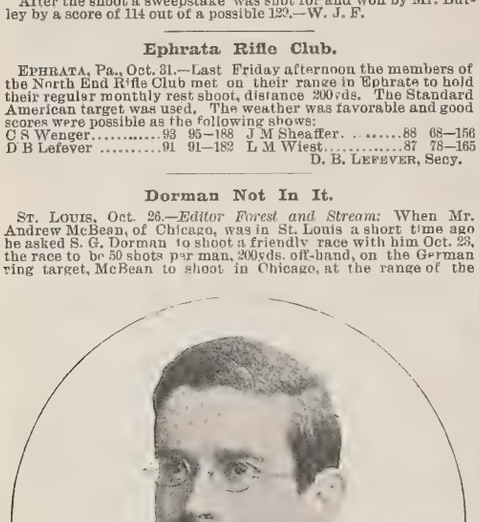
## Garden City Rifle Team.

THE Garden City Rifle Team met for their weekly contest Tuesday evening at Burley & Erickson's shooting gallery, 146 South Halstead street, Chicago. Conditions were 25yds., 25 shots each, open sights, free off-hand position, Massachusetts paper target, possible 300 points. Scores as follows:

| | | | |
|---|---|---|---|
| H S Burley | 275 | F Erickson | 262 |
| A McBean | 273 | C A Hemple | 259 |
| W J Gibbs | 270 | R B Taylor | 255 |
| G A Nisja | 268 | J C Martin | 253 |
| Al Sorensen | 250 | | |
| T L Thornton | 249 | | |

After the shoot a sweepstake was shot for and won by Mr. Burley by a score of 114 out of a possible 123.—W. J. F.

## Ephrata Rifle Club.



EPHRATA, Pa., Oct. 31.—Last Friday afternoon the members of the North End Rifle Club met on their range in Ephrata to hold their regular monthly rest shoot, distance 200yds. The Standard American target was used. The weather was favorable and good scores were possible as the following shows:

| | | | |
|---|---|---|---|
| C S Wenger | 93 | 95—188 | J M Sheaffer | 88 | 68—156 |
| D B Lefever | 91 | 91—182 | L M Wiest | 87 | 78—165 |

D. B. LEFEVER, Secy.

## Dorman Not In It.

ST. LOUIS, Oct. 26.—*Editor Forest and Stream:* When Mr. Andrew McBean, of Chicago, was in St. Louis a short time ago he asked S. G. Dorman to shoot a friendly race with him Oct. 23, the race to be 50 shots per man, 200yds. off-hand, on the German ring target, McBean to shoot in Chicago, at the range of the

MR. ANDREW MCBEAN, of Chicago.

Chicago Rifle Club and Dorman at St. Louis. The targets were duly forwarded, scores shot and then exchanged. Dorman's score 979 points, average 19.58 was poor, which was partly on account of a gusty 2 o'clock wind which made it almost impossible to place a bullet in the center of the "bull," although he used a 38-55 Winchester, using 55grs. of powder and 285gr. patched bullet.

Mr. McBean used a 32 40 Winchester, 35grs. powder and 165grs. lubricated bullet, and considering the fact that he shot the 50 shots without having a marker to show where any of the shots landed, the target is a beauty, and will be found hard to beat under the same conditions.

The target showed 45 "bulls," and 26 shots were 22 or better and inside of a 6in. circle. The total score footed up 1,059 points, average 21.18, leaving Mack the winner by 80 points.

Never mind Mack, we don't blame you, it's the Chicago style to take everything that is in sight. NAMROD.

## How Can Rifle Shooting Be Revived?

THERE has been a remarkable falling off in the interest in rifle shooting in this section of the country during the past two years, and even shooters themselves are puzzled to account for it. In 1888 the sport received a great impetus by the action of the Newark Shooting Society in projecting and carrying to a successful issue the week's prize shoot of the International Sharpshooters' Union, this affair having been the most successful and best managed shooting festival ever held in America. During 1889 and 1890 the interest was still alive; in 1891 there was a perceptible falling off, while during the present year there has been almost a stagnation, so far as the Schuetzen men and their sport is concerned. There have been some few festivals, the only ones of which could be classed as successful being those of the Newark Shooting Society, the Zettler Rifle Club, Miller Rifle Club, Excelsior Rifle Club and the one held at Ridgewood. And these can be called successful only from the fact that they were not financial failures.

When compared with affairs of 1887 to 1890, inclusive, a great difference is noted. During those years shooters from all over the country journeyed to New York and New Jersey to shoot along with the local shots, and from 50 to 75 shooters were usually found in the shooting houses. Among those who flitted about for pure love of the sport and to have a pleasant time with friends may be mentioned Messrs. Norris, Homrighausen and Rothart, of Baltimore; Seely, Daly, Koebler and others from Syracuse; Crain, from Maine; Beardsley and Wheeler from Bridgeport; Huggins from Pittsburgh; Gindele from Cincinnati; Cartwright, Jewell, Talbott, Stevens, Farrow, Wentworth and others from Massachusetts; McCafferty from Wilmington, and Lyons from Collinsville, Conn., this being only a partial list. During 1892 the only one of the above seen in this section was S. J. Lyons of Collinsville, Conn.

And then of the local men many are missing from the ranks, notably J. A. Boyken, Gus Zimmerman, Alex. Stein, T. J. Dolan, Geo. Doyle, G. W. Downs, C. E. Geusch, H. R. Pierson, Ferd. Hofele, C. C. King, Dr. Radbourne, E. J. Case, none of whose names have appeared in a prize list during the season. Dr. Boyken was prevented by business from devoting any time to shooting, and Gus Zimmerman's old enemy the rheumatism had him in its clutches, but why the others have been conspicuous only by their absence can only be conjectured. The prize lists have been fully as heavy as in previous years and the shooting has been no more difficult, nor have higher scores been necessary in order to win a place. I am inclined to the belief that much of the apathy is due to the monotony of individual contests and the need of something in the way of a variation in the manner of arranging contests. Year after year the Zettlers, Newark Shooting Society, Miller Rifle Club and other organizations publish the same old-time programmes offering prizes for 3-shot tickets on the German ring target, prizes for the best bullseyes and premiums for the most flags. There gets to be a sameness in the look of these programmes and shooters I am sure would welcome a change no matter in what shape.

This monotony could very easily be broken and the said breaking need not be an expensive venture. I have always been and am still a firm believer in the value of team shooting as compared with individual contests. Let it be understood however, that herein when I refer to "individual contests" I refer solely to the re-entry shooting at tournaments and not to strictly individual "matches.") I believe that one team match does more to create a love of emulation and to create a bond of fellowship between members of various clubs that does a dozen re-entry affairs. There is no reason however, why the latter should by superceded by the former. In fact one should help the other. A club arranging a programme for a prize shoot could well afford to put up a purse of say $25 (or perhaps $50) for a team race to be shot in with the regular events. Say for instance a contest is arranged for teams of three or four or even five men each from any club, each member to shoot 20 shots on the German ring target. Let the entrance fee per team be $10 and to the amount of the entry fees let the management add $25, the purse to be divided into two, three or four moneys according to the number of entries.

"But," says an astute (!) manager, "how can we afford to give back all the entrance money and an additional $25 or $50?"

Very easily, my dear sir, and make money by so doing for won't each one of the team men need sighting shots, and in order to get them won't they be obliged to spend their "cold cash" in your regular contests? Try the experiment just once and see if it will not be a paying venture and increase your attendance.

Then, again, by the way of still further varying your programme, arrange another team match, each team to comprise one expert and one novice: let each man fire ten shots on either the ring or point target; charge each team say $3 entrance, deduct if you wish 10 or 15 per cent. for expenses and divide the balance into prizes according to the number of teams entered. Either or both of these plans will at least vary the monotony of the present style of shooting, and will, I am positive, increase the receipts in the regular prize contests.

And then, in order to keep up the interest during what are known as the "off months," let the various clubs arrange friendly team matches to be shot on different ranges. The Newark Shooting Society has at least a dozen good shots; the Zettlers have over a score; the Millers and Excelsiors could each turn out a fair team; so why not arrange a series of matches between them for this coming winter? Let the teams comprise from eight to fifteen men each, let each man fire ten shots on the German ring target at 200yds., let each team at each contest pay an entrance fee equal to $1 a man, the winning team to take the pot, less expenses for the range. This would serve to keep up a lively interest between seasons, and would also serve to bring the members of the various clubs into closer communion.

The above are only suggestions, hastily thrown out, and now let such enthusiasts as Messrs. Hayes, Watts, Coppersmith, Walther, Zettler brothers, Dorrler and others give their views.

Y'RATILIM.
